States are reminded that it is a violation of Federal appropriations law to supplement above the 75th percentile with Federal funds. Such supplementation would contravene the Federal funding limits provided in the Act.

Statewide Limit

Section 402(i) of the Act does not require the State to establish a statewide limit as section 402(g)(1)(C) of the Act does for child care under the Family Support Act. We propose at § 257.63(b) to allow States to adopt a Statewide limit (or limits) for At-Risk Child Care. We believe that giving States this flexibility is consistent with Congressional intent. It give States budgetary and planning control in an optional program with limited funding. It may also allow them to provide services very similar to those provided under section 402(g).

The Statewide limit can be the same as the limit(s) established by the State for AFDC and transitional child care. It can be differentiated based on age or special needs. There actually could be as many as three Statewide limits since there could be different limits for children over age two, those under age two, and those having special needs.

We propose to have States so choosing to provide their Statewide limit(s) in the At-Risk Child Care Plan, as described at § 257.21(j).

Administrative Costs

FFP is also available for the general supervision and management of the program. It is clear from the language of the Act that the purpose of the program is to provide child care services to those families who are at risk of becoming AFDC dependent unless child care is made available, permitting the parent(s) to work. Although there is no restriction regarding the amount of funds available for administrative expenditures, there must be a correlation between the child care services payments claimed and the administrative expenditures claimed. Such administrative expenditures claimed must be reasonable and necessary expenditures of the program. It would be improper for a State to use all or most of the funds available for a project period to cover administrative expenditures. We will monitor States' performance in this area.

For child care under parts 255 and 256, the final regulations provide that FFP is not available for expenditures related to the recruitment and training of child care providers, resource development, and licensing activities. The proposed regulation at § 257.73(b) applies these restrictions for At-Risk Child Care. We believe that expenditures for these activities should not be funded through this program because funding for these activities is provided through Child Care Improvement (Licensing) grants, originally authorized by the Family Support Act of 1988, and the Child Care and Development Block Grant, authorized by OBRA 1990.

Non-supplantation (§ 257.64 of the Proposed Regulations)

Section 402(i)(5)(D) of the Act provides that amounts paid by the State IV–A agency for child care cannot "be used to supplant any other Federal or State funds used for child care services." Although there is no explanation of this provision in the legislative history, we assume that Congress intended to ensure that new Federal monies being made available for child care are not simply used to replace existing expenditures, but to increase the availability of services. We note that a similar (though not identical) provision is contained in the Child Care and Development Block Grant Act of 1990, which was passed at the same time.

Since the provision prohibits supplantation for child care services generally, a State cannot replace any current Federal or State funding for child care services with section 402(i) grant money. However, it is possible for a State to use current funding (including continuation funding) as the State match for section 402(i) care. The following example may help clarify the principle.

If a State had been spending $1 million in title XX block grant funds, $4 million in IV–A funds and $6 million in State funds ($4 million in IV–A match and $2 million in supplemental State funds) on child care services, this level of funding must continue from non-section 402(i) sources to avoid supplantation. The State could not reduce its State spending to $5 million and use $1 million to match $1 million in section 402(i) funds to achieve the previous level since that would replace State funds with section 402(i) funds in violation of the provision. However, the State could use the $2 million in current supplemental State funds as its match for the section 402(i) funds, and thus increase child care services by $2 million without having to increase State funding.

In order for the Administration For Children and Families to determine that the requirement of non-supplantation is met, the proposed regulation at § 257.64(b) requires the State to establish a dollar value for child care services for a base period. Expenditures will be compared with expenditures during the base period to determine whether supplantation has occurred. The base period should include all Federal and State funding for child care services. The requirement is limited to public funds.

We propose to define the base period to be a twelve-month period (e.g., the State fiscal year) which includes the month one year prior to the first month in which the State implements the At-Risk Child Care program. For example, States which have approved interim plans that were effective October 1, 1990 must, in defining their initial base period, include the month of September 1989. Thus the State might use calendar year 1989 or their State fiscal year beginning July 1, 1990.

In determining the level of expenditures during the base periods, the State must consider Federal and State programs. Differing fiscal or program years may add to the level of difficulty in establishing an amount for the base period. However, the flexibility provided in the proposed regulations in setting the base period should accommodate this difficulty.

General Administrative Requirements (§ 257.65 of the Proposed Regulations)

OMB Circular A–102, "Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments," is currently incorporated in the Department's regulations at 45 CFR parts 74 and 92. The child care programs subject to parts 255 and 256 are subject to the regulations at part 74. This is because they are funded under section 403 of the Act as open-ended entitlement grants. However, while there is a limitation of total funds available for Federal obligation each fiscal year for At-Risk Child Care, At-Risk Child Care is funded under the section 403 appropriation. For that reason and for administrative simplicity, we believe that At-Risk Child Care should be subject to the requirements of part 74, instead of part 92. The proposed regulation would therefore apply part 74 to the program. Consistent, however, with the regulations at § 201.5, subparts G (Matching and Cost Sharing) and I (Financial Reporting Requirements) of part 74 shall not be applicable to the program. Rather, the specific requirements of this regulation apply.

Financial Reporting (§ 257.66 of the Proposed Regulations)

The proposed regulation at § 257.66 establishes the financial reporting requirements for the program. We are proposing that estimates and expenditures for At-Risk Child Care program be reported in the same manner that estimates and expenditures for child care under parts 255 and 256 are reported. We expect to add a new section to the current financial reporting form used for expenditures made under title IV–A, the FSA–231, for estimates and expenditures for this program. Further guidance will be issued to States.

Financial reports are distinct from the annual report required by section 402(i)(6)(A)(i) of the Act. Our authority to require financial reports is found in section 1102 of the Act which permits the Secretary to establish rules that are necessary for the efficient administration of the program.

Pursuant to § 257.31, a family receiving At-Risk Child Care is required to make a contribution toward the cost of care. A contribution paid directly to the State IV–A agency which has made a full payment to the provider is considered program income. Consistent with longstanding policy, the proposed regulation at § 257.66(b) provides that State IV–A agency must use the deduction alternative at § 74.42(c) when reporting such income. Thus, such contributions will be used to offset expenditures when claiming FFP for child care services payments.

Cost Allocation (§ 257.67 of the Proposed Regulations)

The regulation proposes that in accordance with the cost allocation requirements of part 95, subpart E, a State shall amend its cost allocation plan to account for expenditures made under the At-Risk Child Care program. The regulation at § 95.519 provides that if a State has failed to submit an amended cost allocation plan, the costs claimed will be disallowed.

Disallowance Procedures (§ 257.68 of the Proposed Regulations)

FFP for expenditures claimed under At-Risk Child Care that are not made in accordance with these regulations and the State Plan will be disallowed. The proposed regulations provide that the deferral and disallowance regulations at § 201.15 are applicable to the At-Risk Child Care. Moreover, we propose that the procedures for the taking of disallowances and the managing of appeals applicable to the AFDC program and child care programs at parts 255 and 256, be applicable to this program. This is consistent with our intent to administer these programs in a similar manner.

PART 255—CHILD CARE AND OTHER WORK-RELATED SUPPORTIVE SERVICES DURING PARTICIPATION IN EMPLOYMENT, EDUCATION AND TRAINING

Applicable Standards (§ 255.4(c)(2) of the Proposed Regulations)

We propose to amend § 255.4(c)(2) to clarify that applicable standards of State and local law are standards which are generally applicable to care of a particular type in the State or local jurisdiction regardless of the source of payment for the care.

Background

Under the Family Support Act of 1988, States must guarantee child care to AFDC families when needed for employment or to enable participation in approved education and training activities (including participation in JOBS). This provision was effective in each State on the date of JOBS implementation, but not later than October 1, 1990. Effective April 1, 1990, States also have to guarantee child care for up to 12 months for former AFDC recipients who lose AFDC eligibility for an employment-related reason and need child care to accept or maintain employment. Final regulations implementing these provisions were published October 13, 1989. (54 FR 42148) Section 255.4(c)(2), which provides that child care must meet applicable standards of State and local law, applies to all child care provided under the Family Support Act.

A key principle guiding the Administration For Children and Families in writing these regulations was the concept of "parental choice." It is first articulated in the introductory section on the "Objectives of the Family Support Act and These Regulations" at 54 FR 42149 where we said "That consistent with individual responsibility is choice, and * * * parents (should) be given a wide range of options for child care while participating in the program." We further said in the preamble at 54 FR 42225 that "parents should be able to make informed choices about who provides care for their children." The regulations at § § 255.3(c) and 255.3(d) reflected this principle by allowing the caretaker relative to choose the type of child care (center, group family day care, family day care, or in-home care), if more than one type is available, and by requiring the State to have at least one payment mechanism by which self-arranged child care could be paid.

We believe that "parental choice" must be a paramount consideration. It is crucial for JOBS participants because

VOL 56 ISS 122 JE 25 1991 UMI

they may be required by the IV–A agency to leave their children in child care arrangements while they attend mandatory work and training activities. But it is also important in protecting the guaranteed nature of transitional child care benefits. Employed families could well lose access to child care services of their choice and the guarantee would be substantially reduced if special standards were allowed. Furthermore, it would be antithetical to our overall goal of supporting the family in its quest for independence and self-sufficiency to interfere in so personal and critical a decision as who will take care of one's children while one must be away from them.

Applicable Standards

Section 402(g)(3)(B)(ii) of the Social Security Act limits federal financial participation (FFP) for child care provided to eligible AFDC recipients and former AFDC recipients to child care which meets "applicable standards of State and local law." This provision is contained in the final regulations at § 255.4(c)(2) which also included "Tribal law, where applicable." Questions have arisen about the meaning of this provision; the purpose of the proposed regulation is to clarify the meaning of applicable standards.

Child care for which there are no applicable standards, i.e., no licensing or regulatory requirements set by the State or locality that specifically regulates child care, is legal care. Under the Family Support Act, such care is available for use by AFDC recipients and former recipients eligible for transitional child care. For example, if a State does not regulate family day care providers caring for less than three children, such care is legal, and, if the caretaker relative selects that provider, the State must pay for the care. In addition, if a provider is exempt from child care licensing requirements for reasons other than the source of payment, e.g., a sectarian child care center, such care would be legal because there are no applicable standards. Child care for which there are no standards will not be affected by this proposed regulation.

In addition, child care standards that are generally applicable are unaffected by this proposed regulation. Child care provided under section 402(g) has always been subject to any standard which is mandated in any law or regulation of the State or locality which generally applies to care of the same type in the State or locality, e.g., center care, group family day care, family day care, and in-home care. For example, we know that all States have child care licensure laws that include standards which address health and safety conditions and other aspects of care provided at child care centers. Since these are standards that have general applicability, they apply to title IV–A child care.

However, some States impose child care standards and regulations on publicly-funded child care that are not applicable to privately purchased care. The question has arisen whether, under title IV–A, a State may deny payment for child care which violates no general child care requirements in the State, but which does not meet an additional set of requirements which apply only to publicly-funded care. The proposed regulation at § 255.4(c)(2) precludes this. For child care funded under title IV–A, applicable standards include only those that are generally applicable to care of a particular type. A State may not set separate standards which apply only to title IV–A subsidized care. If a State has standards which affect only publicly-funded care, and a caregiver of that type of care does not meet them, for title IV–A purposes that care is still "legal," and the State must still pay for that care.

While we recognize that some States will be concerned that our proposed regulation will affect their role as stewards of public funds and their ability to protect children in publicly-funded child care, we believe that this impact is limited for the following reasons:

(1) Child care provided under section 402(g) has always been subject to any standard which is mandated in general law or regulation for child care of a particular type. A State which currently has health and safety standards that apply only to publicly-funded care could extend such standards to protect all children. Funding to assist States to do so is available through the licensing and monitoring grant under section 402(g)(6) of the Act and the Child Care and Development Block Grant Act of 1990.

(2) The proposed regulation does not require States to develop standards nor does it require that standards that States do have be uniform across all types of care.

(3) States have been paying for care, including informal care, that does not meet State standards for publicly-funded care, for years through the AFDC disregard.

Aid to Families with Dependent Children, Grant programs—social programs, Employment, education and training, Day care.

Part 257

Day care, Grant programs—social programs, reporting and recordkeeping requirements.

Dated: April 12, 1991.

Jo Anne B. Barnhart,

Assistant Secretary for Family Support.

Approved: April 25, 1991.

Louis W. Sullivan, M.D.,

Secretary, Department of Health and Human Services.

Accordingly, chapter II, title 45, Code of Federal Regulations is amended as set forth below:

PART 255—CHILD CARE AND OTHER WORK-RELATED SUPPORTIVE SERVICES DURING PARTICIPATION IN EMPLOYMENT, EDUCATION, AND TRAINING

1. The authority citation for part 255 continues to read as follows:

Authority: Secs. 402, 403 and 1102 of the Social Security Act as amended (42 U.S.C. 602, 603 and 1302).

2. Section 255.4 is amended by revising paragraph (c)(2) to read as follows:

§ 255.4 Allowable costs and matching rates.

* * * * *

(c) * * *

(2) The care meets applicable standards of State and local law, and/or Tribal law, where applicable. Applicable standards are licensing or regulatory requirements which apply to care of a particular type in the State, local area, or Indian reservation regardless of the source of payment for the care.

* * * * *

3. A new part 257 is added to read as follows:

PART 257—AT-RISK CHILD CARE PROGRAM

Sec.

257.0 Purpose.
257.10 State IV–A agency administration.
257.20 Requirement for a State At-Risk Child Care plan.
257.21 State plan content.
257.30 Eligibility.
257.31 Fee requirements.
257.40 Methods of providing child care.
257.41 Child care standards.
257.50 Reporting requirements.
257.60 Availability of funding.
257.61 Grant awards.
257.62 Matching requirements.
257.63 Allowable expenditures.
257.64 Non-supplantation.
257.65 General administrative requirements.
257.66 Financial reporting.
257.67 Cost allocation.
257.68 Disallowance procedures.

Authority: Secs. 402, 403, and 1102 of the Social Security Act as amended (42 U.S.C. 602, 603, and 1302).

§ 257.0 Purpose.

This part pertains to the At-Risk Child Care program which permits States to provide assistance to low-income working families who need child care in order to work and are otherwise at risk of becoming eligible for AFDC.

§ 257.10 State IV–A agency administration.

(a) The State agency responsible for administering or supervising the State's title IV–A Plan is responsible for administering the At-Risk Child Care program.

(b) The following functions must be performed by the State IV–A agency:

(1) Planning for and design of the At-Risk Child Care program, including submission of the State Plan to the Secretary;

(2) Establishing eligibility criteria;

(3) Setting local market rates and the sliding fee scale;

(4) Issuing policies, rules, and regulations governing the program;

(5) Submitting reports required by the Secretary as specified at § 257.50;

(6) Submitting quarterly estimates and expenditure reports pursuant to § 257.61; and

(7) Submitting Standard Form LLL (SF–LLL) which assures that funds will not be used for political lobbying purposes, pursuant to Part 93 of this title, prior to the beginning of each fiscal year.

(c) Except for functions described in paragraph (b) of this section, the State IV–A agency may carry out the At-Risk Child Care program through arrangements or under contracts with other State or local administrative entities, or other public or private organizations.

(1) In doing so, the entity or organization must follow the policies, rules, and regulations of the State IV–A agency and must not have the authority to review, change, or disapprove any State IV–A agency administrative decision. Neither shall the entity or organization substitute its judgment for that of the State IV–A agency in the application of policies, rules and regulations promulgated by the State IV–A agency.

(2) Other entities or organizations may determine individual eligibility for the At-Risk Child Care program in accordance with rules established by the State IV–A agency.

§ 257.20 Requirement for a State At-Risk Child Care Plan.

(a) The State IV–A agency must submit the At-Risk Child Care Plan to the Secretary for approval.

(b)(1) The At-Risk Child Care Plan shall be submitted as an amendment to the State Supportive Services Plan which is defined at § 255.1.

(2) An At-Risk Child Care Plan may be submitted at any time during the quarter in which the State intends it to be effective. Upon its approval, the plan will be effective not earlier than the first day of the calendar quarter in which it is submitted.

(3) A State shall be entitled to its maximum grant, as defined at § 257.60(c), for any fiscal year in which it has an approved At-Risk Child Care Plan; however, it may not claim expenditures for any period prior to the effective date of the State Plan.

(c)(1) States operating an At-Risk Child Care program under an interim application approved prior to the issuance of At-Risk Child Care preprints shall submit a new At-Risk Child Care plan as an amendment to its Supportive Services Plan to the Secretary for approval after issuance of the preprint.

(2) The amendment required under paragraph (c)(1) of this section must be submitted in the quarter following the quarter in which the preprint is issued, to be effective not earlier than the first date of the calendar quarter in which it is submitted.

(3) A State with an approved interim application with a start date of October 1, 1990 may claim for expenditures for the period beginning October 1, 1990.

(d) A State that submits a plan to provide for At-Risk Child Care that is not approvable will be given the opportunity to make revisions before final disapproval; upon formal disapproval, a State may request a hearing pursuant to the process set forth in § 201.4 and part 213 of this chapter.

§ 257.21 State plan content.

A State's At-Risk Child Care plan must include the following:

(a) Assurances that:

(1) The State IV–A agency will, upon approval of the plan, administer the At-Risk Child Care Program in accordance with the requirements of sections 402(i) and 403(n) of the Act and the regulations under this part;

(2) Child care meets applicable standards of State and local law in accordance with § 257.41;

(3) All child care providers, except those giving care solely to members of their family, are licensed, regulated, or registered by the State or locality in which the care is provided in accordance with § 257.41;

(4) Any provider of child care must allow parental access, in accordance with § 257.41;

(5) Amounts expended by the State for child care under section 403(n) of the Act do not supplant any other Federal or State funds used for child care services;

(6) Child care provided or claimed for reimbursement is reasonably related to the hours of employment;

(7) Individuals are not discriminated against on the basis of race, sex, national origin, religion, or handicapping condition in access to the At-Risk Child Care program.

(b) Definitions of the following terms:

(1) At-Risk of being eligible for AFDC;

(2) Low income, as it will be used to determine eligibility for the program; and

(c) Any other eligibility criteria that the State adopts, pursuant to § 257.30;

(d) A description of the State's priorities for providing At-Risk Child Care;

(e) A description of the administrative structure, including what entity determines eligibility, as provided in § 257.10;

(f) If not provided statewide, a list of political subdivisions where the At-Risk Child Care program is offered;

(g) Methods the State agency will use to provide child care in accordance with § 257.40;

(h) A description of the State's registration process for unlicensed and uncertified providers including time frames for payment, in accordance with § 257.41(b);

(i) Local market rates, in accordance with § 257.63(a) and § 255.4(a) of this chapter;

(j) The statewide limit(s), if any, in accordance with § 257.63(b);

(k) The sliding fee scale under which families will contribute to the cost of care, in accordance with § 257.31. This includes the income rules used to calculate the family's contribution to the cost of care, in accordance with § 257.31;

(l) A description of the State's policy on providing child care during gaps in employment, in accordance with § 257.30(c);

(m) A description of coordination of At-Risk Child Care with existing IV–A child care programs, with other

VOL

1991
UMI

Federally-funded child care programs, and with child care provided through other State, public, and private agencies; and

(n) The base period and the amount established for the base period, as provided in § 257.64.

§ 257.30 Eligibility.

(a) A family is eligible for child care under this part provided the family:

(1) Is low income, as defined in the approved State At-Risk Child Care Plan;

(2) Is not receiving AFDC;

(3) Is at risk of becoming eligible for AFDC, as defined in the approved At-Risk Child Care Plan;

(4) Needs such child care in order to accept employment or remain employed; and

(5) Meets such other conditions as the State may describe in its approved At-Risk Child Care Plan.

(b) The State may provide child care for any child in the family who needs such care and who:

(1) Is under age 13; or

(2) Is under age 19 (or under age 20, if the State so provides in its definition of dependent child in its State IV–A plan), and

(i) Is physically or mentally incapable of caring for himself or herself, as verified by the State based on a determination of a physician or a licensed or certified psychologist; or

(ii) Is under court supervision.

(c) A State IV–A agency may provide child care if child care arrangements would otherwise be lost:

(1) For up to two weeks prior to the start of employment; or

(2) For up to one month during a break in employment if subsequent employment is scheduled to begin within that period.

§ 257.31 Fee requirement.

(a) The State IV–A agency must require each family receiving At-Risk Child Care to contribute toward the payment for such care based on the family's ability to pay.

(b) Each State IV–A agency shall establish a sliding fee scale which will provide for some level of contribution by all recipients.

(c) The State IV–A agency may vary the period of collection for different fee levels.

(d) The State IV–A agency may establish whether fees are paid to the providers or to the State agency.

§ 257.40 Methods of providing child care.

(a) A State may use any of the following methods:

(1) Providing the care directly;

(2) Arranging the care through public or private providers by use of purchase of service contracts or vouchers;

(3) Providing cash or vouchers in advance to the caretaker relative so that the child care costs may be prepaid;

(4) Reimbursing the caretaker relative for child care expenses incurred; or

(5) Adopting such other arrangements as the agency deems appropriate, including certificates.

(b) If more than one type of child care is available, e.g., center, group family care or family day care, the caretaker relative must be provided an opportunity to choose the arrangement.

(c)(1) The State IV–A agency may select the method of payment under paragraph (a) of this section.

(2) The State IV–A agency must establish at least one method by which self-arranged child care can be paid.

(d) The State IV–A agency must coordinate its child care activities under this part with existing child care resource and referral agencies and with early childhood education programs in the State, including Head Start programs, preschool programs funded under chapter 1 of the Education Consolidation and Improvement Act of 1981, and school and nonprofit child care programs (including community-based organizations receiving funds designated for preschool programs for disabled children).

§ 257.41 Child care standards.

(a)(1) Child care provided with funds under this part must meet applicable standards of State and local law, and/or Tribal law.

(2) Applicable standards are licensing or regulatory requirements which apply to care of a particular type in the State, local area, or Indian reservation, regardless of the source of payment for the care.

(b)(1) All providers of care who are not required to meet applicable standards as provided in paragraph (a) of this section and who are not individuals providing care solely to members of the individual's family, must be registered by the State or locality in which the care is provided prior to receiving payment.

(2) Registration procedures must:

(i) Collect only such information about providers required to register, pursuant to paragraph (b)(1) of this section as is necessary for the State to make payment to the provider or furnish information to the provider;

(ii) Facilitate appropriate and prompt payments;

(iii) Allow providers to register with the State or locality after selection by the parent(s);

(iv) Be simple and timely;

(v) Not exclude or have the effect of excluding any categories of child care providers.

(c) Child care providers receiving At-Risk Child Care funding must afford parents unlimited access to their children, including written records concerning their children, and to providers caring for their children, during normal hours of provider operation and whenever the children are in the care of the provider.

§ 257.50 Reporting requirements.

(a) Beginning with FY 1993, the State IV–A agency shall prepare and submit an annual report to the Secretary that contains the following:

(1) The number of children receiving services and the average cost of such services separately by type of care, including center-based, group home, family, and relative care;

(2) The child care licensing and regulatory (including registration) requirements in effect in the State with respect to each type of care; and

(3) The enforcement policies and practices in effect in the State which apply to licensed and regulated child care providers (including providers required to register).

(b) The State IV–A agency shall submit its report to the Secretary no later than 90 days after the end of the federal fiscal year.

(c) The State IV–A agency shall make the report available for public inspection within the State and shall provide a copy of each report, on request, to any interested public agency.

§ 257.60 Availability of funding.

(a) A State agency is entitled to payments if it has an approved State At-Risk Child Care Plan. The payments are available only for the allowable expenditures of the program.

(b)(1) A State's limitation, i.e., share, from the national total of available funds for a fiscal year is based on the same ratio as the number of children under 13 residing in the State is to the national total of children under 13.

(2) The number of children under 13 for the States is derived from the best data available to the Secretary for the second preceding fiscal year, or for the Territories, the best data available for the closest fiscal year prior to the second fiscal year.

(c) The difference between the amount not paid to a State in a fiscal year and the State's limitation as described in paragraph (b) of this section for that same fiscal year may be added to a State's limitation for the following fiscal year. The total amount available in a fiscal year is referred to as a State's maximum grant for that year.

(d) For American Samoa, Guam, Puerto Rico, and the Virgin Islands, funding under this part is subject to the funding restrictions established under Section 1108 of the Social Security Act.

§ 257.61 Grant awards.

(a) States are required to submit estimates and report expenditures on a quarterly basis. Adjustments in subsequent quarters' grant awards will be made to reflect over- and under-estimates in prior quarters' expenditures.

(b) The total amount paid to a State in a fiscal year may not exceed the State's limitation or maximum grant for the fiscal year, whichever is appropriate.

(c) The regulations pertaining to State estimates and expenditures at § 201.5 of this chapter and the timely filing of claims at part 95, subpart A of this title apply to expenditures under this part.

§ 257.62 Matching requirments.

(a) Payments for child care services provided under this part and for the costs of administering them are available at the Federal Medical Assistance Percentage (FMAP) rate.

(b) Expenditures for the program will be matched at the FMAP rate applicable for the fiscal year in which expenditures are made.

(c) A State's share of expenditures must be in cash and may include public and private funds.

(1) Public funds may be considered as the State's share in claiming FFP when the funds are:

(i) Appropriated directly to the State or local agency, or transferred from another public agency (including Indian tribes) to the State or local agency and under its administrative control or certified by the contributing public agency as representing expenditures eligible for FFP;

(ii) Not used to match other Federal funds; and

(iii) Not Federal funds, or are Federal funds authorized by Federal law to be used to match other Federal funds.

(2) Funds donated from private sources may be considered as the State's share in claiming FFP when the funds:

(i) Are transferred to the State or local agency and under its administrative control;

(ii) Are donated without any restriction which would require their use for assisting a particular individual or organization or at particular facilities or institutions; and

(iii) Do not revert to the donor's facility or use either directly or indirectly.

(3) An amount equal to any funds received which do not meet the conditions of paragraphs (c) (1) and (2) of this section must be deducted from the State's expenditure claims subject to Federal matching.

(4) Third-party in-kind contributions may not be used.

(d) For American Samoa, Guam, and the Virgin Islands, the matching requirement for the first $200,000 in expenditures made in a fiscal year is waived.

§ 257.63 Allowable expenditures.

(a) FFP is available for the actual cost of child care, but not for more than the applicable local market rate.

(1) The applicable local market rate must be determined in accordance with the provisions of § 255.4 (a)(2) and (a)(3) of this chapter.

(b) The State agency may establish a statewide limit.

(1) The statewide limit may be the same as the statewide limits established at § 255.4(a)(1) of this chapter or may be a higher or lower amount;

(2) The State may specify a higher statewide limit for children with special needs.

(c) FFP is available for expenditures made in administering the provision of child care services under this part. FFP is not available for costs associated with the recruitment or training of child care providers, resource development, or licensing activities.

§ 257.64 Non-supplantation.

(a) Amounts expended by the State IV–A agency for child care under this Part shall not be used to supplant any other Federal or State funds used for child care services.

(b)(1) The State must determine the total amount of Federal and State funds expended during a base period (as defined in paragraph (b)(2) of this section) for child care services. States must assure that the amount of funding from other sources is maintained at the amount established for the base period.

(2) The base period will be a twelve-month period (e.g., the State fiscal year) which includes the month one year prior to the first month in which the State implements the At-Risk Child Care program.

(3) The amount established for the base period will be included in the State's At-Risk Child Care Plan.

§ 257.65 General administrative requirements.

The provisions of part 74 of this title (with the exception of subpart G, Matching and Cost Sharing, and subpart I, Financial Reporting Requirement) establishing uniform administrative requirements and cost principles shall apply to this program.

§ 257.66 Financial reporting.

(a) State estimates and expenditures will be reported on the financial reporting form for expenditures made under title IV–A.

(b) Contributions made by families for the cost of care where the State has made a full payment to the provider will be reported as program income and will be used to offset expenditures claimed as child care services payments. The requirements at § 74.42(c), subpart F of this title apply.

§ 257.67 Cost allocation.

A State agency shall amend its cost allocation plan to include the costs of the program, in accordance with the regulations at part 95, subpart E of this title.

§ 257.68 Disallowance procedures.

(a) Expenditures under this plan that do not meet the requirements of this part or the State At-Risk Child Care Plan are unallowable.

(b) The deferral and disallowances regulations of § 201.15 shall apply to this program. If the State IV–A agency disagrees with the decision to disallow FFP, it can appeal under existing title IV–A procedures, including review of the Departmental Appeals Board, in accordance with part 16 of this title.

Postal Service

39 CFR Part 111
Zip+4 and Zip+4 Barcoded Rate Presort Requirements; Proposed Rule

VOL 56 ISS 122 JE 25 1991 UMI

POSTAL SERVICE

39 CFR Part 111

Zip+4 and Zip+4 Barcoded Rate Presort Requirements

AGENCY: Postal Service.

ACTION: Proposed rule; solicitation of suggestions.

SUMMARY: This proposal would amend the Domestic Mail Manual (DMM), with a proposed effective date of September 20, 1992, to require that nonbarcoded mailpieces within Zip+4 Barcoded rate mailings maintain a barcode clear zone.

This proposal would also amend the DMM, with a proposed effective date of September 15, 1991, to correct an error in the terminology used to describe the required relationship between the reflectance of the background of the mailpiece and the reflectance of the ink in the barcode.

This proposal would amend the weight requirements for automation-based rate mailings to provide that the maximum weight limit for any mailpiece within a Zip+4 barcoded rate mailing will remain at the current 3.0 ounces.

This proposal would also amend existing Zip+4 rate sortation requirements in DMM chapter 5 and, add new sortation options for ZIP+4 Barcoded rate categories to DMM chapter 5. If adopted, the new sortation options would become effective upon publication of a final rule, expected to be no later than September 15, 1991.

In addition, the Postal Service seeks preliminary comments on its plan to make the sortation options in DMM chapter 5 mandatory for all automation-based rate mailings of letter-size pieces effective in March 1992. Under this plan, current sortation requirements in DMM sections 364, 365, and 366, for First-Class Mail; 424.5, 424.6, and 447, for second-class mail; and 628 and 647 for third-class mail, would be eliminated. Only the sortation options in chapter 5, as currently stated and as proposed in this rulemaking, could be used to qualify for presorted Zip+4 and Zip+4 Barcoded rates.

The Postal Service anticipates that mailers will need some time to make such a transition. Accordingly, in addition to comments on the proposed preparation requirements in chapter 5, the Postal Service hereby requests mailers to provide comments on the concept of eliminating the current automation-compatible mail provisions in chapters 3, 4, and 6, and to provide information regarding the length of transition time they would need to change their mailing operations to meet the requirements of the chapter 5 preparation options. The Postal Service will use this information in formulating a possible future proposed rule to make chapter 5 preparation options the only permissible sortation options for obtaining presorted Zip+4 Barcoded rates.

DATES: Comments must be received on or before August 9, 1991.

ADDRESSES: All written comments should be mailed or delivered to the Director, Office of Classification and Rates Administration, U.S. Postal Service, room 8430, 475 L'Enfant Plaza, SW., Washington, DC 20260–5903. Copies of all written comments will be available for inspection and photocopying between 9 a.m. and 4 p.m. Monday through Friday, in room 8430 at the above address.

FOR FURTHER INFORMATION CONTACT: Mr. Richard H. Arvonio (202) 268–5164, or Mrs. Lynn M. Martin (202) 268–5176, for information concerning the chapter 5 preparation requirements and the maximum weight requirements for Zip+4 Barcoded rate mailings.

Ms. Evelyn Stein, (202) 268–5175, for information concerning the proposed changes to the barcode clear zone requirements and the print contrast/print reflectance difference requirements.

SUPPLEMENTARY INFORMATION:

A. Barcode Clear Zone Reflectance Requirements for Non-Barcoded Pieces in ZIP+4 Barcoded Rate Mailings

In order to process large volumes of mail quickly and accurately the Postal Service must be able to apply barcodes to nonbarcoded letter-size mail. The mailpiece must provide a relatively clear zone for barcode application (i.e., one that meets certain reflectance requirements) for the barcode to be clearly distinguishable from the background upon which it is printed. DMM section 551.4 establishes "barcode clear zone" reflectance criteria for ZIP+4 Barcode rate mail and for all mail included in ZIP+4 mailings.

Current regulations do not require nonbarcoded mailpieces (pieces not bearing a ZIP+4 or delivery point barcode) that are included in a ZIP+4 Barcoded rate mailing to have a clear zone meeting the reflectance requirements of DMM 551.4. However, a clear zone meeting these reflectance criteria on nonbarcoded pieces is necessary to allow the Postal Service to apply a ZIP+4 barcode wherever possible to mailpieces that the mailer was unable to barcode with a ZIP+4 or delivery point barcode, but which have been included as part of an automation-based rate mailing. Adding this requirement for nonbarcoded pieces in mailings barcoded in either the lower right corner or in the address block will provide the USPS an opportunity to automate the sortation of all letter-size mail which has been entered into the automated mailstream as part of a barcoded rate mailing, thereby enhancing the Postal Service's ability to process increased volumes on the more efficient automated equipment.

Accordingly, the Postal Service proposes to require that all nonbarcoded mailpieces in any barcoded mailing have a barcode clear zone that produces a background reflectance of at least 50 percent in the red and 45 percent in the green portions of the optical spectrum, as specified by DMM 551.4, and that meets the opacity, dark fiber, and background pattern criteria of 551.4.

Under this proposed change, mailers who barcode in the address block must either maintain a clear zone in the lower right portion of the envelope of non-barcoded pieces or present those non-barcoded pieces in a separate, non-automation-compatible mailing.

To allow the mailing industry time to use up existing supplies of paper or envelope stock, and to plan for the change, the Postal Service proposes to delay implementation of this requirement, if adopted, until September 20, 1992. Comments are invited on both the time frame and the proposed regulation itself.

B. Required Relationship Between the Reflectance of the Background of the Mailpiece and the Reflectance of the Ink in the Barcode

In the final rule on Eligibility Requirements for Automated Rate Categories (56 FR 2598) published January 23, 1991, the term "print contrast ratio" (PCR) was incorrectly used in DMM 551.42. The proper term is "print reflectance difference" (PRD). Since USPS barcode reader electronics use a direct measurement of ink and background, the print reflectance difference is a more relevant measurement of the information evaluated for barcode scanning. Print reflectance difference is the reflectance of the background of the mailpiece minus the reflectance of the ink used to print the barcode on the mailpiece. This result is multiplied by 100 and is expressed as a percentage. A print reflectance difference of 30 percent is necessary for successful processing of barcoded mail on USPS barcode sorting equipment. Unlike USPS OCR electronics, barcode sorters do not perform a thresholding function to compensate for background reflectance and, therefore, the print contrast ratio requirement is not appropriate for barcodes, but only addresses.

Accordingly, the Postal Service proposes to correct this error in terminology effective September 15, 1991, to change the PCR requirement of 30 percent in current DMM 551.42 to a requirement for a 30 percent "print reflectance difference." It is anticipated that correction of this error in terminology will not have a significant impact on mailers' ability to qualify for automation rates, although some adjustment may be required. This proposed change restores the correct term ("print reflectance difference") that had appeared in the DMM prior to February 24, 1991. Until September 15, either a PCR or a PRD of 30 percent will be accepted.

C. Relaxing the 2.5-Ounce Maximum Weight Requirement for ZIP+4 Barcoded Rate Mailings

In order to encourage more mailers to prepare ZIP+4 Barcoded rate mail, and thereby allow the Postal Service to achieve the cost savings and efficiencies associated with processing customer barcoded mailings, the Postal Service proposes to allow mailers to continue to include mailpieces that weigh up to 3.0 ounces within ZIP+4 Barcoded rate mailings.

An evaluation of the Postal Service's earlier decision to impose a 2.5 ounce weight limit on all automation-based rate mailings has established that a distinction should be made between mail prepared for processing On Optical Character Reading (OCR) equipment and ZIP+4 barcoded mail ready for immediate processing on barcode sorters. Mail which is prebarcoded bypasses the OCR, which can eliminate a step in processing thereby making the lower throughput associated with heavier pieces less of a problem.

A similar change is not being proposed to the ZIP+4 rate weight requirements because ZIP+4 mail must still undergo this two-step sortation process. Therefore the maximum weight for pieces in ZIP+4 rate mailings will be reduced to 2.5 ounces on September 15, 1991, as provided in DMM 521.3.

D. Revisions to Chapter 5 Sortation Requirements

Some mailers have advised the Postal Service that they are unable to prepare mailings at the ZIP+4 Barcoded rates because of the current requirement to document pieces by the type of tray or sack in which they are placed. These requirements are necessary under the current preparation requirements because different presort levels of tray or sack qualify for different rates. This documentation is necessary to allow the Postal Service to verify the mailer's preparation of the mail and, therefore, its eligibility for the rates claimed. However, many mailers are apparently unable to take advantage of ZIP+4 Barcoded rates because their mailing operations do not allow them either to predict the level of tray or sack into which the piece or package will be placed, or to efficiently determine this information following mail preparation. This appears to be a particular problem for mailers using multi-line OCRs to barcode and sort a wide mix of mailpieces having different sizes and weights. Other mailers have indicated that they are unwilling to convert to chapter 5 tray-based preparation because if they choose to prepare ZIP+4 Barcoded mail under the current requirements in chapter 5, they will not qualify as many pieces for the 5-digit and 3-digit ZIP+4 Barcoded rates as they could under the current presort options available in DMM chapters 3, 4, and 6. For example, in a third-class 5-digit ZIP+4 Barcoded rate mailing prepared in sacks as described in DMM 626, as few as 125 pieces in a 5-digit sack are eligible for 5-digit level rates, as well as 5-digit packages in 3-digit sacks of 125 or more pieces. By contrast, in a mailing of any class prepared in accordance with current DMM 563, a full tray of mail is required to qualify barcoded pieces for the 5-digit ZIP+4 Barcoded rates. Similarly, First-Class sortation in DMM 364.2 allows ZIP+4 barcoded pieces in packages containing as few as 10 pieces to a 5-digit ZIP Code area to qualify for the 5-digit ZIP+4 Barcoded rate when placed within 5-digit, unique 3-digit, and SCF trays, whereas a full tray of mail to the 5-digit area is required by DMM 563 in order to qualify ZIP+4 barcoded pieces for the 5-digit ZIP+4 Barcoded rates.

In response to this situation and particularly in light of the Postal Service's future intent to eliminate the ZIP+4 and ZIP+4 Barcoded rate sortation options in DMM chapters 3, 4, and 6 (as noted in subsection E below), the Postal Service is proposing to add new alternative package-based preparation options to the DMM as sections 563.2, 563.3, and 563.4. The 5-digit mailing option in 563.2 would allow mailers to qualify for 5-digit ZIP+4 Barcoded rates where there are 10 or more ZIP+4 barcoded pieces for a 5-digit ZIP Code area provided all pieces (100%) in the mailing bear a ZIP+4 barcode or delivery point barcode. Pieces in groups of 10 or more for 5-digit areas will be eligible for the 5-digit ZIP+4 Barcoded rate regardless of the level of presort of the tray in which they are placed. Only full 5-digit, full 3-digit, and SCF trays of any volume will be permitted in 5-digit ZIP+4 Barcoded rate mailings.

Similarly, in 3-digit Barcoded rate mailings prepared under § 563.3 barcoded pieces within groups of 50 or more pieces to the same 3-digit ZIP Code area will qualify for the 3-digit ZIP+4 Barcoded rate. Full three-digit trays and SCF trays as well as less than full SCF trays may be prepared.

New section 563.4 will provide an option for combining mail prepared under 563.2 and mail prepared under 563.3 into a single mailing.

These new sortation options should help more mailers qualify for the ZIP+4 Barcoded rates under chapter 5 provisions. Furthermore, since qualification for the rate levels is not dependent upon the level of tray in which a piece is placed, the documentation required to accompany 3-digit Barcoded rate mailings need not show the level of tray or the number of pieces in a tray. (No documentation is required for 5-digit ZIP+4 Barcoded rate mailings since 100 percent of the pieces in the mailing must be ZIP+4 barcoded or delivery point barcoded.) This change should alleviate the documentation problems experienced by first- and third-class mailers under current chapters 3 and 6 preparation as well as under the current chapter 5 preparation.

The current ZIP+4 rate preparation requirements in chapter 5 will also be revised to allow more pieces to qualify for the presorted ZIP+4 rates. Although the ZIP+4 rate preparation requirements in chapter 5 will remain tray-based, less than full SCF trays will be permitted for all three classes of mail (previously this was allowed for second-class mail only). The mail within the less-than-full SCF trays must be packaged and labeled. This will allow third-class mailers to prepare such mailings in one mailstream (the current chapter 5 regulations require pieces not filling trays to be submitted as a separate mailing), as well as allow more pieces of first- and third-class to qualify for presorted ZIP+4 rates. As explained in part E below, the adoption of consolidated presortation requirements is not being extended to the ZIP+4 rate preparation portion of chapter 5 at this time.

The existing tray-based method of preparing ZIP+4 Barcoded rate mail under DMM 563 (renumbered in this proposed rule as 563.1) will remain with some changes described later in this summary.

VOL 56 ISS 122 JE 25 1991 UMI

The following specific changes are proposed to chapter 5:

(1) Current DMM 561 is amended to provide for a new subsection that explains the various options that mailers have to prepare presorted ZIP+4 and ZIP+4 Barcoded rate mailings. Specifically, it explains that, in addition to chapters 3, 4, and 6 sortation, there is one tray-based ZIP+4 option in 562, and both a tray-based (563.1) and package-based sortation options (563.2 through 563.4) for ZIP+4 Barcoded rate mailings.

(2) The definition of what constitutes a full tray is clarified for all chapter 5 sortation options from "3/4 full of mail when its contents are reasonably compressed" to "3/4 full of mail when the bottom of the tray is placed at an approximately 90 degree angle to a level horizontal surface and the contents of the tray are compressed by their own weight." This will eliminate the possibility of inconsistent interpretations of the term "reasonably compressed" as well as any need to further define procedures for verifying it.

(3) The current requirement in chapter 5 that use of trays is mandatory for all classes of mail is extended to the new sortation options. Trays are the most effective container to maintain the automation compatibility of the mail. As explained in subsection E of this proposal, the completion of chapter 5 requirements will also result in the elimination of existing preparation rules in chapters 3, 4, and 6 for automation-based rate mailings. Through that process it will become a requirement that trays be used exclusively for ZIP+4 and ZIP+4 Barcoded rate mailings, and the use of sacks for second- and third-class mailings at those rates will be eliminated.

(4) The current requirement in chapter 5 for sleeving and banding trays that travel beyond the office of mailing is extended to the new sortation options. Unsleeved trays run the risk of having their contents fall out of the trays during transportation and handling within the postal system. To ensure that the trays and their contents remain intact during transportation, sleeves that are banded with a plastic strap at least once around the length of the tray are necessary.

(5) A requirement to face all the mail in the same direction within trays is added to all chapter 5 sortation options. This is a basic requirement for all presort categories of mail that is being restated in chapter 5. Having mail faced in the same direction is necessary for processing pieces on automated equipment.

(6) The current tray-based presorted ZIP+4 rate preparation requirements in DMM 562 are replaced with new tray-based regulations that:

(a) Allow less than full SCF trays to qualify for First-Class ZIP+4 Presort rates and second- and third-class basic ZIP+4 rates. For First-Class Mailings, there must be at least 50 pieces per 3-digit area in SCF trays. There is no minimum number of pieces in SCF trays for second- and third-class mail. Allowing less than full SCF trays will allow mailers to qualify all ZIP+4 coded pieces in a mailing for a ZIP+4 rate, and allow mailers of third-class matter to avoid having to prepare pieces that could not be placed in full trays as a separate mailing. (Second-class mailers can currently prepare less than full SCF trays.)

(b) Add a requirement to prepare pieces in less-than-full SCF trays in 3-digit packages that are labeled. Packages must be prepared with rubber bands. Packaging of pieces in less-than-full trays is necessary to maintain the orientation of the pieces in the trays. Labeling the packages gives the Postal Service additional flexibility when determining the best way to process the pieces in a tray.

(c) Revise the regulations for overflow trays to show that they pertain only to 5-digit and 3-digit trays, and that the required packages in these less-than-full trays must be labeled. Since SCF trays may now be less than full there is no need for regulations governing overflow SCF trays. The current regulations already require that pieces in less-than-full overflow trays be packaged. The requirement to label the packages is added to give the Postal Service additional flexibility when determining the best way to process the pieces in the tray. These packages must also be prepared with rubber bands.

(d) Clarify that documentation must separately show the number of pieces in 3-digit trays and the number of pieces in SCF trays. This requirement is needed because different second- and third-class ZIP+4 rates apply to mail in 3-digit trays than apply to mail in SCF trays.

(e) Add a requirement to include First-Class residual mail in the required documentation. This is necessary to establish that mailers have met the 85 percent ZIP+4 code requirement for the entire mailing and to determine what additional postage is owed the Postal Service for the residual pieces.

(f) Add a requirement to place mail in First-Class residual trays in 3-digit ZIP Code sequence to facilitate verification against the required documentation. A requirement is also added to package pieces in less-than-full residual trays by 3-digit ZIP Code area and to label the packages. The packaging is necessary to maintain the orientation of the pieces in the trays. The packages must be secured with rubber bands. Labeling the packages gives the Postal Service more flexibility when determining the best way to process the pieces in the tray. An alternative method of preparing residual is described in 6-g below.

(g) Add a new physical separation method of preparing and documenting residual mail as an alternative option for mailers who cannot sequence residual mail by 3-digit ZIP Code area as described above. Under this option, ZIP+4 coded mail pieces are place in separate trays from those that are not ZIP+4 coded. The pieces in all residual trays must be further separated into groups of 100 pieces. The counts from these trays must be included in the summary portion of the documentation.

(h) Clarify tray label requirements. The requirements for labeling 3-digit trays are made consistent with the new sections in 560. The proposed regulations also specify that trays of all classes of mail must show the name of the mailer and the mailer location on Line 3 of the tray label, rather than the post office of origin. The descriptive prefix "FR" (meaning "from") that appears in front of the name of the mailer is omitted. With new destination rates and use of the plant-verified drop shipment procedures by mailers, the name of the mailer and the mailer location are more descriptive of where the mail originated.

(i) Add a statement clarifying that only standard size 2-foot trays may be used to prepare presorted ZIP+4 mail.

(7) The current tray-based Zip+4 barcoded regulations are renumbered in section 563.1, and are amended as follows:

(a) A requirement that pieces in 5-digit trays be 100 percent Zip+4 or delivery point barcoded is added. When processed at General Mail Facilities (GMFs), mail presorted to 5-digit levels is run on the barcode sorters as one of the last steps in processing the mail. Therefore, non-Zip+4 barcoded pieces rejected by barcode sorters when running 5-digit mail will not be identified until late in the processing windows, generally too late to allow a run of the rejects on an OCR (to add a barcode) and re-run them through the barcode sorters and still meet delivery service schedules. Furthermore, to reduce facilities costs and to increase processing efficiency, the Postal Service is beginning to deploy barcode sorers which will sort 5-digit presorted mail at Associate Offices and delivery offices that are non-OCR sites. Non-barcoded mail rejected by barcode sorter at these locations will either have to be worked manually, or rerouted back to the SCF or GMF for further processing through OCRs or MPLSMs, at additional expense to the Postal Service. In the latter case service delays will also result. For these reasons, the Postal Service does not believe it is operationally sound to continue to accept up to 15 percent non-Zip+4 barcoded or non-delivery point barcoded pieces sorted to 5-digit levels as part of a barcoded rate mailing. Although extra processing will also ensue when mail presorted to 3-digit levels is rejected by barcode sorters, these pieces are identified earlier in the processing system and in time to be rerun through OCRs or MPLSMs and still meet service standards. Furthermore, these pieces will generally be processed at GMFs or SCFs. Accordingly, although mailers and the Postal Service would benefit if all mailer barcoded mailings were required to be 100 % Zip+4 barcoded or delivery point barcoded, at the present time the Postal Service proposes to impose this requirement only on mail qualifying for 5-digit Zip+4 barcoded rates.

(b) A requirement to label packaged mail in overflow trays is added. These trays are less than full by definition, and the pieces in these trays are currently required to be packaged to maintain their orientation. The added requirement to label the packages will give the Postal Service additional flexibility when determining the best way to process the pieces in the tray. The packages must be prepared with rubber bands.

(c) A requirement is added to document residual mail. This is needed to determine that the 85% barcoded piece requirement for the entire mailing has been met and to determine the proper postage owed the Postal Service for the residual pieces.

(d) A requirement is added to place mail in residual trays in 3-digit Zip Code sequence to facilitate verification to package and lable pieces in less-than-full residual trays. The packages must be prepared with rubber bands. The packaging is necessary to maintain the orientation of the pieces in the trays. Labeling the packages gives the Postal Service more flexibility when determining the best way to process the pieces in the tray. An alternative method of preparing residual pieces if described in D-7-e below.

(e) A new physical separation method of preparing and documenting residual mail is added as an alternative option for mailers who cannot sequence residual mail by 3-digit Zip Code area as described above. Under this option, Zip+4 and delivery point barcoded mail pieces are placed in separate trays from those that are not Zip+4 or delivery point barcoded. If mailers wish to claim Zip+4 rates on pieces that do not bear a barcode, but bear a correct numeric Zip+4 code, the residual pieces that are not Zip+4 barcoded or delivery point barcoded may be further separated into trays that contain only pieces with numeric Zip+4 codes and trays that contain only pieces with numeric 5-digit Zip Codes. The pieces in all residual trays must be further separated into groups of 100 pieces. The information from thee physical counts must be included in the summary portion of the required documentation.

(f) Tray label requirements are clarified. The requirements for labeling 3-digit trays are made consistent with the new sections in 560. The proposed regulations also specify that trays of all classes of mail must show the name of the mailer and the mailer location on line 3 of the tray label rather than the post office of origin. The descriptive prefix "FR" (meaning "from") that appears in front of the name of the mailer is omitted. With new destination rates and use of the plant-verified drop shipment procedures by mailers, the name of the mailer and the mailer location are more descriptive of where the mail originated.

(g) A statement is added to clarify that only standard-size 2-foot trays may be used to prepare presorted Zip+4 Barcoded rate mail under this option

Note: As explained in part E below, the adoption of consolidated presortation requirements is not being extended to the tray based Zip+4 Barcoded rate preparation portion of chapter 5 at this time.

(8) A new preparation option for 5-digit Zip+4 barcoded rate mailings is added as 563.2. A summary of the requirements of this new preparation option follows:

(a) Only Zip+4 barcoded or delivery point barcoded pieces may be included in the mailing. That is, 5-digit Zip+4 Barcoded rate mailings prepared under this option must consist of 100 percent Zip+4 barcoded or delivery point barcoded pieces. Pieces that do not bear a Zip+4 barcode or a delivery point barcode cannot be submitted as part of a 5-digit barcoded rate mailing under DMM 563.2. Such pieces must be submitted in a separate mailing. The reasons for requiring 100% barcoded pieces were set forth in section D-7-a above.

(b) This package-based sortation option will allow a package of 10 or more pieces for any 5-digit Zip Code area to obtain the 5-digit Zip+4 Barcode rate. As explained in part E below, pieces that cannot be placed in a group of 10 or more Zip+4 barcoded or delivery point barcoded pieces for a 5-digit Zip Code area cannot be included in the mailing.

(c) Groups of 10 or more pieces for a 5-digit Zip Code area must be placed in full 5-digit or full 3-digit trays, or in SCF trays. Only SCF trays may be less than full. To limit the number of less-than-full trays in the system, overflow trays (which are less than full by definition) to 5-digit and 3-digit destinations are not permitted. It is not as efficient on a cost per piece basis to transport less-than full trays, since a less-than-full tray occupies the same amount of space as a full tray in a truck or airplane. Because all pieces in the mailing are eligible for the same rate regardless of the sortation level of the tray in which they are placed, the prohibition against less-than-full 5-digit and 3-digit trays should not adversely affect mailers.

(d) Groups of 10 or more pieces for the same 5-digit ZIP Code area must be delineated by separator cards when placed in full 3-digit and full SCF trays. This will allow the Postal Service the option of consolidating the small groups for various 5-digit areas into full trays to 5-digit areas. The use of separator cards as opposed to rubber bands in full trays allows for easier postal handling of the mail and is not as likely to bend the mailpieces as packaging is.

(e) Pieces in less-than-full SCF trays must be packaged by 5-digit ZIP Code area and labeled. Packaging is necessary to maintain the orientation of the pieces in the trays and labeling the packages gives the Postal Service more flexibility when determining the best way to process the pieces in the tray. The packages must be secured with rubber bands.

(f) Many mailers have indicated a desire to use 1-foot trays. The Postal Service has determined to permit mailers to use 1-foot trays (half-trays) to prepare 5-digit trays in the mailing on the condition that the mailer provides the 1-foot trays and their sleeves. The trays and sleeves must meet postal specifications. The Postal Service will not undertake the provision of 1-foot trays to mailers. The cost of these smaller trays is nearly equal to the cost of procuring standard 2-foot trays. Procuring 1-foot trays in sufficient quantity to allow the Postal Service to provide them to any mailer wishing to use them, as well as developing storage, distribution, and inventory systems that would assure that the trays were available at all the locations needed by mailers is not economical for the Postal Service. In order to limit the demands of

handling the 1-foot trays on our current storage and inventory systems for these trays, the Postal Service proposes to limit mailer use of these trays in 5-digit ZIP+4 Barcoded rate mailings to 5-digit trays. As supplemental information for those wishing to make specific comments concerning the specifications for constructing 1-foot trays and their sleeves, specifications can be obtained, during this notice and comment period, by requesting in writing or in person (between 9 a.m. and 4 p.m.), at the following address: Director, Office of Classification and Rates Administration, United States Postal Service, 475 L'Enfant Plaza, SW., room 8430, Washington, DC 20260–5903. This address is different from the address shown in the body of the regulations for obtaining this information in the future.

(g) All pieces in the mailing qualify for the 5-digit ZIP+4 barcoded rates.

(h) There are no documentation requirements.

(9) New section 563.3 adds a package-based sortation option for mailings at the 3-digit ZIP+4 Barcoded and basic ZIP+4 Barcoded (or First-Class nonpresorted) rates. The major provisions of this section are as follows:

(a) Pieces that do not bear ZIP+4 barcodes or delivery point barcodes will be permitted in such mailings if at least 85 percent of the pieces in the mailing are properly ZIP+4 barcoded or delivery point barcoded.

(b) This sortation option will allow ZIP+4 barcoded and delivery point barcoded pieces in full 3-digit trays containing at least 50 pieces, as well as any group of 50 or more pieces for a 3-digit area that is placed within an SCF tray, to qualify for the 3-digit ZIP+4 Barcoded rate. Only SCF trays may be less than full. Overflow trays to 3-digit ZIP Code areas (overflow trays are less than full by definition) are not permitted, to limit the number of less-than-full trays in the system. (Less-than-full trays can adversely affect transportation costs as described in D–8–c above.) Because a group of 50 or more pieces for a 3-digit ZIP Code area may qualify for the 3-digit Barcoded rate regardless of whether it is placed in a 3-digit tray or an SCF tray, the prohibition against less-than-full 3-digit trays should not adversely affect mailers.

(c) Pieces that cannot be placed in a group of 50 or more pieces for a 3-digit ZIP Code area are residual pieces. Residual pieces that are ZIP+4 barcoded or delivery point barcoded will qualify for the First-Class nonpresorted ZIP+4 Barcoded rate for cards or, if other than cards, the nonpresorted ZIP+4 rates; the second-class Level A/G/J1 ZIP+4 Barcoded rates; or the third-class basic ZIP+4 Barcoded rates.

(d) Mailers may use 1-foot trays only for 3-digit tray sortation. As noted previously in section D–8–f, mailers must provide the 1-foot trays and their sleeves and the trays and sleeves must meet postal specifications for their construction.

(e) Residual mail (mail that cannot be placed in a group of 50 or more pieces for a 3-digit area) can be packaged, placed in SCF trays, and listed by 3-digit area by rate category on documentation. An alternative is to separately tray residual mail by rate category. That is, place ZIP+4 barcoded or delivery point barcoded pieces in separate trays from nonbarcoded pieces. Mailers wishing to claim ZIP+4 rates on pieces that are not barcoded but that bear a correct numeric ZIP+4 code, must further separate nonbarcoded residual pieces into trays containing pieces with numeric ZIP+4 codes and trays containing pieces with 5-digit ZIP Codes. The pieces in each category of residual tray must then be separated into groups of 100 pieces. The summary portion of documentation must include the residual pieces separated and counted in this manner.

(f) Except for residual mail, packaging is prohibited in full trays. In full SCF trays the qualifying mail to each 3-digit ZIP Code area in the tray must be grouped together and residual pieces must be packaged and labeled by 3-digit area. All mail in less than full SCF trays (both qualifying groups of 50 or more pieces to a 3-digit ZIP Code area and residual) must be packaged and labeled by 3-digit area. The packages must be secured with rubber bands. The grouping and packaging requirements allow the Postal Service more flexibility when determining the best way to process pieces in a tray.

(10) A new section 563.4 is added that allows mailers to prepare as one mailing having two portions (the 5-digit portion of the mailing prepared under 563.2 and the 3-digit portion of the mailing prepared under 563.3) for purposes of meeting minimum quantity requirements for mailing and for meeting the overall 85% ZIP+4 barcoded or delivery point barcoded piece requirement for the 3-digit Barcoded rates. Additional documentation requirements are necessary for the 5-digit portion of the mailing when this option is used.

E. Postal Service's Intent to Eliminate the Preparation Options In Chapters, 3, 4, and 6

Since regulations for ZIP+4 First-Class Mail were first implemented in 1983, they have been amended to allow combined ZIP+4 Presort and Presorted First-Class mailings (in 1985), and optional mailings exclusively for 3-digit automated site service areas (in 1988). In 1988, new rates were offered, and implementing regulations were adopted, for ZIP+4 third-class mail, and for ZIP+4 barcoded First- and third class mail. In 1991, a nonpresorted ZIP+4 Barcoded First-Class card rate was introduced, ZIP+4 and ZIP+4 Barcoded rates were extended to letter-size second-class mail, and the automated site preparation option was further offered in second- and third-class.

Before 1981, the regulations for each rate were generally self-contained, i.e., each rate's regulations presented relatively complete and separate (but relatively parallel) requirements for the physical mailpiece, for technical preparation of the ZIP+4 code or barcode, and or presortation and documentation of the mailing.

In late 1980, the Postal Service proposed to establish more specific and comprehensive standards for mail being processed over automated equipment (automation-compatible mail) and claimed at the ZIP+4 or ZIP+4 Barcoded (automation-based) rates. The final rule implementing these standards was published on January 23, 1991 (56 FR 2598–2631).

At this time, the Postal Service was preparing to implement a wide range of automation-based rates adopted as part of the recent postal rate case (PRC Docket No. R90–1), and was preparing the regulations necessary to support eligibility for those rates.

It became apparent at that time that continued development of separate requirements for the several automation-based rates in chapters 3,4, and 6 (for First-, second-, and third-class mail, respectively) would not only be inefficient, but needlessly redundant and difficult to maintain in a consistent manner. Logically, since the technical mailpiece preparation requirements to automation-compatible mail were identical regardless of class, the Postal Service concluded that long-term regulatory simplicity, consistency, and efficiency necessitated consolidation of both new revised requirements for physical mailpiece characteristics, address quality, address readability, and ZIP+4 barcode readability into one place, and that was determined to be the then-vacant chapter 5.

Through publication of the final rule for automation-compatible mail (noted above) and the final rule implementing the Docket No. R90–1 rate changes (56 FR 3616–3728, January 30, 1991), the Postal Service relocated and consolidated its mailpiece preparation requirements for automation-based rates (not including presort and documentation requirements) into chapter 5. Sections 510 through 550, and 570 through 590, became mandatory on February 24, 1991, and the sections of chapters 3, 4, and 6 that had contained the corresponding information were deleted.

The Postal Service also concluded that the same reasons justified centralization of the mail preparation (presort and documentation) requirements for automation-based rates into chapter 5, but, given the physical demands of that task and the short time available, it could not be completed in time for implementation on February 24, 1991. Therefore, the Postal Service elected to leave the applicable portions of chapters 3, 4, and 6 in place until such time as the necessary consolidated regulations could be developed, evaluated, and published for comment. Instead, the Postal Service implemented the mail preparation requirements in current section 560 (full-tray makeup) as an option for those mailers whose operational and mailing list characteristics made those options economically desirable for presorting and documenting ZIP+4 and ZIP+4 Barcoded rate mailings. Concurrently, the Postal Service began to make customers aware that, over the ensuring 12–24 months, it planned to finish the consolidation of the eligibility regulations for ZIP+4 and ZIP+4 Barcoded rates into chapter 5 by undertaking further rulemakings to complete the centralization effort.

This proposed rule continues the process of consolidation of the mail preparation requirements for automation-based rates, and focuses that consolidation on the new ZIP+4 Barcoded rate options introduced in this proposal.

Currently, the presortation regulations for First-, second- and third-class automation mailings are contained in chapters 3, 4 and 6 respectively. The presortation requirements, which were developed independently prior to the establishment of the applicable automation-based rate categories for those classes, vary substantially from class to class. The application of these requirements to automation mail has produced a confusing array of rules for both the Postal Service and the mailers to apply. For example, the presortation rules for First-Class Mail call for a minimum of 10 pieces to a 5-digit area and 50 pieces to a 3-digit area to qualify for presorted automation rates. Second-class has a 6 pieces per package minimum. Third-class has a 10-piece per package minimum for both 5-digit and 3-digit mail. These rules are further complicated by additional tray or sack preparation rules. For example, in second-class, a minimum of four 6-piece packages is necessary to make up a 5-digit sack. In some situations a minimum of 125 pieces of third-class mail is required to make up a qualifying sack. Moreover, until recently, sack preparation was required for second- and third-class mail, while tray preparation was required for First-Class Mail.

The Postal Service has determined that this complex array of different, and sometimes contradictory, mail preparation rules is counterproductive to the efficient preparation, acceptance and processing of automation-compatible mail. —

Regardless of class of mail in which it is entered, automation-compatible mail needs to be "compatible" with the Postal Service automated mail processing equipment and needs to be presented to the Postal Service in a manner that most efficiently aids that automated processing.

As noted above, the Postal Service has already revised its regulations to prescribe consolidated mailpiece preparation rules for all ZIP+4 rate mail and for all ZIP+4 Barcoded rate mail. With this proposed rule, the Postal Service is extending that approach to the mail preparation rules for ZIP+4 Barcoded rate mail in order to eliminate the current confused and complicated procedures, ease the Postal Service's administration of the automated mail program, make the Postal Service's regulations clearer and easier to use and facilitate mailer preparation of barcoded mail. The two most significant changes that would occur from the adoption of the presently proposed mail preparation options for the new barcoded mail procedures in chapter 5 would be the required use of trays and the establishment of a single set of presortation requirements for similar rate categories of barcoded mail.

The Postal Service has determined that the use of trays, sleeved and banded where appropriate, is the best method for handling and transporting groups of automation-compatible mailpieces so that they retain their orientation and do not become bent or torn. The use of trays will ensure that this mail retains the physical characteristics necessary to maximize its successful processing on the automated equipment.

In examining the current mail presortation methods applicable to barcoded rate mail, the Postal Service has determined to adopt the provisions that apply to First-Class for all ZIP+4 Barcoded rate mail. First, these rules (10 pieces to a 5-digit area, 50 pieces to a 3-digit area) currently apply to by far the largest volume of automation rate mail. Second, the First-Class rules were designed to apply primarily to letter-size mail, the type of mail to which the chapter 5 preparation requirements apply. The sortation rules for second- and third-class mail were designed for a much more diverse mail base that was not predominately letter-size.

Third, of the existing sortation rules, requiring a minimum of 10 pieces to qualify for a 5-digit presort rate and 50 pieces to qualify for a 3-digit presort rate makes the most sense in light of the Postal Service's automation program. A certain minimum number of pieces is necessary before the Postal Service can efficiently handle a group of barcoded mail presorted to a 5-digit area and transfer that group from a 3-digit or SCF tray to a consolidated tray for barcoded mail destined to the same 5-digit area. If the number of pieces in the group is too low, it would be more efficient for the Postal Service to handle that mail as part of a larger 3-digit group and sort it to 5-digit areas using a barcode sorter. The Postal Service believes that 10 pieces is the absolute minimum number that should be handled as a separate 5-digit presorted group of barcoded letter mail. Similarly, a substantial group of 3-digit presorted pieces is necessary before a presortation discount can be justified for a 3-digit barcoded mail makeup. The Postal Service believes that 50 pieces is an appropriate number to justify maintaining this mail as a separate group for transportation to a destinating mail processing facility instead of consolidating this mail with all other barcoded mail as part of the outgoing mail processing operation.

With the addition of the new sortation options proposed in this rulemaking, elimination of all non-chapter 5 ZIP+4 rate and ZIP+4 barcoded rate mail preparation provisions is not expected to create a rate qualification hardship for most mailers. Second-class mailers that can currently qualify for 3-digit ZIP+4 Barcoded rates (levels B3/H3/J3) with as few as 24 pieces (four packages of 6 pieces each to an optional city or unique 3-digit area) in an optional city or unique 3-digit sack (see DMM 424.53) could be affected. Chapter 5 (563.3) preparation will require at least 50 pieces of mail to qualify for a 3-digit Barcoded rate. However, under chapter 5 preparation, a group of 50 pieces to any 3-digit area (not just unique 3-digit

VOL 56 ISS 122 JE 25 1991 UMI

areas as required in chapter 4) may qualify for the 3-digit ZIP+4 Barcoded rate. Furthermore, in order for second-class mailers to qualify for the 5-digit ZIP+4 Barcoded rates (levels B5/H5/J5) the uniform package requirement of 10 pieces will apply in chapter 5 as opposed to the chapter 4 requirement for 6-piece packages. However, 424.532 currently requires that a 6-piece package must be in a 5-digit sack with at least 3 other 6-piece packages, or in an optional city or unique 3-digit sack that contains at least four 6-piece packages. Under the chapter 5 requirements for second-class mail, as few as 10 ZIP+4 barcoded pieces to a 5-digit ZIP Code area within an SCF tray may qualify for 5-digit ZIP+4 Barcoded rates.

Third-class mailers would also be affected. In place of the current 10-piece sortation minimum for preparing 3-digit packages, chapter 5 would require a 50-piece minimum for 3-digit ZIP+4 Barcoded rates. However, 50 pieces to a 3-digit area would receive the 3-digit ZIP+4 Barcoded rate. Under current rules in chapter 6, to qualify for the 3-digit Zip+4 barcoded rates a mailing would have to have at least 125 pieces of 3-digit mail (both 5-digit and 3-digit packages) to make up a 3-digit sack in which the 3-digit packages could qualify for the 3-digit ZIP+4 Barcoded rate. (The 5-digit packages in this sack would qualify for the 5-digit ZIP+4 Barcoded rate.)

Because of these types of trade-offs, the Postal Service believes that most mailers may find their overall rate qualification levels under proposed chapter 5 preparation to be similar to or better than under current chapters 3, 4, and 6 preparation.

The Postal Service has not proposed the extension of these consolidated presortation requirements to ZIP+4 mail presented under chapter 5. To do so might have adversely affected current mailers who would be required to adjust their mail preparation in a short time frame. In addition, the Postal Service believes that the introduction of address block barcoding on June 10, 1991, will eliminate the primary barrier that has prevented ZIP+4 mailers from applying barcodes to their mail and qualifying for the lower ZIP+4 Barcoded rates. The Postal Service expects a large proportion of ZIP+4 mailers to convert to barcoding in the near future and does not want to add another adjustment to that process at this time. However, the Postal Service does expect to propose revisions to the chapter 5 ZIP+4 preparation requirements at the time it proposes to eliminate the automation rate provisions of chapters 3, 4, and 6.

A similar situation applies to the current tray-based option for ZIP+4 barcoded mail in chapter 5. Although some changes are being proposed at this time, as discussed above in part D, the Postal Service is not proposing the extension of the 10/50 piece presortation rules to this option at this time. First, this option already has full tray requirement for 5-digit presorted mail. Second, the application of a 50-piece 3-digit requirement would be a hardship on second-class and third-class mailers who currently prepare full SCF trays under this option. However, the Postal Service does intend to look toward possible consolidation of the "tray-based" option with the proposed "package based" option in the future as part of the long-term effort to consolidate all automation rate provisions in chapter 5.

The estimated completion of the transition to exclusive use of chapter 5 is March, 1992. At that time chapter 5 would contain the sole set of presort and documentation regulations for automation-based rate mailings; existing provisions of chapters 3, 4, and 6 would be eliminated. As stated in the Summary above, mailers are invited to comment on the proposed concept of eliminating the current automation-compatible mail provisions in chapters 3, 4, and 6 and on the proposed effective date of this transition.

F. Miscellaneous Changes

1. The postage payment requirements in DMM 380 and DMM 661 are amended to indicate how postage should be applied to the new sortation options added to chapter 5, and to correct some errors in 661.

2. The sentence "If material on which the barcode is to appear is printed in a "halftone screen," it must not contain fewer than 200 lines per inch (dot size) or be printed with more than a 20 percent screen." is omitted from section 551.44. DMM 551.44 contains reflectance requirements for dark fibers and background patterns on the material upon which barcodes will be printed. Although the stated requirements for halftone screens are necessary for character recognition by USPS OCR equipment, they are not necessary for recognition of barcodes by USPS barcode sorters. Accordingly, the language concerning halftone screens is omitted in 551.44. This language remains in 543.35 which states reflectance requirements for OCR readability.

Although exempt from the notice and comment requirements of the Administrative Procedure Act (5 U.S.C. 533 (b), (c)) regarding proposed rulemaking by 39 U.S.C. 410(a), the Postal Service invites comments on the following proposed revision of the Domestic Mail Manual, incorporated by reference in the Code of Federal Regulations. See 39 CFR 111.1.

List of Subjects in 39 CFR Part 111

Postal Service.

PART 111—[AMENDED]

1. The authority citation for 39 CFR part 111 continues to read as follows:

Authority: 5 U.S.C. 552(a); 39 U.S.C. 101, 401, 403, 404, 3001-3011, 3201-3219, 3403-3406, 3621, 5001.

PART 320—PAYMENT OF POSTAGE

2. Revise section 362 of part 320 to read as follows:

362 Carrier Route First-Class, Presorted First-Class, Nonpresorted ZIP+4, Nonpresorted ZIP+4 Barcoded, ZIP+4 Presort, 5-Digit ZIP+4 barcoded, and 3-Digit ZIP+4 Barcoded Rates

* * * * *

362.2 Exact Postage on Each Piece

* * * * *

362.232 **National Mailings Prepared Under Chapter 5**

a. Mailings Prepared under 563.1. [Insert current 382.232. Delete the phrase "precanceled postage or" from the first sentence. Change the phrase "chapter 5" to "563.1." Add the following note:

Note: Currently there are no precanceled stamps available at First-Class ZIP+4 Barcoded rate denominations. See 382.31d(2)(a) or 382.33b(2)(a) for procedures to follow when a non-denominated precanceled stamp is used.

b. Mailings Prepared Under 563.2. When meter stamps are used, each piece in national mailings prepared in accordance with 563.2 must have postage affixed at the 5-digit ZIP+4 Barcoded rate.

Note: Currently there are no precanceled stamps available at First-Class ZIP+4 Barcoded rate denominations. See 382.31d(2)(b) or 382.33b(2)(b) for procedures to follow when a non-denominated precanceled stamp is used.

c. Mailings Prepared Under 563.3. When meter stamps are used, pieces in national mailings prepared in accordance with 563.3 must have postage affixed at the 3-digit ZIP+4 Barcoded rate, the ZIP+4 Presort rate, or the Presorted First-Class rate as appropriate in the qualifying portion of the mailing; and postage affixed at the Nonpresorted ZIP+4 Barcoded rate (if eligible for the card rates), the Nonpresorted ZIP+4 rate, or the single piece rate if in the residual portion of the mailing.

Note: Currently there are no precanceled stamps available at First-Class ZIP+4 Barcoded rate denominations. See 382.31d(2)(c) or 382.33b(2)(c) for procedures to follow when a non-denominated precanceled stamp is used.

d. Mailings Prepared Under 563.4. When meter stamps are used, pieces in national mailings prepared in accordance with 563.4 must have postage affixed at the 5-digit ZIP+4 Barcoded rate in the 5-digit portion of the mailing (sorted in accordance with 563.2); at the 3-digit ZIP+4 Barcoded rate, the ZIP+4 Presort rate, or the Presorted First-Class rate as appropriate in the qualifying portion of the mailing (sorted in accordance with 563.3); and at the Nonpresorted ZIP+4 Barcoded rate (if eligible for the card rates), the Nonpresorted ZIP+4 rate, or the single piece rate if in the residual portion of the mailing (prepared in accordance with 563.3).

Note: Currently there are no precanceled stamps available at First-Class ZIP+4 Barcoded rate denominations. See 382.31d(2)(d) or 382.33b(2)(d) for procedures to follow when a non-denominated precanceled stamp is used.

(2) National Mailings Prepared Under Chapter 5

(a) Mailings Prepared Under 563.1. Insert current 382.31d(2). Change the phrase "or precanceled postage" to "and." Change the reference to "chapter 5" to "563.1."Add the following note:

Note: Currently there are no precanceled stamps available at First-Class ZIP+4 Barcoded rate denominations. Mailers may affix a non-denominated precanceled stamp to each piece in the mailing and pay additional postage in the amount documented in accordance with 563.142. The additional postage may be paid in the same manner as for metered mailings.

(b) Mailings Prepared under 563.2. When all pieces in a ZIP+4 Barcoded national mailing prepared in accordance with 563.2 are paid by meter stamps and are of identical size and weight, the entire mailing must have postage affixed at the 5-Digit ZIP+4 Barcoded rate.

Note: Currently there are no precanceled stamps available at First-Class ZIP+4 Barcoded rate denominations. Mailers may affix a non-denominated precanceled stamp to each piece in the mailing and pay additional postage in the amount documented in accordance with 563.342 or 563.343. The additional postage may be paid in the same manner as for metered mailings.

(c) Mailings Prepared Under 563.3. When all pieces in a ZIP+4 Barcoded national mailing prepared in accordance with 563.3 are paid by meter stamps and are of identical size and weight, the entire mailing may have postage affixed at the 3-digit ZIP+4 Barcoded rate, provided the applicable documentation requirements in 563.34 are met. Additional postage in the amount documented in accordance with 563.34 for pieces subject to other rates must be paid by means of a meter strip affixed to the mailing statement that is required to accompany the mailing, or through an advance deposit account as provided for in Handbook F–1, 524.

Note: Currently there are no precanceled stamps available at First-Class ZIP+4 Barcoded rate denominations. Mailers may affix a non-denominated precanceled stamp to each piece in the mailing and pay additional postage in the amount documented in accordance with 563.342 or 563.343. The additional postage may be paid in the same manner as for metered mailings.

(d) Mailings Prepared Under 563.4. When all pieces in a ZIP+4 Barcoded national mailing prepared in accordance with 563.4 are paid by meter stamps and are of identical size and weight, the entire mailing may have postage affixed at the 5-digit ZIP+4 barcoded rate if the documentation requirements in 563.45 are met. Additional postage in the amount documented in accordance with 563.45 for pieces subject to the 3-digit ZIP+4 Barcoded, ZIP+4 Presort, Presorted First-Class, nonpresorted ZIP+4 Barcoded, nonpresorted ZIP+4, and single piece First-Class rates must be paid by means of a meter strip affixed to the mailing statement that is required to accompany the mailing, or through an advance deposit account as provided in Handbook F–1, 524.

Note: Currently, there are no precanceled stamps available at First-Class ZIP+4 Barcoded rate denominations. Mailers may affix a non-denominated precanceled stamp to each piece in the mailing and pay additional postage in the amount documented in accordance with 563.452. The additional postage may be paid in the same manner as for metered mailings.

* * * * *

382.33 **Nonidentical Pieces at All ZIP+4 Presort and ZIP+4 Barcoded Rates**

a. ZIP+4 Presort Mailings. [Change the reference "365.33" to "365.33, 366.3, or 562.5".]

b. ZIP+4 Barcoded Presort Mailings

* * * * *

(2) National Mailings Prepared Under Chapter 5

(a) Mailings prepared Under 563.1. Insert current 382.33b(2), change the reference to "Chapter 5" to "563.1". Add the following note:

Note: Currently there are no precanceled stamps available at First-Class ZIP+4 Barcoded rate denominations. Mailers may affix a non-denominated precanceled stamp to each piece in the mailing and pay additional postage in the amount documented in accordance with 563.142. The additional postage may be paid in the same manner as for metered mailings.

(b) Mailings prepared Under 563.2. 5-digit ZIP+4 Barcoded rate mailings of non-identical weight pieces, prepared in accordance with 563.2, must have postage affixed to each piece at the 5-digit ZIP+4 Barcoded rate.

Note: Currently there are no precanceled stamps available at First-Class ZIP+4 Barcoded rate denominations. Therefore, non-identical weight pieces prepared under 563.2 must not be prepared with precanceled stamps.

(c) Mailings prepared Under 563.3. ZIP+4 Barcoded mailings of non-identical weight pieces, prepared in accordance with 563.3, may have postage affixed to each piece at the 3-digit ZIP+4 Barcoded rate if the applicable documentation requirements in 563.34 are met. Additional postage in the amount documented in accordance with 563.34 for pieces subject to other rates must be paid by means of a meter strip affixed to the mailing statement that is required to accompany the mailing, or through an advance deposit account as provided for in Handbook F–1, 524.

Note: Currently there are no precanceled stamps available at First-Class ZIP+4 Barcoded rate denominations. Mailers may affix a non-denominated precanceled stamp to each piece in the mailing and pay additional postage in the amount documented in accordance with 563.342 or 563.343. The additional postage may be paid in the same manner as for metered mailings.

(d) Mailings prepared Under 563.4. ZIP+4 Barcoded mailings of non-identical weight pieces, prepared in accordance with 563.4, may have postage affixed to each piece at the 5-digit ZIP+4 Barcoded rate if the documentation requirements in 563.45

VOL 56 ISS 122 JE 25 1991 UMI

are met. Additional postage in the amount documented in accordance with 503.45 for pieces subject to the 3-digit ZIP+4 Barcoded, ZIP+4 Presort, Presorted First-Class, nonpresorted ZIP+4 Barcoded, nonpresorted ZIP+4, and single-piece First-Class rates must be paid by means of a meter strip affixed to the mailing statement that is required to accompany the mailing, or through an advance deposit account as provided in Handbook F–1, 524.

Note: Currently there are no precanceled stamps available at First-Class ZIP+4 Barcoded rate denominations. Mailers may affix a non-denominated precanceled stamp to each piece in the mailing and pay additional postage in the amount documented in accordance with 503.462. The additional postage may be paid in the same manner as for metered mailings.

* * * * *

382.4 Neither Lowest Rate Nor Correct Postage Affixed to Each Piece

A. General. Add the following to the end of this section:

Exception: Any 5-digit ZIP+4 Barcoded rate mailings prepared with meters under 503.2 must have postage affixed to each piece in the mailing at the 5-digit ZIP+4 Barcoded rate, unless refund for postage added procedures are followed as described in 147.42, or if precanceled stamps of the same denomination are used for identical weight mailings.

3. Revise the title of chapter 5 to read as follows:

CHAPTER 5—AUTOMATION COMPATIBLE MAIL—REQUIREMENTS FOR ZIP+4 AND ZIP+4 BARCODED RATE MAILINGS

PART 510—GENERAL

4. Revise section 512 in part 510 to read as follows.

512 Applicability

512.1 General Eligibility Requirements

[Insert current 512.1.]

512.2 Specific Eligibility Requirements

[Insert current 512.2.] Add the following note:

Note: The alternative preparation requirements of section 560 (see 513 below) provide an alternative to some of the specific eligibility requirements in chapters 3, 4, and 6."]

513 Alternative, Presort, and Documentation Requirements

[Insert the first sentence of current 513. Add the following: "Mailers may submit mailings in accordance with the requirements of 560 rather than the corresponding presort, and documentation requirements in chapters 3, 4, and 6. The Postal Service intends to eliminate the presort and documentation requirements currently set forth in chapters 3, 4, and 6 in the future and provide only the preparation options in 560 to qualify for presorted ZIP+4 and ZIP+4 Barcoded rates. The effective date for this change will take into account recommendations from the mailing industry to allow a sufficient transition period and will be set through a rulemaking process noted in the Federal Register and the Postal Bulletin.

Note: To the extent that rate eligibility is dependent upon presort, 560 offers different rate eligibility options to those in chapters 3, 4, and 6."]

PART 520—GENERAL REQUIREMENTS FOR ALL AUTOMATION—COMPATIBLE MAILPIECES

5. In part 520, revise 521.3 to read as follows:

521.3 Weight

521.31 ZIP+4 Rate Mailings

The weight of each mailpiece in a ZIP+4 rate mailing must not exceed 2.5 ounces.

521.32 ZIP+4 Barcoded Rate Mailings

The weight of each mailpiece in a ZIP+4 Barcoded rate mailing must not exceed 3.0 ounces.

PART 550—REQUIREMENTS FOR BARCODED PIECES

6. In part 550, revise 551.4 to read as follows.

551.4 Reflectance

551.41 Background Reflectance

551.411 Pieces Barcoded in the Lower Right Corner

a. Barcode Clear Zone—Pieces Bearing ZIP+4 or Delivery Point Barcodes. The material (envelope, card, insert material, or outermost sheet) in the barcode clear zone (see 551.22) must produce a background reflectance of at least 50 percent in the red and 45 percent in the green portions of the optical spectrum when measured with a USPS or USPS—licensed envelope reflectance meter. White and pastel colors generally satisfy this requirement.

b. Barcode Clear Zone—Pieces Not Bearing a ZIP+4 or Delivery Point Barcode. It is strongly recommended that pieces included in any ZIP+4 Barcoded rate mailing that do not bear a ZIP+4 or delivery point barcode include a barcode clear zone in the lower right corner of the address side of the mailpiece as described in 551.22 that meets the background reflectance requirements of 551.411a. Effective September 20, 1992, all pieces in ZIP+4 Barcoded rate mailings that do not bear a ZIP+4 or delivery point barcode must contain a barcode clear zone as specified in 551.22 that meets the background reflectance requirements of 551.411a.

551.412 Pieces Barcoded in the Address Block

a. Pieces Bearing ZIP+4 or Delivery Point Barcodes. If the barcode is placed in the address block, the background reflectance of the area surrounding the address block barcode, and within ⅛ inch of the left- and right-most bars and ⅛s inch above and below the barcode, must produce a background reflectance of at least 50% in the red and 45% in the green spectrum.

b. Barcode Clear Zone—Pieces Not Bearing a ZIP+4 or Delivery Point Barcode. It is strongly recommended that pieces included in address block barcoded ZIP+4 Barcoded rate mailings that do not bear a ZIP+4 or delivery point barcode in the address block include a barcode clear zone in the lower right corner of the address side of the mailpiece as specified in 551.22, that meets the background reflectance requirements of 551.411a. Effective September 20, 1992, all pieces in ZIP+4 Barcoded rate mailings that do not bear a ZIP+4 or delivery point barcode must contain a barcode clear zone as specified in 551.22 that meets the reflectance requirements of 551.411a.

551.42 Print Reflectance Difference

A print reflectance difference (PRD) of at least 30 percent is required between the background material of the mailpiece and the barcode in both the red and the green spectrums. This requirement is generally satisfied by using black or dark blue ink on a white or pastel background. Other color combinations should be measured to ensure compliance with the minimum print reflectance difference. The PRD expressed as a percentage equals the reflectance of the background minus the reflectance of the ink, multiplied by 100. Reflectance measurements must be made with a USPS or USPS licensed envelope reflectance meter.

551.43 [Insert text of existing 551.43.]

551.44 Dark Fibers and Background Patterns

551.441 ZIP+4 or Delivery Point Barcoded Pieces

[Insert text of existing 551.44; delete the last sentence.]

551.442 Pieces Not Bearing a ZIP+4 or Delivery Point Barcode

It is strongly recommended that all pieces within a ZIP+4 Barcoded rate mailing that do not bear a ZIP+4 or delivery point barcode include a barcode clear zone as specified in 551.22 that meets the requirements for dark fibers and background patterns in 551.441. Effective September 20, 1992, all non-ZIP+4 or delivery point barcoded pieces in a ZIP+4 Barcoded rate mailing must include a barcode clear zone (see 551.22) that meets the requirements of 551.441.

7. In part 560, revise the title to read as follows:

560 Rate Eligibility, Presort, and Documentation Requirements

8. Revise 561 to read as follows:

561 General

561.1 Explanation of Options

561.11 Preparation in Accordance with Other DMM Chapters

At the present time, mailers may prepare mailings in accordance with the rate eligibility, presort, and documentation requirements for ZIP+4 and ZIP+4 Barcoded rates set forth in chapter 3 for First-Class Mail, chapter 4 for second-class mail, or Chapter 6 for third-class mail. However, the Postal Service intends to eliminate these options in the future and provide only the preparation options in this chapter (chapter 5) to qualify for presorted ZIP+4 and ZIP+4 Barcoded rates. The effective date for this change will take into account recommendations from the mailing industry to allow a sufficient transition period and will be set through a rule making process noted in the Federal Register and the Postal Bulletin.

561.12 Preparation in Accordance with this Chapter (Chapter 5)

There is only one method of preparation (tray-based) for presorted ZIP+4 rated mailings (see 562). For ZIP+4 Barcoded rate mailings, there are two major methods of preparation: tray-based (see 563.1), and package-based (see 563.2, 563.3, and 563.4).

561.2 Trays

561.21 Tray Usage

All mailings prepared under chapter 5 must be prepared in trays.

561.22 Definition of "Full" Tray

For purposes of section 560, a "full" tray is one that is at least ¾ full of mail when the bottom of the tray is placed at an approximately 90 degree angle to a level horizontal surface and the contents of the tray are compressed by their own weight.

561.23 Sleeving and Banding

[Insert text of existing 561.24.]

561.24 Tray Labels

Insert the text of existing 561.25 with the following revision: In the last sentence, change the phrase "except that the second (contents) line on tray labels bears the information specified in 562.3 and 563.3" to read "except that the second (contents) line and the third (mailer, mailer location) line on tray labels shows the information specified in 562.324, 562.42, 563.132d, 563.132e, 563.232e, 563.332d, and 563.332e."

PART 562—PRESORTED ZIP+4 MAIL

9. Revise 562 to read as follows:

562 Presorted ZIP+4 Mail

562.1 Eighty-Five Percent Requirement

At least 85% of the total pieces in a ZIP+4 rate mailing must bear the correct ZIP+4 code (see 530 and 540). All remaining pieces must bear a 5-digit ZIP Code. If the correct ZIP+4 barcode or delivery point barcode (prepared as required by 530 and 550) is used to satisfy the requirement for a ZIP+4 code, the correct numeric ZIP+4 code as 5-digit ZIP Code must also appear in the address.

562.2 Rate Eligibility

562.21 First-Class Mail

562.211 5-Digit, 3-Digit, and SCF Trays

ZIP+4 coded pieces in 5-digit, 3-digit, and SCF trays may qualify for the ZIP+4 Presort rate. Other pieces in these trays may qualify for the Presorted First-Class rate. 5-digit and 3-digit trays must be full trays (see 561.22) or overflow trays (see 562.322). In SCF trays, there must be at least 50 pieces for each 3-digit ZIP Code area.

562.212 Residual Trays

Residual pieces (pieces remaining after preparing full and overflow 5-digit and 3-digit trays, and SCF trays with at least 50 pieces per 3-digit ZIP Code area) may qualify for the nonpresorted ZIP+4 rate (if ZIP+4 coded) or the single-piece First-Class rate.

562.22 Second-Class Mail

562.221 5-digit and 3-digit Trays

ZIP+4 coded pieces in 5-digit and 3-digit trays may qualify for the level B5/H5/J5 and B3/H3/J3 ZIP+4 rates respectively. Other pieces in these trays may qualify for the level B/H/J rates. These trays must be full trays (see 561.22) or overflow trays (see 562.322).

562.222 SCF Trays

ZIP+4 coded pieces in SCF trays may qualify for the level A/G/J1 ZIP+4 rates. Other pieces in SCF trays may qualify for the level A/G/J rates. There is no minimum quantity for SCF trays. All pieces in second-class ZIP+4 mailings must be sorted to at least the SCF level.

Note: Less than full trays that contain mail for only one 3-digit area must be labeled in accordance with the requirements for 5-digit trays (see 562.324b and 562.324c). However, such a tray is considered an SCF tray for rate purposes, except when it is an overflow tray. A less than full tray for a particular 3-digit destination can be considered an overflow tray only when there is at least one other full tray in the mailing for that same 3-digit destination (see 562.322). Overflow trays must also be separately documented as required in 562.322.

562.23 Third-Class Mail

562.231 5-Digit and 3-Digit Trays

ZIP+4 coded pieces in 5-digit and 3-digit trays may qualify for the 3/5 ZIP+4 rates. Other pieces in these trays may qualify for the 3/5 presort rates. These trays must be full trays (see 561.22) or overflow trays (see 562.322).

562.232 SCF Trays

ZIP+4 coded pieces in SCF trays may qualify for the basic ZIP+4 rate. Other pieces in SCF trays may qualify for the basic presort rate. There is no minimum quantity for SCF trays. All pieces in third-class ZIP+4 mailings must be sorted to at least the SCF level.

Note: Less than full trays that contain mail for only one 3-digit area must be labeled in accordance with the requirements for 3-digit trays (see 562.324b and 562.324c). However, such a tray is considered an SCF tray for rate purposes, except when it is an overflow tray. A less than full tray for a particular 3-digit destination can be considered an overflow tray only when there is at least one other full tray in the mailing for that same 3-digit destination (see 562.322). Overflow trays must also be separately documented as required in 562.322.

10. Replace existing sections 562.3 through 563.6 with the following:

562.3 Sortation Requirements

562.31 Facing, ZIP-Code Grouping, and Packaging of Pieces in Trays

562.311 Facing

All the pieces in each tray in the mailing must be faced in the same direction. The pieces must be placed in the tray so that the address is right-side up and facing the front (labeled end) of the tray.

VOL 56 ISS 122 JE 25 1991 UMI

562.312 ZIP Code Grouping and Packaging Requirements

a. Five-Digit and 3-Digit Trays

(1) Full Trays. There are no ZIP Code grouping requirements in 5-digit and 3-digit trays. Packaging is not permitted in full 5-digit and 3-digit trays.

Note: 5-digit and 3-digit trays are required to be full (see 562.324a and 562.324b) except that less than full overflow trays are permitted as described in 562.322.

(2) Overflow Trays. The pieces in overflow trays to 5-digit and 3-digit destinations as provided in 562.322 (overflow trays are less than full by definition) must be packaged to preserve their orientation. All packages must be labeled as either 5-digit packages or 3-digit packages as appropriate. See 562.312d for further requirements on securing and labeling packages.

b. SCF Trays

(1) First-Class Mailings. There must be at least 50 pieces for each 3-digit ZIP Code area within SCF trays. Within SCF trays for SCFs serving more than one 3-digit ZIP Code area, pieces for the same 3-digit ZIP Code area must be grouped together. In less than full trays to any SCF, the pieces for each 3-digit ZIP Code area must be rubber-banded together into packages to maintain their orientation in the tray and labeled. See 562.312d for further requirements on securing and labeling packages.

(2) Second- and Third-Class Mailings. There are no minimum quantity requirements per 3-digit ZIP Code area in SCF trays of second-and third-class mail. Within SCF trays for SCFs serving more than one 3-digit ZIP Code area, pieces for the same 3-digit ZIP Code area must be grouped together. In less than full trays to any SCF, the pieces should be secured together into packages to maintain their orientation in the tray. Packages must contain mail for only one 3-digit ZIP Code area and be labeled as 3-digit packages. See 562.312d for further requirements on securing and labeling packages.

c. Residual Trays (First-Class Mail Only). See 562.42.

d. General Requirements for Securing and Labeling Packages.

(1) Securing Packages. Packages should measure approximately 4 inches in thickness. The maximum permissible thickness is 6 inches. Rubber bands must be used to secure packages of all classes of mail. Packages up to 1 inch thick must be secured with at least one rubber band around the girth. Packages thicker than 1 inch must be secured with at least two rubber bands. The first rubber band should always be placed around the length and the second, around the girth so that it crosses over the first. Rubber bands used to secure packages of mail should be positioned as near as possible to the center of the mailpiece to provide the greatest stability during transit and handling. More than two bands may be used to secure a package, but banding material must never lie along the outer 1 inch of any edge.

(2) Labeling Packages. The top piece in each package must bear the red "D" (for 5-digit packages in 5-digit overflow trays) or the green "3" (for 3-digit packages in 3-digit overflow trays, less than full SCF trays, and First-Class residual trays prepared in accordance with 562.42a) pressure sensitive package label in the lower left corner of the address side. Alternatively, the applicable 5-digit or 3-digit optional endorsement package label line may be used as specified in 369, 441.232, or 642.3.

562.2 Traying Requirements

562.321 General

The requirements in 561.2 must be met.

562.322 Volume per Tray and Preparation of Overflow Trays

Mailers should balance the volume in trays when more than one is prepared for the same destination to ensure that all 5-digit and 3-digit trays are full (at least ¾ full of mail when the bottom of the tray is placed at an approximately 90 degree angle to a level horizontal surface and the contents of the tray are compressed by their own weight). If after this step, the remaining pieces for a 5-digit or 3-digit destination are not enough to generate an additional full tray, they may be placed in an overflow tray that is less than full, provided the pieces in the overflow tray are packaged and labeled (see 562.312a(2) and 562.312d), and only one such tray for a particular 5-digit or 3-digit destination is prepared in the mailing. To allow accurate verification of the mailing by postal acceptance personnel, the mailer must provide a listing of all such trays prepared in addition to the documentation required by 562.5.

562.323 Size and Availability of Trays

Only standard 2-foot trays may be used to prepare presorted ZIP+4 rate mailings. The Postal Service will provide mailers with the trays.

562.324 Tray Sortation

a. Five-Digit Trays. When there are enough pieces to the same 5-digit destination to fill a tray, a 5-digit tray must be prepared for that destination. Trays that are not full are prohibited, except that one overflow tray per 5-digit ZIP Code area is permitted as provided in 562.322. Trays must be labeled as follows:

Line 1: City, two-letter state abbreviation, and 5-digit ZIP code.
Line 2: Appropriate class or contents designation (FCM, 2C, NEWS, or 3C) followed by the words, "ZIP+4 PRESORT".
Line 3: Name of the mailer and the city and two-letter state abbreviation of the mailer's location.

Example:

DETROIT MI 48235
FCM ZIP+4 PRESORT
NB COMPANY UNION SC

b. Three-Digit Trays. If, after preparing all possible full 5-digit trays (and, at the mailer's option, overflow 5-digit trays), there are sufficient pieces remaining to fill a tray for a 3-digit ZIP Code destination, a 3-digit trays must be prepared. Trays that are not full are prohibited, except that one overflow tray per 3-digit ZIP Code area is permitted as provided in 562.322. Trays must be labeled as follows:

(1) Unique 3-Digit ZIP Code Prefixes

Line 1: City, two-letter state abbreviation, and unique 3-digit prefix listed in Exhibit 122.63b.
Line 2: Appropriate class or contents designation (FCM, 2C, NEWS, or 3C) followed by the words "ZIP+4 PRESORT".
Line 3: Name of the mailer and the city and two-letter state abbreviation of the mailer's location.

Example:

PHILADELPHIA PA 191
3C ZIP+4 PRESORT
XYZ CORP ROCHESTER NY

(2) Other 3-digit ZIP Code Prefixes

Line 1: Name of SCF and two-letter state abbreviation of the SCF, followed by the 3-digit prefix of the pieces in the tray (see Exhibit 122.63c or Exhibit 122.63d for the name of the SCF serving the 3-digit ZIP Code area).
Line 2: Appropriate class or contents designation (FCM, 2C, NEWS, or 3C) followed by the words "ZIP+4 PRESORT".
Line 3: Name of the mailer and the city and two-letter state abbreviation of the mailer's location.

Example:

NORTHERN VIRGINIA VA 221
NEWS ZIP+4 PRESORT
ACE CNSTR CO ROCHESTER NY

c. SCF Trays

(1) Trays for SCFs Serving a Single 3-Digit Area. If, after preparing all possible full 5-digit and full 3-digit trays (and, at the mailer's option, overflow 5-digit and 3-digit trays), there are pieces remaining for a single 3-digit SCF listed in Exhibit 122.63c that are not sufficient to fill a tray, they must be placed in a single 3-digit SCF tray. The pieces in the tray must be rubber-banded or otherwise secured into packages as described in 562.312b and 562.312d. There is no minimum quantity for single 3-digit SCF trays, except for those in First-Class mailings which must contain at least 50 pieces for the single 3-digit ZIP Code area. Trays must be labeled as follows:

Line 1: Name of the SCF, two-letter state abbreviation, followed by the 3-digit ZIP Code prefix of the pieces in the tray (see Exhibit 122.63c).
Line 2: Appropriate class or contents designation (FCM, 2C, NEWS, or 3C) followed by the words "ZIP+4 PRESORT".
Line 3: Name of the mailer and the city and two-letter state abbreviation of the mailer's location.

Example:

MID-FLORIDA FL 327
FCM ZIP+4 PRESORT
FIRST BIOMDCL FAIRFAX VA

(2) Trays for SCFs Serving Multiple 3-Digit Areas. If, after preparing all possible full 5-digit and full 3-digit trays (and, at the mailer's option, overflow 5-digit and 3-digit trays), there are sufficient pieces remaining to fill a tray for one of the SCFs that serve more than one 3-digit area (listed in Exhibit 122.63d), an SCF tray must be prepared. Trays that are less than full may also be prepared. There is no minimum quantity for these SCF trays, except for those in First-Class mailings which must contain at least 50 pieces for each 3-digit ZIP Code area contained in the tray. Pieces must be grouped by 3-digit area within the tray. When there is less than a full tray, the pieces in the tray must be secured into packages as described in 562.312b and 562.312d. Packages must contain mail for only one 3-digit ZIP Code area. If the tray contains pieces for only one 3-digit ZIP code area served by the SCF, the tray must be labeled as a 3-digit tray in accordance with 562.324b. Trays containing multiple 3-digit areas must be labeled as follows:

Line 1: Letters "SCF," followed by the name of the SCF, the two-letter state abbreviation of the SCF, and the 3-digit SCF Code shown in Exhibit 122.63d.
Line 2: Appropriate class or contents designation (FCM, 2C, NEWS, or 3C) followed by the words "ZIP+4 PRESORT".
Line 3: Name of the mailer and the city and two-letter state abbreviation of the mailer's location.

Example:

SCF SAN ANTONIO TX 780
3C ZIP+4 PRESORT
DR PATERNO BIGFOOT TX

562.4 Residual Mail

562.41 General

There is no residual mail for second- and third-class mailings. Residual mail for First-Class mailings consists of those pieces that cannot be placed into full 5-digit or 3-digit trays, are not placed in overflow trays, and are not of sufficient quantity to be part of a group of 50 or more pieces to a 3-digit ZIP Code area within an SCF tray.

562.42 Preparation of First-Class Residual Pieces

Residual pieces must be placed in trays that are separate from trays of qualifying pieces. The pieces in residual trays in First-Class mailings must be prepared in one of the following two ways:

a. ZIP Code Sequence and Listing Option. Residual pieces must be placed in residual trays in 3-digit ZIP Code sequence. When a tray is less than full, the pieces in the tray must be packaged by 3-digit area and labeled as described in 562.312d. Mailers must provide a listing by 3-digit area of the pieces with and without a ZIP+4 Code as described in 562.5. Trays must be labeled as follows:

Line 1: Word "RESIDUAL" followed by the 3-digit ZIP Code range of the pieces in the tray.
Line 2: Words "FCM ZIP+4".
Line 3: Name of the mailer and the city and two-letter state abbreviation of the mailer's location.

Example:

RESIDUAL 010–590
FCM ZIP+4
XYZ CORP BIGFOOT TX

b. Physical Separation Option. Residual pieces bearing ZIP+4 Codes must be separately trayed from residual pieces bearing 5-digit ZIP Codes. Within each tray, the pieces must be separated into groups of 100 pieces. Groups of 100 must be separated by separator cards. When the tray is full, no further preparation is required. When the tray is less than full, pieces must also be rubber-banded into packages approximately 4 inches thick within the group 100 separations. When there are less than 100 pieces in a group at the end of the last tray for either of the two types of trays (those containing pieces with correct ZIP+4 Codes and those containing pieces with correct 5-digit ZIP Codes) the actual number of pieces in the group must be written on the separator card. The total number of residual pieces bearing ZIP+4 Codes and the total number of pieces bearing 5-digit ZIP Codes must be added to the summary portion of the documentation required in 562.521c or 562.522c. Residual trays must be labeled as follows:

(1) *Trays Containing ZIP+4 Coded Pieces*

Line 1: The word "RESIDUAL".
Line 2: FCM ZIP+4.
Line 3: Name of the mailer and the city and two-letter state abbreviation of the mailer's location.

Example:

RESIDUAL
FCM ZIP+4
XYZ CORP BIGFOOT TX

(2) *Trays Containing Pieces Not ZIP+4 Coded*

Line 1: The word "RESIDUAL".
Line 2: FCM.
Line 3: Name of the mailer and the city and two-letter state abbreviation of the mailer's location.

Example:

RESIDUAL
FCM
XYZ CORP BIGFOOT TX

562.5 Documentation

562.51 When Not Required

[Insert current text of 562.61.]

562.52 Information Required

562.521 Tray Label Option

a. Sequence. [Insert the existing text of 562.621a. Replace the last sentence of existing 562.621a with the following: "In the 5-digit portion, the contents of each tray must be detailed by 5-digit ZIP Code, and, in both the 3-digit portion and the SCF portion, by 3-digit ZIP Code prefix. For First-Class mailings having residual pieces prepared in accordance with 562.42a, the documentation must also show a residual section that is listed by unique tray number or the exact top line of the tray label and the contents of residual trays must be detailed by 3-digit ZIP Code prefix."]

b. Information. [Insert the existing text of 562.621b. In the second sentence of this section change the phrase "For 3-digit and SCF trays," to "For 3-digit and SCF trays (and for First-Class residual trays prepared in accordance with 562.42a),".]

VOL 56 ISS 122 JE 25 1991 UMI

c. Summary. [Insert the existing text of 552.621c; change the reference "561.23" to "563.132".]

d. Tray Preparation. [Insert existing text of 552.621d.]

552.622 ZIP Code Option

a. Sequence. [Insert the existing text of 552.22a; replace the last sentence with the following: "In the 5-digit portion, the entries must be listed by 5-digit ZIP Code, and in both the 3-digit portion and the SCF portion, by 3-digit ZIP Code prefix. For First Class mailings having residual pieces prepared in accordance with 562.42a, the documentation must also show a residual level of sortation. The contents of First-Class residual trays must be listed by 3-digit ZIP Code prefix."]

b. Information. [Insert existing text of 562.622b.]

c. Summary. [Insert existing text of 562.622c; change the reference "561.23" to "562.322".]

d. Tray Preparation. [Insert existing text of 562.622d.]

PART 563—PRESORTED ZIP+4 BARCODED MAIL

11. Delete current 563 and insert new 563.1 to read as follows:

563 Presorted ZIP+4 Barcoded Mail

563.1 Tray-Based Preparation Requirements

563.11 Required Percentage of ZIP+4 Barcoded Pieces

563.111 Eighty-Five Percent Requirement for the Entire Mailing

At least 85 percent of the total number of pieces in a tray-based ZIP+4 Barcoded rate mailing must bear the correct ZIP+4 barcode or correct delivery point (11-digit) barcode prepared as required by 530 and 550. All pieces must also bear the correct numeric ZIP+4 code or correct numeric 5-digit ZIP Code in the address.

563.112 One-Hundred Percent Requirement for the Pieces in 5-Digit Trays

Each piece placed in a 5-digit tray must bear the correct ZIP+4 barcode or correct delivery point (11-digit) barcode prepared as required by 530 and 550. Each piece must also bear either the correct numeric ZIP+4 code or correct numeric 5-digit ZIP Code in the address.

Note: 5-digit trays are optional, and need be prepared only if the mailer wishes to qualify pieces for the 5-digit ZIP+4 Barcoded rates.

563.12 Rate Eligibility

563.121 First-Class Mail

a. Five-Digit Trays. In 5-digit trays, each piece may qualify for the 5-digit ZIP+4 Barcoded rate. 5-digit trays must be full trays (see 561.22) or overflow trays (see 563.132b) and must be 100 percent ZIP+4 barcoded or delivery point barcoded in accordance with the requirements of 551.

b. 3-Digit and SCF Trays. Pieces that bear the correct ZIP+4 barcode or correct delivery point barcode in 3-digit and SCF trays may qualify for the 3-digit ZIP+4 Barcoded rate. Pieces that do not bear a ZIP+4 barcode or delivery point barcode may qualify for the ZIP+4 Presort rate if they bear the correct numeric ZIP+4 code in the address and meet the requirements of 540, and may qualify for the Presorted First-Class rate if they bear a correct 5-digit numeric ZIP Code in the address. In SCF trays, there must be at least 50 pieces for each 3-digit ZIP Code destination. Three-digit and SCF trays must be full trays (see 561.22) or overflow trays (see 563.132b).

c. Residual Trays. Pieces that bear the correct ZIP+4 barcode or correct delivery point barcode in residual trays may qualify for the nonpresorted ZIP+4 Barcoded rate if the pieces are eligible for the card rates, or the nonpresorted ZIP+4 rates if the pieces are other than cards. Residual pieces that do not bear a ZIP+4 barcode or delivery point barcode may qualify for the nonpresorted ZIP+4 rate if they bear a correct numeric ZIP+4 code in the address and meet the requirements of 540, and may qualify for the single piece First-Class rate if they bear a correct numeric 5-digit ZIP Code in the address.

563.122 Second-Class Mail

a. Five-Digit Trays. In 5-digit trays, each piece may qualify for the level B5/H5/J5 ZIP+4 Barcoded rates. 5-digit trays must be full trays (see 561.22) or overflow trays (see 563.132b) and must be 100 percent ZIP+4 barcoded or delivery point barcoded.

b. Three-Digit and SCF Trays. Pieces that bear the correct ZIP+4 barcode or correct delivery point barcode in 3-digit and SCF trays may qualify for the level B3/H3/J3 ZIP+4 Barcoded rates. Pieces that do not bear a ZIP+4 barcode or delivery point barcode may qualify for the level B3/H3/J3 ZIP+4 rates if they bear the correct numeric ZIP+4 code in the address and meet the requirements of 540, and may qualify for the level B/H/J presort rates if they bear a correct 5-digit numeric Zip Code in the address. Three-digit and SCF trays must be full trays (see 561.22) or overflow trays (see 563.132b).

c. Residual Trays. Pieces that bear the correct ZIP+4 barcode or correct delivery point barcode in residual trays may qualify for the level A/G/J: ZIP+4 Barcoded rates. Residual pieces that do not bear a ZIP+4 barcode or delivery point barcode may qualify for the level A/G/J: ZIP+4 rates if they bear a correct numeric ZIP+4 code in the address and meet the requirements of 540, and may qualify for the level A/G/J presort rates if they bear a correct numeric 5-digit ZIP Code in the address.

563.123 Third-Class Mail

a. Five-Digit Trays. In 5-digit trays, each piece may qualify for the 5-digit ZIP+4 Barcoded rates. 5-digit trays must be full trays (see 561.22) or overflow trays (see 563.132b) and must be 100 percent ZIP+4 barcoded or delivery point barcoded.

b. Three-Digit and SCF Trays. Pieces that bear the correct ZIP+4 barcode or correct delivery point barcode in 3-digit and SCF trays may qualify for the 3-digit ZIP+4 Barcoded rates. Pieces that do not bear a ZIP+4 barcode or delivery point barcode may qualify for the 3/5 ZIP+4 rates if they bear the correct numeric ZIP+4 code in the address and meet the requirements of 540, and may qualify for the 3/5 presort rates if they bear a correct 5-digit numeric ZIP Code in the address. Three-digit and SCF trays must be full trays (see 561.22) or overflow trays (see 563.132b).

c. Residual Trays. Pieces that bear the correct ZIP+4 barcode or correct delivery point barcode in residual trays may qualify for the basic ZIP+4 Barcoded rates. Residual pieces that do not bear a ZIP+4 barcode or delivery point barcode may qualify for the basic ZIP+4 rates if they bear a correct numeric ZIP+4 code in the address and meet the requirements of 540, and may qualify for the basic presort rates if they bear a correct numeric 5-digit ZIP Code in the address.

563.13 Sortation Requirements

563.131 Facing, ZIP Code Grouping, and Packaging of Pieces in Trays

a. Facing. All the pieces in each tray in the mailing must be faced in the same direction. The pieces must be placed in the tray so that the address is right-side up and facing the front (labeled end) of the tray.

b. ZIP Code Grouping and Packaging

(1) Five-Digit and 3-Digit Trays

(a) Full Trays. There are no ZIP Code grouping requirements in 5-digit and 3-digit trays. Packaging is not permitted in full 5-digit and 3-digit trays.

Note: Five-digit and 3-digit trays are required to be full (see 563.132d(1) and 563.132d(2)) except that less than full overflow trays are permitted as described in 563.132b.

(b) Overflow Trays. The pieces in overflow trays to 5-digit and 3-digit destinations as provided in 563.132b (overflow trays are less than full by definition) must be packaged to preserve their orientation, and labeled as either 5-digit packages or 3-digit packages as appropriate. See 563.131b(4) for further requirements on securing and labeling packages.

(2) SCF Trays

(a) First-Class Mailings

(i) Full Trays. There must be at least 50 pieces for each 3-digit ZIP Code area within SCF trays. The pieces for each 3-digit ZIP Code area within the tray must be grouped together. Packaging is not permitted in full SCF trays. SCF trays must be full (see 563.132d(3)) except for overflow trays as provided in 563.132b.

(ii) Overflow Trays. The pieces in First-Class SCF overflow trays (overflow trays are less than full by definition) must be packaged to preserve their orientation. Such packages must contain mail for only one 3-digit ZIP Code area and must be labeled as a 3-digit package. See 563.131b(4) for further requirements on securing and labeling packages.

(b) Second- and Third-Class Mailings

(i) Full Trays. There is no minimum quantity requirement for individual 3-digit ZIP Code areas in SCF trays of second- and third-class mail. However, SCF trays must be full (except for overflow trays as provided in 563.132b.) Pieces for each 3-digit ZIP Code area contained within the tray must be grouped together. Packaging is not permitted in full SCF trays.

(ii) Overflow Trays. The pieces in second- and third-class SCF overflow trays (overflow trays are less than full by definition) must be packaged to preserve their orientation in the tray. Such packages must contain mail for only one 3-digit ZIP Code area and must be labeled as a 3-digit package. See 563.131b(4) for further requirements on securing and labeling packages.

(3) Residual Trays

(a) Prepared in Accordance with Option 1: ZIP Code Sequencing and Listing. Residual pieces that are prepared in accordance with 563.132e(1) (Option 1: ZIP Code Sequencing and Listing) must be placed in residual trays in 3-digit ZIP Code sequence. Pieces in less than full residual trays must be packaged to preserve their orientation. Such packages must contain mail for only one 3-digit ZIP Code area and be labeled as a 3-digit package. See 563.131b(4) for further requirements on securing and labeling packages.

(b) Prepared in Accordance with Option 2: Physical Separation. Residual pieces that are separately trayed as provided in 563.132e(2), (Option 2, Physical Separation) must be separated or packaged into groups of 100 pieces as described in 563.132e(2) and need not be sequenced and labeled by 3-digit ZIP Code area.

(4) General Requirements for Securing and Labeling Packages.

(a) Securing Packages. Packages should measure approximately 4 inches in thickness. The maximum permissible thickness is 6 inches. Rubber bands must be used to secure packages of all classes of mail. Packages up to 1 inch thick must be secured with at least one rubber band around the girth. Packages thicker than 1 inch must be secured with at least two rubber bands. The first rubber band should always be placed around the length and the second, around the girth so that it crosses over the first. Rubber bands used to secure packages of mail should be positioned as near as possible to the center of the mailpiece to provide the greatest stability during transit and handling. More than two bands may be used to secure a package, but banding material must never lie along the outer 1 inch of any edge.

(b) Labeling Packages. The top piece in each package must bear the red "D" (for 5-digit packages in 5-digit overflow trays) or the green "3" (for 3-digit packages in 3-digit and SCF overflow trays, and in residual trays) pressure sensitive package label in the lower left corner of the address side. Alternatively, the applicable 5-digit or 3-digit optional endorsement package label line may be used as specified in 369, 441.232, or 642.3.

563.132 Traying Requirements

a. General. The requirements in 561.2 must be met.

b. Volume per Tray and Preparation of Overflow Trays. Mailers should balance the volume in trays when more than one is prepared for the same destination to ensure that all are full (at least 3/4 full of mail when the bottom of the tray is placed at an approximately 90 degree angle to a level horizontal surface and the contents of the tray are compressed by their own weight). If after this step, the remaining pieces for that destination are not enough to generate an additional full tray, they may be placed in an overflow tray that is less than full, provided the pieces in the overflow tray are packaged and labeled, and only one such tray for that destination is prepared in the mailing. (See 563.131b(4) for further requirements concerning packaging and labeling.) To allow accurate verification of the mailing by postal acceptance personnel, the mailer must provide a listing of all such trays prepared in addition to the documentation required by 563.14.

c. Size and Availability of Trays. Only standard 2-foot trays may be used to prepare tray-based ZIP+4 Barcoded rate mailings. The Postal Service will provide mailers with the trays.

d. Tray Sortation—Qualifying Pieces.

(1) Five-Digit Trays. [Insert existing text of 563.411; change the reference "561.23" to "563.132b". Change the tray label information to read as shown below:]

Line 1: City, two-letter state abbreviation, and 5-digit ZIP Code.

Line 2: Appropriate class or contents designation (FCM, 2C, NEWS, or 3C) followed by the words "Z+4 BARCODED" or "Z+4 B/C".

Line 3: Name of the mailer and the city and two-letter state abbreviation of the mailer's location.

Example:

DETROIT MI 48235
FCM Z+4 BARCODED
NB COMPANY UNION SC

(2) Three-Digit Trays. [Insert existing text of 563.412; change the reference "561.23" to "563.132b." Change the tray label information to read as shown below.]

(a) Unique 3-Digit ZIP Code Prefixes

Line 1: City, two-letter state abbreviation, and unique 3-digit prefix listed in Exhibit 122.63b.

Line 2: Appropriate class or contents designation (FCM, 2C, NEWS, or 3C) followed by the words "Z+4 BARCODED" or "Z+4 B/C.".

Line 3: Name of the mailer and the city and two-letter state abbreviation of the mailer's location.

Example:

PHILADELPHIA PA 191
3C Z+4 BARCODED
ROCKET CO ROCHESTER NY

(b) Other 3-digit ZIP Code Prefixes

Line 1: Name of SCF and two-letter state abbreviation of the SCF, followed by the 3-digit prefix of the pieces in the tray (see Exhibit 122.63c or Exhibit 122.63d for the name of the SCF serving the 3-digit ZIP Code area).

Line 2: Appropriate class or contents designation (FCM, 2C, NEWS, or 3C) followed by the words "Z+4 BARCODED" or "Z+4 B/C".

VOL 56 ISS 122 JE 25 1991 UMI

Line 3: Name of the mailer and the city and two-letter state abbreviation of the mailer's location.

Example:

NORTHERN VIRGINIA VA 221
NEWS Z+4 BARCODED
ABC MAILING CO ROCHESTER NY

(3) SCF Trays. [Insert existing text of 563.63b; change the reference "561.23" to "563.132b." Change the tray label information to read as shown below.]

Line 1: Letters "SCF," followed by the name of the SCF, the two-letter state abbreviation of the SCF, and the 3-digit ZIP Code prefix for the SCF shown in Exhibit 122.63d.

Line 2: Appropriate class or contents designation (FCM, 2C, NEWS, or 3C) followed by the words "Z+4 BARCODED" or "Z+4 B/C".

Line 3: Name of the mailer and the city and two-letter state abbreviation of the mailer's location.

Example:

SCF SAN ANTONIO TX 780
3C Z+4 B/C
DR PATERNO BIGFOOT TX

e. Tray Sortation—Residual Pieces. Residual pieces are those that cannot be trayed as required by 563.132d. Residual pieces must be placed in trays in one of the following ways:

(1) Option 1: ZIP Code Sequencing and Listing. Residual pieces must be placed in residual trays in 3-digit ZIP Code sequence. Pieces in less than full residual trays must be packaged by 3-digit area and labeled as described in 563.131b(3)(a) and 563.131b(4). Mailers must provide a listing by 3-digit area of the various rate qualification categories as described in 563.142. Trays must be labeled as follows:

Line 1: Word "Residual" followed by the 3-digit ZIP Code range of the pieces in the tray.

Line 2: Appropriate class or contents designation (FCM, 2C, NEWS, or 3C LTRS as appropriate) followed by the words "ZIP+4 BARCODED".

Line 3: Name of the mailer and the city and two-letter state abbreviation of the mailer's location.

Example:

RESIDUAL 010–590
FCM ZIP+4 BARCODED
XYZ CORP BIGFOOT TX

(2) Option 2: Physical Separation. Residual pieces bearing ZIP+4 barcodes must be separately trayed from those residual pieces that do not. Pieces that do not bear ZIP+4 barcodes or delivery point barcodes must be further separated so that pieces bearing a correct numeric ZIP+4 code in the address are separately trayed from those pieces bearing a correct 5-digit ZIP Code in the address. Within each of the resulting trays, the pieces must be separated into groups of 100 pieces. The groups of 100 must be delineated by separator tabs. When the tray is full, nothing further is required. When the tray is less than full, pieces must also be rubber-banded into packages approximately 4 inches thick, within the group-100 separations. When there are less than 100 pieces in a group at the end of the last tray for any of the three types of trays (those containing the ZIP+4 barcoded or delivery point barcoded pieces, those containing the pieces with correct numeric ZIP+4 codes, and those containing pieces with correct 5-digit ZIP Codes) the actual number of pieces in the group must be written on the separator card. The total number of residual pieces in each rate category must be added to the summary portion of the documentation required in 563.142. Option 2 Residual trays must be labeled as follows:

(a) Trays Containing ZIP+4 or Delivery Point Barcoded Mail

Line 1: The word "RESIDUAL".

Line 2: Appropriate class or contents designation (FCM, 2C, NEWS, or 3C LTRS as appropriate) followed by the words "ZIP+4 BARCODED".

Line 3: Name of the mailer and the city and two-letter state abbreviation of the mailer's location.

Example:

RESIDUAL
FCM ZIP+4 BARCODED
XYZ CORP AUSTIN TX

(b) Trays Containing Pieces That Are NOT ZIP+4 or Delivery Point Barcoded and Bear a Correct Numeric ZIP+4 Code in the Address.

Line 1: The word "RESIDUAL".

Line 2: Appropriate class or contents designation (FCM, 2C, NEWS, OR 3C LTRS) followed by the words "ZIP+4".

Line 3: Name of the mailer and the city and two-letter state abbreviation of the mailer's location.

Example:

RESIDUAL
FCM ZIP+4
XYZ CORP AUSTIN TX

(c) Trays Containing Pieces That Are NOT ZIP+4 or Delivery Point Barcoded and Bear a Correct Numeric 5-Digit ZIP Code in the Address.

Line 1: The word "RESIDUAL".

Line 2: Appropriate class or contents designation (FCM, 2C, NEWS, OR 3C LTRS).

Line 3: Name of the mailer and the city and two-letter state abbreviation of the mailer's location.

Example:

RESIDUAL
FCM
XYZ CORP AUSTIN TX

563.14 Documentation

563.141 When Not Required.

[Insert text of existing 563.61; change the reference "561.23" to "563.132b".]

563.142 Information Required

a. Tray Label Option

(1) Sequence. [Insert text of existing 563.621a and add the following sentence at the end: "When residual mail is prepared in accordance with Option 1, ZIP Code Sequencing and Listing, set forth in 563.132e(1), the documentation must also show a residual section that is listed by unique tray number or the exact top line of the tray label and the contents of residual trays must be detailed by 3-digit ZIP Code prefix."]

(2) Information. [Insert text of existing 563.622b. In the second sentence, change the phrase "number of pieces with a ZIP+4 code" to "number of pieces with a ZIP+4 barcode". Add the following sentence at the end of this section: "For residual mail prepared in accordance with Option 1, ZIP Code Sequence and Listing, set forth in 563.132e(1), the documentation must show a subtotal for the number of pieces at each rate category, the number of pieces with a ZIP+4 barcode and the total number of pieces in the tray.]

(3) Summary. [Insert text of existing 563.622c; change the reference "561.23" to "563.132b". Add the following as the second sentence of this section: "When Option 2, Physical Separation, in 563.132e(2), is used to prepare residual mail, the summary must also include the number of residual pieces in each rate category, and the number of residual pieces prepared with a ZIP+4 barcode from the hand-counted residual portion of the mailing."]

(4) Tray Preparation. [Insert text of existing 563.621d.]

b. ZIP Code Option

(1) Sequence. [Insert text of existing 563.622a and add the following sentence at the end: "When residual mail is prepared in accordance with Option 1, ZIP Code Sequencing and Listing, set forth in 563.132e(1), the documentation must also show a residual level of sortation. The contents of residual trays must be detailed by 3-digit ZIP Code prefix."]

(2) Information. [Insert text of existing 563.622b.]

(3) Summary. [Insert text of existing 563.622c. Add the following as the second sentence of this section: "When Option 2, Physical Separation, in 563.132e(2) is used to prepare residual mail, the summary must also include the number of residual pieces in each rate category, and the number of residual pieces prepared with a ZIP+4 barcode from the hand-counted residual portion of the mailing.]

(4) Tray Preparation. [Insert text of existing 563.622d.]

PART 563.2—PACKAGE-BASED PREPARATION REQUIREMENTS—5-DIGIT ZIP+4 BARCODED RATE MAILINGS

11. Add new part 563.2 as follows:

563.2 Package-Based Preparation Requirements—5-Digit ZIP+4 Barcoded Rate Mailings

563.21 One-Hundred Percent ZIP+4 Barcoded Requirement

All pieces in a 5-digit ZIP+4 Barcoded rate mailing prepared in accordance with 563.2 must bear a correct ZIP+4 barcode or delivery point (11-digit) barcode prepared as required by 530 and 550. In addition, each piece in the mailing must bear either the correct numeric ZIP+4 code or correct numeric 5-digit ZIP Code in the address.

563.22 Rate Eligibility

.221 First-Class Mailings

All pieces within the mailing may qualify for the 5-digit ZIP+4 Barcoded rate. (Only pieces containing a ZIP+4 barcode that are part of a group of 10 or more pieces for the same 5-digit ZIP Code area may be contained in the mailing.)

.222 Second-Class Mailings

All pieces within the mailing may qualify for the level B5/H5/J5 ZIP+4 Barcoded rates. (Only pieces containing a ZIP+4 barcode that are part of a group of 10 or more pieces for the same 5-digit ZIP Code area may be contained in the mailing.)

.223 Third-Class Mailings

All pieces within the mailing may qualify for the 5-digit ZIP+4 Barcoded rate. (Only pieces containing a ZIP+4 barcode that are part of a group of 10 or more pieces for the same 5-digit ZIP Code area may be contained in the mailing.)

563.23 Sortation Requirements

563.231 Facing, Minimum Quantity Per 5-Digit Area, Grouping and Packaging Requirements

a. Facing. All pieces in each tray in the mailing must be faced in the same direction. The pieces must be placed in the tray so that the address is right-side up and facing the front (labeled end) of the tray.

b. Minimum Quantity Per 5-Digit Area Requirements. There must be at least 10 pieces for each 5-digit ZIP Code area contained in the mailing. When there are fewer than 10 pieces for a 5-digit ZIP Code area, the pieces for that 5-digit area are not permitted within the mailing.◄

c. Grouping and Packaging Requirements.

(1) Full 5-Digit Trays. None.

(2) Full 3-digit and SCF Trays. Within full 3-digit and full SCF trays, the groups of pieces for each 5-digit ZIP Code area contained in the tray must be delineated by separator cards.

(3) Less Than Full SCF Trays. Within less than full SCF trays, the groups of pieces for each 5-digit ZIP Code area contained in the tray must be secured together into 5-digit packages. There must be at least 10 pieces for a 5-digit ZIP Code area in each package.

(a) Securing Packages. Packages should measure approximately 4 inches in thickness. The maximum permissible thickness is 6 inches. Rubber bands must be used to secure packages of all classes of mail. Packages up to 1 inch thick must be secured with at least one rubber band around the girth. Packages thicker than 1 inch must be secured with at least two rubber bands. The first rubber band should always be placed around the length and the second, around the girth so that it crosses over the first. Rubber bands used to secure packages of mail should be positioned as near as possible to the center of the mailpiece to provide the greatest stability during transit and handling. More than two bands may be used to secure a package, but banding material must never lie along the outer 1 inch of any edge.

(b) Labeling Packages. The top piece in each package must bear a red "D" pressure sensitive package label in the lower left corner of the address side, or the 5-digit optional endorsement package label line must be used to label the packages in accordance with 369, 441.232, or 642.3. Package labels are not required for 5-digit groups in full trays that are delineated by separator cards.

563.232 Traying Requirements

a. General. The requirements in 561.2 must be met.

b. Volume per Tray.

(1) Five-Digit and 3-Digit Trays. 5-digit and 3-digit trays must be full as described in 561.22.

(2) SCF Trays. SCF trays may be less than full. There is no minimum quantity other than the requirement that there be at least 10 pieces per 5-digit ZIP Code area as described in 563.231b.

c. Size and Availability of Trays. Two sizes of trays, 1-foot trays and standard 2-foot trays, may be used in package-based 5-digit ZIP+4 Barcoded rate mailings. The Postal Service provides mailers with standard 2-foot trays, which may be used for any presort level of tray in the mailing. One-foot trays (half-trays) may be used only for 5-digit trays and must be supplied by the mailer. One-foot (half-trays) must not be used for 3-digit or SCF trays. In order to meet Postal Service transportation and storage needs, the 1-foot trays and their sleeves must meet Postal Service specifications (see 563.232d for information on how to obtain the specifications).

d. Physical Specifications for 1-Foot Trays and Sleeves. Mailers may obtain copies of the specification for small letter tray and sleeve construction by writing to: Container & Material Handling Division, Engineering and Development Center, United States Postal Service, 8403 Lee Highway, Merrifield, VA 22082–8142, and by requesting the most recent specifications and drawings for DL–256874—Small Letter Tray, Model SMM and DL–256875—Sleeve, Small Letter Tray, Model SMMS.

e. Tray Sortation.

(1) Five-Digit Trays. When there are enough pieces to the same 5-digit destination to fill a tray, a 5-digit tray must be prepared for that destination. Trays that are not full are prohibited. Full 1-foot trays (half-trays) meeting Postal Service specifications (see 563.232c and 563.232d) may be used by mailers. Trays must be labeled as follows:

Line 1: City, two-letter state abbreviation, and 5-digit ZIP Code.

Line 2: Appropriate class or contents designation (FCM, 2C, NEWS, or 3C) followed by the words "5DG Z+4 BARCODED" or "5DG Z+4 B/C".

Line 3: Name of the mailer and the city and two-letter state abbreviation of the mailer's location.

VOL
56
ISS
122
JE
25
1991
UMI

Example:

DETROIT MI 48235
FCM 5DG Z+4 BARCODED
NB COMPANY UNION SC

(2) Three-Digit Trays. If, after preparing all possible full 5-digit trays, there are sufficient pieces remaining to fill a tray for a 3-digit ZIP Code destination, a 3-digit tray must be prepared. Only standard 2-foot trays may be used. Use of 1-foot trays (half-trays) is prohibited. Pieces for each 5-digit ZIP Code area within the tray must be delineated by separator tabs as set forth in 563.231c(2). Trays that are not full are prohibited. Trays must be labeled as follows:

(a) Unique 3-Digit ZIP Code Prefixes

Line 1: City, two-letter state abbreviation, and unique 3-digit prefix listed in Exhibit 122.63b.
Line 2: Appropriate class or contents designation (FCM, 2C, NEWS, or 3C) followed by the words "5DG Z+4 BARCODED" or "5DG Z+4 B/C."
Line 3: Name of the mailer and the city and two-letter state abbreviation of the mailer's location.

Example:

PHILADELPHIA PA 191
3C 5DG Z+4 BARCODED
ROCKET CO ROCHESTER NY

(b) Other 3-digit ZIP Code Prefixes

Line 1: Name of SCF and two-letter state abbreviation of the SCF, followed by the 3-digit prefix of the pieces in the tray (see Exhibit 122.63c or Exhibit 122.63d for the name of the SCF serving the 3-digit ZIP Code area).
Line 2: Appropriate class or contents designation (FCM, 2C, NEWS, or 3C) followed by the words "5DG Z+4 BARCODED" or "5DG Z+4 B/C".
Line 3: Name of the mailer and the city and two-letter state abbreviation of the mailer's location.

Example:

NORTHERN VIRGINA VA 221
NEWS 5DG Z+4 BARCODED
ABC MAILING CO ROCHESTER NY

(3) SCF Trays

(a) Trays for SCFs Serving a Single 3-Digit Area. If, after preparing all possible full 5-digit and full 3-digit trays, there are pieces remaining for an SCF that serves a single 3-digit area listed in Exhibit 122.63c, which are not sufficient to fill a tray, they must be placed in a single 3-digit SCF tray. Only standard 2-foot trays may be used. Use of 1-foot trays (half-trays) is prohibited. The minimum quantity of mail for a single 3-digit SCF tray is 10 pieces for a 5-digit ZIP Code area (see 563.231b). The pieces in the tray must be secured into packages for 5-digit areas as described in 563.231c(3). Trays must be labeled as follows:

Line 1: Name of the SCF, two-letter state abbreviation, followed by the 3-digit ZIP Code prefix of the pieces in the tray (see Exhibit 122.63c).
Line 2: Appropriate class or contents designation (FCM, 2C, NEWS, or 3C) followed by the words "5DG Z+4 BARCODED" or "5DG Z+4 B/C".
Line 3: Name of the mailer and the city and two-letter state abbreviation to the mailer's location.

Example:

MID-FLORIDA FL 327
2C 5DG Z+4 BARCODED
BAKERSFIELD CA

(b) Trays for SCFs Serving Multiple 3-Digit Areas. If, after preparing all possible full 5-digit and full 3-digit trays, there are sufficient pieces remaining to fill a tray for one of the SCFs that serve more than one 3-digit area in Exhibit 122.63d, an SCF tray must be prepared. Only standard 2-foot trays may be used. Use of 1-foot trays (half-trays) is prohibited. Trays that are less than full may be prepared. The minimum quantity of mail for SCF trays is 10 pieces for a 5-digit ZIP Code area (see 563.231b). Groups of 10 or more pieces per 5-digit ZIP Code area within SCF trays must be delineated by separator cards in full trays, and packaged in less than full trays as described in 563.231c(3). If the tray contains pieces for only one 3-digit ZIP code area served by the SCF, the tray must be labeled as a 3-digit tray in accordance with 563.232e(2). If the tray contains pieces for only one 5-digit ZIP Code area served by the SCF, the tray must be labeled as a 5-digit tray in accordance with 563.232e(1). Trays containing pieces for multiple 3-digit areas served by the SCF must be labeled as follows:

Line 1: Letters "SCF," followed by the name of the SCF, the two-letter state abbreviation of the SCF, and the 3-digit ZIP Code prefix for the SCF shown in Exhibit 122.63d.
Line 2: Appropriate class or contents designation (FCM, 2C, NEWS, or 3C) followed by the words "5DG Z+4 BARCODED" or "5DG Z+4 B/C".
Line 3: Name of the mailer and the city and two-letter state abbreviation of the mailer's location.

Example:

SCF SAN ANTONIO TX 780
3C 5DG Z+4 B/C
DR PATERNO BIGFOOT TX

563.24 Documentation Requirements

None.

PART 563.3—PACKAGE-BASED PREPARATION REQUIREMENTS—3-DIGIT AND BASIC (OR NONPRESORTED FIRST-CLASS) ZIP+4 BARCODED RATE MAILINGS

12. Add new part 563.3 as follows:

563.3 Package-Based Preparation Requirements—3-Digit and Basic (or Nonpresorted First-Class) ZIP+4 Barcoded Rate Mailings

563.31 Eighty-Five Percent requirement

At least 85% of the total number of pieces in a 3-digit and basic ZIP+4 Barcoded rate mailing must bear the correct ZIP+4 barcode or correct delivery point (11-digit) barcode prepared as required by 530 and 550. All pieces must also bear either the correct numeric ZIP+4 code or correct numeric 5-digit ZIP Code in the address.

563.32 Rate Eligibility

563.321 First-Class Mail

a. Qualifying Groups of 50 or More Pieces Per 3-Digit Area in 3-Digit and SCF Trays. Pieces that bear the correct ZIP+4 barcode or correct delivery point barcode, are within a group of 50 or more pieces for a 3-digit ZIP Code area, and are placed in a 3-digit tray or in an SCF tray, may qualify for the 3-Digit ZIP+4 Barcoded rate. Pieces that do not bear a ZIP+4 barcode or delivery point barcode, but that are within a group of 50 or more pieces for a 3-digit ZIP Code area and are placed in a 3-digit tray or an SCF tray, may qualify for the ZIP+4 Presort rate if they bear the correct numeric ZIP+4 code in the address and meet the requirements of 540, and may qualify for the Presorted First-Class rate if they bear a correct 5-digit numeric ZIP Code in the address. Three-digit trays must be full trays as defined in 561.22 and must contain at least 50 pieces.

b. Residual Pieces. Residual pieces are those that cannot be placed in a group of 50 or more pieces for a 3-digit ZIP Code area. Residual pieces prepared with correct ZIP+4 barcodes or correct delivery point barcodes may qualify for the nonpresorted ZIP+4 Barcoded rates if they meet the requirements for the card rates (see 311.11, 322, and 328), otherwise they may qualify for the nonpresorted ZIP+4 rate. Residual pieces that do not bear ZIP+4 barcodes or delivery point barcodes may qualify for the nonpresorted ZIP+4 rate if they bear the correct numeric ZIP+4 code in the address and meet the requirements of 540, and may qualify for the single-piece First-Class rates if they bear a correct 5-digit numeric ZIP Code in the address. Residual pieces must be either packaged and placed in SCF trays with qualifying pieces as described in 563.331c(2)(a) and 563.332e(1), or separately trayed as described in 563.331c(2)(b) and 563.332e(2).

563.322 Second-Class Mail

a. Qualifying Groups of 50 or More Pieces Per 3-Digit Area in 3-Digit and SCF Trays. Pieces that bear the correct ZIP+4 barcode or correct delivery point barcode, are within a group of 50 or more pieces for a 3-digit ZIP Code area, and are placed in a 3-digit tray or an SCF tray, may qualify for the level B3/H3/J3 ZIP+4 Barcoded rates. Pieces that do not bear a ZIP+4 barcode or a delivery point barcode, but that are within a group of 50 or more pieces for a 3-digit ZIP Code area placed in a 3-digit tray or an SCF tray, may qualify for the level B3/H3/J3 ZIP+4 rates if they bear the correct numeric ZIP+4 code in the address and meet the requirements of 540, and may qualify for the level B/H/J presort rates if they bear the correct 5-digit ZIP Code in the address. Three digit trays must be full trays as defined in 561.22 and must contain at least 50 pieces.

b. Residual (Basic Rate) Pieces. Residual pieces are those that cannot be placed in a group of 50 or more pieces for a 3-digit ZIP Code area. Residual pieces prepared with correct ZIP+4 barcodes or correct delivery point barcodes may qualify for the level A/G/J1 ZIP+4 Barcoded rates. Residual pieces that do not bear ZIP+4 barcodes or delivery point barcodes may qualify for the level A/G/J1 ZIP+4 rates if they bear a correct numeric ZIP+4 code in the address and meet the requirements of 540, and may qualify for the level A/G/J presort rates if they bear a 5-digit numeric ZIP+4 code in the address. Residual pieces must be either packaged and placed in SCF trays with qualifying pieces as described in 563.331c(2)(a) and 563.332e(1), or separately trayed as described in 563.331c(2)(b) and 563.332e(2).

563.323 Third-Class Mail

a. Qualifying Groups of 50 or More Pieces Per 3-Digit Area in 3-Digit and SCF Trays. Pieces that bear the correct ZIP+4 barcode or correct delivery point barcode, are within a group of 50 or more pieces for a 3-digit ZIP Code area, and are placed in a 3-digit tray or an SCF tray, may qualify for the 3-digit ZIP+4 Barcoded rate. Pieces that do not bear the correct ZIP+4 barcode or delivery point barcode, but that are within a group of 50 or more pieces for a 3-digit ZIP Code area and are placed in a 3-digit tray or an SCF tray, may qualify for the 3/5 ZIP+4 rates if they bear the correct numeric ZIP+4 code in the address and meet the requirements of 540, and may qualify for the 3/5 Presort rates if they bear the correct 5-digit ZIP Code in the address. Three digit trays must be full trays as defined in 561.22 and must contain at least 50 pieces.

b. Residual (Basic Rate) Pieces. Residual pieces are those that cannot be placed in a group of 50 or more pieces for a 3-digit ZIP Code area. Residual pieces prepared with correct ZIP+4 barcodes or correct delivery point barcodes may qualify for the Basic ZIP+4 Barcoded rates. Residual pieces that do not bear ZIP+4 barcodes or delivery point barcodes may qualify for the basic ZIP+4 rates if they bear a correct numeric ZIP+4 code in the address and meet the requirements of 540, and may qualify for the basic presort rates if they bear a correct numeric 5-digit ZIP Code in the address. Residual pieces must be either packaged and placed in SCF trays with qualifying pieces as described in 563.331c(2)(a) and 563.332e(1), or separately trayed as described in 563.331c(2)(b) and 563.332e(2).

563.33 Sortation Requirements (3-Digit and Basic ZIP+4 Barcoded Rates—Package Based Preparation)

563.331 Facing, Minimum Quantity Per 3-Digit Area, Grouping and Packaging Requirements.

a. Facing Requirements. The pieces in all trays must be faced in the same direction. The pieces must be placed in the tray so that the address is right-side up and facing the front (labeled end) of the tray.

b. Grouping and Packaging Requirements for 3-Digit Trays. There are no grouping or packaging requirements. However there must be at least 50 pieces for each 3-digit ZIP Code area and trays must be full as required in 561.22 and 563.332d(1).

c. Grouping and Packaging Requirements for SCF Trays.

(1) Qualifying Groups of 50 or More Pieces Per 3-Digit ZIP Code Area. In full SCF trays, the pieces in each group of 50 or more pieces per 3-digit ZIP Code area must be grouped together. In less than full SCF trays, each group of 50 or more pieces to a 3-digit ZIP Code area must be secured together as a package and labeled. See 563.331d for further requirements on securing the labeling packages.

(2) Residual Pieces Prepared under Option 1: Trayed With Qualifying Mail. Residual pieces (those that cannot be placed in a group of 50 or more pieces for the same 3-digit ZIP Code area) that are placed in SCF trays as described in 563.332e(1) must also be packaged by 3-digit ZIP Code area and labeled as 3-digit packages. See 563.331d for further requirements on securing the labeling packages.

Note: Residual pieces that are separately trayed as provided in 563.332e(2). (Option 2, Physical Separation) must be separated or packaged into groups of 100 pieces as described in 563.332e(2) and need not be grouped and labeled by 3-digit ZIP Code area.

d. General Requirements for Securing and Labeling Packages.

(1) Securing Packages. Each package must contain mail for the same 3-digit ZIP Code area. Packages should measure approximately 4 inches in thickness. The maximum permissible thickness is 6 inches. Rubber bands must be used to secure packages of all classes of mail. Packages up to 1 inch thick must be secured with at least one rubber band around the girth. Packages thicker than 1 inch must be secured with at least two rubber bands. The first rubber band should always be placed around the length and the second, around the girth so that it crosses over the first. Rubber bands used to secure packages of mail should be positioned as near as possible to the center of the mailpiece to provide the greatest stability during transit and handling. More than two bands may be used to secure a package, but banding material must never lie along the outer 1 inch of any edge.

(2) Labeling Packages. The top piece in each package of qualifying or residual mail within less than full SCF trays must bear the green "3" sensitive package label in the lower left corner of the address side, or the applicable optional endorsement package label line as specified in 369, 441.232, or 642.3.

563.332 Traying Requirements

a. General. The requirements in 561.2 must be met.

b. Volume Per Tray.

(1) Three-Digit Trays. Three-digit trays must be full as described in 561.22 and 563.332d(1). They must also contain a minimum of 50 pieces.

(2) SCF Trays. SCF trays may be less than full. They may contain as little as one piece of mail if the tray contains only residual pieces (see 563.322d(2)). However, trays containing qualifying pieces must contain at least 50 pieces for a 3-digit ZIP Code area (see 563.32 and 563.322d(2)).

UMI

c. Size and Availability of Trays. Two sizes of trays, 1-foot trays and standard 2-foot trays, may be used in packaged-based 3-digit and basic ZIP+4 Barcoded rate mailings. The Postal Service provides mailers with standard 2-foot trays, which may be used for any presort level of tray in the mailing. One-foot trays (half-trays) may be used only for 3-digit trays and must be supplied by the mailer. One-foot trays must not be used for SCF trays. In order to meet Postal Service transportation and storage needs, the 1-foot trays and their sleeves must meet Postal Service specifications (see 563.232d for information on how to obtain the specifications).

d. Tray Sortation for the Qualifying Portion.

(1) Three-Digit Trays. When there are sufficient pieces for the same 3-digit ZIP Code area to fill a tray, a 3-digit tray must be prepared. Each 3-digit tray must contain at least 50 pieces. Trays that are not full are prohibited. Full 1-foot trays meeting and requirements of 563.332c and 563.232d may be used by mailers. Trays must be labeled as follows:

(a) Unique 3-Digit ZIP Code Prefixes

Line 1: City, two-letter state abbreviation, and unique 3-digit prefix listed in Exhibit 122.63b.
Line 2: Appropriate class or contents designation (FCM, 2C, NEWS, or 3C) followed by the words "3DG Z+4 BARCODED" or "3DG Z+4 B/C".
Line 3: Name of the mailer and the city and two-letter state abbreviation of the mailer's location.

Example:

PHILADELPHIA PA 191
3C 3DG Z+4 BARCODED
ABC CO ROCHESTER NY

(b) Other 3-digit ZIP Code Prefixes

Line 1: Name of SCF and two-letter state abbreviation of the SCF, followed by the 3-digit prefix of the pieces in the tray (see Exhibit 122.63c or Exhibit 122.63d for the name of the SCF serving the 3-digit ZIP Code area).
Line 2: Appropriate class or contents designation (FCM, 2C, NEWS, or 3C) followed by the words "3DG Z+4 BARCODED" or "3DG Z+4 B/C".
Line 3: Name of the mailer and the city and two-letter state abbreviation of the mailer's location.

Example:

NORTHERN VIRGINIA VA 221
NEWS 3DG Z+4 BARCODED
ABC MAILING CO ROCHESTER NY

(2) SCF Trays

(a) SCF Trays for SCFs Serving a Single 3-Digit Area. If, after preparing all possible full 3-digit trays, there are pieces remaining for an SCF that serves a single 3-digit area listed in Exhibit 122.63c, that are not sufficient to fill a tray, they must be placed in a single 3-digit SCF tray. Only standard 2-foot trays may be used. Use of 1-foot trays (half-trays) is prohibited. The minimum quantity of mail for a single 3-digit SCF tray is 50 pieces (see 563.331c(1)), except that single 3-digit SCF trays containing only residual (basic rated) pieces may contain fewer than 50 pieces—see 563.332a(1)). The pieces in the tray must be secured into packages for 3-digit areas and labeled as described in 563.331c and 563.331d. Single 3-digit SCF trays must be labeled as follows:

Line 1: Name of the SCF, two-letter state abbreviation, followed by the 3-digit ZIP Code prefix of the pieces in the tray (see Exhibit 122.63c).
Line 2: Appropriate class or contents designation (FCM, 2C, NEWS, or 3C) followed by the words "3DG Z+4 BARCODED" or "3DG Z+4 B/C".
Line 3: Name of the mailer and the city and two-letter state abbreviation of the mailer's location.

Example:

MID-FLORIDA FL 327
2C 3DG Z+4 BARCODED
NBT CO BAKERSFIELD CA

(b) SCF Trays for SCFs Serving Multiple 3-Digit Areas. If, after preparing all possible full 3-digit trays, there are sufficient pieces remaining to fill a tray for one of the SCFs listed in Exhibit 122.63d, that serve more than one 3-digit area, an SCF tray must be prepared. Only standard 2-foot trays may be used. Use of 1-foot trays (half-trays) is prohibited. Trays that are less than full may be prepared. The minimum quantity of mail for an SCF tray is 50 pieces (see 563.331c(1)), except that SCF trays containing only residual (nonpresorted First-Class or basic rated second- and third-class) pieces may contain fewer than 50 pieces (see 563.332e(1)). Groups of 50 or more pieces per 3-digit ZIP Code area must be grouped together in full trays; and packaged and labeled in less than full trays as specified in 563.331c(1) and 563.331d. If the tray contains pieces for only one 3-digit ZIP code areas served by the SCF, the tray must be labeled as if it were a 3-digit tray as specified in 563.332d(1). Trays containing pieces for multiple 3-digit area served by the SCF must be labeled as follows:

Line 1: Letters "SCF," followed by the name of the SCF, the two-letter state abbreviation of the SCF, and the 3-digit ZIP Code prefix for the SCF shown in Exhibit 122.63d.
Line 2: Appropriate class or contents designation (FCM, 2C, NEWS, or 3C) followed by the words "3DG Z+4 BARCODED" or "3DG Z+4 B/C".
Line 3: Name of the mailer and the city and two-letter state abbreviation of the mailer's location.

Example:

SCF SAN ANTONIO TX 780
FCM 3DG Z+4 BARCODED
ABC CO PHILADELPHIA PA

e. Tray Sortation Requirements for the Residual (Basic-Rated) Portion. Mailers must prepare residual pieces in one of the following two ways.

(1) Option 1: Trayed With Qualifying Mail. Residual pieces (those that cannot be placed in a full 3-digit tray and are not part of a group of 50 or more pieces for a 3-digit area) must be packaged and labeled by a 3-digit ZIP Code area (see 563.331c(2) and 563.331d) and placed in an SCF tray. Residual 3-digit packages must be placed in SCF trays containing qualifying 3-digit pieces (groups of 50 or more pieces per 3-digit ZIP Code area) wherever possible. Where there is no SCF tray containing qualifying 3-digit mail, and SCF tray containing only a residual piece, package, or packages must be prepared. Residual SCF trays must be prepared and labeled in the same way as trays containing qualifying 3-digit mail as described in 563.332d(1).

(2) Option 2: Physical Separation. Residual pieces bearing ZIP+4 barcodes or delivery point barcodes must be separately trayed from those residual pieces that do not. Pieces that do not bear ZIP+4 barcodes or delivery point barcodes must be further separated so that pieces bearing a correct numeric ZIP+4 code in the address are separately trayed from those pieces bearing a correct 5-digit ZIP Code in the address. Within each of the resulting trays, the pieces must be separated into groups of 100 pieces. The groups of 100 must be delinated by separator tabs. When the tray is full, nothing further is required. When the tray is less than full, pieces must also be secured into packages approximately 4 inches thick, within the group-100 separations. When there are less than 100 pieces in a group at the end of the last tray for any of the three types of trays (those containing the ZIP+4 barcoded or delivery point barcoded pieces, those containing the pieces with correct numeric ZIP+4 codes, and those containing pieces with

correct 5-digit ZIP Codes) the actual number of pieces in the group must be written on the separator card. The total number of residual pieces in each rate category must be added to the summary portion of the documentation required in 563.343. Option 2 Residual trays must be labeled as follows:

(a) Trays containing ZIP+4 or Delivery Point Barcoded Mail.
Line 1: The word "RESIDUAL".
Line 2: Appropriate class or contents designation (FCM, 2C, NEWS, or 3C LTRS as appropriate) followed by the words "ZIP+4 BARCODED".
Line 3: Name of the mailer and the city and two-letter state abbreviation of the mailer's location.

Example:

RESIDUAL
FCM ZIP+4 BARCODED
XYZ CORP AUSTIN TX

(b) Trays Containing Pieces That Are NOT ZIP+4 or Delivery Point Barcoded and Bear a Correct Numeric ZIP+4 Code in the Address.
Line 1: The word "RESIDUAL".
Line 2: Appropriate class or contents designation (FCM, 2C, NEWS, or 3C LTRS) followed by the words "ZIP+4".
Line 3: Name of the mailer and the city and two-letter state abbreviation of the mailer's location.

Example.

RESIDUAL
FCM ZIP+4
XYZ CORP AUSTIN TX

(c) Trays Containing Pieces That Are NOT ZIP+4 or Delivery Point Barcoded and Bear a Correct Numeric 5-Digit ZIP Code in the Address.
Line 1: The word "RESIDUAL".
Line 2: Appropriate class or contents designation (FCM, 2C, NEWS, OR 3C LTRS).
Line 3: Name of the mailer and the city and tow-letter state abbreviation of the mailer's location.

Example:

RESIDUAL
FCM
XYZ CORP AUSTIN TX

563.34 Documentation Requirements

563.341 When Not Required

Documentation is not required when every piece in the mailing bears the correct ZIP+4 barcode or correct delivery point barcode and each piece in the mailing has postage affixed at the exact rate of postage for which it qualifies.

563.342 Mailings Utilizing Option 1–SCF Trays, for Residual (Basic Rated) Pieces

a. Listing. Mailers must list by 3-digit ZIP Code:

(1) The number of ZIP+4 barcoded pieces or delivery point barcoded pieces that qualify for the First-Class 3-digit ZIP+4 Barcoded rates, the second-class level B3/H3/J3 ZIP+4 Barcoded rates, or the third-class 3-digit ZIP+4 Barcoded rates. (This is the number of ZIP+4 or delivery point barcoded pieces that are in a group of at least 50 pieces for the same 3-digit ZIP Code area within 3-digit and SCF trays.)

(2) The number of ZIP+4 barcoded or delivery point barcoded pieces that qualify for the First-Class Nonpresorted Barcoded rate (if qualified for the card rate) or the Nonpresorted ZIP+4 rates (if other than a card), the second-class level A/G/J1 ZIP+4 Barcoded rates, or the third-class basic ZIP+4 Barcoded rates. (This is the number of ZIP+4 barcoded or delivery point barcoded pieces within residual packages.

(3) The number of pieces not bearing a ZIP+4 barcode or delivery point barcode that qualify for the First-Class ZIP+4 Presort Rate, the second-class level B3/H3/J3 ZIP+4 rates; or the third-class 3/5 ZIP+4 rates. (The number of pieces in groups of 50 or more pieces in 3-digit and SCF trays, that do not bear a ZIP+4 barcode or a delivery point barcode but contain a numeric ZIP+4 code in the address.)

(4) The number of pieces not bearing a ZIP+4 barcode or delivery point barcode that qualify for the Presorted First-Class rates, the second-class B/H/J presort rates, or the third-class 3/5 Presort rates. (This is the number of pieces without a ZIP+4 or delivery point barcode, bearing a 5-digit numeric ZIP Code in the address, that are in a group of at least 50 pieces for a 3-digit ZIP code area within 3-digit and SCF trays.)

(5) The number of pieces not bearing a ZIP+4 barcode or delivery point barcode that qualify for the First-Class Nonpresorted ZIP+4 rates; the second-class level A/G/J1 ZIP+4 rates, or the third-class basic ZIP+4 rates. (This is the number of pieces without a ZIP+4 barcode or delivery point barcode, containing a correct numeric ZIP+4 code in the address, that are in residual packages.)

(6) The number of pieces not bearing a ZIP+4 barcode or delivery point barcode that qualify for the First-Class single piece rates, the second-class A/G/J rates, or the third-class basic presort rates. (This is the number of pieces without a ZIP+4 or delivery point barcode, bearing a 5-digit numeric ZIP+4 code in the address that are in residual packages.)

(7) A cumulative total. This is the total of all pieces listed in (1) through (6) for the particular 3-digit area plus all the pieces listed for preceding 3-digit areas.

b. Totals. The total number of pieces in each of rate category listings 563.342a(1) through 563.342a(6) must be shown following the entries for the last 3-digit ZIP area in the mailing.

c. Summary. (1) Second-Class Mailings and Permit Imprint Mailings. Mailers must show the total number of pieces in each rate category in the mailing. For each rate category, compute the postage charges at the applicable rate by multiplying the total number of pieces by the applicable rate of postage. Add the total amounts of postage charges for each rate category to show the total amount of postage to be deducted from either the second-class account or the third-class permit imprint account. Also summarize for the entire mailing, the total number of pieces that bear a properly prepared ZIP+4 barcode or delivery point barcode and the total number of pieces that do not. Show the percentage of ZIP+4 or delivery point barcoded pieces in the mailing.

(2) First- and Third-Class Metered and Precanceled Stamp Mailings. Mailers must show the total number of pieces in each rate category in the mailing. For each rate category, multiply the total number of pieces by the additional postage due per piece for that rate category. This will show the total postage due for each rate category in the mailing. Add the total amounts of postage due for each rate category to show the total amount of postage due. Also summarize, for the entire mailing, the total number of pieces that bear a properly prepared ZIP+4 barcode and the total number of pieces that do not. Show the percentage of ZIP+4 barcoded pieces in the mailing.

563.343 Documentation for Mailings Utilizing Option 2-Physical Separation, for Residual (Nonpresort Rated or Basic Rated) Pieces

a. Listing. Mailers must list by 3-digit ZIP Code:

(1) The number of ZIP+4 or delivery point barcoded pieces that qualify for the First-Class 3-digit ZIP+4 Barcoded rate, the second-class level B3/H3/J3 ZIP+4 Barcoded rates, or the third-class 3-digit ZIP+4 Barcoded rate. (This is the number of ZIP+4 or delivery point barcoded pieces that are in a group of at least 50 pieces for the same 3-digit ZIP Code area within 3-digit and SCF trays.)

VOL 56 ISS 122 JE 25 1991 UMI

(2) The number of pieces not bearing a ZIP+4 barcode or delivery point barcode that qualify for the First-Class ZIP+4 Presort rate, the second-class level B3/H3/J3 ZIP+4 rates, or the third-class 3/5 ZIP+4 rates. (This is the number of pieces in groups of 50 or more pieces in 3-digit and SCF trays, that do not bear a ZIP+4 barcode or a delivery point barcode, but contain a correct numeric ZIP+4 code in the address.)

(3) The number of pieces not bearing a ZIP+4 or delivery point barcode that qualify for the First-Class Presorted First-Class rates, the second-class level B/H/J presort rates, or the third-class 3/5 Presort rates. (This is the number of pieces in a group of at least 50 pieces for a 3-digit ZIP Code area within 3-digit and SCF trays that do not bear a ZIP+4 or delivery point barcode but contain a correct 5-digit numeric ZIP Code in the address.)

(4) A cumulative total. This is the total of all pieces listed for the particular 3-digit area plus all the pieces listed for preceding 3-digit areas.

b. Totals. The total number of pieces in each of the rate category listings in 563.343a(1) through 563.343a(3) must be shown following the entries for the last 3-digit ZIP Code area in the mailing.

c. Summary. (1) Second-Class Mailings and Permit Imprint Mailings. Mailers must show the total number of pieces in each rate category in the mailings as follows: The total number of ZIP+4 or delivery point barcoded pieces from the 3-digit listing; the total number of pieces without a ZIP+4 or delivery point barcode that contain a correct numeric ZIP+4 code from the 3-digit listing; the total number of pieces without a ZIP+4 or delivery point barcode that contain a correct numeric 5-digit ZIP Code from the 3-digit listing; the total number of pieces that contain a ZIP+4 or delivery point barcode from the residual portion of the mailing (563.332e(2)(a)); the total number of pieces that do not contain a ZIP+4 barcode or delivery point barcode and bear a numeric ZIP+4 code from the residual portion of the mailing (563.332e(2)(b)); and the total number of residual pieces that do not contain a ZIP+4 or delivery point barcode but bear a numeric 5-digit ZIP Code from the residual portion of the mailing (563.332e(2)(c)).

For each rate category listed above, compute the postage charges at the applicable rate by multiplying the total number of pieces by the applicable rate of postage. Add the total amounts of postage charges for each rate category to show the total amount of postage to be deducted from the second-class account or the permit imprint account. Also summarize for the entire mailing, the total number of pieces that bear a properly prepared ZIP+4 barcode or delivery point barcode and the total number of pieces that do not. Show the percentage of ZIP+4 barcode or delivery point barcoded pieces in the mailing.

(2) First- and Third-Class Metered and Precanceled Stamp Mailings. Mailers must show the total number of pieces in each rate category in the mailing as follows: The total number of ZIP+4 or delivery point barcoded pieces from the 3-digit listing; the total number of pieces without a ZIP+4 or delivery point barcode that contain a correct numeric ZIP+4 code from the 3-digit listing; the total number of pieces without a ZIP+4 or delivery point barcode that contain a correct numeric 5-digit ZIP Code from the 3-digit listing; the total number of pieces that contain a ZIP+4 or delivery point barcode from the residual portion of the mailing (563.332e(2)(a)); the total number of pieces that do not contain a ZIP+4 barcode or delivery point barcode and bear a numeric ZIP+4 code from the residual portion of the mailing (563.332e(2)(b)); and the total number of residual pieces that do not contain a ZIP+4 or delivery point barcode but bear a numeric 5-digit ZIP Code from the residual portion of the mailing (563.332e(2)(c)).

For each rate category listed above, multiply the total number of pieces by the additional postage due per piece for that rate category. This will show the total postage due for each rate category in the mailing. Add the total amounts of postage due for each rate category to show the total amount of postage due. Also summarize, for the entire mailing, the total number of pieces that bear a properly prepared ZIP+4 barcode or delivery point barcode and the total number of piece that do not. Show the percentage of ZIP+4 barcoded or delivery point barcoded pieces in the mailing.

13. Add a new part 563.4 as follows.

563.4 Package-Based Preparation Requirements—Single Mailings Containing Pieces Qualifying for Both 5-Digit and 3-Digit ZIP+4 Barcoded Rates

563.41 General

Mailers may submit mail prepared in accordance with 563.2 and 563.3 at the same time as one mailing provided all the provisions of 563.42 through 563.45 are met.

563.42 Minimum Quantity For Mailing Requirement

For First-Class Mail only one minimum quantity requirement (500 pieces) need be met for the entire mailing (both the 5-digit and 3-digit ZIP+4 Barcoded rate portions together). For third-class mail only one minimum quantity requirement of 200 pieces or 50 pounds of mail need be met for the entire mailing (both the 5-digit and 3-digit ZIP+4 Barcoded rate portions together).

Note: Second-Class is unaffected as there is no minimum quantity per mailing requirement for second-class

563.42 Percentage of Barcoded Pieces

All pieces in the 5-digit Barcoded rate portion of the mailing prepared in accordance with 563.2 must bear the correct ZIP+4 barcode or delivery point barcode as required in 563.21. For purposes of meeting the 85% ZIP+4 barcoded or delivery point barcoded requirements of 563.31, for the 3-digit Barcoded rate portion of the mailing, the total number of pieces in the 5-digit Barcoded rate portion of the mailing prepared in accordance with 563.2 may be counted towards the total number of ZIP+4 barcoded or delivery point barcoded pieces in the mailing, provided the additional documentation requirements of 563.45 are met.

563.43 Rate Eligibility

Pieces in the 5-digit Barcoded rate portion of the mailing will qualify for postage rates as described in 563.22 and pieces in the 3-digit Barcoded rate portion of the mailing will qualify for postage rates as described in 563.32.

563.44 Sortation Requirements

Pieces in the 5-digit Barcoded rate portion of the mailing must be sorted in accordance with 563.23 and pieces in the 3-digit Barcoded rate portion of the mailing must be sorted in accordance with 563.33.

563.45 Documentation Requirements

563.451 When Documentation is Not Required

Documentation is not required when every piece in the mailing bears the correct ZIP+4 barcode or correct delivery point barcode and each piece in the mailing has postage affixed at the exact rate of postage for which it qualifies.

563.452 When Documentation is Required

Mailers must provide the following information with each mailing.

a. Information Required for 5-Digit Portion Sorted in Accordance with 563.23. (1) Mailings of Identical Weight Pieces. Mailers must physically separate the trays containing mail sorted to 5-digits in accordance with 563.23 from trays containing mail sorted in accordance with 563.33 when presented to the post office for acceptance, so that the number of pieces reported on the mailing statement at the 5-digit Barcoded rate may be verified by weighing. Alternatively, the listing in 563.452a(2) below may be provided.

(2) Mailings of Non-identical Weight Pieces. Mailers must list by 5-digit ZIP Code the number of pieces that qualify for the First-Class 5-digit ZIP+4 Barcoded rates, the second-class level B5/H5/J5 ZIP+4 Barcoded rates, or the third-class 5-digit ZIP+4 Barcoded rates.

b. Information Required for 3-digit and Basic (or Nonpresorted First-Class) Portion Sorted in Accordance with 563.33. The portion of the mailing sorted in accordance with 563.33 must be listed and totaled in accordance with 563.342a and 563.342b, or in accordance with 563.343a and 563.343b, as applicable for the method used to document residual pieces.

c. Summary. The total number of ZIP+4 barcoded or delivery point barcoded pieces in the 5-digit portion of the mailing must be included in the summary portion of the documentation that is required by 563.342c or 563.343c as applicable for the method used to document residual pieces.

563.46 Mailing Statement

One mailing statement may be submitted reflecting pieces paid in both the 5-digit and 3-digit portions of the mailing.

14. Revise 580 to read as follows:

580 Postage Payment

[Insert existing text of 580. Add the following sentence: Mailers must annotate the mailing statement required to be submitted with each mailing with the appropriate Chapter 5 section number under which the mailing was prepared (562, 563.1, 563.2, 563.3, or 563.4 as appropriate). This section number must be written in the upper right corner of the front side of the mailing statement.

PART 660—PAYMENT OF POSTAGE

15. Revise 660 as follows:

661 Method of Payment

* * * * *

661.3 Bulk Mailings at ZIP+4 and ZIP+4 Barcoded Rates

661.31 Permit Imprint

See 145.

661.311 Identical-Weight Pieces

Identical-weight mailings may have postage paid by means of permit imprint. Mailings at the 3/5 ZIP+4, basic ZIP+4, 5-digit ZIP+4 barcoded, 3-digit ZIP+4 barcoded, and basic ZIP+4 barcoded must be accompanied by the documentation required in 624.446, 624.546, and 624.645, or, if Chapter 5 preparation is used by 562.5, 563.14, 563.24, 563.34, or 563.45.

* * * * *

661.32 Meter Stamps

* * * * *

661.322 Correct Postage Affixed to Each Piece

a. 3/5 ZIP+4 and Basic ZIP+4 Mailings. Pieces qualifying for the 3/5 ZIP+4 rate, the 3/5 presort rate, the basic ZIP+4 rate, and basic presort rate are each metered at the rate for which they qualify: See 624.24, 628.13 and 628.24, for documentation requirements, or if chapter 5 is used, 562.5.

b. ZIP+4 Barcoded Mailings. Pieces qualifying for the 5-digit ZIP+4 Barcoded rate, the 3-digit ZIP+4 Barcoded rate, the basic ZIP+4 Barcoded rate, the 3/5 ZIP+4 rate, the 3/5 presort rate, the basic ZIP+4 rate, and the basic presort rate are each metered at the rate for which they qualify. (See 624.24, 628.13, and 628.34, for documentation requirements, or if chapter 5 is used, 563.14, 563.24, 563.34, or 563.45.)

Note: Only pieces eligible for the 5-digit ZIP+4 Barcoded rate are permitted in mailings under 563.2.

661.323 Lowest Rate in the Mailing Affixed to Each Piece

a. 3/5 ZIP+4 and Basic ZIP+4 Mailings. All pieces may have metered postage affixed at the 3/5 ZIP+4 rate. Additional postage for pieces subject to the basic presort rate must be determined from the documentation required to be submitted with each mailing as specified in 624.24, 628.13, 628.24, or if chapter 5 is used, 562.5. The total additional postage must be paid by a meter strip affixed to the back of the mailing statement that must accompany the mailing, or through an advance deposit account as provided in Handbook F-1, Post Office Accounting Procedures, 524.

b. ZIP+4 Barcoded Mailings. (1) Mailings Prepared in Accordance With 628.1, 628.3, 563.1, or 563.4. All pieces may have metered postage affixed at the 5-digit ZIP+4 Barcoded rate. Additional postage for pieces subject to the 3-digit Barcoded rate, Basic Barcoded rate, 3/5 ZIP+4 rate, 3/5 presort rate, Basic ZIP+4 rate, and basic presort rate, must be determined from the documentation required to be submitted with each mailing as specified in 624.24, 628.13, and 628.34, or as specified in 563.14 or 563.45. The total additional postage must be paid by a meter strip affixed to the back of the mailing statement that must accompany the mailing, or through an advance deposit account as provided in Handbook F-1, Post Office Accounting Procedures, 524.

(2) 5-Digit ZIP+4 Barcoded Mailings Prepared in Accordance With 563.2. Each piece in the mailing must have postage affixed at the 5-digit ZIP+4 Barcoded rate.

(3) 3-Digit and Basic ZIP+4 Barcoded Mailings Prepared in Accordance With 563.3. All pieces may have metered postage affixed at the 3-digit ZIP+4 Barcoded rate. Additional postage for pieces subject to the 3/5 ZIP+4 rate, 3/5 presort rate, Basic Barcoded rate, Basic ZIP+4 rate, and basic presort rate, must be determined from the documentation required to be submitted with each mailing as specified in 563.34. The total additional postage must be paid by a meter strip affixed to the back of the mailing statement that must accompany the mailing, or through an advance deposit account as provided in Handbook F-1, Post Office Accounting Procedures, 524.

661.324 Neither Lowest Rate Nor Correct Postage Affixed to Each Piece

a. General. [Add the following to the end of this section:]

Exception: 5-digit ZIP+4 Barcoded rate mailings prepared with meters under 563.2 must have postage affixed to each piece in the mailing at the 5-digit ZIP+4 Barcoded rate, unless refund for postage added procedures are followed as described in 147.42, or if precanceled stamps of the same denomination are used for identical weight mailings.

661.33 Precanceled Stamps or Precanceled Stamped Envelopes

[Insert text of existing 661.33. Add the following note.]

DEPARTMENT OF EDUCATION

(CFDA No.: 84.023)

Inviting Applications for New Awards Under the Research in Education of Individuals With Disabilities Program for Fiscal Year 1991

Purpose: To advance and improve the knowledge base and improve the practice of professionals, parents, and other providing early intervention, special education, and related services, including professionals who work with children and youth with disabilities in regular education environments, to provide those children effective instruction and enable them to successfully learn.

Awards under this competition are to provide support for one or more centers designed to organize, synthesize, and disseminate current knowledge relating to children with attention deficit disorder (ADD) as required by the Education of the Handicapped Act Amendments of 1990.

Eligible Applicants: Eligible applicants are State and local educational agencies, institutions of higher education, and other public agencies and nonprofit private organizations.

Deadline for Transmittal of Applications. July 31, 1991.

Applications Available: June 27, 1991.

Available Funds: $600,000.

Estimated Average Size of Award: $150,000.

Estimated Number of Awards: 4.

Project Period: up to 18 months.

Note: The Department is not bound by any estimates in this notice.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75, 77, 80, 81, 82, 85, and 86; and (b) the regulations for this program in 34 CFR part 324.

It is the policy of the Department of Education not to solicit applications before the publication of final priorities. However, in this case it is essential to solicit applications on the basis of the notice of proposed priority as published in the **Federal Register** on April 9, 1991 (56 FR 14432), because the Department's authority to obligate these funds will expire on September 30, 1991.

The public comment period for the notice of proposed priority ended on June 10, 1991. Four parties responded to the notice. The first commenter was strongly supportive of the proposed priority as written. The other three commenters, although generally supportive, included in their comments concerns or suggestions. The second commenter was concerned that these projects not "reinvent the wheel" given the limited amount of funding available, and the current existence of informatioin on ADD and its relation to public education. The Secretary agrees with the commenter that a significant body of information is currently available. The intent of the centers is to make that information accessible to the public, parents, and teachers involved with children and youth with ADD. These centers are designed to disseminate existing knowledge consistent with the commenters concern not to "reinvent the wheel."

The third commenter raised two issues. The first issue addressed by the commenter was a concern that most of the available "research" knowledge of ADD and "researchers" are in psychology and medicine, and not in education in general nor special education in particular. The commenter felt that research has mainly been done from the "perspective of clinical treatments and medical regimes", and not from an educational perspective. The commenter suggested that, in order to reinforce the educational perspective, the priority should use the terms "field educators and educational researchers" instead of "educators and researchers," and that perhaps some of the centers should focus on educational research or that some of the centers' directors should be educational researchers. The Secretary believes that to limit project staff and/or personnel according to their disciplinary training or professional affiliation would be overly prescriptive, and not supported by either the statute or the regulations. In addition, the selection criteria that will be used to evaluate applications under this competition provide for the peer reviewers to evaluate the "quality of key personnel" proposed by the project. This selection criterion requires reviewers to consider experience and training in fields related to the objectives of the project, as well as other evidence the applicant provides.

The second issue raised by this commenter concerned the percsived order of activities as outlined by the proposed priority. The commenter felt that educators, researchers, and parents needed to provide input on specific information needs before the identification of critical issues. As written, the priority provides that "Identifying and prioritizing critical issues must be based on those having the greatest promise for assisting educators, researchers, and parents to respond to the needs of children with ADD" (emphasis added).

The fourth commenter made several suggestions. With respect to the assessment centers, the commenters advised that they include the integration of newly proposed assessment criteria for the ADD population, and a critical review of the empirical data supporting various assessment instruments. The commenter stated that there are no pathognomonic or highly specific tests that can be used alone to establish the diagnosis of ADD. The Secretary notes that the intent of the priority is to synthesize current knowledge on assessment which includes classification and criteria techniques and systems, and reliable and valid instrumentation. The psychometric priorities of assessment instruments will be addressed in the synthesis.

The second suggestion regarding assessment centers was that the outcome of this effort should be to integrate current and future assessment tools into a comprehensive evaluation model that could be used in school settings. The Secretary believes that the priority as proposed provides for capturing existing knowledge and review of current assessment instruments that will assist and provide direction for future improvements.

The third suggestion made by this commenter regarding intervention centers was for an emphasis to be placed on integrating the family, educational, and medical perspectives so that comprehensive multi-modality forms of treatment are considered. The Department, in addition to these centers, is funding separate synthesis activities through a contract that will involve these centers in integrating these family, educational, and medical perspectives.

The final suggestion made by this commenter concerned examining the accuracy of data reported by school nurses and teachers, particularly in regard to medical interventions, and the exploration of academic and non-academic interventions. The Secretary believes that the priority, as written, provides for the centers to look at the full range of interventions being used to meet the needs of students with ADD.

Based on the comments received, no changes are expected in the final priority. However, because the Department's authority to obligate these funds will expire on September 30, 1991 cooperative agreements will no longer be specified as the type of award. Applicants are advised to submit their applications based on the priority as proposed. If changes are made in the final priority, applicants will be provided the opportunity to amend or resubmit their applications.

For Applications or Information Contact: Linda Glidewell, Division of Innovation and Development, Office of Special Education Programs, Department of Education, 400 Maryland Avenue, SW. (Switzer Building, room 3524 –M/S 2640), Washington, DC 20202. Telephone: (202) 732–1099. (TDD: (202) 732–6153.)

Program Authority: 20 U.S.C. 1441–1443.

[Docket No. R-91-1606; FR 2654-P-01]

RIN 2501-AB16

Mortgagee Approval Reform and Direct Endorsement Expansion

AGENCY: Office of the Secretary, HUD.

ACTION: Proposed rule.

SUMMARY: This proposed rule would implement a comprehensive revision of the Department's regulations that prescribe the standards by which mortgagees are approved to participate in the HUD mortgage insurance programs, and by which approved mortgagees maintain their approval status. The proposed rule also would reorganize and update the Department's Direct Endorsement program requirements. The reforms proposed by this rule include increasing the net worth requirements of approved mortgagees, and improving the Secretary's ability to monitor the performance of approved mortgagees and to determine whether continued participation should be allowed. The purpose of the rule is to ensure that only responsible and soundly capitalized mortgagees are program participants. The specific revisions made by the proposed rule are more fully discussed in the Supplementary Information portion of this proposed rule.

DATES: Comment Due Date: August 26, 1991.

ADDRESSES: Interested persons are invited to submit comments regarding this rule to the Office of General Counsel, Rules Docket Clerk, room 10276, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410-0500. Comments should refer to the above docket number and title. A copy of each comment submitted will be available for public inspection and copying on weekdays between 7:30 a.m. to 5:30 p.m. at the above address. As a convenience to commenters, the Rules Docket Clerk will accept brief public comments transmitted by facsimile (FAX) machine. The telephone number of the FAX receiver is (202) 708-4337. (This is not a toll-free number.) Only public comments of six or fewer total pages will be accepted via FAX transmittal. This limitation is necessary in order to assure reasonable access to the equipment. Comments sent by FAX transmittals will not be acknowledged, except that the sender may request confirmation of receipt by calling the Docket Clerk at (202) 708-2084. (This is not a toll free number.)

FOR FURTHER INFORMATION CONTACT: William M. Heyman, Director, Office of Lender Activities and Land Sales Registration, Department of Housing and Urban Development, room 9146, 451 Seventh Street, SW., Washington, DC 20410, telephone (202) 708-1824. Hearing- or speech-impaired individuals may call the Office of Housing's TDD number (202) 708-4594. (These are not toll free numbers.)

SUPPLEMENTARY INFORMATION:

Paperwork Burden

The information collection requirements contained in this proposed rule have been submitted to the Office of Management and Budget for review under the Paperwork Reduction Act of 1980. No person may be subjected to a penalty for failure to comply with these information collection requirements until they have been approved and assigned an OMB control number. The OMB control number, when assigned, will be announced by separate notice in the **Federal Register**. Public reporting burden for the collection of information requirements contained in this rule is estimated to include the time for reviewing the instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Information on the estimated public reporting burden is provided under the preamble heading, Other Matters. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Department of Housing and Urban Development, Rules Docket Clerk, 451 Seventh Street, SW., room 10276, Washington, DC 20410; and to the Office of Management and Budget, Office of Information and Regulatory Affairs, Attention HUD Desk Officer, room 3001, Washington, DC 20503.

Introduction

The National Housing Act requires that applications for HUD/FHA mortgage insurance be accepted only from approved mortgagees. It is essential to the strength and viability of the HUD mortgage insurance programs that approved mortgagees be responsible and adequately capitalized entities. The reforms proposed by this rule are directed toward this goal of ensuring that only responsible and adequately capitalized mortgagees are program participants.

A number of the proposed amendments concern the financial strength of the mortgagee. The Department believes that sound capitalization is a critical requirement for mortgagee approval. The Department's experience has demonstrated that an acceptable level of financial net worth generally assures an acceptable level of financial responsibility. The capital and liquidity levels proposed by this rule were developed after extensive analysis by the Department of the mortgage lending industry and of individual HUD approved mortgagees.

Review of the capital and liquidity requirements of private mortgage insurers, and other participants involved in the mortgage loan business, such as the Federal National Mortgage Association (FNMA) and the Federal Home Loan Mortgage Corporation (FHLMC), indicate that these institutions generally have higher capital requirements than HUD. The capital and liquidity requirements for mortgagees as proposed by this rule are consistent with existing industry standards.

In order to determine the potential impact that the proposed net worth requirements may have on approved mortgagees, the Department analyzed the net worth of a random sample of 311 approved mortgagees which originated a minimum volume of 25 million dollars in loans (approximately 400 loans per mortgagee) during fiscal year (FY) 1989. The sample included 162 nonsupervised mortgagees and 149 supervised mortgagees. The Department also analyzed the current net worth of 200 loan correspondents randomly selected from a universe of 2,261 loan correspondents approved to originate loans in various HUD field offices. Of the nonsupervised mortgagees sampled, 60 percent (130 mortgagees) had a net worth of $500,000 or more. Under the proposed rule, lenders may adjust their net worth during the proposed two year phase-in period for the new net worth requirements or continue to participate as loan correspondents. With respect to supervised mortgagees, the proposed increase in net worth should not have any impact on their ability to maintain HUD approval. The average net worth of these mortgagee is approximately $2 million, far above the requirements of this proposed rule. The sample of loan correspondents disclosed that over 50 percent (102 mortgagees) have a net worth of $40,000 or more. Of these 102 mortgagees, 75 percent have a net worth in excess of $50,000 (76 mortgagees).

From a market share standpoint, the impact also should be minimal, as 93 percent of all HUD insured mortgages currently are processed under the Direct Endorsement program, which requires mortgagees to maintain a net worth of not less than $250,000.

The remaining amendments proposed by this rule are directed toward ensuring responsible performance by approved mortgagees, and strengthening the Department's ability to monitor such performance. The Department believes that the revisions proposed by this rule will raise the quality of performance by mortgagees participating in the HUD mortgage insurance programs, without excluding program participants who have performed well in the past.

The proposed rule also would reorganize and expand the regulations governing the single family Direct Endorsement program. Under the current Direct Endorsement program, approved mortgagees are authorized to underwrite and close mortgages without prior HUD review or approval. Over 90 percent of mortgages insured under the HUD mortgage insurance programs are processed under the Direct Endorsement program. The Department proposes to expand the Direct Endorsement program to virtually all of its single family insurance programs. The existing structure and organization of the Direct Endorsement regulations, as contained in part 200, would become too cumbersome under the proposed expansion of the Direct Endorsement program. Accordingly, the proposed rule would simplify the existing Direct Endorsement regulations by cross-referencing program requirements rather than restating them and by removing redundant language.

Approval Requirements

The Department proposes to revise part 202 to incorporate both (1) the approval requirements for title I lending institutions in a new subpart A; and (2) the approval requirements for single family and multifamily mortgagees in a new subpart B.

The new subpart A, which contains the revised approval requirements for title I lending institutions, is part of a separate proposed rule that was published for public comment on January 29, 1991 (56 FR 3302). The revised title I lender approval regulations and the revised mortgagee approval regulations proposed here are very close in both form and substance. In any final version of each regulation, the Department may make further changes to conform them, including making changes in one regulation which was specifically proposed only in the other regulation. For example, type 2 supervised mortgagees might also be eliminated for title I in the manner proposed here since there is no special aspect of the title I program which makes type 2 supervised mortgagees more appropriate for that program than for other insurance programs. The Department would retain differences specifically based on differences between the title I program and other insurance programs, e.g., the differences in proposed net worth requirements and the different treatment of loan correspondents. Commenters are generally requested to comment on any specific differences between the two proposed regulations which should be retained, due to differences in the program, with an explanation of how the regulations differences are related to program differences.

The proposed new subpart B is based largely on the existing mortgagee approval requirements set forth in §§ 203.1 through 203.8, with several changes. Generally, the changes proposed to these sections would strengthen the approval requirements, reflect current administrative approval practices, and parallel certain requirements and procedures introduced in the title I Reform proposed rule.

The major regulatory changes proposed by this rule include:

(1) An increase in the net worth requirement, which would be applicable to all classes of mortgagees, and which would be phased in over a two year period;

(2) An approval agreement between the Department and the mortgagee that would provide the Department with the authority to limit the participation of mortgagees with excessive default and claim rates;

(3) A requirement that mortgagees be in compliance with State licensing requirements; and

(4) A requirement that mortgagees maintain 20 percent of their net worth in liquid assets.

The following section-by-section analysis discusses the substantive changes that would be made to part 202, by the addition of a new subpart B. As noted above, subpart B largely would consist of the regulations governing mortgagee approval, currently found in part 203 (§§ 203.1-203.8), with modifications made to several of these regulations. These modifications are highlighted in the section-by-section analysis. Those regulations in part 203 that would be transferred to part 202, without substantive change, are not discussed. The chart at the end of the section-by-section analysis lists the existing part 203 section citations, and their proposed redesignated part 202 section numbers.

Section-by-Section Analysis of Part 202

Section 202.10 Definitions

A definition of "mortgage" is proposed to be added. Since the approval requirements for title II insured mortgage programs and loan programs would be combined in subpart B, the definition would clarify that the use of the term "mortgage" applies to both mortgages and loans in the title II insurance programs.

The term "mortgagee" would be defined to include all categories of mortgage lenders eligible to participate in title II programs. Where the regulations apply only to certain categories of approved mortgagees (e.g. loan correspondents or investing mortgagees), the regulations will identify that category instead of using the broad term mortgagee.

Section 202.11 Approval, Recertification, Withdrawal of Approval and Termination of Approval Agreement

Section 202.11(a) would provide for an approval agreement between the Secretary and the mortgagee. The agreement shall set forth the terms governing the mortgagee's continued approval. Section 202.11(a)(5) provides for approval of authorized agents in areas which are otherwise under served by the mortgage market. Section 202.17(d) also provides for use of authorized agents by governmental institutions, Public Housing Agencies and State Housing Agencies. The role of authorized agents in the HUD mortgage insurance programs is addressed in the discussion of proposed new § 202.13(c).

Section 202.11(b) would clarify that there is an annual recertification procedure for approved mortgagees. This section would also state that currently approved mortgagees would enter into the approval agreement required under proposed § 202.11(a) at the time of recertification.

Section 202.11(d) would authorize the Secretary to terminate an approval agreement when the mortgagee has had excessive defaults and claims on insured mortgages originated by the mortgagee. There is currently no mechanism by which the Department may terminate its relationship with an approved mortgagee that has demonstrated unsatisfactory performance and, consequently, poses an unacceptable risk to the insurance funds, other than through formal administrative action by the Mortgagee

VOL 56 ISS 122 JE 25 1991 UMI

Review Board. The Mortgagee Review Board's primary function, however, is to sanction lenders found to have committed serious violations of program requirements, or to have engaged in fraudulent activity with respect to the mortgage programs. Where the Mortgagee Review Board withdraws a mortgagee's approval the mortgagee cannot reapply for at least one year. The proposed rule would establish a relationship between a mortgagee and the Department which is terminable on the basis of failure to meet a single performance standard measured in terms of the rate of defaults and claims, regardless of whether any specific program requirements were violated.

The proposed rule would provide that each quarter the Department will review mortgages originated in the Federal fiscal year by each mortgagee. A mortgagee whose annual claim and default rate for the area served by a HUD field office is 200 percent of the HUD office average rate for the same year ("normal rate") will have its approval agreement terminated upon 30 days notice (provided that the mortgagee's claim/default rate is above the national average).

In determining the rate of defaults and claims which would constitute an unacceptable risk to the Department, HUD compiled the individual claim and default rates of all approved mortgagees in each HUD field office and analyzed this data in conjunction with mortgage insurance premium collections and foreclosure costs. Based on these and other operating expenses of HUD, it was determined that mortgagees which have twice the default and claim rate of the field office normal rate have demonstrated unsatisfactory performance and pose an unacceptable risk to the insurance funds. However, the Department recognizes that a mortgagee which lends in under served areas may experience unusually high default rates. For this reason, before termination the Department also will take into account census tract data to assure the availability of mortgage credit in under served areas. The Department does not intend to penalize mortgagees for satisfying its obligations under the Home Mortgage Disclosure Act and the Community Reinvestment Act. Mortgagees which have received a termination notice may request an informal conference with the Deputy Assistant Secretary for Single Family Housing or his or her designee before the termination is instituted. The Department will take into consideration all relevant factors and reasons for the excessive default rates before the termination is made final. The proposed rule grants mortgagees the right to apply for a new approval agreement after termination. The Department will consider all relevant factors, including statements and documents provided by the mortgagee, in determining whether the causes for termination have been remedied. If a mortgagee's approval agreement is terminated it may continue to service mortgages in its own portfolio. If the approval agreement of an approved servicer is terminated, the servicer will be required to transfer its servicing obligations to another HUD approved mortgagee-servicer within 60 days of receipt of the termination notice and will not be permitted to continue involvement in the servicing of insured mortgages.

A mortgagee whose claim and default rate is between 150 percent and 200 percent of the HUD office average will be placed on a "credit watch" provided that the Department's review of the census tract data warrants such action. All mortgages originated during the six month period following the credit watch notice (the tracking period) will be reviewed one year after the end of the tracking period. A mortgagee on credit watch may have its approval agreement terminated upon 30 days notice if the claim and default rate on mortgages originated by the mortgagee, during the tracking period is above 150 percent of the HUD office average. If a mortgagee's claim and default rate for the tracking period drops below the 150 percent level, the credit watch will end. A mortgagee which has received notice that its approval agreement is to be terminated subsequent to the credit watch may also request an informal conference as discussed above.

The Department will make available to all approved mortgagees, on a quarterly basis, data showing their respective claim and default rates in comparison to HUD office and national rates. This will enable each mortgagee to evaluate its performance and take appropriate corrective action where warranted. In addition, the data will provide mortgagees with a means to detect potential problems with their origination practices.

The approval agreement, permitting termination based on performance, would be established between the mortgagee (including all of its HUD-approved branch offices) and the Department. In reviewing a mortgagee's performance, the Department will analyze the mortgagee's overall claim and default rate, as well as that of each of its branch offices. Where a branch office exceeds the claim and default threshold, branch approval may be terminated or the branch office may be subject to a credit watch.

Section 202.12 General Requirements

Section 202.12(a) would remove trusts from the type of businesses that may be approved as mortgagee participants in the HUD mortgage insurance programs, and would add additional types of partnerships. The difficulty of separating the roles of the mortgagee, as holder of its own mortgages, from that of a trustee for mortgage trust assets, greatly complicates the mortgagee approval process and the supervision required for trusts, as compared to corporations or partnerships. The Department expects no disadvantage to mortgagees or the public from the exclusion of trusts as approved mortgagees, for two reasons. First, proposed § 202.12(d) is equivalent to existing § 203.3(e), which permits supervised mortgagees to hold insured mortgages in a fiduciary capacity. Insured mortgages may still be trust assets under this arrangement. Second, since trusts were added as eligible mortgagees in 1960, very few trusts have applied for mortgagee approval. No trust has applied for mortgagee approval in the last seven years. Trusts which currently are approved mortgagees would be allowed to continue its mortgagee approval as a trust, but new applicants would be required to qualify under the revised rule. Excluding trusts as approved lenders participants also was proposed in the title I Reform proposed rule. The Department specifically solicits comments on the proposal to not approve trusts.

The Department proposes to include all general and limited partnerships in the list of eligible mortgagees. The Department's long-established standards governing mortgagee approval require that a mortgagee be a chartered institution, or a permanent organization having succession. On July 30, 1980 (45 FR 50560), the regulations at § 203.2(a) were expanded to permit certain limited partnerships to be approved mortgagees, provided that the partnership agreement contained certain provisions to assure that it was a permanent organization having succession. Since including limited partnerships as eligible approved mortgagees, the Department has considered the approval requests of other limited partnerships and general partnerships, on a case-by-case basis. In doing so, the Department has applied criteria similar to those currently in the regulations to ascertain whether the partnership is a permanent organization having succession. In order to facilitate processing approval requests from

partnerships, the Department proposes to codify the criteria for the approval of partnerships as mortgagee program participants.

The proposed rule would provide that all general partners of a partnership must be corporations. Additionally, partnerships must have one managing general partner, which has as its principal activity the management of the partnership, and which deals directly with the Department in regard to the partnership's insured mortgages. If the managing general partner withdraws or is removed from the partnership, HUD must be immediately notified of the new managing general partner.

The partnership agreement must provide for the partnership to continue if any partner withdraws. The partnership agreement also shall provide for the partnership to exist for a term of years, which indicates that the partnership is a permanent organization. The majority of partnership agreements that have been reviewed by the Department indicate that it is typical in the market place to have a partnership term of 15 to 30 years. The Department proposes to issue handbook guidelines stating that a term under 5 years would not be satisfactory, because it indicates that the partnership is being organized for an isolated project rather than for a permanent business. The Department has found that partnerships organized for a single purpose tend not to have long term financial stability, and pose a threat to the security of the insurance funds. The inclusion of partnerships as eligible lenders is also under consideration in the title I Reform proposed rule. If the partnership provision in this proposed § 202.12(a) is adopted, it also may be adopted in the context of title I lender approval.

Section 202.12(d) would incorporate as a general requirement for all mortgagees the current escrow requirements for non-supervised mortgagees at § 200.(4)(b)(3). The proposed rule would require that mortgagees segregate escrow funds, including mortgage insurance premiums owed to the Department, in a federally insured account.

Section 202.12(h) would add three reporting requirements to the reporting requirement in existing § 203.3(b). First, the proposed rule would establish the requirement that a mortgagee, at the time it applies for approval and annually thereafter, the mortgagee must submit evidence of compliance with any State licensing requirements. The mortgagee would be required to (1) submit a copy of the license with its application for approval (or certify that there are no licensing requirements), and (2) certify in its annual approval verification that it is in compliance with all State licensing requirements. This certification requirement will provide for additional monitoring of approved mortgagees, without increased cost to the Department and minimal cost to mortgagees.

Second, no requirement currently is imposed on mortgagees to report on their financial condition, other than the submission of an annual audited financial statement. The proposed rule would require each approved mortgagee to file a quarterly financial statement with the Department for each quarter in which it experiences an operating loss of 20 percent or more of its net worth in one quarter of a fiscal year. This reporting requirement will provide an early warning system for detecting financially troubled mortgagees, and will allow the Department to take appropriate action to protect its interests. The Department will review the quarterly reports to ensure that the mortgagee continues to meet the Department's net worth requirements. The quarterly reports will no longer be required when the mortgagee demonstrates an operating profit for two consecutive quarters or until the next recertification, which ever is longer.

Third, the proposed rule would require that within 30 days of the commencement of bankruptcy or similar proceedings the mortgagee must demonstrate to the Department that it is still in compliance with the net worth requirements. This reporting requirement will assure the Department that mortgagees continue to maintain the appropriate net worth at all times, as required by the regulations.

Section 202.12(m) would expand the permitted use of branch offices, for the submission of applications for mortgage insurance, to all classes of approved mortgagees. This proposed expansion is based on the Department's positive experience with the branch offices in the HUD mortgage insurance programs, and on an absence of reasons to prohibit mortgagees from using branch offices in this capacity.

Section 202.12(n) would increase the current net worth requirements. Net worth would continue to be comprised of the assets acceptable under the Generally Accepted Accounting Practices (GAAP), excepting those assets listed in Handbook 4060.1, appendix 2. The existing regulation requires: (1) A net worth of $100,000 for nonsupervised mortgagees and for supervised mortgagees covered by § 203.3(b)(2); and (2) a net worth of $25,000 for loan correspondents. Nonsupervised mortgagees that participate in the Direct Endorsement program are required to have a net worth of $250,000.

The proposed rule first would expand the net worth requirement to all supervised mortgagees. The proposed rule also would establish net worth requirements based on the volume of loans originated or the outstanding balance of loans serviced by approved mortgagees, except loan correspondents and sponsors. Mortgagees with $25 million or less in annual insured mortgage originations or servicing portfolios would be required to have a net worth of $250,000. Mortgagees with $50 million or less in annual insured mortgage originations or servicing portfolios would be required to have a net worth of $500,000. Mortgagees with more than $50 million, but less than $100 million in annual insured mortgage originations or servicing portfolios, would be required to have a net worth of $750,000. Mortgagees that originate or service more than $100 million in insured mortgages would need a net worth of $2,000,000.

Loan correspondents would be required to have a net worth of $50,000, with additional net worth required for each branch office. All mortgagees who act as sponsors for loan correspondents, or who both originate and service insured mortgages, would be required to have a net worth of $1,000,000.

Section 202.12(o) would provide a two year phase-in period for all currently approved mortgagees, except loan correspondents, to meet the new net worth requirements. Loan correspondents would be required to meet the new net worth requirements by the effective date of the rule. Newly approved mortgagees would be required to have a net worth of $250,000 for the first year of approval. Thereafter, the net worth requirement would be based on the mortgagee's actual volume of originations or servicing. If the proposed net worth requirements were in place during fiscal year 1990, almost 50 percent of the loan origination activity would have been from mortgagees with a net worth above $750,000. The Department believes that the proposed net worth requirements will encourage financial responsibility and commitment, enhance mortgagees' independent quality control programs, and conform to standards set by other agencies and entities involved in the mortgage loan business, and by the marketplace. Any mortgagee unable to meet the higher net worth requirements may choose to seek approval under the loan correspondent provisions.

VOL 56 ISS 122 JE 25 1991 UMI

Section 202.12(q) would establish a liquidity requirement for approved mortgagees. There is currently no requirement for approved mortgagees to maintain liquid assets. Liquid assets would be comprised of cash in banks and on hand, and other cash assets not set aside for specific purposes other than the payment of a current liability or a readily marketable investment. The lack of liquidity has resulted in cases of misuse of trust funds by mortgagees, such as mortgage insurance premiums, for operating purposes. The proposed rule would establish the requirement that approved mortgagees maintain, at all times, liquid assets (cash or its equivalent) of 20 percent of their net worth up to a maximum amount of $100,000.

Section 202.12(r) would establish the requirement that all mortgagees maintain a fidelity bond. The Department will require fidelity bonds with a base coverage of $300,000 covering the mortgagee's employees and agents. Such coverage would provide a source of indemnification to the Department and to borrowers for errors and omissions committed by the mortgagee's employees or agents. The fidelity bond also would provide mortgagees with a backstop for various claims that are typically covered by such bonds. The requirement that approved mortgagees have a fidelity bond in effect at all times is consistent with the requirements of other agencies and entities involved in the mortgage business, including FNMA, GNMA and FHLMC. Since most approved mortgagees also are participants in the FNMA, GNMA or FHLMC programs, this market driven requirement will not affect most approved lenders as they already have bond coverage.

Section 202.13 Supervised Mortgagees

Section 202.13(a) would delete "type 2" supervised mortgagees, provided for in existing § 203.3(b)(2), as a category of approved mortgagee. Under § 203.3(b)(2), a type 2 mortgagee is typically a subsidiary or affiliate of a bank or savings and loan association which is subject to periodic examinations by a Federal or state agency. The experience of the Department is that the periodic examinations of these mortgagees conducted by other agencies do not provide adequate assurance that mortgagees are performing according to HUD financial and program standards. This proposed change will permit the Department to fulfill its statutory obligation to protect the insurance funds by monitoring the financial condition of these mortgagees which are extending the credit of the Federal government.

There currently are approximately 1,700 approved type 2 mortgagees. The mortgagees in this category would be converted to approved nonsupervised mortgagees, under proposed § 202.14. The major difference in the requirements between a nonsupervised mortgagee and a type 2 supervised mortgagee is that a nonsupervised mortgagee must submit an annual audited financial statement to the Department. Since all type 2 mortgagees are ongoing business entities, these mortgagees currently prepare financial statements. The Department does not expect that compliance with this requirement will impose an undue burden on mortgagees.

Section 202.13(c) is based on existing § 203.3(b), except that the net worth requirement of § 203.3(b)(2)(ii) would be deleted. The net worth requirements in proposed new § 202.12(n) would apply to all mortgagees. Similarly, the net worth requirements for branch offices at § 203.3(c) would be republished at proposed new § 202.12(m), and made applicable to all mortgagees.

Supervised mortgagees are permitted by existing § 203.2(d) to designate authorized agents for the purpose of submitting mortgage applications to the Department. Due to the difficulty in supervising authorized agents, the Department proposes to limit the applicability of authorized agents without prior approval to governmental agencies, as defined in proposed new § 202.17. The Department recognizes that mortgagees may need to use authorized agents to meet the lending demand in rural areas and inner cities. Proposed § 202.11(a)(5), discussed above, would permit the use of authorized agents to reach underserved areas upon approval by the Secretary.

Section 202.14 Nonsupervised Mortgagees

Section 202.14(c) would incorporate the requirements for nonsupervised mortgagees, currently set forth in existing § 203.4(b), with two changes. First, the net worth requirements of § 203.4(b)(1) would be transferred to proposed new § 202.12(n), as discussed above. Second, the current warehouse line of credit requirement at existing § 203.4(b)(2) would be increased to $3 million, and transferred to proposed new § 202.14(c)(1). The Department requests comments on the proposed change to the warehouse line of credit requirement.

The present $250,000 warehouse line of credit requirement is inadequate to assure that mortgagees have sufficient sources of credit to fund their loan production. This has caused misuse of mortgage insurance premiums and escrow accounts for the purpose of funding mortgages. Based on an average single family mortgage amount of approximately $65,000, the requirement to maintain a $3 million warehouse line of credit will provide for the funding and closing of two to three months of production for most mortgagees. The proposed warehouse line of credit would ensure that nonsupervised mortgagees have the ability to fund loans.

Under § 202.15(c)(3), which is discussed below, loan correspondents would not be required to maintain a separate warehouse line of credit, but they would be required to have an acceptable funding program with their sponsor.

Currently, existing § 203.4(c) exempts mortgagees that originate 100 or fewer insured single family mortgages from filing compliance test reports under § 203.4(b)(4)(ii). In order for the Department to maintain better quality control and conduct better monitoring of mortgagees, this section would be removed.

Section 202.15 Loan Correspondents.

Section 202.15(a) would define the terms "loan correspondent" and "sponsor" without substantive change from the use of those terms at § 203.5 of the current regulations.

Section 202.15(c) would be based on the eligibility requirements for loan correspondents, currently found at existing § 203.5(b), with two substantive changes. First, § 202.15(c)(6) would expressly state that sponsors and loan correspondents have a principal-agent relationship. The Department proposes to hold the mortgagees to the general agency standards imposed under State law. The general rule of agency law is that the principal (i.e., the sponsor) is liable for the acts of the agent (i.e., the loan correspondent) committed within the reasonable scope of the agent's authority. The principal generally is jointly and severally liable with the agent for deficiencies in the agent's performance. Application of the general rule of agency to approved mortgagees would mean that both the sponsor and the loan correspondent would be liable to indemnify the Department for claim losses on mortgages originated by the loan correspondent. The Department believes that this amendment to the mortgagee approval regulations would (1) increase the responsibilities of the sponsor for the quality of insured mortgages originated by the loan correspondent; and (2) result in greater industry self-regulation and greater quality control in the origination of insured mortgages. In addition, sponsors will be more selective about the loan correspondents from whom they purchase insured mortgages. Second, as discussed in this preamble under § 202.14(c), the warehouse line of credit requirement would be increased to $3 million, unless a sponsor agrees to fund mortgages originated by the loan correspondent.

Section 202.16 Investing Mortgagees

Section 202.16 would incorporate the existing requirements for investing mortgagees, currently found at § 203.6, except that new § 202.16 would remove trust funds from the definition of investing mortgagees in order to parallel the changes at proposed § 202.12(a). [The reasons for excluding trusts as eligible mortgagees is addressed in this preamble under the discussion of § 202.12(a).]

Section 202.17 Governmental Institutions

No substantive changes are proposed to existing § 203.7, which addresses governmental institutions as approved mortgagees. Section 203.7 would be redesignated as § 202.17, with minor conforming changes. Sections 203.7 (b) and (c) would be combined, because the coinsurance program provided in § 203.7(c) has been discontinued.

Section 202.18 Approval for Servicing

There is currently no HUD requirement that a mortgagee use an approved mortgagee to service insured mortgages. The proposed rule would add new §§ 202.18 and 207.253, and amend § 203.502, to establish the requirement that only approved mortgagees may service insured single family and multifamily mortgages. The Department would require that subservicers be approved mortgagees. The requirement would increase the quality of insured mortgage servicing, because only approved mortgagees that demonstrate servicing capability would be authorized to service insured mortgages.

This proposed requirement also would bring HUD approval standards into conformity with market practices. Currently, GNMA and FHLMC require that servicers of pooled mortgages must be HUD approved mortgagees. Consequently, most servicers of insured mortgages are already approved mortgagees. These servicers would merely have to inform the Department that they service insured mortgages and that they are approved mortgagees. Servicers which are not approved mortgagees would have to meet the approval requirements of proposed part 202 and apply for approval. The Department recognizes that most mortgagees are obligated under servicing contracts, and therefore proposes to make this provision effective one year after the effective date of the final rule.

The new § 207.253 will clarify that a mortgagee may contract for servicing for fully insured multifamily mortgages under the same conditions applicable to single family mortgages. Although all multifamily mortgagees are subject to the current § 203.2(i) which references the single family servicing rules, this reference was ambiguous since some of these rules are clearly inapplicable for multifamily mortgages. The new section is intended to eliminate the ambiguity. For existing multifamily coinsured mortgages, the servicing provisions in the applicable coinsured regulations remain in effect.

Section 202.19 Report Requirements

Existing § 203.8, which sets forth reporting requirements, would be redesignated as § 202.19, with minor amendments to incorporate technical and conforming changes.

Mortgagee Approval Citations Chart

The following chart lists (1) the current mortgagee approval regulations of part 203, and (2) the corresponding redesignated citation at proposed new subpart B of part 202. The chart indicates whether the proposed new regulations would revise substantially the Department's requirements and policy as codified in the current regulations.

Current	Proposed	Substantial revision
None	202.10	No.
203.1(a)(1)	202.11(a)(1)	Yes.
203.1(a)(2)	202.11(a), (2) and (4).	Yes.

203.7	202.17	No.
None	202.18	Yes.
203.8	202.19	No.

Administrative Sanctions

Limited Denial of Participation

The existing regulations at § 24.700 authorize a HUD office to issue a limited denial of participation (LDP) against employees, officers, directors or principals of a mortgagee, as well as builders, brokers and real estate agents who participate in HUD's programs, and who fail to comply with the Department's requirements or who engage in fraudulent conduct. An LDP action may not be taken against an FHA-approved mortgagee. Section 24.710(a)(3) provides that an LDP is a local action limited to the jurisdiction of a particular HUD office, and to the program under which the violations occurred. The Department has found that in some instances there has been a lack of consistency and timeliness in the manner in which LDP actions are initiated by the various HUD offices.

The proposed amendments to §§ 24.700 and 24.710(a)(3) would provide the Deputy Assistant Secretary for Single Family Housing with the authority, concurrent to that of the HUD offices, to impose LDP actions within one geographic area or nationwide. The proposal for both centralized and local LDP authority will improve the Department's organizational efficiency. Such action would be taken in accordance with existing requirements governing LDP's.

VOL 56 ISS 122 JE 25 1991 UMI

Mortgagee Review Board

The grounds for administrative action at § 25.9 would be expanded to include violation of the liquidity and warehouse line of credit requirements set forth in proposed new §§ 202.12(q), 202.14(c)(1), 202.1o(c)(3), and 202.16(b)(2).

Direct Endorsement Program—Expansion of Program and Reorganization of Regulations

The regulations at § 200.163 and § 200.164 establish the requirements for the Direct Endorsement program, and the criteria for approval of Direct Endorsement mortgagees, respectively. In connection with the changes proposed in the Direct Endorsement program, the Department proposes to reorganize, edit and move the Direct Endorsement regulations to part 203. A section-by-section analysis of the substantive changes made to the Direct Endorsement regulations follows. Sections which have been renumbered or which contain only technical or clarifying changes are listed in the chart at the end of the section-by-section analysis.

Section-by-Section Analysis of Part 203

Section 203.1 Underwriting Procedures

The Department proposes to expand the Direct Endorsement Program to virtually all single family programs, and to require mortgagees to process and underwrite mortgages under the Direct Endorsement Program in all cases permitted by the Department. Since loan correspondents do not have Direct Endorsement authority, they would be required to process mortgages through a Direct Endorsement sponsor. This regulatory change would limit the availability of the current procedures which permit mortgagees to submit mortgages for processing to HUD offices.

The Department expects the proposal to improve the overall quality of insured mortgages, and to reduce the risk of loss to the HUD mortgage insurance funds. The Department's analysis of insured mortgages indicates that mortgages not processed under the Direct Endorsement program have a claim and default rate which is significantly higher than that of Direct Endorsement mortgages. This proposed change is not expected to have a significant impact on mortgagees or mortgagors, because less than 8 percent of all endorsed mortgages are processed by the HUD offices annually. This proposal would enhance the ability of HUD offices to perform reviews of Direct Endorsement mortgagees, rather than underwriting individual mortgages. The Department specifically requests public comments on the proposal to expand Direct Endorsement.

Section 203.3 Approval of Mortgagees for Direct Endorsement

Section 203.3 would republish the regulations governing approval of Direct Endorsement mortgagees, currently contained in § 200.164, in a simplified form, and with two substantive changes.

First, § 203.3(c) would provide that Direct Endorsement underwriters would be approved by the HUD Central Office on a nationwide basis. The proposed rule would still permit a HUD local office to approve underwriters which operate in that jurisdiction. The underwriter's national approval would only be terminated by HUD Central Office. Each HUD office could terminate an underwriter's approval in that particular field office's jurisdiction when it is determined by the HUD office that such termination is appropriate. The authority of the HUD office is in addition to the sanctions that the Department may currently impose against underwriters pursuant to 24 CFR part 24.

This proposal would allow the HUD office to continue to monitor underwriters, based on direct assessment of the underwriter's performance. Additionally, this proposal would give mortgagees significant ability to operate in more than one locale, and should make it more practical for mortgagees to participate in the HUD mortgage insurance programs. Previously, mortgagees were subjected to an underwriter approval system, which was often unnecessarily complicated and cumbersome.

Second, the proposed rule would authorize the HUD Central Office to terminate Direct Endorsement approval granted on a nationwide basis. The proposed rule would continue to permit a local HUD office to terminate a mortgagee's Direct Endorsement approval within the office's jurisdiction. As under current policy, a termination decision by the local HUD office would apply only to the mortgagee's office that was found to be in violation of the Department's requirements. The addition of HUD Central Office termination authority would provide consistency and timeliness in taking termination actions nationwide. Termination actions by the HUD Central Office will be taken in accordance with existing regulations and handbook requirements governing the Direct Endorsement program. The local HUD offices will continue to impose lesser sanctions on Direct Endorsement mortgagees (i.e., probation, and placing a mortgagee in pre-approval status).

This rule would continue the current approval system whereby general mortgagee approval is distinct from Direct Endorsement approval. The termination of a mortgagee's Direct Endorsement approval only would limit the mortgagee's approval to underwrite insured mortgages and would not affect its basic mortgagee approval agreement with the Department. A mortgagee which has had its Direct Endorsement approval terminated may continue to close insured mortgages by entering into a loan correspondent relationship with an approved mortgagee who will underwrite the mortgages as a sponsor. The Department would permit such a mortgagee to continue to hold and service loans in its portfolio at the time its Direct Endorsement approval was terminated. If a branch office loses its Direct Endorsement approval, it may submit loans to another branch, regional or central office of the mortgagee for Direct Endorsement processing. In contrast, the concept of an approval agreement, as discussed in earlier in this preamble, provides the Department with a mechanism to terminate its relationship with a mortgagee demonstrating unsatisfactory performance, as reflected in its claim and default rate for FHA insured mortgages. Termination of a mortgagee's approval agreement or termination of approval of a mortgagee's branch office that has failed to meet acceptable performance standards, precludes the mortgagee or its branches from originating any insured mortgages.

Section 203.5 Direct Endorsement Process

Section 203.5 would incorporate the regulations governing the Direct Endorsement process, currently set forth in § 200.163 (a) and (b)(1–4), in a simplified form. The programs which would become eligible for Direct Endorsement processing are § 203.43c, §§ 203.43g–203.43i, § 203.44, part 206, subpart C of part 213, § 221.65, part 226, subpart C of part 227, Subpart A of part 233, § 234.70 and part 237 and section 235(r) of the National Housing Act.

Section 202(e) of the National Housing Act, requiring mortgagees to use a licensed or certified appraiser, and section 322 of the Cranston-Gonzalez National Affordable Housing Act of 1990, pertaining to mortgagee selected appraisers, has not been incorporated into this rulemaking. Due to the comprehensive nature of this proposed rule and the broad implications of the change in the appraiser requirements, the Department is initiating a separate rulemaking procedure to address the

issue of HUD approved and mortgagee selected appraisers. Because of the pending rulemaking, this proposed rule does not reproduce the current language on appraisers in the Direct Endorsement regulation.

Section 203.7 Commitment Process

Section 203.7 retains the current explanation of the mortgage commitment process at existing § 200.13(a), for those insurance programs for which Direct Endorsement would not be applicable under the proposed rule.

Section 203.255 Insurance of Mortgage

Section 203.255 would be revised to reflect that the majority of single family insurance programs would be limited to Direct Endorsement processing. Section 203.255(a) would continue to provide for the issuance of a Mortgage Insurance Certificate for those mortgages not eligible to be originated under Direct Endorsement.

Section 203.255(b) is based largely on the current Direct Endorsement processing rules at § 200.163(b)(5) and (c). Section § 203.255(b) would delete the current list of specific mortgagee certifications at § 200.163(b)(5)(xi) (A)–(I), and the specific underwriter certifications at § 200.163(c) (1)–(11). The requirement that mortgagees and underwriters certify that the loan complies with specific program requirements would be retained. However, specific program regulations subject to certification would be listed in the Direct Endorsement Handbook, and not in the regulation. The expansion of Direct Endorsement processing would make it extremely cumbersome to include all regulatory requirements for all insurance programs in the test of the regulations. The proposed handbook certifications would not introduce new requirements, but only would cover requirements which either are currently in regulations, or in mortgagee letters and handbooks, which have been distributed to all approved mortgagees.

The current Direct Endorsement regulation merely lists the program regulations to which the mortgagee must certify compliance, while the current handbook attempts to set out the certification in a textual form. However, the items in the handbook do not correspond exactly with the list of certifications required by the rule. The duplicate coverage of specific certification items in the regulations and the handbook would be eliminated, and the Department would have greater flexibility to update certifications in a clear manner, while still ensuring that all affected mortgagees had knowledge of required certifications.

As a conforming change, the Department proposes to delete § 200.163(f). Since all mortgages, except those mortgage programs expressly excluded, would be processed under Direct Endorsement there would be no need for regulatory procedures to expand the mortgage types eligible for Direct Endorsement. Additionally, all Direct Endorsement certifications would be published in the handbook and distributed to all mortgagees. Accordingly, a **Federal Register** notice of supplementary certifications would be duplicative. The list of required documents, other than certifications, would be retained in the rule, but § 203.255(b)(10) would differ from the current § 200.163(b)(5)(xi)(10), since the current provision does not clearly state program requirements. The proposed rule would also require the mortgagee to submit "such other documents as the secretary may require" to acknowledge the full list of documents required in the current Direct Endorsement handbook and to provide room for future development of the Direct Endorsement program.

Section 203.255(b)(9) would include conforming changes. The current reference to proposed construction, at § 200.163(b)(5)(ix) regarding health authority approval letters for individual water or sewer systems, is not consistent with Departmental policy. Handbook 4905.1 requires water and sewer approval letters also for existing construction. Therefore, the reference to proposed construction is proposed to be deleted. This section would also include a cross reference to the water supply construction requirements at § 200.926d(f).

Section 203.255(c) is based largely on the current Direct Endorsement processing rules at § 200.163(d). Section 203.255(c) would eliminate the reference to interest rates, which is unnecessary due to the 1983 deregulation of interest rates for insured mortgages. This section also would expand upon existing § 200.163(d) by making explicit two items of pre–endorsement review, which only are implied in the current regulations.

First, HUD would need to determine before endorsement that required up-front mortgage insurance premium (MIP), as well as any late charge and interest, has been paid. HUD procedures throughout the life of the Direct Endorsement program have prohibited HUD offices from endorsing mortgages with unpaid up-front MIP. Payment is a "condition of endorsement" under § 203.280. This change would merely conform the Direct Endorsement regulations to existing procedures.

Second, HUD would review the documents for information indicating incomplete, false, or misleading documents, or fraud or misrepresentation on the part of any party, or other reasons the mortgage is ineligible for insurance. The Direct Endorsement program is designed to provide assurance of endorsement for mortgages which meet all program requirements. On the other hand, HUD has never delegated to Direct Endorsement mortgagees the power to endorse mortgages. Accordingly, HUD's ultimate responsibility to determine whether or not to endorse a mortgage must be based on all available information concerning compliance with program requirements. If HUD is aware of noncompliance with program requirements, it has no power to endorse a mortgage for insurance. This proposed change would expressly add to the regulations HUD's interpretation of its current regulations as stated in Mortgagee Letter 88–35.

Section 203.255(d) also is based on Mortgagee Letter 88–35. This section would clarify that an assignee of the originating mortgagee may submit a mortgage in the name of the originating mortgagee for pre-endorsement review, and may pay the up-front MIP.

Direct Endorsement Citation Chart

The following chart lists the (1) current Direct Endorsement regulations and other regulations concerning mortgage insurance application processing, and (2) the corresponding proposed citation of the new proposed regulation. The chart indicates whether the proposed regulation would revise substantially the corresponding current regulation. Related changes would be made in parts 213 and 234.

Current	Proposed	Substantial revision
203.10	203.7	Yes.
203.11	203.7	Yes.
203.13(a)	203.7	No.
203.13(b)	203.5(a)	No.
203.255(a)	203.255(a)	No.
203.255(b)	203.255(b)	Yes.
200.163(a)(1) & (2).	203.5(a) & (b)	Yes.
200.163(a)(3)	203.255(b)(5) & (11).	No.
200.163(b)(1)	203.5(c)	No.
200.163(b)(3)	none; separate rule will be done.	No.
200.163(b)(4)	203.5(d)	No.
200.163(b)(5)	203.255(b)	No.
200.163(b)(5)(i)–(x).	203.255(b)(1)–(11).	No.

VOL 56 ISS 122 JE 25 1991 UMI

Current	Proposed	Substantive revision
200.163(b)(5)(d)(A)–(f).	None	No.
200.163(c)	203.255(c)(2)	No.
200.163(c)(1)–(11).	None	No.

200.164(h)	203.3(d)	No.
200.164(i)	203.3(b)(5)	No.
200.164a	203.248	No.

Conforming Changes

The following regulations would be amended to conform with the Department's proposal to expand the Direct Endorsement program.

Section 203.14 Builders Warranty

The current reference to commitments in the first line of § 203.14 is proposed to be deleted because this rule would make Direct Endorsement the primary insurance processing program thereby eliminating the use of commitments in virtually all programs.

Section 203.17 Mortgage Provisions

Section 203.17(d) would be revised to delete reference to mortgages with 35 year terms. Currently, the Department does not endorse mortgages which have a 35-year term under the Direct Endorsement program. Since this rule would expand the Direct Endorsement program, section 203(b) single family mortgages would be required to have a term of no longer than 30 years. Additionally, there has been little use of this regulatory provision for non-Direct Endorsement cases, because generally only mortgages with 30-year terms are eligible for purchase on the secondary market. If this proposed change is adopted in the final rule, changes would be made to any other single family program regulations which permit mortgage terms in excess of 30 years (ie. §§ 213.510(a), 221.30, 227.545, 234.25(c)(2)).

Section 203.27 Charges, Fees or Discounts

Section 203.27 would clarify that the Department would continue its post-endorsement review of fees under § 203.255 for all mortgages directly endorsed.

References to Mortgagee Approval Regulations

As a result of the proposed relocation of the mortgagee approval regulations, numerous cross-references in other program regulations would be inaccurate or obsolete. If a final rule is published with the mortgagee approval regulations relocated in part 202 as contemplated by this proposed rule, the final rule also would modify or delete the following sections of title 24: §§ 25.9 (h) and (u), 204.2(a), 204.5, 204.400, 208.9, 208.125(g)(3), 208.125(d)(2)(i), 207.22, 213.30, 213.532, 220.565, 221.528, 221.800, 227.1(a), 227.501(a), 234.5, 241.40, 241.1040, 242.35, and 244.25.

References to Direct Endorsement Regulations

The proposed reorganization of, and revisions to the Direct Endorsement eligibility and processing requirements at §§ 200.163 and 200.164 would result in numerous cross-references in other regulations being inaccurate or obsolete. If a final rule is published with the Direct Endorsement regulations in part 203, the final rule also would modify or delete the following sections of title 24: §§ 200.141(b), 200.145(b), 200.146(a), 200.147, 200.148(a)(2), 200.150(b), 200.152(b), 200.610, 200.928(a)(2)(iv), 203.13(b), 203.27(a)(3)(v), 203.51, 203.255(b), 203.389 (a) and (b), 204.1, 204.3(b), 221.770, 233.5(a)(6), 234.12(b), 237.5.

Handbook Changes

Management Experience

The proposed rule at § 202.12(b) would republish the current regulation at § 203.2(b) which requires approved mortgagees to employ trained personnel, competent to perform their assigned responsibilities. The policy implementing this provision currently requires that a senior corporate officer of the mortgagee have a minimum of one year of acceptable experience in the mortgage business. Too often this has proven to be inadequate to provide the Department with assurance of prudent lending practices by the mortgagee, or to lessen the risk to the Department's insurance funds. If the proposed rule is adopted, HUD would amend its mortgagee approval handbook to require that a senior corporate officer, with authority over loan production or servicing, have three years experience in the mortgage business or the functional equivalent experience or training. The Department requests public comments on the types of experience which it should consider as equivalent to three years of mortgage lending. The new requirement would increase significantly the level of management experience and would, therefore, increase the lender's ability to originate quality insured mortgages, and ensure sound loan servicing practices. Additionally, proposed § 203.3(b)(1) retains the current requirement of five years experience for mortgagees which seek Direct Endorsement approval due to increased responsibilities associated with that program.

Increased Application and Recertification Fees

Under the existing regulation and proposed new § 202.12(k), the Department may set application and annual fees. Currently mortgagees are required to pay a $300 application fee for mortgagee approval, and a $100 fee for each branch office. In addition, mortgagees pay an annual recertification fee of $200 and $100 for each branch office. The Department proposes to establish a $1,000 application fee and $300 branch application fee. In addition, the annual recertification fee would be raised to $500 for the mortgagee, and $200 for each branch office. The Department has not increased these fees since 1983, while the operating costs of processing mortgagee applications and supervising mortgagees has increased. The proposed application fee also will be consistent with the fees charged by FNMA and FHLMC for approving mortgagees to participate in their programs.

Other Matters

Impact on the Economy

This rule does not constitute a "major rule" as that term is defined in section 1(b) of the Executive Order on Federal Regulation issued by the President on February 17, 1981. Analysis of the rule indicates that it does not (1) have an annual effect on the economy of $100 million or more; (2) cause a major increase in costs or prices for consumers, individuals, industries, Federal, State or local government, or geographic regions; or (3) have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Impact on Small Entities

In accordance with 5 U.S.C. 605(b) (the Regulatory Flexibility Act), the undersigned hereby certifies that this rule does not have a significant economic impact on a substantial number of small entities. The eligibility and performance requirements proposed by this rule are consistent with requirements already established by other government agencies for lender eligibility. Accordingly, the economic impact of this rule would be minimal, and it is expected to affect small and large entities equally.

Environmental Impact.

A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD regulations in 24 CFR part 50 that implement section 102(2)(C) of the National Environmental Policy Act of 1969. (42 U.S.C. 4332) The Finding of No Significant Impact is available for public inspection and copying Monday through Friday, 7:30 a.m. until 6 p.m. in the office of the Rules Docket Clerk, Office of General Counsel, Room 10276, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410.

Regulatory Agenda.

This rule was listed as sequence number 1223 in the Department's Semiannual Agenda of Regulations published on April 22, 1991 (56 FR 17630, 17371), under Executive Order 12291 and the Regulatory Flexibility Act.

Executive Order 12612, Federalism

The General Counsel, as the Designated Official under section 6(a) of Executive Order 12612, Federalism, has determined that the policies contained in this rule do not have federalism implications and, thus, are not subject to review under the Order. This rule is limited to imposing additional eligibility and performance requirements on private lenders. No programmatic or policy changes result from its promulgation which would affect existing relationship between the Federal government and State and local governments.

Executive Order 12606, the Family.

The General Counsel, as the Designated Official under Executive Order 12606, The Family, has determined that this rule does not have a potential significant impact on family formation, maintenance and general well-being, and, thus is not subject to review under the Order. No significant change in existing HUD policies or programs, as those policies related to family concerns, will result from promulgation of this rule.

Public Reporting Burden

The information collection requirements contained in this proposed rule have been submitted to OMB for review under section 3504(h) of the Paperwork Reduction Act of 1980. In accordance with 5 CFR 1320.21, the following table discloses the Department's estimated burden for each collection of information in the proposed rule.

Description of inform collec.	No. of respondents	×	No. of responses per respondents	=	Total responses	Hours per response	=	Total hours
1. HUD–92001 202.11(a)(1) Application for Approval as Mortgagee for Superv./Non-Superv.	440		1		440	1.00		440
2. HUD–92001E 202.11(a)(1) Application for use by Loan Correspondent Mtgee	660		1		660	1.00		660
3. HUD–92001V 202.12(n)	* 8800		1		8800	25		2200
4. 203.4(b)(4) 202.14(c)(3) Audited Fin Statement (Only Non-Super and Loan Corres Mtgee)	2890		1		2890	16.00		** 46240
Totals	9900		1		9900			3300

Note: The above estimates for the use of these application forms were determined over a period of one (1) year. (Summary Report Number F51FLCM–N, dated 12–14–90)

*This number for the yearly verification report was based on the current mortgagee total in the same report previously noted.

**These respondents and hours were not included in the totals because other associations, etc., such as GNMA and FNMA, also require financial statements from applications for approval and annually thereafter to remain in an active status.

Catalog of Federal Domestic Assistance. The Catalog of Federal Domestic Assistance program numbers are: 14.103, 14.108, 14.110, 14.112, 14.116, 14.117, 14.119, 14.120, 14.121, 14.122, 14.123, 14.124, 14.128, 14.127, 14.128, 14.129, 14.130, 14.132, 14.133, 14.134, 14.135, 14.138, 14.139, 14.140, 14.141, 14.142, 14.149, 14.151, 14.155, 14.156, 14.157, 14.159, 14.162, 14.163, 14.164, 14.165, 14.166, 14.167, 14.168, 14.169, 14.170, 14.171, 14.172, 14.173, 14.174, 14.175, 14.177, 14.179 and 14.180.

List of Subjects

24 CFR part 24

Administrative practice and procedure, Government contracts, Grant programs, Government procurement, Loan programs, Drug abuse, Reporting and Recordkeeping requirements.

24 CFR part 25

Administrative practice and procedure, Loan programs—housing and community development, Organization and functions (Government agencies).

24 CFR part 200

Administrative practice and procedure, Claims, Equal employment opportunity, Fair housing, Home improvement, Housing standards, Lead poisoning, Loan programs—housing and community development, Mortgage insurance, Organization and functions (Government agencies), Reporting and recordkeeping requirements, Social security.

24 CFR part 202

Administrative practice and procedure, Home improvement, Manufactured homes, Mortgage insurance, Reporting and recordkeeping requirements.

24 CFR part 203

Hawaiian Natives, Home improvement, Loan programs—housing and community development, Mortgage insurance, Reporting and recordkeeping requirements, Solar energy.

24 CFR part 207

Manufactured homes, Mortgage insurance, Reporting and recordkeeping requirements, Solar energy.

24 CFR part 213

Cooperatives, Mortgage insurance, Reporting and recordkeeping requirements.

24 CFR part 234

Condominiums, Mortgage insurance, Reporting and recordkeeping requirements.

Accordingly, 24 CFR parts 24, 25, 200, 202, 203, 207, 213, and 234 would be amended as follows:

VOL 56 ISS 122 JE 25 1991 UMI

PART 24—GOVERNMENT DEBARMENT AND SUSPENSION AND GOVERNMENTWIDE REQUIREMENTS FOR DRUG-FREE WORKPLACE (GRANTS)

1. The authority citation for 24 CFR part 24 would continue to read as follows:

Authority: Executive Order 12549, secs. 5151–5160, Drug-Free Workplace Act of 1988, Pub. L. 100–690, title V, subtitle D (41 U.S.C. 701 et seq.); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

2. In § 24.700, the first sentence would be revised to read as follows:

§ 24.700 General.

Officials who may order a limited denial of participation. A Regional Administrator, Office Manager, Director of an Office of Indian Programs or the Deputy Assistant Secretary for Single Family Housing is authorized to order a limited denial of participation affecting any participant or contractor and its affiliates except HUD–FHA approved mortgagees. • • •

3. In § 24.710, introductory text of paragraph (a) would be republished and paragraph (a)(3) would be revised to read as follows:

§ 24.710 Period and scope of a limited denial of participation.

(a) The scope of a limited denial of participation shall be as follows:

• • • • •

(3) The sanction may be imposed for a period not to exceed 12 months, is limited to specific HUD programs, and shall be effective within the geographic jurisdiction of the office imposing it, unless the sanction is imposed by the Deputy Assistant Secretary for Single Family Housing in which case the sanction may be imposed on a nationwide basis or a more restricted basis.

• • • • •

PART 25—MORTGAGEE REVIEW BOARD

4. The authority citation for 24 CFR part 25 would continue to read as follows:

Authority: Secs. 202 (c) and (d), 203(s), 211 and 536 of the National Housing Act (12 U.S.C. 1706 (c) and (d), 1709(s), 1715b and 1734f–14); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

5. In § 25.9, paragraphs (h) and (u) would be revised to read as follows:

§ 25.9 Grounds for an administrative action.

• • • • •

(h) Failure of an approved mortgagee to meet or maintain the applicable net worth, liquidity or warehouse line of credit requirements of 24 CFR part 202;

• • • • •

(u) Failure to pay the application and annual fees required by 24 CFR part 202;

• • • • •

PART 200—INTRODUCTION

6. The authority citation for 24 CFR part 200 would continue to read as follows:

Authority: Titles I and II, National Housing Act (12 U.S.C. 1701–1715z–18); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

7. In § 200.152, paragraph (a) would be revised to read as follows:

§ 200.152 Endorsement for insurance.

(a) When it has been determined that the terms and conditions of the commitment have been fully complied with, the Secretary insures the mortgage and evidences the insurance by the issuance of a Mortgage Insurance Certificate for single family mortgages or by the signature of the Secretary's authorized agent in the endorsement panel on the mortgage for multifamily mortgages. After the mortgage is insured, the mortgagee is entitled to the benefits of insurance subject to compliance with the administrative regulations which are a part of the insurance contract.

• • • • •

§§ 200.163—200.164a [Removed]

8. Sections 200.163, 200.164 and 200.164a would be removed.

PART 202—APPROVAL OF LENDERS AND MORTGAGEES

9. 24 CFR part 202 would be amended by revising the heading of part 202 as set forth above; by redesignating current §§ 202.1—202.6 as with the heading of subpart A reading "Subpart A—Approval of title I Lending Institutions"; by adding a new subpart B; and by revising the authority citation to read as follows:

Authority: Sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)); title I, sec. 2, National Housing Act (12 U.S.C. 1703); title II, secs. 203, 211, National Housing Act (12 U.S.C. 1709, 1715, 1715b).

10. Part 202 would be amended by adding a new subpart B to read as follows:

Subpart B—Approval of Mortgagees

Sec.
202.10 Definitions.
202.11 Approval, recertification, withdrawal of approval and termination of approval agreement.
202.12 General approval requirements.
202.13 Supervised mortgagees.
202.14 Nonsupervised mortgagees.
202.15 Loan correspondents.
202.16 Investing mortgagees.
202.17 Governmental institutions, national mortgage associations, public housing agencies and state housing agencies.
202.18 Approval for servicing.
202.19 Reporting requirements.

§ 202.10 Definitions.

As used in this subpart:

(a) *Mortgage* means a mortgage as defined in § 203.17(a)(1), 203.43c(b)(1), 207.251(c) or § 234.1(d) of this chapter, or a loan authorized for insurance under the National Housing Act;

(b) *Mortgagee* means a mortgage lender which meets the definition of either a supervised mortgagee at § 202.13, a nonsupervised mortgagee at § 202.14, a loan correspondent at § 202.15, an investing mortgagee at § 202.16, or a governmental institution at § 202.17.

§ 202.11 Approval, recertification, withdrawal of approval and termination of approval agreement.

(a) *Approval.* (1) A mortgagee may be approved for participation in the mortgage insurance programs authorized by the National Housing Act, except title I of the Act, upon filing a request for approval on a form prescribed by the Secretary and signed by the applicant. The approval form shall be accompanied by such documentation as may be prescribed by the Secretary to support the request for approval. Approval of the application by the Secretary shall constitute an approval agreement between the mortgagee and the Secretary which includes:

(i) The mortgagee's agreement to comply at all times with the general approval requirements of § 202.12, and the special requirements for the class of mortgagee, at §§ 202.13, 202.14, 202.15, 202.16 or § 202.17, for which it was approved; and

(ii) The mortgagee's agreement that approval may be terminated as provided in § 202.11(d), in addition to any actions of the Mortgagee Review Board authorized by 24 CFR part 25.

(2) Approval may be restricted to participation in the home mortgage insurance programs or the multifamily mortgage insurance programs.

(3) Separate approval is required under subpart A of this part for participation in the title I Program, and additional approval is required for participation in the title II Direct Endorsement program or for the Coinsurance Program as provided in § 203.3 of this chapter or 24 CFR part 204.

(4) Approval of mortgagees may be restricted to geographic areas designated by the Secretary or may be approved to operate on a nationwide basis.

(5) Approval to use authorized agents may be granted to a mortgagee which originates mortgages in areas determined by the Secretary to be under served or in accordance with § 202.17(d) of this part.

(b) *Recertification of approval.* On each anniversary of the approval of a mortgagee, the Secretary shall undertake a recertification procedure to determine whether continued approval is appropriate. The Secretary shall review the yearly verification report required by § 202.12(h)(3) and other pertinent documents, determine whether all application and annual fees which are due have been paid, and request any additional information needed to make a determination regarding continuation of approval. For each mortgagee which is approved before [effective date of this rule], the recertification procedure on the first anniversary of approval occurring after [effective date of this rule] shall include an approval agreement between the Secretary and the mortgagee in compliance with paragraph (a)(1) of this section.

(c) *Withdrawal and suspension of approval.* Mortgagee approval may be suspended or withdrawn by the Mortgagee Review Board as provided in 24 CFR part 25.

(d) *Termination of approval agreement.—(1) Definitions.* For purposes of this paragraph (d):

Normal rate for defaults and claims means the rate of defaults and claims on HUD insured or coinsured mortgages for the geographic area served by a HUD field office, or other area designated by the Secretary, in which the mortgagee originates mortgages.

Defaults means insured mortgages in default for 90 or more days.

Claims means insured mortgages for which the mortgagee submits insurance claims to the Secretary.

(2) *Review of defaults and claims.* Every three months, the Secretary shall review the number of defaults and claims on mortgages originated by each mortgagee in the geographic area served by a HUD field office. The Secretary may also review the performance of a mortgagee's branch offices individually and may impose the sanctions provided for in this section on a branch as well as on a mortgagee as a whole.

(3) *Termination.* (i) If a mortgagee has a rate of defaults and claims on insured mortgages originated in an area during the Federal fiscal year which was in excess of 200 percent of the normal rate, and in excess of the national default and claim rate for insured mortgages, the Secretary shall notify the mortgagee that its approval agreement shall be terminated 30 days after notice was given, without action by the Mortgagee Review Board, except as provided in paragraph (d)(3) (ii) or (iii) of this section.

(ii) Before the Secretary sends the termination notice the Secretary shall review the census tract area concentrations of the defaults and claims. If the Secretary determines that the excessive rate is the result of mortgage lending in under served areas the Secretary may determine not to terminate the approval agreement.

(iii) Prior to termination the mortgagee may request an informal conference with the Deputy Assistant Secretary for Single Family Housing or his or her designee. After considering relevant reasons and factors beyond the mortgagee's control that contributed to the excessive default and claim rates, the Deputy Assistant Secretary for Single Family Housing or designee may withdraw the termination notice and may place the mortgagee on credit watch status.

(4) *Credit watch status.* If a mortgagee has a rate of defaults and claims on insured mortgages originated in an area during a Federal fiscal year which was greater than 150 percent but equal to or less than 200 percent of the normal rate, the Secretary shall notify the mortgagee that it is being placed on credit watch status. Before the credit watch notice is sent the Secretary shall review the census tract area concentrations of the defaults and claims. If the Secretary determines that the excessive rate is the result of mortgage lending in under served areas the Secretary may determine not to place the mortgagee on credit watch status.

(5) *Effect of credit watch.* Insured mortgages originated during a six month period from the date of the credit watch notice will be reviewed for excessive default rates. A mortgagee will be removed from credit watch status if the rate of defaults and claims for the six month tracking period decreases to 150 percent or less one year after that six month tracking period. The approval agreement for a mortgagee subject to credit watch may be terminated if the mortgagee's rate of defaults and claims on insured mortgages originated in an area during the six month tracking period is more than 150 percent of the normal rate one year after that six month tracking period. The Secretary shall provide 30 days notice and an opportunity for an informal conference as required by § 202.11(d)(3) to a mortgagee which will have its approval agreement terminated subsequent to a credit watch.

(e) *Effects of termination.* Termination of the approval agreement shall not affect:

(1) The Secretary's ability to insure eligible mortgages, absent fraud or misrepresentation, if the mortgagor and all terms and conditions of the mortgage were approved before the termination by the Direct Endorsement mortgagee or by a firm commitment issued by the Secretary.

(2) A mortgagee's obligation to continue to pay insurance premiums and meet all other obligations associated with insured mortgages; or

(3) A mortgagee's right to apply for a new approval agreement provided that the general approval requirements at § 202.12 and the specific requirements of the § 202.13 through § 202.19 are met, and the Secretary determines that the underlying causes for termination have been satisfactorily remedied.

§ 202.12 General approval requirements.

To be approved for participation in the mortgage insurance programs authorized by the National Housing Act, except Title I of the Act, and to maintain approval, a mortgagee shall meet the general requirements of this section (except as provided in § 202.17(b)) and the specific requirements of § 202.13 through § 202.18, as appropriate.

(a) *Business form.* It shall be a corporation or other chartered institution, a permanent organization having succession or a partnership. All partnerships must meet the requirements of paragraphs (a)(1) through (a)(4) of this section, and the managing general partner shall comply with the requirements of paragraphs (b), (c) and (g) of this section.

(1) Each general partner must be a corporation or other chartered institution.

(2) One general partner must be designated as the managing general partner, have as its principal activity the management of the partnership and have exclusive authority to deal directly with the Secretary on the partnership's behalf. Newly admitted partners must agree to the management of the partnership by the designated managing general partner. If the managing general partner withdraws or is removed from

VOL
56
ISS
122
JE
25
1991
UMI

the partnership for any reason, a new managing general partner shall be substituted, and the Secretary shall be immediately notified of the substitution.

(3) The partnership agreement shall specify that the partnership shall exist for the minimum term of years required by the Secretary. All insured mortgages held by the partnership shall be transferred to a HUD approved mortgagee prior to the termination of the partnership. The partnership shall specifically be authorized to continue its existence in the event that a partner withdraws.

(4) The Secretary must be notified immediately of any amendments to the partnership agreement which would affect the partnership's actions under any mortgage insurance program administered by the Secretary.

(b) *Employees.* It shall employ competent personnel trained to perform their assigned responsibilities, including origination, servicing and collection activities, and adequate staff and facilities to originate and service mortgages in accordance with applicable regulations, to the extent the mortgagee engages in such activities.

(c) *Officers.* All employees who will sign applications for mortgage insurance on behalf of the mortgagee shall be corporate officers or shall otherwise be authorized to bind the mortgagee in matters involving the origination of mortgage loans.

(d) *Escrows.* It shall not use escrow funds for any purpose other than that for which they were received. It shall segregate escrow commitment deposits, work completion deposits, and all periodic payments received under insured mortgages on account of ground rents, taxes, assessments, and insurance premiums, and shall deposit such funds in a special account or accounts with a financial institution whose accounts are insured by the Federal Deposit Insurance Corporation or the National Credit Union Administration.

(e) *Related laws.* It shall comply with the provisions of the Fair Housing Act, Executive Order 11063, Equal Credit Opportunity Act, the Real Estate Settlement Procedures Act of 1974, and all other Federal laws relating to the lending or investing of funds in real estate mortgages.

(f) *Servicing.* It shall comply with the servicing responsibilities contained in subpart C of part 203 and in part 207 of this chapter, and with all other applicable regulations contained in this title 24, and with such additional conditions and requirements as the Secretary may impose.

(g) *Business changes.* It shall provide prompt notification, on a form prescribed by the Secretary, of all changes in its legal structure, including, but not limited to, mergers, terminations, name, location, control of ownership, and character of business.

(h) *Reports.* It shall file the following reports, records and documentation:

(1) Upon application for approval, a copy of the mortgagee's license to operate as a mortgage lender in the State or States in which it will originate insured mortgages, if there are applicable licensing requirements, or a certification that there are no applicable licensing requirements;

(2) An annual certification that the mortgagee is in compliance with State licensing requirements, if any;

(3) A yearly verification report on a form prescribed by the Secretary;

(4) An audited or unaudited financial statement, within 30 days of the end of each fiscal quarter in which the mortgagee experiences an operating loss of 20 percent of its net worth, and until the mortgagee demonstrates an operating profit for two consecutive quarters or until the next recertification, which ever is the longer period; and

(5) A statement of net worth within 30 days of the commencement of voluntary or involuntary bankruptcy, conservatorship, receivership or any transfer of control to a Federal or State supervisory agency.

(i) *Financial statements.* It shall, upon request by the Secretary, submit a copy of its latest financial statement, submit such information as the Secretary may request, and submit to an examination of that portion of its records which relates to its insured mortgage activities.

(j) *Quality control plan.* It shall implement a written Quality Control Plan, acceptable to the Secretary, that assures compliance with the regulations and other issuances of the Secretary regarding mortgage origination and servicing.

(k) *Fees.* A mortgagee, other than one meeting the requirements of § 202.17, shall pay an application fee and annual fees, including additional fees for each branch office authorized to submit applications for mortgage insurance, in such amounts and at such times the Secretary may require.

(l) *Ineligibility.* At the time of application and at all times while approved as a mortgagee, neither the applicant mortgagee nor any officer, partner, director, principal or employee of the applicant mortgagee shall:

(1) Be suspended, debarred or otherwise restricted under part 24 or part 25 of this title, or under similar procedures of any other Federal agency;

(2) Be indicted for, or have been convicted of, an offense which reflects upon the responsibility, integrity or ability of the mortgagee to be an approved mortgagee;

(3) Be subject to unresolved findings as a result of HUD or other governmental audits or investigations; or

(4) Be engaged in business practices that do not conform to generally accepted practices of prudent lenders or that demonstrate irresponsibility.

(m) *Branch offices.* It may, only upon approval by the Secretary, maintain branch offices for the submission of applications for mortgage insurance. The mortgagee shall remain fully responsible to the Secretary for the actions of its branch offices.

(n) *Net worth.* Except for investing mortgagees under § 202.16 and governmental agencies under § 202.17, it shall have and maintain a net worth, in assets acceptable to the Secretary, of the following amounts. The net worth of a mortgagee (excluding loan correspondents and sponsors) which originates but does not service insured mortgages shall be based on the volume of insured mortgages originated by the mortgagee during the mortgagee's previous fiscal year. The net worth of a mortgagee (excluding loan correspondents and sponsors) which services but does not originate insured mortgages shall be based on the average outstanding balance of insured mortgages serviced by the mortgagee during its preceding fiscal year. The net worth of a mortgagee (excluding loan correspondents and sponsors) which both originates and services insured mortgages shall be $1,000,000.

(1) $250,000 net worth, if the volume of insured mortgages was less than or equal to 25 million in one year;

(2) $500,000 net worth, if the volume of insured mortgages was more than $25 million, but not more than $50 million in one year;

(3) $750,000 net worth, if the volume of insured mortgages was more than $50 million, but not more than $100 million in one year; and

(4) $1,600,000 net worth, if the volume of insured mortgages was more than $100 million in one year; or

(5) $1,000,000 net worth, if the mortgagee is a sponsor for one or more loan correspondents under § 202.15; or

(6) $50,000 net worth, if the mortgagee is a loan correspondent, and an additional $25,000 net worth for each branch office of the loan correspondent up to a maximum of $250,000.

(o) *Effective date.* All mortgagees approved after [the effective date of this rule] shall be required to have a net worth of $250,000 for the first year of

approval. All loan correspondents approved before [the effective date of this rule] must comply with the net worth requirements in paragraph (n) of this section on [the effective date of this rule]. All mortgagees (other than loan correspondents) approved before [the effective date of this rule] must meet the net worth requirement of paragraph (n) of this section by [*two years from effective date of this rule*].

(p) *Conflict of interest.* A mortgagee may not pay anything of value, directly or indirectly, in connection with any insured mortgage transaction or transactions to any person or entity if such person or entity has received any other consideration from the mortgagor, seller, builder, or any other person for services related to such transactions or related to the purchase or sale of the mortgaged property, except that consideration as may be approved by the Secretary may be paid for services actually performed. The mortgagee shall not pay a referral fee to any person or organization.

(q) *Liquid assets.* It shall maintain liquid assets consisting of cash or its equivalent acceptable to the Secretary in the amount of 20 percent of its net worth, up to a maximum liquidity requirement of $100,000.

(r) *Fidelity bond.* Except for loan correspondents, the mortgagee shall maintain, for the benefit of the Secretary and the mortgagor, fidelity bond coverage acceptable to the Secretary and in an amount required by the Secretary, that assures the faithful performance of the fiduciary responsibilities of the mortgagee.

§ 202.13 Supervised mortgagees.

(a) *Definition.* A supervised mortgagee is a financial institution which is a member of the Federal Reserve System or an institution whose accounts are insured by the Federal Deposit Insurance Corporation or the National Credit Union Administration.

(b) *General functions.* A supervised mortgagee may originate mortgages, submit applications for mortgage insurance, and may purchase, hold, service or sell insured mortgages.

(c) *Special requirement.* In addition to the general approval requirements in § 202.12, a supervised mortgagee shall promptly notify the Secretary in the event of termination of its supervision by its supervising agency.

(d) *Trust companies.* Approval of a banking institution or a trust company as a supervised mortgagee shall constitute approval of such institution or company when lawfully acting in a fiduciary capacity in investing fiduciary funds which are under its individual or joint control. Upon termination of such fiduciary relationship, any insured mortgages held in the fiduciary estate shall be transferred to a mortgagee approved under this section and the fiduciary relationship must be such as to permit such transfer.

§ 202.14 Nonsupervised mortgagees.

(a) *Definition.* A nonsupervised mortgagee is a financial institution that has as its principal activity the lending or investment of funds in real estate mortgages, and which is not approved under §§ 202.13, 202.15, 202.16, or 202.17.

(b) *General functions.* A nonsupervised mortgagee may submit applications for the insurance of mortgages and may purchase, hold, service or sell insured mortgages.

(c) *Special requirements.* In addition to the general approval requirements in § 202.12, a non-supervised mortgagee shall meet the following requirements:

(1) It shall have and maintain a warehouse line of credit in an amount of not less than $3 million, available for use in the origination of mortgages or other mortgage funding programs acceptable to the Secretary.

(2) It shall file an audit report with the Secretary within 90 days of the close of its fiscal year (or within an extended time if an extension is granted in the sole discretion of the Secretary), and at such other times as may be requested. Audit reports shall be based on audits performed by a Certified Public Accountant, or by an Independent Public Accountant licensed by a regulatory authority of a State or other political subdivision of the United States on or before December 31, 1970, and shall include:

(i) A financial statement in a form acceptable to the Secretary, including a balance sheet and a statement of operations and retained earnings, and analysis of the mortgagee's net worth, adjusted to reflect only assets acceptable to the Secretary, and an analysis of escrow funds;

(ii) A report on compliance tests prescribed by the Secretary; and

(iii) Such other financial information as the Secretary may require to determine the accuracy and validity of the audit report.

§ 202.15 Loan correspondents.

(a) *Definitions.* A *loan correspondent* is a mortgagee approved by the Secretary to originate mortgages for sale or transfer to a sponsor or sponsors.

A *sponsor* is a mortgagee which holds a valid approval agreement, is approved to participate in the Direct Endorsement program, and meets the $1 million net worth requirement at § 203.12(n)(4) of this chapter.

(b) *General functions.* A loan correspondent may submit applications for the insurance of mortgages. A loan correspondent may not sell insured mortgages to any mortgagee other than its sponsor or sponsors without the prior approval of the Secretary, nor may it hold, purchase or service insured mortgages in its own portfolio.

(c) *Special requirements.* In addition to the general approval requirements in § 202.12, a loan correspondent shall meet the following requirements, as applicable:

(1) A loan correspondent shall close all mortgages in its own name. For mortgages not processed through Direct Endorsement under § 203.7 and § 203.255(a) of this chapter, the mortgages must be both underwritten and closed in the loan correspondent's own name. For mortgages processed through Direct Endorsement under § 203.5 and § 203.255(b) of this chapter, underwriting shall be the responsibility of the Direct Endorsement sponsor.

(2) Its approval must be requested by one or more sponsors that are approved mortgagees under § 202.13, § 202.14, or § 202.17.

(3) It shall comply with the warehouse line of credit requirements of § 202.14(c)(1), unless there is a written agreement by a sponsor to fund all mortgages originated by the loan correspondent.

(4) A loan correspondent and its sponsor or sponsors shall promptly notify the Secretary upon termination of any loan correspondent agreement.

(5) It shall file audit reports in accordance with § 202.14(c)(3).

(6) A sponsor and a loan correspondent shall have a principal-agent relationship.

§ 202.16 Investing mortgagees.

(a) *Definition and general functions.* An investing mortgagee is an organization, including a charitable or nonprofit institution or pension fund, that is not approved under other sections of this part. It may purchase, hold or sell insured mortgages, but may not submit applications for the insurance of mortgages. An investing mortgagee may not service insured mortgages without prior approval of the Secretary.

(b) *Special requirements.* In addition to the general approval requirements of § 202.12, an investing mortgagee shall meet the following special requirements:

(1) It has lawful authority to purchase insured mortgages in its own name.

VOL 56 ISS 122 JE 25 1991 UMI

(2) It has, or has arranged for, funds sufficient to support a projected investment in real estate mortgages of at least $1 million.

§ 202.17 Governmental institutions, national mortgage associations, public housing agencies and state housing agencies.

(a) *Definition and general functions.* Subject to the general approval requirements of § 202.12, a Federal, State or municipal governmental agency a Federal Reserve Bank, a Federal Home Loan Bank, Federal Home Loan Mortgage Corporation, or Federal National Mortgage Association may be an approved mortgagee and may originate, purchase, service or sell insured mortgages to the extent authorized by applicable Federal, State or local law.

(b) *Public Housing Authorities and State Housing Agencies.* Under such terms and conditions as the Secretary may prescribe, Public Housing Agencies or their instrumentalities, and State Housing agencies may be approved as mortgagees for the purpose of originating and holding insured multifamily mortgages funded by issuance of tax exempt obligations by the agency.

(c) *Audit requirements.* Since the insuring of mortgages under the National Housing Act constitutes "financial assistance" for purposes of audit requirements set out in 24 CFR part 44, State and local governments (as defined in § 44.2) that receive mortgage insurance as mortgagees shall conduct audits in accordance with HUD audit requirements at 24 CFR part 44.

(d) *Authorized agents.* A mortgagee approved under this section may, with the approval of the Secretary, designate another approved mortgagee as Authorized Agent for the purpose of submitting applications for mortgage insurance in its name and on its behalf.

§ 202.18 Approval for servicing.

Mortgagees approved under § 202.13 (supervised mortgagees), § 202.14 (non-supervised mortgagees), and § 202.17 (governmental institutions) may service insured mortgages only if approved for servicing by the Secretary.

11. Section 203.8 would be redesignated as a new § 202.19, and all references to "Commissioner" in the newly redesignated § 202.19 would be changed to "Secretary," and § 202.19(a)(1) would be revised to read as follows:

§ 202.19 Report requirements.

(a) *Definitions.* For the purpose of this section:

(1) *Normal rate* for early serious defaults and early claims means the rate of defaults and claims on HUD insured or coinsured mortgages for the geographic area served by a HUD field office, or other area designated by the Secretary, in which the mortgagee originates mortgages.

* * * * *

PART 203—SINGLE FAMILY MORTGAGE INSURANCE

12. The authority citation for 24 CFR part 203 would continue to read as follows:

Authority: Secs. 203, 211, National Housing Act (12 U.S.C. 1709, 1715b); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)). In addition, subpart C is also issued under sec. 230, National Housing Act (12 U.S.C. 1715u).

13. 24 CFR part 203 would be amended by revising the part heading as set forth above; by revising the heading of subpart A to read "Subpart A—Eligibility Requirements and Underwriting Procedures"; by revising the first center heading under subpart A entitled "Approval of Mortgagees" to read "Direct Endorsement Process"; by revising the second center heading under subpart A entitled "Application and Commitment" to read "Miscellaneous Regulations"; by revising §§ 203.1, 203.3, 203.5, and 203.7; and by removing and reserving §§ 203.2, 203.4, 203.6, 203.9, 203.10, 203.11, and 203.13; to read as follows:

§ 203.1 Underwriting procedures.

The principal underwriting procedure for single family mortgages is the Direct Endorsement procedure described in § 203.5. Processing through HUD offices as described in § 203.7, with issuance of commitments, is available only for mortgages which are not eligible for Direct Endorsement processing under § 203.5(b), or to the extent required by § 203.3(b)(5), § 203.3(d)(1), or as determined by the Secretary.

§ 203.3 Approval of mortgagees for Direct Endorsement.

(a) *Direct Endorsement approval.* To participate in the Direct Endorsement program set forth in § 203.5, a mortgagee must be an approved mortgagee meeting the requirements of §§ 202.13, 202.14 or 202.17 of this chapter and this section. A mortgagee shall submit an application to each HUD office in whose jurisdiction the mortgagee seeks to process mortgages pursuant to § 203.5.

(b) *Special requirements.* The mortgagee must establish that it meets the following qualifications.

(1) The mortgagee has five years of experience in the origination of single family mortgages. The Secretary will approve a mortgagee with less than five years experience in the origination of single family mortgages if a principal officer has had a minimum of five years of managerial experience in the origination of single family mortgages.

(2) The mortgagee has on its permanent staff an underwriter approved by the Secretary, and authorized by the mortgagee to bind the mortgagee on matters involving the origination of mortgages through the Direct Endorsement procedures. The technical staff utilized by the mortgagee, including appraisers, construction analysts, inspectors, architects and engineers, must also be approved by the Secretary. The technical staff may be employees of the mortgagee or may be hired on a fee basis from a panel approved by the Secretary, except that an independent appraiser or appraisal firm may be used as authorized by § 203.5(e).

(3) The mortgagee's underwriter and technical staff shall satisfactorily complete a training program on HUD underwriting requirements.

(4) The mortgagee must submit initially 15 mortgages, processed in accordance with the requirements set forth under § 203.5 and § 203.255. The documents required by § 203.255 will be reviewed by the Secretary and, if acceptable, commitments will be issued prior to endorsement of the loans for insurance. If the underwriting and processing of these 15 mortgages is satisfactory, then the mortgagee may be approved to close subsequent mortgages and submit them directly for endorsement for insurance in accordance with the process set forth in § 203.255. Unsatisfactory performance by the mortgagee at this stage constitutes grounds for denial of participation in the program, or for continued pre-endorsement review of a mortgagee's submissions. If participation in the program is denied, such denial is effective immediately and may be appealed in accordance with the procedures set forth in paragraph (d)(2) of this section.

(5) The mortgagee shall promptly notify those HUD offices which have granted approval under this section of any changes that affect qualifications under this section.

(c) *Approval of underwriters.* An underwriter may be approved by the Secretary to underwrite Direct Endorsement mortgages nationwide. An underwriter also may be approved by each HUD office in whose jurisdiction the underwriter seeks to conduct business.

(d) *Mortgagee sanctions.* Depending upon the nature and extent of the noncompliance with the requirements applicable to the Direct Endorsement process, as determined by the Secretary, the Secretary may take any of following actions:

(1) *Probation.* The Secretary may place a mortgagee on Direct Endorsement probation for a specified period of time for the purpose of evaluating the mortgagee's compliance with the requirements of the Direct Endorsement procedure. Such probation is distinct from probation imposed by the Mortgagee Review Board under 24 CFR part 25. During the probation period specified by this section, the mortgagee may continue to process Direct Endorsement mortgages, subject to conditions required by the Secretary. The Secretary may require the mortgagee to:

(i) Process mortgages in accordance with paragraph (b)(4) of this section;

(ii) Submit to additional training;

(iii) Make changes in the Quality Control Plan required by § 202.12(j) of this chapter; and

(iv) Take other actions, which may include, but are not limited to, periodic reporting to the Secretary, and submission to the Secretary of internal audits.

(2) *Termination of approval of Direct Endorsement mortgagees.* (i) A mortgagee's approval to participate in the Direct Endorsement program may be terminated in a particular jurisdiction by the local HUD office or on a nationwide basis by HUD Central Office. The HUD office instituting the termination action shall provide the mortgagee with written notice of the grounds for the action and of the right to an informal hearing before the office initiating the termination action. Such hearing shall be expeditiously arranged, and the mortgagee may be represented by counsel. Any termination instituted under this section is distinct from withdrawal of mortgagee approval by the Mortgagee Review Board under 24 CFR part 25.

(ii) After consideration of the materials presented, the decision maker shall advise the mortgagee in writing whether the termination is rescinded, modified or affirmed.

(iii) The mortgagee may appeal such decision to the Deputy Assistant Secretary for Housing or his or her designee. A decision by the Deputy Assistant Secretary or designee shall constitute final agency action.

§ 203.5 Direct Endorsement process.

(a) *General.* Under the Direct Endorsement program, the Secretary does not review applications for mortgage insurance or issue conditional or firm commitments, except to the extent required by § 203.3(b)(4) or § 203.3(d)(1). Under this program, the mortgagee determines that the proposed mortgage is eligible for insurance under the applicable program regulations, and submits the required documents to the Secretary in accordance with the procedures set forth in § 203.255. This subpart provides that certain functions shall be performed by the Secretary (or Commissioner), but the Secretary may specify that a Direct Endorsement mortgagee shall perform such an action without specific involvement or approval by the Secretary, subject to statutory limitations. In each case, the Direct Endorsement mortgagee's performance is subject to pre-endorsement and post-endorsement review by the Secretary under §§ 203.255 (c) and (e).

(b) *Eligible programs.* All single family mortgages authorized for insurance under the National Housing Act shall be originated through the Direct Endorsement program, except mortgages authorized under sections 203(n), 203(p), 213, 221 (i) or (j), 225, 233, 237, 247, 248, 255, 809 or 810 of the National Housing Act, and any other insurance programs announced by Federal Register notice. The provision contained in 24 CFR 221.55 regarding deferred sales to displaced families is not available in the Direct Endorsement program.

(c) *Underwriter due diligence.* A Direct Endorsement mortgagee shall exercise the same level of care which it would exercise in obtaining and verifying information for a loan in which the mortgagee would be entirely dependent on the property as security to protect its investment. Mortgagee procedures that evidence such due diligence shall be incorporated as part of the Quality Control Plan required under § 202.12(j) of this chapter. The Secretary shall publish guidelines for Direct Endorsement underwriting procedures in a handbook, which shall be provided to all mortgagees approved for the Direct Endorsement procedure. Compliance with these guidelines is deemed to be the minimum standard of due diligence in underwriting mortgages.

(d) *Mortgagor's income.* The mortgagee shall evaluate the mortgagor's credit characteristics, adequacy and stability of income to meet the periodic payments under the mortgage and all other obligations, and the adequacy of the mortgagor's available assets to close the transaction, and render an underwriting decision in accordance with applicable regulations, policies and procedures.

§ 203.7 Commitment process.

For single family mortgage programs which are not eligible for Direct Endorsement processing under § 203.5, the mortgagee shall submit an application for mortgage insurance on a form prescribed by the Secretary, prior to making the mortgage. If (a) a mortgage for a specified property has been accepted for insurance through issuance of a conditional commitment by the Secretary or a certificate of reasonable value by the Secretary of Veterans Affairs, and (b) a specified mortgagor and all other proposed terms and conditions of the mortgage meet the eligibility requirements for insurance as determined by the Secretary, the Secretary shall approve the application for insurance by issuing a firm commitment setting forth the terms and conditions of insurance will be issued upon a form prescribed by the Secretary.

§ 203.8 [Redesignated as § 202.19]

13a. Section 203.8 would be redesignated as § 202.19.

14. Section 203.14 would be revised to read as follows:

§ 203.14 Builders' warranty.

Applications relating to proposed construction must be accompanied by an agreement in form satisfactory to the Secretary, executed by the seller or builder or such other person as the Secretary may require, and agreeing that in the event of any sale or conveyance of the dwelling, within a period of one year beginning with the date of initial occupancy, the seller, builder, or such other person will at the time of such sale or conveyance deliver to the purchaser or owner of such property a warranty in form satisfactory to the Secretary warranting that the dwelling is constructed in substantial conformity with the plans and specifications (including amendments thereof or changes and variations therein which have been approved in writing by the Secretary) on which the Secretary has based his valuation of the dwelling. Such agreement must provide that upon the sale or conveyance of the dwelling and delivery of the warranty, the seller, builder or such other person will promptly furnish the Secretary with a conformed copy of the warranty establishing by the purchaser's receipt thereon that the original warranty has been delivered to the purchaser in accordance with this section.

VOL
56
ISS
122
JE
25
1991
UMI

15. Section 203.17(d) would be revised to read as follows:

§ 203.17 Mortgage provisions.

* * * * *

(d) *Maturity.* The mortgage shall have a term of not more than 30 years from the date of the beginning of amortization.

* * * * *

16. Section 203.27(d) would be revised to read as follows:

§ 203.27 Charges, fees or discounts.

* * * * *

(d) Before the insurance of any mortgage, the mortgagee shall furnish to the Secretary a signed statement in a form satisfactory to the Secretary listing any charge, fee or discount collected by the mortgagee from the mortgagor. All charges, fees or discounts are subject to review by the Secretary both before and after endorsement under § 203.255.

* * * * *

17. Section 203.248 would be revised to read as follows:

§ 203.248 Waivers.

On a case-by-case basis, the Secretary may waive any requirement of this subpart not required by statute, if the Secretary finds that application of such requirement would adversely affect achievement of the purposes of the Act. Each such waiver shall be in writing and supported by a statement of the facts and grounds for forming the basis for the waiver. The authority under this section may be delegated to the Assistant Secretary for Housing-Federal Housing Commissioner, but shall not be redelegated.

18. Section 203.249 would be revised to read as follows:

§ 203.249 Effect of amendments.

The regulations in this subpart may be amended by the Secretary at any time and from time to time, in whole or in part, but such amendment shall not adversely affect the interests of a mortgagee under the contract of insurance on any mortgage or loan already insured, and shall not adversely affect the interest of a mortgagee on any mortgage or loan to be insured on which either the Direct Endorsement mortgagee has approved the mortgagor and all terms and conditions of the loan or the Secretary has issued a firm commitment. In addition, such amendment shall not adversely affect the eligibility of specific property if such property is covered by a conditional commitment issued by the Secretary, a certificate of reasonable value issued by the Secretary of Veterans Affairs, or an appraised report approved by a Direct Endorsement underwriter.

19. Section 203.255 would be revised to read as follows:

§ 203.255 Insurance of mortgage.

(a) *Endorsement without Direct Endorsement processing.* For applications for insurance involving mortgages not eligible to be originated under the Direct Endorsement program under § 203.5, the Secretary will endorse the mortgage for insurance by issuing a Mortgage Insurance Certificate, provided that the mortgagee is in compliance with the firm commitment.

(b) *Endorsement with Direct Endorsement processing.* For applications for insurance involving mortgages originated under the single family Direct Endorsement program under § 203.5, the mortgagee shall submit to the Secretary, within 30 days after the date of closing of the loan or such additional time as permitted by the Secretary, the documentation and certifications listed in this paragraph (b):

(1) Property appraisal upon a form prescribed by the Secretary (or for proposed construction, a HUD conditional commitment or the Department of Veterans Affairs certificate of reasonable value) and all accompanying documents required by the Secretary;

(2) An application for insurance of the mortgage upon a form prescribed by the Secretary;

(3) A certified copy of the mortgage and note executed upon forms which meet the requirements of the Secretary;

(4) A warranty of completion, on a form prescribed by the Secretary, for proposed construction cases;

(5) An underwriter certification, on a form prescribed by the Secretary, stating that the underwriter has personally reviewed the appraisal report and credit application (including the analysis performed on the worksheets) and that the proposed mortgage complies with HUD underwriting requirements, and incorporating each of the underwriter certification items which apply to the mortgage submitted for endorsement, as set forth in the applicable handbook or similar publication that is distributed to all Direct Endorsement mortgagees;

(6) Where applicable, a certificate under oath and contract regarding use of the dwelling for transient or hotel purposes;

(7) Where applicable, a certificate of intent to occupy by military personnel;

(8) Where a mortgage for an existing property is to be insured under section 221(d)(2) of the National Housing Act, a letter from the appropriate local government official that the property meets applicable code requirements;

(9) Where an individual water or sewer system is being used, an approval letter from the local health authority indicating approval of the system in accordance with 24 CFR 200.926d(d);

(10) For proposed construction if the mortgage (excluding financed mortgage insurance premium) exceeds a 90 percent loan to value ratio, evidence that the mortgagee qualifies for a higher ratio loan under one of the applicable provisions in the appropriate regulations;

(11) A mortgagee certification on a form prescribed by the Secretary, stating that the authorized representative of the mortgagee (or loan correspondent sponsored by the mortgagee) who is making the certification has personally reviewed the mortgage documents and the application for insurance endorsement, and certifying that the mortgage complies with the requirements of this paragraph (b). The certification shall incorporate each of the mortgagee certification items which apply to the mortgage loan submitted for endorsement, as set forth in the applicable handbook or similar publication that is distributed to all Direct Endorsement mortgagees; and

(12) Such other documents as the Secretary may require.

(c) *Pre-endorsement review for Direct Endorsement.* Upon submission by an approved mortgagee of the documents required by paragraph (b) of this section, the Secretary will review the documents to determine:

(1) That the mortgage is executed on a form which meets the requirements of the Secretary;

(2) That the mortgage maturity meets the requirements of the applicable program;

(3) That the stated mortgage amount does not exceed the maximum mortgage amounts as most recently published in the Federal Register;

(4) That all documents required by paragraph (b) of this section are submitted;

(5) That all necessary certifications are made in accordance with paragraph (b) of this section;

(6) That there is no mortgage insurance premium, late charges or interest due to the Secretary; and

(7) That there is no information known to the Secretary indicating that:

(i) Any certification or other required document is incomplete, false, misleading, or constitutes fraud or misrepresentation on the part of any party; or

(ii) The mortgage is otherwise ineligible for insurance.

If, following this review, the mortgage is determined to be eligible, the Secretary will endorse the mortgage for insurance by issuance of a Mortgage Insurance Certificate. If the mortgage is determined to be ineligible, the Secretary will inform the mortgagee in writing of this fact, and include the reasons thereof and any corrective actions that may be taken.

(d) *Submission by mortgagee other than originating mortgagee.* If the originating mortgagee assigns the mortgage to another approved mortgagee before pre-endorsement review under paragraph (c), the assignee may submit the required documents for pre-endorsement review in the name of the originating mortgagee. All certifications must be executed by the originating mortgagee (or its underwriter, if appropriate). The purchasing mortgagee may pay any required mortgage insurance premium, late charge and interest.

(e) *Post-Endorsement review for Direct Endorsement.* Following endorsement for insurance, the Secretary may review all documents required by paragraph (b) of this section. If, following this review, the Secretary determines that the mortgage does not satisfy the requirements of the Direct Endorsement program, the Secretary may place the mortgagee on Direct Endorsement probation, or terminate the authority of the mortgagee to participate in the Direct Endorsement program pursuant to § 203.3(d), or refer the matter to the Mortgagee Review Board for action pursuant to 24 CFR part 25.

20. Section 203.502(a) would be revised to read as follows:

§ 203.502 Responsibility for servicing.

(a) After [one year from effective date of final rule], servicing of insured mortgages must be performed by a mortgagee that is approved by HUD to service insured mortgages. The servicer must fully discharge the servicing responsibilities of the mortgagee as outlined in this part. The mortgagee shall remain fully responsible to the Secretary for proper servicing, and the actions of its servicer shall be considered to be the actions of the mortgagee. The servicer also shall be fully responsible to the Secretary for its actions as a servicer.

* * * * *

PART 207—MULTIFAMILY HOUSING MORTGAGE INSURANCE

21. The authority citation for 24 CFR part 207 would continue to read as follows:

Authority: Secs. 207, 211, National Housing Act (12 U.S.C. 1713, 1715b); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)). Sections 207.258 and 207.258b are also issued under section 203(e), Housing and Community Development Amendments of 1978 (12 U.S.C. 1701z–11(e)).

22. A new § 207.263 would be added to read as follows:

§ 207.263 Responsibility for servicing.

After [one year after effective date of this rule] servicing of insured mortgages must be performed by a mortgagee which is approved by HUD to service insured mortgages.

PART 213—COOPERATIVE HOUSING MORTGAGE INSURANCE

23. The authority citation for 24 CFR part 213 would continue to read as follows:

Authority: Secs. 211, 213, National Housing Act (12 U.S.C. 1715b, 1715e); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

§ 213.503, 213.504 and 213.505 [Removed]

24. The center heading under subpart C, entitled "Application and Commitment", and §§ 213.503, 213.504 and 213.505 would be removed and reserved.

25. The center heading under subpart C entitled "Approval of Mortgagees" and § 213.502 would be revised to read as follows:

Application for Insurance

§ 213.502 Processing for insurance.

Mortgages under this part 213 shall be processed by approved mortgagees and insured by the Secretary through the Direct Endorsement procedure at part 203 of this chapter, unless otherwise determined by the Secretary.

PART 234—CONDOMINIUM OWNERSHIP MORTGAGE INSURANCE

26. The authority citation for 24 CFR part 234 would continue to read as follows:

Authority: Secs. 211, 234, National Housing Act (12 U.S.C. 1715b, 1715y); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)). Section 234.520(a)(2)(ii) is also issued under sec. 201(a), National Housing Act (12 U.S.C. 1707(a)).

§§ 234.11 and 234.12 [Removed]

27. Sections 234.11 and 234.12 would be removed and reserved, and the center heading under Subpart A entitled "Application and Commitment" and § 234.10 would be revised to read as follows:

Application for Insurance

§ 234.10 Processing for insurance.

Mortgages under this part 234 shall be processed by approved mortgagees and insured by the Secretary through the Direct Endorsement procedure at 24 CFR part 203, unless otherwise determined by the Secretary.

Dated: May 10, 1991.

Alfred A. DelliBovi,

Deputy Secretary.

DEPARTMENT OF THE TREASURY

Office of Foreign Assets Control

31 CFR Part 575

Iraqi Sanctions Regulations

AGENCY: Office of Foreign Assets Control, Department of the Treasury.

ACTION: Final rule; amendments to the list of specially designated nationals of the Government of Iraq.

SUMMARY: The Iraq Sanctions Regulations, 31 CFR part 575 (56 FR 2112, Jan. 18, 1991—the "Regulations"), are being amended to add seven names to and remove two names from appendix A, the list of individuals and Organizations Determined to be Within the Term "Government of Iraq" (Specially Designated Nationals of Iraq). Appendix A contains the names of companies and individuals which the Director of the Office of Foreign Assets Control has determined are owned or controlled by or acting or purporting to act directly or indirectly for the Government of Iraq. This list may be expanded at any time.

EFFECTIVE DATE: June 25, 1991.

ADDRESSES: Copies of this list are available upon request at the following location: Office of Foreign Assets Control, U.S. Department of the Treasury, Annex, 1500 Pennsylvania Avenue, NW., Washington, DC 20220.

FOR FURTHER INFORMATION CONTACT: Richard J. Hollas, Chief, Enforcement Section, Office of Foreign Assets Control, Tel.: (202) 566–5021.

SUPPLEMENTARY INFORMATION: The Regulations were issued by the Treasury Department to implement Executive Orders No. 12722 and 12724 of August 2 and August 9, 1990, in which the President declared a national emergency with respect to Iraq, invoking the authority, *inter alia*, of the International Emergency Economic Powers Act (50 U.S.C. 1701 *et seq.*) and the United Nations Participation Act (22 U.S.C. 287c), and ordering specific measures against the Government of Iraq. An amendment to the regulations (56 FR 13584, Apr. 3, 1991) added a new appendix A, the list of Individuals and Organizations Determined to be Within the Term "Government of Iraq" (Specially Designated Nationals of Iraq), and a new appendix B, the list of Merchant Vessels Registered, Owned, or Controlled by the Government of Iraq or by Persons Acting Directly or Indirectly on Behalf of the Government of Iraq.

Section 575.306 of the Regulations defines the term "Government of Iraq" to include

(a) The state and the Government of Iraq, as well as any political subdivision, agency, or instrumentality thereof, including the Central Bank of Iraq;

(b) Any partnership, association, corporation, or other organization substantially owned or controlled by the foregoing;

(c) Any person to the extent that such person is, or has been, or to the extent that there is reasonable cause to believe that such person is, or has been, since the effective date, acting or purporting to act directly or indirectly on behalf of any of the foregoing; and

(d) Any other person or organization determined by the Director of the Office of Foreign Assets Control to be included within this section.

Determinations that persons fall within this definition are effective upon the date of determination by the Director, Office of Foreign Assets Control ("FAC"). Public notice is effective upon the date of publication or upon actual notice, whichever is sooner.

This rule adds seven names to and removes two names from appendix A to part 575 to provide public notice of a list of persons, known as "specially designated nationals" of the Government of Iraq. The list consists of companies and individuals which the Director of the Office of Foreign Assets Control has determined to be owned or controlled by or to be acting or purporting to act directly or indirectly for the Government of Iraq, and which thus fall within the definition of the "Government of Iraq" contained in § 575.306 of the Regulations. The persons included in appendix A are subject to all prohibitions applicable to other components of the Government of Iraq. All unlicensed transactions with such persons, or in property in which they have an interest, are prohibited.

The list of specially designated nationals is a partial one, since FAC may not be aware of all the persons that might be owned or controlled by the Government of Iraq or acting as officers, agents, or front organizations for Iraq, and which thus qualify as specially designated nationals of the Government of Iraq. Therefore, persons engaging in transactions may not rely on the fact that any particular person is not on the specially designated nationals list as evidence that it is not owned or controlled by, or acting or purporting to act directly or indirectly for, the Government of Iraq. The Treasury Department regards it as incumbent upon all U.S. persons to take reasonable steps to ascertain for themselves whether persons they enter into transactions with are owned or controlled by the Government of Iraq or are acting or purporting to act on its behalf, or on behalf of other countries subject to blocking or transportation-related restrictions (at present, Cambodia, Cuba, Libya, North Korea, and Vietnam).

Section 586E of the Iraq Sanctions Act of 1990, Public Law 101–513, 104 Stat. 2049, provides for civil penalties not to exceed $250,000 for violations of the Regulations and fines of up to $1,000,000 and imprisonment for up to 12 years for willful violations of the Regulations. In addition, section 5(b) of the United Nations Participation Act of 1945 (22 U.S.C. 287c(b)) provides for the forfeiture of any property involved in a violation of the Regulations.

Pursuant to the Regulations, PMK/QUDOS (Liverpool Polytechnic), England, United Kingdom, and Sollatek, England, United Kingdom, were included in appendix A to the Regulations, published in the Federal Register on April 3, 1991 (56 FR 13584) as specially designated nationals of the Government of Iraq. Following a review of additional information and extensive consultations with the British Government, it has been determined that PMK/QUDOS (Liverpool Polytechnic) and Sollatek are not within the scope of the definition of the "Government of Iraq" as defined in § 575.306 of the Regulations; and, therefore, are removed from the list of specially designated nationals of the Government of Iraq.

Because the Regulations involve a foreign affairs function, Executive Order 12291 and the provisions of the Administrative Procedure Act, 5 U.S.C. 553, requiring notice of proposed rulemaking, opportunity for public participation, and delay in effective date, are inapplicable. Because no notice of proposed rulemaking is required for this rule, the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, does not apply.

List of Subjects in 31 CFR Part 575

Administrative practice and procedure, Banks, Banking, Blocking of assets, Foreign trade, Iraq, Penalties, Reporting and recordkeeping requirements, Securities, Specially designated nationals, Travel restrictions.

PART 575—IRAQI SANCTIONS REGULATIONS

For the reasons set forth in the preamble, 31 CFR part 575 is amended as set forth below:

1. The Authority citation for part 575 continues to read as follows:

Authority: 50 U.S.C. 1701 *et seq.*; 50 U.S.C. 1601 *et seq.*; 22 U.S.C. 287c; Pub. L. 101–513, 104 Stat. 2047–55 (Nov. 5, 1990); 3 U.S.C. 301; E.O. 12722, 55 FR 31803 (Aug. 3, 1990); E.O. 12724, 55 FR 33089 (Aug. 13, 1990).

Appendix A—Individuals and Organizations Determined to be Specially Designated Nationals of the Government of Iraq

2. Appendix A to part 575 is amended by removing the numerical designations from the list of companies and the list of individuals.

3. Appendix A to part 575 is amended by removing the following names from the list of companies:

PMK/QUDOS (Liverpool Polytechnic), England, United Kingdom.
Sollatek, England, United Kingdom.

4. Appendix A to part 575 is amended by adding the following names in their proper alphabetical positions to the list of individuals:

Al-Majid, Ali Hassan, Baghdad, Iraq
Al-Majid, Hussein Kamel Hassan, Baghdad, Iraq
Al-Takriti, Barzan Ibrahim Hassan, Geneva, Switzerland
Al-Takriti, Sabawi Ibrahim Hassan, Baghdad, Iraq
Al-Takriti, Watban, Baghdad, Iraq
Hussein, Udai Saddam, Baghdad, Iraq
Jasim, Latif Nusayyif, Baghdad, Iraq

Dated: May 17, 1991.

R. Richard Newcomb,
Director, Office of Foreign Assets Control.

Approved: May 22, 1991.

Nancy L. Worthington,
Acting Assistant Secretary (Enforcement).

[Federal Acquisition Circular 90-5]

Federal Acquisition Regulation; Miscellaneous Amendments

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Final rules and interim rule with request for comment.

SUMMARY: The Civilian Agency Acquisition Council (CAAC) and the Defense Acquisition Regulations Council (DARC) are issuing Federal Acquisition Circular (FAC) 90-5 to amend the Federal Acquisition Regulation (FAR)—

I. To add 6.302-1(c) and revise 10.004(b)(2) to emphasize that the use of "brand name description" specifications in procurements is a restriction on "full and open" competition under the Competition in Contracting Act (CICA).

II. To provide procedural guidance for contracting officers to follow when they receive a bid from a firm on the List of Parties Excluded from Procurement Programs;

III. To amend 20.302(a) to clarify that the use of Labor Surplus Area clauses is not appropriate in acquisitions for petroleum and petroleum products because there is no likelihood of labor surplus area subcontracting under such contracts.

IV. To set forth a new rule on the allowability of postretirement benefits other than pensions (PRB) on U.S. Government contracts.

V. To clarify the definition of Architect-Engineer (A–E) Services;

VI. To require prime contractors to require each first tier subcontractor to disclose, to the prime contractor, whether the subcontractor is or is not debarred, suspended, or proposed for debarment by the Federal Government.

VII. To provide an information item regarding procurement integrity and to perform several technical amendments to the FAR.

DATES: *Effective Date:* July 25, 1991, except for § 52.209-6 (interim rule, Item VI) which is effective June 25, 1991.

Comment Date: Comments on the interim rule (Item VI, FAR case 91-16) should be submitted to the FAR Secretariat at the address shown below on or before August 26, 1991 to be considered in the formulation of a final rule.

ADDRESSES: Interested parties should submit written comments to: General Services Administration, FAR Secretariat (VRS), 18th & F Streets, NW., room 4041, Washington, DC 20405.

Please cite FAC 90-5 and the FAR case number in all correspondence related to this issue.

FOR FURTHER INFORMATION CONTACT: Ms. Beverly Fayson, FAR Secretariat, room 4041, GS Building, Washington, DC 20405, (202) 501-4755. Please cite FAC 90-5.

IV	Postretirement Benefits Other Than Pensions	89-70	89-07	Olson.
V	Definition of Architect-Engineer Services	89-25	86-316	O'Neill.
VI	Disclosure Requirement Relating to Subcontractors	91-16	90-311	Loeb.

A. Background

I. Brand Name Description Procurements (FAR Case 91-24)

The addition of 6.302-1(c) and revision of 10.004(b)(2) result from a recommendation made by the General Accounting Office in two reports on Federal agencies' efforts to implement the Competition in Contracting Act (CICA) (GAO/NSIAD-87-145, August 1987, and GAO/NSIAD-90-104, May 1990). The rule is published as a final rule without publication as a proposed rule because it clarifies existing coverage.

For further information pertaining to this case, contact Mr. Jack O'Neill at (202) 501-3856.

II. Effect of Debarment/Suspension on Bid/Offers (FAR Case 90-27)

The FAR at 9.405 did not provide a uniform approach for handling bids/offers submitted by contractors debarred, suspended, proposed for debarment or declared ineligible from award of Government contracts. The councils believed that a consistent policy should be adopted. This change to the FAR does so. The proposed rule was published in the Federal Register (55 FR 22294) on May 31, 1990.

For further information pertaining to this case, contact Mr. Edward Loeb at (202) 501-4547.

III. Utilization of LSA Concerns (FAR Case 90-44)

The FAR at 20.302 requires inclusion of Labor Surplus Area clauses in solicitations and contracts. The Councils believe that inclusion of those clauses in acquisitions for petroleum and petroleum products is not appropriate since any subcontracting would normally be in the locale of the refinery. The proposed rule was published in the Federal Register (55 FR 38790) on September 20, 1990. There are no substantive differences between the proposed rule and the final rule.

For further information pertaining to this case, contact Ms. Shirley Scott at (202) 501-0168.

IV. Post-Retirement Benefits Other Than Pensions (FAR Case 89-70)

A proposed rule was published in the Federal Register on November 9, 1989 (54 FR 47182), to set forth criteria for the allowability of the costs of postretirement benefits other than pensions (PRB) under Government contracts. The rule results from a new Financial Accounting Standards Board financial reporting requirement that retiree health and other PRB costs be recognized during employees' active working lives. The purpose of the FAR rule is to establish a clear requirement that contractor accruals of PRB costs must be funded to be allowable.

The final rule differs from the proposed rule in that PRB coverage in FAR 31.205-6(m) has been moved to a new paragraph 31.205-6(o) which more clearly defines the benefits covered. PRB calculations must be performed in accordance with principles and practices promulgated by the Actuarial Standards Board (31.205-6(o)(2)). Any PRB costs assigned to the current year, but not funded or liquidated by tax return time, are unallowable in any future period (31.205-6(o)(2)), and increased PRB costs caused by delay in funding beyond 30 days after each quarter of the year to which the costs are assignable are unallowable (31.205-6(o)(3)).

For further information pertaining to this case, contact Mr. Jeremy Olson at (202) 501-3221.

V. Definition of Architect-Engineer Services (FAR Case 89-25)

The Brooks Act (Pub. L. 92-582), passed in 1972, established as Federal Government policy that all requirements for architect-engineer (A–E) services must be publicly announced and that contracts for those services would be negotiated on the basis of demonstrated competence and qualification for the type of professional services required, at fair and reasonable prices. Since passage of the Brooks Act, various change were made, both by legislation and by Comptroller General decisions, that caused inconsistent interpretations of the definition of A–E services. Finally, on November 17, 1988, the Congress enacted the OFPP Act Amendments of 1988 (Pub. L. 100-679), which clarified the definition of A–E services in the Brooks Act. An interim rule was published in the Federal Register (54 FR 13332, March 31, 1989) amending FAR part 36 to implement the OFPP Act Amendments. Public comments were received and considered in drafting this final rule.

For further information pertaining to this case, contact Mr. Jack O'Neill at (202) 501-3856.

VI. Disclosure Requirement Relating to Subcontractors (FAR Case 91-16)

Section 813 of the Fiscal Year 1991 Defense Authorization Act (Pub. L. 101-510) required the Department of Defense to prescribe rules to require each prime contractor to require each subcontractor to whom it awards a contract, in excess of the small purchase limitation, to disclose to the contractor whether the subcontractor is or is not, as of the date of award of the subcontract, debarred or suspended by the Federal Government from Government contracting or subcontracting. The change to 52.209-6 is issued as an interim rule because the statutory requirement was effective upon signing of the Defense Authorization Act, November 5, 1990. The change is being applied Governmentwide in an attempt to keep debarment and suspension rules and procedures uniform to the extent practicable.

For further information pertaining to this case, contact Mr. Edward Loeb at (202) 501-4547.

B. Regulatory Flexibility Act

(FAR Case 91-24)

The amendment to 6.302-1 and revision to 10.004(b)(2) will not have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, because the rule does not constitute a significant FAR revision within the meaning of FAR 1.501. Therefore, the Regulatory Flexibility Act does not apply. However, comments from small entities will be considered in accordance with 5 U.S.C. 601 of the Act. Such comments must be submitted separately and cite FAR Case 91-24 (FAC 90-5) in correspondence.

(FAR Case 90-27)

The amendments to FAR 9.405, 9.405-2, and 14.404-2 will not have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because it merely provides procedural and policy guidance to contracting officers, and imposes no requirements of any kind upon small entities.

(FAR Case 90-44)

The amendments to FAR 20.302 concerning the use of labor surplus area subcontracting clauses in solicitations and contracts for petroleum and petroleum products, and the introductory text of the clause at 52.220-3 are not expected to have a significant impact on a substantial number of small entities because there is no likelihood of labor surplus area subcontracting in such contracts. A Final Regulatory Flexibility Analysis (FRFA) has been prepared and will be provided to the Chief Counsel for Advocacy of the Small Business Administration. A copy of the FRFA may be obtained from the FAR Secretariat. However, public comments were solicited on September 20, 1990 (55 FR 38790). No comments were received that took issue with the Regulatory Flexibility Act statement.

(FAR Case 89-70)

The amendments to the postretirement benefits coverage levies no additional requirements on contractors. The amendments clarify a condition of allowability of costs, namely funding or payment, upon contractors who wish to be reimbursed under Government contracts. Therefore, this final rule will not have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, because most contracts awarded to small businesses are awarded on a competitive, fixed-price basis and the cost principles do not apply.

(FAR Case 89-25)

The amendments to FARs 36.102 and 36.601 implement a statutory amendment that Congress has stated is intended to clarify, rather than expand, the statutory definition of architect-engineer services. Accordingly, the amendments are not expected to have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.* The change imposes no requirements of any kind upon small entities.

(FAR Case 91-16)

The revision of 52.209-6 is not expected to have a significant cost or administrative impact on a substantial number of small entities under the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because it merely requires prime contractors to obtain from subcontractors a disclosure as to whether or not they are debarred, suspended, or proposed for debarment.

C. Paperwork Reduction Act

(FAR Case 91-24)

The amendment to 6.302-1 and revision to 10.004(b)(2) do not impose recordkeeping information collection requirements or collection of information from offerors, contractors, or members of the public which require the approval OMB under 44 U.S.C. 3501, *et seq.*

(FAR Case 90-27)

The amendments to FAR 9.405, 9.405-2, and 14.404-2 do not impose recordkeeping information collection requirements or collection of information from offerors, contractors, or members of the public which require the approval of OMB under 44 U.S.C. 3501, *et seq.*

(FAR Case 90-44)

The amendments to FAR 20.302 and the clause at 52.220-3 do not involve any reporting or recordkeeping requirements which require the approval of OMB under 44 U.S.C. 3501, *et seq.*

VOL 56 ISS 122 JE 25 1991 UMI

(FAR Case 89-78)

The amendments to the PRB coverage do not impose any reporting or recordkeeping requirements which require approval of OMB under 44 U.S.C. 3501, *et seq.*

(FAR Case 89-25)

The changes made to clarify the definition of architect-engineer services do not impose any reporting or recordkeeping requirements which require approval of OMB under 44 U.S.C. 3501, *et seq.*

(FAR Case 91-16)

The revision of 52.209-6 does not impose recordkeeping information collection requirements or collection of information from offerors, contractors, or members of the public which require the approval of OMB under 44 U.S.C. 3501, *et seq.*

D. Determination To Issue an Interim Rule

(FAR Case 91-16)

A determination has been made under the authority of the Secretary of Defense (DOD), the Administrator of General Services (GSA), and the Administrator of the National Aeronautics and Space Administration (NASA) to issue the regulations in FAR case 91-16, item VI of FAC 90-6, as an interim rule. This action is necessary as a result of section 813 of the *Fiscal Year 1991 Defense* Authorization Act (Pub. L. 101-510), which requires DOD to prescribe regulations requiring that DOD contractors must require subcontractors to disclose whether or not they are debarred or suspended from Federal Government contracting or subcontracting. The date of enactment was November 5, 1990. As a matter of policy, the regulation is being applied to all executive agencies. It is determined that compelling reasons exist to promulgate this interim rule without prior opportunity for public comment. However, pursuant to Public Law 98-577 and FAR 1.501, public comments received in response to this interim rule will be considered in formulating the final rule.

List of Subjects in 48 CFR Parts 6, 8, 9, 10, 14, 15, 20, 31, 32, 36, 39, and 52

Government procurement.

Dated: June 17, 1991.

Albert A. Vicchiolla,

Director, Office of Federal Acquisition Policy.

Federal Acquisition Circular

Unless otherwise specified, all Federal Acquisition Regulation (FAR) and other directive material contained in FAC 90-6 is effective July 25, 1991.

Dated: June 11, 1991.

D.S. Parry,

Captain, USN Acting Director of Defense Procurement.

Dated: June 17, 1991.

Richard H. Hopf,

Associate Administrator for Acquisition Policy, GSA.

Dated: June 7, 1991.

Don G. Bush,

Acting Assistant Administrator for Procurement.

Federal Acquisition Circular (FAC) 90-5 amends the Federal Acquisition Regulation as specified below.

I—Brand Name Description Procurements (FAR Case 91-24)

Section 6.302-1 is amended by adding a new paragraph (c) to emphasize that the use of "brand name description" specifications in procurements is a restriction on full and open competition under the Competition in Contracting Act (CICA) and requires a justification and Approval (J&A). Two changes are made to 10.004(b)(2) to clarify existing coverage on "brand name description" procurements. The first adds the term "brand name description" to tie that term, as defined in 10.001, to the restrictions specified in 10.004(b)(2). The second includes a reference to 6.302-1 to clarify that the determination "in accordance with agency procedures" in 10.004(b)(2) is a J&A under 6.302-1.

II—Effect of Debarment/Suspension on Bids/Offers (FAR Case 90-27)

Section 9.405 is amended to provide procedural guidance by adding paragraph (d) for contracting officers to follow when they receive a bid from a firm on the List of Parties Excluded from Procurement Programs. A conforming change to 14.404-2 is also being made.

III—Labor Surplus Area Concerns (FAR Case 90-44)

FAR 20.302 is amended to clarify that the use of Labor Surplus Area clauses is not appropriate in acquisitions for petroleum and petroleum products. FAR 52.220-3, Utilization of Labor Surplus Area Concerns, is amended to delete the prescription for use of the clause.

IV—Postretirement Benefits Other Than Pensions (FAR Case 89-70)

Sections 15.804-8, 31.205-6, 52.216-7 and 52.232-16 are amended and 52.215-39 is added to establish funding as a required condition of cost allowability for accruals of postretirement benefits other than pensions (PRB). The final rule also provides for the Government to recover an equitable share of any previously reimbursed PRB costs which revert or inure to the contractor because of a plan change or termination.

V—Definition of Architect-Engineer Services (FAR Case 89-25)

FAR § 36.102 is amended and subpart 36.6 is revised to clarify which services are to be procured using Brooks Act procedures.

VI—Disclosure Requirement Relating to Subcontractors (FAR Case 91-16)

The revision of 52.209-6 is issued as an interim rule because the statutory requirement was effective upon signing of the Defense Authorization Act, November 5, 1990, and is being applied Governmentwide in an attempt to keep debarment and suspension rules and procedures uniform to the extent practicable.

VII—Technical Amendments

Procurement Integrity

A number of otherwise successful bidders have been rejected as nonresponsive for failing to sign the Procurement Integrity certifications in the clauses at 52.203-8 and 52.203-9. The GAO has upheld these rejections. This FAC incorporates a technical amendment which adds lines to the blank spaces at the end of those certification forms to emphasize that a signature is required to be placed at the end of the certification statements.

Miscellaneous Amendments

Technical amendments have also been made to FAR §§ 6.405-1, 9.405-2, 31.205-10, 32.810, 32.813, 32.814-1, 32.910, 30.002, 52.219-19, 52.219-21, and 52.220-1 to update references and amounts, to replace inaccurate terms, and to add an appendix A to part 30 of the FAR.

Editorial Note

In the looseleaf edition, part III of the appendix to part 30 was inadvertently placed at the end of part 30 preceding parts I and II of the appendix. The FAR Secretariat will issue corrected pages at a later date.

Therefore, 48 CFR parts 6, 8, 9, 10, 14, 15, 20, 31, 32, 36, 39, and 52 are amended as set forth below:

1. The authority citation for 48 CFR parts 6, 8, 9, 10, 14, 15, 20, 31, 32, 36, 39 and 52 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

PART 6—COMPETITION REQUIREMENTS

2. Section 6.302-1 is amended by redesignating existing paragraph (c) as (d) and adding new paragraph (c) to read as follows:

6.302-1 Only one responsible source and no other supplies or services will satisfy agency requirements.

* * * * *

(c) *Application for brand name descriptions.* An acquisition that uses a brand name description or other purchase description to specify a particular brand name, product, or feature of a product, peculiar to one manufacturer does not provide for full and open competition regardless of the number of sources solicited. It shall be justified and approved in accordance with FAR 6.303 and 6.304. The justification should indicate that the use of such descriptions in the acquisition is essential to the Government's requirements, thereby precluding consideration of a product manufactured by another company. (Brand-name or equal descriptions, and other purchase descriptions that permit prospective contractors to offer products other than those specifically referenced by brand name, provide for full and open competition and do not require justifications and approvals to support their use.)

* * * * *

PART 8—REQUIRED SOURCES OF SUPPLIES AND SERVICES

8.405-1 [Amended]

3. Section 8.405-1 is amended in the fourth sentence of paragraph (a) by correcting the reference "13.106(c)" to read "13.106".

PART 9—CONTRACTOR QUALIFICATIONS

4. Section 9.405 is amended by adding paragraph (d) to read as follows:

9.405 Effect of listing.

* * * * *

(d) (1) After the opening of bids or receipt of proposals, the contracting officer shall review the List of Parties Excluded from Procurement Programs.

(2) Bids received from any listed contractor in response to an invitation for bids shall be entered on the abstract of bids, and rejected unless the acquiring agency's head or designee determines in writing that there is a compelling reason to consider the bid.

(3) Proposals, quotations, or offers received from any listed contractor shall not be evaluated for award or included in the competitive range, nor shall discussions be conducted with a listed offeror during a period of ineligibility, unless the acquiring agency's head or designee determines, in writing, that there is a compelling reason to do so. If the period of ineligibility expires or is terminated prior to award, the contracting officer may, but is not required to, consider such proposals, quotations, or offers.

(4) Immediately prior to award, the contracting officer shall again review the List to ensure that no award is made to a listed contractor.

5. Section 9.405-2 is amended by revising the second sentence of the introductory text of paragraph (b) to read as follows:

9.405-2 Restrictions on subcontracting.

* * * * *

(b) * * * Contractors shall not enter into any subcontract in excess of the small purchase limitation at 13.000 with a contractor that has been debarred, suspended, or proposed for debarment unless there is a compelling reason to do so. * * *

* * * * *

PART 10—SPECIFICATIONS, STANDARDS, AND OTHER PURCHASE DESCRIPTIONS

6. Section 10.004 is amended by revising paragraph (b)(2) to read as follows:

10.004 Selecting specifications or descriptions for use.

* * * * *

(b) * * *

(2) Purchase descriptions shall not be written so as to specify a particular brand name, product, or feature of a product, peculiar to one manufacturer, thereby precluding consideration of a product manufactured by another company, unless—

(i) The particular brand name, product, or feature is essential to the Government's requirements, and that other companies' similar products, or products lacking the particular feature, would not meet the minimum requirements for the item; and

(ii) The authority to contract without providing for full and open competition is supported by the required justifications and approvals (see 6.302-1).

* * * * *

PART 14—SEALED BIDDING

7. Section 14.404-2 is amended by revising paragraph (h) to read as follows:

14.404-2 Rejection of individual bids.

* * * * *

(h) Bids received from any person or concern that is suspended, debarred, proposed for debarment, or declared ineligible as of the bid opening date shall be rejected unless a compelling reason determination is made (see subpart 9.4).

* * * * *

PART 15—CONTRACTING BY NEGOTIATION

8. Section 15.804-8 is amended by adding paragraph (f) to read as follows:

15.804-8 Contract clauses.

* * * * *

(f) *Postretirement benefit funds.* The contracting officer shall insert the clause at 52.215-39, Reversion or Adjustment of Plans for Postretirement Benefits Other Than Pensions (PRB), in solicitations and contracts for which it is anticipated that certified cost or pricing data will be required or for which any preaward or postaward cost determinations will be subject to subpart 32.2.

PART 20—LABOR SURPLUS AREA CONCERNS

9. Section 20.302 is amended by removing the word "and" from the end of paragraph (a)(1); removing the period from the end of paragraph (a)(2) and inserting the punctuation and word "; and" in its place; and adding paragraph (a)(3) to read as follows:

20.302 Contract clauses.

(a) * * *

(3) Contracts with the petroleum and petroleum products industry.

* * * * *

PART 31—CONTRACT COST PRINCIPLES AND PROCEDURES

10. Section 31.205-6 is amended by removing from the third sentence of paragraph (m)(1) the word "elsewhere" and inserting in its place "otherwise"; and adding paragraph (o) to read as follows:

31.205-6 Compensation for personal services.

* * * * *

(o) *Postretirement benefits other than pensions (PRB).* (1) PRB covers all benefits, other than cash benefits and life insurance benefits paid by pension plans, provided to employees, their beneficiaries, and covered dependents during the period following the employees' retirement. Benefits encompassed include, but are not limited to, postretirement health care;

VOL 56 ISS 122 JE 25 1991 UMI

life insurance provided outside a pension plan; and other welfare benefits such as tuition assistance, day care, legal services, and housing subsidies provided after retirement.

(2) To be allowable, PRB costs must be reasonable and incurred pursuant to law, employer-employee agreement, or an established policy of the contractor. In addition, to be allowable in the current year, PRB costs must be paid either to (i) an insurer, provider, or other recipient as current year benefits or premiums, or (ii) an insurer or trustee to establish and maintain a fund or reserve for the sole purpose of providing PRB to retirees. The costs in paragraph (o)(2)(ii) of this subsection must also be calculated in accordance with generally accepted actuarial principles and practices as promulgated by the Actuarial Standards Board, and be funded by the time set for filing the Federal income tax return or any extension thereof. PRB costs assigned to the current year, but not funded or otherwise liquidated by the tax return time, shall not be allowable in any subsequent year.

(3) Increased PRB costs caused by delay in funding beyond 30 days after each quarter of the year to which they are assignable are unallowable.

(4) The Government shall receive an equitable share of any amount of previously funded PRB costs which revert or inure to the contractor. Such equitable share shall reflect the Government's previous participation in PRB costs through those contracts for which certified cost or pricing data were required or which were subject to subpart 31.2.

31.205-10 [Amended]

11. Section 31.205-10 is amended in paragraph (a)(1)(ii)(C) by removing the reference "50 U.S.C. App. 1215(b)(2)" and inserting in its place "Public Law 92-41".

PART 32—CONTRACT FINANCING

32.610, 32.613, and 32.614-1 [Amended]

12. The FAR is amended by removing the reference "50 U.S.C. App. 1215(b)(2)" and inserting "Public Law 92-41" in its place in the following sections:

(a) Section 32.610, paragraph (b)(2);

(b) Section 32.613, paragraph (l); and

(c) Section 32.614-1, paragraph (c).

32.616 [Amended]

13. Section 32.616 is amended in the first sentence by removing the amount "$20,000" and inserting in its place "$100,000".

PART 36—CONSTRUCTION AND ARCHITECT-ENGINEER CONTRACTS

14. Section 36.102 is amended by revising the definition of "Architect-Engineer Services" to read as follows:

36.102 Definitions.

Architect-engineer services, as defined in 40 U.S.C. 541, means:

(1) Professional services of an architectural or engineering nature, as defined by State law, if applicable, which are required to be performed or approved by a person licensed, registered, or certified to provide such services;

(2) Professional services of an architectural or engineering nature performed by contract that are associated with research, planning, development, design, construction, alteration, or repair of real property; and

(3) Such other professional services of an architectural or engineering nature, or incidental services, which members of the architectural and engineering professions (and individuals in their employ) may logically or justifiably perform, including studies, investigations, surveying and mapping, tests, evaluations, consultations, comprehensive planning, program management, conceptual designs, plans and specifications, value engineering, construction phase services, soils engineering, drawing reviews, preparation of operating and maintenance manuals, and other related services.

* * * * *

15. The table of contents under subpart 36.6 is amended to add the following entries following section 36.601:

Subpart 36.6—Architect-Engineer Services

Sec.
36.601-1 Public announcement.
36.601-2 Competition.
36.601-3 Applicable contracting procedures.
36.601-4 Implementation.

36.601 [Amended]

16a. Section 36.601 is amended by removing the text.

16b. Sections 36.601-1, 36.601-2, 36.601-3, and 36.601-4 are added to read as follows:

36.601-1 Public announcement.

The Government shall publicly announce all requirements for architect-engineer services and negotiate contracts for these services based on the demonstrated competence and qualifications of prospective contractors to perform the services at fair and reasonable prices. (See Pub. L. 92-582, as amended; 40 U.S.C. 541-544.)

36.601-2 Competition.

Acquisition of architect-engineer services in accordance with the procedures in this subpart will constitute a competitive procedure. (See 6.102(d)(1).)

36.601-3 Applicable contracting procedures.

(a) Sources for contracts for architect-engineer services shall be selected in accordance with the procedures in this subpart rather than the solicitation or source selection procedures prescribed in parts 13, 14, and 15 of this regulation.

(b) When the contract statement of work includes both architect-engineer services and other services, the contracting officer shall follow the procedures in this subpart if the statement of work, substantially or to a dominant extent, specifies performance or approval by a registered or licensed architect or engineer. If the statement of work does not specify such performance or approval, the contracting officer shall follow the procedures in parts 13, 14, or 15.

(c) Other than "incidental services" as specified in the definition of architect-engineer services in Section 36.102 and in Section 36.601-4(a)(3), services that do not require performance by a registered or licensed architect or engineer, notwithstanding the fact that architect-engineers also may perform those services, should be acquired pursuant to parts 13, 14, and 15.

36.601-4 Implementation.

(a) Contracting officers should consider the following services to be "architect-engineer services" subject to the procedures of this subpart:

(1) Professional services of an architectural or engineering nature, as defined by applicable State law, which the State law requires to be performed or approved by a registered architect or engineer.

(2) Professional services of an architectural or engineering nature associated with design or construction of real property.

(3) Other professional services of an architectural or engineering nature or services incidental thereto (including studies, investigations, surveying and mapping, tests, evaluations, consultations, comprehensive planning, program management, conceptual designs, plans and specifications, value engineering, construction phase services, soils engineering, drawing reviews, preparation of operating and maintenance manuals and other related services) that logically or justifiably require performance by registered architects or engineers or their employees.

(4) Professional surveying and mapping services of an architectural or engineering nature. Surveying is considered to be an architectural and engineering service and shall be procured pursuant to § 36.601 from registered surveyors or architects and engineers. Mapping associated with the research, planning, development, design, construction, or alteration of real property is considered to be an architectural and engineering service and is to be procured pursuant to § 36.601. However, mapping services such as those typically performed by the Defense Mapping Agency that are not connected to traditionally understood or accepted architectural and engineering activities, are not incidental to such architectural and engineering activities or have not in themselves traditionally been considered architectural and engineering services shall be procured pursuant to provisions in parts 13, 14, and 15.

(b) Contracting officers may award contracts for architect-engineer services to any firm permitted by law to practice the professions of architecture or engineering.

PART 39—ACQUISITION OF INFORMATION RESOURCES

17a. The "Note" appearing at the beginning of part 39 is removed.

17b. Section 39.002 is amended by designating the existing paragraph as (a); removing from the last sentence the reference "201-23" and inserting in its place "201-39"; and adding paragraph (b) to read as follows:

39.002 Delegations of procurement authority.

* * * * *

(b) The FIRMR part 201-39 is reprinted as FAR appendix A to part 39 as an aid to contracting officials operating under a delegation of procurement authority from GSA. Whenever a change is made to FIRMR part 39, that change will be reflected in FAR appendix A to part 39.

17c. A new appendix A is added to FAR part 39 to read as follows:

Editorial Note: Appendix A to part 39 is a reprint of FIRMR part 201-39 appearing in title 41 of the Code of Federal Regulations.

Appendix A to Part 39

Subchapter D—Acquisition of Federal Information Processing (FIP) Resources by Contracting

Subpart 201-39.53—[Reserved]

Authority: 40 U.S.C. 486(c) and 751(f).

§ 201-39.000 Scope of part.

This part sets forth the unique rules that apply Government-wide to the acquisition of Federal information processing (FIP) resources by contracting.

§ 201-39.001 General.

(a) In addition to this part 201-39, contracting officers should review and be familiar with the policies and procedures contained in the complete FIRMR.

(b) To assist Federal agencies in preparing solicitations for FIP resources, the General Services Administration (GSA) makes available standard solicitations and other guidance. Federal agencies can obtain copies of these materials by contacting: General Services Administration, Regulations Branch (KMPR), 18th and F Streets, NW., Washington, DC 20405.

Subpart 201-39.1—Federal Information Resources Management Regulation (FIRMR) System

§ 201-39.100 Scope of subpart.

This subpart sets forth basic policies and general information pertaining to part 201-39 of the Federal Information Resources Management Regulation (FIRMR).

§ 201-39.101 Purpose, authority, applicability, and issuance.

§ 201-39.101-1 Purpose.

This part 201-39 sets forth FIRMR contracting policies and procedures in a single part organized for consistency with the Federal Acquisition Regulation (FAR). This part contains only those contracting policies and procedures that are unique to FIP resources.

§ 201-39.101-2 Authority.

This part 201-39 is prepared, issued, and maintained by the Administrator of General Services under the Federal Property and Administrative Services Act of 1949, as amended.

§ 201-39.101-3 Applicability.

(a) *Policies.* The FIRMR applies to—

(1) The acquisition, management, and use of FIP resources by Federal agencies.

(2) Any Federal agency solicitation or contract when either paragraph (a)(2)(i), (a)(2)(ii), or (a)(2)(iii) applies:

(i) The solicitation or contract requires the delivery of FIP resources for use by a Federal agency or users designated by the agency.

(ii) The solicitation or contract explicitly requires the use by the contractor of FIP resources that are not incidental to the performance of the contract. FIP resources acquired by a contractor are incidental to the performance of a contract when: (A) None of the principal tasks of the contract depend directly on the use of the FIP resources; or

(B) The requirements of the contract do not have the effect of substantially restricting the contractor's discretion in the acquisition and management of FIP resources, whether the use of FIP resources is or is not specifically stated in the contract.

(iii) The solicitation or contract requires the performance of a service or the furnishing of a product that is performed or produced making significant use of FIP resources that are not incidental to the performance of the contract. Significant use of FIP resources means:

(A) The service or product of the contract could not reasonably be produced or performed without the use of FIP resources; and

(B) The dollar value of FIP resources expended by the contractor to perform the service or furnish the product is expected to exceed $500,000 or 20 percent of the estimated cost of the contract, whichever amount is lower.

(3) The creation, maintenance, and use of records by Federal agencies.

(b) *Exceptions.* (1) The FIRMR does not apply to the procurement of FIP resources—

(i) By the Central Intelligence Agency (CIA).

(ii) By the Department of Defense when the function, operation, or use of such resources—

(A) Involves intelligence activities, cryptologic activities related to national security, the command and control of military forces, or equipment that is an integral part of a weapon or weapons system; or

(B) Is critical to the direct fulfillment of military or intelligence missions, provided that this exclusion shall not include FIP resources used for routine administrative and business applications such as payroll, finance, logistics, and personnel management.

(2) The FIRMR does not apply to radar, sonar, radio, or television equipment, except that the FIRMR is used by GSA to implement Federal Telecommunications Standards for radio equipment.

(3) When both FIP and other resources are being acquired under the same solicitation or contract and the FIRMR applies to the solicitation or contract, the FIRMR applies only to the FIP resources.

(4) While the FIRMR may require an agency to include in Federal solicitations and contracts provisions and clauses that control the contractor's acquisition of FIP resources, the FIRMR does not apply to FIP resources acquired by a Federal contractor that are incidental to the performance of a contract.

(5) The FIRMR does not apply to the acquisition, management, and use of products containing embedded FIP equipment when:

(i) The embedded FIP equipment would need to be substantially modified to be used other than as an integral part of the product; or (ii) The dollar value of the embedded FIP equipment is less than $500,000 or less than 20 percent of the value of the product, whichever amount is lower. Embedded FIP equipment is FIP equipment that is an integral part of the product, where the principal function of the product is not the "automatic acquisition, storage, manipulation, management, movement, control, display, switching, interchange, transmission, or reception of data or information."

(c) *Contract clause.* The contracting officer should consider inserting a clause in solicitations and contracts substantially the same as the clause at § 201-39.5202-1, FIRMR Applicability, when the agency determines that part 201-39 does not apply to an acquisition for FIP resources.

§ 201-39.101-4 [Reserved]

§ 201-39.101-5 Arrangement of part.

For consistency with the FAR, part 201-39 is divided into 53 subparts consisting of sections and subsections. In the same manner in which each FAR part deals with a separate aspect of acquisition, the corresponding subpart of part 201-39 deals with that aspect of acquisition as it relates to FIP resources. For example, since FAR part 6 deals with general competition requirements, FIRMR subpart 201-39.6 sets forth unique policies and procedures applicable to competition requirements for FIP resources. If there is no need to supplement a particular FAR part, the

corresponding subpart of part 201-39 is reserved.

§ 201-39.101-6 Copies.

(a) Copies of the complete FIRMR in looseleaf or annual bound versions may be purchased from: Superintendent of Documents, Government Printing Office (GPO), Washington, DC 20402.

(b) Contracting officers should contact the GPO, their agency liaison officer, or GSA (KMPR) for ordering information.

§ 201-39.102 Relationship of acquisition regulations.

(a) This part 201-39 sets forth Governmentwide policies and procedures unique to the acquisition of FIP resources by contracting. It relies on the FAR for general policies and procedures to be used in acquiring these resources. The policies and procedures of this part 201-39 are in addition to, not in lieu of, the FAR policies and procedures, except when the FIRMR specifically requires its policies and procedures, and not those of the FAR, to be followed.

(b) Notwithstanding the fact that the FAR is for the use of executive agencies in the acquisition of supplies and services, Federal agencies not otherwise subject to the FAR shall use the FAR in conjunction with the FIRMR when acquiring FIP resources.

§ 201-39.103 [Reserved]

§ 201-39.104 Deviations.

§ 201-39.104-1 Deviations from the FIRMR.

(a) *Policy.* Unless precluded by law, executive order, or regulation, GSA may grant deviations, as defined in subpart 201-39.2, from part 201-39 when necessary to meet the specific needs and requirements of each agency. Class deviations (affecting more than one contract action) and individual deviations (affecting only one contract action) may be authorized by—

(1) The Commissioner, Information Resources Management Service, or

(2) The officials designated by the Commissioner for that purpose.

(b) *Procedures.* (1) The agency head (or a designee) shall prescribe procedures for processing deviation requests.

(2) Each request for deviation shall explain the nature of and the reasons for the deviation.

(3) Agencies shall forward requests for deviations to: General Services Administration, Policy and Regulations Division (KMP), 18th & F Streets, NW., Washington, DC 20405.

§ 201-39.104-2 Deviations from the FAR.

Deviations from the FAR shall be accomplished in accordance with FAR subpart 1.4.

§ 201-39.105 [Reserved]

§ 201-39.106 Contracting authority and responsibilities.

§ 201-39.106-1 General.

(a) Notwithstanding FAR 1.601, authority and responsibility to contract for FIP resources is vested in the Administrator of General Services unless an exception in 40 U.S.C. 759(a)(3) applies. The Administrator of General Services, or a designee, authorizes agencies to contract for FIP resources by granting a delegation of procurement authority (DPA) to the agency designated senior official (DSO) when GSA determines that the DSO is sufficiently independent of program responsibility and has sufficient experience, resources, and ability to fairly and effectively carry out procurements under GSA's authority. Such delegations are granted by one of the following methods:

(1) The regulatory delegation of GSA's exclusive procurement authority which allows Federal agencies to contract for certain types of FIP resources up to specified dollar amounts without obtaining a specific DPA;

(2) A specific agency delegation of GSA's exclusive procurement authority whereby the GSA Commissioner for Information Resources Management or a designee may authorize changes in the regulatory DPA for individual Federal agencies (or components thereof) on the basis of their ability to acquire, manage, and use FIP resources in accordance with FIRMR policies and procedures; or

(3) A specific acquisition delegation of GSA's exclusive procurement authority provided to the agency as a result of the submission of an agency procurement request (APR) to GSA when acquisitions are not covered by either the regulatory or a specific agency DPA.

(b) The agency's DSO may redelegate GSA's exclusive authorities for FIP resources to qualified officials. However, such redelegation does not relieve the DSO of the responsibilities under 44 U.S.C. 3506 for the conduct of and accountability for acquisitions of FIP resources made under a DPA from GSA.

(c) Only a contracting officer may enter into and sign a contract on behalf of the Government. A DPA from GSA does not make the DSO a contracting officer. Contracting officers are appointed under procedures established by agency heads under FAR subpart 1.6.

(d) Additional policies and procedures related to delegations of procurement authority are addressed in part 201-30.

§ 201-39.106-2 Policy.

Before contracting for FIP resources, the contracting officer shall ensure that the agency's DSO has redelegated GSA's procurement authority to the contracting officer.

§ 201-39.106-3 Procedures.

The contracting officer shall consider this § 201-39.106, agency directives, and written instructions to the contracting officer issued under FAR 1.603-1 to ensure that the contracting officer is authorized to make the award.

§ 201-39.106-4 Contract clause.

(a) All solicitations and contracts for FIP resources subject to the FIRMR shall contain a clause identifying whether the contracting action is being conducted under the regulatory DPA, a specific agency DPA, or a specific acquisition DPA.

(b) If the contracting action is being conducted under a specific agency or specific acquisition DPA, the contract clause shall also include the GSA case number of the specific DPA.

(c) Accordingly, the contracting officer shall—

(1) Insert a clause substantially the same as the clause at § 201-39.5202-3, Procurement Authority, in each solicitation and contract for FIP resources; and

(2) Promptly issue an amendment to the solicitation modifying this clause if any of the facts set forth in it change prior to contract award.

Subpart 201-39.2—Definitions of Words and Terms

§ 201-39.200 Scope of subpart.

This subpart defines words and terms used in part 201-39.

§ 201-39.201 Definitions.

Designated senior official (DSO) means—

(a) The senior official designated by executive agencies pursuant to the Paperwork Reduction Act to be responsible for carrying out the agency's IRM functions (see 44 U.S.C. 3506); or

(b) The senior IRM official designated by the agency head for Federal agencies not subject to the Paperwork Reduction Act to be responsible for acquisitions of FIP resources made pursuant to a DPA.

Deviation means any one or a combination of the following:

(a) The issuance or use of a policy, procedure, practice, solicitation provision, contract clause, or method pertaining to the acquisition, management or use of Federal information processing resources that is inconsistent with the FIRMR.

(b) The omission or modification of any policy, procedure, practice, solicitation provision or contract clause required by the FIRMR.

(c) The authorization of lesser or greater limitations on the delegation, use, or application of any policy, procedure, solicitation provision, or contract clause prescribed by the FIRMR, except that this does not preclude an agency from setting delegation thresholds at more restrictive levels than those established by the FIRMR.

Federal information processing (FIP) resources means automatic data processing equipment (ADPE) as defined in Public Law 99-500 (40 U.S.C. 759(a)(2)), and set out in paragraphs (a) and (b) of this definition.

(a) Any equipment or interconnected system or subsystems of equipment that is used in the automatic acquisition, storage, manipulation, management, movement, control, display, switching, interchange,

VOL 56 ISS 122 JE 25 1991 UMI

transmission, or reception, of data or information—

(1) By a Federal agency, or

(2) Under a contract with a Federal agency which—

(i) Requires the use of such equipment, or

(ii) Requires the performance of a service or the furnishing of a product which is performed or produced making significant use of such equipment.

(b) Such term includes—

(1) Computers;

(2) Ancillary equipment;

(3) Software, firmware, and similar procedures;

(4) Services, including support services; and

(5) Related resources as defined by regulations issued by the Administrator for General Services.

(c) The term, FIP resources, includes FIP equipment, software, services, support services, maintenance, related supplies, and systems. These terms are limited by paragraphs (a) and (b) of the definition of FIP resources and are defined as follows:

(d) *FIP equipment* means any equipment or interconnected system or subsystems of equipment used in the automatic acquisition, storage, manipulation, management, movement, control, display, switching, interchange, transmission, or reception of data or information.

(e) *FIP maintenance* means those examination, testing, repair, or part replacement functions performed on FIP equipment or software.

(f) *FIP related supplies* means any consumable item designed specifically for use with FIP equipment, software, services, or support services.

(g) *FIP services* means any service, other than FIP support services, performed or furnished by using FIP equipment or software.

(h) *FIP software* means any software, including firmware, specifically designed to make use of and extend the capabilities of FIP equipment.

(i) *FIP support services* means any commercial nonpersonal services, including FIP maintenance, used in support of FIP equipment, software or services.

(j) *FIP system* means any organized combination of FIP equipment, software, services, support services, or related supplies.

Lowest overall cost means the least expenditure of funds over the system life, price and other factors considered, including, but not necessarily limited to—

(a) Prices for the FIP resources;

(b) The present value adjustment, if used; and

(c) The identifiable and quantifiable costs—

(1) Directly related to the acquisition and use of the FIP resources;

(2) Of conducting the contract action; and

(3) Of other administrative efforts directly related to the acquisition process.

Most advantageous alternative means the alternative that provides the greatest value to the Government over the system life in terms of price or cost, quality, performance, and any other relevant factors.

Outdated FIP equipment means any FIP equipment over eight years old, based on the initial commercial installation date of that model of equipment, and that is no longer in current production.

Radar equipment means any radio detection device that provides information on range, azimuth, or elevation of objects.

Radio equipment means any equipment or interconnected system or subsystem of equipment (both transmission and reception) that is used to communicate over a distance by modulating and radiating electromagnetic waves in space without artificial guide. This does not include such items as microwave, satellite, or cellular telephone equipment.

Sonar equipment means an apparatus that detects the presence and location of a submerged object by means of sonic, subsonic, or supersonic waves reflected back to it from the object.

Specific make and model specification means a description of the Government's requirement for FIP resources that is so restrictive that only a particular manufacturer's products will satisfy the Government's needs, regardless of the number of suppliers that may be able to furnish that manufacturer's products.

System life means a projection of the time period that begins with the installation of the FIP resource and ends when the agency's need for that resource has terminated.

Television equipment means any equipment (both transmission and reception) used for the conversion of transient visual images into electrical signals that can be transmitted by radio or wire to distant receivers where the signals can be reconverted to the original visual images. This does not include such items as monitors for computers or computer terminals or video conferencing equipment.

Subparts 201-39.3 and 201-39.4—[Reserved]

Subpart 201-39.5—Publicizing Contract Actions

§ 201-39.500 Scope of subpart.

This subpart prescribes the unique policies and procedures for publicizing contract actions when acquiring FIP resources using the GSA nonmandatory schedule contracts.

§ 201-39.501 Synopses of proposed contract actions.

§ 201-39.501-1 Policies.

(a) The contracting officer shall publicize the intent to place an order against a GSA nonmandatory contract by following the procedures of § 201-39.501-3 and FAR subpart 5.2.

(b) The contracting officer shall not use the exception to synopsizing set forth at FAR 5.202(a)(11) when using GSA nonmandatory schedule contracts to acquire FIP resources.

§ 201-39.501-2 Exceptions.

(a) The contracting officer need not publicize the intent to place an order against a GSA nonmandatory contract when—

(1) The total value of the order is $50,000 or less; or

(2) The order is for FIP resources that were previously specifically synopsized on a system life basis in a Commerce Business Daily (CBD) notice of intent in accordance with § 201-39.501-3 and FAR subpart 5.2.

(b) The contracting officer is not required to publish a second notice of a proposed contract action in accordance with FAR 5.203(a) when—

(1) A solicitation is being issued in accordance with § 201-39.502-3(b)(2)(iii); and

(2) The requirement was the subject of a previous CBD synopsis of intent accomplished in accordance with the procedures set forth in § 201-39.501-3 and FAR subpart 5.2.

§ 201-39.501-3 Procedures.

The contracting officer shall use the following procedures when publicizing the intent to place an order against a GSA nonmandatory schedule contract:

(a) Before placing an order for FIP resources against a GSA nonmandatory schedule contract, the contracting officer shall furnish a synopsis to the CBD in accordance with FAR 5.207 and this § 201-39.501.

(b) Notwithstanding FAR 5.203(c), the synopsis shall be published in the CBD at least 15 calendar days before placing the order. In calculating the 15 calendar days for synopsizing, the first day shall be the actual date the synopsis appears in the CBD.

(c) Format Item 17 (DESCRIPTION) of the standard synopsis format in FAR 5.207 shall contain a description of the intended contract action to the extent necessary to obtain information to permit the analysis required by § 201-39.803. As a minimum, Format Item 17 shall contain the following information:

(1) An identification of the specific nonmandatory schedule contract intended to be used.

(2) A description of the resources to be ordered, including, as applicable—

(i) The make and model of any FIP equipment to be ordered or maintained;

(ii) The name, functional description, and operating environment of any FIP software to be ordered;

(iii) The quantities, dates required, and period of performance;

(iv) The system life; and

(v) The type of support to be ordered.

(3) A request for pricing data.

(4) The following statement: "All responses from responsible sources will be fully considered. As a result of analyzing responses to this synopsis of intent, the contracting officer may determine that a solicitation will be issued. If a solicitation is issued, no additional synopsis will be published. Any such solicitation will be issued to the intended schedule vendor and all firms that respond to this synopsis of intent or otherwise request a copy of the solicitation."

Subpart 201-39.6—Competition Requirements

§ 201-39.600 Scope of subpart.

This subpart prescribes policies and procedures applicable to—

(a) The acquisition of FIP resources using specific make and model specifications; and

(b) The use of follow-on contracts to perpetuate outdated FIP equipment.

§ 201-39.601 Specific make and model specifications.

§ 201-39.601-1 Policy.

An acquisition that uses a specific make and model specification does not provide for full and open competition and must be justified and approved in accordance with FAR 6.303 and 6.304.

§ 201-39.601-2 Exception.

Subsection 201-39.601-1 does not apply when an order for FIP resources is placed against a GSA nonmandatory schedule contract and—

(a) The statement of work or requirements documentation prepared by the technical and requirements personnel describes the requirements with other than a specific make and model specification, notwithstanding the fact that when the synopsis appears in the Commerce Business Daily (CBD) and the order is placed, a specific make and model is cited; and

(b) The procedures of § 201-39.603 regarding use of GSA nonmandatory schedule contracts are followed.

§ 201-39.601-3 Authority.

When the FIP resources required to meet the needs of an agency can be satisfied only through the use of a specific make and model specification, the statutory authority to be cited in FAR 6.303-2(a)(4), in lieu of any statutory authority cited in accordance with FAR 6.302, is: 40 U.S.C. 759(g), as amended.

§ 201-39.602 Outdated FIP equipment.

§ 201-39.602-1 Policy.

The justification requirements of FAR 6.302-1(a)(2)(ii) shall not be used to perpetuate any contract for outdated FIP equipment or for FIP equipment to be used with FIP software that requires general redesign to satisfy mission needs.

§ 201-39.602-2 Exception.

An exception to § 201-39.602-1 may be invoked if the agency's DSO determines that such action will be in the Government's best interest.

Subpart 201-39.7—[Reserved]

Subpart 201-39.8—Required Sources of Supplies and Services

§ 201-39.800 Scope of subpart.

This subpart prescribes the policies and procedures applicable to the acquisition of FIP resources using GSA mandatory and nonmandatory sources of supply.

§ 201-39.801 Ordering FIP resources from Federal Supply Schedules.

§ 201-39.801-1 General.

GSA directs and manages both the Federal Supply Schedules program and the GSA nonmandatory schedule contracts for FIP resources. While most FIP resources available under these programs are covered by the GSA nonmandatory schedule contracts for FIP resources, the Federal Supply Schedules also contain some resources that fall within the definition of FIP resources. Use of the Federal Supply Schedules program is covered by FAR 8.4 and use of the GSA nonmandatory schedule contracts for FIP resources is covered by this subpart 201-39.8.

§ 201-39.801-2 Policy.

The procedures of FAR 8.4 shall be followed when an order for FIP resources is placed against a GSA Federal Supply Schedule.

§ 201-39.802 Purchase of telephones and services (POTS) contracts.

§ 201-39.802-1 General.

(a) GSA has established POTS contracts to provide telecommunications supplies and services, including purchase, installation, maintenance, repair, deinstallation, and relocation of both contractor-provided and Government-owned telephone equipment, at locations throughout the country.

(b) Use of the POTS contracts is mandatory for supplies and services within the scope of the POTS contract at some locations (buildings or building complexes) where GSA operates or manages the telecommunications system or service.

(c) Federal agencies may obtain information and assistance concerning the use of POTS contracts from: General Services Administration, Technical Contract Management Division (KVT), 18th and F Streets, NW., Washington, DC 20405.

§ 201-39.802-2 Policies.

(a) Federal agencies at locations where a POTS contract is mandatory shall use the POTS contract to acquire supplies and services that are within the scope of the contract.

(b) Federal agencies at locations where POTS contracts are not mandatory may use POTS contracts to satisfy requirements when—

(1) The requirements are within the scope of the POTS contract; and

(2) The contracting officer determines that placing an order under the POTS contract is the most advanatageous alternative.

(c) Use of the POTS contracts is a competitive procedure when—

(1) It results in the most advanatageous alternative to meet the needs of the Government; and

(2) The procedures of this section are followed.

§ 201-39.802-3 Procedures.

(a) The contracting officer shall determine whether mandatory use of the POTS contracts applies by contacting GSA at the address shown in §201-39.802-1(c).

(b) The contracting officer's determination required by § 201-39.802-2(b) shall, as a minimum, be supported by an analysis of prices or an examination of the market. The GSA nonmandatory schedule contracts for FIP resources should be included in this analysis process.

(c) The requirements of subpart 201-39.5 and FAR part 5 do not apply when an order is issued under a POTS contract and the procedures of this section are followed.

§ 201-39.803 GSA nonmandatory schedule contracts for FIP resources.

§ 201-39.803-1 General.

(a) GSA nonmandatory schedule contracts for FIP resources, managed by GSA's Information Resources Management Service, provide Federal agencies with a simplified process for obtaining these resources. GSA awards such contracts to many different vendors and each contract establishes terms, conditions, and prices for stated periods of time. These contracts are not part of the Federal Supply Service (FSS) Schedule program covered in FAR support 8.4 and they are not mandatory sources of supply.

(b) Agencies should use GSA nonmandatory schedule contracts for FIP resources when the contracting officer determines that placing an order under a GSA nonmandatory schedule contract would result in a lower overall cost than other contracting methods, such as issuing a solicitation, using small purchase procedures, using a nonmandatory agency contract, or using other nonmandatory GSA programs.

§ 201-39.803-2 Policy.

Use of GSA nonmandatory schedule contracts is a competitive procedure when—

(a) It results in the lowest overall cost alternative to meet the needs of the Government; and

(b) The procedures of this section are followed.

§ 201-39.803-3 Procedures.

(a) Prior to selecting a GSA nonmandatory schedule contract and placing an order or, if applicable, publishing a synopsis of intent to place an order, the agency shall—

(1) Justify any restrictive requirement (e.g., an "all or none" requirement or a requirement for "only new" equipment); and

(2) Consider the offerings of a reasonable number of nonmandatory schedule contractors.

(b) The contracting officer shall consider all responses received as a result of the CBD notice and then determine whether to order from a GSA nonmandatory schedule contract or issue a solicitation. Accordingly, the contracting officer shall take one of the following actions:

(1) When no responses are received, document the contract file with the results of the CBD synopsis and an analysis indicating that an order placed against the synopsized nonmandatory schedule contract provides the lowest overall cost alternative to meet the Government's needs.

(2) When a response to the CBD notice is received from either a responsible vendor that does not have a GSA nonmandatory schedule contract or a GSA nonmandatory schedule contractor (expressing an interest either on or off schedule) for items that may meet the user's requirement, the contracting officer shall take one of the following actions:

(i) Document the contract file with an analysis indicating that the respondent's items would not meet the requirements o. that the synopsized GSA nonmandatory schedule contract items provides the lowest overall cost alternative to meet the

VOL 56 ISS 122 JE 25 1991 UMI

Government's needs and place an order against the synopsized GSA nonmandatory schedule contract;

(ii) Document the contract file with an analysis indicating that a responding contractor's GSA nonmandatory schedule contract offering provides the lowest overall cost alternative to meet the Government's needs and place an order against that GSA nonmandatory schedule contract; or

(iii) Document the contract file with an analysis indicating that ordering from a GSA nonmandatory schedule contract may not result in the lowest overall cost alternative to meet the Government's needs. In this case, the contracting officer may elect to issue a solicitation. In such cases, the contracting officer shall take the following actions:

(A) Ensure that the solicitation contains terms and conditions substantially the same as those of the GSA solicitation for nonmandatory schedule contracts that resulted in the synopsized schedule contract; and

(B) Provide the solicitation to those potential offerors responding to the CBD synopsis of intent; the vendor whose GSA nonmandatory schedule contract was the subject of the synopsis; and any other potential offerors that specifically express an interest.

(c) If the contracting officer places an order in accordance with § 201–39.603–3(b)(2)(i) or (b)(2)(ii), the contracting officer shall promptly provide written notification of award to the synopsized schedule vendor and to all parties responding in writing to the CBD notice.

(d) Requirements or orders shall not be fragmented in order to circumvent the applicable MOL.

§ 201–39.804 Financial Management Systems Software (FMSS) Mandatory Multiple Award Schedule (MAS) Contracts Program.

§ 201–39.804–1 General.

(a) The Office of Management and Budget (OMB) has established a Governmentwide financial management systems software program. To help agencies implement this program, GSA has established the mandatory FMSS MAS contracts program.

(b) Federal agencies may obtain information and assistance concerning the use of the FMSS MAS contracts program from: General Services Administration, ADP Systems Procurement Branch (KECP), FMSS Contracting Officer, 18th and F Streets, NW., Washington, DC 20405.

(c) OMB Circular No. A–127, "Financial Management Systems," provides further policy direction regarding the FMSS program.

§ 201–39.804–2 Policy.

Executive agencies shall use the FMSS MAS contracts program for the acquisition of commercial software for primary accounting systems and for the acquisition of services and support related to the implementation of such software.

§ 201–39.804–3 Exceptions.

(a) If an executive agency holds a licensing agreement for a software package that is available on the FMSS MAS contracts, and the package was obtained under a contract awarded before the award of the FMSS MAS contracts, the agency's use of the FMSS MAS contracts program is optional for the acquisition of services and support related to the implementation of that package until the previous non-MAS contract expires.

(b) Use of the FMSS MAS contracts program by Federal agencies that are not executive agencies is optional and is subject to the FMSS contractor accepting the order.

(c) An executive agency shall obtain a waiver from GSA if it determines that its requirements for financial management systems software cannot be satisfied through use of the FMSS MAS contracts program.

(1) The request for a waiver shall contain the following information:

(i) A description of the agency's requirements;

(ii) The reasons the FMSS MAS contracts program does not satisfy the requirements; and

(iii) A description of how the agency proposes to satisfy its needs for financial management system software.

(2) Agencies shall send waiver requests to GSA at the address in § 201–39.804–1(b).

(3) If a waiver is obtained from GSA, a deviation from the FIRMR is not required.

§ 201–39.804–4 Procedures.

(a) The contracting officer shall announce the agency's requirements in a letter of interest (LOI) to all contractors participating in the FMSS MAS contracts program.

(b) At the time of issuance, the contracting officer shall provide a copy of the LOI to GSA at the address in § 201–39.804–1(b) and to OMB at the following address: Office of Management and Budget, Chief Financial Officer, 725 17th Street, NW., room 10235, Washington, DC 20503.

(c) The LOI shall—

(1) Contain sufficient information to enable a competitive acquisition under the FMSS MAS contracts program;

(2) Include instructions to the FMSS MAS contractors for responding to the LOI; and

(3) Include evaluation and award factors.

(d) The agency shall conduct an analysis of the offerings of the FMSS MAS contractors and issue a delivery order to the contractor that provides the most advantageous alternative to the Government.

(e) The contracting officer may issue single or multiple delivery orders to satisfy the total requirement.

(f) The contracting officer shall provide a copy of each delivery order, or modification thereto, to OMB at the address shown in subparagraph (b) of this section and to GSA at the address in § 201–39.804–1(b).

Subpart 201–39.9—[Reserved]

Subpart 201–39.10—Specifications, Standards, and other Purchase Descriptions

§ 201–39.1000 Scope of subpart.

This subpart prescribes policies and procedures for using specifications, standards, and other purchase descriptions in acquiring FIP resources.

§ 201–39.1001 Security and privacy specifications.

§ 201–39.1001–1 Security specifications.

Specifications for security of FIP resources shall include, as appropriate:

(a) Agency rules of conduct that a contractor shall be required to follow.

(b) A list of anticipated threats and hazards that the contractor must guard against.

(c) A description of the safeguards that the contractor must specifically provide.

(d) The security standards applicable to the contract.

(e) A description of the test methods, procedures, criteria, and inspection system necessary to verify and monitor the operation of the safeguards during contract performance and to discover and counter any new threats or hazards.

(f) A description of the procedures for periodically assessing the security risks involved.

(g) A description of the personnel security requirements.

(h) Consistent with the guidelines for Federal computer security training issued by the National Institute of Standards and Technology (NIST) and regulations issued by the Office of Personnel Management (OPM), a description of the security training that the contractor is required to provide to its employees.

(i) Consistent with the guidelines issued by the Office of Management and Budget (OMB) in OMB Bulletin 88–16, a description of the plan the contractor must develop or follow to provide for the security and privacy of FIP resources the contractor is required to operate.

§ 201–39.1001–2 Privacy specifications.

(a) *Applicability.* This subsection is applicable to executive agencies that are subject to the Privacy Act of 1974 (5 U.S.C. 552a).

(b) *Procedures.* Specifications for the design, development, or operation of a system of records using commercial FIP services or support services shall include the following:

(1) Agency rules of conduct that the contractor and the contractor's employees shall be required to follow.

(2) A list of the anticipated threats and hazards that the contractor must guard against.

(3) A description of the safeguards that the contractor must specifically provide.

(4) Requirements for a program of Government inspection during performance of the contract that will ensure the continued efficacy and efficiency of safeguards and the discovery and countering of new threats and hazards.

§ 201–39.1001–3 Contract clause.

The contracting officer shall insert a clause substantially the same as the clause at § 201–39.5205–5, Privacy or Security Safeguards, in solicitations and contracts—

(a) Requiring security of FIP resources.

(b) For the design, development, or operation of a system of records using commercial FIP services or support services.

§ 201–39.1002 Federal standards.

§ 201–39.1002–1 General.

GSA publishes a handbook titled "Federal ADP and Telecommunications Standards Index" providing guidance to agencies on the use of Federal standards. The index also provides optional terminology that may be used to incorporate standards in solicitations and a "Standards Checklist" that can be included in the solicitation to incorporate applicable Federal standards. Copies of the index can be purchased from: U.S. Government Printing Office, Superintendent of Documents, Washington, DC 20402.

§ 201–39.1002–2 Policy.

The contracting officer shall include in solicitations terminology to incorporate each standard that is applicable to the FIP resources being acquired.

§ 201–39.1002–3 Procedures.

The contracting officer shall use one or a combination of the following methods to implement standards in solicitations:

(a) Include in the solicitation the full text of the terminology contained in the index for each applicable standard.

(b) Incorporate in the solicitation the applicable terminology by reference to the index.

(c) For each applicable standard, include the full text of the terminology as developed by the agency.

§ 201–39.1002–4 Solicitation provision.

If any of the terminology to incorporate standards in solicitations is incorporated by reference, the contracting officer shall insert in the solicitation the provision at § 201–39.5203–2, Availability of the "Federal ADP and Telecommunications Standards Index."

§ 201–39.1003 Specifications for outdated FIP equipment.

The contracting officer shall not include specifications for outdated FIP equipment in a solicitation unless—

(a) The agency's DSO determines that such action will be in the Government's best interest; or

(b) A determination has been made in accordance with § 201–39.002.

Subparts 201–39.11 and 201–39.12—[Reserved]

Subpart 201–39.13—Small Purchase and Other Simplified Purchase Procedures

§ 201–39.1300 Scope of subpart.

This subpart prescribes policies and procedures for acquiring from commercial sources FIP resources whose aggregate amount does not exceed the small purchase threshold of FAR part 13.

§ 201–39.1301 Policy.

When requirements for FIP resources are to be satisfied through the use of GSA sources of supply as set forth in subpart 201–39.8, the policies and procedures of FAR part 13 do not apply.

Subpart 201–39.14—Sealed Bidding

§ 201–39.1400 Scope of subpart.

This subpart prescribes policies and procedures governing contracting for FIP resources by sealed bidding.

§ 201–39.1401 General.

This subpart requires the contracting officer to select the bid that is most advantageous to the Government considering options, acquisition methods, present value discount factors, and other price-related factors. Therefore, contracting officers should consider the factors associated with each acquisition of FIP resources in order to select the method of contracting that will best accommodate this requirement.

§ 201–39.1402 Price-related factors.

§ 201–39.1402–1 Policies.

(a) In addition to the bid price for the basic and all optional quantities and contract periods and optional FIP resources, and the price-related factors set forth in FAR 14.201–8, sealed bid solicitations for FIP resources shall be structured to require consideration of the following factors, as applicable, in order to determine which bid is most advantageous to the Government.

(1) Support and in-house costs over the system life for installing, operating, and disposing, where quantifiable and when these costs may differ based on offers received.

(2) Any costs of conversion that can be stated in dollars, as well as other costs directly related to converting from installed to augmentation or replacement FIP resources. However, the costs associated with the following shall not be included:

(i) Conversion of existing software and data bases that are to be redesigned regardless of whether or not augmentation or replacement FIP resources are acquired.

(ii) Purging duplicate or obsolete software, data bases, and files.

(iii) Development of documentation for existing application software.

(iv) Improvements in management and operating procedures.

(b) When the timing of payments is expected to vary among the alternatives being considered, all prices and costs shall be adjusted to present value, and the results shall be applied in determining the bid most advantageous to the Government. Agencies should follow the guidance in OMB Circular A–104 regarding present value calculations.

§ 201–39.1402–2 Exception.

Agencies are permitted to award on the basis of the lowest offered purchase price when—

(a) The only acquisition method to be used is purchase;

(b) The purchase price of each item being acquired does not exceed $25,000; and

(c) The total purchase price of all the FIP resources to be included in the contract does not exceed $300,000.

§ 201–39.1403 Solicitation.

(a) The solicitation shall state the means of evaluating all acquisition methods included in the solicitation.

(b) If a present-value adjustment is to be used, the solicitation shall state the methodology and discount rate that will be applied in the evaluation process.

§ 201–39.1404 Award.

The contracting officer shall not award a contract providing for the delivery of outdated FIP equipment unless—

(a) The agency's DSO determines that such action will be in the Government's best interest; or

(b) A determination has been made in accordance with § 201–39.602 or § 201–39.1003.

Subpart 201–39.15—Contracting By Negotiation

§ 201–39.1500 Scope of subpart.

This subpart prescribes policies and procedures governing contracting for FIP resources by negotiation.

§ 201.39–1501 Evaluation factors.

§ 201–39.1501–1 Policies.

(a) In addition to the factors set forth in FAR 15.605, the contracting officer shall evaluate total cost, including the following factors:

(1) All prices for FIP resources including the basic and optional quantities, basic and optional contract periods, and optional FIP resources.

(2) Other support and in-house costs over the system life for installing, operating, and disposing, where quantifiable and when these costs may differ based on offers received.

(3) Any costs of conversion that can be stated in dollars, as well as other costs directly related to converting from installed to augmentation or replacement FIP resources. However, the costs associated with the following shall not be included:

(i) Conversion of existing software and data bases that are to be redesigned regardless of whether or not augmentation or replacement FIP resources are acquired.

(ii) Purging duplicate or obsolete software, data bases, and files.

(iii) Development of documentation for existing application software.

(iv) Improvements in management and operating procedures.

(b) When the timing of payments is expected to vary among the alternatives being considered, agencies shall adjust all prices and costs to present value and apply the results in source selection. Agencies should follow the guidance in OMB Circular A–104 regarding present value calculations.

§ 201–39.1501–2 Exception.

Agencies are permitted to award on the basis of the lowest offered purchase price when—

(a) The only acquisition method being solicited is purchase;

(b) The purchase price of each item being acquired does not exceed $25,000; and

(c) The total purchase price of all of the FIP resources to be included in the contract does not exceed $300,000.

VOL 56 ISS 122 JE 25 1991 UMI

§ 201-39.1502 Solicitation.

(a) The solicitation shall state the means of evaluating all acquisition methods included in the solicitation.

(b) If a present-value adjustment is to be used, the solicitation shall state the methodology and discount rate that will be applied in the evaluation process.

§ 201-39.1503 Award.

The contracting officer shall not award a contract providing for the delivery of outdated FIP equipment unless—

(a) The agency's DSO determines that such action will be in the Government's best interest; or

(b) A determination has been made in accordance with § 201-39.602 or § 201-39.1003.

Subpart 201-39.16—[Reserved]

Subpart 201-39.17—Special Contracting Methods

§ 201-39.1700 Scope of subpart.

This subpart prescribes policies aand procedures for using options in acquiring FIP resources.

§ 201-39.1701 Options.

§ 201-39.1701-1 General.

The use of options may be appropriate in FIP resources acquisitions because—

(a) The FIRMR requires agencies to determine a system life for each FIP resource requirement and to evaluate costs over the system life;

(b) Funding is normally not available at the time of award for the entire system life; and

(c) Soliciting and evaluating optional quantities, optional contract periods, and optional FIP resources can be an effective method to achieve competition for the options and to prevent the possibility of a contractor "buying-in."

§ 201-39.1701-2 Applicability.

Except as set forth below, the policies and procedures of FAR subpart 17.2 shall apply to the acquisition of FIP resources, notwithstanding the language in FAR 17.200.

§ 201-39.1701-3 Policy.

Notwithstanding the language in FAR 17.202, a contract for FIP resources with options to extend the contract period of performance, or to acquire additional quantities or optional FIP resources may be used when—

(a) The Government has requirements for the acquistion of FIP resources extending beyond the basic contract period;

(b) Funds are not available for the entire system life, but a reasonable certainty exists that they will be available in the future; or

(c) Competition for the additional periods, quantities or optional FIP resources is impracticable once the contract is awarded.

§ 201-39.1701-4 Contracts.

Notwithstanding the language in FAR 17.204(e), the total of the basic and option periods for contracts not subject to the Service Contract Act of 1965 (41 U.S.C. 351 et seq.), as amended, may exceed 5 years (see FAR 22.10). However, statutes applicable to various classes of contracts may place additional restrictions on the length of contracts.

§ 201-39.1701-5 Documentation.

Any justifications and approvals or determinations and findings required by subpart 201-39.6 or FAR part 6 shall specify both the basic requirement and all options.

§ 201-39.1701-6 Evaluation.

Notwithstanding the language in FAR 17.206, the contracting officer shall consider all options in the award evaluation.

§ 201-39.1701-7 [Reserved]

§ 201-39.1701-8 Solicitation provision and contract clauses.

In lieu of the solicitation provisions and contract clauses prescriptions set forth in FAR 17.208, the contracting officer shall insert the following in solicitations and contracts for FIP resources that contain options—

(a) A provision substantially the same as the provision at § 201-39.5204-4, Evaluation of Options-FIP Resources, in the solicitation;

(b) A clause substantially the same as the clause at FAR 52.217-6, Option for Increased Quantity, in the solicitation and contract; and

(c) A clause substantially the same as the clause at FAR 52.217-9, Option to Extend the Term of the Contract, in the solicitation and contract.

Subparts 201-39.18 through 201-39.32—[Reserved]

Subpart 201-39.33—Protests, Disputes, and Appeals

§ 201-39.3300 Scope of subpart.

This subpart prescribes policies and procedures applicable to protests concerning FIP resource acquisitions filed with the GSA Board of Contract Appeals (GSBCA).

§ 201-39.3301 General.

Under Public Law 98-369, as amended (40 U.S.C. 759(f)), the GSBCA is authorized to hear and decide protests by interested parties involving acquisitions of FIP resources by Federal agencies subject to section 111 of the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 759), including acquisitions subject to GSA delegations of procurement authority.

§ 201-39.3302 Applicability.

This subpart is applicable to all Federal agencies.

§ 201-39.3303 Policy.

All Federal agencies shall follow the GSBCA "Rules of Procedure" in 48 CFR chapter 61.

§ 201-39.3304 Procedures.

§ 201-39.3304-1 Protest notice.

Within 1 working day after receiving a copy of the protest, the contracting officer shall give oral or written notice of the protest to: General Services Administration, Acquisition Evaluation and Analysis Branch (KMAD), 18th and F Streets NW., Washington, DC 20405, telephone (202) 501-4305 or FTS 241-4305.

§ 201-39.3304-2 GSA participation.

In delegating procurement authority for FIP resources to Federal agencies, GSA has the right to intervention in any protest case involving any Federal agency.

Subparts 201-39.34 through 201-39.43—[Reserved]

Subpart 201-39.44—Subcontracting Policies and Procedures

§ 201-39.4400 Scope of subpart.

This subpart prescribes policies and procedures applicable when subcontracting includes FIP resources.

§ 201-39.4401 Policy.

In addition to the policies and procedures set forth in FAR 44.202-2, the contracting officer responsible for consent shall make a written determination for the file that competition was obtained for FIP resources or that the absence of competition is properly justified.

Subpart 201-39.45—Government Property

§ 201-39.4500 Scope of subpart.

This subpart prescribes policies and procedures for providing Government FIP resources to contractors.

§ 201-39.4501 Dedicated FIP equipment or software in FIP services contracts.

§ 201-39.4501-1 General.

When an offeror proposes the dedicated use of FIP equipment or software in performing a FIP service, it means that the offeror is proposing to use that resource exclusively in providing that service. When this is the case, it can sometimes be more advantageous to the Government to provide the FIP equipment or software to the offeror as Government-furnished property.

§ 201-39.4501-2 Policy.

When a solicitation requires or allows an offeror to propose the dedicated use of FIP equipment or software in performing a FIP service, the contracting officer shall ensure that the solicitation—

(a) Reserves the right for the Government to furnish the dedicated items to the offeror;

(b) Requires the offeror to price the use of the dedicated items on a specific line-item basis; and

(c) Requires the offeror to specify the interface requirements between the offeror's system and the dedicated items.

Subpart 201-39.46—Quality Assurance

§ 201-39.4600 Scope of subpart.

This subpart prescribes the use of a contract clause for limiting contractor liability for loss of or damage to property of the Government.

§ 201-39.4601 Contract clause.

The contracting officer shall insert the clause at § 201-39.5202-6, Warranty Exclusion and Limitation of Damages, in solicitations and contracts for FIP resources, unless the contracting officer determines that a higher degree of protection is in the best interest of the Government.

Subparts 201-39.47 through 201-39.51—[Reserved]

Subpart 201-39.52—Solicitation Provisions and Contract Clauses

§ 201-39.5200 Scope of subpart.

This subpart—

(a) Gives instructions for using provisions and clauses in solicitations and contracts for FIP resources; and

(b) Sets forth the solicitation provisions and contract clauses prescribed by this part 201-39.

§ 201-39.5201 [Reserved]

§ 201-39.5202 Texts of provisions and clauses.

§ 201-39.5202-1 FIRMR Applicability.

As prescribed in § 201-39.101-3(c), insert a clause substantially the same as the following in solicitations and contracts:

FIRMR Applicability (Oct 90 FIRMR)

This solicitation/contract requires the use or delivery of Federal information processing resources but the agency has determined that FIRMR part 201-39 does not apply based on the exception set forth in § 201-39.101-3(b)*

(End of clause)

*Insert the specific sub-paragraph number(s) of the applicable exception.

§ 201-39.5202-2 Availability of the "Federal ADP and Telecommunications Standards Index."

As prescribed in § 201-39.1002-4, insert the following provision in the solicitation:

Availability of the "Federal ADP and Telecommunications Standards Index" (Oct 90 FIRMR)

Copies of the "Federal ADP and Telecommunications Standards Index" can be purchased from the U.S. Government Printing Office, Superintendent of Documents, Washington, DC 20402.

(End of provision)

§ 201-39.5202-3 Procurement authority.

As prescribed in § 201-39.106-4, insert a clause substantially the same as the following in solicitations and contracts:

Procurement Authority (Oct 90 FIRMR)

This acquisition is being conducted under *delegation of GSA's exclusive procurement authority for FIP resources.

The specific GSA DPA case number is**

(End of provision)

*Insert one of the following phrases:
(1) "the regulatory;"
(2) "a specific agency;"
(3) "a specific acquisition."

**Insert one of the following:

(1) If the acquisition is being conducted under the regulatory delegation, insert "not applicable."

(2) If the acquisition is being conducted under a specific agency delegation or a specific acquisition delegation, insert the case number as provided in GSA's letter delegating the specific procurement authority (e.g., KMA-88-0000).

§ 201-39.5202-4 Evaluation of options—FIP resources.

As prescribed in § 201-39.1701-8(a), insert a provision substantially the same as the following in the solicitation:

Evaluation of Options—FIP Resources (Oct 90 FIRMR)

(a) The Government will evaluate offers for award purposes by adding the total price for all options to the total price for the basic requirement. These prices will be adjusted by the applicable discount factors shown in* of the solicitation. Evaluation of options will not obligate the Government to exercise the options. Offers containing any changes for failure to exercise any option will be rejected.

(b) Selection of an offer will be made on the basis of the most advantageous alternative to the Government provided that the contract prices reasonably represent the value of bona fide requirements for each fiscal year. This determination with respect to contract prices will be made after consideration of such factors as commercial or catalog prices for short-term leases, offeror system startup expenses, multiyear price protection, assured system life availability of equipment, software, and vendor support. If a determination is made that an offer does not meet the criteria, that offer cannot be accepted for award.

(End of provision)

*Insert one of the following:

(1) If a present-value adjustment is being used, indicate the location in the solicitation where any applicable discount factors and contemplated payment schedule are specified; or

(2) If a present-value adjustment is not being used, insert "Not Applicable."

§ 201-39.5202-5 Privacy or security safeguards.

As prescribed in § 201-39.1001-3, insert a clause substantially the same as the following clause in solicitations and contracts:

Privacy or Security Safeguards (Oct 90 FIRMR)

(a) The details of any safeguards the contractor may design or develop under this contract are the property of the Government and shall not be published or disclosed in any manner without the contracting officer's express written consent.

(b) The details of any safeguards that may be revealed to the contractor by the Government in the course of performance under this contract shall not be published or disclosed in any manner without the contracting officer's express written consent.

(c) The Government shall be afforded full, free, and uninhibited access to all facilities, installations, technical capabilities, operations, documentation, records, and data bases for the purpose of carrying out a program of inspection to ensure continued efficacy and efficiency of safeguards against threats and hazards to data security, integrity, and confidentiality.

(d) If new or unanticipated threats or hazards are discovered by either the Government or the contractor, or if existing safeguards have ceased to function, the discoverer shall immediately bring the situation to the attention of the other party. Mutual agreement shall then be reached on changes or corrections to existing safeguards or institution of new safeguards, with final determination of appropriateness being made by the Government. The Government's liability is limited to an equitable adjustment of cost for such changes or corrections, and the Government shall not be liable for claims of loss of business, damage to reputation, or damages of any other kind arising from discovery of new or unanticipated threats or hazards, or any public or private disclosure thereof.

(End of clause)

§ 201-39.5202-6 Warranty exclusion and limitation of damages.

As prescribed in § 201-39.4601, insert the following clause in solicitations and contracts.

Warranty Exclusion and Limitation of Damages (Oct 90 FIRMR)

Except as expressly set forth in writing in this agreement and except for the implied warranty of merchantability, there are no warranties expressed or implied.

In no event will the contractor be liable to the Government for consequential damages as defined in the Uniform Commercial Code, section 2-715, in effect in the District of Columbia as of January 1, 1973, i.e.—

Consequential damages resulting from the seller's breach include—

(a) Any loss resulting from general or particular requirements and needs of which the seller at the time of contracting had reason to know and which could not reasonably be prevented by cover or otherwise; and

(b) Injury to person or property proximately resulting from any breach of warranty.

(End of clause)

Subpart 201-39.53—[Reserved]

PART 52—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

52.203-8 [Amended]

18. Section 52.203-8 is amended following paragraph (b)(4) of the clause by inserting blank lines for the signature and name requested by the bracketed text.

52.203-9 [Amended]

19. Section 52.203-9 is amended following paragraph (c)(3) of the clause

VOL 56 ISS 122 JE 25 1991 UMI

by inserting blank lines for the signature and name requested by the bracketed text.

20. Section 52.209–6 is revised to read as follows:

52.209–6 Protecting the Government's Interest when Subcontracting with Contractors Debarred, Suspended, or Proposed for Debarment.

As prescribed in 9.409(b), insert the following clause:

PROTECTING THE GOVERNMENT'S INTEREST WHEN SUBCONTRACTING WITH CONTRACTORS DEBARRED, SUSPENDED, OR PROPOSED FOR DEBARMENT (JUN 1991)

(a) The Government suspends or debars Contractors to protect the Government's interests. The Contractor shall not enter into any subcontract in excess of the small purchase limitation at FAR 13.000 with a Contractor that has been debarred, suspended, or proposed for debarment unless there is a compelling reason to do so.

(b) The Contractor shall require each proposed first-tier subcontractor, whose subcontract will exceed the small purchase limitation at FAR 13.000, to disclose to the Contractor, in writing, whether as of the time of award of the subcontract, the subcontractor, or its principals, is or is not debarred, suspended, or proposed for debarment by the Federal Government.

(c) A corporate officer or a designee of the Contractor shall notify the Contracting Officer, in writing, before entering into a subcontract with a party that is debarred, suspended, or proposed for debarment (see FAR 9.404 for information on the List of Parties Excluded from Procurement Programs). The notice must include the following:

(1) The name of the subcontractor.

(2) The Contractor's knowledge of the reasons for the subcontractor being on the List of Parties Excluded from Procurement Programs.

(3) The compelling reason(s) for doing business with the subcontractor notwithstanding its inclusion on the List of Parties Excluded From Procurement Programs.

(4) The systems and procedures the Contractor has established to ensure that it is fully protecting the Government's interests when dealing with such subcontractor in view of the specific basis for the party's debarment, suspension, or proposed debarment.

(End of Clause)

21. Section 52.215–39 is added to read as follows:

52.215–39 Reversion or Adjustment of Plans for Postretirement Benefits Other Than Pensions (PRB).

As prescribed in 15.804–8(f), insert the following clause:

REVERSION OR ADJUSTMENT OF PLANS FOR POSTRETIREMENT BENEFITS OTHER THAN PENSIONS (PRB) (JUL 1991)

The Contractor shall promptly notify the Contracting Officer in writing when it determines that it will terminate or reduce a PRB plan. If PRB fund assets revert, or inure, to the Contractor or are constructively received by it under a plan termination or otherwise, the Contractor shall make a refund or give a credit to the Government for its equitable share as required by FAR 31.205–6(o)(4). The Contractor shall include the substance of this clause in all subcontracts under this contract which meet the applicability requirements of FAR 15.804–8(f). The resulting adjustment to prior years' PRB costs will be determined and applied in accordance with FAR 31.205–6(o).

(End of clause)

22. Section 52.216–7 is amended by revising the date in the heading of the clause and the first sentence in paragraph (b)(2) to read as follows:

52.216–7 Allowable Cost and Payment.

* * * * *

ALLOWABLE COST AND PAYMENT (JUL 1991)

(b) * * *

(2) Contractor contributions to any pension or other postretirement benefit, profit-sharing or employee stock ownership plan funds that are paid quarterly or more often may be included in indirect costs for payment purposes: *Provided*, That the Contractor pays the contribution to the fund within 30 days after the close of the period covered. * * *

* * * * *

52.219–19 [Amended]

23. Section 52.219–19 is amended in the clause title by removing the words "(JAN 1991)" and inserting in their place "(JUL 1991)"; in paragraph (b) by removing the word "clause" and inserting in its place "provision".

52.219–21 [Amended]

24. Section 52.219–21 is amended in the clause title by removing the words "(JAN 1991)" and inserting in their place "(JUL 1991)"; in the parenthetical of the first paragraph by removing the word "clause" and inserting in its place "provision"; and in the table, in the second column, in the third entry, in the clause removing the amount "$2,000,002" and inserting in its place "$2,000,001".

52.220–1 [Amended]

25. Section 52.220–1 is amended in the first line of the paragraph by removing the word "clause" and inserting in its place "provision"; at the end of the clause by removing the words "(End of clause)" and inserting in their place "(End of provision)"; and removing the derivation line following "(End of provision)".

52.220–3 [Amended]

26. Section 52.220–3 is amended in the introductory paragraph by inserting a colon after the word "clause" and removing the remainder of the sentence.

27. Section 52.232–16 is amended by removing from the clause heading the date "(AUG 1987)" and inserting in its place "(JUL 1991)" and revising the introductory text of paragraph (a)(2)(iii) of the clause to read as follows:

52.232–16 Progress Payments.

* * * * *

PROGRESS PAYMENTS (JUL 1991)

* * * * *

(a) * * *

(2) * * *

(iii) Accrued costs of Contractor contributions under employee pension or other postretirement benefit, profit sharing, and stock ownership plans shall be excluded until actually paid unless—

* * * * *

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is issuing a proposed test rule under section 4(a) of the Toxic Substances Control Act (TSCA) in response to the Interagency Testing Committee (ITC) designation of the following five brominated flame retardants (BFRs) for health and environmental effects and chemical fate testing: (1) pentabromodiphenyl ether (PBDPE; CAS. No. 32534-81-9), (2) octabromodiphenyl ether (OBDPE; CAS. No. 32536-52-0), (3) decabromodiphenyl ether (DBDPE; CAS No. 1163-19-5), (4) 1,2,bis(2,4,6-tribromophenoxy)ethane (BTBPE; CAS. No. 37853-59-1), and (5) hexabromocyclododecane (HBCD; CAS. No. 3194-55-6). EPA has concluded that activities involving these BFRs may pose an unreasonable risk of injury to human health or the environment as suggested by certain preliminary data; existing data are inadequate to assess the risks to human health and the environment posed by exposure to these substances, and testing of each of the five BFRs is necessary to develop such data.

DATES: Submit written comments on or before August 26, 1991. If persons request an opportunity to submit oral comment by August 9, 1991, EPA will hold a public meeting on this proposed rule in Washington, DC. For further information on arranging to speak at the meeting see Unit VIII of this preamble.

ADDRESSES: Submit written comments, identified by the document control number (OPTS-42116), in triplicate to: TSCA Public Reading Room (TS-793), Office of Pesticides and Toxic Substances, Environmental Protection Agency, rm. NE-G004, 401 M St., SW., Washington, DC, 20460.

A public version of the administrative record supporting this action, without confidential business information is available for inspection at the above address from 8 a.m. to 12 noon, and 1 p.m. to 4 p.m., Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT: David Kling, Director, Environmental Assistance Division (TS-799), Office of Toxic Substances, rm. E-543B, 401 M St., SW., Washington, DC 20460, (202) 554-1404, TDD (202) 554-0551.

SUPPLEMENTARY INFORMATION: This document proposes a test rule to require certain health, environmental, and chemical fate tests for the following five brominated flame retardants:

chemical substance	CAS No.	Docket No.
pentabromodiphenyl ether (PBDPE)	32534-81-9	42115/42145
octabromodiphenyl ether (OBDPE)	32536-52-0	42115/42146
decabromodiphenyl ether (DBDPE)	1163-19-5	42115/42147
1,2,bis(2,4,6-tribromophenoxy)ethane (BTBPE)	37853-59-1	42115/42148
hexabromocyclododecane (HBCD)	3194-55-6	42115/42149

The proposed health effects testing consists of tiered mutagenicity testing (all), subchronic toxicity testing (HBCD), neurotoxicity testing (all), reproductive effects testing (all), developmental toxicity testing (all), chronic toxicity testing (PBDPE, OBDPE and BTBPE), and oncogenicity testing (PBDPE, OBDPE, BTBPE, and HBCD).

The proposed environmental effects testing consists of the algal assay (all), fish early life stage toxicity testing (all), aquatic invertebrate chronic toxicity testing (all), benthic organism toxicity testing (all), mallard reproduction testing (all), laboratory earthworm testing (all), terrestrial plant testing (all), immunotoxicity testing (all), and bioconcentration testing (all).

The proposed chemical fate testing consists of testing to determine vapor pressure (all), water solubility (all), log octanol/water partition coefficient (PBDPE, OBDPE, and DBDPE), direct and indirect photolysis (all), biodegradation testing in water/sediment (all), sediment and soil adsorption (all), and anaerobic biodegradation (all). Testing is conditional for all environmental testing and the biodegradation testing in water/sediment for two BFRs (OBDPE and DBDPE) based on results from PBDPE.

I. Introduction

A. ITC Recommendation

The ITC designated the chemical category "brominated flame retardants" for chemical fate, health and environmental effects testing. The reasons for this designation are discussed in the Federal Register of December 12, 1989 (54 FR 51114).

B. Test Rule Development Under TSCA

EPA has evaluated the ITC's testing recommendations for the BFRs, relying heavily on the Information Review (Ref. 1) developed by the ITC, as well as the supplemental information developed by EPA. On the basis of this evaluation, EPA is proposing chemical fate, health effects and environmental effects testing for the BFRs under TSCA section 4(a)(1)(A). A discussion of the TSCA section 4 findings was provided in the Federal Register of July 18, 1990 (45 FR [illegible]). EPA is not now making findings under section 4(a)(1)(B) because EPA is developing its response to the court that remanded a test rule promulgated under TSCA section 4(a)(1)(B) for cumene (In *Chemical Manufacturers Association et al. v. Environmental Protection Agency* [illegible] F.2d 344 (5th Cir. 1990)). EPA reserves the right to make findings for BFRs under TSCA section 4(a)(1)(B) in the future.

This action constitutes EPA's response to the ITC as required by TSCA section 4.

II. Review of Available Data

A. Profile

The ITC (Ref. 1) designated five BFRs for priority testing. Three, PBDPE, OBDPE, and DBDPE, are structurally similar and are placed in a single category for some testing purposes. BTBPE and HBCD, while sharing similar uses with the three diphenyl ethers, are structurally dissimilar to them and to each other, and therefore are considered individually with respect to testing. All of these BFRs are solids at room temperature and have relatively low water solubility (Ref. 1).

B. Production and Use

Specific production volumes of each BFR have been claimed as confidential business information (CBI).

The BFRs are used mainly as additives to various plastic resins to impart resistance to burning. BFRs are primarily used in polystyrene, ABS resins, and epoxies. HBCD is used in polystyrene foam, and BTBPE in ABS resins and unsaturated polyester (Ref. 2).

C. Exposure and Release

Environmental releases and exposures of humans are anticipated from manufacturing and processing and from packaging and cleaning operations associated with the production and use of these BFRs (Ref. 1). EPA estimates that 100 to 2,200 workers may be exposed to the 3 diphenyl ethers through the inhalation and dermal routes (Ref. 10). No estimates were available for BTBPE or HBCD. PBDPE, DBDPE, and BTBPE were detected in air and soil near two U.S. production facilities and PBDPE has also been detected in fish, marine mammals, and birds in Sweden and in mussels and river sediment in Japan (Ref. 1). These detections are relevant to general population and environmental exposures. DBDPE was also found in shellfish and sediments in Japan (Ref. 1). BFRs, including PBDPE, have recently been detected in Atlantic bottle-nosed dolphins on the U.S. East Coast (Refs. 1 and 3). Although EPA is not aware of any reports that OBDPE and HBCD have been detected in the environment, they have uses similar to the other three BFRs and can reasonably be anticipated to be similarly released to the environment.

In an analysis of human adipose tissue from the fiscal year (FY) 1987 National Human Adipose Tissue Survey specimen repository, nearly all of the adipose tissue extracts analyzed contained hexa- through octabrominated diphenyl ethers (Ref. 4). The analytic methodology did not permit brominated diphenyl ethers with fewer than six bromines to be detected. Exact tissue levels were also difficult to measure, but approximate levels, from 5 to 8,000 picograms/gram (pg/g), were measurable from the composite samples. The National Human Adipose Tissue Survey Specimen repository represents a more or less random sampling of the general population. These data indicate exposure to the BFRs is widespread, and may also indicate that these substances have potential to bioaccumulate (i.e., the uptake and subsequent accumulation of a substance in an organism's tissues either through direct (e.g., respiration) or indirect (e.g., food consumption) means) in the human population.

D. Health Effects

1. *Metabolism and pharmacokinetics.* In a metabolism study in male rats with radiolabelled DBDPE, administered at 250 to 50,000 ppm in the diet, the majority of the compound was, after 9 to 11 days, excreted in the feces (82 to 100 percent) with a small amount (< 0.012 percent) excreted in the urine (Ref. 1). Most of the compound was excreted unchanged, with small amounts of three unidentified metabolites also detected. When administered as a single dose by gavage, similar results were obtained.

BTBPE also appears to be poorly absorbed through the gut. When radioactive BTBPE was administered to rats, 80 percent was recovered in the feces, and 5 percent was recovered in the urine within 4 days of dosing (Ref. 1).

2. *Acute and subchronic effects.* All of these BFRs are of low acute toxicity. The oral LD50 in rats for PBDPE was 7,400 mg/kg males and 5,800 mg/kg for females. LD50 values were not determined for OBDPE or DBDPE, but would exceed the 5,000 mg/kg administered (Ref. 1). Similarly, 10,000 mg/kg administered as an acute oral dose was insufficient to provide an LD50 value for BTBPE and HBCD (Ref. 1).

Subchronic studies have yielded a lowest observed adverse effect level (LOAEL) of 10 mg/kg/day for OBDPE (90-day dietary study), and liver effects were also seen at all doses tested (100, 1,000, and 10,000 ppm) in a 90-day oral gavage study for OBDPE. Similarly, in a 14-day study (inhalation of OBDPE as a dust) hepatocellular enlargements and necrosis were observed at all doses tested, 12, 120, and 1,200 mg/m³ (Refs. 1 and 5). A no observable adverse effect level (NOAEL) of 8 mg/kg/day was obtained for DBDPE in a 30-day dietary study (Ref. 1). PBDPE, tested in a 90-day dietary study in rats with a subsequent 24-week follow-up period, caused irreversible liver hyperplasia at 2 and 100 mg/kg/day; a NOAEL was not established. Reversible thyroid hyperplasia was also observed (Refs. 1 and 5). In another 90-day study in rats a LOAEL of 10 percent of the diet (about 5,000 mg/kg/day) and a NOAEL of 1 percent in the diet were established for BTBPE (Refs. 1 and 5).

Liver effects, including enlarged liver cells and/or hepatocellular lesions were common to all of these chemicals (Refs. 1 and 5). Furthermore, the diphenyl ether compounds all showed thyroid hyperplasia (Refs. 1 and 5). In the acute studies with PBDPE, tremors and reduced activity immediately after exposure were also observed (Ref. 1).

3. *Chronic effects.* Chronic data were developed for DBDPE in two separate studies. In a 2-year feeding study done by the National Toxicology Program (NTP), the NOAEL was >2,240 mg/kg/day in rats, the highest dose tested. In mice, there was a dose-related thyroid hyperplasia observed at the 3,200 and 6,400 mg/kg/day dose (Refs. 1 and 6). A 2-year feeding study in rats conducted by Kociba et al. (1975) at much lower doses saw no effect at 1 mg/kg/day, the highest dose tested (Refs. 1 and 7).

4. *Oncogenicity.* Only DBDPE has been examined for oncogenic potential. DBDPE administered to rats at doses of 0.01, 0.1, or 1.0 mg/kg/day for 2 years showed no evidence of oncogenicity (Ref. 1). However, another bioassay performed by NTP, which was specifically designed to determine oncogenic potential, found oncogenicity expressed in both male and female rats. There was also some evidence of oncogenicity in male mice, but no evidence in female mice (Ref. 7). Dose levels in the NTP study were targeted at 25,000 and 50,000 ppm in the diet (approximately 1,250 and 2,500 mg/kg/day). Specific lesions in the form of neoplastic nodules were noted in the liver of the male and female rats and hepatocellular carcinomas or adenomas in male mice. DBDPE has, as a result of this study, been classified as a possible human carcinogen, class C (Ref. 5).

5. *Mutagenicity.* As reported by the ITC, mutagenicity testing performed to date has been negative for all five of these substances. Ames *Salmonella* testing was completed, with and without activation, for all five substances. A *Saccharomyces* assay for OBDPE was

VOL 56 ISS 122 JE 25 1991 UMI

also done (Ref. 1). Beyond this, additional testing has been done only for DBDPE, consisting of an *in vitro* cytogenetic assay in Chinese hamster ovary (CHO) cells, an *in vitro* sister chromatid exchange assay, a mouse lymphoma assay, and an *in vivo* study in rats, examining rat bone marrow cells. DBDPE gave no evidence of mutagenicity in these tests (Ref. 1).

6. *Developmental toxicity.* OBDPE was administered by gavage to 10 rats per dose group at doses of 2.5, 10, 15, 25, or 50 mg/kg on days 6 through 15 of gestation. The results were reduced ossification, a decrease in mean fetal weight, and an increase in post-implantation losses in the high-dose group. The NOAEL was 2.5 mg/kg/day, while the LOAEL was 10 mg/kg/day, based on decreased fetal weight (Refs. 1 and 5). The observed toxic effect on the offspring was attributed by the study investigators to maternal toxicity, which was observed at the high dose level.

DBDPE when administered to rats at doses of 10, 100, or 1,000 mg/kg showed no statistically significant developmental toxicity. However, there was an increase in subcutaneous edema and delayed ossification in the fetuses, with effects seen even at the lowest dose (10 mg/kg) tested (Refs. 1 and 5).The ITC also reported that BTBPE, tested at doses from 30 mg/kg to 10,000 mg/kg in rats, and HBCD administered to rats at 0.01, 0.1, or 1 percent of the diet (high dose approximately 500 mg/kg) during days 0 to 20 of gestation, showed no developmental effects (Ref. 1).

7. *Reproductive effects.* Only DBDPE, of these five substances, has been tested for reproductive effects. In a single-generation study, DBDPE was administered to rats at doses of 3, 30, or 100 mg/kg for 90 days prior to mating and through lactation. DBDPE had no effects on the offspring of these rats (Ref. 1).

8. *Neurotoxicity.* No neurotoxicity testing has been performed for any of these substances. However, acute studies on PBDPE saw diminished motor activity in rats during 1-hour exposures by inhalation to concentrations up to 200 mg/L (about 4.8 mg/kg). In another PBDPE study in rats, forelimb tremors and reduced motor activity were observed at an oral dose ≥ 4,000 mg/kg, but not at the lower doses (Ref. 1).

E. Environmental Effects

1. *Acute and short-term effects.* Acute toxicity is usually determined by exposing test organisms for a relatively short period (e.g., 48 or 96 hours). To see the measured effect (usually lethality) the doses used must normally be much higher than those required to exert an often more subtle effect (e.g., decreased reproduction or growth) looked for in a longer-term, chronic test. For these BFRs, determining their acute toxicity is problematic. Limited aquatic toxicity data indicate that their acute toxicity values exceed their (very low) water solubility, obfuscating interpretation of the results. The EC50 of DBDPE to algae was >1 mg/L (Ref. 1). This value greatly exceeded DBDPE's water solubility, determined by Norris (1974) to be between 0.02 and 0.09 mg/L (Refs. 1 and 8). As reported by the ITC, BTBPE LC50 values for bluegill, rainbow trout, and killifish were 1,531, 1,410 and 230 mg/L, respectively (Ref. 1). An algal study with HBCD by Walsh et al. (1987) gave an EC50 between 0.01 and 0.14 mg/L, indicating high toxicity to algae but still exceeding HBCD's reported water solubility of 0.006 mg/L (Refs. 1 and 9). The highest treatment concentration of a toxicity study should not exceed the aqueous solubility limit of the chemical. Ambient concentrations of chemicals rarely, if ever, exceed the aqueous solubility limits.

2. *Chronic toxicity and bioconcentration studies.* No chronic studies were found for any of these BFRs. Bioconcentration factors (BCFs) were determined for PBDPE and OBDPE by exposing carp to each of these chemicals for 6 weeks. The BCFs were 5,380 for carp exposed to PBDPE at 105 µg/L, and 11,700 when the water concentration was 9.7 µg/L. Using the same methodology, the BCF for OBDPE was ≤ 3.6 (Ref. 1). In a nonstandard bioconcentration test, Norris et al. (1974) found that when rainbow trout were exposed to 20 µg/L DBDPE for 48 hours, the fish contained only 6 µg/L at the end of the test period, which may indicate slow uptake (Refs. 1 and 8).

Carp were also exposed to 0.27 or 0.028 mg/L BTBPE for 6 weeks. For these two exposure concentrations, the respective bioconcentration factors in carp were 27 and 43 (Ref.1).

No elimination half-lives were reported for any of these bioconcentration studies.

F. Chemical Fate

Limited chemical fate information was available for the BFRs. Water solubility values estimated or determined for these BFRs are 0.8 ppb (PBDPE), 20 to 30 ppb (OBDPE and DBDPE), 300 ppb (BTBPE), and 6 ppb (HBCD) (Ref. 1). Octanol/water partition (Log K_{ow}) coefficients, which are negatively correlated with water solubility, are given as 7.8 (PBDPE), 5.5 (OBDPE), 5.24 (DBDPE), 3.14 (BTBPE), and 5.81 (HBCD) (Ref. 1). The ITC also reported that for the three biphenyl ether compounds vapor pressures are estimated to be less than 10^{-6} mm Hg (Ref. 1). BTBPE and HBCD should have similarly low vapor pressures. From these factors, low water solubility, high Log K_{ow} values and low vapor pressure, the ITC anticipated that the BFRs are likely to partition to soil, sediments, and biota (Ref. 1). However, even though these compounds may have low vapor pressures, their very low water solubility means that they may volatilize from water and soil/sediments and hence also partition to the atmosphere.

There is little other fate information. Shake-flask biodegradation of BTBPE showed that BTBPE is degraded, although indicating slow rates; and an aerobic study showed that HBCD might be degraded under certain conditions (Ref. 1). Norris et al. (1974) found that DBDPE could be degraded by photolysis, although no rates of photolysis were reported. Similarly, BTBPE was degraded when exposed to ultraviolet (UV) light (Refs. 1 and 8).

III. Findings

EPA is basing its proposed testing of PBDPE, OBDPE, DBDPE, BTBPE, and HBCD on the authority of section 4(a)(1)(A) of TSCA. EPA considers these findings to be sufficient for the testing proposed in this rule. However, as noted in Unit I.B. of this preamble, EPA reserves its right to also make findings under TSCA section 4(a)(1)(B) in the future for these BFRs.

Under TSCA 4(a)(1)(A), EPA finds that the manufacturing, processing, distribution in commerce, use, or disposal of BFRs may present an unreasonable risk of injury to health and to the environment.

Although there were mixed results, available data indicate that these BFRs may have the potential to exert developmental toxicity effects as described in Unit II.D.6. of this preamble. EPA also believes that these BFRs may have the potential to bioaccumulate in animal tissues, in which case the full expression of their general toxicity may be missed in a test less than a full chronic assay.

Available data further indicate that DBDPE is a potential human carcinogen, as shown by positive oncogenicity results in rats and mice in a 2-year bioassay performed by the NTP (Ref.1). EPA also notes that PBDPE and OBDPE are structurally similar to DBDPE and may, therefore, also be potential human oncogens. Furthermore, the three diphenyl ethers and BTBPE are similar in structure to certain polychlorinated dibenzo-*p*-dioxins (PCDDs), polychlorinated biphenyls (PCBs), and polybrominated biphenyls (PBBs) that have been found to be carcinogenic in animal testing. One chemical which EPA finds structurally similar to the BFRs, tetrachlorobenzo-*p*-dioxin (TCDD), is also a potent immunosuppressor in several species of mammals (Ref. 11). Immunosuppression may be a mechanism enhancing tumor development (Ref. 11).

Immunosuppression is also an important toxicological endpoint in itself, leading to decreased disease resistance. In recent years major dolphin kills have occurred in the United States and Europe. Many of the dolphins found dead or dying were marked by the presence of BFRs, including PBDPE, in their tissues. Suppressed immune function was also seen. Although the putative cause of these deaths is toxic algal blooms ("red tide"), which may also cause immune suppression (Ref. 13), this finding is not certain and other possible causes, such as immune system damage due to toxic pollutants, are still being investigated (Refs. 12 through 16).

As emphasized by the ITC, PBDPE, DBDPE, and BTBPE have been detected in the environment (Ref. 1). PBDPE and DBDPE were found in air, soil, and sediments, and BTBPE was found in air and soil near two U.S. production facilities (Ref. 1). PBDPE has also been detected in dolphins found dead along the U.S. East Coast (Refs. 1 and 3). The ITC has cited several foreign references detailing PBDPE's presence in fish, marine mammals, and birds in Sweden, and in mussels and river sediment in Japan (Refs. 1). DBDPE was also detected in shellfish and sediments in Japan (Ref. 1).

DBDPE is on the list of toxic chemicals for the Toxics Release Inventory (TRI) established under section 313 of the Emergency Planning and Community Right-to-Know Act (Pub. L. 99-499, "EPCRA"). Facilities that manufacture, process or use DBDPE are required to annually report their DBDPE environmental releases to EPA. For the 1987 reporting year, the reported releases were over 155,000 pounds to air, over 20,000 pounds to water, and over 16,000 pounds to land (Ref. 1). While the other BFRs in this proposal are not on the TRI list, similar releases (adjusted for production volume) are likely because of their similarities in structure, manufacturing, processing, and use (Ref. 1).

Considering this evidence, EPA finds that the manufacturing, processing, distribution, use and/or disposal of these BFRs may pose an unreasonable risk of injury to health or to the environment due to developmental, chronic, oncogenic, or immunosuppressant effects. EPA also finds, based on information provided to EPA by the ITC and data EPA possesses, that for all of the proposed testing, insufficient data exist about the health or environmental effects of these BFRs to reasonably determine or predict the impacts of their manufacture, processing, distribution, use and/or disposal; and that testing is needed to develop such data (Refs. 1, 3, and 5).

IV. Proposed Rule and Test Standards

EPA is proposing that health and environmental effects and chemical fate testing be conducted on the BFRs in accordance with specific test guidelines set forth in Title 40 of the Code of Federal Regulations (CFR) as enumerated below in this document, except that the earthworm toxicity, chironomid toxicity, and revised combined chronic toxicity/oncogenicity test guidelines are proposed as written in this notice, and the immunotoxicity and biodegradation in water/sediment test guidelines are incorporated by reference in this notice.

A. Proposed Health Effects Testing and Test Standards

1. *Subchronic and chronic effects.* EPA is proposing subchronic toxicity testing for HBCD as specified in 40 CFR 798.2650.

2. *Neurotoxicity.* EPA is proposing neurotoxicity testing, including neuropathology, motor activity, and a functional observational battery for PBDPE, OBDPE, DBDPE, BTBPE, and HBCD as specified in 40 CFR 798.6400, 798.6200, and 798.6050.

3. *Reproductive effects.* EPA is proposing reproductive effects testing for PBDPE, OBDPE, BTBPE, and HBCD as specified in 40 CFR 798.4700. EPA finds the existing reproductive effects data available for DBDPE are inadequate (EPA believes that a 2-generation study is necessary for adequacy) and is therefore proposing reproductive effects testing for DBDPE, also. If this testing on PBDPE and DBDPE, which EPA is proposing to be performed prior to testing OBDPE, indicates to EPA that lack of reproductive effects cannot be reasonably predicted for OBDPE (i.e., if either PBDPE or DBDPE elicit reproductive effects), then EPA would require the initiation of testing on OBDPE by certified letter to the test sponsor(s).

4. *Developmental toxicity.* EPA is proposing developmental toxicity testing for PBDPE, as specified in 40 CFR 798.4900, in two mammalian species, a rat and a non-rodent. EPA is also proposing developmental effects studies in two species for OBDPE and HBCD. A developmental effects study in rats submitted to EPA for HBCD is inadequate due to incomplete reporting and to too few animals sampled in the study. A study in rats submitted for OBDPE is also not considered adequate by EPA because of too few animals used in the study (EPA requires 20 animals per dose group versus the 10 used). For DBDPE and BTBPE, EPA is proposing developmental effects testing in a non-rodent species only. Studies in rats submitted for DBDPE and BTBPE are adequate.

5. *Mutagenicity.* EPA is proposing tiered mutagenicity testing for each of the BFRs. For PBDPE, OBDPE and BTBPE, the available (negative) *Salmonella*/Ames data are adequate. For HBCD, the available *Salmonella* data (weakly positive) are also adequate. However, the *Salmonella* data on OBDPE are inconclusive, and, therefore, inadequate. Consequently, EPA is proposing *Salmonella* testing as specified in 40 CFR 798.5265 for OBDPE.

EPA is also proposing an *in vitro* gene mutation assay for PBDPE, OBDPE, BTBPE, and HBCD as specified in 40 CFR 798.5300. Available data on DBDPE are adequate for this effect. EPA is further proposing an *in vivo* cytogenetic assay, either as specified in 40 CFR 798.5385 (bone marrow aberrations) or 40 CFR 798.5395 (bone marrow micronucleus) for PBDPE, OBDPE, DBDPE, BTBPE, and HBCD. An available *in vivo* bone marrow assay, presented no data in support of the conclusion that DBDPE does not induce chromosomal aberrations (Ref. 17). Therefore, EPA considers this study inadequate to address the concern for *in vivo* gene mutation effects for DBDPE.

EPA is also proposing that, for any of these substances, if either the proposed *Salmonella* or *in vitro* gene mutation testing yields positive mutagenicity results, then a sex-linked recessive lethal (SLRL) test in *Drosophila melanogaster* shall be conducted for that substance in accordance with 40 CFR 798.5275. If the SLRL test in *Drosophila melanogaster* is positive for any of these substances, then either a mouse visible or mouse biochemical specific locus test (MVSL or MBSL) shall also be conducted for that substance as specified in 40 CFR 798.5200 (MVSL) or 40 CFR 798.5195 (MBSL).

EPA is further proposing that, for any of these substances, if the proposed *in vivo* cytogenetics assay yields positive results, then a dominant lethal assay shall be conducted for that substance as specified in 40 CFR 798.5450. If the

VOL 56 ISS 122 JE 25 1991 UMI

dominant lethal assay is positive for any of these substances then a heritable translocation assay would also be conducted for that substance in accordance with 40 CFR 798.5460.

6. *Oncogenicity and chronic toxicity.* EPA is proposing oncogenicity testing for PBDPE, OBDPE, BTBPE in mice as specified in 40 CFR 798.3300; EPA is further proposing that chronic effects and oncogenicity testing in rats be combined as specified in 40 CFR 798.3320 (which is modified in this proposed rule).

For HBCD, EPA is proposing oncogenicity testing in both rats and mice as specified in 40 CFR 798.3300 if positive mutagenicity results are obtained in either the gene mutation cells in culture assay, the sex-linked recessive lethal assay in *Drosophila melanogaster*, or the *in vivo* cytogenetics assay.

B. Proposed Environmental Effects Testing and Test Standards

For the following proposed environmental effects testing of the three diphenyl ethers, EPA is proposing that testing first be conducted on PBDPE. Only if testing on PBDPE yields a specified effect, would testing of OBDPE and DBDPE be required. EPA believes a tiered approach to testing the three diphenyl ethers for environmental effects is reasonable, given their similar structures and the possibility of limited toxicity or bioconcentration being expressed because of the large molecular size and low water solubility of these BFRs (Ref. 1). The alkyl phthalates consent order (54 FR 618, January 9, 1989) employed a similar approach.

EPA does not believe it can apply the results for PBDPE to BTBPE or HBCD and therefore testing of BTBPE and HBCD would proceed independently of the PBDPE testing.

EPA also believes, given the anticipated chemical and physical properties of the BFRs, that before testing for environmental effects begins, basic chemical fate data are needed on water solubility, vapor pressure, and degradation rates. The results of the chemical fate tests would identify upper levels for aquatic test concentrations and indicate potential testing problems. EPA is therefore proposing that this testing, with a reporting deadline of 6 months, be performed prior to initiating the environmental effects testing.

1. *Algal testing.* EPA is proposing that an algal assay be conducted for PBDPE, OBDPE, DBDPE, BTBPE, and HBCD as specified in 40 CFR 797.1050. Data on HBCD are inadequate for this effect due to questionable test substance purity. The analytical standard for measuring treatment concentrations was also not reported. Testing for OBDPE and DBDPE would be conditioned on obtaining from the algal testing of PBDPE an EC50 of $\leq$ 10 μg/L.

2. *Fish chronic toxicity.* EPA is proposing that chronic toxicity to fish be evaluated by conducting fish early life stage toxicity testing for rainbow trout and sheepshead minnow for PBDPE, OBDPE, DBDPE, BTBPE, and HBCD as specified in 40 CFR 797.1600. Testing for OBDPE and DBDPE for both fish species would be conditioned on obtaining from the early life stage testing of PBDPE a geometric mean maximum acceptable toxicant concentration (MATC) value of $\leq$ 10 μg/L.

3. *Invertebrate chronic toxicity.* EPA is proposing that aquatic invertebrate toxicity testing be conducted for PBDPE, OBDPE, DBDPE, BTBPE, and HBCD as specified in 40 CFR 797.1330, for *daphnids*, and 40 CFR 797.1950, for mysid shrimp. Tests for OBDPE and DBDPE, for both organisms, would be conditioned on obtaining from either of the invertebrate chronic tests of PBDPE a geometric mean MATC value of $\leq$ 10 μg/L.

4. *Benthic organism toxicity.* EPA believes that, because of the expected tendency of these BFRs to partition into aquatic sediments, chronic testing on benthic organisms should be conducted with the midge (*Chironomus tetans* or *C. riparius*) for PBDPE, OBDPE, DBDPE, BTBPE, and HBCD as proposed in a new 40 CFR 795.135. Testing for OBDPE and DBDPE would be conditioned on obtaining from the benthic organism testing a geometric mean MATC value of $\leq$ 100 mg PBDPE/kg dry weight of sediment.

5. *Terrestrial organism toxicity.* EPA is proposing that toxicity to terrestrial organisms be evaluated for PBDPE, OBDPE, DBDPE, BTBPE, and HBCD by conducting mallard reproduction testing as specified in 40 CFR 797.2150, and earthworm toxicity testing as proposed in a new 40 CFR 795.150. Mallard reproduction testing for OBDPE and DBDPE would be conditioned on obtaining from the mallard testing of PBDPE a NOEL of $\leq$ 500 ppm; and earthworm toxicity testing for OBDPE and DBDPE would be conditioned on obtaining from the earthworm testing of PBDPE an EC50 of $\leq$ 100 mg PBDPE/kg dry weight of soil.

6. *Terrestrial plant toxicity.* EPA is proposing that toxicity to terrestrial plants be evaluated for PBDPE, OBDPE, DBDPE, BTBPE, and HBCD by conducting seed germination/root elongation toxicity testing as specified in 40 CFR 797.2750 and early seedling growth toxicity testing as specified in 40 CFR 797.2800. Both tests for OBDPE and DBDPE would be conditioned on obtaining an EC50 of $\leq$ 100 mg PBDPE/kg dry weight of soil in either test.

7. *Immunotoxicity.* EPA is proposing that immunotoxicity testing be conducted for PBDPE, OBDPE, DBDPE, BTBPE, and HBCD using the Jerne Plaque Assay, which is proposed to be incorporated by reference. Immunotoxicity testing for OBDPE and DBDPE would be conditioned on obtaining from the immunotoxicity testing of PBDPE a NOEL of $\leq$ 500 ppm.

8. *Bioconcentration.* EPA is proposing that bioconcentration testing be conducted in an acceptable fish species (fathead minnow, *Pimephales promelas*) for PBDPE, OBDPE, DBDPE, BTBPE, and HBCD as specified in 40 CFR 797.1520 (but modified to extend the exposure period to 91 days). Bioconcentration testing for OBDPE, and DBDPE would be conditioned on obtaining a bioconcentration factor of $\geq$ 1,000 with PBDPE.

C. Proposed Chemical Fate Testing and Test Standards

1. *Water solubility.* EPA is proposing that water solubility be determined using the generator column method for PBDPE, OBDPE, DBDPE, BTBPE, and HBCD as specified in 40 CFR 796.1860. EPA is also proposing that BFRs, which may have a water solubility of 10 ppb or less, be analyzed utilizing an electron-capture detector. Since an accurate measurement technique for the BFRs is available, these water solubilities shall be determined and reported, even if they are less than 10 ppb. Although EPA has water solubility figures for these substances, they are only estimates in the case of PBDPE, and were determined by inappropriate methodology in the case of OBDPE and DBDPE. Although the ITC did not recommend water solubility testing for BTBPE and HBCD, EPA believes a more rigorous procedure is warranted for these low water soluble compounds. Specifically, EPA is proposing that water solubility be determined not only in pure water, but also in dilution water. This is because water solubility as it is normally determined (in distilled water) may differ from what is obtained in the (dilution) water used for the aquatic toxicity tests. An accurate determination in dilution water at the salinity and temperature to be used in the toxicity tests is necessary to select the maximum concentration of test chemical in these tests.

2. *Octanol/water partitioning.* EPA is proposing that octanol/water partition coefficients (K_{ow} values) be determined using the generator column method for PBDPE, OBDPE, and DBDPE, as specified in 40 CFR 796.1720. EPA finds present K_{ow} values inadequate because of inappropriate test methodologies.

3. *Vapor pressure.* EPA is proposing that vapor pressure be determined for PBDPE, OBDPE, DBDPE, BTBPE, and HBCD as specified in 40 CFR 796.1950.

4. *Sediment and soil adsorption.* EPA is proposing that sediment and soil adsorption testing be conducted for PBDPE, OBDPE, DBDPE, BTBPE, and HBCD as specified in 40 CFR 796.2750.

5. *Direct and indirect photolysis.* EPA is proposing that direct and indirect photolysis testing be conducted on the pure compounds; i.e., congenerically pure PBDPE, OBDPE, DBDPE, BTBPE and HBCD (see Unit IV.D. of this preamble), as specified in 40 CFR 796.3780, 796.3800 and 796.3700.

6. *Aerobic biodegradation in water/sediment.* EPA is proposing that aerobic biodegradation in water/sediment be conducted for PBDPE, OBDPE, DBDPE, BTBPE, and HBCD using the ecocore system described by A.W. Bourquin, which is proposed to be incorporated by reference. EPA has examined the method described in A.W. Bourquin and has developed a sample matrix, available in the public record, for conducting preliminary and definitive core-chamber biodegradation tests using this method (Ref. 16). Testing for OBDPE and DBDPE would be conditioned on obtaining mineralization to CO_2 greater than 10 percent for PBDPE.

7. *Anaerobic biodegradation.* EPA is proposing that anaerobic biodegradation testing be conducted for PBDPE, OBDPE, DBDPE, BTBPE, and HBCD as specified in 40 CFR 796.3140. The ITC noted, and EPA anticipates, that these substances may undergo reductive debromination. Therefore, this anaerobic biodegradation testing on OBDPE and DBDPE is not conditioned on the results for PBDPE.

D. Test Substances

EPA is proposing testing of PBDPE, OBDPE, DBDPE, BTBPE, and HBCD of at least 98 percent purity as the test substances. EPA recognizes that the three diphenyl ethers are not pure congeneric forms, with each having a single level of bromination (i.e., purely "penta," "octa" or "deca" brominated forms). EPA also recognizes that they are not pure isomers (i.e., brominated not only at a specific level, but also at specific positions on the diphenyl ether molecule). Instead, they are a complex composition of diphenyl ether compounds brominated to different degrees and at different positions (Ref. 16). For example, PBDPE is composed of primarily tetra-, penta-, and hexabrominated diphenyl ethers but with even higher and lower brominated forms present in commercial PBDPE.

EPA is proposing that the test substance reflect the composition of the commercial substance in terms of the mix of the individual brominated congeners present in the commercial substance. The purity specifications proposed above pertain to reducing the amount of chemicals other than brominated diphenyl ethers present in the test substance. EPA is further proposing that the test substance being used in each test be analyzed to determine the percent composition of the different brominated congeners present.

EPA has specified relatively pure substances for testing because EPA is interested in evaluating the effects attributed to the subject substances themselves. This increases the likelihood that any toxic effects observed are related to the subject BFRs and not to any impurities. Potential test sponsors for the three diphenyl ethers and for BTBPE should also be aware of EPA's concern that these BFRs may be contaminated with halogenated dibenzodioxins (HDDs)/dibenzofurans (HDFs) as set forth in 40 CFR part 766. Given the known toxicity of these impurities, test sponsors should take special care to eliminate or minimize any possible contamination with HDDs/HDFs, where they believe these contaminants may be present.

EPA solicits comments on the test substance composition. (see Unit V of this preamble).

E. Persons Required to Test

Because of the findings in Unit III of this preamble, EPA is proposing that persons who manufacture (including import) and/or process, or who intend to manufacture and/or process PBDPE, OBDPE, DBDPE, BTBPE and/or HBCD, other than as an impurity, at any time from the effective date of the final test rule to the end of the reimbursement period, be subject to the testing requirements. Byproduct manufacturers and importers of PBDPE, OBDPE, DBDPE, BTBPE, and/or HBCD are considered manufacturers under this rule. As explained in 40 CFR part 790, manufacturers but not small quantity manufacturers, processors, or research and development manufacturers of PBDPE, OBDPE, DBDPE, BTBPE, and/or HBCD would be required to submit letters of intent or exemption applications.

EPA has specified relatively pure substances for testing. EPA would not require submission of equivalence data as a condition for exemption from testing since EPA is interested in evaluating the effects attributable to PBDPE, OBDPE, DBDPE, BTBPE, and/or HBCD.

F. Reporting Requirements

Data developed under the final rule would be reported in accordance with TSCA Good Laboratory Practice (GLP) Standards, 40 CFR part 792.

As required by section 4(b)(1)(C) of TSCA, EPA is proposing specific reporting requirements for each of the proposed tests for PBDPE, OBDPE, DBDPE, BTBPE, and HBCD as specified in the following Table 1.

TABLE 1.—PROPOSED HEALTH AND ENVIRONMENTAL EFFECTS AND CHEMICAL FATE TESTING AND REPORTING REQUIREMENTS FOR THE BFRS

Test Standard in 40 CFR	Test substances	Reporting deadline for final report(months)[1]	Number interim (6 month) reports required[1]
A. Health Effects:			
Subchronic toxicity[2] (§ 798.2650)	HBCD	18	2
Combined chronic toxicity/oncogenicity (§ 798.3320)	PBDPE, OBDPE, BTBPE	53	8
Oncogenicity (§ 798.3300)	PBDPE, OBDPE, BTBPE, HBCD	53	8

VOL 56 ISS 122 JE 25 1991 UMI

TABLE 1.—PROPOSED HEALTH AND ENVIRONMENTAL EFFECTS AND CHEMICAL FATE TESTING AND REPORTING REQUIREMENTS[1] FOR THE BFRS—Continued

Test Standard in 40 CFR	Test substances	Reporting deadline for final report(months)[1]	Number interim[2] monthly reports required[1]
Neurotoxicity (§ 798.6065, 798.6200, 798.6400)	PBDPE, OBDPE, DBDPE, BTBPE,HBCD	21	3
Reproductive toxicity[3] (§ 798.4700)	PBDPE, OBDPE, BTBPE, HBCD, DBDPE	29	4
Developmental toxicity (§ 798.4900)	PBDPE, OBDPE, DBDPE, BTBPE, HBCD	12	1
Salmonella assay (§ 798.5265)	OBDPE	9	1
In vitro gene mutation assay (§ 798.5300)	PBDPE, OBDPE, BTBPE, HBCD	10	1
In vivo cytogenetics assay (§ 798.5385 or 798.5395)	PBDPE, OBDPE, DBDPE, BTBPE, HBCD	14	2
Drosophila sex-linked recessive lethal test[3] (§ 798.5275)	PBDPE, OBDPE, DBDPE, BTBPE, HBCD	22	1
Mouse specific locus test[3] (§ 798.5200 or 798.5195)	PBDPE, OBDPE, DBDPE, BTBPE, HBCD	51	8
Rodent dominant lethal test[3] (§ 798.5450)	PBDPE, OBDPE, DBDPE, BTBPE, HBCD	36	3
Heritable translocation test[3] (§ 798.5460)	PBDPE, OBDPE, DBDPE, BTBPE, HBCD	25	4
B. Environmental Effects:			
Algal test[3] (§ 797.1050)	PBDPE, OBDPE, DBDPE, BTBPE, HBCD	15 [3]24	1 1
Rainbow trout life stage test[3] (§ 797.1600)	PBDPE, OBDPE, DBDPE, BTBPE, HBCD	18 [3]30	1 1
Sheepshead minnow life stage test[3] (§ 797.1600)	PBDPE, OBDPE, DBDPE, BTBPE, HBCD	18 [3]30	1 1
Daphnid chronic test[3] (§ 797.1330)	PBDPE, OBDPE, DBDPE, BTBPE, HBCD	18 [3]30	1 1
Mysid shrimp chronic test[3] (§ 797.1950)	PBDPE, OBDPE, DBDPE, BTBPE, HBCD	15 [3]24	1 1
Chironomid sediment toxicity test[3] (§ 795.135)	PBDPE, OBDPE, DBDPE, BTBPE, HBCD	18 [3]30	1 1
Mallard reproduction test[3] (§ 797.2150)	PBDPE, OBDPE, DBDPE, BTBPE, HBCD	18 [3]30	1 1
Earthworm toxicity test[3] (§ 795.150)	PBDPE, OBDPE, DBDPE, BTBPE, HBCD	18 [3]30	1 1
Seed germination/root elongation test[3] (§ 797.2750)	PBDPE, OBDPE, DBDPE, BTBPE, HBCD	15 [3]24	1 1
Early seedling growth test[3] (§ 797.2800)	PBDPE, OBDPE, DBDPE, BTBPE, HBCD	15 [3]24	1 1
Immunotoxicity test[3]	PBDPE, OBDPE, DBDPE, BTBPE, HBCD	15 [3]24	1 1
Bioconcentration[3] (§ 797.1520)	PBDPE, OBDPE, DBDPE, BTBPE, HBCE	18 [3]30	1 1
C. Chemical Fate:			
Water solubility (§ 796.1860)	PBDPE, OBDPE, DBDPE, BTBPE, HBCD	6	0
Log octanol/water partition testing (§ 796.1720)	PBDPE, OBDPE, DBDPE	6	0
Vapor pressure testing (§ 796.1950)	PBDPE, OBDPE, DBDPE, BTBPE, HBCD	6	0
Sediment and soil adsorption testing (§ 796.2750)	PBDPE, OBDPE, DBDPE, BTBPE, HBCD	6	0
Direct and indirect photolysis testing (§ 796.3780, 796.3800, 796.3700)	PBDPE, OBDPE, DBDPE, BTBPE,HBCD	6	0
Biodegradation testing in water/sediment[3]	PBDPE, OBDPE, DBDPE, BTBPE, HBCD	12 [3]24	1 1
Anaerobic biodegradation testing (§ 796.3140)	PBDPE, OBDPE, DBDPE, BTBPE, HBCD	6	0

[1] Figure indicates the reporting deadline in months calculated from the effective date of the final rule or from the date of test sponsor notification by certified letter to initiate test where such notification is specified.
[2] For one or more of these test substances, this test requirement is conditional as described in Unit IV of this preamble.
[3] This figure is the reporting deadline for testing on OBDPE and DBDPE, which is conditioned on results from testing PBDPE.

V. Issues for Comment

EPA welcomes comment on this proposed testing. In particular, EPA solicits comment in the following four areas:

- Test substance composition.
- Categorization for testing purposes.
- New test guidelines.
- Route of test substance administration.

A. Test Substance Composition

EPA is proposing that the test substance used in the testing should represent, with some purity specifications, what is actually manufactured, rather than attempting to test a single congeneric substance (i.e., a "pure but representative composition" of 4-, 5-, and 6-brominated compounds, which typifies commercial PBDPE is proposed to be tested instead of a composition confined to pentabrominated isomers). On the other hand, EPA also believes that it could be beneficial to use a congenerically pure substance to reduce the number of potentially confounding variables in any future hazard or risk assessment activities for these substances. However, EPA recognizes the potential difficulty in isolating congenerically pure substances of this type, and EPA is also concerned that if congenerically pure substances were used then these test substances would not fairly represent what humans are actually exposed to or what is actually released to the environment (i.e., the commercial mixture). For these reasons, EPA is proposing to require testing of representative test substances composed of differing congeners, similar to what is sold commercially. Nonetheless, EPA is also considering that testing for any or all of the proposed tests may be of congenerically pure substances, if comments and/or data received prior to promulgation convince EPA that these would provide the most useful or interpretable data. For example, EPA is proposing that congenerically pure substances be used in the direct and indirect photolysis testing. EPA believes that the technical limitations inherent in this testing require that congenerically pure substances be used to obtain useful results.

For meaningful interpretation of results, EPA needs to know what is present in the test substance, and EPA is therefore proposing that the test substances be analyzed to determine overall purity and the percentage of each congener present in the mixture. Further, EPA is proposing that, when tested as a commercially representative substance, PBDPE contain not less than 58 percent pentabrominated diphenyl ethers, that OBDPE contain not less than 30 percent octabrominated diphenyl ethers, and that DBDPE contain not less than 98 percent decabrominated diphenyl ethers, and also that BTBPE should contain not less than 98 percent pure 1,2-bis(2,4,6-tribromophenoxy)ethane, and HBCD should contain not less than 98 percent pure hexabromocyclododecane.

For the photolysis tests and any others in which PBDPE, OBDPE, and DBDPE are tested as congenerically pure substances, EPA is proposing that the respective penta-, octa-, and decabrominated isomers make up not less than 98 percent of these substances. EPA is specifically soliciting comments on testing these BFRs in forms representative of what is produced commercially or, instead, as pure congeneric forms; and also on the proposed purity standards and chemical analyses.

B. Chemical Categorization

EPA has concluded that the three diphenyl ethers, PBDPE, OBDPE, and DBDPE, are similar enough in structure to be considered a single category for certain testing purposes. For example, EPA is proposing that reproductive effects testing for OBDPE be conditioned on receiving a positive response with PBDPE or DBDPE. EPA is also proposing to condition the environmental effects testing and one chemical fate test for OBDPE and DBDPE on the results obtained from PBDPE.

EPA is soliciting comment on the scientific appropriateness of conditioning testing in this way for these BFR substances, and also on whether the categorization proposed in this notice is too limited or too broad in the context of each test.

C. Test Guidelines

EPA is proposing three guidelines which are either new or modified, and is also proposing methodologies for two additional tests, which are incorporated by reference.

Both the Chironomid Test and the Earthworm Toxicity Test standards are based on new EPA test guidelines. EPA believes that these tests are necessary, and will help to evaluate the potential risk to benthic aquatic and terrestrial organisms, respectively, from exposure to the BFRs.

The Combined Oncogenicity/Chronic Toxicity guideline, 40 CFR 798.3320, has never been promulgated as a test standard in any test rule. EPA is proposing that certain aspects of the Combined Oncogenicity/Chronic Toxicity guideline be made "shall" rather than "should" testing requirements to make these parts of the guideline enforceable. EPA considers a "shall" requirement to be an essential aspect of the test methodology. Violation of a "shall" requirement is considered a serious breach of test performance and may result in penalties and/or non-acceptance of the test results by EPA.

A fourth test, the Jerne Plaque Assay, is being proposed for BFRs. The Jerne Plaque Assay would be incorporated by reference in the final test rule. The Jerne Plaque Assay evaluates immunotoxicity in mice and is a standard test for this effect. Although this test is a surrogate human health effects test, EPA believes that this test is also adequate for evaluating the risk of possible immunotoxicity effects in environmental species, especially mammals.

Finally, EPA is proposing an aerobic biodegradation test in water/sediment (also known as the ecocore test system) using the methodology of A.W. Bourquin, which would be incorporated by reference in the final test rule. EPA has required the ecocore test system in previous EPA test rules (e.g., in the final test rule for tetrabromobisphenol A, 52 FR 25219, July 6, 1987).

EPA solicits comment on these five protocols.

D. Route of Test Substance Administration

Although a major route of exposure of humans to the BFRs is by inhalation, it is difficult in toxicity testing to maintain consistent, reliable exposures of powdery solid test substances like the BFRs using the inhalation route of administration. Therefore, EPA is proposing that the health effects testing be conducted by the oral route. Specifically, EPA is proposing testing by gavage, because it believes that this route will provide a consistent, reliable dose and reliable results. EPA does not believe, in this case, that the toxicology of the BFRs using the oral route will be significantly different from the inhalation route. Previous testing done on the BFRs by the oral route has shown effects on the liver consistent with those of a 14-day inhalation study. Furthermore, the only positive oncogenicity assay (with DBDPE) was also performed using an oral (dietary) route of administration. However, EPA is soliciting comments on this issue, and if comments indicate that the inhalation (or other route) should be used, in any or all testing, then EPA may require that route of administration.

VI. Economic Analysis of the Proposed Rule

EPA prepared an economic analysis that evaluates the potential for significant economic impacts as a result of the proposed testing. (Ref. 2). Total testing costs are estimated to range from $11.6 to $19.1 million. These costs have been annualized and compared with annual revenue as an indication of potential impact. These annualized costs represent equivalent constant costs which would have to be recouped each year of the payback period to finance the testing expenditure in the first year.

The annualized test costs, using a 7 percent cost of capital over a period of

VOL 56 ISS 122 JE 25 1991 UMI

15 years, are as follows: DBDPE — $102,000 to $154,000; HBCD — $254,000 to $427,000; BPDPE and BTBPE -$308,000 to 504,000; and OBDPE — $308,000 to $505,000. The production volume and price information have been claimed confidential and are contained in the economic analysis, which is being treated as CBI.

VII. Availability of Test Facilities and Personnel

EPA has determined that test facilities and personnel are available to perform the testing specified in this proposed rule. (Ref. 19).

VIII. Public Meeting

If requests for oral comments are submitted, EPA will hold a public meeting in Washington, DC after the close of the public comment period. Persons who wish to attend or to present comments at the meeting should call Mary Louise Hewlett, Chemical Testing Branch (202) 475–8162 by August 9, 1991. The meeting will be open to the public, but active participation will be limited to those who requested to comment and EPA representatives. Participants are requested to submit copies of their statements by the meeting date. These statements and a transcript of the meeting will become part of EPA's rulemaking record.

IX. Comments Containing Confidential Business Information

All comments will be placed in the public file unless they are clearly labeled as Confidential Business Information (CBI) when they are submitted. While a part of the record, CBI comments will be treated in accordance with 40 CFR part 2. A sanitized version of all CBI comments should be submitted, if possible, to EPA for the public file.

It is the responsibility of the commenter to comply with 40 CFR part 2 in order that all materials claimed as confidential may be properly protected. This includes, but is not limited to, clearly indicating on the face of the comment (as well as on any associated correspondence) that CBI is included, and marking "CONFIDENTIAL", "TSCA CBI" or similar designation on the face of each document or attachment in the comment which contains CBI. Should information be put into the public file because of failure to clearly designate its confidential status on the face of the comment, EPA will presume any such information which has been in the public file for more than 30 days to be in the public domain.

X. Rulemaking Record

EPA has established a record for this rulemaking (docket number OPTS–42115). This record contains the basic information considered by EPA in developing this proposal and appropriate Federal Register notices. EPA will supplement this record as necessary.

A public version of the record, from which all CBI has been deleted, is available for inspection in the TSCA Public Reading Room, G–004, NE Mall, 401 M St., SW., Washington, DC 20460, from 8 a.m. to 12 noon, and 1 p.m. to 4 p.m., Monday through Friday, except legal holidays. The record includes the following information:

A. Supporting Documentation

(1) Notice containing the ITC designation.

(2) Federal Register notices pertaining to this rule consisting of:

(a) Notice of final rule on EPA's TSCA Good Laboratory Practice Standards (54 FR 34034; August 17, 1989).

(b) Notice of final rule on data reimbursement policy and procedures (48 FR 31786, July 11, 1983).

(3) TSCA test guidelines cited as test standards for this rule.

(4) Communications consisting of:

(a) Written letters.

(b) Contact reports of telephone conversations.

(c) Meeting summaries.

XI. Other Regulatory Requirements

A. Executive Order 12291

Under Executive Order 12291, EPA must judge whether a rule is "major" and therefore subject to the requirement of a Regulatory Impact Analysis. EPA has determined that if promulgated, this proposed test rule would not be major because it does not meet any of the criteria set forth in section 1(b) of the Order; i.e., it would not have an annual effect on the economy of at least $100 million, would not cause a major increase in prices, and would not have a significant adverse effect on competition or the ability of U. S. enterprises to compete with foreign enterprises.

This proposed rule was submitted to the Office of Management and Budget (OMB) for review as required by Executive Order 12291. Any written comments from OMB to EPA, and any EPA response to those comments, are included in the rulemaking record.

B. Regulatory Flexibility Act

Under the Regulatory Flexibility Act (5 U.S.C. 601 et seq., Pub. L. 96–354, September 19, 1980), EPA is certifying that this test rule, if promulgated, would not have a significant impact on a substantial number of small businesses because: (1) They would not be expected to perform testing themselves, or to participate in the organization of the testing effort; (2) they would experience only very minor costs, if any, in securing exemption from testing requirements; and (3) they are unlikely to be affected by reimbursement requirements.

C. Paperwork Reduction Act

OMB has approved the information collection requirements contained in this proposed rule under the provisions of the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 et seq., and has assigned OMB Control number 2070–0033.

Public reporting burden for this collection of information is estimated to average 68,800 hours per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. The total public reporting burden is estimated to be 206,400 hours for all responses.

Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Chief, Information Policy Branch, PM–223, U.S. Environmental Protection Agency, 401 M St., SW., Washington, DC 20460; and to the Office of Management and Budget, Paperwork Reduction Project (2070–0033), Washington DC 20503. The final rule will respond to any OMB or public comments on the information collection requirements contained in this proposal.

List of Subjects in 40 CFR Parts 795, 796 and 799

Chemicals, Chemical export, Chemical fate, Environmental effects, Environmental protection, Hazardous substances, Health effects, Incorporation by reference, Laboratories, Reporting and recordkeeping requirements, Testing.

Dated: June 17, 1991.

Victor J. Kimm,

Acting Assistant Administrator for Pesticides and Toxic Substances.

Therefore, it is proposed that 40 CFR chapter I, subchapter R, be amended as follows:

1. In part 795

PART 795 — [AMENDED]

a. By revising the authority citation for part 795 to read as follows:

Authority: 15 U.S.C. 2601, 2603

b. By adding § 795.135 to read as follows:

§ 795.135 Chironomid sediment toxicity test.

(a) *Purpose.* This guideline may be used to develop data on the toxicity and bioavailability of chemical substances and mixtures ("chemicals") in sediments subject to environmental effects test regulations under the Toxic Substances Control Act (TSCA) (Pub. L. 94–469,90 Stat. 2003, 15 U.S.C. 2601 et. seq.). This guideline prescribes tests to be used to develop data on the toxicity of chemicals present in sediments to chironomid larvae (midges). The U.S. Environmental Protection Agency (EPA) will use data from these tests in assessing the hazard of a chemical to the environment.

(b) *Definitions.* The definitions in section 3 of TSCA and 40 CFR part 792, Good Laboratory Practice Standards (GLPS), apply to this test guideline. In addition, the following definitions also apply:

Bioconcentration Factor (BCF) is the quotient of the concentration of a test substance in tissues of the chironomids at or over a specific time period of exposure divided by the concentration of test substance in the overlying water, interstitial water, or in the sediments at or during the same time period.

Cation exchange capacity (CEC) means the sum total of exchangable cations that a sediment can absorb. The CEC is expressed in milliequivalents of negative charge per 100 grams (meg/100g) or milliequivalents of negative charge per gram (meq/g) of sediment (dry weight).

EC50 means an experimentally-derived concentration of test substance in the sediment that is calculated to affect 50 percent of a test population during continuous exposure over a specified period of time.

Flow-through means a continuous or intermittent passage of dilution water through a test chamber or culture tank with no recycling of water.

Geometric mean MATC is the calculated mean between the highest test concentration with no statistically significant effects and the lowest concentration showing significant effects.

Interstitial water is liquid which is found in or directly adjacent to sediments and can be extracted from these sediments by several processes.

Loading means the ratio of chironomid biomass (grams wet weight) to the volume (liters) of test solution in a test chamber at a point in time or passing through the test chamber during a specific interval.

Lowest observed effect concentration (LOEC) means the lowest treatment (i.e., test concentration) of a test substance that is statistically different in adverse effect on a specific population of test organisms from that observed in controls.

MATC (Maximum Acceptable Toxicant Concentration) means the maximum concentration at which a chemical may be present and not be toxic to the test organism.

No observed effect concentration (NOEC) means the highest treatment (i.e., test concentration) of a test substance that shows no statistical difference in adverse effect on a specific population of test organisms from that observed in controls.

Overlying water is liquid which is found above or placed over sediments. For purposes of this guideline, overlying water is equivalent to the term "water column".

Partial life-cycle toxicity test is one which uses a sensitive portion of the life of a test organism (second instar of midges) to assess the effects of test substances.

Redox potential (E_h) means the oxidizing or reducing intensity or condition of a solution expressed as a current, referenced against a hydrogen electrode. Within wet sediments

VOL 56 ISS 122 JE 25 1991 UMI

reducing conditions prevail such that zero or negative E_h values may be present.

Sediment is matter which settles to the bottom of a liquid in natural situations or a substrate prepared from a combination of natural sediments and artificial components. "Sediment" is equivalent to the term "solid-phase sediments" in this guideline.

Sediment partition coefficient is the ratio of the concentration of test substance on the sediment to the concentration in the overlying water. For the purposes of this guideline, this term is identical to "soil-water partition coefficient."

Spiking is the addition of a test substance to a negative control and/or reference sediment so that the toxicity of a known quantity of test substance can be determined in a known nontoxic sediment. Often a solvent carrier is needed for low-water soluble test substances.

Subchronic toxicity test means a method used to determine the concentration of a test substance in water and for sediment which produces an adverse effect on chironomids over a partially extended period of time. In this guideline, mortality and growth (expressed as change in wet weight of midges) are the criteria of toxicity.

(c) *Test procedures* — (1) *Summary of test.* (i) This flow-through test consists of three parts. First is a 14-day aqueous exposure test, with minimal sediments, with food, and with the test substance added to the overlying water. Second is a 14-day sediment exposure test, with one or more sediments (4 to 8 cm in thickness) which may have varying amounts of organic carbon, with food, and with the test substance added to sediment(s). Third is a 14-day interstitial exposure test, with one or more sediments (4 to 8 cm in thickness) which may have varying amounts of organic carbon, with food, and with the test substance added to overlying water. The flow-through test is illustrated in the following Table 1.

TABLE 1.—EXPERIMENTAL DESIGN FOR THE CHIRONOMID SEDIMENT FLOW-THROUGH TOXICITY TEST

Test system	Test substance concentrations [2 reps ea] [a]	Number of sediments [2 reps ea]	Number of Samples Analyzed (2 reps ea)			
			Overlying water P/C [b]	Interstitial water P/C [b]	Sediments	Midges [c]
1. 14-Day Aqueous Exposure	5[10]	NA [d]	5[10]	NA	NA	5[10]
Control (2 reps)	NA	NA	1[2]	NA	NA	1[2]
Solvent Control (2 reps)	NA	NA	1[2]	NA	NA	1[2]
2. 14-Day Sediment Exposure	5[10]	1-3 [e]	(2-6)	5[10]	NA	5[10]
Control (2 reps)	NA	1[2]	1[2]	NA	1[2]	1[2]
Solvent Control (2 reps)	NA	1[2]	1[2]	NA	1[2]	1[2]
3. 14-Day Interstitial Water/Sediment Exposure	5[10]	1-3 [e]	(2-6)	5[10]	5[10]	5[10]
Control (2 reps)	NA	1[2]	1[2]	1[2]	1[2]	1[2]
Solvent Control (2 reps)	NA	1[2]	1[2]	1[2]	1[2]	1[2]

[a] Test substance concentration in all replicates measured at days 0 and 14. Reps = replicates
[b] P/C = physical chemical measurements (dissolved oxygen, temperature (°C), and pH) on days 0, 4, 7, 10, and 14.
[c] Midges are observed throughout the test, dead chironomids recorded, removed and weighed on days 4, 7, and 10. At end of each test, remaining midges from each replicate are removed, counted, and weighed.
[d] NA = not applicable
[e] Number of sediment types tested will depend on range of TOC content tested; 1 to 3 types (low, medium, and high TOC levels) are recommended.

(ii) The day before the test is to be started, sediments (in treatments, and reference and negative controls) shall be screened to remove large particles and endemic animals (especially midge predators) added to the test chambers. The amount of sediments to be added to each test chamber will depend on the experimental design and test species. Only a minimum amount (2mm) shall be added in the aqueous exposure portion of the test. Each replicate test chamber should contain the same amount of sediments. Overlying water shall then be added to each test chamber.

(iii) In this flow–through test, the flow of dilution water through each chamber is begun and then adjusted to the rate desired. The test substance shall be introduced into each test chamber. The addition of test substance in the flow-through system shall be done at a rate which is sufficient to establish and maintain the desired concentration of test substance in the test chamber.

(iv) At the initiation of the test, chironomids which have been cultured or acclimated in accordance with the test design, are randomly placed into the test chambers. Midges in the test chambers are observed periodically during the test. Immobile or dead larvae shall be counted, removed, and weighed, and the findings are recorded. "Floating" larvae are nonviable and shall be replaced. Dissolved oxygen (DO) concentration, pH, temperature, the concentration (measured) of test substance, and other water quality parameters are measured at specified intervals in selected test chambers, during all three parts of this test (See Table 1 in paragraph (c)(1)(i) of this section). Data shall be collected during the test to determine any significant differences ($P \leq 0.05$) in mortality and growth as compared to the controls. BCFs shall be calculated at the end of the test, based on route of exposure.

(2) [Reserved]

(3) *Range-finding test.* (i) A range-finding test should be conducted prior to beginning each of the three parts of the test to establish test solution concentrations for the three definitive parts of the test.

(ii) The chironomids should be exposed to a series of widely spaced concentrations of the test substance (e.g., 1, 10, 100 mg/L).

(iii) A minimum of 10 chironomids should be exposed to each concentration of test substance for a period of time which allows estimation of appropriate test concentrations. No replicates are required and nominal concentrations of the chemical are acceptable.

(4) *Definitive test.* (i) The purpose of the definitive portion of the test is to determine concentration-response curves, EC50 values, effects of a chemical on mortality and growth, and the determination of BCFs during subchronic exposure.

(ii) A minimum of 30 midges per concentration (15 midges per replicate test chamber) should be exposed, in each part of the test, to 5 or more concentrations of the test substance chosen in a geometric series in which the ratio is between 1.5 and 2.0 mg/L (e.g., 2, 4, 8, 16, 32, 64 mg/L). An equal number of chironomids should be placed in two replicates. The concentration ranges should be selected to determine the concentration-response curves, EC50 values, and MATC. Solutions should be analyzed for chemical concentration prior to use and at designated times during the test.

(iii) Each test shall include controls consisting of the same dilution water, sediments, conditions, procedures, and midges from the same population (same egg mass in culture container), except that none of the test substance is added.

(iv) The test duration is 14 days for each of the three parts of the test. The test is unacceptable if more than 20 percent of the control organisms are dead, stressed or diseased during the test. For high log K_{ow} chemicals, a test period longer than 14 days may be necessary.

(v) The number of dead chironomids in each test chamber shall be recorded on days 4, 7, 10, and 14 of the test. At the end of the test, surviving midges are removed from the test chambers and weighed after blotting dry. Concentration-response curves, EC50 values, and associated 95 percent confidence limits for mortality shall be determined for days 4, 7, 10, and 14 in the aqueous exposure portion of the test. Also, an MATC, as well as NOEC and LOEC values shall be determined for midge survival and growth.

(vi) In addition to survival and growth, any abnormal behavior or appearance of the chironomids should be reported.

(vii) Distribution of midges among the test chambers shall be randomized. In addition, test chambers within the testing area are positioned in a random manner or in a way in which appropriate statistical analyses can be used to determine the variation due to placement.

(viii) A control sediment and/or a reference sediment shall be used in each part of this test. Use of these controls/references will help determine if the test is acceptable, serve to monitor the health of the chironomids used in the testing, monitor the quality and suitability of test conditions, parameters and procedures, and aid in analyzing data obtained from this test. A negative control shall be run in the test, and this is to be a sediment known to be non-toxic to the midges. Also, in addition to, or in place of the negative control, a reference sediment can be run in the test. The reference sediment is obtained from an area that is known to have low levels of chemical contamination and which is similar to or identical to the test sediments (in physical and chemical characteristics).

(ix) In the first part of this test, the aqueous exposure, a minimal amount of sediments ($\leq$ 2mm) is placed in the test chambers. Sediments are necessary to reduce stress to the chironomids, cannibalism, and to allow the midges to construct tubes.

(x) BCFs shall be calculated at the end of each part of the test.

(5) [Reserved]

(6) *Analytical measurements* — (i) *Water quality analysis.* (A) The hardness, acidity, alkalinity, conductivity, total organic carbon (TOC) or chemical oxygen demand (COD), and particulate matter of the dilution water serving as the source of overlying water shall be measured on days 0 and 14. The month-to-month variation of these values should be less than 10 percent and the pH should vary less than 0.4 units.

(B) During all three parts of the flow-through test, DO, temperature, and pH shall be measured in each chamber on days 0, 4, 7, 10, and 14.

(ii) *Measurement of test substance.* (A) Deionized water should be used in making stock solutions of the test substance. Standard analytical methods should be used whenever available in performing the analyses of water and sediments. Radiolabeling of the test substance (e.g., by use of ^{14}C) may be necessary in order to accurately measure quantities present in the sediments. The analytical method used to measure the amount of test substance in the sample shall be validated by appropriate laboratory practices before beginning the test. An analytical method is not acceptable if likely degradation products of the test substance, such as hydrolysis and oxidation products, give positive or negative interference which cannot be systematically identified and corrected mathematically. When radiolabeled test substances are used, total radioactivity shall be measured in all samples. At the end of the test, water, sediments, and tissue samples should be analyzed using appropriate methodology to identify and estimate any major (at least 10 percent of the parent compound) degradation products or metabolites that may be present.

(B) For all three aqueous exposure parts of this test, the overlying water shall be sampled on days 0, 7, and 14 from each test chamber, for the test substance.

(C) For the non-aqueous exposure parts of the test, the interstitial water shall be sampled for the test substance on days 0, 7, and 14 from each test chamber. Interstitial water can be sampled by using a variety of methods, such as removal of overlying water and centrifugation, filtration of sediments, pressing the sediments, or using an interstitial water sampler. Care should be taken during these measurements to prevent the biodegradation, transformation, or volatilization of the test substance.

(D) For the non-aqueous exposure portion of the test, the sediments shall be sampled for the test substance on days 0, 7, and 14 from each test chamber.

(E) The sediment partition coefficient or soil-water partition coefficient is determined by dividing the average test substance sediment concentration by the respective average water column concentration. Concentrations of test substance in the sediments to be used in this test can be chosen by measuring these partition coefficients. This sediment partition coefficient should be determined in triplicate by placing a quantity of a sediment with a known TOC content spiked with the radiolabeled test substance into a quantity of dilution water. The ratio of sediment to dilution water should simulate the ratio present in the test. The sediment/dilution water mixture is periodically shaken, and the radiolabeled test substance is measured. This shaking and sampling procedure is repeated until equilibrium is reached, as defined by the stage of the desorption curve.

(F) Overlying water samples should be filtered through a 0.45 micron filter to determine the concentration of dissolved test substance.

(G) BCFs shall be calculated by determining the amount of test substance in the midge tissue divided by concentrations of test substance in the water column, interstitial water, and sediments. At test termination, the midges remaining in each test concentration are analyzed for test substance. Suitable methods are available, such as radiolabeling (^{14}C) the test substance, combusting the midges, and trapping and counting the resulting radioactivity, if other methods are unavailable. The BCF can then be calculated. If insufficient chironomid biomass is present at the conclusion of the test, then replicates may be pooled, if necessary. If this pooling still results in insufficient biomass or if the accumulated test substance concentration is lower than the

VOL 56 ISS 122 JE 25 1991 UMI

detection limit for the test substance, BCFs cannot be calculated.

(iii) *Numerical.* (A) The number of dead midge second instars shall be counted during each definitive test. Appropriate statistical analyses should provide a goodness-of-fit determination for mortality concentration-response curves calculated on days 4, 7, 10, and 14. A 4–, 7–, 10–, and 14–day LC50 value based on second instar mortality, and with corresponding 95 percent confidence intervals, shall be calculated. The methods recommended for calculating EC50's include probit, logit, binomial, and moving average.

(B) Appropriate statistical tests (e.g., analysis of variance and mean separation tests) should be used to test for significant chemical effects on growth (measured as wet weights) on days 4, 7, and 14. An MATC shall be calculated using these test criteria.

(C) In no case should any analytical measurements be pooled except when calculating BCFs and there is insufficient biomass available for individual measurements.

(d) *Test conditions*—(1) *Test species* — (i) *Selection.* (A) The midge, *Chironomus tentans* or *C. riparius* shall be used in this test. Both species are widely distributed throughout the United States, and the larvae and adult flies can be cultured in the laboratory. The larval portion of both species' life cycles is spent in a tunnel or case within the upper layers of benthic sediments of lakes, rivers, and estuaries. Feeding habits of both species include both filter feeding and ingesting sediment particles.

(B) Second instar chironomids (≤ 10 days) of the same age and size are to be used in this test. Third and fourth instar are less desirable, as some evidence indicates they are less sensitive, at least to copper. Each instar is 4 to 7 days in duration.

(ii) *Acquisition.* (A) Chironomids to be used in this test should be cultured at the test facility. Adult flies are collected from the chironomid cultures and allowed to mate and lay egg masses. Two egg masses are collected and allowed to hatch. The larvae are fed daily. When the second instar stage (about 10 days after hatching) is reached, larvae are removed and placed in the test chambers. Records should be kept regarding the source of the initial stock and culturing techniques. All organisms used for a particular test shall have originated from the same population (culture container) and be the same in age and size.

(B) Chironomids shall not be used in a test if:

(*1*) During the final 48 hours of midge holding, obvious mortality is observed.

(*2*) The larvae are not in the second instar.

(iii) *Feeding.* (A) During the test, the chironomids should be fed the same diet and with the same frequency as that used for culturing and acclimation. All treatments and control(s) should receive, as near as reasonably possible, the same amount of food on a per-animal basis.

(B) The food concentration depends on the type used and the nutritional requirements of the midges. The latter in turn is dependent upon the stage of their development.

(iv) *Loading.* The number of test organisms placed in a test chamber should not affect the test results. Loading should not exceed 30 chironomids per liter per 24 hours in the flow-through test. Loading should not effect test concentrations or cause the DO concentration to fall below the recommended level.

(v) *Care and handling of test organisms.* (A) Chironomids should be cultured in dilution water under similar environmental conditions as those in the test. Food such as Tetra® Conditioning Food has been demonstrated to be adequate for chironomid cultures.

(B) Organisms should be handled as little as possible. When handling is necessary, it should be done as gently, carefully, and as quickly as possible. During culturing and acclimation, midges should be observed for any signs of stress, physical damage, and mortality. Dead and abnormal individuals shall be discarded. Organisms that are damaged or dropped during handling shall be discarded.

(C) Wide-bore, smooth glass tubes or pipets equipped with a rubber bulb can be used for transferring midges.

(vi) *Acclimation.* (A) Midges shall be maintained in 100 percent dilution water at the test temperature for at least 4 days prior to the start of the test. This is easily accomplished by culturing them in the dilution water at the test temperature. Chironomids shall be fed the same food during the test as is used for culturing and acclimation.

(B) During culturing and acclimation to the dilution water, midges should be maintained in facilities similar to those of the testing area.

(2) *Facilities*—(i) *General.* (A) Facilities needed to perform this test include:

(*1*) Containers for culturing and acclimating the chironomids;

(*2*) A mechanism for controlling and maintaining the water temperature during the culturing, acclimation, and test periods;

(*3*) Apparatus for straining particulate matter, removing gas bubbles, or aerating the water as necessary to ensure that the test solution flows regularly into and out of the container. Test chambers can be small aquaria capable of holding 3 liters of water or test solution, 5.7 liter clear glass battery jars, or 1 liter beakers made of borosilicate glass. Each chamber should be equipped with screened overflow holes, standpipes, or u-shaped notches covered with Nitex screen. Construction materials and commercially purchased equipment that may contact dilution water should not contain substances that can be leaked or dissolved into aqueous solutions in quantities that can alter the test results. Materials and equipment that contact test solutions should be chosen to minimize sorption of test substances; and

(*4*) Test chambers should be loosely covered to reduce the loss of test solution or dilution water by evaporation, and to minimize the entry of dust or other particulates into the solutions.

(ii) *Test substance delivery system.* (A) In the flow-through test, proportional diluters, metering pump systems or other suitable systems should be used to deliver the test substance to the test chambers.

(B) The test substance delivery system used shall be calibrated before and after each test. Calibration includes determining the flow rate through each chamber and the concentration of the test substance in each chamber. The general operation of the test substance delivery system shall be checked twice daily during the test. The 24–hour flow rate through a test chamber shall be equal to at least five times the volume of the test chamber. During a test, the flow rates should not vary more than 10 percent from any one test chamber to another or from one time to any other.

(iii) *Dilution water.* (A) Surface or ground water, reconstituted water, or dechlorinated tap water are acceptable as dilution water if chironomids will survive in it for the duration of the culturing, acclimation, and testing periods without showing signs of stress. The quality of the dilution water should be constant and should meet the specifications in the following Table 2:

TABLE 2.—SPECIFICATIONS FOR DILUTION WATER

Substance	Maximum Concentration
Particulate matter	20 mg/L
Total organic carbon (TOC) or chemical oxygen demand (COD).	2 mg/L or 5 mg/L, respectively

TABLE 2.—SPECIFICATIONS FOR DILUTION WATER—Continued

Substance	Maximum Concentration
Boron, fluoride	100 µg/L
Un-ionized ammonia	10 µg/L
Aluminum, arsenic, chromium, cobalt, copper, iron, lead, nickel, zinc.	1 µg/L
Residual chlorine	3 µg/L
Cadmium, mercury, silver	100 ng/L
Total organophosphorus pesticides.	50 ng/L
Total organochlorine pesticides and polychlorinated biphenyls (PCBs) or Organic chlorine.	50 ng/L or 25 ng/L, respectively

(B) The water quality characteristics listed in Table 2 of paragraph (b)(2)(iii)(A) of this section shall be measured at least twice a year or when it is suspected that these characteristics may have changed significantly. If dechlorinated tap water is used, daily chlorine analysis shall be performed.

(C) If the diluent water is from a ground or surface water source, conductivity, hardness, alkalinity, pH, acidity, particulate matter, TOC or COD, and particulate matter shall be measured. Reconstituted water can be made by adding specific amounts of reagent-grade chemicals to deionized or distilled water. Glass distilled or carbon filtered deionized water with conductivity of less than 1 microohm/cm is acceptable as the diluent for making reconstituted water.

(D) If the test substance is not soluble in water, an appropriate carrier such as triethylene glycol (CAS No. 112–27–6), dimethylformamide (CAS No. 68–12–2), or acetone (CAS No. 67–64–1) should be used. The concentration of such carriers should not exceed 0.1 mL/L.

(iv) *Cleaning of test system.* All test equipment and test chambers shall be cleaned before each test following standard laboratory procedures. Cleaning of test chambers may be necessary during the testing period.

(v) *Sediments.* (A) Sediments used in this test may contain low (< 1 percent) to high (>15 percent) amounts of organic carbon because they are derived from variable natural sediments. Prior to use, the sediments should be sieved to remove larger particles. They should be characterized for particle size distribution (sand, silt, clay percentages), percent water holding capacity, total organic and inorganic carbon, total volatile solids, COD, BOD, cation exchange capacity, redox potential (E_h), oils and greases, petroleum hydrocarbons, organophosphate pesticide concentrations, organochlorine pesticide [and polychlorinated biphenyl (PCB)] concentrations, toxic metal concentrations, and pH.

(B) The source of the sediments used in this test shall be known and the characteristics in paragraph (d)(2)(v)(A) of this section should be measured every time additional sediments are obtained. The sediments should not contain any endemic organisms, as these may be chironomid predators.

(C) Sediments should not be resuspended during the test.

(vi) *Sediment partition coefficient.* (A) The sediment or soil-water partition coefficient (K_s) is described as the ratio of the concentration of the test substance in the sediment (C_s) to the concentration in the water or interstitial water (C_w). This is expressed by the formula:

$$K_s = \frac{C_s}{C_w}$$

The resulting K_s values for the sediment or sediments tested are used to select test substance concentrations for the sediment test.

(B) The K_s value is equivalent or related to the sediment organic carbon sorption coefficient multiplied by the percent organic carbon content of the sediment.

(C) The sediment partition coefficient should be determined in triplicate for each sediment type at equilibrium by spiking with the radiolabeled test substance and shaking. Periodically, the test substance concentration in the water is measured radiometrically. The shaking and sampling is repeated until an equilibrium, as defined by the shape of the plotted desorption curve, is reached.

(vii) *Bioconcentration Factors.* BCFs shall be calculated for each part of the test. These values are computed as the amount of test substance present in the midge tissues divided by test substance concentrations in the water column, interstitial water, and sediments. At test termination, the chironomids remaining in each test concentration are analyzed for radiolabeled test substance.

(3) *Test parameters.* (i) Environmental conditions of the water contained in test chambers should be maintained as specified below:

(A) Temperature of 20 ± 1 °C for *C. tentans* and 22 ± 1 °C for *C. riparius.*

(B) DO concentration of the dilution water should be 90 percent of saturation or greater. The DO concentrations of the test solutions shall be 60 percent or greater of saturation, throughout the test. Aeration may be necessary, and if this is done, all treatment and control chambers should be given the same aeration treatment.

(C) A photoperiod of 16 hours light and 8 hours darkness with a 15 to 30 minute transition period.

(ii) Additional measurements include:

(A) The concentration of dissolved test substance (that which passes through a 0.45 micron filter) in the chambers should be measured during the test.

(B) At a minimum, the concentration of test substance should be measured as follows:

(*1*) In each chamber before the test.

(*2*) In each chamber on days 7 and 14 of the test.

(*3*) In at least one appropriate chamber whenever a malfunction is detected in any part of the test substance delivery system.

(C) Among replicate test chambers of a treatment concentration, the measured concentration of the test substance shall not vary by more than 20 percent at any time or 30 percent during the test.

(D) The dissolved oxygen concentration, temperature and pH shall be measured at the beginning of the test and on days 7 and 14 in each chamber.

(e) *Reporting.* The sponsor shall submit to the USEPA all data developed by the test that are suggestive and predictive of toxicity and all associated toxicologic manifestations. In addition to the reporting requirements prescribed in the GLPS (40 CFR part 792), the reporting of test data shall include the following:

(1) The name of the test, sponsor, testing laboratory, study director, principal investigator, and dates of testing.

VOL 56 ISS 122 JE 25 1991 UMI

(2) A detailed description of the test substance including its source, lot number, composition (identity and concentration of major ingredients and major impurities), known physical and chemical properties, and any carriers or other additives used and their concentrations.

(3) The source of the dilution water, its chemical characteristics (e.g., conductivity, hardness, pH, TOC or COD, and particulate matter) and a description of any pretreatment.

(4) The source of the sediment, its physical and chemical characteristics (e.g., particle size distribution, TOC, pesticide and metal concentrations), and a description of any pretreatment.

(5) Detailed information about the chironomids used as a stock, including the scientific name and method of verification, age, source, treatments, feeding history, acclimation procedures, and culture methods. The age (in days) and instar stage of the midges used in the test shall be reported.

(6) A description of the test chambers, the volume of solution in the chambers, and the way the test was begun (e.g., conditioning and test substance additions). The number of test organisms per test chamber, the number of replicates per treatment, the lighting, the test substance delivery system, flow rates expressed as volume additions per 24 hours for the flow-through sub-chronic test, the method of feeding (manual or continuous), and type and amount of food.

(7) The concentration of the test substance in the water, interstitial water, and sediments in test chambers at times designated in the flow-through tests.

(8) The number and percentage of organisms that show any adverse effect in each test chamber at each observation period, and wet weights of midges in each test chamber at days 7 and 14.

(9) BCFs for all three parts of the test (i.e., overlying water or water column, sediment, and interstitial water modes of exposure).

(10) All chemical analyses of water quality and test substance concentrations, including methods, method validations and reagent blanks.

(11) The data records of the culture, acclimation, and test temperatures. Information relating to calculation of sediment (or soil-water) partition coefficients (K_p).

(12) Any deviation from this test guideline, and anything unusual about the test (e.g., diluter failure and temperature fluctuations).

(13) An LC50 value based on mortality and an EC50 value based on adverse effects on growth (wet weights), with corresponding 95 percent confidence limits, when sufficient data are present for days 4, 7, and 14. These calculations should be made using the average measured concentration of the test substance.

(14) Concentration-response curves utilizing the average measured test substance concentration should be fitted to both number of midges that show adverse effects (mortality) and effects on growth or wet weights of midges at days 4, 7 and 14. A statistical test of goodness-of-fit should be performed and the results reported.

(15) The MATC to be reported is calculated as the geometric mean between the lowest measured test substance concentration that had significant ($P < 0.05$) effect and the highest measured test substance concentration that had no significant ($P > 0.05$) effect on days 4, 7, and 14 of the test. The criterion selected for MATC computation is the one which exhibits an effect (a statistically significant difference between treatment and control groups; $P < 0.05$) at the lowest test substance concentration for the shortest period of exposure. Appropriate statistical tests (analysis of variance and mean separation tests) should be used to test for significant test substance effects. The statistical tests employed and the results of these tests should be reported.

(f) *References.* For further background information on this test guideline the following references should be consulted:

c. By adding § 795.150 to read as follows:

§ 795.150 Earthworm toxicity test.

(a) *Purpose.* This guideline is intended for use in developing data on the toxicity of chemical substances and mixtures ("chemicals") subject to environmental effects test regulations under the Toxic Substances Control Act (TSCA) (Pub. L. 94-469, 90 Stat. 2003, 15 U.S.C. 2601 et seq.). The guideline sets forth the procedures and conditions for conducting this toxicity test. The U.S. Environmental Protection Agency (EPA) will use data from this test in assessing the hazard of a chemical to earthworms in the soil environment.

(b) *Definitions.* The definitions in section 3 of TSCA and the definitions in "Good Laboratory Practice Standards" (GLPS) (40 CFR part 792) apply to this guideline. The following definitions also apply:

Artificial soil means a defined dry weight mixture of 68 percent of No. 70 mesh silica sand, 20 percent kaolin clay, 10 percent sphagnum peat moss, and 2 percent calcium carbonate. These ingredients are weighed and mixed in the above proportions and moistened to 35 percent (by weight) with deionized/distilled water.

Behavioral symptoms are indicators of toxicity to earthworms such that a distinct difference in position in the test container can be identified, e.g., below surface or on the surface; writhing on the surface; stiffened and shortened on the surface or elongated and pulsing; or inactive below surface in a ball.

Clitellum means a glandular portion of the anterior epidermis, appearing as saddle-shaped or annular, usually differentiated externally by color.

Culture means the animals which are raised on-site or maintained under controlled conditions to produce test organisms through reproduction.

EC50 means that test substance concentration calculated from experimentally-derived growth or sublethal effects data that has affected 50 percent of a test population during continuous exposure over a specified period of time.

LC50 means that experimentally derived concentration of test substance that is estimated to kill 50 percent of a test population during continuous exposure over a specified period of time.

Lowest observed effect concentration (LOEC) means the lowest treatment (i.e., test concentration) of a test substance that is statistically different in adverse effect on a specific population of test organisms from that observed in controls.

Mature or adult worms means a condition of the worm exhibiting a clitellum in the anterior 1/3 of the body.

Mortality means the lack of movement by the test organism in response to a definite tactile stimulus to the anterior end. Also, because earthworms tend to disintegrate rapidly after death, the absence of organisms in the enclosed soil test container is considered to mean death has occurred

No observed effect concentration (NOEC) means the highest treatment (i.e., test concentration) of a test substance that shows no statistical difference in adverse effect on a specific population of test organisms from that observed in controls.

Pathological symptoms means toxic effects, such as surface lesions and mid-segmental swellings or general ulcerated areas on the surface of the earthworm.

Test mixture means the test substance/artificial soil mixtures which the earthworms are exposed to during the test.

Test substance means any compound used in artificial soils spiked for laboratory testing of toxicity.

(c) *Test procedures*—(1) *Summary of the test.* (i) Test chambers are filled with appropriate amounts of test mixtures.

(ii) This toxicity test may be done by placing earthworms in test chambers containing test mixtures and allowing earthworms to ingest this test mixture soil ad libitum.

(iii) Acclimated earthworms are introduced into the test and control chambers by stratified random assignment.

(iv) Earthworms in the test and control chambers shall be observed every 7 days and the findings shall be recorded and dead earthworms removed.

(v) The pH, temperature, and the concentration of the test mixtures shall be measured at 7 day intervals in each test chamber.

(vi) Initial weight of earthworm shall be between 300 to 600 grams per container.

(vii) Concentration-response curves, LC50, EC50, LOEC, NOEC values, and 95 percent confidence intervals for the test substance are developed from the data collected during the test.

(2) [Reserved]

(3) *Range-finding test.* (i) If the toxicity of the test substance is not already known, a range-finding test should be performed to determine the range of concentrations to be used in the definitive test.

(ii) The earthworms should be exposed (for at least 28 days) to a range of concentrations of the test substance (e. g., 0.1, 1.0, 10, 100, 1,000 mg/kg dry weight artificial soil).

(iii) Nominal concentrations are acceptable and no replication is required. If the LC50 value is > 1,000 mg test substance (100 percent active ingredient) per kiligram dry weight of artificial soil, the definitive test does not have to be done.

(4) *Definitive test.* (i) This test is designed to determine a concentration-mortality curve at 28 days and estimate the respective LC50, EC50, LOEC, NOEC values and 95 percent confidence intervals.

(ii) If data permit, the concentration-response curves, LC50, EC50, LOEC, NOEC values, and 95 percent confidence interval also should be determined for 7, 14, and 21 days.

(iii) This toxicity test uses earthworms which are maintained in direct contact with an artificial soil allowing earthworms to ingest contaminated soil ad libitum.

(iv) A minimum of 30 earthworms exposed to each of 5 or more test concentrations and a control shall be tested.

(v) Test concentrations should be chosen in a geometric series in which the ratio is between 1.5 and 2.0 mg/kg (e.g., 2, 4, 8, 16, 32, and 64 mg/kg). All test concentrations shall be based on milligram of test chemical (100 percent active ingredient) per kiligram of artificial soil (air-dry weight).

(vi) Ten earthworms per container of 200 g (dry weight) artificial soil shall be placed in three replicates for each concentration and control. The distribution of individual earthworms among the test chambers shall be randomized. Test concentrations in artificial soil shall be analyzed for test chemical concentrations prior to the start of the test and at days 7, 14, 21, and 28 as a minimum.

(vii) The living earthworms should be placed on the surface of the medium and the jar capped and secured without making an airtight seal.

(viii) Any changes in soil temperature should not exceed 3 °C per day or 1 °C per hour. Earthworms should be held for a minimum of 7 days at the test temperature prior to testing.

(ix) Every test shall include a negative control consisting of uncontaminated artificial soil, conditions, procedures, and earthworms from the same group used in the definitive test as shown, except that none of the test substance is added.

(x) The test duration is 28 days.

(5) *Test results.* (i) Death is the primary criterion used in this test guideline to evaluate the toxicity of the test substance.

(ii) In addition to death, weight loss, behavioral symptoms and pathological symptoms shall be recorded.

(iii) Each test and control chamber shall be checked for dead or affected earthworms and observations recorded 7, 14, 21, and 28 days after the beginning of the test or within 1 hour of the designated times. Missing earthworms shall be considered to have died.

(iv) Mortality is assessed by emptying the test medium on a glass or other inert surface, sorting earthworms from the test mixture and testing their reaction to a gentle mechanical stimulus. Any adverse effects (e.g., weight loss, behavioral or pathological symptoms) are noted and shall be reported. The medium is returned to each container.

(v) The 28-day test result shall be unacceptable if:

(A) More than 20 percent of control organisms die; or

(B) The total mean weight of the earthworms in the control containers declines significantly during the test (i.e, by 30 percent).

(vi) Mortality is checked and recorded at days 7, 14, 21, and 28.

(vii) The mortality data shall be used to calculate LC50 values and their 95 percent confidence limits, and to plot concentration-response curves at days 7, 14, 21, and 28.

(viii) The sublethal effects and growth (i.e., fresh weight) data shall be used to plot concentration-response curves, calculate EC50 values, and determine LOEC and NOEC values. Appropriate statistical methods (e.g., one-way analysis of variance and multiple comparison test) should be used to test for significant differences between treatment means and determine LOEC and NOEC.

(6) *Analytical measurements*— (i) *Artificial soil analysis.* During the test, the temperature and pH shall be measured in the artificial soil at the beginning of the test (0-hour), and every 7 days thereafter.

(ii) *Measurement of test substance.* (A) The concentration of test substance in artificial soil shall be measured at a minimum in each test chamber at the beginning (0-hour, before earthworms are added) and every 7 days thereafter.

(B) The analytical methods used to measure the amount of test substance in a sample should be validated before beginning the test. The accuracy of a method should be verified by a method such as using known additions. This involves adding a known amount of the test substance to three samples of artificial soil taken from the test chamber and the same number of earthworms as are used in the test. The measured concentration of the test substance in those samples should span the concentration range to be used in the test. Validation of the analytical method should be performed on at least two separate days prior to starting the test.

(C) An analytical method is not acceptable if likely degradation products of the test substance give positive or negative interferences, unless it is shown that such degradation

VOL
56
ISS
122
JE
25
1991
UMI

products are not present in the test chambers during the test.

(D) In addition to analyzing samples of artificial soil, at least one reagent blank, containing all reagents used, should also be analyzed.

(E) The measured concentration of the test substance in artificial soil in any chamber during the test should not vary more than 50 percent from the measured concentration prior to initiation of the test; concentration measurements should be as described by Neuhauser et al., in paragraphs (f)(3) and (f)(6) of this section, or an equivalent method.

(F) The mean measured concentration of test substance in artificial soil (dry weight) should be used to plot all concentration-response curves and to calculate all LC50, EC50, LOEC, and NOEC values.

(G) The total carbon (TC) shall be determined as measured by the method of Plumb described in paragraph (f)(7) of this section, or an equivalent method.

(iii) *Numerical.* The statistical methods recommended for use in calculating the LC50 and EC50 values include probit, logit, moving average, and binomial.

(d) *Test conditions*—(1) *Test species*—(i) *Selection.* The test species for this test is the earthworm *Eisenia fetida andrei* (Bouche). The species identity of the test organism should be verified using appropriate taxonomic keys as described by Fender in paragraph (f)(2) of this section, or an equivalent method.

(ii) *Age and condition of earthworms.* (A) Adult earthworms, 300–600 mg, are to be used to start the test.

(B) Earthworms used in toxicity tests should be purchased from a commercial source that can verify the species. Once verified, cultures should be maintained at the test facility. Records should be kept regarding the source of the initial stock and culturing techniques. All organisms used for a particular test should have originated from the same population (culture).

(C) All newly acquired earthworms should be quarantined and observed for at least 14 days prior to use in a test.

(D) Earthworms should not be used if they have been under stress from too much or a lack of moisture as described by Reinecke and Venter in paragraph (f)(8) of this section, or an equivalent method; excessive or inadequate food or temperature as described by Tomlin and Miller in paragraph (f)(11) of this section, or an equivalent method; pH variation as described by Satchell and Dottie in paragraph (f)(9) of this section, or an equivalent method; or crowding. Any of these conditions will produce earthworms that may not be healthy.

(iii) *Preparation.* Sufficient numbers of earthworms should be harvested and sorted to insure that healthy individuals are used for the test. Any animals that appear to be injured shall not be used in the test and must be discarded.

(iv) *Acclimation of test earthworms.* Adult earthworms should be handled with care. Earthworms should be held for a minimum of 7 days in uncontaminated soil at the test temperature prior to testing.

(v) *Feeding.* (A) Substrate food for culturing *Eisenia fetida andrei* should be saturated (water) alfalfa (*Medicago sativa*) pellets.

(B) The earthworms are not fed during the test period.

(2) *Facilities*—(i) *General.* Facilities needed to perform this test include:

(A) Apparatus for providing continuous lighting.

(B) Chambers for exposing test earthworms to the test substance.

(C) A mechanism for controlling and maintaining the artificial soil temperature and relative humidity during the holding, acclimation, and test periods.

(ii) *Construction materials.* (A) Construction materials and equipment that contact test mixtures shall not contain substances that can be leached or dissolved into artificial soil in quantities that can affect the test results. Material and equipment that contact test mixtures shall be chosen to minimize sorption of test substances. Hard glass jars are preferable and should be heated in an ashing oven between tests; soft glass jars shall be used only once.

(B) Polyethylene containers (rectangular dish pans measuring 32.5 X 27.5 X 12.5 cm) for culturing earthworms, a mechanism (e.g., environmental chamber) for maintaining temperature and relative humidity of the cultures during culturing, and separate facilities for testing are required.

(C) Testing containers (eg. 1 pint glass canning jars) and lids, and suitable balances to measure soil mixtures and sample weights shall also be used.

(D) Relative humidity should be maintained above 85 percent. An open pan of water can be used for this purpose to prevent moisture loss from the containers.

(iii) *Test chambers.* (A) One-pint (1-pt) glass canning jars or their equivalent should be used for testing.

(B) The lids should be reversed (i.e., turned upside down), loosely capped and secured without making an airtight seal to reduce evaporation and permit air exchange.

(iv) *Cleaning of test system.* The test chambers should be cleaned before each test following standard laboratory procedures. If soft glass is to be used it must only be used once and then thrown away.

(v) *Medium preparation.* (A) For each concentration tested and controls, enough artificial soil must be prepared by recipe to yield 270 g of artificial soil (wet weight) per replicate. A dry weight mixture of 69 percent of No. 70 mesh silica sand, 20 percent kaolin clay, and 10 percent sphagnum peat moss are mixed until evenly distributed.

(B) Up to 2 percent pulverized calcium carbonate may be added to adjust the soil pH to 6.5 ± 0.5.

(C) An appropriate amount of high purity water (e.g., 70 g per 200 g of dry soil) is added to the artificial soil and mixed with the artificial soil to raise the artificial soil moisture level to 35 percent by weight to yield a total weight of 810 g artificial soil at 35 percent moisture.

(D) Appropriate portions of the artificial soil are mixed thoroughly with appropriate amounts of test substance to yield three replicates for each test concentration. Each test mixture is divided into three equal quantities of about 270 g as determined by weight. Each portion is placed into a separate 1 pint jar and represents one replicate for exposing 10 earthworms at the same concentration. Three replicates for negative and, if necessary, solvent controls are prepared from untreated portions of the artificial soil mixture.

(E) If a solvent is used, the opened chambers are placed in a hood for 24 hours to evaporate the solvent prior to adding the earthworms.

(F) Prior to the addition of earthworms, a 10-g sample shall be removed from each replicate to measure pH and test concentrations.

(3) *Test parameters*— (i) *Loading.* The number of earthworms placed in a test chamber should not be so great as to affect the results of the test. The weight of the individual earthworms should be between 300 mg and 600 mg each. The earthworms are selected from the culture randomly into groups of 10. These groups are then randomly assigned to the test containers and then weighed such that they do not differ more than ± 10 percent among the replicates.

(ii) *Temperature.* (A) The test soil temperature shall be 22 ± 2 °C. as described by Edwards in paragraph (f, (1) of this section, or using an equivalent method.

(B) Temperature shall be measured and reported at the beginning of the test and on days 7, 14, 21, and 28. The temperature should be measured at least hourly in one test container.

(iii) *Light.* (A) Replicates shall be illuminated continuously with incandescent or fluorescent lights as described by Edwards in paragraph (f)(1) of this section, or using an equivalent method.

(B) Light intensity shall be about 400 lux measured at the artificial soil surface.

(C) Light intensity shall be measured at least once during the test at the surface of the container and checked weekly in the test chambers.

(e) *Reporting.* (1) The sponsor shall submit all data developed by the test that are suggestive or predictive of toxicity and all concomitant gross toxicological manifestations. The reporting of test data shall include the following information:

(i) Test Background including the name of the sponsor, testing laboratory, principal investigator, and dates of testing.

(ii) A detailed description of the test chemical including its chemical identification (CAS No., trade name, common name,) source, lot number, composition (identity and concentration or major ingredients and major impurities), known physical and chemical properties, empirical formula, water solubility, vapor pressure, manufacturer, method of application, and any carriers or other additives used and their concentrations. The volume or mass of any carriers should be reported. An exact description of how the test substance has been mixed into the artificial soil.

(iii) Detailed information about the earthworms used as brood stock, including the scientific name and method of verification, age, source, treatments, feeding history, and culture method.

(iv) A description of the test situation, especially if there was a deviation from this test guideline as described above in soil preparation (paragraph (d)(2)(v)(A) of this section), addition of the chemical, culturing of the test species, lighting, pH, temperature, replicates, or the number of organisms per container.

(v) A description of the test container used, its size, volume and weight of soil used in each container, number of test organisms per container, number of test containers per concentration, conditioning of the test container, description of the method of test chemical introduction into the test medium (e.g., as a powder), stock solution used or not, and time between mixing of the stock solution and introduction of the earthworms.

(vi) The concentrations in artificial soil at the beginning of the test and the actual concentrations of the test chemical (if measured) in the soil before (day 0), during (day 7, 14, 21) and upon the conclusion of the test (day 28) and the dates the analyses were performed.

(vii) The total organic carbon (TOC) of the soil mixture.

(2) The reported results shall include:

(i) The number and percentage of organisms that were killed or showed any adverse effects at each test concentration, including controls, in each test jar at each observation period.

(ii) Concentration response curves fitted to mortality data at 7, 14, 21, and 28-day periods. A statistical test of goodness-of-fit shall be performed and reported.

(iii) The LC50/EC50 values and the 95 percent confidence limits using the mean measured test concentration and the methods used to calculate both the LC50/EC50; also the LOEC and NOEC values and the confidence intervals by the Trimmed Spearman-Karber method as described by Hamilton et al., in paragraph (f)(3) of this section, or an equivalent method. The probit technique should follow the methods described by Weber et al., in paragraph (f) (12) of this section, or an equivalent method. Appropriate statistical methods (e.g., one-way analysis of variance and multiple comparison test) should be used to test for significant differences between treatment and determine the LOEC and NOEC.

(iv) All chemical analyses of test material including methods, method validations, and reagent blanks.

(v) The data records for the culture and lighting.

(vi) Moisture content for the test mixture at start of test.

(vii) The pH and temperature values at start of test and on days 7, 14, 21, and 28 of the test.

(viii) Any deviation from this test guideline and anything unusual about the test (e.g., equipment failure, fluctuations in temperature, pH, or other environmental conditions).

(f) *References.* For additional background information on this test guideline the following references should be consulted:

and freshwater organisms," 2nd Edition, Environmental Monitoring Systems Laboratory, U.S. Environmental Protection Agency, Cincinnati, OH (600/4-87/028) (1988).

2. In part 798

PART 798 — [AMENDED]

a. By revising the authority citation for part 798 to read as follows:

Authority: 15 U.S.C. 2601, 2603

b. By revising § 798.3320 to read as follows:

§ 798.3320 Combined chronic toxicity/oncogenicity.

(a) *Purpose.* The objective of a combined chronic toxicity/oncogenicity study is to determine the effects of a substance in a mammalian species following prolonged and repeated exposure. The application of this guideline shall generate data which identify the majority of chronic and oncogenic effects and determine dose-response relationships. The design and conduct shall allow for the detection of neoplastic effects and a determination of oncogenic potential as well as general toxicity, including neurological, physiological, biochemical, and hematological effects and exposure-related morphological (pathology) effects.

(b) *Test procedures)*—(1) *Animal selection*—(i) *Species and strain.* Preliminary studies providing data on acute, subchronic, and metabolic responses shall have been carried out to permit an appropriate choice of animals (species and strain). As discussed in other guidelines, the mouse and rat have been most widely used for assessment of oncogenic potential, while the rat and dog have been most often studied for chronic toxicity. The rat is the species of choice for combined chronic toxicity and oncogenicity studies. The provisions of this guideline are designed primarily for use with the rat as the test species. If other species are used, the tester shall provide justification/reasoning for their selection. The strain selected shall be susceptible to the oncogenic or toxic effect of the class of substances being tested, if known, and provided it does not have a spontaneous background too high for meaningful assessment. Commonly used laboratory strains shall be employed.

(ii) *Age.* (A) Dosing of rats shall begin as soon as possible after weaning, ideally before the rats are 6 weeks old, but in no case more than 8 weeks old.

(B) At commencement of the study, the weight variation of animals used shall not exceed ± 20 percent of the mean weight for each sex.

(C) Studies using prenatal or neonatal animals may be recommended under special conditions.

(iii) *Sex.* (A) Equal numbers of animals of each sex shall be used at each dose level.

(B) The females shall be nulliparous and nonpregnant.

(iv) *Numbers.* (A) At least 100 rodents (50 females and 50 males) shall be used at each dose level and concurrent control for those groups not intended for early sacrifice. At least 40 rodents (20 females and 20 males) shall be used for satellite dose group(s) and the satellite control group. The purpose of the satellite group is to allow for the evaluation of pathology other than neoplasia.

(B) If interim sacrifices are planned, the number of animals shall be increased by the number of animals scheduled to be sacrificed during the course of the study.

(C) The number of animals at the termination of each phase of the study should be adequate for a meaningful and valid statistical evaluation of long term exposure. For a valid interpretation of negative results, it is essential that survival in all groups not fall below 50 percent at the time of termination.

(2) *Control groups.* (i) A concurrent control group (50 females and 50 males) and a satellite control group (20 females and 20 males) are recommended. These groups shall be untreated or sham treated control groups or, if a vehicle is used in administering the test substance, vehicle control groups. If the toxic properties of the vehicle are not known or cannot be made available, both untreated and vehicle control groups are recommended. Animals in the satellite control group shall be sacrificed at the same time the satellite test group is terminated.

(ii) In special circumstances such as inhalation studies involving aerosols or the use of an emulsifier of uncharacterized biological activity in oral studies, a concurrent negative control group shall be utilized. The negative control group shall be treated in the same manner as all other test animals, except that this control group shall not be exposed to the test substance or any vehicle.

(iii) The use of historical control data (i.e., the incidence of tumors and other suspect lesions normally occurring under the same laboratory conditions and in the same strain of animals employed in the test) is desirable for assessing the significance of changes observed in exposed animals.

(3) *Dose levels and dose selection.* (i) For risk assessment purposes, at least three dose levels shall be used, in addition to the concurrent control group. Dose levels should be spaced to produce a gradation of effects.

(ii) The highest dose level in rodents should elicit signs of toxicity without substantially altering the normal life span by effects other than tumors.

(iii) The lowest dose level should produce no evidence of toxicity. However, where there is a usable estimation of human exposure, the lowest dose level should exceed this even though this dose level may result in some signs of toxicity.

(iv) Ideally, the intermediate dose level(s) should produce minimal observable toxic effects. If more than one intermediate dose is used the dose levels should be spaced to produce a gradation of toxic effects.

(v) For [illegible] the incidence of fatalities and intermediate dose groups and in the controls should be low to permit a meaningful evaluation of the results.

(vi) For chronic toxicological assessment, a high dose treated satellite and a concurrent control satellite group shall be included in the study design. The highest dose for satellite animals should be chosen so as to produce frank toxicity, but not excessive lethality, in order to elucidate a chronic toxicological profile of the test substance. If more than one dose level is selected for satellite dose groups, the doses should be spaced to produce a gradation of toxic effects.

(4) *Exposure conditions.* The animals are dosed with the test substance ideally on a 7 day per week basis over a period of at least 24 months for rats, and 18 months for mice and hamsters, except for the animals in the satellite groups which shall be dosed for 12 months.

(5) *Observation period.* It is necessary that the duration of the oncogenicity test comprise the majority of the normal life span of the animals to be used. It has been suggested that the duration of the study should be for the entire lifetime of all animals. However, a few animals may greatly exceed the average lifetime and the duration of the study may be unnecessarily extended and complicate the conduct and evaluation of the study. Rather, a finite period covering the majority of the expected life span of the strain is preferred since the probability is high that, for the great majority of chemicals, any induced tumors will occur within such an observation period. The following guidelines are recommended:

(i) Generally, the termination of the study shall be at 18 months for mice and hamsters and 24 months for rats; however, for certain strains of animals with greater longevity and/or low spontaneous tumor rate, termination shall be at 24 months for mice and hamsters and at 30 months for rats. For longer time periods, and where any other species are used, consultation with the Agency in regard to duration of the test is advised.

(ii) However, termination of the study is acceptable when the number of survivors of the lower doses or of the control group reaches 25 percent. In the case where only the high dose group dies prematurely for obvious reasons of toxicity, this shall not trigger termination of the study.

(iii) The satellite groups and the concurrent satellite control group shall be retained in the study for at least 12 months. These groups shall be scheduled for sacrifice for an estimation of test-substance-related pathology uncomplicated by geriatric changes.

(6) *Administration of the test substance.* The three main routes of administration are oral, dermal, and inhalation. The choice of the route of administration depends upon the physical and chemical characteristics of the test substance and the form typifying exposure in humans.

(i) *Oral studies.* (A) The animals shall receive the test substance in their diet, dissolved in drinking water, or given by gavage or capsule for a period of at least 24 months for rats and 18 months for mice and hamsters.

(B) If the test substance is administered in the drinking water, or mixed in the diet, exposure shall be continuous.

(C) For a diet mixture, the highest concentration should not exceed 5 percent.

(ii) *Dermal studies.* (A) The animals are treated by topical application with the test substance, ideally for at least 6 hours per day.

(B) Fur should be clipped from the dorsal area of the trunk of the test animals. Care should be taken to avoid abrading the skin which could alter its permeability.

(C) The test substance shall be applied uniformly over a shaved area which is approximately 10 percent of the total body surface area. With highly toxic substances, the surface area covered may be less, but as much of the area as possible shall be covered with as thin and uniform a film as possible.

(D) During the exposure period, the test substance may be held, if necessary, in contact with the skin with a porous gauze dressing and nonirritating tape. The test site should be further covered in a suitable manner to retain the gauze dressing and test substance and ensure that the animals cannot ingest the test substance.

(iii) *Inhalation studies.* (A) The animals shall be tested with inhalation equipment designed to sustain a dynamic air flow of 12 to 15 air changes per hour and to ensure an adequate oxygen content of 19 percent and an evenly distributed exposure atmosphere. Where a chamber is used, its design should minimize crowding of the test animals and maximize their exposure to the test substance. This is best accomplished by individual caging. As a general rule, to ensure stability of a chamber atmosphere, the total "volume" of the test animals shall not exceed 5 percent of the volume of the test chamber. Alternatively, oronasal, head only, or whole body individual chamber exposure may be used.

(B) The temperature at which the test is performed should be maintained at 22 °C (± 2°). Ideally, the relative humidity should be maintained between 40 to 60 percent, but in certain instances (e.g., tests of aerosols, use of water vehicle) this may not be practicable.

(C) Food and water shall be withheld during each daily 6-hour exposure period.

(D) A dynamic inhalation system with a suitable analytical concentration control system shall be used. The rate of air flow shall be adjusted to ensure that conditions throughout the equipment are essentially the same. Maintenance of slight negative pressure inside the chamber will prevent leakage of the test substance into the surrounding areas.

(7) *Observation of animals.* (i) Each animal shall be handled and its physical condition appraised at least once each day.

(ii) Additional observations shall be made daily with appropriate actions taken to minimize loss of animals to the study (e.g., necropsy or refrigeration of those animals found dead and isolation or sacrifice of weak or moribund animals).

(iii) Clinical signs and mortality should be recorded for all animals. Special attention shall be paid to tumor development. The time of onset, location, dimensions, appearance and progression of each grossly visible or palpable tumor shall be recorded.

(iv) Body weights shall be recorded individually for all animals once a week during the first 13 weeks of the test period and at least once every 4 weeks thereafter, unless signs of clinical toxicity suggest more frequent weighings to facilitate monitoring of health status.

(v) When the test substance is administered in the food or drinking water, measurements of food or water consumption, respectively, shall be determined weekly during the first 13 weeks of the study and then at approximately monthly intervals unless health status or body weight changes dictate otherwise.

(vi) At the end of the study period, all survivors are sacrificed. Moribund animals shall be removed and sacrificed when noticed.

(8) *Physical measurements.* For inhalation studies, measurements or monitoring should be made of the following:

(i) The rate of airflow shall be monitored continuously, but shall be recorded at intervals of at least once every 30 minutes.

(ii) During each exposure period the actual concentrations of the test substance shall be held as constant as practicable, monitored continuously and recorded at least three times during the test period: At the beginning, at an intermediate time and at the end of the period.

(iii) During the development of the generating system, particle size analysis shall be performed to establish the stability of aerosol concentrations. During exposure, analyses shall be conducted as often as necessary to determine the consistency of particle size distribution and homogeneity of the exposure stream.

(iv) Temperature and humidity shall be monitored continuously, but should be recorded at intervals of at least once every 30 minutes.

(9) *Clinical examinations.* (i) The following examinations shall be made on at least 20 rodents of each sex per dose level:

(A) Certain hematology determinations (e.g., hemoglobin content, packed cell volume, total red blood cells, total white blood cells; platelets, or other measures of clotting potential) shall be performed at termination and shall be performed at 3 months, 6 months and at approximately 6 month intervals thereafter (for those groups on test for longer than 12 months) on blood samples collected from 20 rodents per sex of all groups. These collections shall be from the same animals at each interval. If clinical observations suggest a deterioration in health of the animals during the study, a differential blood count of the affected animals shall be performed. A differential blood count shall be performed on samples from animals in the highest dosage group and the controls. Differential blood counts shall be performed for the next lower group(s) if there is a major discrepancy between the highest group and the controls. If hematological effects were noted in the

VOL 56 ISS 122 JE 25 1991 UMI

subchronic test, hematological testing shall be performed at 3, 6, 12, 18 and 24 months for a two-year study.

(B) Certain clinical biochemistry determinations on blood shall be carried out at least three times during the test period: just prior to initiation of dosing (baseline data), near the middle and at the end of the test period. Blood samples shall be drawn for clinical measurements from at least 10 rodents per sex of all groups; if possible, these shall be from the same rodents at each time interval. Test areas which are considered appropriate to all studies: electrolyte balance, carbohydrate metabolism and liver and kidney function. The selection of specific tests will be influenced by observations on the mode of action of the substance and signs of clinical toxicity. Suggested chemical determinations: Calcium, phosphorus, chloride, sodium, potassium, fasting glucose (with period of fasting appropriate to the species), serum glutamic-pyruvic transaminase (now known as serum alanine aminotransferase), serum glutamic oxaloacetic transaminase (now known as serum aspartate aminotransferase), ornithine decarboxylase, gamma glutamyl transpeptidase, blood urea nitrogen, albumen, creatinine phosphokinase, total cholesterol, total bilirubin and total serum protein measurements. Other determinations which may be necessary for an adequate toxicological evaluation include analyses of lipids, hormones, acid/base balance, methemoglobin and cholinesterase activity. Additional clinical biochemistry may be employed where necessary to extend the investigation of observed effects.

(ii) The following shall be performed on at least 10 rodents of each sex per dose level:

(A) Urine samples from the same rodents at the same intervals as the hematological examination in paragraph (c)(9)(i)(A) of this section, shall be collected for analysis. The following determinations shall be made from either individual animals or on a pooled sample/sex/group for rodents: appearance (volume and specific gravity), protein, glucose, ketones, bilirubin, occult blood (semi-quantitatively) and microscopy of sediment (semi-quantitatively).

(B) Ophthalmological examination, using an ophthalmoscope or equivalent suitable equipment, shall be made prior to the administration of the test substance and at the termination of the study. If changes in the eyes are detected, all animals shall be examined.

(10) *Gross necropsy.* (i) A complete gross examination shall be performed on all animals, including those which died during the experiment or were killed in moribund conditions.

(ii) The liver, kidneys, adrenals, brain and gonads shall be weighed wet, as soon as possible after dissection to avoid drying. For these organs, at least 10 rodents per sex per group shall be weighed.

(iii) The following organs and tissues, or representative samples thereof, shall be preserved in a suitable medium for possible future histopathological examination: All gross lesions and tumors; brain—including sections of medulla/pons, cerebellar cortex, and cerebral cortex; pituitary; thyroid/parathyroid; thymus; lungs; trachea; heart; sternum and/or femur with bone marrow; salivary glands; liver; spleen; kidneys, adrenal; esophagus; stomach; duodenum; jejunum; ileum; cecum; colon; rectum; urinary bladder; representative lymph nodes; pancreas; gonads; uterus; accessory genital organs (epididymis, prostate, and if present, seminal vesicles); female mammary gland; aorta; gall bladder (if present); skin; musculature; peripheral nerve; spinal cord at three levels—cervical, midthoracic, and lumbar; and eyes. In inhalation studies, the entire respiratory tract, including nose, pharynx, larynx and paranasal sinuses shall be examined and preserved. In dermal studies, skin from sites of skin painting shall be examined and preserved.

(iv) Inflation of lungs and urinary bladder with a fixative is the optimal method for preservation of these tissues. The proper inflation and fixation of the lungs in inhalation studies is considered essential for appropriate and valid histopathological examination.

(v) If other clinical examinations are carried out, the information obtained from these procedures shall be available before microscopic examination, since they may provide significant guidance to the pathologist.

(11) *Histopathology.* (i) The following histopathology shall be performed:

(A) Full histopathology on the organs and tissues, listed in paragraph (b)(10)(i) through (b)(10)(iii) of this section, of all non-rodents, of all rodents in the control and high dose groups and of all rodents that died or were killed during the study.

(B) All gross lesions in all animals.

(C) Target organs in all animals.

(D) Lungs, liver and kidneys of all animals. Special attention to examination of the lungs of rodents shall be made for evidence of infection since this provides an assessment of the state of health of the animals.

(ii) If excessive early deaths or other problems occur in the high dose group compromising the significance of the data, the next dose level shall be examined for complete histopathology.

(iii) In case the results of the experiment give evidence of substantial alteration of the animals' normal longevity or the induction of effects that might affect a toxic response, the next lower dose level shall be examined for complete histopathology.

(iv) An attempt shall be made to correlate gross observations with microscopic findings.

(c) *Data and reporting*—(1) *Treatment of results.* (i) Data shall be summarized in tabular form, showing for each test group the number of animals at the start of the test, the number of animals showing lesions, the types of lesions and the percentage of animals displaying each type of lesion.

(ii) All observed results, quantitative and incidental, shall be evaluated by an appropriate statistical method. Any generally accepted statistical methods may be used; the statistical methods should be selected during the design of the study.

(2) *Evaluation of study results.* (i) The findings of a combined chronic toxicity/oncogenicity study shall be evaluated in conjunction with the findings of preceding studies and considered in terms of the toxic effects, the necropsy and histopathological findings. The evaluation will include the relationship between the dose of the test substance and the presence, incidence and severity of abnormalities (including behavioral and clinical abnormalities), gross lesions, identified target organs, body weight changes, effects on mortality and any other general or specific toxic effects.

(ii) In any study which demonstrates an absence of toxic effects, further investigation to establish absorption and bioavailability of the test substance should be considered.

(iii) For a negative test to be acceptable, it shall meet the following criteria: No more than 10 percent of any group is lost due to autolysis, cannibalism, or management problems; and survival in each group is no less than 50 percent at 18 months for mice and hamsters and at 24 months for rats.

(3) *Test report.* (i) In addition to the reporting requirements as specified under 40 CFR part 792, subpart J, the following specific information shall be reported:

(A) *Group animal data.* Tabulation of toxic response data by species, strain, sex and exposure level for:

(*1*) Number of animals dying.

(*2*) Number of animals showing signs of toxicity.

(*3*) Number of animals exposed.

(B) *Individual animal data.* (*1*) Time of death during the study or whether animals survived to termination.

(*2*) Time of observation of each abnormal sign and its subsequent course.

(*3*) Body weight data.

(*4*) Food and water consumption data, when collected.

(*5*) Results of ophthalmological examination, when performed.

(*6*) Hematological tests employed and all results.

(*7*) Clinical biochemistry tests employed and all results.

(*8*) Necropsy findings.

(*9*) Detailed description of all histopathological findings.

(*10*) Statistical treatment of results where appropriate.

(*11*) Historical control data, if taken into account.

(ii) In addition, for inhalation studies the following shall be reported:

(A) *Test conditions.* (*1*) Description of exposure apparatus including design, type, dimensions, source of air, system for generating particulates and aerosols, method of conditioning air, treatment of exhaust air and the method of housing the animals in a test chamber.

(*2*) The equipment for measuring temperature, humidity, and particulate aerosol concentrations and size shall be described.

(B) *Exposure data.* These shall be tabulated and presented with mean values and a measure of variability (e.g., standard deviation) and shall include:

(*1*) Airflow rates through the inhalation equipment.

(*2*) Temperature and humidity of air.

(*3*) Nominal concentration (total amount of test substance fed into the inhalation equipment divided by volume of air).

(*4*) Actual concentration in test breathing zone.

(*5*) Particle size distribution (e.g., median aerodynamic diameter of particles with standard deviation from the mean).

(d) *References.* For additional background information on this test guideline the following references should be consulted.

3. In part 799:

PART 799 — [AMENDED]

a. By revising the authority citation for part 799 to read as follows:

Authority: 15 U.S.C. 2601, 2603, 2611, 2625.

b. By adding § 799.5110 to read as follows:

§ 799.5110 Brominated flame retardants.

(a) *Identification of test substances.* (1) Pentabromodiphenyl ether [PBDPE; CAS No. 32534–81–9), octabromodiphenyl ether [OBDPE; CAS No. 32536–52–0), decabromodiphenyl ether (DBDPE; CAS No. 1163–19–5), 1,2-bis(2,4,6-tribromophenoxy)ethane (BTBPE; CAS No. 37853–59–1), and hexabromocyclododecane (HBCD; CAS No. 3194–55–6) shall be tested in accordance with this section.

(2) PBDPE, OBDPE, DBDPE, BTBPE, and HBCD of at least 98 percent purity shall be used as the test substance. For the three diphenyl ethers, "purity" refers to freedom from substances that do not fit the description "brominated diphenyl ethers."

(3) PBDPE as the test substance shall contain at least 58 percent pentabromodiphenyl ether isomers, not more than 25 percent tetrabromodiphenyl ether isomers, and not more than 25 percent hexabromodiphenyl ether isomers. In addition, PBDPE shall not contain more than 10 percent tri- (or lower) brominated diphenyl ether isomers, and also not more than 10 percent hexa(or higher) brominated diphenyl ether isomers.

(4) OBDPE as the test substance shall contain at least 30 percent octabromodiphenyl ether isomers, not more than 45 percent heptabromodiphenyl ether isomers, and not more than 15 percent nonabromodiphenyl ether isomers. In addition, OBDPE shall not contain more than 15 percent hexa- (or lower) brominated diphenyl ether isomers, and also not more than 5 percent deca- (or higher) brominated diphenyl ether isomers.

(5) DBDPE as the test substance shall contain at least 98 percent decabromodiphenyl ether.

(6) Congenerically pure PBDPE shall contain at least 98 percent pentabromodiphenyl ether isomers.

(7) Congenerically pure OBDPE shall contain at least 98 percent octabromodiphenyl ether isomers.

(b) *Persons required to submit study plans, conduct tests and submit data.* All persons who manufacture (including import) or process or intend to manufacture or process PBDPE, OBDPE, DBDPE, BTBPE, or HBCD, other than as an impurity, after (insert date 44 days after date of publication of the final test rule in the Federal Register) to the end of the reimbursement period shall submit letters of intent to conduct testing, submit study plans, conduct tests, and submit data, or submit exemption applications as specified in this section, subpart A of this part and parts 790 and 792 of this chapter for single-phase rulemaking, for the substances they manufacture.

(c) *Health effects testing*—(1) *Mutagenic effects—gene mutation*—(i)

VOL 56 ISS 122 JE 25 1991 UMI

Required testing. (A) Gene mutation assays in the *Salmonella typhimurium* histidine reversion system shall be conducted with OBDPE in accordance with § 798.5265 of this chapter.

(B) Gene mutation assays in somatic cells in culture shall be conducted with PBDPE, OBDPE, BTBPE, and HBCD in accordance with § 798.5300 of this chapter.

(C) A sex-linked recessive lethal test in *Drosophila melanogaster* shall be conducted with PBDPE, OBDPE, DBDPE, BTBPE or HBCD in accordance with § 798.5275 of this chapter for any of these substances that produces a positive result in either the *Salmonella* assay conducted on OBDPE, DBDPE, and HBCD pursuant to paragraph (c)(2)(i)(A) of this section or the somatic cells in culture assay conducted on PBDPE, OBDPE, DBDPE, BTBPE, and HBCD pursuant to paragraph (c)(2)(i)(B) of this section.

(D) A mouse visible specific locus test (MVSL) or a mouse biochemical specific locus (MBSL) test shall be conducted with PBDPE, OBDPE, DBDPE, BTBPE, or HBCD in accordance with § 798.5200 or § 798.5195, respectively, for whichever of these substances produces a positive result in the sex-linked recessive lethal test in *Drosophila melanogaster* conducted pursuant to paragraph (c)(2)(i)(C) of this section.

(ii) *Reporting requirements.* (A) Mutagenic effects - gene mutation tests shall be conducted and the final reports submitted to EPA as follows:

(*1*) Gene mutation in *Salmonella*, 9 months after the effective date.

(*2*) Gene mutation in somatic cells in culture, 10 months after the effective date.

(*3*) *Drosophila* sex-linked recessive lethal, 22 months after the effective date.

(*4*) Mouse specific locus, within 51 months of the date of EPA's notification of the test sponsor by certified letter that testing shall be initiated.

(B) Progress reports shall be submitted to EPA every 6 months beginning 6 months after the effective date for the gene mutation tests in *Salmonella* and gene mutation tests in somatic cells in culture; for the *Drosophila* test, beginning 6 months after the date the final report is submitted for the gene mutation in somatic cells in culture test; and for the mouse specific locus test, beginning 6 months after the date of EPA's notification of the test sponsor that testing shall be initiated.

(2) *Mutagenic effects—chromosomal aberrations* — (i) *Required testing.* (A) *In vivo* cytogenetic assays shall be conducted with PBDPE, OBDPE, DBDPE, BTBPE, and HBCD in accordance with § § 798.5385 or 798.5395 of this chapter.

(B) A dominant lethal assay shall be conducted with PBDPE, OBDPE, DBDPE, BTBPE, or HBCD in accordance with § 798.5450 of this chapter, for any of these substances that produces a positive result in the *in vivo* cytogenetic assay conducted pursuant to paragraph (c)(2)(i)(A) of this section.

(C) A heritable translocation assay shall be conducted with PBDPE, OBDPE, DBDPE, BTBPE, or HBCD in accordance with § 798.5460 of this chapter, for any of these substances that produces a positive result in the dominant lethal assay conducted pursuant to paragraph (c)(3)(i)(B) of this section.

(ii) *Reporting requirements.* (A) Mutagenic effects-chromosomal aberration testing shall be completed and the final reports submitted to EPA as follows:

(*1*) *In vivo* cytogenetics, within 14 months after the effective date; and dominant lethal assay, within 36 months after the effective date.

(*2*) Heritable translocation assay, within 25 months of the date of EPA's notification of the test sponsor by certified letter that testing shall be initiated.

(B) Progress reports shall be submitted to EPA every 6 months beginning as follows:

(*1*) For the *in vivo* cytogenetics assay, 6 months after the effective date.

(*2*) For the dominant lethal assay, beginning 6 months after the date the final report is submitted for the *in vitro* cytogenetics test.

(*3*) For the heritable translocation assay, beginning 6 months after the date of EPA's notification of the test sponsor that testing shall be initiated.

(3) *Subchronic toxicity* — (i) *Required testing.* Subchronic toxicity testing shall be conducted by gavage with HBCD in accordance with § 798.2650 of this chapter.

(ii) *Reporting requirements.* (A) The required subchronic toxicity test shall be completed and the final reports submitted to EPA within 18 months of the effective date.

(B) Progress reports shall be submitted to EPA every 6 months beginning 6 months after the effective date until the final report is submitted.

(4) *Neurotoxicity*—(i) *Required testing*—(A) *Functional observational battery. (1)* A functional observational battery test shall be conducted with PBDPE, OBDPE, DBDPE, BTBPE, and HBCD in accordance with § 798.6050 of this chapter except for the provisions in paragraphs (d)(4)(ii), (d)(5), and (d)(6) of § 798.6050.

(*2*) For the purpose of this section the following provisions also apply:

(*i*) *Lower doses.* The data from the lower doses shall show either graded dose-dependent effects or no neurotoxic (behavioral) effects at any dose tested.

(*ii*) *Duration and frequency of exposure.* For the acute testing, animals shall be treated once. For the subchronic testing, animals shall be treated 5 consecutive days per week for a 90-day period.

(*iii*) *Route of exposure.* Animals shall be exposed to PBDPE, OBDPE, DBDPE, BTBPE, and HBCD by gavage administration.

(B) *Motor activity.* (*1*) Motor activity testing shall be conducted with PBDPE, OBDPE, DBDPE, BTBPE, and HBCD in accordance with § 798.6200 of this chapter except for the provisions in paragraphs (d)(4)(ii), (d)(5), and (d)(6) of § 798.6200.

(*2*) For the purpose of this section, the following provisions also apply:

(*i*) *Lower doses.* The data from the lower doses shall show either graded dose-dependent effects or no neurotoxic (behavioral) effects at any dose tested.

(*ii*) *Duration and freguency of exposure.* For the acute testing, animals shall be treated once. For the subchronic testing animals shall be treated 5 consecutive days per week for a 90-day period.

(*iii*) *Route of exposure.* Animals shall be exposed to PBDPE, OBDPE, DBDPE, BTBPE, and HBCD by gavage administration.

(C) *Neuropathology.* (*1*) Neuropathology testing shall be conducted with PBDPE, OBDPE, DBDPE, BTBPE, and HBCD administered by gavage in accordance with § 798.6400 of this chapter except for the provisions in paragraphs (d)(4)(ii), (d)(5), (d)(6) and (d)(8)(iv)(C) of § 798.6400.

(*2*) For the purpose of paragraph (c)(6)(i)(C) of this section, the following provisions also apply:

(*i*) *Lower doses.* The data from the lower doses shall show either graded dose-dependent effects or no neurotoxic (behavioral) effects at any dose tested.

(*ii*) *Duration and freguency of exposure.* For the acute testing, animals shall be treated once. For the subchronic testing animals shall be treated 5 consecutive days per week for a 90-day period.

(*iii*) *Route of exposure.* Animals shall be exposed to PBDPE, OBDPE, DBDPE, BTBPE, and HBCD by gavage administration.

(*iv*) *Clearing and embedding.* After dehydration, tissue specimens shall be cleared with xylene and embedded in wax or plastic medium except for the sural nerve which should be embedded in plastic. Multiple tissue specimens (e.g. brain, cord, ganglia) may be embedded together in one single block for sectioning. All tissue blocks shall be labelled to provide unequivocal identification. Plastic embedding should follow the method described by Spencer, et al., in paragraph (f) of this section, or an equivalent method.

(ii) *Reporting requirements.* (A) The functional observational battery, motor activity, and neuropathology testing with PBDPE, OBDPE, DBDPE, BTBPE, and HBCD shall be completed and the final reports submitted to EPA within 21 months of the effective date.

(B) Progress reports shall be submitted every 6 months beginning 6 months after the effective date until the final report is submitted.

(5) *Reproductive toxicity*—(i) *Required testing.* A reproductive toxicity test shall be conducted with PBDPE, OBDPE, DBDPE, BTBPE, and HBCD by gavage in accordance with § 798.4700 of this chapter.

(ii) *Reporting requirements.* (A) The reproductive toxicity test for PBDPE, DBDPE, BTBPE, and HBCD shall be completed and the final reports submitted to EPA within 29 months of the effective date. The reproductive toxicity test for OBDPE shall be completed and the final report submitted to EPA within 29 months of the test sponsor's receipt of a certified letter from EPA specifying that a reproductive toxicity test for OBDPE be initiated.

(B) Progress reports shall be submitted to EPA every 6 months beginning 6 months after the effective date for PBDPE, DBDPE, BTBPE, HBCD, and, for OBDPE, beginning 6 months after the test sponsor's receipt of a certified letter specifying that a reproductive toxicity test be initiated until the final report is submitted.

(6) *Developmental toxicity*—(i) *Required testing.* (A) Developmental toxicity testing in two species, a rat and nonrodent, shall be conducted with PBDPE, OBDPE, and HBCD by gavage in accordance with § 798.4900 of this chapter.

(B) Developmental toxicity testing in one non-rodent species shall be conducted with DBDPE and BTBPE by gavage in accordance with § 798.4900 of this chapter.

(ii) *Reporting requirements.* (A) The developmental toxicity testing shall be completed and the final reports submitted to EPA within 12 months of the effective date.

(B) Progress reports shall be submitted to EPA every 6 months beginning 6 months after the effective date until the final report is submitted.

(7) *Oncogenicity*—(i) *Required testing.* (A) Oncogenicity testing shall be conducted in mice with PBDPE, OBDPE, and BTBPE by gavage in accordance with § 798.3300 of this chapter.

(B) Oncogenicity testing shall also be conducted in both rats and mice with HBCD by gavage in accordance with § 798.3300 of this chapter if a positive result is obtained in any one of the following mutagenicity tests and EPA notifies the sponsor by certified letter that testing shall be initiated:

(*1*) The gene mutation somatic cells in culture assay conducted pursuant to paragraph (c)(1)(i)(B) of this section.

(*2*) The sex-linked recessive lethal assay in *Drosophila melanogaster* conducted pursuant to paragraph (c)(1)(i)(C) of this section.

(*3*) The *in vivo* cytogenetics assay conducted pursuant to paragraph (c)(2)(i)(A) of this section.

(C) Criteria for positive test results are established in 40 CFR 798.5395, 798.5385, 798.5300, and 798.5275 of this chapter, respectively.

(ii) *Reporting requirements.* (A) The oncogenicity testing for PBDPE, OBDPE, and BTBPE shall be completed and the final reports submitted to EPA within 53 months of the effective date. The oncogenicity testing for HBCD, if required, shall be completed and final results submitted to EPA within 53 months of the test sponsor's receipt of a certified letter from EPA specifying that an oncogenicity test for HBCD be initiated.

(B) Progress reports shall be submitted to EPA every 6 months beginning 6 months after the effective date for PBDPE; OBDPE, and BTBPE and, for HBCD, beginning 6 months after the test sponsor's receipt of a certified letter specifying that an oncogenicity test be initiated until the final report is submitted.

(8) *Combined chronic toxicity/ oncogenicity*—(i) *Required testing.* Combined chronic toxicity/oncogenicity tests shall be conducted in rats with PBDPE, OBDPE, and BTBPE by gavage, in accordance with § 798.3320 of this chapter.

(ii) *Reporting requirements.* (A) The combined chronic toxicity/oncogenicity testing shall be completed and the final reports submitted to EPA within 53 months of the effective date.

(B) Progress reports shall be submitted to EPA every 6 months beginning 6 months after the effective date until the final report is submitted.

(d) *Environmental effects testing*—(1) *Algal testing* — (i) *Required testing.* Algal toxicity testing shall be conducted with PBDPE, BTBPE, and HBCD in accordance with § 797.1050 of this chapter. Algal toxicity testing shall be conducted with OBDPE and DBDPE in accordance with § 797.1050 of this chapter if an EC50 of $\leq$ 10 µg/L is obtained with PBDPE in this assay or, if that test concentration (EC50) is unattainable, at or below the limit of water solubility as determined by the water solubility testing conducted pursuant to paragraph (e)(1)(i) of this section.

(ii) *Reporting requirements.* (A) The algal toxicity test for PBDPE, BTBPE, and HBCD shall be completed and the final reports submitted to EPA within 15 months of the effective date. The algal toxicity test for OBDPE and DBDPE, if required, shall be completed and final results submitted to EPA within 24 months of the effective date.

(B) Progress reports shall be submitted to EPA every 6 months beginning 12 months after the effective date for PBDPE and BTBPE, and beginning 21 months after the effective date for OBDPE and DBDPE until the final report is submitted.

(2) *Fish chronic toxicity testing*—(i) *Required testing.* Fish early life stage toxicity tests shall be conducted with rainbow trout and sheepshead minnows with PBDPE, BTBPE, and HBCD in accordance with § 797.1600 of this chapter. Fish early life stage toxicity tests shall be conducted with rainbow trout and sheepshead minnows with OBDPE and DBDPE in accordance with § 797.1600 of this chapter if a geometric mean MATC value of $<$ 10 µg/L is obtained with PBDPE in this test with either fish species or, if that test concentration (geometric mean MATC value) is unattainable, at or below the limit of water solubility as determined by the water solubility testing conducted pursuant to paragraph (e)(1)(i) of this section.

(ii) *Reporting requirements.* (A) The fish early life stage toxicity tests for PBDPE, BTBPE, and HBCD shall be completed and the final reports submitted to EPA within 18 months of the effective date. The fish early life stage toxicity test for OBDPE and DBDPE, if required, shall be completed and the final reports submitted to EPA within 30 months of the effective date.

(B) Progress reports shall be submitted to EPA every 6 months beginning 12 months after the effective date for PBDPE, BTBPE, and HBCD, and beginning 24 months after the effective date for OBDPE and DBDPE until the final report is submitted.

(3) *Invertebrate chronic toxicity testing* —(i) *Required testing.* (A) Daphnid chronic toxicity tests shall be conducted with PBDPE, BTBPE, and HBCD in accordance with § 797.1330 of this chapter. A daphnid chronic toxicity

VOL 56 ISS 122 JE 25 1991 UMI

test with OBDPE and DBDPE shall also be conducted in accordance with § 797.1330 of this chapter if a geometric mean MATC of ≤ 10 µg/L is obtained with PBDPE in either this test or the mysid shrimp chronic toxicity tests conducted pursuant to paragraph (d)(3)(i)(B) of this section or, if that test concentration (geometric mean MATC) is unattainable, at or below the limit of water solubility as determined by the water solubility testing conducted pursuant to paragraph (e)(1)(i) of this section.

(B) Mysid shrimp chronic toxicity test shall be conducted with PBDPE, BTBPE, and HBCD in accordance with § 797.1950 of this chapter. Mysid shrimp chronic toxicity tests with OBDPE and DBDPE shall also be conducted in accordance with § 797.1950 of this chapter, if a geometric mean MATC of ≤ 10 µg/L is obtained with PBDPE in either this test or the daphnid chronic toxicity test conducted pursuant to paragraph (d)(3)(i)(A) of this section or, if that test concentration (geometric mean MATC value) is unattainable, at or below the limit of water solubility as determined by the water solubility testing conducted pursuant to paragraph (e)(1)(i) of this section.

(ii) *Reporting requirements.* (A) Invertebrate chronic toxicity testing shall be conducted and the final reports submitted to EPA as follows:

(*1*) Daphnid chronic toxicity with PBDPE, BTBPE, and HBCD, 18 months after the effective date and, if required with OBDPE and DBDPE, 30 months after the effective date.

(*2*) Mysid shrimp chronic toxicity with PBDPE, BTBPE, and HBCD, 15 months after the effective date and, if required with OBDPE and DBDPE, 24 months after the effective date.

(B) Progress reports shall be as submitted to EPA as follows:

(*1*) For daphnid chronic toxicity, every 6 months beginning 12 months after the effective date for PBDPE, BTBPE, and HBCD and, if required, beginning 24 months after the effective date for OBDPE and DBDPE until the final report is submitted.

(*2*) For mysid shrimp chronic toxicity, every 6 months beginning 9 months after the effective date for PBDPE, BTBPE, and HBCD, and if required, beginning 21 months after the effective date for OBDPE and DBDPE until the final report is submitted.

(4) *Benthic organism chronic toxicity testing*—(i) *Required testing.* Chironomid sediment toxicity tests shall be conducted with PBDPE, BTBPE, and HBCD as specified in § 795.135 of this chapter. Chironomid sediment toxicity tests shall be conducted with OBDPE and DBDPE in accordance with § 795.135 of this chapter if a geometric mean MATC of ≤ 100 mg PBDPE/kg dry weight of sediment is obtained with PBDPE in this test.

(ii) *Reporting requirements.* (A) Chironomid sediment toxicity testing for PBDPE, BTBPE, and HBCD shall be completed and the final reports submitted to EPA within 18 months of the effective date. Chironomid sediment toxicity testing for OBDPE and DBDPE, if required, shall be completed and the final reports submitted to EPA within 30 months of the effective date.

(B) Progress reports shall be submitted to EPA every 6 months beginning 12 months after the effective date for PBDPE, BTBPE, and HBCD and, if required, beginning 24 months after the effective date for OBDPE and DBDPE until a final report is submitted.

(5) *Terrestrial organism testing*—(i) *Required testing.* (A) Mallard reproduction tests shall be conducted with PBDPE, BTBPE, and HBCD in accordance with § 797.2150 of this chapter. This test shall also be conducted with OBDPE and DBDPE in accordance with § 797.2150 of this chapter if a no-observed-effect-level (NOEL) ≤ 500 ppm is obtained with PBDPE in this test.

(B) Earthworm soil subchronic toxicity tests shall be conducted with PBDPE, BTBPE, and HBCD in accordance with § 795.150 of this chapter. This test shall also be conducted with OBDPE and DBDPE in accordance with § 795.150 of this chapter if an EC50 of ≤ 100 mg PBDPE/kg dry weight of sediment is obtained with PBDPE in this test.

(ii) *Reporting requirements.* (A) Terrestrial organism testing shall be conducted and the final reports submitted to EPA as follows:

(*1*) Mallard reproduction testing with PBDPE, BTBPE, and HBCD and, if required with OBDPE and DBDPE, 30 months after the effective date.

(*2*) Earthworm toxicity testing with PBDPE, BTBPE, and HBCD, 18 months after the effective date and with OBDPE and DBDPE, 30 months after the effective date.

(B) Progress reports shall be submitted to EPA every 6 months beginning 12 months after the effective date for PBDPE, BTBPE, and HBCD and, if required, beginning 24 months after the effective date for OBDPE and DBDPE until the final report is submitted.

(6) *Terrestrial plant testing*—(i) *Required testing.* (A) Seed germination/root elongation toxicity tests shall be conducted with PBDPE, BTBPE, and HBCD in accordance with § 797.2750 of this chapter. Seed germination/root elongation toxicity tests shall be conducted with OBDPE and DBDPE in accordance with § 797.2750 of this chapter if an EC50 of ≤ 100 mg PBDPE/kg dry weight of soil is obtained with PBDPE in either this test or the early seedling growth toxicity test conducted pursuant to paragraph (d)(6)(i)(B) of this section.

(B) Early seedling growth toxicity tests shall be conducted with PBDPE, BTBPE, and HBCD in accordance with § 797.2800 of this chapter. Early seedling growth toxicity tests shall be conducted with OBDPE and DBDPE in accordance with § 797.2800 of this chapter if an EC50 of ≤ 100 mg PBDPE/kg dry weight of soil is obtained with PBDPE in either this test or the seed germination/root elongation toxicity test is conducted pursuant to paragraph (d)(6)(i)(A) of this section.

(ii) *Reporting requirements.* (A) Terrestrial plant testing shall be conducted and the final reports submitted to EPA as follows:

(*1*) Seed germination/root elongation toxicity test with PBDPE, BTBPE, and HBCD, 15 months after effective date and, if required with OBDPE and DBDPE, 24 months after effective date;

(*2*) Early seedling growth toxicity test with PBDPE, BTBPE, and HBCD, 15 months after effective date and, if required with OBDPE and DBDPE, 24 months after effective date.

(B) Progress reports shall be submitted to EPA every 6 months beginning 12 months after the effective date for PBDPE, BTBPE, and HBCD and, if required, every 6 months beginning 21 months after the effective date for OBDPE and DBDPE until the final report is submitted.

(7) *Immunotoxicity*—(i) *Required testing.* (A) Immunotoxicity tests shall be conducted with PBDPE, BTDPE, and HBCD.

(B) The testing shall be conducted in accordance with the test procedure specified in an article by N.K. Jerne, et. al., entitled "Plaque Forming Cells: Methodology and Theory—I. The Standard Theory", published in *Transplant Reviews* 18:130–191 (1974), and in an article by M.E. Luster et. al., entitled "Methods Evaluation-Development of a Testing Battery to Assess Chemical-Induced Immunotoxicity: National Toxicology Program's Guidelines for Immunotoxicity Evaluation in Mice", published in *Fundamental and Applied Toxicology*, Vol. 10, pp. 2–19. (1988), which are incorporated by reference. Copies of these materials are available in the TSCA Public Reading Room, Rm. NE-G004, 401 M St., SW., Washington, DC 20460. These materials are also available for inspection at the Office of the Federal Register, Rm. 8401, 1100 L St., NW., Washington, DC 20408. These incorporations by reference were approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. These methods are incorporated as they exist on the effective date of this rule and a notice of any changes to the methods will be published in the Federal Register.

(C) Immunotoxicity tests shall also be conducted with OBDPE and DBDPE in accordance with the methodology incorporated by reference in paragraph (d)(7)(i)(B) of this section, if a no observed effect level of ≤ 500 ppm is obtained with PBDPE in this test.

(ii) *Reporting requirements.* (A) Immunotoxicity tests for PBDPE, BTBPE, and HBCD shall be conducted and the final reports submitted to EPA within 15 months of the effective date. Immunotoxicity testing for OBDPE and DBDPE, if required, shall be completed and the final results submitted to EPA within 24 months of the effective date.

(B) Progress reports shall be submitted to EPA every 6 months beginning 12 months after the effective date for PBDPE, BTBPE, and HBCD and, if required, beginning 18 months after the effective date for OBDPE and DBDPE until the final report is submitted.

(8) *Bioconcentration*—(i) *Required testing.* Fish bioconcentration tests shall be conducted with PBDPE, BTBPE, and HBCD in accordance with § 797.1520 of this chapter except for the provisions in paragraphs (c)(1)(i), (c)(1)(iii), (c)(4)(ii)(A), (c)(4)(iii)(A), (c)(4)(iii)(B)(2), (c)(4)(iii)(C), (c)(4)(viii)(A), (c)(5)(i)(C), (c)(5)(i)(D), and (c)(5)(ii)(A). Fish bioconcentration tests shall be conducted with OBDPE and DBDPE in accordance with § 797.1520, except for the provisions in paragraphs (c)(1)(i), (c)(1)(iii), (c)(4)(ii)(A), (c)(4)(iii)(A), (c)(4)(iii)(B)(2), (c)(4)(iii)(C), (c)(4)(viii)(A), (c)(5)(i)(C), (c)(5)(i)(D), and (c)(5)(ii)(A), if a bioconcentration factor of ≥ 1000 is obtained with PBDPE with this test.

(A) For purposes of this section, the following also applies:

(*1*) *Test procedures*—(*i*) *Summary of the test.* Fish are continuously exposed to at least two constant sublethal concentrations of a test substance under flow-through conditions for a maximum of 91 days. During this time, test solutions and fish are periodically sampled and analyzed using appropriate methods to quantify the test substance concentrations. The maximum depuration period is 56 days.

(*ii*) If steady-state is not reached during 91 days of uptake, the steady-state BCF is calculated using non-linear parameter estimation methods.

(*2*) *Definitive test.* (*i*) At least two concentrations should be tested to assess the propensity of the compound to bioconcentrate. The concentrations selected should not stress or adversely affect the fish. The highest concentration should be less than the limit of water solubility. The lowest concentration should be one-tenth of the higher concentration, as long as that concentration is greater than three times the limit of quantification. The limiting factor for how low one can test is based on the detection limit of the analytical methods. The lower concentration of the test material in the test solution should be at least three times greater than the detection limit in water.

(*ii*) An estimate of the length of the uptake and depuration phases should be made prior to testing. This will allow the most effective sampling schedule to be determined. The uptake phase should continue for 91 days.

(*iii*) The following sampling schedule should be used to generate the appropriate data.

SAMPLING SCHEDULE (DAYS)

Sampling	Treatment	Controls
Exposure	1	1
	7	7
	14	–
	28	28
	56	–
	91	91
Depuration	7	7
	14	14
	28	–
	56	56

(*iv*) The depuration phase shall continue until at least 95 percent of the accumulated test substance and metabolites have been eliminated, but no longer than 56 days.

(*v*) At each of the designated sampling times, triplicate water samples and enough fish should be collected from the exposure chamber(s) to allow for at least three fish tissue analyses. A similar number of control fish should also be collected at each sample point, but only fish collected at the first sampling period and on days 1, 7, 28, and 91 for exposure treatment samples, and on days 7, 14, and 56 of depuration treatment samples should be analyzed. Triplicate control water samples will be collected at the time of test initiation and weekly thereafter. Test solution samples should be removed from the approximate center of the water column.

(*vi*) If steady-state was not reached during the 91 day uptake period, the maximum BCF should be calculated using the mean tissue concentration from that day and the mean water concentration from that and the previous sampling day. An uptake rate constant should then be calculated using appropriate techniques, such as the BIOFAC program developed by Blau and Agin (1978). This rate constant will allow the estimation of a steady-state BCF and the estimated time to steady-state.

(*vii*) If 95 percent elimination has not been observed after 56 days depuration, then a depuration rate constant should be calculated. This rate constant will allow estimation of the time to 95 percent elimination.

(*viii*) All samples shall be analyzed using gas chromatography coupled to a mass spectrometer (GC/MS) to quantitate each polybrominated biphenyl ether (PBBE) isomer present. All tests shall be conducted at aqueous concentrations below the measured water solubility of the specific mixture being tested. All tests shall be performed using samples from the identical commercial mixture. The specific methodology used shall be validated before the test is initiated. The accuracy of the method should be measured by the method of known additions. This involves adding a known amount of the test substance to three water samples taken from an aquarium containing dilution water and a number of fish equal to that to be used in the test. The nominal concentration of these samples shall be the same as the concentration to be used in the test. Samples taken on two separate days shall be analyzed: The accuracy and precision of GC/MS analytical method should be verified using reference samples or split samples or suitable corroborative methods of analysis. The accuracy of the standard solution should be checked against other standard solutions whenever possible.

(B) [Reserved]

(ii) *Reporting requirements.* (A) Fish bioconcentration tests for PBDPE, BTBPE, and HBCD shall be conducted and the final reports submitted to EPA within 18 months of the effective date. Fish bioconcentration tests for OBDPE and DBDPE, if required, shall be completed and the final reports submitted to EPA within 30 months of the effective date.

(B) Progress reports shall be submitted to EPA every 6 months beginning 12 months after the effective date for PBDPE, BTBPE, and HBCD, and, if required, beginning 24 months after the effective date for OBDPE and DBDPE until the final report is submitted.

VOL 56 ISS 122 JE 25 1991 UMI

(e) *Chemical fate testing*—(1) *Water solubility*—(i) *Required testing.* (A) Water solubility tests shall be conducted with PBDPE, OBDPE, DBDPE, BTBPE, and HBCD in accordance with § 796.1860 of this chapter except for the provisions in paragraph (c)(1)(iii).

(B) For the purposes of this section the following provisions also apply:

(*1*) *Performance of the test.* (*i*) Determine the water solubility of the test compound in dilution water at the salinity and temperature specified for the algal toxicity test conducted pursuant to paragraph (d)(1)(i) of this section, for the fish early life stage toxicity tests conducted pursuant to paragraph (d)(2)(i) of this section, for the invertebrate chronic toxicity tests conducted pursuant to paragraphs (d)(3)(i)(A) and (d)(3)(i)(B) of this section, and for the benthic organism toxicity testing conducted pursuant to paragraph (d)(4)(i) of this section.

(*ii*) Water solubility shall be analyzed utilizing an electron capture detector.

(*2*) [Reserved]

(ii) *Reporting requirements.* The water solubility tests shall be completed and the final reports submitted to EPA within 6 months of the effective date.

(2) *Octanol/water partitioning*—(i) *Required testing.* Log octanol/water partition coefficient tests shall be conducted with PBDPE, OBDPE, and DBDPE in accordance with § 796.1720 of this chapter.

(ii) *Reporting requirements.* The log octanol/water partition coefficient tests shall be completed and the final reports submitted to EPA within 6 months of the effective date.

(3) *Vapor pressure*—(i) *Required testing.* Vapor pressure tests shall be conducted with PBDPE, OBDPE, DBDPE, BTBPE, and HBCD in accordance with § 796.1950 of this chapter.

(ii) *Reporting requirements.* The vapor pressure tests shall be completed and the final reports submitted to EPA within 6 months of the effective date.

(4) *Sediment and soil adsorption*—(i) *Required testing.* Sediment and soil adsorption tests shall be conducted with PBDPE, OBDPE, DBDPE, BTBPE, and HBCD in accordance with § 796.2750 of this chapter.

(ii) *Reporting requirements.* The sediment and soil adsorption tests shall be completed and the final reports submitted to EPA within 6 months of the effective date.

(5) *Photolysis*—(i) *Required testing.* Direct and indirect photolysis tests shall be conducted on congenerically pure PBDPE, OBDPE, DBDPE, BTBPE, and HBCD in accordance with §§ 796.3780, 796.3900 and 796.3700 of this chapter.

(ii) *Reporting requirements.* The direct and indirect photolysis tests shall be completed and the final reports submitted to EPA within 6 months of the effective date.

(6) *Aerobic biodegradation*—(i) *Required testing.* (A) For each respective test substance, biodegradation testing in sediment/water shall be conducted with PBDPE, BTBPE, and HBCD.

(B) The testing shall be conducted using clean, freshwater sediments in accordance with the method described in an A.W. Bourquin article entitled "An Artificial Microbial Ecosystem for Determining Effects and Fate of Toxicants in a Salt-Marsh Environment", published in *Developments in Industrial Microbiology*, Vol. 18, Chapter 11, 1977, which is incorporated by reference. Copies of this material incorporated by reference are available in the TSCA Public Reading Room, Rm. NE–G004, 401 M St., SW., Washington, DC 20460. These materials are also available for inspection at the Office of the Federal Register, Rm 8401, 1100 L St., NW., Washington, DC 20408. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. This method is incorporated as it exists on the effective date of this rule and notice of any change to the method will be published in the **Federal Register.**

(C) Biodegradation testing in sediment/water shall also be conducted with OBDPE and DBDPE in accordance with the methodology incorporated by reference in paragraph (e)(6)(i)(B) of this section, if mineralization to CO_2 greater than 10 percent is obtained with PBDPE in this test.

(ii) *Reporting requirements.* (A) Biodegradation testing in sediment/water shall be completed and the final reports submitted to EPA within 12 months of the effective date for PBDPE, BTBPE, and HBCD, and, if required, within 24 months of the effective date for OBDPE and DBDPE.

(B) Progress reports for biodegradation testing in sediment/water shall be submitted to EPA every 6 months beginning 6 months after the effective date for PBDPE, BTBPE, and HBCD, and, if required, every 6 months, beginning 18 months after the effective date for OBDPE and DBDPE until the final report is submitted.

(7) *Anaerobic biodegradation*—(i) *Required testing.* Anaerobic biodegradation testing shall be conducted with PBDPE, OBDPE, DBDPE, BTBPE, and HBCD in accordance with § 796.3140 of this chapter.

(ii) *Reporting requirements.* The anaerobic biodegradation test shall be completed and the final reports submitted to EPA within 6 months of the effective date.

(f) *Reference(s).* For additional background information, the following reference(s) should be consulted.

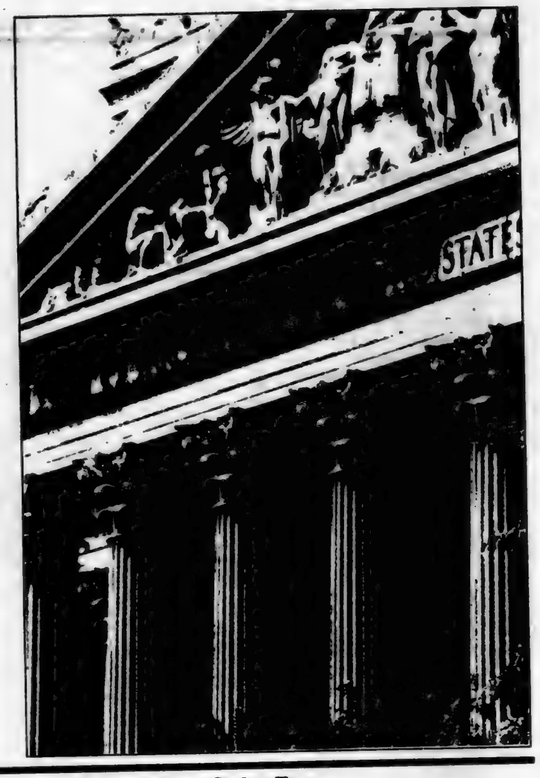
Would you like to know...

if any changes have been made to the Code of Federal Regulations or what documents have been published in the Federal Register without reading the Federal Register every day? If so, you may wish to subscribe to the *LSA (List of CFR Sections Affected)*, the *Federal Register Index*, or both.

LSA • List of CFR Sections Affected



The LSA (List of CFR Sections Affected) is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register. The LSA is issued monthly in cumulative form. Entries indicate the nature of the changes—such as revised, removed, or corrected.
$21.00 per year

Federal Register Index

The index, covering the contents of the daily Federal Register, is issued monthly in cumulative form. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references.
$19.00 per year.

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register.

Note to FR Subscribers:
FR Indexes and the LSA (List of CFR Sections Affected) are mailed automatically to regular FR subscribers.

Superintendent of Documents Subscriptions Order Form

Order Processing Code
*6483

Charge your order. It's easy!

Charge orders may be telephoned to the GPO order desk at (202) 783-3238 from 8:00 a.m. to 4:00 p.m. eastern time, Monday-Friday (except holidays).

☐ **YES,** please send me the following indicated subscriptions:

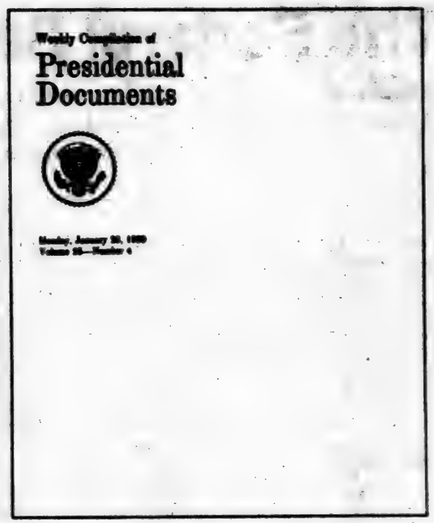
☐ LSA • List of CFR Sections Affected—one year as issued—$21.00 (LCS)

☐ Federal Register Index—one year as issued—$19.00 (FRSU)

1. The total cost of my order is $_____. All prices include regular domestic postage and handling and are subject to change. International customers please add 25%.

Please Type or Print

2. _____ (Company or personal name)
_____ (Additional address/attention line)
_____ (Street address)
_____ (City, State, ZIP Code)
(_____) (Daytime phone including area code)



3. **Please choose method of payment:**
☐ Check payable to the Superintendent of Documents
☐ GPO Deposit Account ☐☐☐☐☐☐-☐
☐ VISA or MasterCard Account
☐☐☐☐☐☐☐☐☐☐☐☐☐☐☐☐
_____ (Credit card expiration date) *Thank you for your order!*
_____ (Signature) (REV. 10-1-88)

4. **Mail To:** Superintendent of Documents, Government Printing Office, Washington, DC 20402-9371

The authentic text behind the news . . .

The Weekly Compilation of **Presidential Documents**

Administration of George Bush

This unique service provides up-to-date information on Presidential policies and announcements. It contains the full text of the President's public speeches, statements, messages to Congress, news conferences, personnel appointments and nominations, and other Presidential materials released by the White House.

The Weekly Compilation carries a Monday dateline and covers materials released during the preceding week. Each issue contains an Index of Contents and a Cumulative Index to Prior Issues.

Separate indexes are published periodically. Other features include lists of acts approved by the President, nominations submitted to the Senate, a checklist of White House press releases, and a digest of other Presidential activities and White House announcements.

Published by the Office of the Federal Register, National Archives and Records Administration.

The Federal Register

Regulations appear as **agency** documents which are published daily in the **Federal Register** and codified annually in the **Code of Federal Regulations**

The **Federal Register**, published daily, is the official publication for notifying the public of proposed and final regulations. It is the tool for you to use to participate in the rulemaking process by commenting on the proposed regulations. And it keeps you up to date on the Federal regulations currently in effect.

Mailed monthly as part of a **Federal Register** subscription are: the **LSA (List of CFR Sections Affected)** which leads users of the **Code of Federal Regulations** to amendatory actions published in the daily **Federal Register**; and the cumulative **Federal Register Index**.

The **Code of Federal Regulations (CFR)** comprising approximately 196 volumes contains the annual codification of the final regulations printed in the **Federal Register**. Each of the 50 titles is updated annually.

Individual copies are separately priced. A price list of current CFR volumes appears both in the **Federal Register** each **Monday and the monthly LSA (List of CFR Sections Affected)**. Price inquiries may be made to the Superintendent of Documents, or the Office of the **Federal Register**.

New edition .... Order now !

For those of you who must keep informed about **Presidential Proclamations and Executive Orders**, there is a convenient reference source that will make researching these documents much easier.

Arranged by subject matter, this edition of the *Codification* contains proclamations and Executive orders that were issued or amended during the period April 13, 1945, through January 20, 1989, and which have a continuing effect on the public. For those documents that have been affected by other proclamations or Executive orders, the codified text presents the amended version. Therefore, a reader can use the *Codification* to determine the latest text of a document without having to "reconstruct" it through extensive research.

Special features include a comprehensive index and a table listing each proclamation and Executive order issued during the 1945–1989 period—along with any amendments—an indication of its current status, and, where applicable, its location in this volume.

Published by the Office of the Federal Register, National Archives and Records Administration

The United States Government Manual 1990/91

As the official handbook of the Federal Government, the *Manual* is the best source of information on the activities, functions, organization, and principal officials of the agencies of the legislative, judicial, and executive branches. It also includes information on quasi-official agencies and international organizations in which the United States participates.

Particularly helpful for those interested in where to go and who to see about a subject of particular concern is each agency's "Sources of Information" section, which provides addresses and telephone numbers for use in obtaining specifics on consumer activities, contracts and grants, employment, publications and films, and many other areas of citizen interest. The *Manual* also includes comprehensive name and agency/subject indexes.

Of significant historical interest is Appendix C, which lists the agencies and functions of the Federal Government abolished, transferred, or changed in name subsequent to March 4, 1933.

The *Manual* is published by the Office of the Federal Register, National Archives and Records Administration.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 56 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: July 2, at 9:00 am
WHERE: Office of the Federal Register, First Floor Conference Room, 1100 L Street NW., Washington, DC

Rules and Regulations

Federal Register
Vol. 56, No. 123
Wednesday, June 26, 1991

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Farmers Home Administration

7 CFR Part 1924

Planning and Performing Construction and Other Development

AGENCY: Farmers Home Administration, USDA.

ACTION: Final rule.

SUMMARY: The Farmers Home Administration amends its regulations to add approved providers of warranty plans for the new construction of single family homes financed by FmHA. The intended effect of this action is to notify the public that FmHA will accept 10-Year Warranty Plans that are provided by certain companies.

EFFECTIVE DATE: June 26, 1991.

FOR FURTHER INFORMATION CONTACT: Reginald Rountree, Senior Loan Specialist, Single Family Housing Processing Division, FmHA USDA, room 5348, South Agriculture Building, Washington, DC 20250. Telephone: (202) 382–1484.

SUPPLEMENTARY INFORMATION: This rule has been reviewed under USDA procedures established in Departmental Regulation 1512–1 which implements Executive Order 12291, and has been determined to be exempt from those requirements because it involves only internal agency management. It is the policy of this Department to publish for comment rules relating to public property, loans, grants, benefits, or contracts, notwithstanding the exemption in 5 U.S.C. 553 with respect to such rules. This action, however, is not published for proposed rule making since it involves only internal agency management, making publication for comment unnecessary

Programs Affected

This activity is listed in the Catalog of Federal Domestic Assistance under No. 10.410 Low-Income Housing Loans (section 502 Rural Housing Loans). For the reasons set forth in the final rule and related notice(s) to 7 CER part 3015, subpart V, this activity affects the following programs that are included in the scope of Executive Order 12372 which requires intergovernmental consultation with State and local officials: 10.405 Farm Labor Housing and Grants; 10.406 Farm Operating Loans; 10.413 Recreation Facility Loans; 10.415 Rural Rental Housing Loans; and 10.416 Soil and Water Loans.

Environmental Impact Statement

This document has been reviewed in accordance with FmHA Instruction 1940–G, "Environmental Program." It is the determination of FmHA that this action does not constitute a major Federal action significantly affecting the quality of the human environment and in accordance with the National Environmental Policy Act of 1969, Public Law 91–190, an Environmental Impact Statement is not needed.

Background

In recent years, numerous third-party home warranty plans have been developed offering new home owners varying degrees of protection against builder default and/or major structural defects in their home. FmHA has established criteria and procedures by which a warranty plan is found acceptable for new construction of single family homes financed by FmHA. Upon reviewing the warranty plans submitted by Manufactured Housing Warranty Corporation and Residential Warranty Corporation, FmHA found they are acceptable and therefore, available to FmHA borrowers.

List of Subjects in 7 CFR Part 1924

Agriculture, Construction management, Construction and repair, Energy conservation, Housing, Loan program—Agriculture, Low- and moderate-income housing.

Accordingly, part 1924, chapter XVIII, title 7 of the Code of Federal Regulations is amended as follows:

PART 1924—CONSTRUCTION AND REPAIR

1. Authority citation for part 1924 continues to read as follows:

Authority: 7 U.S.C. 1989; 42 U.S.C. 1960; 42 U.S.C. 2942; 5 U.S.C. 301; sec. 10 Pub. L. 93–357, 88 Stat. 392; 7 CFR 2.23; 7 CFR 2.70.

Subpart A—Planning and Performing Construction and Other Development

Exhibit L to Subpart A [Amended]

2. Attachment 1 of Exhibit L to Subpart A is revised to read as follows:

* * * * *

Attachment 1—Acceptable Warranty Companies

The warranty companies listed below claim authority to act as a risk retention group under the Products Liability Risk Retention Act of 1981 and as such, to operate in all States to provide 10-year home warranties. This authority remains subject to future challenges by any State insurance commissioner or regulatory agency; however, until such challenge is made, FmHA accepts their warranty.

Name and address	Area of operation
Home Owners Warranty Corporation/HOW Insurance Company, 11 North Globe Road, Arlington, Virginia 22201, (703) 516–4100.	All States.
Home Buyers Warranty, 89 Liberty Street, Asheville, North Carolina 22801, Telephone: (704) 254–4478.	All States.
Residential Warranty Corporation, P.O. Box 641, Harrisburg, Pennsylvania 17108–0641, Telephone: 1–800–247–1812.	All States.
Manufactured Housing Warranty Corporation, P.O. Box 641, Harrisburg, Pennsylvania 17108–0641, Telephone: 1–800–247–1812.	All States.

Dated: May 24, 1991.

7 CFR Part 1942

Community Facility Loans

AGENCY: Farmers Home Administration, USDA.

ACTION: Final rule.

SUMMARY: The Farmers Home Administration (FmHA) amends its regulations on Community Facility Loans. This action is necessary to correct a problem relating to the scheduling of loan payments, to make another revision for consistency purposes and to make minor corrections. The revisions will rectify the problem, allow loan processing to proceed more smoothly and clarify a related paragraph.

EFFECTIVE DATE: June 26, 1991.

FOR FURTHER INFORMATION CONTACT: Donna H. Roderick, Loan Specialist, Water and Waste Disposal Division, Farmers Home Administration, USDA, South Agriculture Building, room 6328, Washington, DC 20250, telephone: (202) 382-9589.

SUPPLEMENTARY INFORMATION:

Classification

This action has been reviewed under USDA procedures established in Departmental Regulation 1512-1, which implements Executive Order 12291, and has been determined to be non-major. The annual effect on the economy will be less than $100 million. There will be no significant increase in costs or prices for consumers, individual industries, organizations, governmental agencies, or geographic regions. There will be no significant adverse effects on competition, employment, investment, productivity, innovation or on the ability of United States-based enterprises to compete in domestic or export markets.

Intergovernmental review

This program is listed in the Catalog of Federal Domestic Assistance under numbers 10.423, Community Facilities Loans, and 10.418, Water and Waste Disposal Systems for Rural Communities, and is subject to the provision of Executive Order 12372 which requires intergovernmental consultation with State and local officials.

Environmental Impact Statement

This action has been reviewed in accordance with FmHA Instruction 1940-G, "Environmental Program." FmHA has determined that this action does not constitute a major Federal action significantly affecting the quality of the human environment, and in accordance with the National Environmental Policy Act of 1969, Public Law 91-190, an Environmental Impact Statement is not required.

Regulatory Flexibility Act

The Administrator of Farmers Home Administration has determined that this action will not have a significant economic impact on a substantial number of small entities because the regulatory changes affect a small number of entities for which the changes will make debt instruments less complex to prepare.

Background

This action amends FmHA's regulations to require semiannual or annual payment bonds in cases where State law requires principal plus interest type bonds and to clarify the maximum loan repayment period. This action is necessary because loan payments may currently be scheduled more frequently than annually or semiannually and if principal plus interest bonds are required under State law, this causes debt instruments to be unreasonably complex, causes accounting of payments to be burdensome and is otherwise impractical. This action is also necessary to revise the maximum loan repayment period language for consistency with other parts of the regulation and to make minor corrections.

On January 29, 1991, a proposed rule was published in the **Federal Register** (56 FR 3225) for a 30-day review and comment period. No comments were received from the public review process.

Lists of Subjects in 7 CFR Part 1942

Community Development, Community Facilities, Loan Programs—housing and community development, Rural Areas, Waste treatment and disposal—domestic, Water supply—domestic, Loan security.

Therefore, chapter XVIII, title 7, Code of Federal Regulations is amended as follows:

PART 1942—ASSOCIATIONS

1. The authority citation for part 1942 continues to read as follows:

Authority: 7 U.S.C. 1989; 16 U.S.C. 1005; 5 U.S.C. 301; 7 CFR 2.23; 7 CFR 2.70.

Subpart A—Community Facility Loans

2. Section 1942.17 is amended by revising the introductory text of paragraph (f)(7) and paragraph (f)(7)(ii) to read as follows:

§ 1942.17 Rates and terms.

* * * * *

(f) * * *

(7) *Repayment terms.* The loan repayment period shall not exceed the useful life of the facility, State statute or 40 years from the date of the note(s) or bond(s), whichever is less. Where FmHA grant funds are used in connection with an FmHA loan, the loan will be for the maximum term permitted by this subpart, State statute, or the useful life of the facility, whichever is less, unless there is an exceptional case where circumstances justify making an FmHA loan for less than the maximum term permitted. In such cases, the reasons must be fully documented. In all cases, including those in which the FmHA is jointly financing with another lender, the FmHA payments of principal and interest should approximate amortized installments.

* * * * *

(ii) *Payment date.* Loan payments will be scheduled to coincide with income availability and be in accordance with State law. If consistent with the foregoing, monthly payments will be required and will be enumerated in the bond, other evidence of indebtedness, or other supplemental agreement. However, if State law only permits principal plus interest (P&I) type bonds, annual or semiannual payments will be used. Insofar as practical monthly payments will be scheduled one full month following the date of loan closing; or semiannual or annual payments will be scheduled six or twelve full months, respectively, following the date of loan closing or any deferment period. Due dates falling on the 29th, 30th or 31st day of the month will be avoided.

* * * * *

3. Section 1942.19 is amended by revising paragraph (h)(5) to read as follows:

§ 1942.19 Information pertaining to preparation of notes or bonds and bond transcript documents for public body applicants.

* * * * *

(h) * * *

(5) *Payment date.* Loan payments will be scheduled to coincide with income availability and be in accordance with State law. If consistent with the foregoing, monthly payments will be required and will be enumerated in the bond, other evidence of indebtedness, or other supplemental agreement. However, if State law only permits principal plus interest (P&I) type bonds, annual or semiannual P&I bonds will be used. Insofar as practical monthly payments will be scheduled one full month following the date of loan closing; or semiannual or annual payments will be scheduled six or twelve full months, respectively, following the date of loan closing or any deferment period. Due dates falling on the 29th, 30th or 31st day of the month will be avoided.

* * * * *

§ 1942.19 [Amended]

4. In § 1942.19(h)(10)(iv), the name of Form FmHA 1942-9 is changed from "Loan Resolution (Security Agreement)" to "Loan Resolution Security Agreement."

Dated: May 17, 1991.

La Verne Ausman,

Administrator, Farmers Home Administration.

BILLING CODE 3410-07-M

7 CFR Part 1980

Community Programs Guaranteed Loans

AGENCY: Farmers Home Administration, USDA.

ACTION: Final rule.

SUMMARY: The Farmers Home Administration (FmHA) amends its regulation regarding guaranteed loans for Community Programs which was authorized by Public Law 101-161, enacted November 21, 1989. This action is necessary to provide the public, lending institutions and FmHA personnel with expanded and clearer instructions on Community Programs guaranteed loans. The intended effect is to make our regulations more responsive and to further the prudent development of guaranteed Community Programs lending in rural America.

EFFECTIVE DATE: June 26, 1991.

FOR FURTHER INFORMATION CONTACT: Shirley P. Stroud, Senior Loan Officer, Community Facilities Division, Farmers Home Administration, U.S. Department of Agriculture, room 6310, South Agriculture Building, Washington, DC 20250, telephone (202) 382-1496.

SUPPLEMENTARY INFORMATION:

Classification

This action has been reviewed under USDA procedures established in Departmental Regulation 1512-1, which implements Executive Order 12291 and has been determined to be major, because it will result in an annual effect on the economy of $100 million or more.

Memorandum of Law

The Acting General Counsel has reviewed the regulations which the Farmers Home Administration (FmHA) is publishing as a final rule and has found that these regulations comply with applicable statutes and that FmHA has the authority to propose such regulations pursuant to the Consolidated Farm and Rural Development Act (7 U.S.C. 1989).

J. Robert Franks,

Acting General Counsel.

Summary of FRIA

This action establishes regulations to implement a guaranteed community loan program. Providing for a loan guarantee program presents an opportunity to involve the private sector in making loans for community projects and to reduce the Government's role as a source of credit. The Final Regulatory Impact Analysis provides an estimate of the economic impact of shifting from a direct to a guaranteed loan program. The analysis discusses whether the additional cost associated with a loan guarantee program will impair the financial feasibility of some of the projects otherwise financed solely by FmHA. The FRIA concludes that:

1. A shift from direct to guaranteed loans reduces FmHA exposure and Government outlays immediately, due to a decrease in the amount of loan funds disbursed;

2. The additional interest cost associated with a guaranteed loan program will not have a significant effect on the entities that qualify for the program; and

3. Providing a loan guarantee permits the continuation of assistance to entities needing only minimal assistance in attracting private financing while providing more direct loan assistance to entities serving lower income population.

The Interim Regulatory Impact Analysis (IRIA) for this document was summarized in the interim rule published on March 27, 1990 (55 FR 11133). The summary is incorporated into this document.

Intergovernmental Review

This program is listed in the Catalog of Federal Domestic Assistance under Numbers 10.423, Community Facilities Loans, and 10.418, Water and Waste Disposal Systems Loans, and is subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. FmHA conducts intergovernmental consultation in the manner delineated in FmHA Instructions 1901-H and 1940-J.

Environmental Impact

This document has been reviewed in accordance with 7 CFR part 1940, Subpart G, "Environmental Program." FmHA has determined this action does not constitute a major Federal action significantly affecting the quality of the human environment, and in accordance with the National Environmental Policy Act of 1969, Public Law 91-190, an Environmental Impact Statement is not required.

Discussion of Interim Rule

An interim rule was published on March 27, 1990, (55 FR 11133), and invited comments for 30 days ending April 26, 1990. It authorized and implemented a program for guaranteed Community Facility program loans by adapting the regulations in effect to govern the Agency's Business and Industry guaranteed loan program for use in this similar program, newly funded by Public Law 101-161.

Discussion of Comments

Part 1940—General

Subpart L—Methodology and Formulas for Allocation of Loan and Grant Program Funds

No comments were received on changes in this subpart published in the interim rule. The interim rule is adopted as final.

Part 1980—General

Subpart A—General

No comments were received on changes in this subpart published in the interim rule. The interim rule is adopted as final.

Subpart E—Business and Industry Loans

No comments were received on changes in this subpart published in the interim rule. The interim rule is adopted as final.

Subpart I—Community Programs Guaranteed Loans

Seventeen comments were received from the public and have been carefully considered. Comments were received from small towns, investment banking firms, attorneys, banks, FmHA employees, and the Office of Inspector General.

Comments were received from four small towns and a planning district commission. They were all under the impression FmHA was proposing to eliminate direct loans and shift totally to guaranteed loans. This is not the intent of the regulation since the direct loan regulations are being left intact.

Some respondents objected to the prohibition on the guarantee of tax-exempt bonds. The Agency appreciates these comments but will continue to follow the Government's policy as set forth in OMB Circular A-70, which states "Federal guarantees of debt

VOL 56 ISS 123 26 JE 1991 UMI

obligations, the interest on which is exempt from Federal tax, are an inefficient means of allocating Federal credit because the tax revenue loss to the Federal Government is greater than the interest savings to the borrower."

Three respondents, potential lenders, requested the rule be amended to specifically authorize them as eligible lenders. The Agency has reviewed the regulation governing the guaranteed loan program and agrees one of these lenders should be listed as eligible. As a result, FmHA opts to modify the interim rule permitting other Farm Credit System institutions with direct lending authority to be shown as eligible lenders.

Two respondents requested the interim rule be clarified in its application to investor financing. Specific paragraphs were cited with recommended changes to allow organizations other than traditional institutional lenders to be approved as eligible lenders. The Agency is still reviewing these comments and exploring the possibility of additions and revisions to the regulations which allow for the more broad concept needed to incorporate investment bankers as eligible lenders.

One respondent stated it would not be appropriate for CP to send an applicant to be tested by other commercial credit when B&I guarantees do not require this action. The test for other credit is a statutory requirement; therefore, no change will be made to this section.

One respondent stated there should be no differentiation made between the audit requirements for insured loans and guaranteed loans to the same type of entities served. The Agency agrees and has changed the terminology to reflect the suggestion.

One respondent pointed out there is no provision for OGC reviews during loan processing. The Agency never intended for this to be left out of the regulation and this provision is being added.

The Office of Inspector General stated the interim rule is in material noncompliance with OMB Circulars A-70 and A-129 regarding numerous rescreening items required by the Circulars. The Agency has reviewed all sections and has modified the language in some sections accordingly. Other items cited such as the requirement to suspend processing of an application when an applicant is found to be delinquent on a Federal debt requires additional study by the Agency. Uniform standards and parameters need to be established for all loan programs with proper notification to the public before this and similar changes can be effected.

Comments Regarding Specific Sections

Section 1980.823(b)

One respondent stated the use of "percent" could be misleading or misinterpreted as the rule presently reads: "The interest rate should not be adjusted more than 5% during the life of the loan." The Agency agrees that the language could be misinterpreted and has modified the section.

Section 1980.842

This section references a similar section of FmHA Instruction 1942-A. The respondent feels a reference should also be made to FmHA Instruction 1942-C for fire and rescue type loans. The Agency agrees and has revised the section to also reference economic feasibility requirements for fire and rescue loans.

Section 1980.844

One respondent believes this section requiring an appraisal for *all* essential community facility loans is too restrictive. The Agency agrees and has modified this section to require appraisals for all real estate related transactions only.

Section 1980.851(a)

One respondent questioned the need for a preapplication for fire and rescue type loans. The Agency has reviewed this section and finds the use of an SF-424 in the guaranteed program is needed to meet several prescreening requirements of OMB Circular A-129. Therefore, no change is made to this requirement.

Section 1980.856(c)

One respondent feels the State Director should have the authority to change the conditions for the guarantee. The Agency has modified language in this section to reflect that changes to the Form FmHA 449-14 can be approved by the State Director.

Section 1980.856(e)

One respondent stated this section is somewhat confusing in that it appears to require a title opinion on all rights-of-way. The Agency has modified language in this section to reflect that it is not necessary to require a title report on all rights-of-way.

Other changes are made to incorporate administrative requirements which were inadvertently left out of the regulation as well as minor changes in wording for clarity and correcting of typographical errors.

List of Subjects in 7 CFR Part 1980

Loan programs—Community programs—Rural development assistance.

Accordingly, chapter XVIII, title 7, Code of Federal Regulations is amended by adopting the interim rule published on March 27, 1990 (5 FR 11133) as a final rule with the following amendments:

PART 1980—GENERAL

1. The authority citation for part 1980 continues to read as follows:

Authority: 7 U.S.C. 1989; 42 U.S.C. 1480; 5 U.S.C. 301; 7 CFR 2.23 and 2.70.

Subpart I—Community Programs Guaranteed Loans

2. Section 1980.806 is revised to read as follows:

§ 1980.806 Availability of credit from other sources.

To be eligible for a guaranteed loan under this subpart, the borrower must be unable to obtain the required credit without the CP loan guarantee from private, commercial, or cooperative sources at reasonable rates and terms for loans for similar purposes and period of time. The borrower must certify in writing and FmHA shall determine the credit is not available from other sources at reasonable rates and terms without the CP loan guarantee. The lender also must certify that it would not make the loan without the guarantee. These certifications shall become a part of the FmHA case file.

§ 1980.812 [Amended]

3. Section 1980.812 is amended by changing the word "loan" to "loans."

§ 1980.813 [Amended]

4. Section 1980.813 is amended by redesignating current paragraph (a)(2)(vii) as paragraph (a)(2)(viii) and adding new paragraph (a)(2)(vii) to read as follows:

(a) * * *

(2) * * *

(vii) Natural gas distribution systems; and

* * * * *

5. Section 1980.814 is amended by revising paragraph (d) to read as follows:

§ 1980.814 Ineligible loan purposes.

* * * * *

(d) Electric generation or transmission facilities or telephone systems, except as provided in § 1980.813 (a)(2)(v) or (a)(2)(vi) of this subpart; or extensions to serve a particular essential community facility as provided in § 1980.823 [b][1] or [b][2] of this subpart.

* * * * *

6. Section 1980.815 is amended by revising paragraph (a) to read as follows:

§ 1980.815 Transactions which will not be guaranteed.

(a) Loans made by any Federal or State agencies. This does not preclude guaranteeing loans made by the Bank for Cooperatives or Federal Land Bank.

* * * * *

7. Section 1980.818 is amended by revising paragraphs (a)(3) and (a)(4) to read as follows:

§ 1980.818 Eligible lenders.

(a) * * *

(3) Farm Credit Bank of the Federal Land Bank Association or other Farm Credit System institution with direct lending authority authorized to make loans of the type guaranteed by this subpart.

(4) An insurance company regulated by a State or National insurance regulatory agency, and

* * * * *

8. Section 1980.819 is amended by revising paragraphs (a) and (b)(4) to read as follows:

§ 1980.819 Loan guarantee limits.

* * * * *

(a) Normally, guarantees will not exceed 80 percent unless extraordinary circumstances exist. The State Director will document these circumstances in the case file. National Office concurrence is required when the requested guarantee exceeds 80 percent. The maximum allowable guarantee will be 90 percent.

(b) * * *

(4) Lender's exposure (retain a minimum of 5% of the total guaranteed loan(s) amount. The amount required to be retained must be of the unguaranteed portion of the loan and cannot be participated to another.)

* * * * *

§ 1980.819 [Amended]

9. Section 1980.819(b) is amended in the second sentence by removing form title, "Conditional Commitment for Guarantee."

10. Section 1980.823 is amended by revising paragraphs (a), (b), and (c) to read as follows:

§ 1980.823 Interest rates.

(a) Rates will be negotiated between the lender and the borrower. They may be either fixed or variable rates as long as they are legal. Interest rates will be those rates customarily charged borrowers in similar circumstances in the ordinary course of business and are subject to FmHA review and approval. FmHA will take into consideration in approving the lender's interest rate, the rate at which guaranteed loans are being sold or traded in the secondary market.

(b) A variable interest rate must be tied to a base rate published periodically in a recognized national or regional financial publication specifically agreed to by the lender and borrower. Notice of any interest rate change proposed by the lender should allow a sufficient time period for the borrower to obtain any required state or other regulatory approval and to implement any user rate adjustments necessary as a result of the interest rate change. The interest rate will not be raised more than one percent per year. The intervals between interest rate adjustments will be specified in the loan agreement but not more often than annually. During the life of the loan, the interest rate will not be increased more than 5 percentage points over the interest rate at loan closing. The lender must incorporate within the variable rate promissory note or bond at loan closing, the provision for adjustment of payment installments coincident with an interest rate adjustment. This will assure the outstanding principal balance is properly amortized within the prescribed loan maturity to eliminate the possibility of a balloon payment at the end of the loan.

(c) Any change in the interest rate between the date of issuance of the Form FmHA 449-14 and before the issuance of the Loan Note Guarantee (Form FmHA 449-34) must be approved by the State Director. Approval of such change will be shown on an amendment to Form FmHA 449-14.

* * * * *

§ 1980.824 [Amended]

11. Section 1980.824(c) is amended by removing the word "or" between the words "bond" and "promissory" and adding a comma after the word "bond."

12. Section 1980.842 is revised to read as follows:

§ 1980.842 Economic feasibility requirements.

The economic feasibility requirements for this subpart are set out at § 1942.17(h) of subpart A and/or at § 1942.110 of subpart C of part 1942 of this chapter.

13. Section 1980.844 is amended by revising paragraphs (a)(1) and (a)(2) to read as follows:

§ 1980.844 Appraisal reports

(a) * * *

(1) Appraisal reports prepared by independent third party qualified fee appraisers will be required for all real estate transactions. For loans of $1 million or less, the State Director may modify this requirement by permitting the appraisal to be made by a qualified appraiser on the lender's staff with experience appraising the type of security involved. The appraisers will give their opinion regarding the current market value of the security and the purpose for which the appraisal will be used. The lender will be responsible for assuring that appropriate appraisals are made, and for determining that prices paid for construction, equipment, and other project development are reasonable and fair.

(2) The lender will require that appraisals be conducted at a minimum in accordance with generally accepted appraisal standards as reflected in the "Uniform Standards of Professional Appraisals Practices" as promulgated by the Appraisal Standards Board of the Appraisal Foundation.

* * * * *

14. Section 1980.851 is amended by redesignating current paragraphs (b)(2)(ii) through (b)(2)(xii) as paragraphs (b)(2)(iii) through (b)(2)(xiii), respectively; by adding new paragraph (b)(2)(ii); and by revising the introductory text of paragraph (a)(1), paragraphs (a)(1)(v), (b)(1), the introductory heading of paragraph (b)(2), and new redesignated paragraphs (b)(2)(iv) and (b)(2)(vii) to read as follows:

§ 1980.851 Processing applications.

(a) *Preapplications.* (1) The County Office may handle initial inquiries and provide basic information about the program. They are to provide Standard Form (SF) 424.1 or 424.2, "Application for Federal Assistance." The County Supervisor will assist borrowers as needed in completing SF-424 and in filing written notice of intent and request for priority recommendations with the appropriate clearinghouse (except Federally recognized Indian tribes which will be dealt with in accordance with § 1940.453(c) of subpart J of part 1940 of this chapter). The County Supervisor will inform the borrower that if credit for the project is available from commercial sources without the guarantee at reasonable rates and terms, the borrower is not eligible for a loan guaranteed by FmHA. Preapplications filed in the County Office will be forwarded immediately to the District Office. The applicant/

VOL 56 ISS 123 JE 26 1991 UMI

borrower will be informed that further processing will be handled by the District Office. An information folder will be established and maintained by the County Office once a preapplication is received. In the event the preapplication is filed in the District Office, the District Director may assist the borrower in completing the preapplication requirements. The District Director will meet with the borrower/applicant, whenever appropriate, to discuss FmHA preapplication processing. The appropriate information to set up the County Office information file will be sent to the County Supervisor by the District Director. Guidance and assistance will be provided by the State Director, as needed, for orderly application processing. The District Director will determine that the preapplication is properly completed and fully reviewed. The District Director will then forward the preapplication package to the State Director. The preapplication package will contain:

* * * * *

(v) Supporting documentation necessary to make an eligibility determination, such as financial statements, audits, or copies of organizational documents or existing debt instruments. The District Director will advise borrowers/applicants on what documents are necessary. Borrowers should not be required to expend significant amounts of money or time developing supporting documentation at the preapplication stage.

* * * * *

(b) * * *

(1) *Application conference.* When an applicant is notified to proceed with an application, the District Director should arrange for a conference with the applicant and borrower to provide copies of appropriate appendices and forms, and furnish guidance necessary for orderly application processing. The District Director will confirm decisions made at this conference by letter to the applicant and borrower. As the application is being processed, and the need develops for additional conference, the District Director will arrange with the applicant for such conferences.

(2) *Content of application package.*

* * *

(ii) Form FmHA 1910–11, "Applicant Certification Federal Collection Policies for Consumer or Commercial Debts."

* * * * *

(iv) Preliminary architectural or engineering report as appropriate, in accordance with Guides 6, 7, and 8 of subpart A of part 1942 (available in any FmHA office).

* * * * *

(vii) Credit reports obtained by the lender or FmHA on the borrower.

* * * * *

15. Section 1980.852 is revised to read as follows:

§ 1980.852 FmHA evaluation of application.

(a) FmHA will complete Form FmHA 1942–45, "Project Summary—Water and Waste Disposal and other Utility-type Projects," or Form FmHA 1942–43, "Project Summary Community Facilities (Other Than Utility-type Projects)," as appropriate. The application will be evaluated and a determination made as to whether the borrower is eligible, the proposed loan is for an eligible purpose, and there is reasonable assurance of repayment ability, sufficient collateral and equity, the proposed loan complies with all applicable statutes and regulations, and adequate funds are available. The FmHA Architect/Engineer will review the Preliminary Architect/Engineer reports and provide technical analysis and recommendations on the appropriate Project Summary. If FmHA determines it is unable to guarantee the loan, the lender will be informed in writing. Such notification will include the reasons for denial of the guarantee. If FmHA conditionally commits to guaranteeing the loan after the receipt of a completed application in accordance with § 1980.47 of subpart A of this part, it will provide the lender and the borrower with Form FmHA 449–14, listing all conditions for such guarantees. FmHA will include in the requirements of the Conditional Commitment for Guarantee a full description of the approved use of guaranteed loan funds as reflected in the Form FmHA 1980–10.

(b) Within 30 days after the Form FmHA 449–14 has been accepted, the State Director will send to the National Office, Attention: Community Facilities Division or Water and Waste Disposal Division, as appropriate, the following documents:

(1) A copy of Form FmHA 1942–43 or FmHA 1943–45.

(2) A copy of Form FmHA 449–14 (with attachments) as accepted by the lender and borrower.

(3) A copy of the proposed loan agreement between the lender and the borrower.

(4) A copy of Form FmHA 1980–10.

The cover memorandum should indicate whether the Form FmHA 449–34 has been issued. If the Loan Note Guarantee has been issued, enclose a copy of the Lender Certification required by § 1980.60(a) of subpart A of this part, and, if not, a proposed date for issuance of the Form FmHA 449–34.

§ 1980.853 [Amended]

16. In § 1980.853, the introductory text is amended in the first sentence by adding after the words, "Form FmHA 1940–3" the title, "Request for Obligation of Funds—Guaranteed Loans."

§ 1980.854 [Amended]

17. Section 1980.854 is amended by removing paragraph (a)(5).

§ 1980.856 [Amended]

18. In § 1980.856, the introductory text is amended at the end of the paragraph by changing the period "." to a colon ":", and paragraph (a) is amended in the last sentence by removing the word "paragraph" preceding "§ 1980.818(b)."

19. Section 1980.856 is amended by revising paragraphs (c) and (e)(1) and adding paragraphs (g) and (h), to read as follows:

§ 1980.856 Conditions precedent to issuance of the Loan Note Guarantee (Form FmHA 449–34).

* * * * *

(c) *Changes in terms and conditions in Form FmHA 449–14.* Once Form FmHA 449–14 is issued and accepted by the lender and borrower, the Commitment shall not be modified as to the scope of the project, overall facility concept, project purpose, use of proceeds, or terms and conditions. Only minor changes will be considered, unless otherwise provided for in this subpart.

* * * * *

(e) * * *

(1) A legal opinion relative to the title to rights-of-way and easements. Lenders are responsible for ensuring that borrowers have obtained valid, continuous, and adequate rights-of-way and easements needed for the construction, operation, and maintenance of a facility. Ordinarily, an opinion of counsel relative to rights-of-way similar to Form FmHA 442–22, "Opinion of Counsel Relative to Right-of-Way," is sufficient documentation for rights-of-way.

* * * * *

(g) *Review by OGC.* After the conditional commitment for guarantee has been issued and proposed closing documents prepared by the lender and forwarded to FmHA with the lender's legal counsel's opinion but prior to issuing the loan note guarantee, the State Director will forward the loan docket to the Regional Attorney for review. After an administrative review, the State Director will include with the docket a letter with recommendations indicating any special items, documents or problems that need to be addressed specifically which may have a significant impact upon the loan or may be contrary to the regulation. Copies of the following documents should be submitted for OGC review:

(1) Letter from FmHA National Office authorizing loan guarantee containing conditions (if applicable);

(2) Form FmHA 449–14, including any amendments;

(3) Loan agreement;

(4) Promissory notes and/or bond transcript;

(5) Security documents—real estate mortgage, security agreement, financing statements, and leases (if applicable);

(6) Proposed Forms FmHA 449–34, 449–35, "Lender's Agreement," and 449–36 "Assignment Guarantee Agreement," if any;

(7) Proposed lender's certification (§ 1980.60 of Subpart A of this part); and

(8) Opinion of lender's counsel in form prescribed by OGC.

(h) *OGC advice.* The Regional Attorney will review the docket for legal sufficiency and furnish advice to FmHA. Such advice is for the benefit of FmHA only and does not relieve the lender of its responsibilities under FmHA regulations. Upon receipt of the Regional Attorney's advice, the State Director will correct or cause to be corrected any noted deficiencies before issuing the Loan Note Guarantee.

20. Section 1980.870(a) is amended by revising the last sentence to read as follows:

§ 1980.870 Loan servicing.

* * * * *

(a) * * * The State Director may waive the audit requirement for financial statements for borrowers with gross annual income of less than $100,000.

* * * * *

§§ 1980.871–1980.881 [Redesignated as §§ 1980.872–1980.882]

21. Current §§ 1980.871 through 1980.881 are redesignated as §§ 1980.872 through 1980.882, respectively and a new § 1980.871 is added to read as follows:

§ 1980.871 Loan classification.

All CP guaranteed loans will be classified by FmHA at loan closing and again whenever there is a change in the loan which would impact on the original classification. The loans will be classified as set out at § 1904.104 of subpart C of part 1904 of this chapter.

22. Newly redesignated § 1980.872 (a), (b), (d), and (e) are revised to read as follows:

§ 1980.872 Defaults by borrower.

(a) In case of any monetary or significant non-monetary default under the loan agreement, the lender is responsible for arranging a meeting with the District Director or designated representative and borrower to resolve the problem. A memorandum of the meeting listing the individuals in attendance and summarizing the problem and proposed solution will be prepared by the FmHA representative and retained in the loan file. When the District Director receives a notice of default on a loan, he/she will immediately notify the State Office in writing of the details. The District Director will notify the lender and borrower of any decision reached by FmHA.

(b) In considering servicing options, some of which are identified in paragraph X. A of Form FmHA 449–35, the prospects for providing a permanent cure without adversely affecting the risks to FmHA and the lender must become the paramount objective. Within the State Director's authority, temporary curative actions such as payment deferments or collateral subordination, must strengthen the loan and be in the best interest of the lender and FmHA. Some of these actions may require concurrence of the holder(s).

* * * * *

(d) When the State Office determines it is necessary on individual cases, due to some special servicing requirements, it may, at its option, assume the servicing responsibility.

(e) The State Director will report all deliquent and problem loans quarterly to the appropriate National Office program division by the 20th day of January, April, July, and October.

* * * * *

§ 1980.877 [Amended]

23. Newly redesignated § 1980.877(c) is amended in the first sentence by adding the words "to ineligible borrowers" between the words "Transfers" and "are."

24. Newly redesignated § 1980.877 is amended by redesignating current paragraphs (e)(5) and (e)(7) as paragraphs (e)(7) and (e)(5), respectively, and by amending newly redesignated paragraph (e)(7) in the second sentence by removing the words "Add, Delete, or Change, Guaranteed Loan Borrower Information" following the words "Form FmHA 1980–50."

§ 1980.878 [Amended]

25. Newly redesignated § 1980.878(b) is amended by revising the title "Distinguishing transfers from assumptions" to read "Distinguishing mergers from transfers and assumptions."

§ 1980.879 [Amended]

26. Newly redesignated § 1980.879(e) is amended by revising the heading "Method of liquidation" to read "Methods of liquidation," and current paragraphs (e)(4), (e)(4)(i), (e)(4)(ii), (e)(4)(ii)(A), (e)(4)(ii)(B), (e)(4)(ii)(C) and (e)(4)(iii) are redesignated as paragraphs (f), (f)(1), (f)(2), (f)(2)(i), (f)(2)(ii), (f)(2)(iii) and (f)(3), respectively.

* * * * *

Dated: April 2, 1991.

Roland R. Vautour,

Under Secretary for Small Community and Rural Development.

[FR Doc. 91–15188 Filed 6–25–91; 8:45 am]

BILLING CODE 3410–07–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 91–CE–15–AD; Amendment 39–7055; AD 91–14–14]

Airworthiness Directives; Beech Model 76 Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) that is applicable to Beech Model 76 airplanes. This action requires inspections of the main landing gear "A" frames for cracks. There have been reports of fatigue cracks developing on the main landing gear "A" frame assembly of Beech Model 76 airplanes. These cracks, if not detected and corrected, would cause the main landing gear to collapse. The actions specified by this AD are intended to prevent collapse and/or malfunction of the main landing gear.

DATES: Effective September 1, 1991. The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of September 1, 1991.

ADDRESSES: Beech Service Bulletin No. 2361, dated February 1991 that is discussed in this AD may be obtained from the Beech Aircraft Corporation, P.O. Box 85, Wichita, Kansas 67201–0085. This information may also be examined at the FAA, Central Region,

VOL 56 ISS 123 JE 26 1991 UMI

Office of the Assistant Chief Counsel, room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT: Mr. Larry Engler, Aerospace Engineer, FAA, Wichita Aircraft Certification Office, 1801 Airport Road, room 100, Mid-Continent Airport, Wichita, Kansas 67209; Telephone (316) 946-4409.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an AD that is applicable to Beech Model 76 airplanes was published in the **Federal Register** on March 22, 1991 (56 FR 12129). The action proposed inspections of the main landing gear "A" frame assemblies and, if found cracked, repair in accordance with the instructions in Beech SB No. 2361, dated February 1991.

Interested persons have been afforded an opportunity to participate in the making of this amendment. No comments were received on the proposed rule or the FAA's determination of the cost to the public. The FAA has determined that air safety and the public interest require the adoption of the rule as proposed except for minor editorial corrections. These minor corrections will not change the meaning of the AD nor add any additional burden upon the public than was already proposed.

It is estimated that 437 airplanes in the U.S. registry will be affected by this AD, that it will take approximately 2 hours per airplane to accomplish the required action, and that the average labor rate is approximately $55 an hour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $48,070.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the final evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption "ADDRESSES".

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new AD:

AD 91-14-14 Beech: Amendment 39-7055; Docket No. 91-CE-15-AD. Applicability: Model 76 airplanes (all serial numbers), certificated in any category.

Compliance: Required within the next 50 hours time-in-service (TIS) after the effective date of this AD, unless already accomplished, and thereafter at intervals not to exceed 100 hours TIS.

To prevent collapse and/or malfunction of the main landing gear, accomplish the following:

(a) Conduct both a visual inspection and dye penetrant inspection of the main landing gear "A" frame assembly (part number 105-810023-67 or P/N 105-810023-68) in accordance with the instructions in Beech Service Bulletin (SB) 2361, dated February 1991.

Note: During the inspection required by paragraph (a) of this AD, particular attention should be given to the tips of the gussets and the small corrosion treatment hole adjacent to the gusset.

(b) If cracks are found during the inspections specified in paragraph (a) of this AD, prior to further flight, replace the assembly with a serviceable part in accordance with Beech SB 2361, dated February 1991, and continue the 100-hour TIS inspection intervals.

(c) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(d) An alternative method of compliance or adjustment of the initial or repetitive compliance times that provides an equivalent level of safety may be approved by the Manager, Wichita Aircraft Certification Office, 1801 Airport Road, Room 100, Mid-Continent Airport, Wichita, Kansas 67209. The request should be forwarded through an appropriate FAA Maintenance Inspector, who may add comments and then send it to the Manager, Wichita Aircraft Certification Office.

(e) The inspections and replacements required by this AD shall be done in accordance with Beech Service Bulletin No. 2361, dated February 1991. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from the Beech Aircraft Corporation, P.O. Box 85, Wichita, Kansas 67201-0085. Copies may be inspected at the FAA, Central Region, Office of the Assistant Chief Counsel, room 1558, 601 12th Street, Kansas City, Missouri, or at the Office of the Federal Register, 1100 L Street, NW., room 8401, Washington, DC.

This amendment becomes effective on September 1, 1991.

Issued in Kansas City, Missouri, on June 17, 1991.

J. Robert Ball,

Acting Manager, Small Airplane Directorate, Aircraft Certification Service.

[FR DOC: 91-15155 Filed 6-25-91; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 91-NM-25-AD; Amendment 39-7041; AD 91-13-10]

Airworthiness Directives; Boeing Model 747 Series Airplanes Equipped with Pratt and Whitney PW4000 Engines; and Model 767 Series Airplanes Equipped with Pratt and Whitney PW4000 or General Electric CF6-80C2-B6F Engines

AGENCY: Federal Aviation Administration (FAA) DOT.

ACTION: Final rule.

SUMMARY: This amendment supersedes an existing airworthiness directive (AD), applicable to certain Boeing Model 747 and 767 series airplanes, which currently requires a limitation in the Airplane Flight Manual (AFM) that requires that the Engine Indication and Crew Alerting System (EICAS) Status Page be read, with all engines running, prior to each airplane departure. This procedures was prompted by the discovery that the "Engine Controls" advisory message does not function as intended. This condition, if not corrected, could result in overspeed or uncommanded shutdown of the affected engine or engines. This amendment requires the installation of new EICAS computers to provide proper message function and allow removal of the limitation from the AFM.

DATES: Effective August 12, 1991. The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of August 12, 1991.

ADDRESSES: The applicable service information may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington; or at the Office of the Federal Register, 1100 L Street NW., room 8401, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mr. Sulmo Mariano, Seattle Aircraft Certification Office, Propulsion Branch, ANM-140S; telephone (206) 227-2686. Mailing address: FAA, Northwest Mountain Region, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington 98055-4056.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations by superseding AD 89-10-06, Amendment 39-6210 (54 FR 19875, May 9, 1989), applicable to certain Boeing Model 747 and 767 series airplanes, to require installation of new EICAS computers to provide proper message function and allow removal of a limitation from the AFM, was published in the **Federal Register** on March 18, 1991 (56 FR 11380).

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the single comment received.

The commenter supported the proposal rule.

Since issuance of the NPRM, Boeing has issued Revision 1 of Service Bulletin 767-31-0033, which adds two airplanes to the effectivity of the service bulletin. The applicability statement of the final rule has been revised to reference this later revision. Both of these airplanes are operated by foreign operators under foreign registry and, therefore, are not directly affected by this action. Nevertheless, this revision is necessary to advise the cognizant foreign authorities that the subject unsafe condition may exist on these airplanes.

Paragraph D. of the final rule has been revised to specify the current procedure for submitting requests for approval of alternative methods of compliance.

The economic analysis, below, has been revised to increase the specified hourly labor rate from $40 per manhour (as was cited in the preamble to the Notice) to $55 per manhour. The FAA has determined that it is necessary to increase this rate used in calculating the cost impact associated with AD activity to account for various inflationary costs in the airline industry.

After careful review of the available data, the FAA has determined that air safety and the public interest require the adoption of the rule with the changes previously described. The FAA has determined that these changes will neither significantly increase the economic burden on any operator nor increase the scope of the AD.

There are approximately 24 Model 767 and 19 Model 747 series airplanes of the affected design in the worldwide fleet. It is estimated that 2 Model 767 and 10 Model 747 series airplanes of U.S. registry will be affected by this AD, that it will take approximately 3 manhours per airplane to accomplish the required actions, and that the average labor cost will be $55 per manhour. Replacement parts would be provided at no cost by the manufacturer. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $1,980.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administratiaon amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by removing Amendment 39-6210 and by adding the following new airworthiness directive:

91-13-10. Boeing: Amendment 39-7041. Docket 91-NM-25-AD. Supersedes AD 89-10-06.

Applicability: Model 747 series airplanes equipped with Pratt and Whitney PW4000 engines, and Model 767 series airplanes equipped with either Pratt and Whitney PW 4000 or General Electric CF6-80C2-B6F engines; certificated in any category.

Compliance: Required as indicated, unless previously accomplished.

To prevent overspeed or uncommanded shutdown of an engine, accomplish the following:

A. Within the next 3 days after May 22, 1989 (the effective date of Amendment 39-6210), add the following to the Limitations Section of the FAA-approved Airplane Flight Manual (AFM). This may be accomplished by inserting a copy of this AD in the AFM: "Prior to each departure, with all engines running, refer to the EICAS status page and determine the dispatch capability of the aircraft."

B. Within the next 24 months after the effective date of this AD, replace the EICAS computers in accordance with the appropriate service bulletin listed below. After replacement of the EICAS computers in accordance with the specified service bulletins, the AFM limitation required by paragraph A. of this AD may be removed.

1. For Model 747 series airplanes listed in Boeing Service Bulletin 747-31-2151, dated March 29, 1990.

2. For Model 767 series airplanes equipped with Pratt and Whitney PW4000 engines listed in Boeing Service Bulletin 767-31-0033, Revision 1, dated September 27, 1990.

3. For Model 767 series airplanes equipped with General Electric CF6-80C2-B6F engines listed in Boeing Service Bulletin 767-31-0036, dated April 12, 1990.

C. For airplanes not subject to paragraph B of this AD, within the next 30 days after the effective date of this AD, remove the AFM limitation required by paragraph A. of this AD.

D. An alternative method of compliance or adjustment of the compliance time, which provides an acceptable level of safety may be used when approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate.

Note: The request should be forwarded through an FAA Principal Maintenance Inspector, who may concur or comment and then send it to the Manager, Seattle ACO.

E. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

F. The replacement requirements shall be done in accordance with the following Boeing Service Bulletins, which incorporate the following list of affected pages:

VOL 56 ISS 123 JE 26 1991 UMI

Service bulletin	Revision level	Date	Pages
747-61-2161.	Original	March 29,1990.	1-10
767-31-0033.	1	September 27, 1990.	1, 2, 4, 5
	Original	May 31, 1990.	3, 6, 7, 8, 9, 10
767-31-0038.	Original	April 12, 1990.	1-8

This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124. Copies may be inspected at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington, or at the Office of the Federal Register, 1100 L Street, NW., room 8401, Washington, DC.

This amendment supersedes Amendment 39-6210, AD 89-10-09.

This amendment (39-7041, AD 91-13-10) becomes effective August 12, 1991.

Issued in Renton, Washington, on June 5, 1991.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 91-15151 Filed 6-25-91; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 90-CE-61-AD; Amendment 39-7056; AD 91-14-15]

Airworthiness Directives; Hoffmann Aircraft, Ltd., Model H-36 (Dimona) Motor Gliders

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) that is applicable to certain Hoffmann Aircraft, Ltd., Model H-36 (Dimona) motor gliders. This action requires the replacement of any nonmetallic fuel tank with an aluminum tank. Service experience has shown that a nonmetallic fuel tank will develop a softened interior coating. This condition, if not corrected, leads to solid or rubber-like gelcoat fuel deposits, which obstruct the fuel from flowing to the engine on these motor gliders. The actions specified by this AD are intended to prevent these fuel deposits that could result in engine shutdown.

EFFECTIVE DATE: August 12, 1991.

ADDRESSES: Information that is related to this AD may be obtained from the FAA, Central Region, Office of the Assistant Chief Counsel, room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT: Mr. Carl F. Mittag, Brussels Aircraft Certification Office, Europe, Africa, Middle East Office, FAA, c/o American Embassy, 1000 Brussels; telephone (322) 513.38.30; facsimile (322) 230.68.99; or Mr. Herman Belderok, Small Airplane Directorate, Aircraft Certification Service, FAA, 601 E. 12th Street, Kansas City, Missouri; telephone (816) 426-6932; facsimile (816) 426-2169.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an AD that is applicable to certain Hoffmann Aircraft, Ltd., Model H-36 (Dimona) motor gliders was published in the Federal Register on February 27, 1991 (56 FR 8160). The action proposed the replacement of any glass fiber-reinforced plastic (GFRP) or fiber-reinforced plastic (FRP) fuel tank with an aluminum tank in accordance with the instructions in Hoffmann Aircraft, Ltd., Service Bulletin 13/1, dated October 23, 1989.

Interested persons have been afforded an opportunity to participate in the making of this amendment. No comments were received on the proposed rule or the FAA's determination of the cost to the public. The FAA has subsequently determined that this AD action would be clearer and more understandable if the proposed service bulletin requirements were incorporated into the actual AD.

In addition, the economic analysis paragraph presented below has been revised to increase the specified hourly labor rate from $40 an hour (as was cited in the preamble of the notice of proposed rulemaking (NPRM)) to $55 an hour. The FAA has determined that it is necessary to increase this rate used in calculating the cost impact associated with AD action to account for various inflationary costs in the aviation industry.

The FAA has determined that air safety and the public interest require the adoption of the rule as proposed except for the change in the economic analysis and the addition of the service bulletin requirements into the AD. These minor changes will not alter the meaning of the AD nor add any additional burden upon the public than was already proposed.

The compliance time for this AD is reflected in both hours time-in-service (TIS) and calendar months. The FAA has determined that the unsafe condition should be corrected within the next 50 hours TIS; however, FAA records indicate that the yearly operational rates of the affected gliders vary immensely within the fleet. One operator may operate the glider 50 hours in six months, while another might not operate the glider 50 hours in one year. The condition of a nonmetallic fuel tank is not necessarily affected by actual operation of the motor glider since fuel deposits or soft spots could form in a fuel tank of any glider containing fuel. To avoid inadvertent grounding of the affected motor gliders and to assure that the unsafe condition is corrected on the affected motor gliders, compliance time is reflected in both hours TIS and calendar months.

It is estimated that 9 motor gliders in the U.S. registry will be affected by this AD, that it will take approximately 8.5 hours per motor glider to accomplish the required action, and that the average labor rate is approximately $55 an hour. Parts cost approximately $1,650 per motor glider. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $19,057.50.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the State, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the final evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption "ADDRESSES".

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new AD:

AD 91-14-15 Hoffmann Aircraft, Ltd.: Amendment 39-7056; Docket No. 90-CE-51-AD.

Applicability: Model H-36 Dimona motor gliders (serial numbers 3501 through 36143) that were supplied or equipped with a fuel tank made of glass fiber reinforced plastic (GFRP) or fiber reinforced plastic (FRP), certificated in any category.

Compliance: Required as indicated after the effective date of this AD, unless already accomplished.

To avoid engine shutdown caused by solid or rubber-like gelcoat fuel deposits, accomplish the following:

(a) Within the next 50 hours time-in-service (TIS) or within the next 6 calendar months, whichever occurs first, accomplish the following:

(1) Statically ground the glider and the fuel system.

(2) Empty the fuel tank through a drainer, ventilate the tank, and then remove the tank.

(3) Remove the gasoline filter and inspect the filter and the fuel lines for solid or rubber-like deposits. Remove any solid or rubber-like deposits and thoroughly clean the filter.

(4) Replace the GFRP or FRP fuel tank with an aluminum tank, Part Number 620.5.12 S3a, and reinstall the gasoline filter and reconnect the fuel lines.

(5) Using pen and ink, correct the glider weight and balance data sheet as follows:

(i) Decrease the empty weight by 2.2 pounds (1 kg).

(ii) Show a forward shift of 0.06 inches (1.5mm) of the empty weight center of gravity value.

(6) Using pen and ink, change the Maintenance and Inspection checklist, page 36 of the maintenance manual, by adding the following notations:

(i) "14. Check fuel lines and tank assembly for security and leaks."

(ii) Enter the symbol "0" in columns marked "100 hours" and "500 hours".

(b) If the aluminum tank required by paragraph (a)(4) of this AD has been ordered, but is not available, within the next 50 hours TIS or 6 calendar months after the effective date of this AD, whichever occurs first, and thereafter at intervals not to exceed 100 hours TIS or 12 calendar months, whichever occurs first, accomplish the following interim actions:

(1) Statically ground the glider and the fuel system.

(2) Empty the fuel tank through a drainer, ventilate the tank, and then remove the tank.

(3) Remove the gasoline filter and inspect the filter and the fuel lines for solid or rubber-like deposits. Remove any solid or rubber-like deposits and thoroughly clean the filter.

(4) Remove the finger filter and inspect it for solid or gelatinous deposits, remove any solid or gelatinous deposits, and thoroughly clean the filter.

(5) Perform the following inspections on the inner side of the fuel tank:

(i) Inspect for deposits through the filler hole with a mirror and light.

(ii) Inspect for softened spots in the gelcoat with a wood spatula.

(A) If no deposits or soft spots are found in the fuel tank as a result of these inspections, the glider may be operated until the fuel tank specified in paragraph (a)(4) of this AD becomes available.

(B) If any deposits or soft spots are found in the tank as a result of these inspections, prior to further flight, replace the fuel tank in accordance with the instructions of paragraph (a) of this AD.

(c) An alternative method of compliance or adjustment of the initial or repetitive compliance times that provides an equivalent level of safety may be approved by the Manager, Brussels Aircraft Certification Office, 15, Rue de la Loi, B-1040 Brussels, Belgium, c/o American Embassy APO, New York, New York 09667. The request should be forwarded through an appropriate FAA Maintenance Inspector, who may add comments and then send it to the Manager, Brussels Aircraft Certification Office.

(d) Information that is related to this AD may be obtained from the FAA, Central Region, Office of the Assistant Chief Counsel, room 1558, 601 E. 12th Street, Kansas City, Missouri. This amendment becomes effective on August 12, 1991.

Issued in Kansas City, Missouri, on June 18, 1991.

J. Robert Ball,

Acting Manager, Small Airplane Directorate Aircraft Certification Service.

BILLING CODE 4910-13-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 812

[Docket No. 85N-0331]

Cardiovascular Devices; Effective Date of Requirement for Premarket Approval; Replacement Heart Valve Allograft

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of applicability of a final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a notice to clarify that replacement heart valve allografts, devices, are subject to a final rule that was issued by FDA on May 13, 1987, requiring the filing of a premarket approval application (PMA) for all preamendment replacement heart valves, and those substantially equivalent to replacement heart valves. PMA's or investigational device exemptions (IDE's) will be required as described herein.

EFFECTIVE DATE: An approved PMA or IDE is required to be in effect on or before August 26, 1991.

FOR FURTHER INFORMATION CONTACT: Kenneth Palmer, Center for Devices and Radiological Health (HFZ-450), Food and Drug Administration, 1390 Piccard Dr., Rockville, MD 20850, 301-427-1200.

SUPPLEMENTARY INFORMATION: In the Federal Register of February 12, 1986 (51 FR 5296), FDA published a proposed rule to require the filing, under section 515(b) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 360e(b)), of a PMA for the replacement heart valve. In accordance with section 515(b)(2)(A) of the act, FDA included in the preamble to the proposal the agency's findings with respect to the degree of risk of illness or injury designed to be eliminated or reduced by requiring the device to meet the premarket approval requirements of the act, and the benefits to the public from the use of the device (51 FR 5296 and 5297). The agency also provided an opportunity for interested persons to submit comments on the proposed rule and the agency's proposed findings. Under section 515(b)(2)(B) of the act, FDA provided an opportunity for interested persons to request a change in the classification of the device based on new information relevant to its classification.

FDA did not receive any petitions requesting a change in the classification of the generic type of the device identified as the replacement heart valve. The agency, however, received one comment in response to the February 12, 1986, proposed rule. The comment did not challenge the proposed rule, but instead made inquiry regarding the testing of replacement heart valves. Accordingly, in the Federal Register of May 13, 1987 (52 FR 18182), FDA issued a final rule requiring premarket approval for preamendment replacement heart valves, post amendment replacement heart valves that were found to be substantially equivalent to a preamendment heart valve before December 9, 1987, and any other replacement heart valve first intended for commercial distribution after December 9, 1987.

The classification of replacement heart valves describes the generic type of the device as follows:

A replacement heart valve is a device intended to perform the function of any of the heart's natural valves. This device includes valves constructed of prosthetic materials, biologic valves (e.g., porcine valves), or valves constructed of a combination of prosthetic and biologic materials (21 CFR 870.3925(a)).

VOL
56
ISS
123
JE
26
1991
UMI

Replacement heart valve allografts squarely fit within the agency's classification regulation and, thus, must be subject to the premarket approval requirement of § 870.3925(b).

Specifically, a replacement heart valve allograft is intended to perform the function of any of the recipient's natural heart valves. Replacement heart valve allografts, by definition, are constructed of biologic materials in that they are human heart valves which are processed to assure shelf life and suitability for implantation in a recipient. There can be little question that the classification regulation for replacement heart valves, when construed to achieve the act's purpose of protecting the public health, must include replacement heart valve allografts.

Both the classification regulation and the regulation requiring premarket approval applications clearly demonstrate FDA's intent to subject all replacement heart valves to the agency's premarket approval process. The classification regulation § 870.3925(a), generally defines the function of a replacement heart valve and broadly identifies the materials from which a replacement heart valve may be constructed.

The regulation requiring premarket approval for replacement heart valves (§ 870.3925(a)) expressly covers preamendment valves; those which have been found to be substantially equivalent to a preamendment valve, prior to December 9, 1987 (the filing date for PMA's required by the regulation); and "[a]ny other replacement heart valve * * *." Simply put, FDA chose to protect the public health by subjecting devices constructed of virtually any material which are "intended to perform the function of any of the heart's natural valves" (§ 870.3925(a)), to premarket approval before permitting the use, or continuing the availability, of replacement heart valves.

FDA, consistent with its view of the regulation, considers replacement valve allografts to be substantially equivalent to preamendment replacement heart valves. FDA has not found any evidence of the preamendment interstate commercial distribution of the valve to consider it a preamendment product. (See section 513(f)(1) of the act.) However, if such evidence existed, the valve, as discussed above, would be within the classification regulation for preamendment heart valves. This is so because replacement heart valves, although differing in some respects, are all intended for the same use and raise similar safety, effectiveness, and regulatory concerns. Because devices are classified by generic type, all replacement heart valves are grouped together.

Some persons argue that FDA should not include replacement heart allografts within the classification for preamendment replacement heart valves. However, if valves derived from humans are considered unique devices first marketed after May 28, 1976, then the valves would require an approved PMA before marketing, and their regulatory status would be no different than if it were included within the classification for replacement heart valves.

If, however, the valves were considered apart from the existing classification regulation, and shown to be a preamendment device, then they would not be subject to FDA's assessment of safety and effectiveness for years. This view could only be based on a stilted, unrealistic reading of the classification regulation, and would be inconsistent with FDA's public health mission.

Because preamendment devices are not subject to FDA's premarket approval process until they are classified into class III after notice and comment rulemaking (see section 513 (b) through (d) of the act), and then, in a separate rulemaking subjected to premarket approval requirements (see section 515(b) of the act), if the valves were viewed as a unique preamendment device, replacement heart allografts legally would not in the interim be subject to any greater regulatory oversight than devices with little or no risk. This result is clearly inadequate to regulate a device that can raise signficant safety concerns, including causing the transmission of the acquired immunodeficiency syndrome virus.

FDA is mindful of the pediatric use of replacement valve allografts and their use in pregnant women. As a result, the agency has given manufacturers and processors of replacement value allografts substantial warning of the manner in which the agency would regulate the device. For example, in the fall of 1989 the Center for Devices and Radiological Health (CDRH) actively participated in a daylong workshop concerning human heart valves sponsored by the American Association of Tissue Banks. In June 1990, human heart valve processors were invited to meet with agency personnel to assist in the development of a heart valve allograft guidance document defining the content of premarket approval application submissions.

Additionally, at a July 1990 meeting of the Food and Drug Law Institute, CDRH's Dr. Gordon Johnson, stated FDA's general approach to the regulation of devices made of human tissue, including the agency's intention to regulate heart valve allografts as replacement heart valves, as described and classified in 1980. In August 1990, CDRH held a meeting of the Circulatory System Devices Advisory Panel to discuss the regulation of human heart valves. It has been clear for some time that FDA intended to regulate human heart valves as replacement heart valves, subject to the agency's 1987 PMA requirement.

To ensure that patients are protected, FDA believes that distribution of unapproved replacement valve allografts must be under an investigational device exemption. FDA's application of its regulatory controls should not diminish the availability of the valve. FDA's intent is to enforce the law, and provide persons who receive human heart valves adequate informed consent while requiring the systematic collection of device performance data. FDA believes that appropriate investigation of the device may occur without diminishing the availability of human heart valves.

The agency intends to review IDE applications in a phased manner. The critical first submission will, at a minimum, require a demonstration that the device is sufficiently safe to permit its continued use. FDA will provide written guidance regarding the content of an acceptable IDE and will work closely with IDE applicants to ensure the continued availability of the device. If information shows that a manufacturer's human tissue heart valve is unsafe, or that an applicant either is uncooperative in providing FDA necessary information or is unable to satisfy the agency's safety concerns, only then will that manufacturer's device be removed from distribution.

Accordingly, if a PMA for a replacement heart valve allograft is not approved on or before August 28, 1991, continued distribution of the device after this date will violate the act in that the device is deemed to be adulterated under section 501(f)(1)(A) of the act (21 U.S.C. 351(f)(1)(A)). The device may, however, be distributed for investigational use if the requirements of the IDE regulations (21 CFR part 812) are met.

FDA has concluded that investigational replacement heart valve allografts are significant risk devices as defined in § 812.3(m) and advises that the requirements of the IDE regulations regarding significant risk devices will apply to any clinical investigation of a replacement heart valve allograft. For any such investigational device, therefore, an IDE application submitted to FDA under § 812.20 is required to be in effect under § 812.330 before an investigation may be initiated or continued. FDA advises all persons who currently sponsor or intend to sponsor clinical investigations involving the device to submit an IDE application to FDA no later than July 26, 1991, to avoid the interruption in the distribution and investigation of the device.

Sponsors of ongoing clinical investigations should submit an IDE application in accordance with FDA's "Investigational Device Exemption (IDE) Manual." A PMA for a replacement heart valve allograft should be prepared and submitted in accordance with FDA's "Premarket Approval (PMA) Manual." Both publications are available upon request from the Center for Devices and Radiological Health (HFZ–220), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 800–638–1041, or 301–443–6597 in Maryland. All PMA's shall contain the information required by 21 CFR 814.20.

A new guidance detailing the in vitro testing, processing, characterization, validation, and clinical data information to be included in a PMA for a replacement heart valve allograft, is now available. This guidance is based upon comments received from members of the Circulatory System Devices Panel and the tissue banking industry at the August 20, 1990, Circulatory System Device Panel meeting. FDA will distribute this guidance to the tissue banks that are known to process replacement heart valve allografts. Copies are available upon request from the Center for Devices and Radiological Health (HFZ–220) at the above address and phone number. A copy may also be transferred by computer modem from the FDA Center for Devices and Radiological Health Electronic Bulletin Board Service. This bulletin board can be accessed by phone at 301–443–7496 and uses the following operating parameters: 1,200 baud, no parity, 8 data bits, 1 stop bit, and X modem protocol.

The document is issued under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs.

Dated: June 18, 1991.

James S. Benson,

Acting Commissioner of Food and Drugs.

Predisclosure Notification Procedures for Confidential Commercial Information

AGENCY: Panama Canal Commission.

ACTION: Final rule.

SUMMARY: This rule adopts as final the interim rule implementing Executive Order 12600 which requires Federal agencies to establish predisclosure notification procedures applicable to Freedom of Information Act requests for the release of records containing commercial or financial information that is privileged or confidential if the disclosure of these records can reasonably be expected to result in substantial competitive harm to the person who submitted the information. The procedures substantially conform to Executive Order 12600, 52 FR 23781 (June 23, 1987) (3 CFR, 1987 Comp., p. 235).

EFFECTIVE DATE: June 26, 1991.

FOR FURTHER INFORMATION CONTACT: Ms. Barbara Fuller, Assistant to the Secretary for Commission Affairs, Panama Canal Commission, Telephone: 202–634–6441 or Mrs. Carolyn H. Twohy, Chief, Administrative Services Division, Agency Records Officer, Telephone in Balboa Heights, Republic of Panama: 011–507–52–7757.

SUPPLEMENTARY INFORMATION: On March 18, 1991, the Panama Canal Commission published in the **Federal Register** at 56 FR 11373 an interim rule promulgating predisclosure notification procedures under the Freedom of Information Act for confidential commercial information, pursuant to Executive Order 12600 of June 23, 1987. The public was provided a 60-day comment period which ended on May 17, 1991. No comments were received during this period.

This rule is not a major rule for the purposes of Executive Order 12291 and it will not have a significant economic impact on a substantial number of small business entities under the Regulatory Flexibility Act. This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3501 et. seq.

The publication of this notice is made in accordance with the Administrative Procedure Act, 5 U.S.C. 551, et. seq.

List of Subjects in 35 CFR Part 9

Confidential business information, Freedom of information, Organization and functions (Government agencies), Panama Canal, Statistics.

Accordingly, the interim rule amending 35 CFR part 9 published at 56 FR 11373, March 18, 1991, is adopted as a final rule without change.

Dated: June 7, 1991.

Joseph J. Wood,

Director, Office of Executive Administration.

BILLING CODE 3640–04–M

35 CFR Part 255

RIN 3207–AA16

Employee Responsibilities and Conduct

AGENCY: Panama Canal Commission.

ACTION: Final rule.

SUMMARY: The Panama Canal Commission is removing and reserving part 255 of its regulations pending the finalization and approval of a revised agency ethics regulation. The Panama Canal Commission Code of Conduct passed by the Commission's Board of Directors pursuant to 22 U.S.C. 3622, and part 255, will be replaced upon the approval of the future part 255. Said Code of Conduct remains in effect.

EFFECTIVE DATE: June 26, 1991.

FOR FURTHER INFORMATION CONTACT: Mrs. Barbara A. Fuller, Assistant to the Secretary for Commission Affairs, Panama Canal Commission, 2000 L Street, NW., suite 550, Washington, DC 20036–4996 (202) 634–6441 or Mr. Theodore Lucas, General Attorney, Office of General Counsel, Panama Canal Commission, APO Miami 34011–5000 (telephone: 011–570–52–7511).

SUPPLEMENTARY INFORMATION: Since this action pertains to personnel of the Panama Canal Commission only, it is not necessary to issue a notice of proposed rulemaking under 5 U.S.C. 553. This regulation is not a major rule within the meaning of Executive Order 12291 (46 FR 13193, 3 CFR 1981 Comp., p. 127) and, therefore, a regulatory impact analysis has not been prepared. Further, the Administrator of the Commission certifies pursuant to 5 U.S.C. 605(b) that the regulation does not have an impact on small entities and is not, therefore, subject to the Regulatory Flexibility Act (5 U.S.C. 601–612).

DEPARTMENT OF AGRICULTURE

Forest Service

36 CFR Part 200

RIN 0596-AA24

Organization, Functions, and Procedures; Land Status Records System

AGENCY: Forest Service, USDA.

ACTION: Final rule.

SUMMARY: These regulations establish the Forest Service Land Status Records System as the official repository for all realty records and land title documents for National Forest System lands. The records include an accurate account of acreage, condition of title, administrative jurisdiction, rights held by the United States, administrative and legal use restrictions, encumbrances, and access rights on land or interests in land in the National Forest System. The intended effect of the rule is to expedite the process of authenticating records in court proceedings and to provide adequate notice to the public of the content and availability of the records.

EFFECTIVE DATE: This rule is effective June 26, 1991.

FOR FURTHER INFORMATION CONTACT: Paul Haarala or Dennis Moonier, Lands Staff, Forest Service, USDA, P.O. Box 96090, Washington, DC 20090-6090 (202) 453-8353.

SUPPLEMENTARY INFORMATION: The Transfer Act of February 1, 1905 (33 Stat. 628; 16 U.S.C. 472), the Weeks Act of March 1, 1911 (36 Stat. 963; 16 U.S.C. 521), and title III of the Bankhead-Jones Farm Tenant Act and acts supplemental to and amendatory thereof impose a duty upon the Secretary of Agriculture to execute the laws affecting lands permanently reserved, held, and administered as National Forests or for National Forest purposes. The National Forest Management Act of 1976 (90 Stat. 2949; 16 U.S.C. 1600) requires that the Secretary of Agriculture develop and maintain an appropriately detailed inventory of all National Forest System lands and resources.

The Land Status Records System was developed and is protected and maintained to be responsive to requests for land status, such as title condition, acreage, use restrictions, encumbrances, and so forth, for varying geographic National Forest areas, in response to Forest Service program needs and other Federal, State, and private inquiries. The system also provides land status information for recurring reports such as the annual National Forest System Land Areas Report, Payments-in-Lieu-of-Taxes report, and the 25 percent fund receipts distributed to States and counties report and for responding to special Congressional inquiries and other requests and studies.

For years, the Forest Service has established its land status records policies and procedures through the Agency's internal directive system. However, because of the legal status and value of these permanent records, there is a need to establish at a higher level of policy than internal Agency directive the minimum requirements governing Forest Service recordation, custody, maintenance, display, and use of official land status records. For instance, at present, the government has to authenticate the validity of its records in each court proceeding. This regulation will expedite this process.

Therefore, this rule establishes and gives public notice that the Land Status Records System contains the official records evidencing the landownership title, status, and jurisdiction for all National Forest System lands. The rule also establishes the broad components of the system and requirements for display, maintenance, and custody of these official land status and title records.

The Land Status Records System contains, but is not limited to, the following information:

1. The jurisdiction over and condition of title to lands administered as part of the National Forest System;
2. All encumbrances on National Forest System lands;
3. All partial interests administered by the Forest Service as part of the National Forest System;
4. All use restrictions on National Forest System lands; and
5. The acreage of National Forest System lands, including riparian lands.

Information in the Land Status Records System is updated on a regular basis to reflect changes that affect identification of National Forest System lands such as changes in congressional district boundaries; changes in administrative units (i.e. National Forests and Ranger Districts); changes in county and other governmental units (i.e., townships, boroughs, etc.), and corrections reflecting more accurate land surveys.

Each National Forest System unit maintains a Land Status Atlas for that forest which contains base maps keyed to tabular summaries and narrative records available for use and inspection by other Federal, State, and private entities.

This rule is of a technical nature. The rule establishes administrative procedures to be used by Forest Service employees and has no effect on the public or on the manner in which the public conducts business with the Agency. The Land Status Records System has been in existence for decades. The information in the records system and the manner in which it is collected, recorded, displayed, and maintained are, of necessity, determined by the Agency to meet its statutory responsibilities for management of the National Forest System.

The objective of the rule is (1) to simplify reference to, and recognition of, the land status records information in legal proceedings, (2) to assure proper authentication, custody, maintenance, and display of these records by Forest Service employees, and (3) to provide notice to the public of the content and availability of the records for public use at each National Forest System unit and each Forest Service headquarters office (36 CFR 200.2).

Environmental Impact

Based on both experience and environmental analysis, this final rule will have no significant effect on the human environment, individually or cumulatively. The rule involves routine administrative procedures of the Agency, and therefore, it is categorically excluded from documentation in an environmental assessment or an environmental impact statement (40 CFR 1508.4; 7 CFR part 1b).

Controlling Paperwork Burdens on the Public

This rule does not contain any record keeping or reporting requirements or other information collection requirements as defined in 5 CFR part 1320 and therefore imposes no paperwork burden on the public. The burden of maintaining the records established by this rule rests solely on the Forest Service.

Regulatory Impact

This final rule is a technical rule related solely to internal Agency management and as such is not subject to review under USDA procedures and Executive Order 12291 on Federal Regulations.

Moreover, this rule has been considered in light of the Regulatory Flexibility Act (5 U.S.C. 601 et seq.), and it has been determined that this action will not have a significant economic impact on a substantial number of small entities. The rule imposes no requirements on the public.

Further, because this rule relates to internal agency management, it is, pursuant to 5 U.S.C. 553, not necessary to provide prior notice and opportunity to comment, and this rule may, therefore, be made effective less than 30 days from publication in the **Federal Register**.

List of Subjects in 36 CFR Part 200

Administrative practice and procedure, Freedom of information, and Organization and functions (Government agencies).

Therefore, for the reasons set forth in the preamble, part 200 of chapter II of title 36 of the Code of Federal Regulations is hereby amended as follows:

PART 200—[AMENDED]

1. The authority citation for part 200 is revised to read as follows:

Authority: 5 U.S.C. 552; 16 U.S.C. 472i, 521, and 1603.

2. Add a new § 200.12 to read as follows:

§ 200.12 Land status and title records.

(a) *Land Status records System.* The Land Status Records System is the official, permanent repository for all realty records and land title documents for national Forest System lands. It includes an automated database which contains an accurate account of: Acreage, condition of title, administrative jurisdiction, rights held by the United States, administrative and legal use restrictions, encumbrances, and access rights on land or interests in land in the National Forest System.

(1) *Components.* The system shall include, but is not limited to, the following components:

(i) A current and accurate Land Status Atlas for each National Forest, National Grassland, and other proclaimed or designated administrative unit, which shall graphically portray on maps keyed to a tabular summary the following categories of information:

(A) Jurisdiction of and condition of title to lands administered as part of the National Forest System.

(B) All encumbrances on National Forest System lands.

(C) All partial interests administered by the Forest Service on other lands.

(D) All use restrictions, withdrawals, and special designated areas on National Forest System lands.

(E) The acreage of National Forest System lands, including riparian lands.

(ii) A master Land Status File, from which the data for the Atlas is derived and which includes the following:

(A) Discrete title files of each landownership adjustment.

(B) The original authorizing documents establishing or adjusting National Forest System lands and interests therein.

(C) Withdrawals, use restrictions, and special designated areas on National Forest System lands.

(D) Other information as deemed necessary.

(iii) Such reporting systems as are needed to provide title or status reports.

(2) *Display of Information.* Information in the system may be collected and maintained in narrative, graphic, tabular, or other form and may be entered into and maintained in automated systems as well as produced in paper form in accordance with such administrative direction as the Chief of the Forest Service or Regional Foresters may establish.

(b) *Availability.* A Land Status Atlas shall be maintained at each National Forest administrative unit or subunit, such as Ranger Districts or National Recreation Area offices. Each Regional Office shall maintain copies of the Atlas for all National Forests within that Region. Related land title and realty records for each National Forest System unit shall be maintained at the administrative headquarters of that unit. The Land Status Atlas and such title and realty records as are held at an administrative unit shall be available for public inspection.

Dated: June 13, 1991.

James R. Moseley,

Assistant Secretary for Natural Resources and Environment.

Reward for Information Leading to the Arrest and Conviction of Any Person Charged with Damaging or Stealing Any Portion of the Pacific Yew Tree

AGENCY: Forest Service, USDA.

ACTION: Final rule.

SUMMARY: This rule increases the amount of reward that may be offered for information leading to the arrest and conviction of any person charged with damaging or stealing the Pacific yew tree, *Taxus brevifolia*, or any portion thereof, including but not limited to bark, twigs, needles and other foliage. The intended effect is to provide additional management and procedures for the protection of a national forest product that is vital to cancer research.

EFFECTIVE DATE: June 26, 1991.

FOR FURTHER INFORMATION CONTACT: F. Dale Robertson, Chief (2400), Forest Service, USDA, PO Box 96090, Washington, DC 20090-6090.

SUPPLEMENTARY INFORMATION: Each year approximately 12,000 women in the United States die of ovarian cancer. Taxol, an anticancer drug currently derived from Pacific yew tree bark, has proven to be an effective treatment for many patients in clinical trials conducted by the National Cancer Institute (NCI). It also shows promise in treatment of breast, lung and colon cancers. Taxol is in critical shortage, both for treatment and research. The medical community is very concerned about an adequate supply of yew bark to meet critical health care needs of citizens of the United States.

Pacific yew occurs on all major ownerships in the Northwest, with a major portion of the trees large enough to provide bark being located in the National Forests along the west-side of the Cascade Mountains in Oregon and Washington. Smaller amounts are located in eastern Oregon and Washington, and in Idaho, Montana, and northern California. Government efforts to provide materials effective in the treatment of cancer are being hampered by theft of Pacific yew bark from the National Forest System.

Recently, damage to and theft of Pacific yew trees and bark have occurred on three different national forests in three different states. The Secretary of Agriculture is authorized to "pay rewards from appropriations available for the protection and management of the national forests * * * for information leading to the arrest and conviction * * * for the unlawful taking of, or injury to, Government property." 16 U.S.C. 559a. Under current regulations at 36 CFR 262.1(a)(3) the reward that may be offered for information leading to the arrest and conviction of any person charged with destroying or stealing property of the United States cannot

VOL 56 ISS 123 JE 26 1991 UMI

exceed $5,000. Based on the need to protect this important resource located on national forests, this rule increases the maximum amount of reward to $10,000 that may be offered for information leading to the arrest and conviction of any person charged with damaging or stealing the Pacific yew tree, *Taxus brevifolia*, or any portion thereof, including but not limited to bark, twigs, needles and other foliage.

This rule relates to internal agency management. Therefore, pursuant to 5 U.S.C. 553, notice and opportunity for comment are not required, and this rule may be made effective less than 30 days after publication in the Federal Register. Further, since this rule relates to internal agency management, it is exempt from the provisions of Executive Order 12291. Finally, this action is not a rule as defined in Public Law No. 96-354, the Regulatory Flexibility Act, that is subject to the provisions of that Act. This rule involves internal agency management and procedures and has no impact on the quality of the human environment, individually or cumulatively. Therefore, documentation of the effects of the rule in an environmental assessment or an environmental impact statement is not required. This rule also does not contain new recordkeeping or reporting requirements or other information collection requirements as defined in 5 CFR part 1320 and, therefore, imposes no additional paperwork burden on the public.

List of Subjects in 36 CFR Part 262

Law enforcement, National forests.

Therefore, for the reasons set forth in the preamble, part 262 of title 36 of the Code of Federal Regulations is amended as follows:

PART 262—LAW ENFORCEMENT SUPPORT ACTIVITIES

1. The authority citation for part 262 continues to read as follows:

Authority: 30 Stat. 35, as amended (16 U.S.C. 551); sec. 1, 33 Stat. 628 (16 U.S.C. 472); 50 Stat. 559, as amended (7 U.S.C. 1011(f); 58 Stat. 788 (16 U.S.C. 590q).

Subpart A—Rewards and Payments

2. Amend § 262.1 by adding paragraph (a)(4) to read as follows:

§ 262.1 Rewards in connection with fire or property prosecutions.

* * * * *

(a) * * *

(4) Not exceeding $10,000 for information leading to the arrest and conviction of any person charged with damaging or stealing the Pacific yew tree, *Taxus brevifolia*, or any portion thereof, including but not limited to bark, twigs, needles and other foliage.

* * * * *

Signed in Washington, DC, on June 18, 1991.

Edward E. Madigan,

Secretary of Agriculture.

[FR Doc. 91-15200 Filed 6-25-91; 8:45 am]

BILLING CODE 3410-11-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 60 and 61

[FRL-3965-6]

New Source Performance Standards (NSPS) and National Emission Standards for Hazardous Air Pollutants (NESHAPS); Delegation of Authority to the State of Nebraska

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of delegation of authority.

SUMMARY: This document announces an extension of the delegation of authority agreement by EPA to the state of Nebraska. Sections 111(c) and 112(d) of the Clean Air Act allow the Administrator of EPA to delegate to a state government authority to implement and enforce the air pollution standards promulgated by EPA under 40 CFR parts 60 and 61. This delegation gives Nebraska that authority.

EFFECTIVE DATE: June 28, 1991.

ADDRESSES: All requests, reports, applications, submittals, and such other communications required to be submitted under 40 CFR parts 60 and 61, including notifications required to be submitted under subpart A or the regulations, for affected facilities or activities in Nebraska should be sent to Chief, Air Quality Division, Nebraska Department of Environmental Control, P.O. Box 98922, Statehouse Station, Lincoln, Nebraska 68509. A copy of all notices required by Subpart A also must be sent to Director, Air and Toxics Division, Environmental Protection Agency, Region VII, 726 Minnesota Avenue, Kansas City, Kansas 66101.

FOR FURTHER INFORMATION CONTACT: Carol D. LeValley, Air Planning and Development Section, Air Branch, Environmental Protection Agency, Region VII, at the above address or by calling (913) 551-7020 (FTS 276-7020).

SUPPLEMENTARY INFORMATION: Sections 111(c) and 112(d) of the Clean Air Act allow the Administrator of the EPA to delegate to any state government authority to implement and enforce the standards promulgated by the agency under 40 CFR parts 60 and 61. EPA retains concurrent authority to implement and enforce the delegated standards. The delegation shifts the primary responsibility for implementation and enforcement of the standards from EPA to the state government.

On August 7, 1984, EPA and the state of Nebraska entered into a delegation of authority agreement whereby Nebraska automatically receives authority to implement and enforce federal NSPS and NESHAP standards upon the adoption of the standards by the state government. (See 50 FR 963.)

Nebraska revised its rules to adopt, by reference, the NSPS standards for 40 CFR part 60, subparts Dc, III, NNN, QQQ, SSS, TTT, and VVV and the NESHAPS for 40 CFR part 61, subparts A, C, D, E, F, J, L, M, N, O, P, V, Y, BB, and FF. The adoption action and regulation changes became effective on February 20, 1991. The Nebraska Department of Environmental Control informed EPA of the adoption action in a letter dated March 6, 1991. EPA subsequently acknowledged the adoption and the corresponding delegation of authority in a letter to NDEC on May 13, 1991. The delegation occurred under the terms of the above mentioned August 7, 1984, automatic delegation of authority agreement.

EPA hereby notifies interested individuals that, effective February 20, 1991, EPA delegated the authorization to implement and enforce the federally established standards for 40 CFR parts 60 and 61, subparts identified above, to the state of Nebraska.

This notice is issued under the authority of sections 111 and 112 of the Clean Air Act, as amended (42 U.S.C. 7411 and 7412).

Dated: May 23, 1991.

Morris Kay,

Regional Administrator.

BILLING CODE 6560-50-M

40 CFR Parts 180 and 185

[OPP-300226A; FRL-3962-3]

RIN 2070-AB78

Dichlorvos; Revocation of Tolerance and Food Additive Regulation

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This document revokes the tolerance for residues of the pesticide dichlorvos (2,2-dichlorovinyl dimethyl phosphate), also known as DDVP, in or on figs and the food additive regulation for dried figs. EPA is initiating this action because there are no remaining domestic registrations for the use of DDVP on figs.

EFFECTIVE DATE: This regulation becomes effective June 26, 1991.

ADDRESSES: Written objections, identified by the document control number, (OPP-300226A), may be submitted to: Hearing Clerk (A-110), Environmental Protection Agency, rm. 3708, 401 M St., SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: By mail: Sepehr Haddad, Special Review and Reregistration Division (H7508W), Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Special Review Branch, rm. 2N5, Westfield Building, 3rd Floor, 2805 Jefferson Davis Hwy., Arlington, VA (703)-308-8027.

SUPPLEMENTARY INFORMATION: In the Federal Register of February 13, 1991 (56 FR 5788), EPA issued a proposed rule to revoke the tolerance in or on figs, and the food additive regulation for dried figs, under sections 408 and 409 of the Federal Food, Drug, and Cosmetic Act (FFDCA), for the pesticide dichlorvos (2,2-dichlorovinyl dimethyl phosphate), also known as DDVP. This revocation was proposed because DDVP is no longer registered for use on figs, and a tolerance is generally not necessary for a pesticide chemical which is not registered for the particular food use. Tolerances for residues of DDVP, expressed as parts per million (ppm) in or on raw agricultural commodities, are codified in 40 CFR 180.235. A tolerance of 0.1 ppm is set for residues of DDVP in or on figs. A food additive tolerance of 0.5 ppm for residues of DDVP in or on dried figs is codified in 40 CFR 185.1900.

There were no comments or requests for referral to an advisory committee received in response to the proposed rule.

The data submitted in the petition and other relevant material have been evaluated and discussed in the proposed rule. Based on the data and information considered, the Agency concludes that the revocations will protect the public health. Therefore, the regulations are amended as set forth below.

Any person adversely affected by this regulation revoking the tolerance may, within 30 days after publication of this document in the Federal Register, file written objections with the Hearing Clerk, at the address given above. The objections submitted must specify the provisions of the regulation deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must include a statement of the factual issue(s) on which a hearing is requested and the requestor's contentions on each such issue.

A request for a hearing will be granted if the Administrator determines that the material submitted shows the following: There is a genuine and substantial issue of fact; there is a reasonable possibility that available evidence identified by the requestor would, if established, resolve one or more of such issues in favor of the requestor, taking into account uncontested claims or facts to the contrary; and resolution of the factual issue(s) in the manner sought by the requestor would be adequate to justify the action requested.

This rule has been reviewed by the Office of Management and Budget as required under section 3 of Executive Order 12291.

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: June 11, 1991.

Linda J. Fisher,

Assistant Administrator for Pesticides and Toxic Substances.

Therefore, 40 CFR parts 180 and 185 are amended as follows:

PART 180—[AMENDED]

1. In part 180:

a. The authority citation for 40 CFR part 180 continues to read as follows:

Authority: 21 U.S.C. 346a and 371.

§ 180.235 [Amended]

b. Section 180.235 *2,2-Dichlorovinyl dimethyl phosphate*, is amended in paragraph (a) by removing from the table therein the entry for figs.

PART 185—[AMENDED]

2. In part 185:

a. The authority citation for part 185 continues to read as follows:

Authority: 21 U.S.C. 346.

b. Section 185.1900 is revised to read as follows:

§ 185.1900 2,2-Dichlorovinyl dimethyl phosphate.

The food additive 2,2-dichlorovinyl dimethyl phosphate may be present as a residue from application as an insecticide on packaged or bagged nonperishable processed food (see: 21 CFR 170.3(j)) in an amount in such food not in excess of 0.5 part per million (ppm). To assure safe use of the insecticide, its label and labeling shall conform to the label and labeling registered by the U.S. Environmental Protection Agency, and the usage employed shall conform with such label or labeling.

BILLING CODE 6560-50-F

40 CFR Part 372

[OPTS-42064A; FRL-3961-2]

Toxic Chemical Release Reporting; Community Right-To-Know; Sunset Provisions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is issuing a final regulation pertaining to the "sunset" provision of 40 CFR 372.30(e), the rule that implements section 313 of the Emergency Planning and Community Right-to-Know Act. Sunset provisions are deliberately designed to lapse after a certain period of time, unless explicitly extended. The range reporting option on the section 313 reporting form—allowing releases of less than 1,000 pounds of section 313 chemicals to be reported within specified ranges (e.g., 0 to 499 pounds) rather than as a specific number—would lapse after the 1990 reporting year if no action is taken. This final rule retains range reporting with only minor modifications. The preamble to the section 313 final rule also committed EPA to review the benefits of optional reporting on pollution prevention. The form that implements section 313 reporting for 1990 retains this optional section. Finally, this rule also replaces EPA Form R and Instructions in the Code of Federal Regulations (CFR) with a Notice of Availability and a listing of reportable data elements.

EFFECTIVE DATE: The rule becomes effective June 26, 1991.

FOR FURTHER INFORMATION CONTACT: Eileen Gibson, Sunset Project Manager, Office of Toxic Substances (TS-779), Environmental Protection Agency, 401 M St., SW., Washington, DC 20460, Telephone (202) 475-7449 or, The Emergency Planning and Community Right-to-Know Hotline, Environmental Protection Agency, Mail stop OS-120, 401 M St, SW., Washington, DC 20460,

SUPPLEMENTARY INFORMATION:

I. Introduction

A. Statutory Authority

This rulemaking is issued under section 313 of The Emergency Planning and Community Right-to-Know Act of 1986 (EPCRA) (42 U.S.C. 11023).

B. Background

The final rule that implemented the toxic chemical release reporting form (EPA Form R) under section 313 (40 CFR part 372) and the reporting instructions contained a range reporting provision that would lapse after 1989 reporting unless EPA took specific action to retain it.

The range reporting option (40 CFR 372.30(e)) provided an alternative means of reporting relatively small quantities of chemical releases. Releases to the environment or off-site transfers of less than 1,000 pounds were reported in ranges (0 pounds, 1 to 499 pounds, 500 to 999 pounds) rather than as specific estimates. Specifically, part III, questions 5.1 to 5.5 on EPA Form R provided range reporting options for environmental releases of less than 1,000 pounds, while questions 6.1 and 6.2 allowed range reporting for transfers to publicly-owned treatment works and other off-site locations.

The sunset provision was included to insure Agency review of the utility of the range reporting option. In addition, the Agency also committed to reviewing another provision of Form R, the collection of optional pollution prevention data. Submitters of Form R may supply data on the impacts of their pollution prevention practices as they affect releases reported on the toxic chemical release reporting form. The optional question 8 on Form R allows submitters to indicate the type of pollution prevention modification undertaken, the amount of change (in pounds or as a percent) in waste quantity, a production index, and the reason for taking pollution prevention actions.

II. Range Reporting

Range reporting provided an option for reporting releases of less than 1,000 pounds per year to be reported as a check-off in one of three columns, 0 pounds, 1 to 499 pounds, and 500 to 999 pounds, rather than as a specific estimate for the release amount.

In the **Federal Register** of January 11, 1991 (56 FR 1154), EPA proposed to retain range reporting with a minor modification to provide for a low-end range (1 to 10 pounds) and to eliminate 0 as a range value. The Agency received comments from the National Association of State Title III Program Officials (NASTTPO), the State of Minnesota's Department of Public Safety, and a total of 16 comments from industry on this proposed rulemaking.

Thirteen commenters supported the Agency in its proposal to retain, but slightly modify the range reporting. For example, one commenter agreed that for purposes of reporting under EPCRA a "...range will adequately address the release reporting requirement while minimizing the burden of collecting data or performing time-consuming calculations." Another commenter said that dropping the zero from range reporting and simply stating there are zero emissions is a positive change.

Five commenters wanted to retain the range reporting as it is now with no modifications. One felt that modifying the ranges would make it difficult to compare data generated before and after the change. Another commented that a range of 1 to 10 could cause misunderstandings as to data precision and that if a facility can differentiate releases of 1 to 10 pounds that facility could simply list the specific pounds on the Form R. Another commenter suggested extending the low-end range to 1 to 99 pounds, on the grounds that a 1 to 10 pound range might reveal confidential business information on process and product information.

The Agency believes that the minor modification to the range reporting will have little impact on historical comparisons and will be more representative of low-end releases. The low-end range representative of minor releases is based on the recommendation of industry. The commenter that suggested the 1 to 10 pound range might compromise the confidentiality of product formulations, provided no information as to why a 1 to 99 pound range would be more protective of such confidentiality.

Commenters had only minor objections to the proposed modifications to the reporting scheme, and there was general agreement that the changes would increase the accuracy of reporting without significantly increasing the reporting burden. Accordingly, after reviewing these comments EPA has decided to retain range reporting with the one modification as proposed. A range of 1 to 10 has been added to the range reporting to capture small releases without the implication that they may be as large as 499 pounds. The options for range reporting are therefore: 1 to 10 pounds, 11 to 499 pounds, and 500 to 999 pounds. The "zero" has been dropped as a "range". Facilities that are confident that they have zero emissions would report them specifically as a "0". If, for any given release line item there is no possibility of release of that chemical to that environmental media, the facility may enter "NA".

III. Optional Pollution Prevention Reporting

Another provision discussed in the preamble of the proposed rule was the option to report waste minimization data as a means of documenting the pollution prevention practices at a facility. This optional question includes data on the degree of waste minimization (either pounds reduced or percent reduction) as well as information on the type of pollution prevention activity, the reason for undertaking it, and changes in production levels that might account for increases or decreases in chemical releases.

The Agency requested comments on whether the optional pollution prevention question should be retained. The Agency also asked for comment on how this data is being used, the value to the user, what can be learned from the data, and the least burdensome way to collect the information. Eleven of the 16 commenters addressed the pollution prevention reporting issue. Six supported the Agency's proposal and four supported it as long as the question remained optional, but would object if such reporting were required in future Toxic Release Inventory (TRI) reports. One commenter wanted the pollution prevention question eliminated entirely, and was concerned that should the information be required the costs of responding would be burdensome and duplicative. Other commenters suggested eliminating the optional question to avoid overlap with the new source reduction and recycling questions mandated by section 7 of the Pollution Prevention Act of 1990 (PPA).

Industry response on how pollution prevention data was used was limited. However, one commenter did say the Agency would not be able to use the data submitted under TRI because submission of the data is voluntary and limited in scope and as a result sampling is skewed and insufficient to identify industry trends. The commenter suggested the Agency develop an alternative reporting mechanism for collecting pollution prevention data that would include all waste streams and not limit reporting to only section 313 chemicals (which gives an incomplete picture of a facility's waste reduction efforts).

EPA does believe the retention of optional data for the 1990 reporting year will still be useful to identify pollution prevention actions on a company and chemical-specific basis. However, PPA section 7 mandates that specific data elements be gathered on source reduction and recycling activities beginning with the 1991 reporting year. The Agency intends to publish a proposed rule in the near future to add the new mandatory reporting requirements to Form R. This expanded set of questions will replace the optional section 8 of Form R.

IV. Removal of EPA Form R and Instructions from the CFR

Finally, EPA proposed a technical modification to the regulation that would remove EPA Form 9350-1 (Form R) and instructions from the CFR. They would be replaced by a listing of reportable data elements plus a Notice of Availability of the most current version of the form and instructions. Seven commenters concurred with the Agency's proposal, as a cost saving move and because this action would be consistent with removal of forms and instructions for other programs from the CFR. One commenter objected to this change stating that this proposal presents a serious due process problem. "Specifically, facilities submitting Form Rs could be subject to changing Agency interpretation of what constitutes a correct Form R response, with virtually no notice." As stated in the proposal, it has become standard practice for the Agency to replace form and instruction documents in the CFR with a notice of availability and a listing of reportable elements. EPA believes that this does not represent a serious due process problem because any substantive addition or deletion of form elements will always be subject to notice and comment rulemaking. Therefore, the Agency is amending the rule by substituting a Notice of Availability of the most current form and reporting instructions plus a listing of reportable data elements. Note that from proposal to final rulemaking some minor revisions have occurred in the regulatory text. These changes are either for clarification or were inadvertent omissions relative to required reporting elements.

V. Rulemaking Record

The record supporting this rule is contained in docket control number OPTS-400046A. All documents are available to the public in the TSCA Public Docket Office from 8 a.m. to noon and 1 p.m. to 4 p.m., Monday through Friday, excluding legal holidays. The TSCA Public Docket Office is located at EPA Headquarters, rm. NE-G004, 401 M St., SW., Washington, DC 20460.

VI. Regulatory Assessment Requirements

A. Executive Order 12291

Under Executive Order 12291, EPA must judge whether a rule is "major" and therefore, requires a Regulatory Impact Analysis. EPA has determined that this rule is not a "major rule" because it will not have an effect on the economy of $100 million or more.

This rule has no significant impact on the section 313 reporting requirements for covered facilities since it essentially retains the status quo with only minor changes to the range reporting option. Therefore, this is a minor rule under Executive Order 12291.

B. Regulatory Flexibility Act

Under the Regulatory Flexibility Act of 1980, the Agency must conduct a small business analysis to determine whether a substantial number of small entities will be significantly affected. Because the proposed rule retains the status quo, the Agency certifies that small entities will not be significantly affected by the rule.

C. Paperwork Reduction Act

This rule retains reporting provisions cleared by the Office of Management and Budget (OMB) under the provisions of the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 et seq. under control number 2070-0093.

List of Subjects in 40 CFR Part 372

Chemicals, Community right-to-know, Environmental protection, Pollution prevention, Reporting and recordkeeping requirements, Toxic chemicals.

Dated: June 11, 1991.

William K. Reilly,

Administrator.

Therefore, 40 CFR part 372 is amended as follows:

PART 372—[AMENDED]

1. The authority citation for part 372 continues to read as follows:

Authority: 42 U.S.C. 11013 and 11028.

2. Section 372.30 is amended by revising paragraphs (a), (b)(3)(i), (b)(3)(iv), and removing paragraph (e) to read as follows:

§ 372.30 Reporting requirements and schedule for reporting.

(a) For each toxic chemical known by the owner or operator to be manufactured (including imported), processed, or otherwise used in excess of an applicable threshold quantity in § 372.25 at its covered facility described in § 372.22 for a calendar year, the owner or operator must submit to EPA and to the State in which the facility is located a completed EPA Form R (EPA Form 9350-1) in accordance with the instructions referred to in subpart E of this part.

(b) * * *

(3) * * *

(i) If the owner or operator knows the specific chemical identity of the toxic chemical and the specific concentration at which it is present in the mixture or trade name product, the owner or operator shall determine the weight of the chemical imported, processed, or otherwise used as part of the mixture or trade name product at the facility and shall combine that with the weight of the toxic chemical manufactured (including imported), processed, or otherwise used at the facility other than as part of the mixture or trade name product. After combining these amounts, if the owner or operator determines that the toxic chemical was manufactured, processed, or otherwise used in excess of an applicable threshold in § 372.25, the owner or operator shall report the specific chemical identity and all releases of the toxic chemical on EPA Form R in accordance with the instructions referred to in subpart E of this part.

* * * * *

(iv) If the owner or operator has been told that a mixture or trade name product contains a toxic chemical, does not know the specific chemical identity of the chemical and knows the specific concentration at which it is present in the mixture or trade name product, the owner or operator shall determine the weight of the chemical imported, processed, or otherwise used as part of the mixture or trade name product at the facility. Since the owner or operator does not know the specific identity of the toxic chemical, the owner or operator shall make the threshold determination only for the weight of the toxic chemical in the mixture or trade name product. If the owner or operator determines that the toxic chemical was imported, processed, or otherwise used as part of the mixture or trade name product in excess of an applicable threshold in § 372.25, the owner or operator shall report the generic chemical name of the toxic chemical, or a trade name if the generic chemical name is not known, and all releases of the toxic chemical on EPA Form R in

VOL 56 ISS 123 JE 26 1991 UMI

accordance with the instructions referred to in subpart E of this part.

* * * * *

3. Section 372.65 is revised to read as follows:

§ 372.65 Toxic chemical release reporting form and instructions.

(a) *Availability of reporting form and instructions.* The most current version of EPA Form R (EPA Form 9350-1 and subsequent revisions) and the instructions for completing this form may be obtained by writing to the Section 313 Document Distribution Center, P.O. Box 12505, Cincinnati, OH 45212. EPA also encourages facilities subject to this part to submit the required information to EPA by using magnetic media (computer disk or tape) in lieu of Form R. Instructions for submitting and using magnetic media may also be obtained from the address given in this paragraph.

(b) *Form elements.* Information elements reportable on EPA Form R or equivalent magnetic media format include the following:

(1) An indication of whether the report:

(i) Claims chemical identity as trade secret.

(ii) Covers the entire facility or part of a facility.

(2) Signature of a senior management official certifying the following: "I hereby certify that I have reviewed the attached documents and, to the best of my knowledge and belief, the submitted information is true and complete and that amounts and values in this report are accurate based upon reasonable estimates using data available to the preparer of the report."

(3) Facility name and address including the toxic chemical release inventory facility identification number if known.

(4) Name and telephone number for both a technical contact and a public contact.

(5) The four-digit SIC code(s) for the facility or establishments in the facility.

(6) Latitude and longitude coordinates for the facility.

(7) The following facility identifiers:

(i) Dun and Bradstreet identification number.

(ii) EPA identification number (RCRA I.D. Number).

(iii) NPDES permit number.

(iv) Underground Injection Well Code (UIC) identification number.

(8) The name(s) of receiving stream(s) or water body to which the chemical is released.

(9) Name of the facility's parent company and its Dun and Bradstreet identification number.

(10) Name and CAS number (if applicable) of the chemical reported.

(11) If the chemical identity is claimed trade secret, a generic name for the chemical.

(12) A mixture component identity if the chemical identity is not known.

(13) An indication of the activities and uses of the chemical at the facility.

(14) An indication of the maximum amount of the chemical on site at any point in time during the reporting year.

(15) Information on releases of the chemical to the environment as follows:

(i) An estimate of total releases in pounds per year (releases of less than 1,000 pounds per year may be indicated in ranges) from the facility plus an indication of the basis of estimate for the following:

(A) Fugitive or non-point air emissions.

(B) Stack or point air emissions.

(C) Discharges to receiving streams or water bodies including an indication of the percent of releases due to stormwater.

(D) Underground injection on site.

(E) Releases to land on site.

(ii) [Reserved]

(16) Information on transfers of the chemical in wastes to off-site locations as follows:

(i) For transfers to Publicly Owned Treatment Works (POTW):

(A) The name and address (including county) of each POTW to which the chemical is transferred.

(B) An estimate of the amount of the chemical transferred in pounds per year (transfers of less than 1,000 pounds per year may be indicated as a range) and an indication of the basis of the estimate.

(ii) For transfers to other off-site locations:

(A) The name, address (including county), and EPA identification number (RCRA I.D. Number) of each off-site location, including an indication of whether the location is owned or controlled by the reporting facility or its parent company.

(B) An estimate of the amount of the chemical in waste transferred in pounds per year (transfers of less than 1,000 pounds may be indicated in ranges) to each off-site location, and an indication of the basis for the estimate and an indication of the type of treatment or disposal used.

(17) The following information relative to waste treatment:

(i) An indication of the general type of wastestream containing the reported chemical.

(ii) The treatment method applied to the wastestream.

(iii) An indication of the concentration of the chemical in the wastestream prior to treatment.

(iv) An estimate in percent of the efficiency of the treatment plus an indication of whether the estimate is based upon operating data.

(v) An indication (use is optional) of whether treatments listed are part of a treatment sequence.

(18) Pollution prevention data (reporting is optional) which includes the type of pollution prevention modification, quantity of the chemical in the wastes prior to treatment and disposal (for both the current and prior reporting year), a production index, and the reason for the pollution prevention action. This optional reporting expires after the 1990 reporting year.

BILLING CODE 6560-50-F

GENERAL SERVICES ADMINISTRATION

41 CFR Parts 201-21 and 201-22

Implementation of the FIRMR Improvement Project; Correction

AGENCY: Information Resources Management Service, GSA.

ACTION: Final rule; correction.

SUMMARY: This document implements technical corrections to a final rule regarding republication of the Federal Information Resources Management Regulation (FIRMR), 41 CFR chapter 201, that began on page 53386 in the **Federal Register** of Friday, December 28, 1990, (55 FR 53386).

FOR FURTHER INFORMATION CONTACT: R. Stewart Randall, Jr., GSA, Office of Information Resources Management Policy, telephone (202) 501-3194 or FTS 241-3194 (v) or (202) 501-0657 or FTS 241-0657 (tdd).

In 41 CFR chapter 201 Implementation of the FIRMR Improvement Project; Final Rule, Republication of Chapter (FR Doc. 90-30137), beginning on page 53386 in the issue of Friday, December 28, 1990, make the following corrections.

PART 201-21—[CORRECTED]

§ 201-21.603 [Corrected]

1. On page 53405, in the third first column, in § 201-21.603(d)(4)(iii) is corrected to read "No recording of identification of public callers;".

2. On page 53405, in the first column, in § 201-21.603(e) the third line should read "21.603(c) (2), (3), and (4) of this section.".

PART 201-22—[CORRECTED]

§ 201-22.100 [Corrected]

3. On page 53405, in the third column, in § 201-22.100, the seventh line is corrected to add "in executive agencies" after resources.

Dated: June 19, 1991.

Margaret Trumbich,

Chief, Regulations Branch.

BILLING CODE 6820-24-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Public Health Service

42 CFR Parts 4, 59a, and 64

RIN 0905-AA66

National Library of Medicine Programs

AGENCY: Public Health Service, HHS.

ACTION: Final rule.

SUMMARY: These regulations govern the programs of the National Library of Medicine (NLM). The regulations permit the Regional Medical Libraries to recover part or all of the costs of providing photocopies of biomedical materials; improve readability of the regulations; and update references to statutory authorities and uniform administrative requirements.

EFFECTIVE DATE: These regulations are effective June 26, 1991.

FOR FURTHER INFORMATION CONTACT: Mr. John J. Migliore on (301) 496-4606.

SUPPLEMENTARY INFORMATION: These regulations, which pertain to the National Library of Medicine in whole or in part, were proposed for revision as part of the Department's effort to simplify and update its regulations. The notice of proposed rulemaking was published in the **Federal Register** on February 11, 1985. The public was given 60 days in which to comment on the proposed regulations.

No public comments were received and these regulations are the same as the proposed regulations, except for minor editorial changes. However, the enactment of the Health Research Extension Act of 1985 (Pub. L. 99-158) on November 20, 1985, caused renumbering and revision of the provisions of the Public Health Service Act (PHS Act) that authorize the NLM programs. The new PHS Act section numbers are included in this final rule. In addition, certain provisions of Public Law 99-158 provided the Directors of the national research institutes of the National Institutes of Health with new traineeship authority (section 405(b)(1)(C) of the PHS Act) that resulted in the decision to revise the existing regulations in 42 CFR part 63, rather than revoke as originally planned. Revisions to part 63 will be published in a new notice of proposed rulemaking at a future date.

Finally, the regulations that comprise this final rule are clarified and condensed as a result of the elimination of regulatory provisions that are obsolete, or that are already set forth in the HHS uniform requirements for the administration of financial assistance in 45 CFR part 74.

Information Collection Requirements

This final rule contains information collections which have been approved by the Office of Management and Budget under the Paperwork Reduction Act of 1980 and assigned control number 0925-0276. The title, description, and respondent description of the information collection are shown below with an estimate of the annual reporting and recordkeeping burden. Included in the estimate is the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

Title: National Library of Medicine Programs, 42 CFR part 4.

Description: These regulations govern access to the National Library of Medicine's facilities and library collections and the availability of its bibliographic, reproduction, reference, and related services.

Description of Respondents: Individuals, State or local governments, businesses or other for-profit organizations, Federal agencies or employees, non-profit institutions, small businesses or organizations.

Title: National Library of Medicine Grants, 42 CFR part 59a, Subpart A, Establishing, Expanding, and Improving Basic Resources.

Description: This subpart applies to grants of funds, materials, or both, for establishing, expanding, and improving basic medical library resources.

Description of Respondents: State or local governments, non-profit institutions.

Title: National Library of Medicine Grants, 42 CFR part 59a, Subpart B, Establishment of Regional Medical Libraries.

Description: This subpart applies to grants, contracts and cooperative agreements awarded for the establishment, expansion, and improvement of basic medical library resources.

Description of Respondents: State or local governments, non-profit institutions.

Title: National Library of Medicine Training Grants, 42 CFR part 64.

Description: These regulations apply to grants under section 472 of the Public Health Service Act to public and private non-profit institutions to assist in developing, expanding, and improving training programs in library science and the field of communications of information pertaining to sciences relating to health.

Description of Respondents: State or local governments, non-profit institutions.

We received no public comments on the estimated public reporting burden.

Regulatory Impact and Regulatory Flexibility Analysis

These regulations are revised to improve readability, remove obsolete provisions, and permit certain fees to be recovered. The economic impact of this is expected to be minor. For these reasons, the Secretary has determined that this rule is not a "major rule" under Executive Order No. 12291 and a regulatory impact analysis is not required. Further, these regulations will not have a significant economic impact on a substantial number of small entities and, therefore, do not require a regulatory flexibility analysis under the Regulatory Flexibility Act of 1980 (5 U.S.C. chapter 6).

Catalog of Federal Domestic Assistance

The *Catalog of Federal Domestic Assistance number* program affected by this final rule is: 13.879 Medical Library Assistance.

List of Subjects in 42 CFR Parts 4, 59a, and 64

Educational study programs, Grant programs—Education, Grant programs—Health, Libraries, Manpower training programs, Medical research.

Accordingly, parts 4, 59a, and 64 of title 42 of the Code of Federal Regulations are revised to read as set forth below.

Dated: November 9, 1990.

James O. Mason,

Assistant Secretary for Health.

Approved: April 3, 1991.

Louis A. Sullivan,

Secretary.

PART 4—NATIONAL LIBRARY OF MEDICINE

Sec.

4.1 Programs to which these regulations apply.
4.2 Definitions.
4.3 Purpose of the Library.
4.4 Use of Library facilities.
4.5 Use of materials from the collections.
4.6 Reference, bibliographic, reproduction, and consultation services.
4.7 Fees.
4.8 Publications of the Library and information about the Library.

Authority: 42 U.S.C. 216, 286.

§ 4.1 Programs to which these regulations apply.

(a) The regulations of this part govern access to the National Library of Medicine's facilities and library collections and the availability of its bibliographic, reproduction, reference, and related services. These functions are performed by the Library directly for the benefit of the general public and health-sciences professionals as required by sections 465(b) (3)–(6) of the Act (42 U.S.C. 286(b) (3)–(6)).

(b) The regulations of this part do not apply to:

(1) The Library's internal functions relating to the acquisition and preservation of materials and the organization of these materials as required by sections 465(b) (1) and (2) of the Act (42 U.S.C. 286(b) (1) and (2)).

(2) The availability of "records" under the Freedom of Information Act or the Privacy Act of 1974 (5 U.S.C. 552, 552a). These matters are covered in 45 CFR parts 5 and 5b.

(3) Federal assistance for medical libraries and other purposes which are authorized by sections 469–477 of the Act (42 U.S.C. 286b to 286b–6). (See parts 59a, 61 and 64 of this chapter.)

(4) The availability of facilities, collections, and related services of Regional Medical Libraries established or maintained under the authority in section 475 of the Act (42 U.S.C. 286b–6). (See part 59a, subpart B of this chapter.)

§ 4.2 Definitions.

As used in this part:

Act means the Public Health Service Act, as amended (42 U.S.C. 201 et seq.).

Collections means all books, periodicals, prints, audiovisual materials, films, videotapes, recordings, manuscripts, and other resource materials of the library. It does not include data processing tapes or programs used solely for internal processing activities to generate reference materials, nor does it include "records" of the Library as defined in 45 CFR 5.5. Records of the Library are available in accordance with the regulations under the Freedom of Information Act and Privacy Act of 1974. (See 45 CFR parts 5 and 5b.)

Director means the Director of the National Library of Medicine or the Director's delegate.

Health-sciences professional means any person engaged in: (1) The administration of health activities; (2) the provision of health services; or (3) research, teaching, or education concerned with the advancement of medicine or other sciences related to health or improvement of the public health.

Historical collection means: (1) Materials in the collections published or printed prior to 1914; (2) manuscripts and prints; (3) the archival film collection; and (4) other materials of the collections which, because of age, or unique or unusual value, require special handling, storage, or protection for their preservation, as determined by the Director.

Library means the National Library of Medicine, established by section 465 of the Act (42 U.S.C. 286).

Regional Medical Library means a medical library established or maintained as a regional medical library under section 475 of the Act (42 U.S.C. 286b–6).

§ 4.3 Purpose of the Library.

The purpose of the Library is to assist the advancement of medical and related sciences and aid the dissemination and exchange of scientific and other information important to the progress of medicine and the public health. The Library acquires and maintains library materials pertinent to medicine, including audiovisual materials; compiles, publishes, and disseminates catalogs, indices, and bibliographies of these materials, as appropriate; makes available materials, through loan or otherwise; provides reference and other assistance to research; and engages in other activities in furtherance of this purpose.

§ 4.4 Use of Library facilities.

(a) *General.* The Library facilities are available to any person seeking to make use of the collections. The Director may prescribe reasonable rules to assure the most effective use of facilities by health-sciences professionals and to protect the collections from misuse or damage. These rules must be consistent with the regulations in this part and applicable Department regulations and policies on nondiscrimination.

(b) *Reading rooms.* Public reading rooms are available for obtaining and reading materials from the collections. The Director may prescribe reasonable rules designed to provide adequate reading space and orderly conditions and procedures.

(c) *Study rooms.* Upon request a limited number of study rooms may be made available to individuals requiring extensive use of Library materials. Requests for study rooms shall be addressed in writing to the Director. The Director shall give priority, in the following order, for study room use to:

(1) Persons engaged in "special scientific projects" under section 473 of the Act (42 U.S.C. 286b–4),

(2) Health-sciences professionals, and

(3) The general public.

§ 4.5 Use of materials from the collections.

(a) *Unrestricted materials.* Except as otherwise provided in this section, materials from the collections are generally available to any interested person only in facilities provided by the Library for this purpose. The Director may prescribe additional reasonable rules to assure the most effective use of the Library's resources by health-sciences professionals and to protect the collections from misuse or damage. The rules must be consistent with the regulations in this part and applicable Department regulations and policies on nondiscrimination. Materials in the collections are available upon each request which assures, to the Director's satisfaction, that the materials will be safeguarded from misuse, damage, loss, or misappropriation, and will be returned promptly after use or upon request of the Library.

(b) *Restricted materials*—(1) *Historical collection.* Materials from the historical collection are available only as the Director may permit to assure their maximum preservation and protection. Copies of these materials may be made available in the form of microfilm and other copies, for which reasonable fees may be charged.

(2) *Gifts.* Materials in the collections are available only in accordance with any limitations imposed as a condition of the acquisition of those materials, whether the acquisition was by gift or purchase.

(c) *Loans*—(1) *General.* Requests for loans of materials must assure the Library that (i) the materials will be safeguarded from misuse, damage, loss, or misappropriation and (ii) the materials will be returned promptly after use or upon request of the Library. The Library may provide copies in lieu of original materials, which need not be returned unless otherwise stated at the time of the loan.

(2) *Loans of audiovisual materials.* Audiovisual materials are available for loan under the same general terms as printed materials.

(3) *Loans to other libraries.* Upon request materials or copies are available for use through libraries of public or private agencies or institutions. The requesting library must assure that it has first exhausted its own collection resources, those of other local libraries in the geographic area, and those of the Regional Medical Library network (including Regional and Resource Libraries) before making a request for a loan.

(4) *Loans to health-sciences professionals.* The Director may make loans of materials directly to health-sciences professionals. An individual wishing a loan of library materials must assure to the satisfaction of the Director that the individual is geographically isolated, in terms of distance or available transportation, from medical literature resources likely to contain the desired material.

(Approved by the Office of Management and Budget—Control Number 0925–0276)

§ 4.6 Reference, bibliographic, reproduction, and consultation services.

(a) *General.* To the extent resources permit, the Library will make available, upon request, reference, bibliographic, reproduction, and consultation services. Priority will be given to requests from health-sciences professionals for services not reasonably available through local or regional libraries.

(b) *Specialized bibliographic services.* The Director may provide bibliographies on individually selected medical or scientific topics upon request where it is consistent with the Library's purpose. The Director may publish and make available for general distribution by the Library, bibliographic searches determined to be of general interest. The Library may also produce and distribute a limited number of bibliographies on topics of general interest to public or nonprofit health-related professional societies, research organizations, and other group users. These bibliographies may be produced on a regularly recurring or intermittent basis under contract between the Library and public or nonprofit agencies, when determined in each case by the Director to be necessary to assure more effective distribution of the bibliographic information.

(c) *Information retrieval system computer tapes.* To the extent Library resources permit and in order to further the Library's purpose, the Director may make available upon request by agencies, organizations, and institutions copies of all or part of the Library's magnetic tapes.

§ 4.7 Fees.

The Director may charge reasonable fees for any service provided by the Library under this part, in accordance with a schedule available at the Library upon request, which are designed to recover all or a portion of the cost to the Library of providing the service.

§ 4.8 Publication of the Library and information about the Library.

Lists of bibliographies, Library publications sold by the Government Printing Office, necessary application forms, and other information concerning the organization, operation, functions, and services of the Library, are available from the National Library of Medicine, Bethesda, Maryland 20894.

PART 59A—NATIONAL LIBRARY OF MEDICINE GRANTS

Subpart A—Grants for Establishing, Expanding, and Improving Basic Resources

Sec.

59a.1 Programs to which these regulations apply.
59a.2 Definitions.
59a.3 Who is eligible for a grant?
59a.4 How are grant applications evaluated?
59a.5 Awards.
59a.6 How may funds or materials be used?
59a.7 Other HHS regulations that apply.

Subpart B—Establishment of Regional Medical Libraries

59a.11 Programs to which these regulations apply.
59a.12 Definitions.
59a.13 Who is eligible for a grant?
59a.14 How to apply.
59a.15 Awards.
59a.16 What other conditions apply?
59a.17 Other HHS regulations that apply.

Subpart A—Grants for Establishing, Expanding, and Improving Basic Resources

Authority: 42 U.S.C. 286b–2, 286b–5.

§ 59a.1 Programs to which these regulations apply.

(a) The regulations of this subpart apply to grants of funds, materials, or both, for establishing, expanding, and improving basic medical library resources as authorized by section 474 of the Act (42 U.S.C. 286b–5).

(b) This subpart also applies to cooperative agreements awarded for this purpose. In these circumstances, references to "grant(s)" shall include "cooperative agreements(s)."

§ 59a.2 Definitions.

Undefined terms have the same meaning as provided in the Act. As used in this subpart:

Act means the Public Health Service Act, as amended (42 U.S.C. 201 et seq.).

Project period—See § 59a.5(c).

Related instrumentality means a public or private institution, organization, or agency, other than a medical library, whose primary function is the acquisition, preservation, dissemination, and/or processing of information relating to the health sciences.

Secretary means the Secretary of Health and Human Services and any other official of the Department of Health and Human Services to whom the authority involved is delegated.

§ 59a.3 Who is eligible for a grant?

Except as otherwise prohibited by law, any public or private nonprofit institution, organization, or agency authorized or qualified to carry on the functions of a medical library, and any

VOL 56 ISS 123 JE 26 1991 UMI

public or private related instrumentality, is eligible for a grant under this subpart.

§ 59a.4 How are grant applications evaluated?

The Secretary shall evaluate grant applications using the officers and employees, and experts, consultants, or groups engaged by the Secretary for that purpose. The Secretary's evaluation shall consider the scope of library or related services for the population and purposes served by the applicant. This evaluation shall include consideration of the following information which must be set forth in the grant application and such other information the Secretary considers pertinent:

(a) Evidence of the applicant's efficiency in providing services,

(b) Amount of available equipment and other resources on hand to satisfy the needs of the area served by the facility,

(c) Extent of coordination with other libraries and related facilities, and

(d) Potential for testing or demonstration of new or improved techniques in health-sciences informational services.

(Approved by the Office of Management and Budget—Control Number 0925–0276)

§ 59a.5 Awards.

(a) *General.* Within the limits of funds available, the Secretary may award grants to those applicants whose proposals for establishments, expansion, or improvement will, in the Secretary's judgment, best promote the purposes of section 474 of the Act (42 U.S.C. 286b–5).

(b) *Determination of award amount.* An award may not exceed $750,000 or other amount established by law for any fiscal year. Subject to these limits, the Secretary shall determine the amount of any award on the basis of:

(1) The scope of medical-library or related services provided by the applicant for the population and purposes it serves considering:

(i) The number of graduate and undergraduate students, and physicians and other practitioners in health-related sciences making use of the applicant's library resources;

(ii) The type and availability of library support staff;

(iii) The type, size, and qualifications of the faculty of any school with which the applicant is affiliated;

(iv) The staff of any hospitals or clinics with which the applicant's library is affiliated;

(v) The geographic area served and, within that area, the medical-library or related services otherwise available; and

(2) The amount adequate to insure continuing financial support from non-Federal sources of the applicant's proposed activity during and after the period of award. The Secretary shall consider the level of non-Federal support for the proposed activity for periods prior to the fiscal year in which a grant is made. The Secretary shall require the applicant's assurance that non-Federal support will not be diminished as a result of the award and that adequate support for this activity will be continued during and after the period of Federal assistance.

(c) *Project period.* (1) the notice of grant award specifies how long the Secretary intends to support the project without requiring the project to recompete for funds. This period, called the project period, will usually be for one to five years.

(2) Generally, the grant will initially be for one year at a time and subsequent continuation awards will also be for one year at a time. A grantee must submit a separate application to have the support continued for each subsequent year. Decisions regarding continuation awards and the funding level of these awards will be made after consideration of such factors as the grantee's progress and management practices, and the availability of funds. In all cases, continuation awards require a determination by the Secretary that continued funding is in the best interest of the Federal Government.

(3) Neither the approval of any application nor the award of any grant commits or obligates the Federal Government in any way to make any additional, supplemental, continuation, or other award for any approved application or portion of an approved application.

§ 59a.6 How may funds or materials be used?

The grantee shall expend funds or use materials provided by a grant under this subpart solely for the purposes for which the funds or materials were granted, in accordance with the pertinent provisions of the approved application and budget, the regulations of this subpart, the terms and conditions of the award, and the applicable cost principles in subpart Q of 45 CFR part 74.

§ 59a.7 Other HHS regulations that apply.

Several other regulations apply to grants under this subpart. These include, but are not necessarily limited to:

42 CFR part 50, subpart D—Public Health Service grant appeals procedure
45 CFR parts 6 and 8—Inventions and patents
45 CFR part 16—Procedures of the Departmental Grant Appeals Board
45 CFR part 74—Administration of grants
45 CFR part 75—Informal grant appeals procedures
45 CFR part 76 subparts A–F—Governmentwide debarment and suspension (nonprocurement) and requirements for drug-free workplace (grants)
45 CFR part 80—Nondiscrimination under programs receiving Federal assistance through the Department of Health and Human Services—effectuation of title VI of the Civil Rights Act of 1964
45 CFR part 81—Practice and procedure for hearings under part 80 of this title
45 CFR part 84—Nondiscrimination on the basis of handicap in programs and activities receiving or benefiting from Federal financial assistance
45 CFR part 86—Nondiscrimination on the basis of sex in education programs and activities receiving or benefiting from Federal financial assistance
45 CFR part 91—Nondiscrimination on the basis of age in HHS programs or activities receiving Federal financial assistance
45 CFR part 92—Uniform administrative requirements for grants and cooperative agreements to state and local governments

Subpart B—Establishment of Regional Medical Libraries

Authority: 42 U.S.C. 286b–2, 286b–6.

§ 59a.11 Programs to which these regulations apply.

(a) This subpart applies to grants made under section 475 of the Act (42 U.S.C. 286b–6). Grants are awarded to medical libraries to enable them to serve as regional medical libraries for their geographic areas. The purpose of the program is to develop a national system of regional medical libraries, each of which would have sufficient facilities to supplement the services of other medical libraries in its region.

(b) The purpose of the program may also be supported by contracts. Since the primary purpose of these contracts is to assist regional libraries and is not for the purpose of acquiring supplies or services for use of the Federal Government, the provisions of the Federal Acquisition Regulation (48 CFR chapter 1) do not apply. Any contract awarded pursuant to section 475 of the Act shall be subject to the applicable provisions of this subpart.

§ 59a.12 Definitions.

Underfined terms have the same meaning as provided in the Act.

As used in this subpart:

Act means the Public Health Service Act, as amended (42 U.S.C. 201 et seq.).

Annual operating expenses means the average annual operating expenses for the actual years of operation or an estimated amount based on the expenses of libraries or institutions of similar size and function.

Board means the Board of Regents of the National Library of Medicine established by section 465 of the Act (42 U.S.C. 286e).

Geographic area means an area that forms an academically and professionally integrated region. Factors considered are location and extent of communication facilities and systems, presence and distribution of educational and medical and health facilities and programs and other activities which, in the Secretary's opinion, justify the establishment and operation of a regional medical library.

Modify and increase means the use of Federal funds or materials to supplement rather than supplant non-Federal funds available for library resources and services.

Project period—See § 59a.15(b).

Secretary means the Secretary of Health and Human Services and any other official of the Department of Health and Human Services to whom the authority involved is delegated.

§ 59a.13 Who is eligible for a grant?

Except as otherwise prohibited by law, any public or private nonprofit organization which is authorized and qualified to operate a medical library is eligible for a grant under this subpart.

§ 59a.14 How to apply.

In addition to any other pertinent information which the Secretary may require, the applicant shall submit a grant application containing a detailed description of a program to provide health-sciences informational services for the geographic area in which it is located. The description shall include:

(a) The need for services;

(b) The adequacy of the applicant's existing or proposed facilities and resources to attain the purposes stated in the application;

(c) The size and nature of the population to be served;

(d) The region to be served;

(e) Cooperative arrangements in effect, or proposed, with other qualified organizations; and

(f) The justification for the funds requested.

(Approved by the Office of Management and Budget—Control Number 0925–0276)

§ 59a.15 Awards.

(a) *General.* The Secretary, with the advice of the Board in each case, shall award grants to those applicants whose arrangements and proposed services will, in the Secretary's judgment, have the greatest potential for fulfilling the need for a regional medical library. The Secretary, in determining the priority assigned an applicant, must consider:

(1) The adequacy of the applicant's library in terms of collections, personnel, equipment, and other facilities; and

(2) The size and nature of the population to be served in the applicant's region.

(b) *Project period.* (1) The notice of grant award specifies how long the Secretary intends to support the project without requiring the project to recompete for funds. This period, called the project period, will usually be for one to five years.

(2) Generally, the grant will initially be for one year and subsequent continuation awards will also be for one year at a time. A grantee must submit a separate application to have the support continued for each subsequent year. Decisions regarding continuation awards and the funding level of these awards will be made after consideration of such factors as the grantee's progress and management practices, and the availability of funds. In all cases, continuation awards require a determination by the Secretary that continued funding is in the best interest of the Federal Government.

(3) Neither the approval of any application nor the award of any grant commits or obligates the Federal Government in any way to make any additional, supplemental, continuation, or other award for any approved application or portion of an approved application.

§ 59a.16 What other conditions apply?

Although the Secretary may approve exceptions which are consistent with program purposes, in addition to other terms, conditions, and assurances required by law, each grantee must meet the following requirements:

(a) *Use of funds.* Any funds granted under this subpart shall be expended solely for the purpose for which the funds were granted in accordance with the approved application and budget, the regulations of this subpart, the terms and conditions of the award, and the applicable cost principles in subpart Q of 45 CFR part 74.

(b) *Library resources*—(1) *Provision of services.* The grantee shall modify and increase its library resources to provide supportive services to other health-sciences informational activities.

(2) *Access to and fees for services.* The grantee shall provide free loan services to qualified users or, in lieu of loans, make available photoduplicated or facsimile copies of biomedical materials which qualified requesters may retain. Reasonable fees may be charged for copies or other services (other than free loan services) provided by a grantee under this subpart: *Provided,* That equal access to the health-information resources of the region or of the national network is assured. These fees shall be designed to recover expenses. The grantee's access policies shall determine the qualifications of individuals or organizations for access to the services provided under the grant, so long as those policies are consistent with the mandatory service undertakings of the program. The Secretary may review the grantee's access policies to assure compliance with this requirement.

(Approved by the Office of Management and Budget—Control Number 0925–0276)

§ 59a.17 Other HHS regulations that apply.

Several other regulations apply to grants under this subpart. These include, but are not necessarily limited to:

42 CFR part 50, subpart A—Responsibilities of PHS awardee and applicant institutions for dealing with and reporting possible misconduct in science
42 CFR part 50, subpart D—Public Health Service grant appeals procedure
45 CFR parts 6 and 8—Inventions and patents
45 CFR part 16—Procedures of the Departmental Grant Appeals Board
45 CFR part 74—Administration of grants
45 CFR part 75—Informal grant appeals procedures
45 CFR part 76, subparts A–F—Governmentwide debarment and suspension (nonprocurement) and requirements for drug-free workplace (grants)
45 CFR part 80—Nondiscrimination under programs receiving Federal assistance through the Department of Health and Human Services—effectuation of title VI of the Civil Rights Act of 1964
45 CFR part 81—Practice and procedure for hearings under part 80 of this title
45 CFR part 84—Nondiscrimination on the basis of handicap in programs and activities receiving or benefiting from Federal financial assistance
45 CFR part 86—Nondiscrimination on the basis of sex in education programs and activities receiving or benefiting from Federal financial assistance
45 CFR part 91—Nondiscrimination on the basis of age in HHS programs or activities receiving Federal financial assistance
45 CFR part 92—Uniform administrative requirements for grants and cooperative agreements to state and local governments

PART 64—NATIONAL LIBRARY OF MEDICINE TRAINING GRANTS

Sec.
64.1 Programs to which these regulations apply.
64.2 Definitions.
64.3 Who is eligible for a grant?
64.4 How to apply for a grant.
64.5 How are grant applications evaluated?
64.6 Awards.
64.7 What other conditions apply?
64.8 How may funds be used?
64.9 Other HHS regulations that apply.

Authority: 42 U.S.C. 216, 286b–3.

§ 64.1 Programs to which these regulations apply.

(a) The regulations of this part apply to grants under section 472 of the Public Health Service Act (42 U.S.C. 286b–3) to public and private nonprofit institutions to assist in developing, expanding, and improving training programs (excluding training in a biomedical specialty and residency training) in library science and the field of communications of information pertaining to sciences relating to health.

(b) The regulations of this part also apply to cooperative agreements awarded for these purposes. References to "grant(s)" shall include "cooperative agreement(s)."

(c) The regulations of this part do not apply to research training support under the National Research Service Awards Program (see part 66 of this chapter).

§ 64.2 Definitions.

As used in this part:

HHS means the Department of Health and Human Services.

Nonprofit private entity means an agency, organization, institution, or other entity which may not lawfully hold or use any part of its net earnings to the benefit of any private shareholder or individual which does not hold or use its net earnings for that purpose.

Other trainee costs means those costs other than stipends, such as tuition, fees, and trainee travel, which are directly associated with and necessary for the training of individuals receiving stipends and which are incurred within the period of training.

Project director means the single individual named by the grantee in the grant application and approved by the Secretary, who is responsible for the management and conduct of the project.

Project period. See § 64.6(b).

Secretary means the Secretary of Health and Human Services and any other official of HHS to whom the authority involved is delegated.

Stipend means a payment to an individual that is intended to help meet that individual's subsistence expenses during training.

Training grant means an award of funds to an eligible entity for a project authorized under § 64.1(a).

§ 64.3 Who is eligible for a grant?

Except as otherwise prohibited by law, any public or private nonprofit entity is eligible for a training grant.

§ 64.4 How to apply for a grant.

Applications for grants must include the following information:

(a) *Required information on the proposed project.* (1) The nature, duration, and purpose of the training for which the application is filed.

(2) The name and qualifications of the project director and any key personnel responsible for the proposed project.

(3) A description of the facilities, staff, support services, and other organizational resources available to carry out the project.

(4) The intended number of trainees and the minimum qualifications and criteria for their selection.

(5) A description of the plan for evaluating the proposed project.

(6) Other pertinent information the Secretary may require to evaluate the proposed project.

(b) *Required information on costs.* (1) A budget for the proposed project and a justification of the amount of grant funds requested.

(2) If institutional expenses are requested, a separate statement of the amounts requested for personal services, equipment, supplies, or other non-personal services.

(3) If stipend costs are requested, a statement for each grant year of the estimated number of individuals to whom stipends will be provided and the length of time for which the stipend support will be provided. If other trainee costs are requested, they must be separately stated and justified.

(Approved by the Office of Management and Budget—Control Number 0925–0276)

§ 64.5 How are grant applications evaluated?

The Secretary shall evaluate applications through the officers and employees, experts, consultants, or groups engaged by the Secretary for that purpose. The Secretary's evaluation will be for technical merit and shall take into account, among other pertinent factors, the significance of the project, the qualifications and competency of the project director and proposed staff, the adequacy of selection criteria for trainees for the project, the adequacy of the applicant's resources available for the project, and the amount of grant funds necessary for completion of its objectives.

§ 64.6 Awards.

(a) *Criteria.* Within the limits of available funds, the Secretary may award training grants to carry out those projects which:

(1) Are determined by the Secretary to be technically meritorious; and

(2) In the judgment of the Secretary best promote the purpose of the grant program as authorized by section 472 of the Act (42 U.S.C. 286b–3), the regulations of this part (see § 64.1), and address program priorities.

(b) *Project period.* (1) The notice of grant award specifies how long the Secretary intends to support the project without requiring the project to recompete for funds. This period, called the project period, will usually be for one to five years.

(2) Generally, the grant will initially be for one year and subsequent continuation awards will also be for one year at a time. A grantee must submit a separate application to have the support continued for each subsequent year. Decisions regarding continuation awards and the funding level of these awards will be made after consideration of such factors as the grantee's progress and management practices, and the availability of funds. In all cases, continuation awards require a determination by the Secretary that continued funding is in the best interest of the Federal Government.

(3) Neither the approval of any application nor the award of any grant commits or obligates the Federal Government in any way to make any additional, supplemental, continuation, or other award with respect to any approved application or portion of an approved application.

(4) Any balance of federally obligated grant funds remaining unobligated by the grantee at the end of a budget period may be carried forward to the next budget period, for use as prescribed by the Secretary, provided a continuation award is made. If at any time during a budget period it becomes apparent to the Secretary that the amount of Federal funds awarded and available to the grantee for that period, including any unobligated balance carried forward from prior periods, exceeds the grantee's needs for that period, the Secretary may adjust the amounts awarded by withdrawing the excess.

§ 64.7 What other conditions apply?

(a) Grants awarded under this part are subject to the following conditions:

(1) The grantee may not materially change the quality, nature, or duration of the project unless the written approval of the Secretary is obtained prior to the change.

(2) The grantee must submit to the Secretary, in the manner prescribed by the Secretary, the name and other pertinent information regarding each individual who is awarded a stipend under a grant.

(b) The Secretary may impose additional conditions prior to the award of any grant under this part if it is determined by the Secretary that the conditions are necessary to carry out the purpose of the grant.

(Approved by the Office of Management and Budget—Control Number 0925–0276)

§ 64.8 How may funds be used?

A grantee shall expend funds it receives under this part solely in accordance with the approved application and budget, the regulations of this part, the terms and conditions of the grant award, and the applicable cost principles in subpart Q of 45 CFR part 74. The funds may not be expended for:

(a) Compensation for employment or for the performance of personal services by individuals receiving training and instruction; or

(b) Payments to any individual who does not meet the minimum qualifications for training and instruction established by the grantee and approved by the Secretary or who has failed to demonstrate satisfactory participation in the training in accordance with the usual standards and procedures of the grantee.

§ 64.9 Other HHS regulations that apply.

Several other regulations apply to grants under this part. These include, but are not necessarily limited to:

42 CFR part 50, subpart D.	Public Health Service grant appeals procedure.
45 CFR part 16	Procedures of the Departmental Grant Appeals Board.
45 CFR part 74	Administration of grants.
45 CFR part 75	Informal grant appeals procedures.
45 CFR part 78 subparts A–F	Governmentwide debarment and suspension (nonprocurement) and requirements for drug-free workplace (grants).
45 CFR part 80	Nondiscrimination under programs receiving Federal assistance through the Department of Health and Human Services—effectuation of title VI of the Civil Rights Act of 1964.
45 CFR part 81	Practice and procedure for hearings under 45 CFR part 80 of this title.
45 CFR part 86	Nondiscrimination on the basis of handicap in programs and activities receiving or benefiting from Federal financial assistance.
45 CFR part 86	Nondiscrimination on the basis of sex in education programs and activities receiving or benefiting from Federal financial assistance.
45 CFR part 91	Nondiscrimination on the basis of age in HHS programs or activities receiving Federal financial assistance.
45 CFR part 92	Uniform administrative requirements for grants and cooperative agreements to state and local governments.

BILLING CODE 4140–01–M

42 CFR Part 57

RIN 0925–AD36

Grants for Faculty Training Projects in Geriatric Medicine and Dentistry

AGENCY: Public Health Service, HHS.

ACTION: Final regulations.

SUMMARY: This final rule amends the existing regulations governing the program for Grants for Faculty Training Projects in Geriatric Medicine and Dentistry authorized by section 789(b) of the Public Health Service Act (the Act) to clarify the definition of "fellowship program" and to revise a project requirement to provide a waiver provision of the number of entering fellows enrolled in each training program. The program supports projects which provide training for physicians and dentists who plan to teach geriatric medicine or geriatric dentistry.

DATES: This final rule is effective June 26, 1991.

FOR FURTHER INFORMATION CONTACT: Marc L. Rivo, M.D., M.P.H., Director, Division of Medicine, Bureau of Health Professions, Health Resources and Services Administration, room 4C–25, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857; telephone: 301–443–6190.

SUPPLEMENTARY INFORMATION: On September 12, 1990, the Assistant Secretary for Health, with the approval of the Secretary of Health and Human Services, published in the **Federal Register** (55 FR 37476) final regulations governing programs administered under section 789(b) of the Act. Grants are awarded to accredited public or private nonprofit schools of medicine or osteopathic medicine, teaching hospitals and graduate medical education programs to provide support for projects to train physicians and dentists who plan to teach geriatric medicine or geriatric dentistry. Programs supported by these grants will emphasize the principles of primary care as demonstrated through continuity, ambulatory, preventive, and psychosocial aspects of the practice of geriatric medicine and dentistry. Grant funds may be requested for support of a 1-year retraining program in geriatrics and/or a 1-year or 2-year fellowship program in internal medicine or family medicine with emphasis in geriatrics.

The Department intends to clarify the level of prerequisite training requirements for physicians and dentists who wish to participate in a fellowship program. The statutory requirement for physicians is completion of a graduate medical education program in internal medicine, family medicine, psychiatry, neurology, gynecology, or rehabilitation medicine and, for dentists, completion of a postdoctoral dental education program. In § 57.4102 Definitions, the term "fellowship program" states, after paragraph (2) in the concluding text of the section, that "The minimal acceptable level of postdoctoral preparation for allopathic medical primary care disciplines is 3 years of formal training or board certification, and, for dentists, completion of at least 1 year of formal training in a postdoctoral dental education program." This could lead to some confusion since graduate medical education programs in psychiatry, neurology, gynecology, and rehabilitation medicine are more than 3 years in length and postdoctoral dental education programs can be more than 1 year in duration. Dental residents participating in these programs do not satisfy the statutory requirement after 1 year of training but rather after completion of the training program. Therefore, the Department is amending the definition of "fellowship program" by deleting the concluding text of the section.

The second amendment is to ease a restriction in paragraph (j), of § 57.4105 Project requirements. The current provision states that—

> Effective in the second year of grant support, a minimum of three entering fellows, including at least one physician and one dentist, must be enrolled in each training program for which grant support is received.

VOL
56
ISS
123
JE
26
1991
UMI

A new sentence is added to paragraph (j) to incorporate a waiver provision to read as follows:

The Secretary may suspend this requirement if the Secretary determines that a grantee has made a good faith effort to comply with the requirement and has met the other requirements stated in this section but is unable to have the required number of fellows in the program due to circumstances beyond its control.

The Department has found that the pool of applicants interested in pursuing fellowship training in geriatric medicine or geriatric dentistry is limited, making recruitment of well-qualified and interested physicians and dentists difficult. Therefore, a waiver provision has been added to allow for greater flexibility in the administration of this grant program. Grantees are to demonstrate that they have made a good faith effort to comply with this requirement through the various recruitment endeavors available in their institutions and at the national level.

Justification for Omitting Notice of Proposed Rulemaking

The first amendment described above is merely a clarification of the definition of "fellowship program," and does not substantially change the regulations. The second change will afford greater flexibility to both the Secretary and potential grantees in the administration of the grant program, in recognition of the difficulty faced by these training programs in recruiting qualified physicians and dentists. Accordingly, the Secretary has determined, pursuant to 5 U.S.C. 553, that it would be unnecessary and contrary to the public interest to obtain public comment on these amendments or to delay their effective date.

Paperwork Reduction Act of 1980

These amendments do not affect the recordkeeping or reporting requirements in the existing regulations for the Grants for Faculty Training Projects in Geriatric Medicine and Dentistry. However, for §§ 57.4110, 57.4112, and 57.4115, the Department is revising the parenthetical statement at the end of the section text to reflect a change in the OMB approval number.

List of Subjects in 42 CFR Part 57

Dental health, Education of the disadvantaged, Educational facilities, Educational study programs, Emergency medical services, Grant programs—education, Grant programs—health, Health facilities, Health professions, Loan programs—health, Medical and dental schools, Student aid.

(*Catalog of Federal Domestic Assistance, No. 93.158*, Grants for Faculty Training Projects in Geriatric Medicine and Dentistry)

Dated: March 22, 1991.

James O. Mason,

Assistant Secretary for Health.

Approved: June 7, 1991.

Louis W. Sullivan,

Secretary.

Accordingly, 42 CFR part 57, subpart PP is amended as set forth below:

PART 57—GRANTS FOR CONSTRUCTION OF TEACHING FACILITIES, EDUCATIONAL IMPROVEMENTS, SCHOLARSHIPS AND STUDENT LOANS

Subpart PP—Grants for Faculty Training Projects in Geriatric Medicine and Dentistry

1. The authority citation for 42 CFR part 57, subpart PP continues to read as follows:

Authority: Sec. 215 of the Public Health Service Act, 58 Stat. 690, 67 Stat. 631 (42 U.S.C. 216); sec. 789(b) of the Public Health Service Act, as amended by Pub. L. 100-607, 102 Stat. 3136-3138 (42 U.S.C. 295g-9(b)).

§ 57.4102 [Amended]

2. Section 57.4102 is amended by revising the word "retaining" to read "retraining" in the definition of "Fellow"; and by removing the concluding text following paragraph (2) in the definition of "Fellowship program".

3. Section 57.4105 is amended by revising paragraph (j) to read as follows:

§ 57.4105 Project requirements.

* * * * *

(j) Effective in the second year of grant support, a minimum of three entering fellows, including at least one physician and one dentist, must be enrolled in each training program for which grant support is received. The Secretary may suspend this requirement if the Secretary determines that a grantee has made a good faith effort to comply with this requirement through the various recruitment means available in its institution and at the national level, and has met the other requirements stated in this section but is unable to have the required number of fellows in the program due to circumstances beyond its control.

§ 57.4106 [Amended]

4. Section 57.4106 is amended by revising the word "promoted" to read "promote" in the introductory text of paragraph (a).

5. Section 57.4110 is amended by revising the parenthetical statement at the end of the section text to read as follows:

§ 57.4110 What are the requirements for fellowships and the appointment of fellows?

* * * * *

(Approved by the Office of Management and Budget under control number 0915-0060)

6. Section 57.4112 is amended by revising the parenthetical statement at the end of the section text to read as follows:

§ 57.4112 Termination of fellowships.

* * * * *

(Approved by the Office of Management and Budget under control number 0915-0060)

7. Section 57.4115 is amended by revising the parenthetical statement at the end of the section text to read as follows:

§ 57.4115 What other audit and inspection requirements apply to grantees?

* * * * *

(Approved by the Office of Management and Budget under control number 0915-0060)

Proposed Rules

Federal Register

Vol. 56, No. 123

Wednesday, June 26, 1991

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 928

[Docket No. FV-91-292PR]

Expenses and Assessment Rate for the Marketing Order Covering Papayas Grown in Hawaii

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule would authorize expenditures and establish an assessment rate for the 1991-92 fiscal year (July 1-June 30) under Marketing Order No. 928. The proposed expenditures and assessment rate are needed by the Papaya Administrative Committee (PAC) established under this order to pay its expenses and collect assessments from handlers to pay those expenses. The proposed action would enable the PAC to perform its duties and the marketing order to operate.

DATES: Comments must be received by July 8, 1991.

ADDRESSES: Interested persons are invited to submit written comments concerning this rule to: Docket Clerk, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, room 2525-S, Washington, DC 20090-6456. Three copies of all written material shall be submitted, and they will be made available for public inspection in the office of the Docket Clerk during regular business hours. All comments should reference the docket number, date, and page number of this issue of the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Gary D. Rasmussen, Marketing Specialist, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, room 2525-S, Washington, DC 20090-6456; telephone: (202) 475-3918.

SUPPLEMENTARY INFORMATION: This proposed rule is issued under Marketing Agreement and Marketing Order No. 928 (7 CFR part 928) regulating the handling of papayas grown in Hawaii. The agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), hereinafter referred to as the Act.

This rule has been reviewed by the U.S. Department of Agriculture (Department) in accordance with Departmental Regulation 1512-1 and the criteria contained in Executive Order 12291 and has been determined to be a "non-major" rule.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this proposed rule on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are about 120 handlers of Hawaiian papayas subject to regulation under the marketing order covering papayas grown in Hawaii and about 345 papaya producers in Hawaii. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.2) as those having annual receipts of less than $500,000, and small agricultural services firms are defined as those whose annual receipts are less than $3,500,000. The majority of the handlers and producers may be classified as small entities.

This marketing order, administered by the Department, requires that the assessment rate for a particular fiscal year shall apply to all assessable papayas handled from the beginning of such year. An annual budget of expenses is prepared by the PAC and submitted to the Department for approval. PAC members are handlers and producers of Hawaiian papayas. They are familiar with the PAC's needs and with the costs for goods, services, and personnel in their local areas and are thus in a position to formulate appropriate budgets. The budgets are formulated and discussed in public meetings. Thus, all directly affected persons have an opportunity to participate and provide input.

The assessment rate recommended by the PAC is derived by dividing anticipated expenses by the expected pounds of assessable papayas shipped. Because that rate is applied to actual shipments, it must be established at a rate which will produce sufficient income to pay the PAC's expected expenses. The annual budget and assessment rate are usually acted upon by the PAC shortly before a season starts, and expenses are incurred on a continuous basis. Therefore, budget and assessment rate approvals must be expedited so that the PAC will have funds to pay its expenses.

The PAC met on May 2, 1991, and recommended a 1991-92 budget with expenditures of $746,650 and an assessment rate of $0.0085 per pound of assessable papayas shipped. The vote on the 1991-92 budget was nine in favor and two opposed. The two members who voted against the proposal did so because they wanted a lower budget and assessment rate.

The 1991-92 budget of $746,650 is generally similar in size and scope to the 1990-91 approved budget of $827,837, except for reductions of $50,000 research and $20,000 in travel. The 1991-92 assessment rate was $0.0065.

The proposed 1991-92 budget contains $336,650 for program administration, $400,000 for advertising and promotion, and $10,000 for research and development. Budgeted expenditures for 1990-91 were $367,837 for program administration, $400,000 for advertising and promotion, and $60,000 for research and development. The 1991-92 advertising, promotion, and research projects will be submitted for approval as soon as the 1991-92 budget is approved.

PAC income for 1991-92 is expected to amount to $746,650. Assessment income is estimated at $467,500, based on projected shipments of 55,000,000 pounds of assessable papayas. Other income includes $200,000 in promotional grants from the Hawaii Department of Agriculture, $63,360 from the USDA's Foreign Agricultural Service, $7,600 from the Japan Inspection Program, and $10,000 from miscellaneous sources including interest. Projected 1991-92

VOL
56
ISS
123
JE
26
1991
UMI

income over expenses ($2,010) would be placed in the PAC's operating reserve. The operating reserve, which is projected to amount to $49,235 on July 1, 1991, is well within the amount authorized under the marketing order.

While this proposed action would impose some additional costs on handlers, the costs are in the form of uniform assessments on all handlers. Some of the additional costs may be passed on to producers. However, these costs would be significantly offset by the benefits derived from the operation of the marketing order. Therefore, the Administrator of the AMS has determined that this action would not have a significant economic impact on a substantial number of small entities.

A comment period of 10 days is deemed appropriate for this action, because approval of the expenses and assessments rates may be expedited. This marketing order's fiscal begins on July 1, 1991, and the PAC needs sufficient funds to pay its expenses which are incurred on a continuous basis.

List of Subjects in 7 CFR Part 928

Marketing agreements, Papayas, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, it is proposed that 7 CFR part 928 be amended as follows:

PART 928—PAPAYAS GROWN IN HAWAII

1. The authority citation for 7 part 928 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. New § 928.221 is added to read as follows:

§ 928.221 Expenses and assessment rate.

Expenses of $746,650 by the Papaya Administrative Committee are authorized, and an assessment rate of $0.0085 per pound of assessable papayas is established for the fiscal year ending June 30, 1992. Any unexpended funds from the 1991–92 fiscal year may be carried over as a reserve.

Dated: June 20, 1991.

William J. Doyle,

Associate Deputy Director, Fruit and Vegetable Division.

[FR Doc. 91–15192 Filed 6–25–91; 8:45 am]

BILLING CODE 3410–02–M

7 CFR Part 948

[Docket No. FV–91–293]

Irish Potatoes Grown in Colorado; Expenses and Assessment Rate

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule would authorize expenditures and establish an assessment rate under Marketing Order No. 948 for the 1991–92 fiscal period. Authorization of this budget would permit the Colorado Potato Administrative Committee, San Luis Valley Office (Area 2) (committee) to incur expenses that are reasonable and necessary to administer the program. Funds to administer this program are derived from assessments on handlers.

DATES: Comments must be received by July 8, 1991.

ADDRESSES: Interested persons are invited to submit written comments concerning this proposal. Comments must be sent in triplicate to the Docket Clerk, Fruit and Vegetable Division, AMS, USDA, Post Office Box 96456, room 2525–S, Washington, DC 20090–6456. Comments should reference the docket number and the date and page number of this issue of the Federal Register and will be available for public inspection in the Office of the Docket Clerk during regular business hours.

FOR FURTHER INFORMATION CONTACT: Robert F. Matthews, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, Post Office Box 96456, room 2525–S, Washington, DC 20090–6456, telephone 202–447–2431.

SUPPLEMENTARY INFORMATION: This rule is proposed under Marketing Agreement No. 97 and Order No.948, both as amended (7 CFR part 948), regulating the handling of Irish potatoes grown in Colorado. The marketing agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the Act.

This rule has been reviewed by the Department in accordance with Departmental Regulation 1512–1 and the criteria contained in Executive Order 12291 and has been determined to be a "non-major" rule.

Pursuant to the requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this proposed rule on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be anduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and the rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 68 handlers and approximately 265 producers of potatoes in Colorado Area 2. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.2) as those having annual receipts of less than $500,000, and small agricultural service firms are defined as those whose annual receipts are less than $3,500,000. The majority of Colorado Area 2 potato producers and handlers may be classified as small entities.

The committee unanimously voted at its May 16, 1991, meeting to recommend its 1991–92 budget and assessment rate to the Secretary of Agriculture for consideration.

The committee, which is the agency responsible for local administration of the order, consists of producers and handlers of Colorado Area 2 potatoes. These producers and handlers are familiar with the committee's needs and with the costs of goods and services in their local area and are in a position to formulate an appropriate budget. The budget was formulated and discussed at a public meeting. Thus, all directly affected persons have had an opportunity to participate and provide input.

The recommended assessment rate was derived by dividing anticipated expenses by expected shipments of fresh Colorado Area 2 potatoes. Because that rate will be applied to actual shipments, it must be established at a rate that will provide sufficient income to pay the committee's expenses. A recommended budget and rate of assessment is usually acted upon before the season starts, and expenses are incurred on a continuous basis.

The recommended budget for the 1991–92 fiscal year of $54,270 is $3,505 more than the previous year due to increases in salaries, employees' benefits, and office expenses. In Colorado, both a State and Federal marketing order operate simultaneously. The State order authorizes promotion, including paid advertising, which the Federal order does not. Administrative expenses that are shared are divided so that 50 percent is paid under the State and 50 percent under the Federal order

All promotion and advertising expenses are financed under the State order.

The 1990–91 recommended assessment rate of $0.004 per hundredweight of potatoes is the same as last year. This rate, when applied to anticipated fresh market shipments of 12,000,000 hundredweight, would yield $48,000 in assessment revenue. An additional $6,270 from the committee's authorized reserve would result in total funds of $54,270, which would be adequate to cover budgeted expenses. The projected reserve for the end of the 1991–92 fiscal period is estimated at $38,700, which would be carried over into the next fiscal year. This amount is within the maximum permitted by the order of two fiscal years' expenses.

While this action would impose some additional costs on handlers, the costs are in the form of uniform assessments on all handlers. Some of the additional costs may be passed on to producers. However, these costs would be offset by the benefits derived by the operation of the order. Therefore, the Administrator of the AMS has determined that this proposed action would not have a significant economic impact on a substantial number of small entities.

This action should be expedited because the committee needs to have sufficient funds to pay its expenses. The 1991–92 fiscal period for the program begins on September 1, 1991, and the marketing order requires that the rate of assessment for the fiscal period apply to all assessable Colorado Area 2 potatoes handled during the fiscal period. In addition, handlers are aware of this action which was recommended by the committee at a public meeting. Therefore, it is found and determined that a comment period of 10 days is appropriate becuase the budget and assessment rate approval for this program needs to be expedited. The committee needs to have sufficient funds to pay its expenses, which are incurred on a continuous basis. All written comments timely received will be considered before a final determination is made on this matter.

List of Subjects in 7 CFR Part 948

Marketing agreements, Potatoes, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, it is proposed that 7 CFR part 948 be amended as follows:

PART 948—IRISH POTATOES GROWN IN COLORADO

1. The authority citation for 7 CFR part 948 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. A new § 948.207 is added to read as follows:

§ 948.207 Expenses and assessment rate.

Expenses of $54,270 by the Colorado Potato Administrative Committee, San Luis Valley Office (Area 2) are authorized, and an assessment rate of $0.004 per hundredweight of assessable potatoes is established for the fiscal period ending August 31,1992. Unexpended funds may be carried over as a reserve.

Dated: June 20, 1991.

William J. Doyle.

Associate Deputy Director, Fruit and Vegetable Division.

[FR Doc. 91–15191 Filed 6–25–91; 8:45 am]

BILLING CODE 3410–02–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 90–ASW–48]

Airworthiness Directives; Bell Helicopter Textron Inc. (BHT) Model 206A, 206B, 206BIII, 206L, 206L–1 and 206L–3 Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to adopt an airworthiness directive (AD) that would require the removal from service and replacement of certain main transmission sungears and mating spur gears on certain BHT Model 206 series helicopters. The proposed AD is needed to prevent premature wear of the sungear teeth and mating parts which, if uncorrected, could result in transmission failure and loss of control of the helicopter.

DATES: Comments must be received on or before August 12, 1991.

ADDRESSES: Comments on the proposal may be mailed in duplicate to: Rules Docket, Office of the Assistant Chief Counsel, FAA, Fort Worth, Texas 76193–0007, Docket Number 90–ASW–48, or delivered in duplicate to room 158 of the Rules Docket, 4400 Blue Mound Road, Building 3B, Fort Worth, Texas. Comments delivered must be marked: Docket No. 90–ASW–48. Comments may be inspected at the above location in room 158, Building 3B, between 8 a.m. and 4 p.m., weekdays, except Federal holidays.

The applicable service bulletin may be obtained from Bell Helicopter Textron, Inc., P.O. Box 482, Forth Worth, Texas 76101, or may be examined in the Rules Docket.

FOR FURTHER INFORMATION CONTACT: Mr. Donovan C. Duncan, Rotorcraft Directorate, Rotorcraft Certification Office, ASW–170, FAA, Southwest Region, Fort Worth, Texas 76193–0170, telephone (817) 624–5315.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments will be considered by the FAA before taking action on the proposed rule. The proposal contained in this notice may be changed in light of comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket, Office of the Assistant Chief Counsel, 4400 Blue Mound Road, room 158, Building 3B, Fort Worth, Texas, for examination by interested persons. A report summarizing each FAA-public contact, concerned with the substance of the proposed AD, will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: Comments to Docket Number 90–ASW–48. The postcard will be date/time stamped and returned to the commenter.

The FAA has received a report that manufacturing discrepancies exist on certain main transmission sungears, part number (P/N) 206–040–662–101, used on Bell Model 206A, 206B, 206BIII, 206L, 206L–1 and 206L–3 helicopters. The discrepancies are attributed to the insufficient tooth tip relief or improper tooth profile of the sun gear during machining. These parts were inadvertently delivered as serviceable parts. The discrepancies could result in the premature wear of the sungear teeth and the mating spur gears, potentially reducing the service life and resulting in premature failure of the transmission. Since this condition is likely to exist on

VOL 56 ISS 123 JE 26 1991 UMI

other helicopters of the same type design, the proposed AD would require the removal and replacement of these sungears and certain mating parts on Bell Model 206A, 206B, 206BIII, 206L, 206L–1 and 206L–3 helicopters.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this proposed regulation involves 31 helicopters at a cost of approximately $3,430 per helicopter for a total fleet cost of $106,330. No additional costs will be incurred by the owner/operator as the AD will be carried out in conjunction with the scheduled sungear inspection. Therefore, I certify that this action: (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal; and (4) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—[Amended]

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new AD:

Bell Helicopter Textron, Inc. (BHTI): Docket No. 90–ASW–48.

Applicability: All Bell Model 206A, 206B, 206L, 206L–1 and 206L–3 helicopters, certificated in any category.

Compliance: Required as indicated, unless already accomplished.

To prevent premature wear of the sungear and mating spur gears which could result in transmission failure, accomplish the following:

(a) At the next inspection interval for the main transmission sungear, P/N 206–040–662–101, but no later than 1,500 hours' time in service after the effective date of this AD, remove and replace sungears which have the following serial numbers: SD–0005, SD–0010, SD–0020, SD–0022, SD–0023, SD–0024, SD–0025, SD–0026, SD–0027, SD–0031, SD–0033, SD–0034, SD–0035, SD–0036, SD–0037, SD–0039, SD–0040, SD–0043, SD–0044, SD–0046, SD–0054, SD–0055, SD–0057, SD–0060, SD–0062, SD–0065, SD–0066, SD–0067, SD–0068, SD–0069, SD–0071.

(b) In conjunction with (a), inspect the pinion spur gears which mate with the above listed sungears for micro pitting or hardlines in the gear teeth due to the insufficient tip relief or improper tooth profile of the sungear. Determine if wear or damage is within specified limits according to the applicable BHTI maintenance, repair and overhaul manuals.

(c) If the wear or damage exceeds the specified limits, remove and replace the affected spur gears with serviceable parts before further flight.

(d) An alternate method of compliance or adjustment of the compliance times which provides an acceptable level of safety may be used if approved by the Manager, Rotorcraft Certification Office, ASW–170, Rotorcraft Directorate, FAA, Fort Worth, Texas.

(e) Bell Helicopter Textron, Inc., Alert Service Bulletins No. 206–90–56, Rev. A, dated 1/15/91 or 206L–90–69, Rev. A, dated 1/15/91, as applicable, provide an acceptable, alternate means of compliance with this AD.

Issued in Forth Worth, Texas, on June 4, 1991.

Elizabeth Yoest,

Acting Manager, Rotorcraft Directorate, Aircraft Certification Service.

[FR Doc. 91–15153 Filed 6–25–91; 8:45 am]

BILLING CODE 4910–13–M

14 CFR Part 39

[Docket No. 91–CE–35–AD]

Airworthiness Directives; Eiravion Models PIK–20 and PIK–20B Sailplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to adopt a new airworthiness directive (AD) that would be applicable to Eiravion Models PIK–20 and PIK–20B sailplanes that are equipped with lead mass balance strips on the flaps and ailerons. This proposed action would require inspections of the lead mass balance strips on the flaps and ailerons for cracks, and replacement if cracks are found. The flap mass balance weight cracked on two of the affected sailplanes and separated from one of the affected sailplanes, which caused in-flight aileron control system restrictions. The actions specified in this proposed AD are intended to prevent loss of control of the sailplane because of interference to the ailerons.

DATES: Comments must be received on or before August 23, 1991.

ADDRESSES: Information that is related to this AD may be examined at the Rules Docket at the address below. Send comments on the proposal in triplicate to the FAA, Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 91–CE–35–AD, room 1558, 601 E. 12th Street, Kansas City, Missouri 64106. Comments may be inspected at this location between 8 a.m. and 4 p.m., Monday through Friday, holidays excepted.

FOR FURTHER INFORMATION CONTACT: Mr. Carl F. Mittag, Program Manager, Brussels Aircraft Certification Staff, Europe, Africa, Middle East office, FAA, c/o American Embassy, 1000 Brussels, Belgium; Telephone 322.513.38.30 extension 2710; or Mr. Herman Belderok, Project Officer, Small Airplane Directorate, Aircraft Certification Service, FAA, 601 E. 12th Street, Kansas City, Missouri 64106; Telephone (816) 426–6932; Facsimile (816) 426–2169.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 91–CE–35–AD, room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

Discussion

The National Board of Aviation (NBA), which is the airworthiness authority for Finland, recently notified the FAA that an unsafe condition may exist on Eiravion Models PIK–20 and PIK–20B sailplanes that are equipped with lead mass balance strips on the flaps and ailerons. The NBA advises that the flap mass balance weight cracked on two of the affected sailplanes, and separated from one, which caused in-flight aileron control system restrictions. The NBA issued Finnish AD M 1479/87, Revision 1, in order to assure the airworthiness of these sailplanes in Finland. The sailplanes are manufactured in Finland and are type certificated for operation in the United States. Pursuant to a bilateral airworthiness agreement, the NBA has kept the FAA totally informed of the above situation.

The FAA has examined the findings of the NBA, reviewed all available information and determined that AD action is necessary for products of this type design that are certificated for operation in the United States. Since this condition could exist or develop in other Eiravion Models PIK–20 and PIK–20B sailplanes of the same type design that are equipped with lead mass balance strips on the flaps and ailerons, the proposed AD would require inspections of the lead mass balance strips on the flaps and ailerons for cracks, and replacement if cracks are found.

It is estimated that 61 sailplanes in the U.S. registry would be affected by this proposed AD, that it will take approximately 4 hours per sailplane to accomplish the proposed action, and that the average labor rate is approximately $55 an hour. Based on these figures, the total cost impact of the proposed AD on U.S. operators is estimated to be $13,420.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action has been placed in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption "ADDRESSES".

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new AD:

Eiravion: Docket No. 91–CE–35–AD.

Applicability: Models PIK–20 and PIK–20B sailplanes (all serial numbers) that are equipped with lead mass balance strips on the flaps and ailerons, certificated in any category.

Compliance: Required within the next 25 hours time-in-service (TIS), unless already accomplished, and thereafter at intervals not to exceed 500 hours TIS.

To prevent interference to the ailerons that could result in loss of control of the sailplane, accomplish the following:

(a) Remove the flaps and ailerons and inspect the lead mass balance strips for cracks using a 10-power magnifying glass.

Note 1: Particular attention should be given to the attachment rivets during the inspections specified in paragraph (a) of this AD.

Note 2: If the sailplane is not equipped with mass balance strips on the flaps and ailerons, no further action is required by this AD.

(b) If cracking is detected in accordance with the inspections required by paragraph (a) of this AD, prior to further flight, fabricate and replace the mass balance strips in accordance with the following:

(1) Utilize strips made of malleable lead (not brittle or granular) that are the same weight and length.

(2) Attach the strips at the same rivet holes as the cracked one and bond the lead in place with epoxy resin.

(3) Keep the counter bore holes to the minimum depth in accordance with the applicable service manual.

(4) Install washers to the rivets on the glass-reinforced plastic face.

(5) Do not increase the diameter of any rivet.

(6) Ensure that the final mass balance of each flap and aileron complies with the applicable service manual.

(c) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the sailplane to a location where the requirements of this AD can be accomplished.

(d) An alternative method of compliance or adjustment of the initial or repetitive compliance times that provides an equivalent level of safety may be approved by the Manager, Brussels Aircraft Certification Staff, Europe, Africa, Middle East office, FAA, c/o American Embassy, 1000 Brussels, Belgium. The request should be forwarded through an FAA Maintenance Inspector, who may add comments and then send it to the Manager, Brussels Aircraft Certification Staff.

(e) All persons affected by this directive may obtain copies of information that is related to this AD upon request to the FAA, Central Region, Office of the Assistant Chief Counsel, room 1558, 601 E. 12th Street, Kansas City, Missouri 64106. Issued in Kansas City, Missouri, on June 4, 1991.

Don C. Jacobsen,

Acting Manager, Small Airplane Directorate, Aircraft Certificate Service.

[FR Doc. 91–15157 Filed 6–25–91; 8:45 am]

BILLING CODE 4910–13–M

14 CFR Part 39

[Docket No. 91–ASW–11]

Airworthiness Directives; Schweizer Aircraft Corporation (Hughes Helicopters, Inc.) Model 269A, 269A–1, 269B(Including Military Model TH–55A) Series Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to supersede an existing airworthiness directive (AD) applicable to Schweizer Aircraft Corporation (Hughes Helicopters, Inc.) Model 269A, 269A–1, 269B (including military TH–55A) helicopters, which currently requires a one-time dye penetrant inspection and repetitive visual inspections of the tailboom center attachment (saddle) fitting for cracks, corrosion, fretting, or looseness. This notice proposes

VOL 56 ISS 123 JE 26 1991 UMI

retaining the present initial and repetitive visual inspections but would adopt new repetitive dye penetrant inspections. The proposed AD is needed to prevent fatigue failure of the tailboom center attachment (saddle) fitting which, in turn, could cause loss of the tailboom, and subsequent loss of control of the helicopter.

DATES: Comments must be received on or before August 12, 1991.

ADDRESSES: Comments on the proposal may be mailed in duplicate to: Rules Docket, Office of the Assistant Chief Counsel, FAA, 4400 Blue Mound Road, Fort Worth, Texas 76193-0007, Docket No. 91-ASW-11, or delivered in duplicate to Building 3B, room 158, of the Rules Docket, 4400 Blue Mound Road, Fort Worth, Texas. Comments must be marked: Docket No. 91-ASW-11. Comments may be inspected at the above location in building 3B, room 158, between 8 a.m. and 4:30 p.m. except Federal holidays.

The applicable service information may be obtained from: Schweizer Aircraft Corporation, P.O. Box 147, Elmira, New York 14902, or may be examined in the Rules Docket.

FOR FURTHER INFORMATION CONTACT: Mr. Anthony Socias, Aerospace Engineer, FAA, New York Aircraft Certification Office, Airframe Branch, ANE-172, New England Region, 181 S. Franklin Avenue, Valley Stream, New York 11581; telephone (516) 791-6220.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the FAA before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, and the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact, concerned with the substance of this proposal, will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 91-ASW-11". The postcard will be date/time stamped and returned to the commenter.

On February 25, 1980, the FAA issued AD 80-05-05, Amendment 39-3707 (45 FR 14540, March 6, 1980), to require within 25 hours time in service a one time dye penetrant inspection for cracks on the tailboom center attachment (saddle) magnesium fittings, part number (P/N) 269A2324-7, and a 100-hour interval repetitive visual inspection for cracks, corrosion, gretting, and looseness of the attachment fitting. Fittings with improper lug thickness were also required to be removed from service as prescribed. That action was prompted by reports of cracking of the tailboom fitting and fretting corrosion between the tailboom assembly and the center attachment fitting.

Since issuance of that AD, the manufacturer has received additional reports of cracking of the tailboom center attachment fitting which indicate that timely detection of cracks solely by visual inspections is not assured. The manufacturer recommends the addition of a repetitive dye penetrant inspection to maintain the airworthiness of the fitting installation instead of relying solely on the repetitive visual inspection presently prescribed. As a consequence, the FAA approved Schweizer Aircraft Corporation, Service Bulletin B-238, dated October 8, 1990, which provides inspection procedures for an initial dye penetrant inspection and repetitive visual and dye penetrant inspection for cracks of the tailboom center attachment magnesium fitting, P/N 269A2324-7, installed on Model 269A, 269A-1, 269B, and military Model TH-55A helicopters. Since the condition described is likely to exist or develop on other helicopters of the same type design, a new AD is proposed which would supersede AD 80-05-05, Amendment 39-3707 (45 FR 14540, March 6, 1,980). The proposal would retain the initial dye penetrant inspection for cracks of the tailboom center attachment magnesium fitting and would also retain the fitting and tailboom visual inspection at 100 hours' time in service intervals. It would, however, add a repetitive dye penetrant inspection of the fitting at 200 hours' time in service intervals. The proposed AD would not apply to tailbooms equipped with aluminum fittings, such as P/N 269A2324-11 or -13. The original design tailboom center attachment fitting, P/N 269A2324 (BSC), and other components, if installed, are subject to mandatory inspections as prescribed in AD 76-18-01, Amendment 38-2707 (41 FR 37093, September 2, 1976).

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels fo government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this proposed regulation involves 512 helicopters of U.S. registry, that it would take approximately 16 manhours per helicopter to accomplish the required actions, and that the average labor cost would be $55 per manhour. Parts are estimated to cost an additional $44,304. The total cost impact of the AD on U.S. operators for inspections and replacement of fittings is estimated to be no more than $551,184 each year. Therefore, I certify that this action: (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); an (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria for the Regulatory Flexibility Act. A copy of the draft evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by removing AD 80-05-05, Amendment 39-3703 (46 FR 14540, March 6, 1980) and adding the following AD:

Schweizer Aircraft Corporation (Hughes Helicopters, Inc.) Docket No. 91-ASW-11.

Applicability: All Models 269A, 269A-1, 269B (including military model TH-55A), series helicopters, certificated in any category.

Compliance: Required as indicated, unless previously accomplished.

To prevent fatigue failure of the magnesium tailboom center attachment (saddle) fittings which could result in loss of the tailboom of the helicopter, accomplish the following:

(a) For helicopters with a magnesium tailboom center attachment fitting, P/N 269A2324-7, perform the following in accordance with the 269 Series Basic Handbook of Maintenance Information, as revised by Temporary Revision No. R-42, dated Octobver 8, 1990 (HMI):

(1) Within 25 hours' time in service after the effective date of this AD, and thereafter at intervals not to exceedd 200 hours' time in service from the last inspection, inspect the magnesium tailboom center attachment fitting using a dye penetrant or equivalent inspection method in accordance with the HMI.

(2) Within 25 hours' time in service after the effective date of this AD, and thereafter at intervals not to exceed 100 hours' time in service from the last inspection, inspect the magnesium tailboom visually using a 10-power or higher magnifying glass, in accordance with the HMI.

(b) If cracks are found in the fitting or the fitting is otherwise unserviceable as a result of the inspections of (a) (1) or (2) above, replace the tailboom center attachment fitting, with a new aluminum fitting, P/N 269A2324-11 (undrilled) or -11T, or -13 as appropriate before further flight, as prescribed by the HMI referenced in paragraph (a).

Note: Schweizer Service Bulletin B-238, dated October 8, 1990, pertains to this AD.

(c) As an option, any uncracked tailboom center magnesium fitting, may be replaced with a new aluminum fitting, P/N 269A2324-11 (undrilled) or -11T or -13, as appropriate. Installation of an aluminum fitting constitutes terminating action for paragraph (a) of this AD.

(d) Aircraft may be ferried in accordance with the provisions of FAR §§ 21.197 and 21.199 to a base where the requirements of this AD can be accomplished.

(e) Alternate inspections, modifications, or other actions which provide an equivalent level of safety may be used when approved by the Manager, New York Aircraft Certification Office, FAA, 181 South Franklin Avenue, room 202, Valley Stream, New York 11581.

Issue in Forth Worth, Texas, on June 4, 1991.

Elizabeth Yoest,

Acting Manager, Rotocraft Directorate, Aircraft Certification Service.

RIN 1219-AA48

Air Quality, Chemical Substances, and Respiratory Protection Standards; Close of Record

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Proposed rule; close of record.

SUMMARY: The Mine Safety and Health Administration (MSHA), is extending the comment period on the Agency's proposed rule revising existing standards for air quality, chemical substances and respiratory protection in mining. This extension will allow the public additional time to examine the comments and the background information on file at the Agency. The record will close on August 20, 1991.

DATES: Comments on the proposed rule must be received on or before August 30, 1991.

ADDRESSES: Send comments to: Mine Safety and Health Administration, Office of Standards, Regulations and Variances, room 631, Ballston Tower No. 3, 4015 Wilson Boulevard, Arlington, Virginia 22203.

FOR FURTHER INFORMATION CONTACT: Patricia W. Silvey, Director, Office of Standards, Regulations and Variances, MSHA (703) 235-1910.

SUPPLEMENTARY INFORMATION: On August 29, 1989, MSHA published a proposed rule to revise its standards for air quality, chemical substances, and respiratory protection for coal, metal, and nonmetal mines (54 FR 35760). The Agency initially scheduled the written comment period for the proposed rule to close on November 27, 1989. On October 19, 1989, MSHA extended the comment period to March 2, 1990 (54 FR 43026) in response to requests from the mining community. On January 25, 1990 (55 FR 2535) the Agency set three separate comment periods for different provisions in the proposals and announced its intent to hold public hearings. The comment period for the first group of provisions closed on March 2, 1990, and hearings were held on June 4 and 7, 1990. The comment period for the second group of provisions closed on June 29, 1990, and hearings were held on October 12 and 18, 1990. The comment period for the third group of provisions closed on December 14, 1990, and hearings were held on March 19, 26, and 27, 1991.

The original date for the close of the record was June 7, 1991 (56 FR 6188). Members of the mining community have requested more time in which to examine comments and background information on file at the Agency. In response, MSHA will now leave the rulemaking record open until August 30, 1991. All comments must be submitted prior to that date.

Dated: June 17, 1991.

Edward C. Hugler,

Deputy Assistant Secretary for Mine Safety and Health.

BILLING CODE 4510-43-M

GENERAL SERVICES ADMINISTRATION

48 CFR Parts 503, 532, 552, and 570

[GSAR Notice 5-313]

General Services Administration Acquisition Regulation; Real Property Leasing Clauses

AGENCY: Office of Acquisition Policy, GSA.

ACTION: Proposed rule.

SUMMARY: This notice invites comments on a proposed change to the General Services Administration Acquisition Regulation (GSAR) (APD 2800.12A), Chapter 5, that would make a number of revisions to the provisions and clauses prescribed for use in contracts for the acquisition of leasehold interests in real property to improve the leasing program. The matrix at 552.370 is updated to reflect changes contained in the provisions and clauses; however, the matrixes are not published in this document and do not appear in the Code of Federal Regulations. Copies may be obtained from the Director of the Office of GSA Acquisition Policy (VP), 18th and F Streets NW., Washington, DC 20405.

DATES: Comments are due in writing on or before July 26, 1991.

ADDRESSES: Comments should be addressed to Marjorie Ashby, Office of GSA Acquisition Policy (VP), 18th & F Streets NW., room 4026, Washington, DC 20405.

FOR FURTHER INFORMATION CONTACT: Ida M. Ustad, Office of GSA Acquisition Policy (202) 501-1224.

SUPPLEMENTARY INFORMATION: The Director, Office of Management and Budget (OMB), by memorandum dated December 14, 1984, exempted certain agency procurement regulations from

Executive Order 12291. The exemption applies to this proposed rule. The proposed revisions regarding the use of various clauses and revisions and the requirements of them are not expected to have a significant impact on a substantial number of small entities as defined under the Regulatory Flexibility Act. The Paperwork Reduction Act does not apply because this rule does not require any reporting requirements or collection information from offerors, contractors, or members of the public that require the approval of OMB under 44 U.S.C. 3501 et seq.

List of Subjects in 48 CFR Parts 503, 532, 552, and 570

Government procurement.

Accordingly, part 503, 532, 552 and 570 are amended to read as follows:

1. The authority citation for 48 CFR parts 503, 532, 552 and 570 continues to read as follows:

Authority: 40 U.S.C. 486(c).

PART 503—IMPROPER BUSINESS PRACTICES AND PERSONAL CONFLICTS OF INTEREST

2. Section 503.104–10 is amended by revising paragraph (a) to read as follows:

503.104–10 Solicitation provisions and contract clauses.

(a) The contracting officer shall insert the provision at 552.203–71, prohibited Conduct, in solicitations for the acquisition of leasehold interests in real property involving 10,000 square feet or more or for more than 6 months.

* * * * *

3. Section 503.404 is amended by revising paragraph (a) to read as follows:

503.404 Solicitation provision and contract clause.

(a) The contracting officer shall insert the provision at 552.203–4, Contingent Fee Representation and Agreement, in solicitations and contracts for the acquisition of leasehold interests in real property involving 10,000 square feet or more or for more than 6 months.

* * * * *

PART 532—CONTRACT FINANCING

4. Section 532.908 is amended by revising paragraph (c) to read as follows:

532.908 Contract clause.

* * * * *

(c) The contracting officer shall insert the clause at 553.232–73, Electronic Funds Transfer Payment, in solicitations and contracts for acquisitions of leasehold interests in real property involving 10,000 square feet or more or for more than 6 months if payment may be made by electronic funds transfer.

PART 552—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

5. Section 552.270–10 is revised to read as follows:

552.270–10 Definitions.

As prescribed in 570.702–1, insert the following clause:

Definitions (XXX 1991)

The following terms and phrases (except as otherwise expressly provided or unless the context otherwise requires) for all purposes of this lease shall have the respective meanings hereinafter specified:

(a) *Commencement Date* means the first day of the term.

(b) *Contract* and *Contractor* means "Lease" and "Lessor", respectively.

(c) *Contracting Officer* means a person with the authority to enter into, administer, and/or terminate contracts and make related determinations and findings. The term includes certain authorized representatives of the Contracting Officer acting within the limits of their authority as delegated by the Contracting Officer.

(d) *Delivery Date* means the date specified in or determined pursuant to the provisions of this lease for delivery of the premises to the Government, improved in accordance with the provisions of this lease and ready for Government occupancy, as such date may be modified in accordance with the provisions of this lease.

(e) *Delivery Time* means the number of days provided by this lease for delivery of the premises to the Government, as such number may be modified in accordance with the provisions of this lease.

(f) *Excusable Delays* means delays arising without the fault or negligence of Lessor and Lessor's subcontractors and suppliers at any tier, and shall include, without limitation, (1) acts of God or of the public enemy, (2) acts of the United States of America in either its sovereign or contractual capacity, (3) acts of another contractor in the performance of a contract with the Government, (4) fires, (5) floods, (6) epidemics, (7) Guarantine restrictions, (8) strikes, (9) freight embargoes, (10) unusually severe weather, or (11) delays of subcontractors or suppliers at any tier arising from unforeseeable causes beyond the control and without the fault or negligence of both the Lessor and any such subcontractor or supplier.

(g) *Lessor* means the sub-lessor if this lease is a sublease.

(h) *Lessor shall provide* means the Lessor shall furnish and install at Lessor's expense.

(i) *Notice* means written notice sent by certified or registered mail, Express Mail or comparable service, or delivered by hand. Notice shall be effective on the date delivery is accepted or refuses.

(j) *Premises* means the space described on the Standard Form 2, U.S. Government Lease for Real Property, of this lease.

(k) *Substantially complete* and *substantial completion* means that the work, the common and other areas of the building, and all other things necessary for the Government's access to the premises and occupancy, possession, use and enjoyment thereof, as provided in this lease, have been completed or obtained, excepting only such minor matters as do not interfere with or materially diminish such access, occupancy, possession, use or enjoyment.

(l) *Work* means all alterations, improvements, modifications, and other things required for the preparation or continued occupancy of the premises by the Government as specified in this lease.

(End of Clause)

6. Section 552.270–11 is retitled and revised to read as follows:

552.270–11 Subletting and assignment.

As prescribed in 570.702–2, insert the following clause:

Subletting and Assignment (XXX 1991)

The Government may sublet any part of the premises but shall not be relieved from any obligations under this lease by reasons of any such subletting. The Government may at any time assign this lease, and be relieved from all obligations to Lessor under this lease excepting only unpaid rent and other liabilities, if any, therefore accrued.

(End of Clause)

7. Section 552.270–12 is retitled and the text of the clause is revised to read as follows:

552.270–12 Maintenance of building and premises—Right of entry.

As prescribed in 570.702–3, insert the following clause:

Maintenance of Building and Premises—Right of Entry (XXX 1991)

Except in case of damage arising out of the willful act or negligence of a Government employee, Lessor shall maintain the premises in good repair and condition so that it is suitable in appearance and capable of supplying such heat, air conditioning, light, ventilation, access and other things to the premises, without reasonably preventable or recurring disruption, as is required for the Government's access to, occupany, possession, use and enjoyment of the premises as provided in this lease. For the purpose of so maintaining the premises, the Lessor may at reasonable times enter the premises with the approval of the authorized Government representative in charge.

(End of Clause)

8. Section 552.270–13 is retitled and revised to read as follows:

552.270–13 Fire and casualty damage.

As prescribed in 570.702–4, insert the following clause:

Fire and Casualty Damage (XXX 1991)

If the premises are destroyed by fire or other casualty, this lease will immediately terminate. In case of partial destruction or damage, so as to render the premises untenantable, as determined by the Government, the Government may terminate the lease by giving written notice to the Lessor within 15 calendar days thereafter; if so terminated, no rent will accrue to the Lessor after such partial destruction or damage; and if not so terminated, the rent will be reduced proportionately by supplemental agreement hereto effective from the date of such partial destruction or damage. Nothing in this lease shall be construed as relieving Lessor from liability for damage to or destruction of property of the United States of America caused by the willful or negligent act or omission of Lessor.

(End of Clause)

552.270–14 [Removed and Reserved]

9. Section 552.270–14 is removed and reserved.

10. Section 552.270–15 is retitled and revised to read as follows:

552.270–15 Compliance with applicable law.

As prescribed in 570.702–6, insert the following clause:

Compliance with Applicable Law (XXX 1991)

Lessor shall comply with all Federal, state and local laws applicable to the Lessor as owner or lessor, or both, of the building or premises, including, without limitation, laws applicable to the construction, ownership, alteration or operation of both or either thereof, and will obtain all necessary permits, licenses and similar items at Lessor's expense. Government will comply with all Federal, state and local laws applicable to and enforceable against it as a tenant under this lease; provided, nothing in this lease shall be construed as a waiver of any sovereign immunity of the Government. This lease shall be governed by Federal law.

(End of Clause)

11. Section 552.270–16 is retitled and revised to read as follows:

552.270–16 Inspection—Right of entry.

As prescribed in 570.702–7, insert the following clause:

Inspection—Right of Entry (XXX 1991)

(a) At any time and from time to time after receipt of an offer (until the same has been duly withdrawn or rejected), after acceptance thereof and during the term, the agents, employees and contractors of the Government may, upon reasonable prior notice to Offeror or Lessor, enter upon the offered premises or the premises, and all other areas of the building access to which is necessary to accomplish the purposes of entry, to determine the potential or actual compliance by the Offeror or Lessor with the requirements of the solicitation or this lease, which purposes shall include, but not be limited to: (1) Inspection, sampling and analysis of suspected asbestos-containing materials; (2) air monitoring for asbestos fibers; (3) inspecting for any leaks, spills, or other potentially hazardous conditions which may involve tenant exposure to hazardous or toxic substances (e.g., PCB's); and (4) inspecting for any current or past hazardous waste operators, to ensure that appropriate mitigative actions were taken to alleviate any environmentally unsound activities in accordance with Federal, State and local law.

(b) Nothing in this clause shall be construed to create a Government duty to inspect for toxic materials or to impose a higher standard of care on the Government. The purpose of this clause is to promote the ease with which the Government may inspect the building. Nothing in this clause shall act to relieve the Lessor of any duty to inspect or liability which might arise as a result of Lessor's failure to inspect for or correct a hazardous condition.

(End of Clause)

12. Section 552.270–17 is revised to read as follows:

552.270–17 Failure in performance.

As prescribed in 570.702–8, insert the following clause:

Failure in Performance (XXX 1991)

The covenant to pay rent and the covenant to provide any service, utility, maintenance, or repair required under this lease are interdependent. In the event of any failure by the Lessor to provide any service, utility, maintenance, repair or replacement required under this lease the Government may, by contract or otherwise, perform the requirement and deduct from any payment or payments under this lease, then or thereafter due, the resulting cost to the Government, including all administrative costs. Should the Government elect to perform any such requirement, the Government and each of its contractors shall be entitled to access to any and all areas of the building, access to which is necessary to perform any such requirement, and the Lessor shall afford and facilitate such access. Alternatively, the Government may so deduct the estimated cost (including administrative costs) to the Government of performing such requirement, as determined by the Contracting Officer. No deduction from rent pursuant to this clause shall constitute a default under this lease. These remedies are not exclusive and are in addition to any other remedies which may be available under this lease or at law.

(End of Clause)

13. Section 552.270–18 is retitled and revised to read as follows:

552.270–18 Successors Bound.

As prescribed in 570.702–9, insert the following clause:

Successors Bound (XXX 1991)

This lease shall bind, and inure to the benefit of, the parties and their respective heirs, executors, administrators, successors and assigns.

(End of Clause)

14. Section 552.270–21 is revised to read as follows:

552.270–21 Changes.

As prescribed in 570.702–12, insert the following clause:

Changes (XXX 1991)

(a) The Contracting Officer may at any time, by written order, make changes within the general scope of this lease in any one or more of the following:

(1) Specifications (including drawings and designs);

(2) Work or services; or

(3) Facilities or space layout.

(b) If any such change causes an increase or decrease in Lessor's cost of or the time required for performance under this lease, whether or not changed by the order, the Contracting Officer shall modify this lease to provide for one or more of the following:

(1) A modification of the delivery date;

(2) An equitable adjustment in the rental rate;

(3) A lump sum equitable adjustment; or

(4) An equitable adjustment of the annual operating costs per square foot specified in this lease.

(c) The Lessor shall submit proposals for adjustment.

(d) Absent such written change order, the Government shall not be liable to Lessor under this clause.

(End of Clause)

552.270–26 [Removed and Reserved]

15. Section 552.270–26 is removed and reserved.

16. Section 552.270–27 is revised to read as follows:

552.270–27 Delivery and Condition.

As prescribed in 570.702–18, insert the following clause:

Delivery and Condition (XXX 1991)

(a) Unless the Government elects to have the space occupied in increments, the space must be delivered ready for occupancy as a complete unit. The Government reserves the right to determine when the space is ready to occupy.

(b) If the premises do not in every respect comply with the provisions of this lease the Contracting Officer may, in accordance with the Failure in Performance clause of this lease, elect to reduce the rent payments.

(End of Clause)

17. Section 552.270–28 is retitled and revised to read as follows:

552.270–28 Default in delivery—Time extensions.

As prescribed in 570.702–19, insert the following clause:

Default in Delivery—Time Extensions (XXX 1991)

(a) With respect to Lessor's obligation to deliver the substantially completed premises by the delivery date (as such date may be modified pursuant to this lease), time is of the essence. If the Lessor fails to prosecute the work with the diligence that will insure its substantial completion by the delivery date or fails to substantially complete the work by such date, the Government may by notice to the Lessor terminate this lease, which termination shall be effective when received

VOL

1991
UMI

by Lessor. The Lessor and the Lessor's sureties, if any, shall be jointly and severally liable for any damages to the Government resulting from such termination, as provided in this clause. The Government shall be entitled to the following damages:

(1) The Government's aggregate rent and estimated real estate tax and operating cost adjustments for the firm term and all option terms of its replacement lease or leases, in excess of the aggregate rent and estimated real estate tax and operating cost adjustments for the term: *Provided*, If the Government procures replacement premises for a term (including all option terms) in excess of the term, the Lessor shall not be liable for excess Government rent or adjustments during such excess part of such term;

(2) All administrative and other costs borne by the Government in procuring a replacement lease or leases;

(3) Such other, additional relief as may be provided for in this lease, at law or in equity.

(4) Damages to which the Government may be entitled under this clause shall be due and payable thirty (30) days next following the date Lessor receives notice from the Contracting Officer specifying such damages.

(b) Delivery by Lessor of less than the minimum square footage required by this lease shall in no event be construed as substantial completion, except as permitted by the Contracting Officer.

(c) Except as provided in paragraph (a) of this clause, this lease shall not be terminated under this clause nor the Lessor charged with damages under this clause, if (1) the delay in substantially completing the work arises from excusable delays and (2) the Lessor within 10 days from the beginning of any such delay (unless extended in writing by the Contracting Officer) provides notice to the Contracting Officer of the causes of delay. The Contracting Officer shall ascertain the facts and the extent of delay. If the facts warrant such action, the delivery date shall be extended, by the Contracting Officer, to the extent of such delay at no additional costs to the Government. A time extension is the sole remedy of the Lessor.

(End of Clause)

552.270-29 [Removed and Reserved]

18. Section 552.270-29 is removed and reserved.

19. Section 552.270-31 is added to read as follows:

552.270-31 Measurement for payment.

As prescribed in 570.702-22, insert the following clause:

Measurement for Payment (XXX 1991)

When space is offered and accepted, the space will be mutualy measured upon delivery. Payment will be made on the basis of actual measurement; however, payment will not be made for delivered space which is in excess of the maximum square footage solicited. The annual rent will be calculated by multiplying the annual square foot rate times square footage.

(End of Clause)

20. Section 552.270-32 is added to read as follows:

552.270-32 Effect of acceptance and occupancy.

As prescribed in 570.702-23, insert the following clause:

Effect of Acceptance and Occupancy (XXX 1991)

Neither the Government's acceptance of the Premises for occupancy, nor the Government's occupancy thereof, shall be construed as a waiver of any requirement of or right of the Government under this Lease, or as otherwise prejudicing the Government with respect to any such requirement or right.

(End of Clause)

21. Section 552.270-33 is added to read as follows:

552.270-33 Default by Lessor during the term.

As prescribed in 570.702-24, insert the following clause:

Default by Lessor During the Term (XXX 1991)

Each of the following shall constitute a default by Lessor under this lease:

(a) Failure to maintain, repair, operate or service the premises as and when specified in this lease, or failure to perform any other requirement of this lease as and when required provided any such failure shall remain uncured for a period of thirty (30) days next following Lessor's receipt of notice thereof from the Contracting Officer;

(b) Repeated and unexcused failure by Lessor to comply with one or more requirements of this lease shall constitute a default notwithstanding that one or all such failures shall have been timely cured pursuant to this clause;

(c) If a default occurs, the Government may, by notice to Lessor, terminate this lease for default and if so terminated, the Goverment shall be entitled to the damages specified in the Default in Delivery Clause.

(End of Clause)

22. Section 552.270-34 is added to read as follows:

552.270-34 Subordination, non-disturbance and attornment.

As perscribed in 570.702-25, insert the following clause:

Subordination, Non-disturbance and Attornment (XXX 1991)

(a) Lessor warrants that it holds such title to or other interest in the premises and other property as is necessary to the Government's access to the premises and full use and enjoyment thereof in accordance with the provisions of this lease. Government agrees, in consideration of the warranties and conditions set forth in this clause, that this lease is subject and subordinate to any and all recorded mortgages, deeds of trust and other liens now or hereafter existing or imposed upon the premises, and to any renewal, modification or extension therof. It is the intention of the parties that this provision shall be self-operative and that no further instrument shall be required to effect the present or subsequent subordination of this lease. Government agrees, however, within twenty (20) business days next following the Contracting Officer's receipt of a written demand, to execute such instruments as lessor may reasonably request to evidence further the subordination of this lease to any existing or future mortgage, deed of trust or other security interest pertaining to the premises, and to any water, sewer or access easement necessary or desirable to serve the premises or adjoining property owned in whole or in part by Lessor if such easement does not interfere with the full enjoyment of any right granted the Government under this lease.

(b) No such subordination, to either existing or future mortgages, deeds of trust or other lien or security instrument shall operate to effect adversely any right of the Government under this lease so long as the Goverment is not in default under this lease. Lessor will include in any future mortgage, deed of trust or other security instrument to which this lease becomes subordinate, or in a separate non-disturbance agreement, a provision to the foregoing effect. Lessor warrants that the holders of all notes or other obligations secured by existing mortgages, deeds of trust or other security instruments have consented to the provisions of this clause, and agrees to provide true copies of all such consents to the Contracting Officer promptly upon demand.

(c) In the event of any sale of the premises or any portion thereof by foreclosure of the lien of any such mortgage, deed of trust or other security instrument, or the giving of a deed in lieu of foreclosure, the Government will be deemed to have attorned to any purchaser, purchasers, transferee or transferees of the premises or any portion thereof and its or their successors and assigns, and any such purchasers and transferees will be deemed to have assumed all obligations of the Lessor under this lease, so as to establish direct privity of estate and contract between Government and such purchasers or transferees, with the same force, effect and relative priority in time and right as if the lease had initially been entered into between such purchasers or transferees and the Government; provided, further, that the Contracting Officer and such purchasers or transferees shall, with reasonable promptness following any such sale or deed delivery in lieu of foreclosure, execute all such revisions to this lease, or other writings, as shall be necessary to document the foregoing relationship.

(End of Clause)

23. Section 552.270-35 is added to read as follows:

552.270-35 Statement of lessor.

As prescribed in 570.702-26, insert the following clause:

Statement of Lessor (XXX 1991)

(a) The Contracting Officer will, within thirty (30) days next following the Contracting Officer's receipt of a joint written request from Lessor and a prospective lender or purchaser of the building, execute and deliver to Lessor a letter stating that the same is issued subject to the conditions stated in this clause and, if such is the case, that (1) the lease is in full force and effect; (2) the date to whch the rent and other charges have been paid in advance, if any; and (3) whether any notice of default has been issued.

(b) Letters issued pursuant to this clause are subject to the following conditions:

(1) That they are based solely upon a reasonably diligent review of the Contracting Officer's lease file as of the date of issuance;

(2) That the Government shall not be held liable because of a latent defect in or condition of the premises or building of which the Contracting Officer has no actual knowledge, nor for any defect in or condition of the premises or building discoverable upon reasonable prepurchase or precommitment inspection by an architect, engineer or other qualified consultant acting on behalf of the Lessor, prospective lender or purchaser;

(3) That the Contracting Officer does not warrant or represent that the premises or building comply with applicable Federal, State and local law; and

(4) That the Lessor, and each prospective lender and purchaser are deemed to have constructive notice of such facts as would be ascertainable by reasonable prepurchase and precommitment inspection of the Premises and Building and by inquiry to appropriate Federal, State and local Government officials.

(End of Clause)

24. Section 552.270-36 is added to read as follows:

552.270-36 Substitution of Tenant agency.

As prescribed in 570.702-27, insert the following clause:

Substitution of Tenant Agency (XXX 1991).

The Government may, at any time and from time to time, substitute any Government agency or agencies for the Government agency or agencies, if any, named in the solicitation.

(End of Clause)

25. Section 552.270-37 is added to read as follows:

552.270-37 No waiver.

As prescribed in 570.702-28, insert the following clause:

No Waiver (XXX 1991)

No failure by either party to insist upon the strict performance of any provision of this lease or to exercise any right or remedy consequent upon a breach thereof, and no acceptance of full or partial rent or other performance by either party during the continuance of any such breach shall constitute a waiver of any such breach of such provision.

(End of Clause)

28. Section 552.270-38 is added to read as follows:

552.270-38 Integrated agreement.

As prescribed in 570.702-29, insert the following clause:

Integrated Agreement (XXX 1991)

This Lease upon execution contains the entire agreement of the parties and no prior written or oral agreement, express or implied, shall be admissable to contradict the provisions of the Lease.

(End of Clause)

27. Section 552.270.39 is added to read as follows:

552.270-39 Mutality of obligation.

As prescribed in 570.702-30, insert the following clause:

Mutuality of Obligation (XXX 1991)

The obligations and covenants of the Lessor, and the Government's obligation to pay Rent and other Government obligations and covenants, arising under or related to this Lease, are interdependent. The Government may, upon issuance of and delivery to Lessor of a final decision asserting a claim against Lessor, set off such claim, in whole or in part, as against any payment or payments then or thereafter due the Lessor under this lease. No setoff pursuant to this clause shall constitute a breach by the Government of this lease.

(End of Clause)

PART 570—ACQUISITION OF LEASEHOLD INTERESTS IN REAL PROPERTY

28. Section 570.503 is revised to read as follows:

570.503 Expansion requests.

(a) When expansion space is needed, the contracting officer must determine whether it is more prudent to provide the expansion space by supplemental agreement to the existing lease or to satisfy the requirement by relocation. A market survey must be conducted to determine whether suitable alternative locations are available. If the market survey reveals alternate locations that can satisfy the total requirement, a cost benefit analysis must be performed to determine whether it is in the Government's best interest to relocate. This analysis may include—

(1) The cost of the alternate space compared to the cost of expanding at the existing location;

(2) The cost of moving;

(3) The cost of duplicating existing improvements; and

(4) The cost of the unexpired portion of the firm term lease (unless a termination is possible, in which case the actural cost of such an action should be used).

(b) If no suitable alternative location is available and the cost of the space exceeds $25,000, a justification may be prepared for approval in accordance with FAR subpart 6.3 and subpart 506.3 in order to negotiate a Supplemental Lease Agreement to provide expansion space, provided the original lease term is not extended. When the cost is $25,000 or less, the contracting officer must prepare the justification for inclusion in the file.

29. Sections 570.701-1, 570.701-2, 570.701-3, 570.701-4, 570.701-5, 570.701-6, 570.702-1, 570.702-2, 570.702-3, 570.702-4, 570.702-6, 570.702-7,570.702-8, 570.702-9, 570.702-10, 570.702-11, 570.701-12 are revised and section 570.702-5 is removed and reserved to read as follows:

570.701-1 Preparation of offers.

The contracting officer shall insert a provision substantially the same as the provision at 552.270-1, Preparation of Offers, in solicitations for leasehold interests in real property involving 10,000 square feet or more or for more than 6 months.

570.701-2 Explanation to prospective offerors.

The contracting officer shall insert a provision substantially the same as the provision at 552.270-2, Explanation to Prospective Offerors, in solicitations for leasehold interests in real property in solicitations for leasehold interests in real property involving 10,000 square feet or more or for more than 6 months.

570.701-3 Late submissions, modifications, and withdrawals of offers.

The contracting officer shall insert a provision substantially the same as the provision at 552.270-3, Late Submissions, Modifications, and Withdrawals of Offers, in solicitations for leasehold interests in real property involving 10,000 square feet or more or for more than 6 months.

570.701-4 Historic preference.

The contracting officer shall insert a provision substantially the same as the provision at 552.270-4, Historic Preference, in solicitations for leasehold interests in real property involving 10,000 square feet or more or for more than 6 months. When the market survey indicated that space is available in both historic and non-historic buildings.

570.701-5 Lease award.

The contracting officer shall insert a provision substantially the same as the provision at 552.270-5, Lease Award, in solicitations for leasehold interests in real property involving 10,000 square feet or more or for more than 6 months.

VOL 56 ISS 123 JE 26 1991 UMI

570.704-6 Parties to execute lease.

The contracting officer shall insert a provision substantially the same as the provision at 552.270-6, Parties to Execute Lease, in solicitations for leasehold interests in real property involving 10,000 square feet or more or for more than 6 months.

570.702-1 Definitions.

The contracting officer shall insert a clause substantially the same as the clause at 552.270-16, Definitions, in solicitations and contracts for leasehold interests in real property if the lease is for more than 10,000 square feet and is for a period of more than 6 months. Use of the clause is optional in leases for 10,000 square feet or less or for a period of less than 6 months.

570.702-2 Subletting and assignment.

The contracting officer shall insert a clause substantially the same as the clause at 552.270-21, subletting and assignment, in solicitations and contracts for leasehold interests in real property if the lease is for more than 10,000 square feet and is for period of more than 6 months. Use of the clause is optional in leases for 10,000 square feet or less or for a period of less than 6 months.

570.702-3 Maintenance of building and premises—right of entry.

The contracting officer shall insert a clause substantially the same as the clause at 552.270-12, Maintenance of building and premises—Right of Entry, in solicitations and contracts for leasehold interests in real property if the lease is for more than 10,000 square feet and is for period of more than 6 months. Use of the clause is optional in leases for 10,000 square feet or less or for a period of less than 6 months.

570.702-4 Fire and casualty damage.

The contracting officer shall insert a clause substantially the same as the clause at 552.270-13, Fire and Casualty Damage, in solicitations and contracts for leasehold interests in real property if the lease is for more than 10,000 square feet and is for a period of more than 6 months. Use of the clause is optional in leases for 10,000 square feet or less or for a period of less than 6 months.

570.702-5 [Reserved]

570.702-6 Compliance with applicable law.

The contracting officer shall insert a clause substantially the same as the clause at 552.270-15, Compliance with Applicable Law, in solicitations and contracts for leasehold interests in real property if the lease is for more than 10,000 square feet and is for a period of more than 6 months. Use of the clause is optional in leases for 10,000 square feet or less or for a period of less than 6 months.

570.702-7 Inspection—right of entry.

The contracting officer shall insert a clause substantially the same as the clause at 552.270-16, Inspection—Right of Entry, in solicitations and contracts for leasehold interests in real property if the lease is for more than 10,000 square feet and is for a period of more than 6 months. Use of the clause is optional in leases for 10,000 square feet or less or for a period of less than 6 months.

570.702-8 Failure in performance.

The contracting officer shall insert a clause substantially the same as the clause at 552.270-17, Failure in Performance, in solicitations and contracts for leasehold interests in real property if the lease is for more than 10,000 square feet and is for a period of more than 6 months. Use of the clause is optional in leases for 10,000 square feet or less or for a period of less than 6 months.

570.702-9 Successors bound.

The contracting officer shall insert a clause substantially the same as the clause at 552.270-18, Successors Bound, in solicitations and contracts for leasehold interests in real property if the lease is for more than 10,000 square feet and is for a period of more than 6 months. Use of the clause is optional in leases for 10,000 square feet or less or for a period of less than 6 months.

570.702-10 Alterations.

The contracting officer shall insert a clause substantially the same as the clause at 552.270-19, Alterations, in solicitations and contracts for leasehold interests in real property if the lease is for more than 10,000 square feet and is for a period of more than 6 months. Use of the clause is optional in leases for 10,000 square feet or less or for a period of less than 6 months.

570.702-11 Proposals for adjustment.

The contracting officer shall insert a clause substantially the same as the clause at 552.270-20, Proposals for Adjustment, in solicitations and contracts for leasehold interests in real property. If the lease is for more than 10,000 square feet and is for a period of more than 6 months, use the clause with its Alternate I.

570.702-12 Changes.

The contracting officer shall insert a clause substantially the same as the clause at 552.270-21, Changes, in solicitations and contracts for leasehold interests in real property if the lease is for more than 10,000 square feet and is for a period of more than 6 months. Use of the clause is optional in leases for 10,000 square feet or less or for a period of less than 6 months.

31. Section 570.702-14 is revised to read as follows:

570.702-14 Operating costs.

If the operating cost escalation is necessary the contracting officer may use the clause at 552.270-23, Operating Costs, or develop a different clause for acquisitions of leasehold interests in real property. Because of the variations in circumstances and need to modify clause wording that may arise, no standard clause is prescribed. However, any clause develop by the contracting officer must provide for a base to be established, provide for upward and downward adjustment, and specify the timeframe for and method of payment.

32. Section 570.702-15 is revised to read as follows:

570.702-15 Tax adjustment.

If tax escalation is necessary the contracting officer may use the clause at 552.270-24, Tax Adjustment, or develop a different clause for acquisitions of leasehold interests in real property. Because of the variations in circumstances and need to modify clause wording that may arise, no standard clause is prescribed. However, any clause developed by the contracting officer must provide for a base to be established, provide for upward and downward adjustment, and specify the timeframes for and method of payment.

33. Sections 570.702-16, 570.702-18, 570.702-23 are revised, and sections 570.702-27 and 570.702-29 are removed and reserved to read as follows:

570.702-16 Adjustment for vacant premises.

The contracting officer shall insert a clause substantially the same as the clause at 552.270-25, Adjustment for Vacant Premises, in solicitations and contracts for leasehold interests in real property if the lease is for more than 10,000 square feet and is for a period of more than 6 months. Use of the clause is optional in leases for 10,000 square feet or less or for a period of less than 6 months.

570.702-17 [Reserved]

570.702-18 Delivery and condition.

The contracting officer shall insert a clause substantially the same as the clause at 552.270-27, Delivery and Condition, in solicitations and contracts for leasehold interests in real property if the lease is for more than 10,000 square feet and is for a period of more than 6 months. Use of the clause is optional in leases for 10,000 square feet or less or for a period of less than 6 months.

570.702-19 Default in delivery—time extensions.

The contracting officer shall insert a clause substantially the same as the clause at 552.270-28, Default in Delivery—Time Extensions, in solicitations and contracts for leasehold interests in real property if the lease is for more than 10,000 square feet and is for a period of more than 6 months. Use of the clause is optional in leases for 10,000 square feet or less or for a period of less than 6 months.

570.702-20 [Reserved]

570.702-21 Progressive occupancy.

The contracting officer shall insert a clause substantially the same as the clause at 552.270-30, Progressive Occupancy, in solicitations and contracts for leasehold interests in real property if the lease is for more than 10,000 square feet and is for a period of more than 6 months. Use of the clause is optional in leases for 10,000 square feet or less or for a period of less than 6 months.

34. Sections 570.702-22, 570.702-23, 570.702-24, 570.702-25, 570.702-26, 570.702-27, 570.702-28, 570.702-29, and 270.702-30 are added to read as follows:

570.702-22 Measurement for payment.

The contracting officer shall insert a clause substantially the same as the clause at 552.270-31, Measurement for Payment, in solicitations and contracts for leasehold interests in real property if the lease is for more than 10,000 square feet and is for a period of more than 6 months. Use of the clause is optional in leases for 10,000 square feet or less or for a period of less than 6 months.

570.702-23 Effect of acceptance and occupancy.

The contracting officer shall insert a clause substantially the same as the clause at 552.270-32, Effect of Acceptance and Occupancy, in solicitations and contracts for leasehold interests in real property if the lease is for more than 10,000 square feet and is for a period of more than 6 months. Use of the clause is optional in leases for 10,000 square feet or less or for a period of less than 6 months.

570.702-24 Default by lessor during the term.

The contracting officer shall insert a clause substantially the same as the clause at 552.270-33, Default by Lessor During the Term, in solicitations and contracts for leasehold interests in real property if the lease is for more than 10,000 square feet and is for a period of more than 6 months. Use of the clause is optional in leases for 10,000 square feet or less or for a period of less than 6 months.

570.702-25 Subordination, nondisturbance and attornment.

The contracting officer shall insert a clause substantially the same as the clause at 552.270-34, Subordination, NonDisturbance and Attornment, in solicitations and contracts for leasehold interests in real property if the lease is for more than 10,000 square feet and is for a period of more than 6 months. Use of the clause is optional in leases for 10,000 square feet or less or for a period of less than 6 months.

570.702-26 Statement of lease.

The contracting officer shall insert a clause substantially the same as the clause at 552.270-35, Statement of Lease, in solicitations and contracts for leasehold interests in real property if the lease is for more than 10,000 square feet and is for a period of more than 6 months. Use of the clause is optional in leases for 10,000 square feet or less or for a period of less than 6 months.

570.702-27 Substitution of tenant agency.

The contracting officer shall insert a clause substantially the same as the clause at 552.270-36, Substitution of Tenant Agency, in solicitations and contracts for leasehold interests in real property if the lease is for more than 10,000 square feet and is for a period of more than 6 months. Use of the clause is optional in leases for 10,000 square feet or less or for a period of less than 6 months.

570.702-28 No waiver.

The contracting officer shall insert a clause substantially the same as the clause at 552.270-37, No Waiver, in solicitations and contracts for leasehold interests in real property if the lease is for more than 10,000 square feet and is for a period of more than 6 months. Use of the clause is optional in leases for 10,000 square feet or less or for a period of less than 6 months.

570.702-29 Intigrated agreement.

The contracting officer shall insert a clause substantially the same as the clause at 552.270-38, Intigrated Agreement, in solicitations and contracts for leasehold interests in real property if the lease is for more than 10,000 square feet and is for a period of more than 6 months. Use of the clause is optional in leases for 10,000 square feet or less or for a period of less than 6 months.

570.702-30 Mutuality of obligation.

The contracting officer shall insert a clause substantially the same as the clause at 552.270-39, Mutuality of Obligation, in solicitations and contracts for leasehold interests in real property if the lease is for more than 10,000 square feet and is for a period of more than 6 months. Use of the clause is optional in leases for 10,000 square feet or less or for a period of less than 6 months.

Dated: June 14, 1991.

Richard H. Hopf, III,

Associate Administrator for Acquisition Policy.

[GSAR Notice 5-303]

General Services Administration Acquisition Regulation; Provisions and Clauses (Design-Build Service Contracts)

AGENCY: Office of Acquisition Policy, GSA.

ACTION: Proposed rule.

SUMMARY: This notice invites written comments on a proposed change to the General Services Administration Acquisition Regulation (GSAR) that would revise certain GSAR provisions to accommodate the Public Buildings Service (PBS) plans to combine requirements for design, construction and operation and maintenance of a building or facility in a single solicitation and contract using a design-build concept; incorporate the substance of a class deviation from certain Federal Acquisition Regulation (FAR) provisions approved for use by PBS contracting activities; and add a matrix to outline the solicitation provisions and contract clauses that apply to contracts for design-build services. The matrixes are not published in this document and do not appear in the Code of Federal Regulations. Copies may be obtained from the Director of the Office of GSA Acquisition Policy (VP), 18th and F Streets NW., Washington, DC 20405.

DATES: Comments are due in writing on or before July 26, 1991.

ADDRESSES: Comments should be submitted to Marjorie Ashby, Office of GSA Acquisition Policy (VP), 18th and F Streets NW., room 4026, Washington, DC 20405.

VOL 56 ISS 123 JE 26 1991 UMI

FOR FURTHER INFORMATION CONTACT:
Ida M. Ustad, Office of GSA Acquisition Policy (202) 501-1224.

SUPPLEMENTARY INFORMATION:

A. Executive Order 12291

The Director, Office of Management and Budget (OMB), by memorandum dated September 14, 1984, exempted certain agency procurement regulations from Executive Order 12291. The exemption applies to this proposed rule.

B. Regulatory Flexibility Act

The proposed rule does not appear to have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) because it simply modifies certain FAR clauses as necessary to accommodate a contract that combines requirements for design, construction, and operation and maintenance of a building or facility in a single solicitation and contract under a design-build concept. Therefore, an initial regulatory flexibility analysis has not been performed. Comments from small entities concerning the affected GSAR sections will be considered in accordance with section 610 of the Act.

C. Paperwork Reduction Act

This proposed rule does not contain any recordkeeping or information collection requirements that require the approval of OMB under 44 U.S.C. 3501 *et seq.*

List of Subjects in 48 CFR Parts 516, 528, 536, 543, 548, 549, and 552

Government procurement.

Accordingly, it is proposed to amend 48 CFR parts 516, 528, 536, 543, 548, 549, and 552 as follows:

1. The authority citation for 48 CFR parts 516, 528, 536, 543, 549 and 552 continues to read as follows:

Authority: 40 U.S.C. 486(c).

PART 516—TYPES OF CONTRACTS

2. Section 516.405 is revised to read as follows:

516.405 Contract clauses.

(a) Award fee clauses developed by contracting officers, under FAR 16.405(e), shall be prepared with the advice and assistance of counsel and be approved by the contracting director.

(b) The contracting officer may insert the clause at 552.216-16, Incentive Price Revision, in solicitations and contracts for design/build construction services instead of the clause at FAR 52.216-16 when a fixed price incentive contract is contemplated.

PART 528—BONDS AND INSURANCE

3. Section 528.101-3 is amended by revising paragraph (a) to read as follows:

528.101-3 Contract clause.

(a) The contracting officer shall insert a clause substantially the same as the clause at 552.228-70, Bid Guarantee and Bonds, in solicitations and contracts when a construction contract or a contract for dismantling, demolition, or removal of improvements is contemplated and a bid guarantee and bond requirement is to be included. The contracting officer may make minor changes in the wording of the clause when the bonding requirement only applies to a portion of the work required by the contract.

* * * * *

PART 536—CONSTRUCTION AND ARCHITECT-ENGINEER CONTRACTS

4. Sections 536.303-70, 536.303-71, 536.303-72 and 536.370 are redesignated as §§ 536.270, 536.270.1, 536.270-2 and 536.270-3 respectively, and moved to subpart 536.2, and revised to read as follows:

536.270 Offers that include alternates and/or options.

536.270-1 Offers that include alternates.

(a) The base offer must include all features that are essential to a sound and adequate building design. However, if it appears that funds available for a project may be insufficient to include all desired features in the base offer, the contracting officer may issue a solicitation for a base offer and include one or more alternates in the order of priority. Alternates may be used only when they are clearly justified and should involve substantial amounts of work in relation to the base offer. Their use must be limited and should involve only "add" alternates.

(b) The language used in soliciting alternates must be approved in writing by counsel.

(c) All solicitations requiring a base offer and alternates must include the Alternate II provision at 552.236-73, Basis of Award—Construction Contract, which prescribes the method for evaluating offers.

(d) Before opening bids that include alternates, the contracting officer shall determine and record in the contract file the amount of funds available for the project. The amount recorded must be announced at the beginning of the bid opening and must be the controlling factor in determining the low bidder. This amount may be increased later when determining the alternate items to be awarded to the low bidder, provided that the award amount of the base bid plus the combination of alternate items do not exceed the amount offered by any other responsible bidder whose bid conforms to the solicitation for the base bid and the same combination of alternate items.

536.270-2 Offers that include options.

(a) Subject to the limitations in paragraph (c) of this section, the contracting officer may include options in contracts when it is in the Government's interest.

(b) The appropriate use of options may include, but is not limited to, the following:

(1) When additional work is anticipated but funds are not expected to be available at the time of award, and it would not be practicable to award a separate contract or to permit an additional contractor to work on the same site.

(2) When fixed building equipment, e.g., elevators, escalators, etc., will be installed under the construction contract and it is advantageous to have the installer of the equipment maintain and service the equipment during the warranty period.

(c) The contracting officer shall not employ options if:

(1) The prospective option represents known firm requirements for which funds are available unless competition for the option quantity is impracticable once the initial contract is awarded; or

(2) The contractor will incur undue risks; e.g., the price or availability of necessary materials or labor is not reasonably foreseeable.

(d) Solicitations containing option provisions must state the period within which the options may be exercised.

(e) The solicitations must state whether the basis of award is inclusive or exclusive of the options. Before a solicitation that includes evaluated options is issued, the contracting officer shall make a determination that there is reasonably certainty that funds will be made available to permit exercise of the option.

(f) The language of all solicitation provisions for options must be approved, in writing, by counsel.

(g) All solicitations requiring a base offer and options must include the Alternate I provision at 552.236-73, Basis of Award—Construction Contract, which prescribes the method of evaluation of offers.

536.270-3 Offers that include alternates and options.

(a) Solicitations may include alternates and options when the conditions in 536.270-1, Offers that include alternates, and 536.270-2, Offers that include options, are satisfied. In such solicitations, the low offeror for purposes of award is the responsible offeror submitting the lowest aggregate price for the basic requirement plus those alternates in the order of priority listed in the solicitation that provide the most features of work within the funds available at bid opening when using sealed bidding or award when negotiating, plus all options designated to be evaluated.

(b) In the case of options associated with alternates, the basis of award may require the evaluation of such options if the related alternate is selected.

(c) All solicitations requiring a base offer, alternates and options must include the Alternate III provision at 552.236.73, Basis of Award—Construction Contract, which prescribes the method of evaluation of offers.

(d) When using sealed bid procedures before opening bids that include alternates and options, the contracting officer shall determine and record in the contract file the amount of funds available for the project (i.e., for the base offer and alternate work). The amount recorded must be announced at the beginning of the bid opening. This amount may be increased later when determining the alternate items to be awarded to the low offeror, provided that the award amount of the base offer and evaluated options plus such a combination of alternate items do not exceed the amount offered by any other responsible offeror whose offer conforms to the solicitation for the base offer, the evaluated options, and the same combination of alternate items.

4a. Section 536.271 is added to read as follows:

536.271 Exercise of options.

(a) When exercising an option, the contracting officer shall notify the contractor in writing, within the time period specified in the contract.

(b) The contracting officer may exercise options only after determining that:

(1) Funds are available;

(2) The requirement covered by the option fulfills an existing Government need; and

(3) The exercise of the options is the most advantageous methods fulfilling the Government's need, price and other factor considered.

(c) Before exercising an option, the contracting officer shall determine that such action is in accordance with the terms of the option and the requirements of this section. The written determination must be included in the contract file.

(d) The contract modification or other written document which notifies the contractor of the exercise of the option must cite the option clause as authority. In addition, when exercising an unpriced and/or unevaluated option cite the statutory authority permitting the use of other than full and open competition (see FAR 6.302 and 517.207).

5. Section 536.570-4 is amended by revising paragraph (a) and the last paragraph to read a follows:

536.570-4 Basis of award—construction contract.

* * * * *

(a) The solicitation requires the submission of a lump sum offer only;

* * * * *

If the solicitation requests the submission of a base offer and unit prices, the contracting officer shall use the basic provision. If the solicitation requests the submission of a base offer and options the contracting officer shall use the provision with its Alternate I. If the solitation requests the submission of a base offer and alternates, the contracting officer shall use the provision with its Alternate II. If the solicitation requests the submission of a base offer alternates, and options, the contracting officer shall use the provisions with its Alternate III.

PART 543—CONTRACT MODIFICATION

6. Section 543.205 is amended by adding paragraph (c) to read as follows:

543.205 Contract clauses.

* * * * *

(c) Contracting officers in the Public Buildings Service have been authorized to deviate from the FAR clause at 52.243-4, Changes, in solicitations and contracts for design/build construction services by modifying subparagraph (a)(2) to read as follows: "(2) In the method, description, time of performance (i.e., hours of the day, days of the week, etc.), or manner of performance of the work or services."

PART 548—VALUE ENGINEERING

6a. The authority citation for part 548 is added to read as follows:

Authority: 40 U.S.C. 486(c).

7. Subpart 548.2 is added to read as follows:

Subpart 548.2—Contract Clauses

548.202 Clause for construction contracts.

Contracting officers in the Public Buildings Service have been authorized to deviate from the FAR by using the FAR Value Engineering clause for architect-engineer contracts instead of the clause at FAR 52.248-3, Value Engineering—Construction, when soliciting and awarding design/build construction contracts.

PART 549—TERMINATION OF CONTRACTS

8. Section 549.502 is revised to read as follows:

549.502 Termination for convenience of the Government.

(a) The contracting officer shall insert the clause at 552.249-70, Termination for Convenience of the Government (Fixed-Price), in all solicitations and contracts for the acquisition and maintenance of telephone systems to be funded through the Information Technology Fund (IT). This clause should be used with the FAR clauses at 52.249-1 or 52.249-2 and 52.249-4.

(b) Contracting officers in the Public Buildings Service have been authorized to deviate from the FAR clause at 52.249-2, Termination for Convenience of the Government (Fixed-Price) (Alt I) by: (1) Inserting the words "or services" in the first sentence of paragraph (a) of the clause immediately after "work," (2) deleting the phrase "exclusive of costs shown in subparagraph (f)(3) below" in the third sentence of paragraph (e), and (3) substituting the following subparagraph as (2) in paragraph (f):

(2)(i) For services performed under the operation and maintenance option, the contract price for completed supplies or services accepted by the government (or sold or acquired under subparagraph (b)(9) above) not previously paid for, adjusted for any saving of freight and other charges, the total of—

(A) The costs incurred in the performance of the operation and maintenance service terminated, including initial costs and preparatory expense allocable thereto, but excluding any costs attributable to supplies or services paid or to be paid under subparagraph (f)(1) above;

(B) The cost of settling and paying termination settlement proposals under terminated subcontracts that are properly chargeable to the terminated portion of the contract if not included in subdivision (A) above; and

(C) A sum, as profit on subdivision (A) above, determined by the contracting officer under 49.202 of the Federal Acquisition Regulation, in effect on the date of this contract, to be fair and reasonable; however,

VOL

UMI

if it appears that the contractor would have sustained a loss on the entire contract had it been completed, the contracting officer shall allow no profit under this subdivision (C) and shall reduce the settlement to reflect the indicated rate of loss.

(ii) For all work or services the reasonable costs of settlement of the work terminated, including—

(A) Accounting, legal, clerical, and other expenses reasonably necessary for the preparation of termination settlement proposals and supporting data;

(B) The termination and settlement of subcontracts (excluding the amounts of such settlements); and

(C) Storage, transportation, and other costs incurred, reasonably necessary for the preservation, protection, or disposition of the termination inventory.

9. Section 549.504 is added to read as follows:

549.504 Termination of fixed-price contracts for default.

The contracting officer shall insert the clause at 552.249–72, Termination for Default, in all solicitations and contracts for design/build construction services. This clause should be used with the FAR clauses at 52.249–8 and 52.249–10.

PART 552—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

10. Section 552.216–16 is added to read as follows:

552.216–16 Incentive price revision.

As prescribed in 516.405(b), insert the following clause:

Incentive Price Revision (XXX 1991) (Deviation FAR 52.216–16)

(a) *General.* The construction services identified in section 3 of Attachment A to Standard Form 1442, Solicitation, Offer and Award (Construction, Alteration, or Repair) of this contract are subject to price revision in accordance with this clause; provided, that in no event shall the total final price of these services exceed the ceiling price of .....dollars ($.....). Any construction services that are to be (1) ordered separately under or otherwise added to this contract and (2) subject to price revision in accordance with the terms of this clause shall be identified as such in a modification to this contract.

(b) *Definition.* "Costs," as used in this clause, mean allowable costs in accordance with part 31 of the Federal Acquisition Regulation (FAR) in effect on the date of this contract.

(c) *Data submission.* (1) Within .....[Contracting Officer insert number of days] days after the Contractor has completed all of the services specified in paragraph (a) above, the Contractor shall submit:

(i) A copy of the executed subcontracts and all modifications thereto;

(ii) Evidence of all payments, including final payment, to subcontractors;

(iii) Evidence of all allocable credits received from subcontractors; and

(iv) Any other relevant data that the Contracting Officer may reasonably require.

(2) If the Contractor fails to submit the data required by subparagraph (1) above within the time specified and it is later determined that the Government has overpaid the Contractor, the Contractor shall repay the excess to the Government immediately. Unless repaid within 30 days after the end of the data submittal period, the amount of the excess shall bear interest, computed from the date the data were due to the date of repayment, at the rate established in accordance with the Interest clause.

(d) *Price revision.* Upon the Contracting Officer's receipt of the data required by paragraph (c) above, the Contracting Officer and the Contractor shall promptly establish the total final price of the construction services specified in (a) above by adjusting the final negotiated cost as follows:

(1) On the basis of the information required by paragraph (c) above, together with any other pertinent information, the parties shall aggregate the cost of subcontracts for competed work to determine the total final negotiated cost incurred for construction services performed and accepted by the Government and which are subject to price revision under this clause. The cost associated with correcting any errors attributable to the Contractor shall not be included when determining the total final negotiated cost.

(2) The total final price shall be established as follows:

(i) If the total final negotiated cost is equal to or greater than the ceiling price, the ceiling price is the total final price. In no event shall the Government pay the Contractor any amount in excess of the ceiling price.

(ii) If the total final negotiated cost is less than the ceiling price, the total final price shall be the total final negotiated cost plus (percentage amount to be inserted by the Contracting Officer) the difference between the ceiling price and the total final negotiated cost.

(e) *Contract modification.* The total final price of the construction services specified in paragraph (a) above shall be evidenced by a modification to this contract, signed by the Contractor and the Contracting Officer. This price shall not be subject to revision, notwithstanding any changes in the cost of performing the contract, except to the extent that:

(1) The parties may agree in writing, before the determination of total final price, to exclude specific elements of cost from this price and to a procedure for subsequent disposition of those elements; and

(2) Adjustments or credits are explicitly permitted or required by this or any other clause in this contract.

(f) *Adjusting limitation on progress payments.* (1) Pending execution of the contract modification (see paragraph (e) above), the Contractor shall submit invoices in accordance with the payment terms of this contract; provided, that the total of progress payments for the construction services specified in paragraph (a) above shall not exceed eighty-five (85) percent of the ceiling price in paragraph (a) above unless the Contractor submits evidence that costs actually incurred for subcontracts exceeded eighty-five (85) percent of the ceiling price and the contract is modified to increase the limitation on progress payments.

(2) Any adjustment in the eighty-five (85) percent limitation in subparagraph (1) above shall be reflected in a contract modification and shall not affect the determination of the total final price under paragraph (d) above. After the contract modification establishing the total final price is executed, the total amount paid or to be paid on all invoices shall be adjusted to reflect the total final price and any resulting additional payments, refunds, or credits shall be made promptly.

(g) *Subcontracts.* The term "subcontracts," as used in this clause, includes construction services specified in paragraph (a) above, which are performed by the Contractor. No subcontract placed under this contract may provide for payment on a cost-plus-a-percentage-of-cost basis. The Contractor shall solicit competitive proposals for the performance of all construction services specified in paragraph (a) above and award subcontracts to the offeror submitting the lowest offer. The Contractor may compete to perform such services itself. Proposals shall be obtained from at least two independent sources. The Contracting Officer or an authorized representative shall have access to and the right to examine any documents pertinent to the competition of construction services in order to verify that at least two independent sources were solicited and that the award was made to the lowest offeror. Subcontracts shall be awarded as firm-fixed-price contracts.

(h) *Disagreements.* If the Contractor and the Contracting Officer fail to agree upon the total final price within 60 days (or within such other period as the Contracting Officer may specify) after the date on which the data required by paragraph (c) above are to be submitted, the Contracting Officer shall promptly issue a decision in accordance with the Disputes clause.

(i) *Termination.* If this contract is terminated before the total price is established, prices of construction services subject to price revision shall be established in accordance with this clause for (1) completed construction services accepted by the Government and (2) those construction services not terminated under a partial termination. All other elements of the termination shall be resolved in accordance with other applicable clauses of this contract.

(j) *Equitable adjustment under other clauses.* If an equitable adjustment in the contract price is made under any other clause of this contract before the total final price is established, the adjustment shall be made in the ceiling price. If the adjustment is made after the total final price is established, only the total final price shall be adjusted.

(k) *Exclusion from total final price.* If any clause of the contract provides that the contract price does not or will not include an amount for a specific purpose, then the total final price will not include any amount for that purpose.

(l) *Separate reimbursement.* If any clause of this contract expressly provides that the cost of performance of an obligation shall be at Government expense, that expense shall not be included in the total final price, but shall be reimbursed separately.

(m) *Taxes.* As used in the Federal, State and Local Taxes clause or in other clauses that provides for certain taxes or duties to be included in or excluded from the contract price, the term "contract price" includes the ceiling price or, if it has been established, the total final price. When any of these clauses requires that the contract price be increased or decreased as a result of changes in the obligation of the Contractor to pay or bear the burden of certain taxes or duties, the increase or decrease shall be made in the ceiling price or, if it has been established, in the total final price.

(End of Clause)

11. Section 552.236–73 is revised to read as follows:

552.236–73 Basis of Award—Construction Contract.

As prescribed in 536.570–4, insert the following provision or the appropriate Alternate:

Basis of Award—Construction Contract (XXX 1991)

(a) The price for evaluation purposes is the price for the basic requirements (consisting of the lump sum offer and any associated unit prices extended by the applicable number of units shown on the solicitation, offer and award form). See Standard Form 1442, Solicitation, Offer, and Award.

(b) An offer may be rejected if the offer is materially unbalanced as to offered prices. An offer is unbalanced when the offer is based on prices significantly less than cost for some work and significantly overstated for other work.

(End of Provision)

Alternate I

If the solicitation includes the basic requirements and options, the Contracting Officer shall delete paragraph (a) of the basic provision and insert paragraph (a) substantially as follows:

(a) The price for evaluation purposes is the aggregate price for (1) the basic requirements (consisting of the lump sum offer and any associated unit prices extended by the applicable number of units shown on the solicitation, offer and award form) plus (2) all options designated to be evaluated. The evaluation of options will not obligate the Government to exercise the options. See Standard Form 1442, Solicitation, Offer, and Award.

Alternate II

If the solicitation includes the basic requirements and alternates, the Contracting Officer shall delete paragraph (a) of the basic provision and insert paragraphs (a), (c), and (d) substantially as follows:

(a) The low price for evaluation purposes is the aggregate price for (1) the basic requirements (consisting of the lump sum offer and any associated unit prices extended by the applicable number of units shown on the Solicitation, Offer, and Award form) plus (2) those alternates in the order of priority listed in the solicitation that provide the most features of work within the funds available at bid opening when the procurement is made using sealed bidding procedures or at award when the procurement is made using the negotiated method of procurement.

(c) Alternates will be added to the basic requirements in the order listed in the solicitation (see Standard Form 1442, Solicitation, Offer, and Award). If the addition of an alternate would make all offers exceed the funds available at bid opening or award, that alternate shall be skipped and the next subsequent alternate in a lower amount shall be added, provided that the aggregate of basic requirements and the selected alternates do not exceed the funds available at bid opening when sealed bidding or award when negotiating. For example, when the amount available is $100,000 and an offeror's price for the basic requirements is $85,000, with its separate prices on four successive alternates being $10,000, $8,000, $6,000, and $4,000, the aggregate amount of the offer for purposes of selecting the alternates would be $99,000 (basic requirements plus the first and fourth alternates). The second and third alternates are skipped because each of them would cause the aggregate of the basic requirements and alternates to exceed the $100,000 amount available when considered with the first alternate.

(d) After the price has been evaluated in accordance with paragraph (a), an award may be made on the basic requirements plus any combination of alternates for which funds are available at the time of bid opening or award, as applicable, provided all offers are evaluated on the basis of the same alternates.

Alternate III

If the solicitation includes basic requirements, alternates, and options, the Contracting Officer shall delete paragraph (a) of the basic provision and insert paragraphs (a), (c), and (d) substantially as follows:

(a) The price for evaluation purposes is the aggregate price for (1) the basic requirements (consisting of the lump sum offer unit prices extended by the applicable number of units shown on the Solicitation, Offer, and Award form) plus (2) those alternates in the order of priority listed in the solicitation that provide the most features of work within the funds available at bid opening or award as applicable plus (3) all options designated to be evaluated except those options associated with alternates that are skipped during the evaluation process outlined in paragraph (c) below. The evaluation of options will not obligate the Government to exercise the options.

(c) Alternates will be added to the basic requirements in the order listed in the solicitation (see Standard Form 1442, Solicitation, Offer, and Award). If the addition of an alternate would make all offers exceed the funds available at bid opening or award, that alternate shall be skipped and the next subsequent alternate in a lower amount shall be added, provided that the aggregate of basic requirements and the selected alternates do not exceed the funds available when sealed bidding or award when negotiating. For example, when the amount available is $100,000 and an offeror's basic requirement is $85,000, with its separate prices on four successive alternates being $10,000, $8,000, $6,000, and $4,000, the aggregate amount of the offer for purposes of selecting the alternates would be $99,000 (basic requirements plus the first and fourth alternates). The second and third alternates are skipped because each of them would cause the aggregate of the basic requirements and alternates to exceed the $100,000 amount available when considered with the first alternate.

(d) After the price has been evaluated in accordance with paragraph (a), award may be made on the basic requirement and evaluated options plus any combination of alternates for which funds are available at the time of bid opening or award, as applicable, provided all offers shall be evaluated on the basis of the same alternates.

12. Section 552.249–72 is added to read as follows:

552.249–72 Terminations for Default.

As prescribed in 549.504, insert the following clause:

Termination for Default (XXX 1991) (Deviation FAR 52.249–8 and 52.249–10)

(a) The Government's right to terminate the design and construction portion of this contract for default shall be determined under the basic FAR clause 52.249–10.

(b) The Government's right to terminate the services under the operation and maintenance portion of this contract for default shall be determined under the basic FAR clause 52.249–8.

(End of Clause)

Dated: June 4, 1991.

Richard H. Hopf,

Associate Administrator for Acquisition Policy.

Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Forest Service

Exemption of Salvage Timber Sale Project From Appeal

AGENCY: Forest Service, USDA.

ACTION: Notification that a salvage timber sale project is exempted from appeals under provisions of 36 CFR part 217.

SUMMARY: This is a notification that the decision to implement the Upper Copper Creek Salvage timber Sale Project on the Helena National Forest is exempted from appeal. This is in conformance with the provisions of 36 CFR 217.4(a)(11).

EFFECTIVE DATE: Effective on issuance of the Decision Notice for the Upper Copper Creek Salvage Timber Sale.

FOR FURTHER INFORMATION CONTACT: Ernest R. Nunn, Forest Supervisor, Helena National Forest, 301 S. Park, Drawer 10014, Federal Building, Room 334, Helena, Montana 59626.

Background

During February of 1989, an unseasonably warm week was followed by a severe and rapid drop in temperature which caused foliage freeze and dessication (commonly referred to as "Red Belt") and stressed, severely damaged and/or killed timber on approximately 7,300 acres within the Lincoln Ranger District. The degree of damage varied from a few trees per acre to near total mortality to both the overstory and understory vegetation. Within the immediate area of the proposed Upper Copper Creek Salvage Timber Sale an estimated 1800 acres were affected to some degree.

The Helena National Forest identified the need to quickly salvage the timber before it became unmerchantable and promptly reforest these areas. Removal of the dead and severely damaged timber will accelerate the rehabilitation of the affected areas by: Eliminating the probability of delayed reforestation and reduction of future timber yield on lands allocated as suitable timber lands in the Helena National Forest Land and Resoruce Management Plan (Helena Forest LRMP); re-establishing wildlife cover more quickly; reducing the potential for wildlife in the damaged stands; and increasing restocking of the site through natural reforestation processes by scarifying the site and opening the canopy. Current estimates suggest that as much as 25–50 percent of the merchantable volume has already been lost in the standing dead trees because of the failure to salvage timber in 1990. Unless the dead material is salvaged soon the opportunities to sell the material and initiate long-term site recovery will be foregone due to insect activity and decay. Failure to take action may necessitate an amendment or revision of the Helena Forest LRMP.

Analysis conducted by a Forest Service interdisciplinary team determined that stands with less than 25 percent of the trees damaged do not require treatment. Application of this criterion led to a proposal to salvage timber resources through timber harvest and rehabilitate damaged timber stands on approximately 716 acres. An Environmental Assessment evaluating this proposed action, including alternatives to the proposed action, was prepared during early 1990 which culminated in a Decision Notice signed in June of 1990. The decision was appealed and the Lincoln District Ranger withdrew his decision on November 26, 1990.

The Lincoln District Ranger has revised the Environmental Assessment to address the environmental issues brought up in the appeal. Additional comments were solicited from the public during the second analysis. This information is documented in the revised Decision Notice/Environmental Assessment and project file located at the Lincoln Ranger District, P.O. Box 219, Lincoln, Montana.

The four alternatives evaluated in the Environmental Assessment range from "No Action" to the treatment of 781 acres. The minimum action alternative considers treatment of 214 acres. Salvage volumes estimated from the action alternatives range from 1.2 to 5.4 MMBF.

Planned Actions

The planned restoration project includes recovery of the killed and heavily damaged trees which are still merchantable and rehabilitation of the stands through natural regeneration. The alternative selected for implementation proposes the treatment of 214 acres in 14 individual harvest units recovering 1.2 MMBF of damaged or dead timber. Natural regeneration will be relied upon to supplement stocking of existing timber stands on the 214 acres treated. Further delay in removal of the dead trees will render them unmerchantable as sawtimber, and lack of followup treatment to the sites will result in unacceptable regeneration delays affecting long-term timber yields and wildlife use of the area. Due to the length of time it has taken to develop an acceptable rehabilitation project and salvage program and to properly evalute its effects, the time remaining for accomplishment has become critical. Any additional delays will result in further damage to presently undamaged resources and could result in a complete loss of the salvageable resources as well.

To expedite this sale project and the initiative of long-term vegetative recovery of the treated stands, the process according to 36 CFR 217.4(a)(11) is being followed. Under this Regulation the following are exempt from appeal:

> Decisions related to rehabilitation of National Forest System lands and recovery of forest resources resulting from natural disasters or other natural phenomena such as wildlife . . . when the Regional Forester . . . determines and gives notice in the Federal Register that good cause exists to exempt such decisions from review under this part.

Based on the environmental analysis documented in the Upper Copper Creek Salvage Timber Sale Environmental Assessment and the Lincoln District Ranger's Decision Notice for this project, I have determined that good cause exists to exempt this decision from administrative review. Therefore, upon publication of this notice, this project will not be subject to review under 36 CFR part 217.

Dated: June 14, 1991.

John M. Hughes,
Deputy Regional Forester, Northern Region.

BILLING CODE 3410–11–M

Russian River Angler Trail Reconstruction and Bank Stabilization Project; Intent

AGENCY: Forest Service, USDA.

ACTION: Notice of intent to prepare an environmental impact statement.

SUMMARY: The Forest Service will prepare an environmental impact statement for the Russian River Angler Trail Reconstruction and Bank Stabilization Project. The project is located on the Seward Ranger District, Chugach National Forest, Kenai Peninsula Borough, Alaska. The agency invites written comments and suggestions on the scope of the analysis. In addition, the agency gives notice of the full environmental analysis and decision-making process that will occur on the proposal so that interested and affected people are aware of how they may participate and contribute to the final decision.

DATES: Comments concerning the scope of the analysis must be received by August 20, 1991.

ADDRESSES: Submit written comments and suggestions concerning the scope of the analysis to Duane Harp, District Ranger, Seward Ranger District, Chugach National Forest, P.O. Box 390, Seward, AK 99664.

FOR FURTHER INFORMATION CONTACT: Direct questions about the proposed action and environmental impact statement to Mr. Harp at the above address or phone Mr. Harp or Mr. Richard Borden at (907) 224–3374.

SUPPLEMENTARY INFORMATION: The Chugach National Forest Land and Resources Management Plan, Final Environmental Impact Statement and Record of Decision have been issued. These documents identify the management direction for the project area, and permit, under certain conditions, the project.

In preparing the environmental impact statement, the Forest Service will identify and consider a range of alternatives. One of these will be continuing present management (the No Project Alternative).

Duane Harp, District Ranger, Seward Ranger District, Chugach National Forest, Seward, Alaska, is the responsible official.

Public participation will be especially important at several points during the analysis. The first point is during the scoping process (40 CFR 1501.7). The Forest Service will be seeking information, comments, and assistance from Federal, State, and local agencies, and individuals or organizations who may be interested in or affected by the proposed action. This input will be used in preparation of the draft environmental impact statement (DEIS). The scoping process includes:

1. Identifying potential issues.
2. Identifying issues to be analyzed in depth.
3. Eliminating insignificant issues or those which have been covered by a relevant previous environmental analysis.
4. Exploring additional alternatives.
5. Identifying potential environmental effects of the proposed action and alternatives (i.e., direct, indirect, and cumulative effects and connected actions).
6. Determining potential cooperating agencies and task assignments.

The DEIS is expected to be filed with Environmental Protection Agency (EPA) and to be available for public review by December 1991. At that time EPA will publish a notice of availability of the DEIS in the Federal Register.

The comment period on the draft environmental impact statement will be 45 days from the date the Environmental Protection Agency's notice of availability appears in the Federal Register. It is very important that those interested in this proposal participate at that time. To be the most helpful, comments on the DEIS should be as specific as possible and may address the adequacy of the statement or the merits of the alternatives discussed (see The Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3). In addition, Federal court decisions have established that reviewers of DEIS's must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewers' position and contentions, *Vermont Yankee Nuclear Power Corp. v. NRDC*, 435 U.S. 519, 553 (1978), and that environmental objections that could have been raised at the draft stage may be waived if not raised until after completion of the final environmental impact statement. *Wisconsin Heritages, Inc. v. Harris*, 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). The reason for this is to ensure that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the final EIS.

After the comment period ends on the draft EIS, the comments will be analyzed and considered by the Forest Service in preparing the final environmental impact statement. The final EIS is scheduled to be completed by July 1992. In the final EIS the Forest Service is required to respond to the comments received (40 CFR 1503.4). The responsible official will consider the comments, responses, environmental consequences discussed in the EIS, and applicable laws, regulations, and policies in making a decision regarding this proposal. The responsible official will document the decision and reasons for the decision in the Record of Decision. That decision will be subject to appeal under 36 CFR part 217.

Dated: June 14, 1991.

Duane H. Harp,
District Ranger.

BILLING CODE 3410–11–M

Soil Conservation Service

Brooke County Critical Area Drainage and Land Treatment RC&D Measure Plan, West Virginia

AGENCY: Soil Conservation Service, Department of Agriculture.

ACTION: Notice of a finding of no significant impact.

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines, (40 CFR part 1500); and the Soil Conservation Service Guidelines, (7 CFR part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Brooke County Park and Recreation Commission Critical Area Treatment and Land Drainage RC&D Measure Plan, Brooke County, West Virginia.

FOR FURTHER INFORMATION CONTACT: Rollin N. Swank, State Conservationist, Soil Conservation Service, 75 High Street, room 301, Morgantown, West Virginia 26505, telephone (304) 291–4151.

SUPPLEMENTARY INFORMATION: The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Rollin M. Swank, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

Notice of a Finding of No Significant Impact

The purpose of the measure is critical area treatment and land drainage. The measure is designed to stabilize by regarding, shaping, and revegetating approximately 1.5 acres of land at three

VOL
56
ISS
123
JE
26
1991
UMI

sites that has an average erosion rate of 20 tons per acre per year. Conservation practices include a drop box, culvert, drain tile, and seeding.

Brooks County Park and Recreation Critical Area Treatment and Land Drainage RC&D Measure Plan, Brooks County, West Virginia

The Notice of a Finding of No Significant Impact has been forwarded to the Environmental Protection Agency and to various Federal, State and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address. Basic data developed during the environmental assessment are on file and may be reviewed by contacting Rollin N. Swank, State Conservationist.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication in the Federal Register.

(This activity is listed in the Catalog of Federal Domestic Assistance under No. 10.901—Resources Conservation and Development—and is subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials.)

Dated: June 17, 1991.

Rollin N. Swank,

State Conservationist.

COMMISSION ON CIVIL RIGHTS

Agenda and Notice of Public Meeting of the Michigan Advisory Committee

Pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights, notice is hereby given that the meeting of the Michigan Advisory Committee to the Commission, previously announced in the Federal Register on June 18, 1991 (56 FR 27943), FR Doc. 91-14383, to convene at 8:30 a.m. and adjourn at 5 p.m. on Thursday, July 11, 1991, at the OMNI Hotel, 333 E. Jefferson, Detroit, MI 48226, has been rescheduled to convene at 9 a.m. and adjourn at 5 p.m. on Thursday, July 18, 1991, at the same location. The purpose of the meeting is to conduct a community forum on the rise of hate crimes in Michigan.

Persons desiring additional information should contact Committee Chairperson Dennis Gibson at (313) 864-9394 or Constance Davis, Director of the Midwestern Regional Office at (312) 353-8311. Hearing impaired persons who will attend the meeting and require the services of a sign language interpreter should contact the Regional Office at least five (5) working days before the scheduled date of the meeting.

The meeting will be conducted pursuant to the provisions of the rules and regulations of the Commission.

Dated at Washington, DC, June 20, 1991.

Wilfredo J. Gonzalez,

Staff Director.

BILLING CODE 6335-01-M

DEPARTMENT OF COMMERCE

Bureau of the Census

Census Advisory Committees of the American Indian and Alaska Native Populations for the 1990 Census, Asian and Pacific Islander Populations for the 1990 Census, Black Population for the 1990 Census, and Hispanic Population for the 1990 Census; Reestablishment

In accordance with the provisions of the Federal Advisory Act, 5 U.S.C. app. (1976), and Office of Management and Budget Circular A-63 of March 1974, and after consultation with GSA, the Secretary of Commerce has determined that the reestablishment of the Census Advisory Committees on the American Indian and Alaska Native Populations for the 1990 Census, Asian and Pacific Islander Populations for the 1990 Census, Black Population for the 1990 Census, and Hispanic Population for the 1990 Census is in the public interest in connection with the performance of duties imposed on the Department by law.

These committees were originally established in 1985. The Department of Commerce last renewed each committee on June 15, 1989.

The committees will continue to provide advice to the Director, Bureau of the Census, during the evaluation phase of the 1990 census cycle while focusing on the year 2000 census. Interchange is expected in evaluating the Census Bureau's programs as a whole and in their various parts; in making recommendations about the research and developmental work that is done for the year 2000 census; and is expected to improve the usefulness of statistics on racial and Hispanic origin populations generally.

The committees will each have a balanced representation of 12 members. The committees will continue to report and be responsible to the Director, Bureau of the Census, and will function solely as an advisory body in compliance with the Federal Advisory Committee Act.

The Department of Commerce will file copies of the committees' revised charters with appropriate committees in Congress.

You may address inquiries or comments to Mrs. Phyllis Van Tassel, Committee Liaison Officer, Bureau of the Census, room 2423-3, Washington, DC 20233, telephone (301) 763-5410, or Ms. Jan Jivatode, Committee Management Analyst, U.S. Department of Commerce, Washington, DC 20230, telephone (202) 377-4115.

Dated: June 20, 1991.

Barbara Everitt Bryant,

Director, Bureau of the Census.

BILLING CODE 3510-07-M

International Trade Administration

[A-570-002]

Chloropicrin From the People's Republic of China; Determination Not To Revoke Antidumping Duty Order

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of determination not to revoke antidumping duty order.

SUMMARY: The Department of Commerce is notifying the public of its determination not to revoke the antidumping duty order on chloropicrin from the People's Republic of China.

EFFECTIVE DATE: June 26, 1991.

FOR FURTHER INFORMATION CONTACT: Michael Rill or Richard Rimlinger, Office of Antidumping Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-1131.

SUPPLEMENTARY INFORMATION: On March 4, 1991, the Department of Commerce ("the Department") published in the Federal Register (56 FR 8983) its intent to revoke the antidumping duty order on chloropicrin from the People's Republic of China (49 FR 10691; March 22, 1984). The Department may revoke an order if the Secretary concludes that the order is no longer of interest to interested parties. We had not received a request for an administrative review of the order for the last four consecutive annual anniversary months and therefore published a notice of intent to revoke pursuant to § 353.25(d)(4) of the Department's regulations (19 CFR 353.25(d)(4)).

On March 29, 1991, Niklor Chemical Co., Trinity Manufacturing, Inc., Hanlin Group, Inc., and LinChem, Inc., U.S. producers of chloropicrin, objected to our intent to revoke the order. Therefore, we no longer intend to revoke the order.

Dated: June 20, 1991.

Joseph A. Spetrini,

Deputy Assistant Secretary for Compliance.

[A-580-605]

Color Picture Tubes From the Republic of Korea; Amendment to the Final Results of Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice.

EFFECTIVE DATE: June 26, 1991.

FOR FURTHER INFORMATION CONTACT: Julie Anne Osgood or Carole Showers, Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377-0167 or 377-3217, respectively.

AMENDMENT TO THE FINAL RESULTS: In accordance with section 751 of the Tariff Act of 1930, on April 25, 1991, the Department completed the administrative review of CPTs from Korea for the period January 1, 1989, through December 31, 1989 (56 FR 19084). On April 30, 1991, we received a letter from counsel for Goldstar alleging that the Department made a ministerial error. Goldstar stated that the "record of the Korean color picture tube proceeding clearly establishes that Goldstar (i) had no shipments of the subject merchandise during the period of review and (ii) had no shipments of the subject merchandise during the fair value investigation." Therefore, Goldstar contends that it should have been assigned the "new shipper" rate, *i.e.*, the *de minimis* rate, instead of the "all-other" rate from the LTFV investigation.

Goldstar's contention is correct. Because Goldstar has been investigated and reviewed, and both times found not to have shipped the subject merchandise, we have no basis to establish an antidumping duty rate for this company. Therefore, the company should be treated as a new shipper if it begins exporting the subject merchandise to the United States. Accordingly, if Goldstar begins to ship the merchandise subject to this order, the "new shipper" rate, which is zero, will apply. Accordingly, pursuant to section 751(f) of the Act, we are correcting the ministerial error in the final results of this administrative review.

Therefore, if Goldstar begins to ship the merchandise subject to this review, the "new shipper" rate, which is zero, will apply. The cash deposit requirements for manufacturers/exporters other than Goldstar specified in the final results of this administrative review remain unaffected by this amendment.

This notice is published pursuant to sections 751(f) of the Act and § 353.28 of the Department's regulations.

Eric I. Garfinkel,

Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-M

Termination of Antidumping Administrative Review on Trichloro Isocyanuric Acid and Termination, in Part, on Dichloro Isocyanurates From Japan

[A-588-019]

AGENCY: International Trade Administration/Import Administration/Department of Commerce.

ACTION: Notice of termination of antidumping administrative review on Trichloro Isocyanuric Acid and termination, in part, on Dichloro Isocyanurates from Japan.

EFFECTIVE DATE: June 26, 1991.

FOR FURTHER INFORMATION CONTACT: Kristal A. Eldredge or Rick Herring, Office of Countervailing Investigations, International Trade Administration, U.S. Department of Commerce, Washington, DC, 20230; telephone: (202) 377-0631 or 377-3530, respectively.

TERMINATION OF REVIEW: On June 1, 1990, we published the notice initiating the administrative review of the antidumping duty order on Cyanuric Acid and its Chlorinated Derivatives from Japan (55 FR 22366). That notice stated that we would review Nissan Chemical Industries, Ltd., and Shikoku Chemicals Corp., Ltd., for the period April 1, 1989 through March 31, 1990.

We subsequently published a notice of "Final Results of Antidumping Administrative Reviews and Revocation on Trichloro Isocyanuric Acid, and Revocation, in Part, on Dichloro Isocyanurates" (56 FR 19338 (April 26, 1991)). The revocation was effective November 21, 1988. As a result, we are terminating the review for all companies with respect to trichloro isocyanuric acid and Nissan Chemical Industries for dichloro isocyanurates for the period November 22, 1988 through March 31, 1990.

This termination of review and notice are in accordance with section 751(a)(1) of the Tariff Act of 1930 (19 U.S.C. 1675(a)(1)) and 19 CFR 353.25.

Dated: June 18, 1991.

Francis J. Sailer,

Deputy Assistant Secretary for Investigations, Import Administration.

Large Power Transformers From Japan; Final Results of Antidumping Duty Administrative Review

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of final results of antidumping duty administrative review.

SUMMARY: On November 20, 1990, the Department of Commerce published the

VOL
56
ISS
123
JE
26
1991
UMI

preliminary results of its administrative review of the antidumping finding on large power transformers from Japan. These final results of review cover three manufacturers/exporters of this merchandise to the United States and generally the period from September 1, 1975, through May 31, 1987.

We gave interested parties an opportunity to comment on the preliminary results. Based on our analysis of the comments received and the correction of clerical errors, we have changed the margins from those presented in our preliminary results.

EFFECTIVE DATE: June 26, 1991.

FOR FURTHER INFORMATION CONTACT: Laurie A. Lucksinger, Office of Antidumping Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377–5253.

SUPPLEMENTARY INFORMATION:

Background

On November 20, 1990, the Department of Commerce (the Department) published the preliminary results of its administrative review of the antidumping finding (37 FR 11773, June 14, 1972) on large power transformers from Japan in the **Federal Register** (55 FR 48265). The Department has now completed that administrative review in accordance with section 751 of the Tariff Act of 1930, as amended (the Tariff Act).

Scope of Review

Imports covered by the review are shipments of large power transformers; that is, all types of transformers rated 10,000 kVA (kilovolt/amperes) or above, by whatever name designated, used in the generation, transmission, distribution, and utilization of electric power. The term "transformers" includes, but is not limited to, shunt reactors, autotransformers, rectifier transformers, and power rectifier transformers. Not included are combination units, commonly known as rectiformers, if the entire integrated assembly is imported in the same shipment and entered on the same entry and the assembly has been ordered and invoiced as a unit, without a separate price for the transformer portion of the assembly. During the review period, covered merchandise was classifiable under item numbers 682.0765, 682.0765, and 682.0775 of the Tariff Schedules of the United States Annotated (TSUSA). This merchandise is currently classifiable under Harmonized Tariff Schedule (HTS) item numbers 8504.22.00, 8504.23.00, 8504.34.33, 8504.40.00, and 8504.50.00. The TSUSA and HTS item numbers are provided for convenience and Customs purposes. The written description remains dispositive.

The review covers three manufacturers/exporters of large power transformers, Fuji Electric Corporation (Fuji), Toshiba Corporation, and Hitachi Electric Corporation, and various periods from September 1, 1975, through May 31, 1987.

Analysis of Comments Received

We invited interested parties to comment on the preliminary results. At the request of the petitioner, ABB Power T&D Company, Inc., and Fuji, we held a hearing on January 30, 1991. We received case and rebuttal briefs from Fuji and the petitioner. Due to the nature of the comments, we have separated them into two sections. We begin by addressing the comments regarding dumping methodology. Then we address the technical issues concerning the calculations of the Westinghouse Price Rules (WPR) methodology.

Comments on Dumping Methodology

Comment 1: Petitioner argues that the Department's use of home market unit AN16200T1 for comparison to both U.S. sales in the 1986/87 review is inappropriate for use as the basis for foreign market value (FMV). This home market sale involved highly unusual circumstances of sale which distort the Department's price comparisons. Petitioner maintains that Fuji failed to provide information in a timely manner regarding these special circumstances of sale. Specifically, petitioner asserts that the transportation costs of the unit, which were included in the price of the unit, are so great as to distort the adjusted price which the Department used as foreign market value in its preliminary results of review.

Petitioner urges the Department to base FMV on a home market unit which does not have such unusual circumstances of sale as the Tokyo unit. Alternatively, petitioner suggests that the Department use constructed value in its analysis of both U.S. sales in the 1986/87 review.

Department's Position: Section 773(a) of the Tariff Act directs the Department to base FMV on sales of such or similar merchandise in the home market. Due to the nature of the custom-made transformers subject to the antidumping finding, determination of FMV on the basis of "such" merchandise would be very rare. Therefore, we base FMV on similar merchandise that is sold in the home market. In this case, we examined the technical specifications of the transformers Fuji sold in both markets and requested recommendations from Fuji and from petitioner. All parties agreed that the home market unit AN16200T1 was the most similar unit for comparison to both sales in the 1986/87 period. Furthermore, petitioner did not provide any arguments that physical differences between the merchandise made this comparison inappropriate. Therefore, petitioner has given us no basis for concluding that unit AN16200T1 is not similar within the meaning of section 771(16) of the Tariff Act.

In order to make a comparison between U.S. price and FMV, the statute directs the Department to adjust FMV for differences in circumstances of sale (section 773(a)(4)(B) of the Tariff Act). This is separate from the determination of such or similar merchandise. Thus, even assuming that petitioner is correct that transportation costs are extraordinarily high, this would not invalidate our determination that this unit is "similar."

Therefore, because home market unit AN16200T1 is not only similar, but is the most similar comparison unit in terms of physical characteristics to the 1986/87 U.S. units under review, we have used this unit, not constructed value, as the basis of FMV in the final results of review.

Comment 2: Petitioner alleges that home market unit AN16200T1 is inappropriate for use in determining FMV because Fuji made this sale at a price below the cost of production. Section 773(b) of the Tariff Act requires the Department to disregard home market sales which have been made at prices below the cost of production.

Department's Position: We initiated this review on July 17, 1987 (52 FR 27036). We received a response to our antidumping questionnaire in October 1987 and conducted verification in December 1987. Although petitioner has participated in the review from the outset, petitioner made its first allegation of below-cost sales after issuance of our November 20, 1990, preliminary results of review. We believe that the petitioner had sufficient information prior to the preliminary results of review to allow the filing of a timely allegation that Fuji sold home market unit AN16200T1 at a price below the cost of production. Because we have determined that this allegation was untimely, we have not proceeded with an investigation to determine whether this was a below-cost sale.

Comment 3: Petitioner argues that the Department's verification of home market unit AN16200T1 was inadequate. Given the highly unusual circumstances of the sale, the Department should have required additional documentation that would satisfactorily demonstrate that Fuji had not issued amendments to the contract or separate invoices to cover the extraordinary costs. Petitioner notes that such amendments and separate invoices reflect the general practice in the industry, and, had the verification been more thorough, the Department would have found that the home market customer made additional payments to Fuji, especially considering the unusual circumstances of this home market sale.

Department's Position: Our verification of Fuji's response was thorough and followed general procedures. Verification of an antidumping response is not an audit of a respondent's entire financial records; rather, its purpose is to determine the accuracy of the information submitted by a respondent during an investigation or review (see, e.g., *Light-Walled Rectangular Carbon Steel Tubing from Argentina*, 54 FR 13913 (April 6, 1989)). We are satisfied that Fuji provided and we reviewed all appropriate payment information at verification.

Comment 4: Petitioner argues that the Department should make an adjustment for inflation to ensure that the price of each U.S. sale is comparable to a contemporaneous FMV. Petitioner notes that the Department has acknowledged this necessity in previous reviews of this finding and in reviews of the Italian and French findings. Petitioner asserts that any inflation adjustment must be made on the increase in the costs of producing the later-shipped unit.

Department's Position: In previous reviews of the antidumping findings on Italian and French transformers, we have adjusted U.S. and home market price to reflect the amount paid pursuant to the terms of the escalation clauses of the contracts. Such clauses are included in transformer contracts to allow the manufacturer to be compensated by the customer for inflationary increases in the costs of producing the merchandise, since transformers may be produced several months, if not years, after the date of sale.

We did not make an adjustment for escalation in these reviews, however, since none of the contracts included escalation clauses.

Comment 5: Petitioner asserts that the Department departed from its usual practice in its deduction of credit expenses on the sale to the Central California Power Agency (CCPA). According to petitioner, the Department's preliminary calculations did not accurately reflect the time for which payment was outstanding. Although one of the two units was sent back to Japan for repair, the Department used the time from the second shipment date to calculate Fuji's credit cost. Petitioner argues that use of the original shipment date is appropriate, because that represents the actual credit expenses attributable to the sale.

Department's Position: We agree and have changed our calculations for the final results.

Comment 6: Petitioner notes that the Department's preliminary calculation for home market unit AN16200T1 included a deduction for insurance which reflected the cost of insuring two units. Because FMV is based on single-unit prices, only half of the insurance amount should be deducted from FMV.

Department's Position: We agree and have changed our calculations for the final results.

Comment 7: Petitioner notes that the Department neglected to make an adjustment to the price of the Grand Haven unit AZ8809T1 to account for Fuji's inland freight insurance.

Department's Position: We agree and have made the adjustment.

Comment 8: Petitioner asserts that the Department neglected to deduct the cost of oil from the price of the one of the units Fuji sold to Noranda (AB8833T3). Since the Department has made this adjustment to other U.S. units when oil has been included in the contract, yet supplied after importation into the United States, a deduction from the U.S. price is appropriate.

Department's Position: Fuji made this sale to Nissho-Iwai, the unrelated trading company from which Noranda purchased the units. The contract documents which we received at verification indicate that provision of oil was Nissho-Iwai's responsibility. Accordingly, Fuji's price to Nissho-Iwai did not include oil. Therefore, we have made no adjustment to the actual price for the cost of oil.

Comment 9: Petitioner notes two errors with respect to the Department's calculation of FMV for the sale to Nippon Kokan. First, the Department deducted an amount for supervisory expenses which exceeds the amount the Department calculated from the verification exhibits. Second, the Department deducted an amount for credit which is greater than that which Fuji claimed.

Department's Position: We have corrected the adjustment for supervisory expenses. However, Fuji's original claims for credit expenses were based on the difference in time between commissioning of the units and payment. The Department's practice is to calculate credit using the time between shipment and payment. Because commissioning occurs after shipment, we have increased Fuji's credit adjustment to reflect shipment date (see *Large Power Transformers from Italy*, 52 FR 46806 (December 10, 1987)).

Comment 10: Petitioner disagrees with the Department's calculation of credit for the sale to Ube. The Department deducted an amount for credit which is greater than that which Fuji claimed.

Department's Position: We disagree. See our response to comment 9.

Comment 11: Fuji disagrees with the Department's decision in the preliminary results to disallow the profit and overhead portions of the claimed movement and circumstance of sale expenses in calculating FMV and U.S. price. Fuji asserts that the Department verified that Fuji's records incorporate the overhead costs into the cost records of each transformer. These cost records identify expenses pertinent to the transformer. In addition, Fuji asserts that the exclusion of the overhead costs from the adjustments contributed to the dumping margins which the Department calculated.

Fuji also disagrees with the Department's decision to attribute all of the profit of each sale to the transformer portion of the sale. Fuji argues that the Department's methodology does not recognize that Fuji sells transformers and the transportation and installation of the units. Fuji asserts that the Department artificially increased the price of each transformer by assigning the overhead and profit of the entire sale just to the sale of the transformer.

Fuji acknowledges that such adjustments are not part of the Department's usual practice. However, Fuji argues that the WPR methodology which the Department uses in its analysis of the sales subject to the antidumping finding is unusual. In addition, the WPR methodology does not account for all aspects of the contracts Fuji established with its customers. Therefore, Fuji requests that the Department make adjustments to the home market and U.S. sales prices according to the response which Fuji submitted.

Department's Position: We have continued to disallow the profit and overhead portions of Fuji's claimed adjustments to home market price and U.S. price in our final results of review. The application of the WPR methodology does not affect our adjustments for differences in circumstances of sale, such as installation, transportation, and spare parts. Rather, the WPR methodology allows us to make an adjustment for differences in merchandise in these

VOL 56 ISS 123 JE 26 1991 UMI

complex, custom-made units. Therefore, circumstances of sale adjustments are governed solely by the statute and the Department's regulations.

Because Fuji has allocated its profit across the entire sale without identifying the portion of profit attributable to each part of the sale, we have adjusted only for the costs incurred in completing the sale. In addition, the overhead figure Fuji used in its claims for circumstance of sale adjustments reflects the entire experience of the factory, which produces merchandise not subject to the antidumping finding on transformers. Fuji has not demonstrated how the factory's gross overhead ratio bears a direct relationship to the sale, as required by 19 CFR 353.56(a). Therefore, we have disallowed the profit and overhead portions of Fuji's claims for circumstance of sale adjustments for sales in both markets.

Comment 12: Fuji notes that the Department used the FMV of the incorrect home market sale in its preliminary calculation for the unit sold to BPA (AD69062T1). Although the memorandum to the file indicates that the comparison unit is the Tokyo (Akishima) unit (AJ15130T1), the preliminary calculations reflect figures for the Hokkaido (AC50850T1) sale. Fuji requests that the Department correct this error.

Department's Position: We agree and have compared the BPA unit to the Tokyo (Akishima) unit for the final results of review.

Comment 13: Fuji notes that the figures used in the preliminary calculations for the sale to Tacoma (AE69053T1), compared to the home market unit sold the Hokkaido (AC50850T1), are incorrect. The home market unit adjustments for oil and credit are those of a different home market unit. Fuji requests that the Department correct this error for the final results.

Department's Position: For the preliminary results, we applied the credit figure for the Hokkaido unit which reflects the period between shipment and final payment. We have used this same figure for the final results (see our response to comment 9). However, we have made no adjustment to FMV for the cost of oil, as we discuss in response to comment 15.

Comment 14: Fuji asserts that the Department did not appropriately deduct from FMV or U.S. price the value of the spare and additional parts which were part of the customers' contracts, yet are not covered by the WPR. Fuji argues that allocation of the overhead and profit, attributable to those spare parts to the transformers, overstates the price of the transformers. Rather, the Department should deduct the full value of the additional items, including the overhead and profit amounts Fuji demonstrated were applicable to those items.

Department's Position: The WPR methodology has been established to allow the Department to make comparisons between complex, custom-made units. However, the items at issue here are not specified in the WPR. Therefore, we make an adjustment for physical difference by adjusting FMV for the items' costs. Our authority for making these adjustments is governed by 19 CFR 353.57. Fuji's figures reflect fixed and variable overhead costs, as well as profit allocated over the entire sale. In adjusting the price for these differences in physical characteristics, however, the Department limits the adjustment to the variable costs of providing these items (see *Certain Electric Motors from Japan* (49 FR 32627, August 15, 1984)). Therefore, in our transformer comparisons, the additional adjustment for non-WPR items reflects the direct cost of manufacture.

Comment 15: Fuji disagrees with the Department's methodology of accounting for the difference in oil provisions of U.S. and home market contracts. Fuji maintains that, due to the nature of the WPR methodology, the results are inequitable because the Department reduces the U.S. price by the amount of the actual oil expenses and reduces the WPR theoretical price by the 1968 figure of $0.22. However, when determining FMV, the Department makes no adjustment to FMV or to the WPR theoretical price for the cost of oil. Such inequitable treatment results in artificial dumping margins.

Department's Position: We did not include the cost of oil in any of Fuji's U.S. sales, since either the oil was added after importation of the transformer or the oil was not included in the relevant contract price.

On the other hand, with respect to most of the sales used for the purpose of FMV, the terms of the sale include the provision of oil. Therefore, oil is included in the FMV. It is unnecessary to make any difference in merchandise adjustment between the U.S. price and FMV because the WPR ratio already accounts for this. The WPR provides an adjustment for $0.22 per gallon, which we make to the theoretical price. This is consistent with our practice in previous reviews of antidumping findings on large power transformers (see, e.g., 52 FR 46800, December 10, 1987).

Comment 16: Fuji asserts that the appropriate home market price to use in the efficiency adjustment calculation is the home market price less all movement and circumstance-of-sale expenses. For the preliminary results, the Department used the home market price less only movement expenses in its calculation. Because the efficiency adjustment measures the efficiency of the transformer itself, Fuji argues that the price the Department applies in the calculation should not include other items, such as spare parts, supervision expenses, commissions, credit, and home market packing.

Department's Position: We agree that the efficiency adjustment should only reflect the value of the transformer which the customer received. Therefore, we have made this calculation for each transformer using the ex-factory home market price, net of all appropriate circumstance of sale adjustments.

Comments on Technical Calculations

Comment 17: Petitioner asserts that the Department neglected to include a 1 percent adder for the extended warranty of unit AZ69009T1, which Fuji sold to Grand Haven.

Department's Position: Our preliminary calculations included this adjustment.

Comment 18: Petitioner argues that the Department should include a 3 percent adder for the 36-month extended warranties of the additional units Fuji sold to Grand Haven, units AZ69009T2 and AZ69009T3.

Department's Position: We agree and have changed our calculations for the final results.

Comment 19: Petitioner argues that the WPR calculation of the DWR unit, AZ69024T1, should include a 3 percent adder for the 36-month warranty, a 2 percent adder for the in/out warranty, a 3.5 percent adder to account for manufacture of the unit further than 3500 miles from its destination, and a 5 percent adder for the special seismic reinforcement requirement of the bid specifications. In addition, the WPR calculations should include dollar adders for 9 low voltage bushing current transformers (BCTs), 1 high-voltage BCT, the special paint finish, and spare parts.

Department's Position: We disagree. An adder of 1 percent is the maximum extended warranty provided in the WPR for a transformer of this size. We have included this adder. Regarding the in/out warranty, we find no information on the record which indicates that an in/out warranty was included in the sale.

The contract states that the price will be lowered by 3.5 percent if the unit is manufactured at a site further than 3500 miles from its destination. This is not a technical specifications item for which we should consider an adjustment to the WPR price. Rather, we have considered whether this contractual requirement affects the actual price of the transformer. Because we are satisfied that the price we have used in our calculations reflects the final price of the transformer, which may or may not have included the 3.5 percent adder at the end of negotiations, we have not adjusted the U.S. price by 3.5 percent.

We have examined the appropriateness of a special seismic reinforcement adjustment in the WPR price methodology we use in these proceedings. We have taken into account the fact that transformers in the United States are frequently transported by rail and the bracing required for such transportation is comparable to the special seismic reinforcement which some foreign and U.S. customers require. Since the bracing requirement is part of standard transformer design, we have not included a special adder to the WPR price for special seismic reinforcement.

We have included an amount for the BCTs in our calculations. According to our review of the documentation, the paint requirements for this unit are standard. Therefore, we have not added an amount to the theoretical price for special paint. Finally, because the spare parts are not covered by the WPR, we have adjusted the actual price for the inclusion of spare parts in the contract.

Comment 20: Petitioner asserts that the Department miscalculated the pricing kVA of unit AE69183T1, which Fuji sold to TAMCO.

Department's Position: We disagree. In the WPR applicable to this transformer, step 1.3. addresses no-load-tap-changing equipment. Use of step 1.3.A. is appropriate if the unit has no-load-tap-changing equipment. Use of step 1.3.B. is appropriate if the unit does not have no-load-tap-changing equipment. Because the TAMCO unit does not have no-load-tap-changing equipment, we have calculated the kVA using step 1.3.B.

Comment 21: Petitioner asserts that the WPR calculations for the DOW unit, AC69110T1, should include a 1 percent adder for the FOB destination of the sale, a 1 percent adder for the 18-month warranty, and an adder for the impulse test required by the bid specifications.

Department's Position: We disagree with petitioner. There is no adder in WPR 48–620 for FOB destination terms. We agree that the adders for the 18-month warranty and impulse test are appropriate.

Comment 22: Petitioner asserts that the WPR calculation of unit AD69061T1, which Fuji sold to the DWR Edmonston plant, should include a 2 percent adder for the in/out warranty, a 3 percent adder for the extended warranty, and a 5 percent adder for the special seismic shock reinforcement requirement. In addition, the calculations should include a dollar adder for the cost of spare parts.

Department's Position: We disagree. We see no requirement in the record that an in/out warranty was part of this sale. Because the maximum warranty provision in WPR 48–620 is for 1 percent, we have limited our addition to 1 percent for the warranty. See our response to comment 19 regarding an adder for special seismic reinforcement. Finally, because the spare parts are not covered by the WPR, we have adjusted the actual price for the inclusion of spare parts in the contract.

Comment 23: Petitioner argues that the WPR calculation for the BPA unit, AD69062T1, should include a 5 percent adder for the two warranties and the FOB destination term of sale.

Department's Position: We disagree. There is no indication that the specifications required an in/out warranty or an extended warranty. There is a one-year warranty specified in the contract. Because the WPR assumes a one-year warranty in its figures, we have not included an adder for any warranty requirements. Regarding petitioner's assertion regarding FOB terms, please see our response to comment 21.

Comment 24: Petitioner argues that the WPR calculation for the Tacoma unit, AE69053T1, should include a 5 percent adder for the extended and in/out warranties.

Department's Position: We disagree. We see no requirement in the record that an in/out warranty was part of this sale. Because the maximum warranty provision in WPR 48–620 is for 1 percent, we have limited our addition to 1 percent for the extended warranty.

Comment 25: Petitioner argues that the WPR calculation for the BOR unit, AJ69085T1, should include a 2 percent adder for the in/out warranty, a 3 percent adder for the five-year extended warranty, and a dollar adder for the special paint finish.

Department's Position: We agree that the 2 percent adder for the in/out warranty is appropriate for the BOR unit. However, the maximum warranty provision in WPR 48–620 is for 1 percent, so we have limited our addition to 1 percent for the extended warranty.

According to our review of the documentation, the paint requirements for this unit are standard. Therefore, we have not added an amount to the theoretical price for special paint.

Comment 26: Petitioner argues that the WPR calculations for the home market units Fuji sold to Nippon Kokan, Idemitsu, Ube, and Tokyo (Akishima) should not include the 2 or 3 percent adders for special charges, since these special charges are not identified in the specification sheets for these units.

Department's Position: We disagree. Provisions for special charges are specified in Rules 53 and 54 of WPR 48–620. Because Fuji's detailed specification sheets indicate that there were such additional charges in the contract for the special warranty and extended warranty, we have made an adjustment to the WPR price.

Comment 27: Petitioner asserts that the Department miscalculated the pricing kVA of the Itoh Seitetsu unit. As an example, petitioner notes that the special impedance should have an adder of 3 percent, not 14 percent as the Department calculated. In addition, the Department included an adder for special charges without justification.

Department's Position: We disagree. Because this transformer does not have no-load-tap-changing equipment, the correct kVA pricing calculation in WPR 45–520 for this transformer is at step 1.3.B., not step 1.3.A., as petitioner proposes (see our position in response to comment 20).

We note that the adder for impedance is separate from the calculation of the kVA price. Because the Japanese and U.S. standards regarding temperature rise vary, and this affects our theoretical WPR price, we must correct the transfomer's guaranteed impedance for the difference in the two standards (the 1968 WPR assumes the U.S. standard of 55°C temperature rise and the Japanese standard assumes 50°C temperature rise). After adjusting for these differences in temperature rise, we apply Rule 5 as the adder for impedance.

Our addition of 2 percent for special charges accounted for the in/out warranty provision of the contract.

Comment 28: Petitioner disagrees with the Department's inclusion of a 2 percent adder for special charges or a dollar adder for special paint finish in the WPR calculation of the unit Fuji sold to Hokkaido.

Department's Position: The transformer had special paint for salt exposure, which we have included in the WPR price. We have accounted for the contract's requirement of an in/out warranty by applying the 2 percent adder for special charges.

Comment 29: Fuji asserts that the Department's WPR price for the two

VOL

1991
UMI

DWR units, AZ69024T1 and AZ69024T2, requires several corrections. First, the amount for additional taps should be 0.5, not 5.5 as listed in the preliminary calculations. Second, Fuji does not agree with the Department's adder of $4467 for winding temperature equipment. Fuji calculates an amount of $866. Third, although lightning arresters were required in the original contract, the verification documents demonstrate that the contract was amended to remove the lightning arresters. Finally, Fuji questions the adder for bushings. Since the DWR units required standard bushings for the appropriate current levels, no adder is necessary.

Department's Position: The WPR requires an adder of 0.5 percent for one additional tap and 5 percent under Rule 17 for winding complications. Therefore, the total adder is 5.5 percent, which is what we used in our preliminary calculations. Our review of Fuji's documentation indicates that the adder of $4467 for winding temperature equipment is correct. We have removed the adder for lightning arresters. We note that the bushing standards are by voltage of the transformers, not by the current. Therefore, our calculation reflects the voltage characteristics of the units.

Comment 30: Fuji argues that the Department used the incorrect WPR to calculate the theoretical price of the Noranda unit, AE69633T3. Since the capacity of the Noranda unit is 130,000 kVA and the comparable unit (Volta, AE69700T1) is 83,200 kVA, the large power transformer WPR should have been used, not the medium power transformer WPR. In addition, the calculation of kVA is correct, yet the wrong kVA was used in the complete calculations. In addition, the adder for bushings is incorrect.

Regarding the Volta unit, Fuji asserts that the Department's WPR theoretical price does not include an adder for a temperature rise test or the adder for the automatic control. Finally, Fuji requests that the Department account for the oil purifier and insulation oil in its calculations.

Department's Position: We have used WPR 45–421, which is for Furnace and Rectifier Transformer Voltage Control Equipment. The Noranda and Volta units are regulating autotransformers and fall within this WPR, which covers a range of 500–150,000 kVA with a primary voltage to 69 kV.

There is no evidence on the record that Fuji conducted a temperature rise test on a thermally duplicate transformer. Therefore, we have included one temperature rise test in the WPR price of the transformer.

Similar to our response to comment 29, the bushing standards are by voltage of the transformers, not by the current. Therefore, our calculation reflects the voltage characteristics of the unit.

None of the technical documentation on the record indicates that the Volta unit had an oil purifier as an accessory to the load tap changer. Therefore, we have made no adjustment to the theoretical WPR price or FMV for this kind of equipment. We have amended the theoretical WPR to reflect the adder for an automatic control for the load tap changer.

We have not made an adjustment for oil inclusion, as we discuss in response to comment 15.

Comment 31: Fuji argues that the Department should make an adjustment to the WPR prices of various home market and U.S. units for which additional seismic reinforcement was necessary to meet the customers' requirements. The bracing necessary to meet those requirements far exceeds the strength of the units which the WPR calculation assumes.

Department's Position: We disagree. See our response to comment 19.

Final Results of Review

As a result of the comments received and the correction of certain clerical errors, we determine that the following margins exist:

Manufacturer/exporter	Period	Margin (percent)
Fuji Electric Corp	9/1/75–5/31/85	4.22
	6/1/85–5/31/86	*4.22
	6/1/86–5/31/87	0.0
Hitachi Electric Corp	6/1/86–5/31/87	*9.8
Toshiba Corp	6/1/86–5/31/87	*9.39

*No shipments; margins from last administrative review in which there were shipments.

The Department will instruct the Customs Service to assess antidumping duties on all appropriate entries. Individual differences between United States price and foreign market value may vary from the percentages stated above. The Department will issue appraisement instructions directly to the Customs Service.

Furthermore, as provided for in section 751(a)(1) of the Tariff Act, a cash deposit of estimated antidumping duties based on the above margins shall be required on entries of this merchandise from these firms. For Fuji, the cash deposit rate will be zero percent, based on the most recent review of its entries. For any future entries of this merchandise from an exporter not covered in this or in any prior reviews, whose first shipments occurred after May 31, 1987, and who is unrelated to any reviewed firm or any previously reviewed firm, a cash deposit of zero percent shall be required. These deposit requirements are effective for all shipments of Japanese large power transformers entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and 19 CFR 353.22.

Dated: June 17, 1991.

Marjorie A. Chorlins,

Acting Assistant Secretary for Import Administration.

Malleable Cast Iron Pipe Fittings From Brazil; Determination Not To Revoke Antidumping Duty Order

AGENCY: International Trade Administration/Import Administration Department of Commerce.

ACTION: Determination not to revoke antidumping duty order.

SUMMARY: The Department of Commerce is notifying the public of its determination not to revoke the antidumping duty order on malleable cast iron pipe fittings from Brazil.

EFFECTIVE DATE: June 26, 1991.

FOR FURTHER INFORMATION CONTACT: Dennis U. Askey or John R. Kugelman, Office of Antidumping Compliance, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone (202) 377–3601.

SUPPLEMENTARY INFORMATION:

Background

On May 2, 1991, the Department of Commerce (the Department) published in the **Federal Register** (56 FGR 20193) its intent to revoke the antidumping duty order on missiles cast iron pipe fittings from Brazil (51 FR 16640, May 21, 1986). The Department may revoke an order if the Secretary concludes that the order is no longer of interest to interested parties. We did not receive a request for administrative review of the order for the last four consecutive annual anniversary months and, therefore, published a notice of intent to revoke the order pursuant to 19 CFR 353.25(d)(4).

On May 30, 1991, the Cast Iron Pipe Fittings Committee, an interested party, objected to our intent to revoke the order. Therefore, we no longer intend to revoke the order.

Dated: June 18, 1991.

Joseph A. Spetrini,

Deputy Assistant Secretary for Compliance.

[FR Doc. 91–15222 Filed 6–25–91; 8:45 am]

BILLING CODE 3510–DS–M

[A–588–820]

Initiation of Antidumping Duty Investigation: New Minivans From Japan

AGENCY: Import Administration, International Trade Administration, Commerce.

EFFECTIVE DATE: June 26, 1991.

FOR FURTHER INFORMATION CONTACT: David Binder, Office of Antidumping Investigations, Import Administration, U.S. Department of Commerce, room B099, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone (202) 377–1779.

Initiation

Petition

On May 31, 1991, Chrysler Corporation, Ford Motor Company, and General Motors Corporation filed with the Department of Commerce (the Department) an antidumping duty petition on behalf of the United States industry producing minivans. In accordance with 19 CFR 353.12, the petitioners allege that imports of new minivans from Japan are being, or are likely to be, sold in the United States at less than fair value within the meaning of section 731 of the Tariff Act of 1930, as amended (the Act), and that these imports are materially injuring, or threatening material injury to, a U.S. industry. The petitioners supplemented the petition on June 17, 1991.

The petitioners have stated that they have standing to file the petition because they are interested parties, as defined in 19 CFR 353.2(k), and because they have filed the petition on behalf of the U.S. industry producing minivans. If any interested party, as described in 19 CFR 353.2(k) (3), (4), (5), or (6), wishes to register support for, or opposition to, this investigation, please file written notification with the Assistant Secretary for Import Administration.

United States Price and Foreign Market Value

Petitioners base their estimates of United States price (USP) on published dealer prices for Toyota and Mazda minivans. Petitioners have based USP on exporter's sales price because both Toyota and Mazda sell their minivans through their U.S. subsidiaries. Petitioners adjusted USP, as appropriate, for foreign inland freight and handling, ocean freight, marine insurance, pipeline financing, advertising, U.S. selling and administrative expenses, import duties, and sales incentives.

Petitioners base their estimates of Foreign Market Value (FMV) on published dealer retail prices for Toyota and Mazda minivans. Petitioners adjusted FMV for dealer discounts, inland freight, pipeline financing, advertising, selling and administrative expenses, and differences in merchandise.

Petitioners allege dumping margins ranging from 5.4 to 30.5 percent.

Initiation of Investigation

Under 19 CFR 353.13(a), the Department must determine, within 20 days after a petition is filed, whether the petition probably alleges the basis on which an antidumping duty may be imposed under section 731 of the Act, and whether the petition contains information reasonably available to the petitioners supporting the allegations. We have examined the petition on new minivans from Japan and find that it meets the requirements of 19 CFR 353.13(a). Therefore, we are initiating an antidumping duty investigation to determine whether imports of new minivans from Japan are being, or are likely to be, sold in the United States at less than fair value.

In accordance with 19 CFR 353.13(b), we are notifying the International Trade Commission (ITC) of this action.

Any producer or reseller seeking exclusion from a potential antidumping duty order must submit its request for exclusion within 30 days of the date of the publication of this notice. The procedures and requirements regarding the filing of such requests are contained in 19 CFR 353.14.

Scope of Investigation

The products covered by this investigation are new minivans. Minivans are on-highway motor vehicles, with a gross vehicle weight that is generally less than 6,000 pounds, a height that is generally between 62 and 75 inches, having a single, box-like structure that envelopes both the space for the driver and front-seat passenger and the rear space (which has flat or nearly flat floors and is usable for carrying passengers and cargo), a hood that is generally sloping and a short distance from the cowl to the front bumper relative to the overall length of the vehicle, a seat configuration that permits passengers to walk from the front area to the rear area of the vehicle, and a rear side access door (or doors) and a rear door (or doors) that provide wide and level access to the rear area. During this investigation, we will continue to consider this definition of the scope and will refine it if necessary. Minivans are currently classified under either subheading 8703 or subheading 8704 of the Harmonized Tariff Schedule (HTS). Although the HTS subheadings are provided for convenience and customs purposes, our written description of the scope of this proceeding is dispositive.

Preliminary Determination by ITC

The ITC will determine by July 15, 1991 whether there is a reasonable indication that imports of new minivans from Japan are materially injuring, or threaten material injury to, a U.S. industry. If its determination is negative, the investigation will be terminated. If affirmative, the Department will make its preliminary determination on or before November 7, 1991, unless the investigation is terminated pursuant to 19 CFR 353.17 or the preliminary determination is extended pursuant to 19 CFR 353.15.

VOL 56 ISS 123 JE 26 1991 UMI

This notice is published pursuant to section 732(c)(2) of the Act and 19 CFR 353.13(b).

Dated: June 19, 1991.

Eric I. Garfinkel,

Assistant Secretary for Import Administration.

Certain Circular Welded Carbon Steel Pipes and Tubes From Thailand; Preliminary Results of Countervailing Duty Administrative Review

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of preliminary results of countervailing duty administrative review.

SUMMARY: The Department of Commerce has conducted an administrative review of the countervailing duty order or certain circular welded carbon steel pipes and tubes from Thailand for the period January 1, 1988 through December 31, 1988. We preliminarily determine the total bounty or grant to be 0.90 percent *ad valorem* for Saha Thai and 7.18 percent *ad valorem* for all other exporters. We invite interested parties to comment on these preliminary results.

EFFECTIVE DATE: June 26, 1991.

FOR FURTHER INFORMATION CONTACT: Stephanie Moore or Paul McGarr, Office of Countervailing Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-2786.

SUPPLEMENTARY INFORMATION:

Background

On August 7, 1989, the Department of Commerce (the Department) published in the **Federal Register** a notice of "Opportunity to Request Administrative Review" (54 FR 32365) of the countervailing duty order on certain circular welded carbon steel pipes and tubes from Thailand (50 FR 32751; August 14, 1985). On August 31, 1989, the petitioners, the standard pipe subcommittee of the Committee on Pipe and Tube Imports and its individual producer members, requested an administrative review of the order. We initiated the review, covering the period January 1, 1988 through December 31, 1988, on September 20, 1989 (54 FR 38712). The Department has now conducted that administrative review in accordance with section 751 of the Tariff Act of 1930, as amended (the Tariff Act).

Scope of Review

Imports covered by this review are shipments of circular welded carbon steel pipes and tubes, with an outside diameter of 0.375 inch or more but not over 16 inches, of any wall thickness. These products, commonly referred to in the industry as standard pipe or structural tubing, are produced to various ASTM specifications, most notably A-120, A-53 and A-135. During the review period, such merchandise was classifiable under item numbers 610.3231, 610.3234, 610.3241, 610.3242, 610.3252, 610.3254, 610.3256, 610.3258 and 610.4925 of the Tariff Schedules of the United States Annotated (TSUSA). This merchandise is currently classifiable under item numbers 73.04.1010, 73.04.2050, 73.04.2070, 73.04.3100, 73.04.3900, 73.04.9050, 73.05.1010, 73.05.1110, 73.05.1210, 73.05.1910, 73.05.3140, 73.05.3910, 73.05.9010, 73.05.2060, 73.06.9010 of the Harmonized Tariff Schedule. The TSUSA and HTS item numbers are provided for convenience and Customs purposes. The written description remains dispositive.

The review covers the period January 1, 1988 through December 31, 1988, and nine programs. Six producers of the Thai pipes and tubes exported the subject merchandise to the United States during the review period. Only one exporter, Saha Thai, responded to the Department's questionnaire.

Analysis of Programs

(1) Tax Certificates for Exports

Under the Tax and Duty Compensation of Exported Goods Produced in the Kingdom Act of 1981 (Tax and Duty Act), the Royal Thai Government (RTG) issues tax certificates to the exporter of record to rebate indirect taxes and import duties on inputs used to produce exports. The rebate rates are computed on the basis of an input/output (I/O) study initially published in 1980 based on 1975 data, and updated in 1985 using 1989 data.

The Thai Ministry of Finance uses the I/O study to compute the value of total inputs (both imports and local purchases) used in a discrete range of sector-specific products at ex-factory prices. The Ministry then calculates the import duties and indirect taxes on each input, and two rebate rates. The "A" rate rebates import duties and indirect domestic taxes. The "B" rate rebates only business taxes. The "B" rate is used by exporters that receive duty drawback, import duty exemptions on raw materials, or that do not use imported raw materials in their production process. The "A" or "B" rate is then applied to the total f.o.b. value of the export to determine the amount of the rebate.

The rebates are paid to companies by tax certificates which can be used to pay various tax liabilities, transferred or sold to other companies. The rebate rates in effect during the review period were set forth in the "Notification of the Committee on Tax Rebates, No. Or. 2/2529," effective February 5, 1986. The calculation of these rates was based on the updated I/O study published in 1985. The "A" rate for secondary steel products (sector I/O 106), which includes circular welded carbon steel pipes and tubes, is 8.11 percent, and the "B" rate is 4.98 percent.

In Final Affirmative Countervailing Duty Determination and Countervailing Duty Order; Certain Apparel from Thailand, 50 FR 9818 (March 12, 1985), we examined Thailand's rebate system under the Tax and Duty Act. We found that the program was intended to rebate indirect taxes and import duties and that the rebate rates had been reasonably calculated. In subsequent investigations involving products from Thailand, including the investigation in this proceeding, we reaffirmed this determination. See, Final Affirmative Countervailing Duty Determination and Countervailing Duty Order; Carbon Steel Butt-Weld Pipe Fittings from Thailand, 55 FR 1695 (January 18, 1990) (*Butt-Weld Pipe Fittings*). Because this program is available only to exporters, it is countervailable to the extent that it confers a rebate in excess of the Department's calculated allowable rebate of import duties and indirect taxes.

To calculate the rate of allowable rebate, the Department must first determine the f.o.b. value of exports. The value of all domestically-produced finished goods, as shown in the I/O tables, is an ex-factory value. Because the rebate is applied to the f.o.b. value of export, we adjusted the ex-factory value to reflect an f.o.b. value. The I/O tables do not separate wholesale margin and transportation costs applicable solely to domestically-produced finished goods. Therefore, we divided the wholesale margin and transportation costs for all finished goods in the I/O 106 sector, including imports, by the ex-factory value of imported and domestically-produced finished goods in the sector. We then multiplied the ex-factory value of all domestically-produced finished goods in the sector by this ratio. We added the result to the ex-factory value of domestically-produced finished goods in order to obtain f.o.b. adjusted value.

Consistent with Butt-Weld Pipe Fittings, we divided the import duties and tax incidence on all items physically incorporate into I/O 106 sector products by the f.o.b. adjusted value of all domestically produced finished goods in the sector to obtain the allowable rebate rates. We then compared the authorized rebate rate of 8.11 percent, which is based on both physically and non-physically incorporated inputs, to the allowable rebate rate and found that there is an excessive remission of import duties and indirect taxes to exporters of pipes and tubes. The difference between the "A" rate and the allowable rebate is 0.81 percent. To calculate the overrebate of the "B" rate, we followed the same procedure outlined above, except that we divided the domestic taxes by the f.o.b. adjusted value and compared the result to the authorized rebate rate of 4.98 percent. The difference between the "B" rate and the allowable rebate is 0.51 percent.

Saha Thai only used the "B" rate. For the exporters that did not respond to our questionnaire, we used the best information available ("BIA"), in accordance with section 776(c) of the Tariff Act. As BIA, we assumed that the nonresponding exporters used only the "A" rate. On this basis, we preliminarily determine the benefit from this program to be 0.51 percent *ad valorem* for Saha Thai and 0.81 percent *ad valorem* for all other exporters.

(2) Export Packing Credits

Export packing credits (EPCs) are short-term pre-shipment and post-shipment export loans. Exporters apply to commercial banks for EPCs and the commercial banks, in turn, submit the applications to the Bank of Thailand (BOT) for approval. Under the "Regulations Governing the Purchase of Promissory Notes Arising from Exports" (B.E.2528), effective January 2, 1986, the BOT repurchases promissory notes issued by creditworthy exporters through commercial banks. To qualify for the repurchase arrangement, promissory notes must be supported by a letter of credit, sales contract, purchase order, usance bill or warehouse receipt. The notes are available for a maximum of 180 days and interest is payable on the due date of the loan.

The BOT charges the commercial bank account for the principal amount plus five percent interest per annum on repurchased packing credits issued in connection with exports in categories one and two of the "Notification of the Board of Investment No. 40/2521." If the terms of the loan are not met, the BOT charges the commercial bank a penalty, retroactive to the first day of the loan, at an eight percent interest rate. The commercial bank then charges the exporter's account for the principal amount plus seven percent interest on the due date of the loan. If the exporter has not met the terms of the loan, the commercial bank passes on the additional eight percent penalty charge over the term of the loan.

If the exporter can prove that shipment of the goods took place within 60 days after the due date (in the case of pre-shipment loans), or the foreign currency was received within 60 days after the due date (in the case of post-shipment loans), the penalty is refunded to the commercial bank by the BOT. If only a portion of the goods was shipped or only a portion of the foreign currency was received by the due date, the exporter receives only a partial refund, proportional to the value of the goods shipped or the foreign currency received. The purpose of the penalty charge is to ensure that companies are using the EPCs to finance export sales.

On October 1, 1988, the RTG issued new regulations that coexisted with the prior regulations until December 31, 1988. Effective October 1, 1988, all first time applicants for EPCs had to apply under the new regulations. EPCs received under the previous regulations, but still outstanding as of January 1, 1989, continued under those regulations until their expiration dates.

Under the new regulations, only pre-shipment financing is permitted. The maximum rate commercial banks can charge exporters was increased from 7 to 10 percent. In addition, commercial banks can lend up to 100 percent of the shipment value, but can only rediscount up to 50 percent of the loan amount with the BOT. Under the previous regulations, the commercial banks could only lend up to 80 percent of the shipment value and the BOT rediscounted 100 percent of the loan amount. Because only exporters are eligible for these loans, we preliminarily determine that they are countervailable to the extent that they are provided at preferential rates.

For our benchmark interest rate, we used the weighted-average interest rate charged by commercial banks on domestic loans, bills, and overdrafts. We have used the data on these rates as the basis for our benchmark in all previous Thai cases. See, e.g., Butt-Weld Pipe Fittings. For this review, we used a benchmark rate of 9.57 percent.

To calculate the benefit from the EPC loans on which interest was paid during 1988, we compared the amount of interest actually paid during the review period to the amount that would have been paid at the benchmark rate. For Saha Thai, we divided the company's benefit by its total exports of the subject merchandise to the United States.

For the exporters that did not respond to our questionnaire, we used, as BIA, the highest company EPC rate calculated in the last administrative review. On this basis, we preliminarily determine the benefit from this program to be 0.39 percent *ad valorem* for Saha Thai and 1.60 percent *ad valorem* for all other exporters.

(3) Electricity Discounts for Exporters

The three electricity generating authorities of Thailand, the Electricity Generating Authority (EGAT), the Metropolitan Electricity Authority (MEA), and the Provincial Electrical Authority (PEA), provide discounts on electricity rates charged to producers of export products. All exporters that are eligible to receive tax certificates qualify for the electricity discounts.

Once the export transaction has been completed, the exporter may apply for the discount by presenting to the electricity authority from which it receives its electricity bill the appropriate documents to verify that an export shipment has been made. The discount is calculated based on the rebate rate in effect and consumption by the company, and the discount is credited on a subsequent electricity bill.

Because electricity discounts are available only to exporters, we preliminarily determine that they are countervailable. Saha Thai did not apply for or receive electricity discounts during the review period. For the exporters that did not respond to our questionnaire, we used, as BIA, the highest company electricity discount benefit calculated in our last administrative review. On this basis, we preliminarily determine the benefit from this program to be zero for Saha Thai and 2.88 percent *ad valorem* for all other exporters.

(4) Tax and Duty Exemptions Under Section 28 of the Investment Promotion Act

The Investment Promotion Act (IPA) of 1977 provides incentives for investment to promote development of the Thai economy. The IPA authorizes, among other incentives, the exemption of import duties and domestic taxes with respect to qualifying projects. Section 28 of the IPA provides an exemption from payment of import duties and business taxes on machinery

VOL
56
ISS
123
JE
26
1991
UMI

used to produce promoted products. Because benefits under this program are contingent upon export performance, and cover capital equipment (*i.e.*, machinery) that is not physically incorporated in the subject merchandise, we preliminarily determine that the benefits provided under this program are countervailable. See Butt-Weld Pipe Fittings.

Saha Thai did not apply for or receive any benefits under the IPA program during the review period. For the exporters that did not respond to our questionnaire, we used, as BIA, the benefit calculated in Butt-Weld Pipe Fittings for this program in the 1988 review period of 1.89 percent *ad valorem*. On this basis, we preliminarily determine the benefit from this program to be zero for Saha Thai and 1.89 percent *ad valorem* for all other exporters.

(5) Other Programs

We also examined the following programs and preliminarily determine that the exporters of the subject merchandise did not use them during the review period.

A. Repurchase of Industrial Bills.

B. Export Processing Zones.

C. International Trade Promotion Fund.

D. Reduced Business Taxes for Producers of Intermediate Goods for Export Industries.

E. Additional Incentives under the IPA.

- Income tax exemption.
- Goodwill and royalties tax exemption.
- Tax deduction of foreign marketing expenses and foreign taxes.
- Exemption of sales tax for promoted industries.
- Exemption on export duties and business taxes on products produced or assembled by promoted firms.
- Deduction from assessable income of an amount equal to 5 percent of the increase over the previous year of income derived from exports.

Preliminary Results of Review

As a result of our review, we preliminarily determine the total bounty or grant for the period January 1, 1988 through December 31, 1988 to be 0.90 percent *ad valorem* for Saha Thai and 7.18 percent *ad valorem* for all other exporters.

The Department intends to instruct the Customs Service to assess countervailing duties of 0.90 percent of the f.o.b. invoice price on shipments form Saha Thai and 7.18 percent of the f.o.b. invoice price on shipments from all other firms exported on or after January 1, 1988 and on or before December 31, 1988.

Further, the Department intends to instruct the Customs Service to collect a cash deposit of estimated countervailing duties, as provided by section 751(a)(1) of the Tariff Act, of 0.90 percent of the f.o.b. invoice price on all shipments of the subject merchandise from Saha Thai and 7.18 percent from all other firms from Thailand entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this administrative review.

Parties to the proceeding may request disclosure of the calculations methodology and interested parties may request a hearing not later than 10 days after the date of publication of this notice. Interested parties may submit written arguments in case briefs on these preliminary results within 30 days of the date of publication. Rebuttal briefs, limited to arguments raised in case briefs, may be submitted seven days after the time limit for filing the case brief. Any hearing, if requested, will be held seven days after the scheduled date for submission of rebuttal briefs. Copies of case briefs and rebuttal briefs must be served on interested parties in accordance with § 355.38(e) of the Commerce regulations.

Representatives of parties to the proceeding may request disclosure of proprietary information under administrative protective order no later than 10 days after the representative's client or employer becomes a party to the proceeding, but in no event later than the date the case briefs, under 19 CFR 355.38(c), are due.

The Department will publish the final results of this administrative review including the results of its analysis of issues raised in any case or rebuttal brief or at a hearing.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1) and 19 CFR 355.22).

Dated: June 20, 1991.

Marjorie A. Chorlins,

Acting Assistant Secretary for Import Administration.

Live Swine From Canada; Preliminary Results of Countervailing Duty Administrative Review

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of preliminary results of countervailing duty administrative review.

SUMMARY: The Department of Commerce has conducted an administrative review of the countervailing duty order on live swine from Canada for the period April 1, 1989 through March 31, 1990. We preliminarily determine the net subsidy to be Can$0.0051/lb. for sows and boars, and Can$0.0937/lb. for all other live swine. We invite interested parties to comment on these preliminary results.

EFFECTIVE DATE: June 25, 1991.

FOR FURTHER INFORMATION CONTACT: Britt Doughtie or Maria MacKay, Office of Countervailing Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-2786.

SUPPLEMENTARY INFORMATION:

Background

On August 8, 1990, the Department of Commerce (the Department) published in the **Federal Register** a notice of "Opportunity to Request Administrative Review" (55 FR 32280) of the countervailing duty order on live swine from Canada (50 FR 32880; August 15, 1985). On August 17, 1990, the National Pork Producers Council requested an administrative review of the order. We initiated the review, covering the period April 1, 1989 through March 31, 1990, on September 24, 1990 (55 FR 39032). The Department has now conducted that administrative review in accordance with section 751(a) of the Tariff Act of 1930, as amended (the Tariff Act).

Scope of Review

Imports covered by this review are shipments of live swine from Canada. Such merchandise is classifiable under the Harmonized Tariff Schedule (HTS) item numbers 0103.91.00 and 0103.92.00. The HTS item numbers are provided for convenience and Customs purposes. The written description remains dispositive.

The review covers the period April 1, 1989 through March 31, 1990 and 39 programs.

Analysis of Programs

I. Federal Programs

1. Feed Freight Assistance Program

The Feed Freight Assistance (FFA) Program is administered by the Livestock Feed Board of Canada (the Board) under the Livestock Feed Assistance Act of 1966 (LFA). The Board acts to ensure: (1) The availability of feed grain to meet the needs of livestock feeders; (2) the availability of adequate storage space in Eastern Canada to meet the needs of livestock feeders; (3) reasonable stability in the price of feed grain in Eastern Canada to meet the needs of livestock feeders; and (4) equalisation of feed grain prices to livestock feeders in Eastern Canada, British Columbia, the Yukon Territory or the Northwest Territories. Although this program is clearly designed to benefit livestock feeders, FFA payments are also made to feed mills that transform the feed grain into livestock feed, when these feed mills are the first purchasers of this grain. The Board makes payments related to the cost of feed grain storage in Eastern Canada, and payments related to the cost of feed grain transportation to, or for the benefit of, livestock feeders in Eastern Canada, British Columbia, the Yukon Territory and the Northwest Territories, in accordance with the regulations of the LFA.

Because this program benefits only a specific group of enterprises or industries, namely livestock feeders and grain millers, in specific areas, namely Eastern Canada, British Columbia, the Yukon Territory and the Northwest Territories, we preliminarily determine that the program is countervailable. During the review period, payments were made to feed grain users for transportation assistance.

The Board calculated that 3.25 percent of the total transportation expenditures for feed grain users receiving assistance under this program in FY 1989/90 benefited live swine producers in the designated areas of Canada. Therefore, we divided the amount of feed transportation expenditures attributable to live swine producers by the total weight of live swine produced in Eastern Canada (including ⅘ of Ontario, all of Quebec, and the Maritime Provinces), and British Columbia during the review period. We then weight-averaged the benefit by these areas' share of total Canadian exports of live swine, including sows and boars, to the United States. On this basis, we preliminarily determine the benefits from this program during the review period for both sows and boars, and other live swine, to be significantly less than Can$0.0001/lb., which is effectively zero.

II. Federal/Provincial Programs

1. National Tripartite Stabilization Scheme for Hogs

On June 27, 1985, the House of Commons passed Bill C-25, which authorized an amendment to the Agricultural Stabilization Act (ASA), namely section 10.1. This amendment provided for the introduction of cost-sharing tripartite or bipartite stabilization schemes involving the producer, the federal government and the provinces. Pursuant to section 10.1 of the ASA, federal and provincial ministers have signed agreements covering: (1) Apples; (2) beans (including kidney/cranberry, white pea, and other colored beans); (3) beef (including cow-calf, feeder cattle, and slaughter cattle); (4) hogs; (5) sugar beets; (6) lambs (including ewe flock and home-raised); (7) onions; and (8) honey. The onion and honey agreements were signed during this review period.

Signatories to the National Tripartite Stabilization Scheme for Hogs include the provinces of Alberta, British Columbia, Manitoba, New Brunswick, Nova Scotia, Ontario, Prince Edward Island, Quebec, and Saskatchewan.

The general terms of the Tripartite scheme for hogs are as follows: All hog producers in participating pronvinces receive the same level of support per unit; the cost of the scheme is shared equally between the federal government, the province, and the producers; producer participation in the scheme is voluntary; the provinces may not offer separate stabilization plans or other *ad hoc* assistance for hogs (with the exception of Quebec); and the federal government may not offer compensation to swine producers in a province not a party to an agreement. The scheme must operate at a level that limits losses but does not stimulate over-production.

The Tripartite Agreements provide for a five year phase-in period to adjust for differences between the Tripartite scheme and the provincial programs still in effect. Most existing provincial stabilization programs are to be completely phased out by 1991. During the review period, five provincial stabilization programs remained in effect, with programs in effect in three provinces that exported live swine to the United States during the review period (see Section III).

Hogs eligible for stabilization payments under the Tripartite scheme must index 80 or above. Sows and boars are not eligible for benefits because they are not indexed. Stabilization payments are made when the market price falls below the support price. The difference between the support price and the average market price is the amount of the stabilization payment.

Section 10.1 of the ASA does not act in law to limit the number of commodities that may be covered under agreements. Therefore, it is necessary to consider whether there is *de facto* specificity. To determine whether a program is limited to a specific enterprise or industry, or group of enterprises or industries, we consider: (1) Whether the law of the foreign government acts to limit the availability of a program; (2) the number of industries or groups thereof that actually use a program; (3) whether there are dominant users of a program, or whether certain industries or groups thereof receive disproportionately large benefits under a program; and (4) the extent to which a government exercises discretion in conferring benefits under a program (see e.g., Preliminary Results of Countervailing Duty Administrative Reviews; Carbon Steel Wire Rod from Malaysia (56 FR 14827; April 12, 1991); see also "Countervailing Duties; Notice of Proposed Rulemaking and Request for Public Comments", section 355.43(b)(2), (54 FR 23379; May 31, 1989).

The Tripartite program was limited to only eleven commodities in eight agreements during FY 1989/90. Hog producers were the dominant users of the program, accounting for over 81 percent of the total payouts made in all agreements in FY 1989/90, and 72 percent of total payouts in all schemes since the inception of the Tripartite program. Furthermore, there are no explicit or standard procedures or criteria for evaluating Tripartite Agreement requests. Tripartite Agreements were rejected for asparagus, and producers of sour cherries and corn requested but did not obtain agreements (see Final Affirmative Countervailing Duty Determination; Fresh, Chilled and Frozen Pork from Canada; 54 FR 30777; July 24, 1989). For the foregoing reasons, in accordance with section 771(5)(B), we preliminarily determine that the Tripartite program is countervailable because it is limited to a specific group of enterprises or industries.

During the review period, payouts for hogs were made under the Tripartite Agreements in each of the nine signatory provinces. Six of these provinces exported to the United States during the review period. To calculate the benefit, we first divided two-thirds (representing the federal and provincial portions) of the payments made in FY 1989/90 to producers in each province by the total weight of live swine (minus sows and boars) produced in that province in FY 1989/90, and calculated a benefit per pound on a province-by-province basis. We then weight-averaged each exporting province's per-pound benefit by that province's share of total Candian exports of live swine (minus sows and boars) to the United States to calculate the average benefit per pound. On this basis, we

VOL

26
1991
UMI

preliminarily determine the benefit to be zero for sows and boars, and Can$0.0674/lb. for all other live swine during the review period.

III. Provincial Price Stabilization Programs

1. British Columbia Farm Income Insurance Act—Swine Producer's Farm Income Stabilization Program (FIP)

The FIP was established in 1979 in accordance with the Farm Income Insurance Act of 1973 (the Farm Act), in order to assure income for farmers when commodity market prices fluctuate below basic costs of production. Under the Farm Act, individual commodity programs have been established for the following commodities: (1) Beef; (2) tree fruits; (3) blueberries; (4) hogs; (5) processing vegetables; (6) processing strawberries; (7) lambs; and (8) potatoes. Guidelines for the receipt of benefits by each commodity program are delineated in Schedule B of the Farm Act. Schedule B4 contains the guidelines for swine producers.

The program is administered by the provincial Ministry of Agriculture and Food and the British Columbia Federation of Agriculture, and is funded equally by producers and the provincial government. Premiums are paid in all quarters regardless of market results.

FIP payments are calculated quarterly based on the difference between costs of production and market returns. Participating producers receive FIP payments for calendar quarters during which costs of production exceed market returns. The basic costs of production and market returns are calculated quarterly according to a cost-of-production model described in the Farm Act. The same per unit cost-of-production model is used for all products receiving benefits. Sows and boars are not eligible for payments.

Because FIP is only available to farmers producing commodities specified in the Schedule B guidelines, we preliminarily determine that this program is countervailable because payments were limited to a specific group of enterprises or industries.

To calculate the benefit, we divided half of the province's stabilization payments (representing the provincial government's share) during FY 1989/90 by the total weight of live swine (minus sows and boars) produced in British Columbia. We then weight-averaged the benefit by British Columbia's share of total Canadian exports of live swine (minus sows and boars) to the United States. On this basis, we preliminarily determine the benefit to be zero for sows and boars and significantly less than Can$0.0001/lb., which is effectively zero, for other live swine during the review period.

2. Quebec Farm Income Stabilization Insurance Programs (FISI)

The FISI was established in 1976 under the "Loi sur l'assurance-stabilisation des revenus agricoles." The program is administered by the Regie des Assurances Agricoles du Quebec (the Regie). The purpose of the program is to guarantee a positive net annual income to participants whose income is lower than the stabilized net annual income. The stabilized net annual income is calculated according to a cost-of-production model that includes an adjustment for the difference between the average wage of farm workers and the average wage of all other workers in Quebec. When the annual average farm worker income is lower than the stabilized net annual income, the Regie makes a payment to the participant at the end of the year.

Two-thirds of the funding for the program is provided by the provincial government and one-third by producer assessments. Participation in a stabilization scheme is voluntary. However, once a producer enrolls in a program, he must make a five-year commitment. The maximum number of feeder hogs eligible to be insured is 5,000 per farmer, and a maximum of 400 sows per farmer may also be insured. Whenever the balance in the FISI account is insufficient to make payments to participants, the provincial government lends the needed funds to the program at market rates. The principal and interest on these loans are repaid by the Regie using the producer and provincial contributions.

Since Quebec joined the federal government's Tripartite Price Stabilization Scheme for hogs in February 1989, the FISI scheme for hogs operates by covering only the difference between payments made under the Tripartite scheme and what FISI payments would have been in absence of the Tripartite scheme. While some farmers have opted for single coverage under the Tripartite scheme, all producers who have maintained enrollment with FISI are also enrolled in the Tripartite scheme.

FISI benefits are provided through 11 schemes covering fifteen different producer groups, including: (1) Feeder calves; (2) feeder cattle; (3) slaughter cattle; (4) grain-fed calves; (5) milk-fed calves; (6) piglets; (7) feeder hogs; (8) lambs; (9) potatoes; (10) grain corn; (11) wheat; (12) barley; (13) oats and mixed grains; (14) sugar beets; and (15) soybeans. Soybean producers enrolled in FISI during the review period. Several major agricultural commodities, such as eggs, dairy products, and poultry, which make up a large portion of Quebec's total agricultural production, are not covered under this program. Since 1981, soybeans are the only new commodity to be enrolled in FISI. Because this program has been consistently providing benefits to the same group of commodities (with the exception of the addition of soybeans during the review period) over the last nine years, representing the majority of the program's life, we determine that it is limited to a specific group of enterprises or industries and is therefore countervailable.

To calculate the benefit, we multiplied the total payments made under both the piglet and feeder hog programs during the review period by two-thirds (representing the provincial portion). We divided this amount by the total weight of live swine (including sows) produced in Quebec to get the average benefit per pound. However, because no sows were exported to the U.S. during the review period, we then weight-averaged the benefit by Quebec's share of total Canadian exports of live swine (minus sows and boars) to the United States. On this basis, we preliminarily determine the benefit to be zero for boars and Can$0.0001/lb. for sows and other live swine during the review period.

3. Saskatchewan Hog Assured Returns Program (SHARP)

SHARP was established in 1976 pursuant to the Saskatchewan Agricultural Returns Stabilization Act. Under this act, the provincial government may establish a stabilization plan for any agricultural commodity. However, only hogs and cattle have such plans. SHARP provides stabilization payments to hog producers in Saskatchewan at times when market prices fall below a designated "floor price." The program is administered by the Saskatchewan Pork Producers' Marketing Board (the Board) on behalf of the provincial Department of Agriculture. Participation is voluntary and is open to all hog producers in the province. Coverage is limited to 1,500 indexed hogs per producer each quarter.

In accordance with the Tripartite Agreement, SHARP was scheduled to have been terminated by March 31, 1991. No producers have been allowed to join SHARP since December 31, 1985.

The program is funded by levies on the sale of hogs covered by the program. Levies from participating producers range from 1.5 to 4.5 percent of market returns on the sale of hogs and are matched by the province. After the Tripartite Agreement was implemented on July 1, 1988, SHARP payments were reduced by the amount of Tripartite scheme payments. Whenever the balance in the SHARP account is insufficient to make payments to participants, the provincial government lends the needed funds to the program at terms consistent with commercial considerations. The principal and interest on these loans are repaid by the Board using the producer and provincial contributions.

The floor price for this program is calculated quarterly, and stabilization payments are made when the market price is below the floor price. Payments were made to indexed hog producers in each quarter of the review period. Sows and boars were not eligible for payments.

Because payments from this program were provided to indexed hogs and cattle only, we preliminarily determine that the program is limited to a specific group of enterprises or industries and is therefore countervailable.

To calculate the benefit, we divided half of the province's stabilization payments (representing the provincial government's portion of the payments) during FY 1989/90 by the total weight of live swine (minus sows and boars) produced in Saskatchewan. We then weight-averaged the benefit by Saskatchewan's share of total Canadian exports of live swine (minus sows and boars) to the United States. On this basis, we preliminarily determine the benefit to be zero for sows and boars and Can$0.0005/lb. for other live swine during the review period.

IV. Other Provincial Programs

1. Alberta Crow Benefit Offset Program

The purpose of this program, which is administered by the Alberta Department of Agriculture, is to eliminate market distortions in feed grain prices created by the federal government's policy on grain transportation. Assistance is provided on feed grain produced in Alberta, feed grain produced outside Alberta but sold in Alberta, and feed grain produced in Alberta to be fed to livestock on the same farm. The government provides certificates to registered feed grain users and registered feed grain merchants, which can be used as partial payments for grains purchased from grain producers. Feed grain producers who feed their own grain to their own livestock submit a claim directly to the government for payment.

Hog producers receive benefits in one of three ways. Hog producers who do not grow any of their own feed grain receive certificates which are used to cover part of the cost of purchasing grain. Second, hog producers who grow all of their own grain submit a claim to the government of Alberta for direct payment. Finally, hog producers who grow part of their own grain but also purchase grain receive both certificates and direct payments.

Because this program is limited to feed grain users, we preliminarily determine that it is limited to a specific group of enterprises or industries, and is therefore countervailable.

The payment from this program during the review period was Can$13 per ton through August 31, 1989, and Can$10 per ton from September 1, 1989 through the end of the review period. To determine the benefit to swine producers from this program, we first calculated a hog grain consumption-to-weight-gain ratio, using information from Economic Indicators of the Farm Sector, Costs of Production—Livestock and Dairy, 1989, a U.S. Department of Agriculture publication. From this document, we determined that 3.483 pounds of grain are required to grow 1 pound of swine. Because sows and boars also benefit from this program, we use the generally accepted weight of 225 pounds as the average weight of hogs, including both market hogs and sows and boars. Weanlings weigh on average 40 pounds at the time they begin eating grains. Swine therefore increase in weight 185 pounds on average prior to sale for slaughter. We calculated that each hog consumes approximately 644 pounds of grain by multiplying this 185 pound weight gain by the 3.483 ratio.

Using figures from the Alberta Supply and Disposition Tables, we estimated the total metric tons of grain consumed by livestock in Alberta during the review period. For swine production figures, we used the Supply-Disposition Balance Sheets of Statistics Canada. We multiplied this number by the average grain consumption per hog and divided the result by total grain used to feed livestock animals. We thus calculated live swine's percentage of total livestock consumption of grain in Alberta to be 14.68 percent. We then multiplied this percentage by the total value of certificates and payments received during the review period to calculate the benefit to swine producers from this program. We then weight-averaged the benefit by Alberta's share of total Canadian exports of live swine, including sows and boars, to the United States. On this basis, we preliminarily determine the benefit to be Can$0.0045/lb. for both sows and boars and other live swine during the review period.

2. Alberta Livestock and Beeyard Compensation Program (Livestock Predator Compensation Sub-program)

This program compensates Alberta livestock producers for loss of food-producing livestock, including cattle, sheep, hogs, goats, rabbits and poultry, to predators. The Alberta Departemt of Agriculture administers this program, and provides assistance in the form of grants. The amount of the grants represents a partial payment of up to 50 percent of the value of the killed livestock.

Because this program provides payments that are limited to livestock producers, we preliminarily determine that the program is limited to a specific group of enterprises or industries and is therefore countervailable. To calculate the benefit, we divided the total payment to hog producers under this program by the total weight of live swine produced in Alberta during the review period. We then weight-averaged the result by Alberta's share of Canadian exports of live swine to the United States during the review period. On this basis, we preliminarily determine the benefits from this program during the review period for both sows and boars, and other live swine, to be significantly less than Can$0.0001/lb., which is effectively zero.

3. Alberta Farm Water Grant program.

This program, operated under the Department of Alberta Transportation and Utilities Act, Utilities Grants Regulation, provides financial assistance, in the form of grants, to all Alberta farmers and ranchers planning to construct water transmission facilities to overcome drought conditions. The program is available to all Alberta farmers and ranchers. Because this program is not limited to a particular enterprise or industry, we preliminarily determine that this program is not countervailable.

4. British Columbia (B.C.) Feed Grain Market Development Program

This program was initiated on August 1, 1987, and was terminated at the end of the 1988 crop year, with the last payments being issued in February 1990. It was designed to address two issues: (1) The cash-flow problem for the grain producers in the Peace River area of Northern British Columbia, and (2) the drain of livestock into Alberta for feeding and slaughter (primarily for cattle) due to the Alberta Crow Benefit

VOL
56
ISS
123
JE
26
1991
UMI

Offset Program. The program provided Can$15/ton to the grain producers when the grain was sold in British Columbia. Livestock producers purchasing this grain were paid in Can$11/ton of feed grain purchased. The payments provided an incentive for the grain users to purchase the more expensive (due to transportation costs) B.C. grain, and an incentive for the B.C. grain producers to sell in B.C., rather than exporting the grain.

Because this program is limited to grain producers and grain users in B.C., we preliminarily determine that it is limited to a specific group of enterprises or industries and is therefore countervailable.

To calculate the benefit, we divided the amount paid to swine producers by the total weight of live swine produced in British Columbia during the review period. We then weight-averaged the result by British Columbia's share of total exports of live swine, including sows and boars, to the United States during the review period. On this basis, we preliminarily determine the benefits from this program during the review period for both sows and boars, and other live swine, to be significantly less than Can$0.0001/lb., which is effectively zero.

5. Ontario Farm Tax Reduction Program

This program replaced the Ontario Farm Tax Reduction Program. Eligible farmers receive a rebate of up to 100 percent of property taxes levied on farm properties for municipal and school purposes; levied for local improvements under the Local Improvement Act; levied under the Provincial Land Tax Act or the Local Roads Boards Act; and imposed under the Local Services Boards Act, with rebate reductions for off-farm income above set levels. Farm property includes farm lands and outbuildings. Eligible properties include farms that produce food, fish, breeding horses and donkeys, pregnant mare's urine, fur-bearing animals, tobacco, flowers, nursery stock, sod or ornamentals.

Any resident of Ontario may receive a rebate if he/she owns and pays taxes on eligible properties. Residents of Southern and Western Ontario must produce farm products with a gross value of at least Can$6,000 and resident of Northern and Eastern Ontario must produce products with a gross value of at least Can$5,000. Because the eligibility criteria vary depending on the region of Ontario in which the farm is located, we preliminarily determine that this program is countervailable.

To calculate the benefit, we divided total rebates to swine producers in Eastern and Northern Ontario with sales within the Can$5,000 to Can$6,000 range by the total weight of live swine produced in Ontario during the review period. We then weight-averaged the result by Ontario's share of Canadian exports of live swine, including sows and boars, to the United States during the review period. On this basis, we preliminarily determine the benefits from this program during the review period for both sows and boars, and other live swine, to be significantly less than Can$0.001/lb., which is effectively zero.

6. Ontario Pork Industry Improvement Plan (OPIIP)

This five-year plan commenced on April 1, 1986, and was to be terminated on March 31, 1991. The plan provides grants to Ontario swine producers to enable them to improve their productivity, profitability and competitive position by increasing their efficiency. To be eligible for the plan, producers must be residents of Ontario, own or lease facilities in Ontario for swine production and have at least 20 sow equivalents. One sow equivalent is equal to one sow or 15 market weight hogs marketed annually. Ten types of grants are available to swine producers under this plan. These grants are for the following: Swine production analysis, enterprise analysis, swine ventilation, productivity and quality improvement, artificial insemination, rodent control, private veterinary herd health program, education, feed analysis, and herd health improvement. During the review period, Ontario swine producers received grants under each of these programs.

Because the OPIIP provides grants only to swine producers, we preliminarily determine that it is limited to a specific enterprise or industry and is therefore countervailable.

To calculate the benefit, we divided the total value of all grants provided to swine producers during the review period by the total weight of live swine produced in Ontario during this period. We then weight-averaged the result by Ontario's share of total Canadian exports of live swine, including sows and boars, to the United States during the review period. On this basis, we preliminarily determine the benefits from this program to be Can$0.002/lb. for both sows and boars and other live swine during the review period.

7. Ontario Dog Licensing and Livestock and Poultry Compensation Program

This program, administered by the Farm Assistance Branch of the Ontario Ministry of Agriculture and Food, provides assistance in the form of grants to compensate livestock and poultry producers when a dog or wolf kills or injures livestock or poultry. Swine producers apply for and receive compensation through the local municipal government office. The municipality determines the value and cause of the damage and then compensates the livestock or poultry producer for the damage. The Ontario Ministry of Agriculture and Food reimburses the municipality if the damage was caused by wolves.

Because this program provides payments that are limited to livestock and poultry producers, we preliminary determine that it is limited to a specific group of enterprises or industries and is therefore countervailable. To calculate the benefit, we divided the total payment to hog producers under this program by the total weight of live swine produced in Ontario during the review period. We then weight-averaged the result by Ontario's share of Canadian exports of live swine to the United States during the review period. On this basis, we preliminarily determine the benefits from this program during the review period for both sows and boars, and other live swine, to be significantly less than Can$0.0001/lb., which is effectively zero.

7. Ontario Rabies Indemnification Program

This program, administered by the Farm Assistance Branch of the Ontario Ministry of Agriculture and Food, provides assistance in the form of grants to compensate livestock producers, including producers of cattle, horses, sheep, swine, and goats, for damage caused by rabies. Producers apply for compensation through a federal inspector, who determines that the animal is suffering from rabies and orders the animal to be destroyed. A maximum of Can$100 may be paid by the province of Ontario per hog under this program, with the Ontario Ministry of Agriculture (OMAF) reimbursing the province for 40 percent of the total amount paid.

Because this program provides payments that are limited to producers of cattle, horses, sheep, swine, and goats, we preliminarily determine that this program is limited to a specific group of enterprises or industries and is therefore countervailable. To calculate the benefit, we divided the total payment to swine producers under this program by the total weight of live swine produced in Ontario during the review period. On this basis, we preliminarily determine the benefits from this program during the review period for both sows and boars, and other live swine, to be significantly less than Can$0.0001/lb., which is effectively zero.

9. Ontario Soil Conservation and Environmental Protection Assistance Program (Manure Storage Subprogram)

This program, administered by the Soil and Water Management Branch of the Ontario Ministry of Agriculture and Food, provides assistance in the form of grants to contribute to Ontario farmers' costs of soil conservation and environmental protection facilities, as well as providing assistance to various Ontario conservation authorities and soil and crop improvement associations. To meet eligibility requirements, an Ontario farmer must produce, in normal production years, agricultural products having a gross value of at least Can$12,000. The manure storage subprogram falls under the category of environmental protection projects, with other subprograms encompassing milkhouse/parlor washwater disposal and pesticide-handling facilities.

Because the manure storage program provides payments that are limited to livestock producers with a specified income level, we preliminarily determine that the program is limited to a specific group of enterprises or industries and is therefore countervailable. To calculate the benefit, we divided the total payment to swine producers under this program by the total weight of live swine produced in Ontario during the review period. We then weight-averaged the result by Ontario's share of Canadian exports of live swine to the United States during the review period. On this basis, we preliminarily determine the benefits from this program during the review period for both sows and boars, and other live swine, to be significantly less than Can$0.0001/lb., which is effectively zero.

10. Quebec Productivity Improvement and Consolidation of Livestock Production Program

This program was established in April 1987 to provide financial assistance to livestock producers for the diversification and consolidation of farm operations. The program is limited to producers with small farming operations and is divided into eight subprograms. Swine producers are eligible only for the Farm Building Improvements Subprogram. This subprogram provides grants for changes to existing piggeries in order to consolidate single-purpose operations into farrow-to-finish operations. The grants cover up to 30 percent of the actual cost of the conversion as well as the purchase and installation of special equipment.

To be eligible for assistance, applicants must be recognized farm producers according to the Farm Producers' Act and be registered with the Bureau de Renseignements Agricoles. Producers operating farrowing facilities must maintain between 40 and 80 sows, and finishing farms must maintain between 500 and 1,000 hogs. The maximum assistance provided is Can$200 per sow and Can$25 per hog, with a amximum of Can$15,000 per farm operation for the duration of the program.

Because this program is limited to livestock producers, we preliminarily determine that it is limited to a specific group of enterprises or industries and is therefore countervailable.

To calculate the benefit, we divided the total payment to swine producers by the total weight of live swine produced in Quebec during the review period. We then weight-averaged the result by Quebec's share of total Canadian exports of swine, including sows and boars to the United States during the review period. On this basis, we preliminarily determine the benefits from this program during the review period for both sows and boars, and other live swine, to be significantly less than Can$0.0001/lb., which is effectively zero.

11. Saskatchewan Livestock Investment Tax Credit

Saskatchewan's 1984 Livestock Tax Credit Act provides tax credits to individuals, partnerships, cooperatives and corporations who owned and fed livestock marketed or slaughtered by December 31, 1989. Claimants must be residents of Saskatchewan and pay Saskatchewan income taxes. Eligible claimants receive credits of Can$25 for each bull, steer or heifer, Can$2 for each lamb and Can$3 for each hog, and the tax credits may be carried forward for up to seven years. The credit is available to hogs indexing 80 or higher; sows and boars are not eligible for this program.

Because this program is limited to livestock producers, we preliminarily determine that it is limited to a specific group of enterprises or industries and is therefore countervailable.

To calculate the benefit, we divided the total amount of hog credits used by the total weight of live swine (minus sows and boars) produced in Saskatchewan. We then weight-averaged the result by Saskatchewan's share of total exports of live swine (minus sows and boars) to the United States. On this basis, we preliminarily determine the benefit from this program to be zero for sows and boars and Can$0.0005/lb. for all other live swine during the review period.

12. Saskatchewan Livestock Facilities Tax Credit Program

This program was implemented on January 1, 1986 and provides tax credits to livestock producers applying before December 31, 1989, for investment in livestock production facilities. The credit may only be used to offset provincial taxes. Applications for tax credits must be received by the Saskatchewan Ministry of Agriculture no later than six months after the project is completed.

Livestock covered by this program can be raised for either breeding or slaughter. Eligible livestock include cattle, horses, sheep, swine, goats, poultry, bees, fur-bearing animals raised in captivity, or any other designated animals. Investments covered under the program include new buildings, improvements to existing livestock facilities, and any stationary equipment related to livestock facilities.

The program pays 15 percent of 95 percent of project costs, or 14.25 percent of total costs, in order not to overlap with the Business Investment Tax Credit Program, a federal program. Participants may carry forward any unused credit for up to seven years. Because this program is limited to livestock producers, we preliminarily determine that it is limited to a specific group of enterprises or industries and is therefore countervailable.

To calculate the benefit, we divided the tax credits used by hog producers during the review period by the total weight of live swine produced in Saskatchewan during the review period. We then weight-averaged the result by Saskatchewan's share of total exports of live swine, including sows and boars, to the United States during the review period. On this basis, we preliminarily determine the benefits from this program during the review period for both sows and boars, and other live swine, to be Can$0.0002/lb.

Other Programs

We examined the following programs and preliminary determine that exporters of live swine from Canada to the United States did not use them during the review period: (1) New Brunswick Livestock Incentives Program; (2) New Brunswick Agricultural Development Act—Swine Assistance Program; (3) New Brunswick Hog Marketing Program; (4) New

VOL

Brunswick Swine Industry Financial Restructing Program; (5) Ontario Boar Damage to Livestock Compensation Program; (6) Newfoundland Weanling Bonus Incentive Policy; (7) Newfoundland Hog Price Stabilization Program; (8) Nova Scotia Swine Herd Health Policy; (9) Nova Scotia Improved Sire Policy; (10) Prince Edward Island Hog Price Stabilization Program; (11) Prince Edward Island Swine Development Program; (12) Prince Edward Island Interest Payments on Assembly Yard Loan; (13) Ontario Export Sales Aid; (14) Western Diversification Program; (15) Federal Atlantic Livestock Feed Initiative; (16) Canada-Saskatchewan Agri-Food Development Agreement; (17) Canada-Manito Agri-Food Development Agreement; (18) Agricultural Products Board Program; (19) Canada-Ontario Canadian Western Agribition Livestock Transportation Assistance Program; (20) Prince Edward Island Swine Incentive Policy; (21) New Brunswick Swine Assistance Policy on Boars; and (22) Agricultural Stabilization Act.

Preliminary Results of Review

As a result of our review, we preliminarily determine the net subsidy for the period April 1, 1989 through March 31, 1990 to be Can$0.0051/lb for sows and boars and Can$0.0937/lb. for all other live swine.

The Department intends to instruct the Customs Service to assess countervailing duties of Can$0.0051/lb. on shipments of sows and boars and Can$0.0937/lb. on shipments of all other live swine exported on or after April 1, 1989 and on or before March 31, 1990.

As provided by section 751(a)(1) of the Tariff Act, the Department also intends to instruct the Customs Service to collect cash deposits of estimated countervailing duties of Can$0.0051/lb. on shipments of sows and boars, and Can$0.0937/lb. on shipments of all other live swine entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this review.

Parties to the proceeding may request disclosure of the calculations methodology and interested parties may request a hearing not later than 10 days after the date of publication of this notice. Interested parties may submit written arguments in case briefs on these preliminary results within 30 days of the date of publication. Rebuttal briefs, limited to arguments raised in case briefs, may be submitted seven days after the time limit for filing the case brief. Any hearing, if requested, will be held seven days after the scheduled date for submission of rebuttal briefs. Copies of case briefs and rebuttal briefs must be served on interested parties in accordance with 19 CFR 355.38(e).

Representatives of parties to the proceeding may request disclosure of proprietary information under administrative protective order no later than 10 days after the representative's client or employer becomes a party to the proceeding, but in no event later than the date the case briefs, under 19 CFR 355.38(c), are due.

The Department will publish the final results of this administrative review including the results of its analysis of issues raised in any case or rebuttal briefs or at a hearing.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and 19 CFR 355.22.

Dated: June 17, 1991.

Eric I. Garfinkel,

Assistant Secretary for Import Administration.

[FR Doc. 91-15228 Filed 6-25-91; 8:45 am]

BILLING CODE 3510-DS-M

Short-Supply Determination; Certain Steel Rail

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice of short-supply determination on certain steel rail.

SHORT-SUPPLY REVIEW NUMBER: 51.

SUMMARY: The Secretary of Commerce hereby grants a short-supply request for 10,000 metric tons of certain rail for September-December of 1991 under Paragraph 8 of the U.S.-Japan steel arrangement.

EFFECTIVE DATE: June 19, 1991.

FOR FURTHER INFORMATION CONTACT: Mark B. Brechtl or Richard O. Weible, Office of Agreements Compliance, Import Administration, U.S. Department of Commerce, room 7866, Pennsylvania Avenue and 14th Street, NW., Washington, DC 20230, (202) 37-1386 or 377-0159.

SUPPLEMENTARY INFORMATION: On May 20, 1991, the Secretary of Commerce ("Secretary") received an adequate petition from Burlington Northern Railroad ("BN") requesting a short supply allowance for 10,000 metric tons of certain damage resistant steel rail for September-December 1991 under Paragraph 8 of the Arrangement Between the Government of Japan and the Government of the United States of America Concerning Trade in Certain Steel Products. BN is requesting short supply for this material because the potential foreign supplier has no regular export licenses available to ship this product, and potential domestic producers are unable to meet the required specifications. The Secretary conducted this short-supply review pursuant to section 4(b)(4)(A) of the Steel Trade Liberalization Program Implementation Act, Public Law No. 101-221, 103 Stat. 1886 (1989) (the "Act"), and § 357.102 of the Department of Commerce's Short-Supply Procedures. (19 CFR 357.102) ("Commerce's Short-Supply Procedures").

The requested rail meets the following specifications:

Section of Rail: AREA136RN.

Type of Rail: High Strength Damage Resistant Rail.

Standard Length: 80 feet and 39 feet.

Manufacturing: The steel shall be cast by a continuous casting process and the bloom shall be free from injurious segregation and pipe.

Chemical Composition: Carbon: 0.72-0.82 Percent; Manganese: 0.80-1.05 Percent; Phosphorus: 0.030 Percent; Sulphur: 0.020 Percent; Silicon: 0.10-0.35 Percent.

Mechanical Properties: 0.2 Percent Proof Stress: Min 60 KGF/MM2. Tensile Strength: Min 120 KGF/MM2. Elongation: Min 10 Percent.

Surface Hardness: (Brinell Hardness)—350-388 at rail head corner/shoulder and head side portions.

(Brinell Hardness)—300-340 at rail head center portion.

Workmanship: Rails shall be straightened cold in a press or roller machine to remove twist, waves and kinks until they meet the surface and line requirements specified below. Cold straightening shall be effected by means of gradual pressure without impact. Rail straightened by roller machine shall be straightened only once in each straightening plane.

Surface Upsweep: Maximum 0.10 inch per foot with maximum of 0.06 inch or rail in excess of 80 feet. Maximum 0.10 inch in 5 feet from the rail ends provided it shall not occur at a point closer than 30 inches from the rail ends.

Surface Downsweep: Rail with surface downsweep and droop shall be accepted.

Uniform Sidesweep: Maximum 0.10 inch per foot with a maximum of 0.80 inch for rail in excess of 80 feet. Maximum 0.25 inch in 5 feet at the rail ends provided it shall not occur at a point closer than 30 inches from the rail ends.

Vertical Deviation: Sharp deviations from uniform vertical line of the rail in either direction will not be acceptable

deviations in the vertical line of the rail and shall not exceed:

—maximum ordinate of 0.020 inch as measured with a 3 foot straight edge.

—maximum vertical peak measurement 0.040 inch as measured with a 3 foot straight edge.

Horizontal Deviation: Sharp deviations from uniform horizontal line of the rail in either direction of the rail shall not exceed an ordinate of 0.020 inch in the horizontal plane as measured with a 3 foot straight edge.

Periodic Waviness: The entire rail shall not present a periodic waviness with an amplitude in the vertical greater than 0.020 inch and not greater than 0.020 inch in the horizontal plane as measured with a 3 foot straight edge.

Twist: Rail that exhibits twist that exceeds 0.001 inch in one foot will be rejected (i.e. 0.039 inch over 39 feet, 0.080 inch over 80 feet).

On May 20, 1991, the Secretary established an official record for this short-supply request (Case Number 51) in the Central Records Unit, room B-099, Import Administration, U.S. Department of Commerce at the above address. On June 3, 1991, the Secretary published a notice in the Federal Register announcing a review of this request and soliciting comments from interested parties. Comments were required to be received no later than June 10, 1991, and interested parties were invited to file replies to any comments no later than five days after that date. In order to determine whether this product could be supplied by U.S. producers for September-December 1991, the Secretary sent questionnaires to the two domestic steel rail producers, Bethlehem Steel Corporation ("Bethlehem") and CF&I Steel Corporation ("CF&I"). The Secretary received timely questionnaire responses from both companies, and BN submitted rebuttal comments to CF&I's response.

Questionnaire Responses

Bethlehem stated in its questionnaire response that it is unable to supply BN with the requested quantity of rail during the indicated time period. CF&I's questionnaire response indicated that it does not currently produce the requested product. CF&I did state, however, that it can supply 5,000 metric tons of what it considered to be a "substitute" rail, an ingot cast product meeting the specifications for premium head hardened rail. CF&I also noted that it supplied BN with 110 net tons of premium rail in 1986 that was made with ingot cast steel.

On June 13, 1991, BN submitted rebuttal comments to CF&I's questionnaire response. BN reemphasized that it only uses continuous cast steel rail and that its purchase of ingot cast steel from CF&I was only for testing purposes. BN claimed that CF&I's rail does not reduce spalling and requires more frequent maintenance. BN states that its "short-supply request is for a new product, DR rail. DR rail differs from head hardened premium rail because it was designed to overcome the problems of head hardened rail in certain high tonnage applications. To overcome these problems, a varying head hardness is required and CF&I's product lacks this attribute."

Analysis

The major issue in this short-supply review is whether the specifications for the requested product are reasonable. BN has emphasized two characteristics, continuous cast steel and variable head hardness, as significant.

Concerning the reasonableness of the variable head hardness specification, BN claims that DR rail is a new product designed specifically to overcome the types of problems that occurred with its predecessor, head hardened rail, such as spalling and cracking. Although one domestic rail producer, CF&I, offered what it considered a substitute product, head hardened rail, CF&I did not dispute any of the claims made by BN as to the advantage of the newly developed DR rail. In fact, no domestic rail producer disputes the potential advantages of the DR rail, or that the DR rail represents a product advancement from head hardened rail.

BN claims that its past purchase history of continuous cast premium head hardened rail supports the reasonableness of its continuous cast specification. It cites the House Report to the Steel Trade Liberalization Program Implementation Act to support its claim. H.R. No. 263, 101st Cong., 1st sess. at 14. However, BN states in its petition that DR rail is a new product. Therefore, the purchase history of continuous cast head hardened rail is not relevant to the specifications of DR rail.

Conclusion

Because no domestic steel rail manufacturer is capable of producing the requested product meeting the above noted specifications or has provided evidence that the petitioner's specifications are unreasonable, and because the petitioner's potential Japanese supplier does not have available quota, the Secretary finds that a condition of short-supply exists for the requested product. Therefore, the Secretary grants, pursuant to section 4(b)(4)(A) of the Act, and § 357.102 of Commerce's Short-Supply Procedures, the short-supply request for 10,000 metric tons of the requested damage resistant steel rail for September-December 1991 under the U.S.-Japan steel arrangement.

Dated: June 19, 1991.

Marjorie A. Chorlins,

Acting Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Adjustment of Import Limits for Certain Cotton Textile Products Produced or Manufactured in the People's Republic of China

June 21, 1991.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs adjusting limits.

EFFECTIVE DATE: June 28, 1991.

FOR FURTHER INFORMATION CONTACT: Janet Heinzen, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce (202) 377-4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 566-6828. For information on embargoes and quota re-openings, call (202) 377-3715.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

The current limit for Category 359-C is being increased by application of swing and carryforward. The current limit for Category 333 is being reduced to account for the swing being applied. As a result of the increase, the limit for Category 359-C, which is currently filled, will re-open.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see Federal Register notice 55 FR 50756, published on December 10, 1990). Also

see 55 FR 46208, published on November 20, 1990.

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

June 21, 1991.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: This directive amends, but does not cancel, the directive issued to you on November 14, 1990, by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports of certain cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products, produced or manufactured in the People's Republic of China and exported during the twelve-month period which began on January 1, 1991 and extends through December 31, 1991.

Effective on June 26, 1991, you are directed to amend further the directive dated November 14, 1990 to adjust the limits for the following categories, as provided under the terms of the current bilateral agreement between the Governments of the United States and the People's Republic of China:

Category	Adjusted twelve-month limit [1]
Levels not subject to a group	
359-C [2]	516,753 kilograms.
333	72,375 dozen.

[1] The limits have not been adjusted to account for any imports exported after December 31, 1990.

[2] Category 359-C: only HTS numbers 6103.42.2025, 6103.49.3034, 6104.62.1020, 6104.69.3010, 6114.20.0048, 6114.20.0052, 6203.42.2010, 6203.42.2090, 6204.62.2010, 6211.32.0010, 6211.32.0025 and 6211.42.0010.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-F

Announcement of Import Restraint Limits and Amendment of Visa Requirements for Certain Cotton, Wool and Man-Made Fiber Textile Products and Silk Blend and Other Vegetable Fiber Apparel Produced or Manufactured in the Democratic Socialist Republic of Sri Lanka

June 21, 1991.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs establishing limits for the new agreement year and amending visa requirements.

EFFECTIVE DATE: July 1, 1991.

FOR FURTHER INFORMATION CONTACT: Kim-Bang Nguyen, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce (202) 377-4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 343-6580. For information on embargoes and quota re-openings, call (202) 377-3715.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

In the letter published below, the Chairman of CITA directs the Commissioner of Customs to establish limits for the new agreement period beginning on July 1, 1991 and extending through June 30, 1992 and to amend the existing visa arrangement to include coverage of Categories 347-T/348-T/847-T. In addition, the second installment of 187,500 dozen referred to in the exchange of letters dated April 13 and 16, 1990 is being charged to the 1991-1992 limit for Categories 347/348/847.

A copy of the current bilateral agreement between the Governments of the United States and the Democratic Socialist Republic of Sri Lanka is available from the Textiles Division, Bureau of Economic and Business Affairs, U.S. Department of State (202) 647-1899.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 55 FR 50756, published on December 10, 1990).

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

June 21, 1991.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: Under the terms of section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as further extended on July 31, 1986; pursuant to the Bilateral Textile Agreement, effected by exchange of notes dated May 23 and 24, 1988, as amended, between the Governments of the United States and the Democratic Socialist Republic of Sri Lanka; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on July 1, 1991, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton, wool and man-made fiber textile products and silk blend and other vegetable fiber apparel in the following categories, produced or manufactured in Sri Lanka and exported during the twelve-month period beginning on July 1, 1991 and extending through June 30, 1992, in excess of the following levels of restraint:

Category	Twelve-month restraint limit
237	202,473 dozen.
331/631	1,581,805 dozen pairs.
333/633	36,113 dozen.
334	267,979 dozen.
335/835	196,518 dozen.
336	90,517 dozen.
338/339	893,262 dozen of which not more than 744,385 dozen shall be in Categories 338-S/339-S [1].
340	702,699 dozen of which not more than 238,203 dozen shall be in Category 340-Y [2].
341	702,699 dozen of which not more than 297,754 dozen shall be in Category 341-Y [3].
342/642/842	464,496 dozen.
345/845	120,293 dozen.
347/348/847	929,862 dozen of which not more than 557,395 dozen shall be in Categories 347-T/348-T/847-T [4].
350/650	63,371 dozen.
351/651	196,561 dozen.
352/652	952,513 dozen.

[2] Category 340-Y: only HTS numbers 6205.20.2015, 6205.20.2020, 6205.20.2046, 6205.20.2050 and 6205.20.2060.

[3] Category 341-Y: only HTS numbers 6204.22.3060, 6206.30.3010 and 6206.30.3030.

[4] Category 347-T: only HTS numbers 6103.19.2015, 6103.19.4020, 6103.22.0030, 6103.42.1020, 6103.42.1040, 6103.49.3010, 6112.11.0050, 6113.00.0038, 6203.19.1020, 6203.19.4020, 6203.22.3020, 6203.42.4005, 6203.42.4010, 6203.42.4015, 6203.42.4025, 6203.42.4035, 6203.42.4045, 6203.49.3020, 6210.40.2035, 6211.20.1520, 6211.20.3010 and 6211.32.0040; Category 348-T: only HTS numbers 6104.12.0030, 6104.19.2030, 6104.22.0040, 6104.29.2034, 6104.62.2010, 6104.62.2025, 6104.69.3022, 6112.11.0060, 6113.00.0042, 6117.90.0042, 6204.12.0030, 6204.19.9030, 6204.22.3040, 6204.29.4034, 6204.62.3000, 6204.62.4005, 6204.62.4010, 6204.62.4020, 6204.62.4030, 6204.62.4040, 6204.62.4050, 6204.69.3010, 6204.69.9010, 6210.50.2035, 6211.20.1550, 6211.20.3010, 6211.42.0030 and 6217.90.0050; Category 847-T: only HTS numbers 6103.29.2044, 6103.49.3017, 6103.49.3024, 6104.29.2041, 6104.29.2045, 6104.69.3034, 6104.69.3038, 6112.19.2080, 6112.19.2090, 6117.90.0051, 6203.29.3046, 6203.49.3040, 6203.49.3045, 6204.29.4041, 6204.29.4047, 6204.69.3052, 6204.69.9044, 6211.20.3640, 6211.20.6040, 6211.39.0040, 6211.49.0040 and 6217.90.0070.

[5] Category 359-C: only HTS numbers 6103.42.2025, 6103.49.3034, 6104.62.1020, 6104.69.3010, 6114.20.0048, 6114.20.0052, 6203.42.2010, 6203.42.2090, 6204.62.2010, 6211.32.0010, 6211.32.0025 and 6211.42.0010; Category 659-C: only HTS numbers 6103.23.0055, 6103.43.2020, 6103.49.2000, 6103.49.3038, 6104.63.1020, 6104.69.1000, 6104.69.3014, 6114.30.3044, 6114.30.3054, 6203.43.2010, 6203.43.2090, 6203.49.1010, 6203.49.1090, 6204.63.1510, 6204.69.1010, 6210.10.4015, 6211.33.0010, 6211.33.0017 and 6211.43.0010.

[6] Category 369-D: only HTS numbers 6302.60.0010, 6302.91.0005 and 6302.91.0045.

[7] Category 369-S: only HTS number 6307.10.2005.

Imports charged to these category limits for the period July 1, 1990 through June 30, 1991 shall be charged against those levels of restraint to the extent of any unfilled balances. In the event the limits established for that period have been exhausted by previous entries, such goods shall be subject to the levels set forth in this directive.

The limits set forth above are subject to adjustment in the future pursuant to the provisions of the current bilateral agreement between the Governments of the United States and the Democratic Socialist Republic of Sri Lanka.

You are directed to charge 187,500 dozen to the limit established in this directive for Categories 347/348/847.

For visa purposes, effective on July 1, 1991, you are directed to amend further the directive of September 1, 1988 to include coverage of Categories 347-T/348-T/847-T. Merchandise in Categories 347-T/348-T/847-T, produced or manufactured in Sri Lanka and exported from Sri Lanka on and after July 1, 1991, must be accompanied by the correct merged part category or the correct part category corresponding to the actual shipment. Shipments other than Categories 347-T/348-T/847-T should be visaed as 347/348/847 or the correct merged category.

Merchandise in Categories 347-T/348-T and 347/348 (excluding long pants and slacks) which is exported from Sri Lanka prior to July 1, 1991 shall continue to require a 347-T/348-T or 347/348 (excluding long pants and slacks) visa or a correct category visa.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception of the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-F

DEPARTMENT OF DEFENSE

Office of the Secretary

Special Operations Policy Advisory Group; Meeting

The Special Operations Policy Advisory Group (SOPAG) will meet on 18 July 1991 in the Pentagon, Arlington, Virginia to discuss sensitive, classified topics.

The mission of the SOPAG is to advise the Office of the Secretary of Defense on key policy issues related to the development and maintenance of effective Special Operations Forces.

In accordance with section 10(d) of Public Law 92-463, the "Federal Advisory Committee Act," and section 552b(c)(1) of title 5, United States Code, this meeting will be closed to the public.

Dated: June 20, 1991.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

[FR Doc. 91-15171 Filed 6-25-91; 8:45 am]

BILLING CODE 3810-01-M

Department of the Army

Intent to Prepare an Environmental Impact Statement (EIS) for Military Joint Readiness Exercises in Alaska

AGENCY: Headquarters, Department of the Army, DOD.

SUMMARY: The Army will prepare a programmatic EIS, in cooperation with the U.S. Air Force and U.S. Navy, for Joint Readiness Exercises in Alaska which may occur during all seasons of the year. This action expands the scope of a Notice of Intent, that was published in the **Federal Register** on January 30, 1990. A separate environmental analysis was prepared to support a winter exercise in 1991. (55FR-3083).

Headquarters, Alaskan Command proposes to conduct joint exercises throughout the year that would involve a maximum of about 40 thousand military personnel in Alaska and additional shipboard personnel in the adjacent North Pacific waters. Exercising units would include active and reserve components of the Army, Navy, Air Force, Marines and foreign military units. The exercises are required to maintain combat readiness of units with assigned and contingency missions in Alaska.

The exercises would use various sites in Alaska for transportation and supply and for a variety of training missions including simulations of remote site defense, search and rescue, amphibious landings, harbor defense, and air defense. Ground exercises in remote sites generally would be by small units on foot, in boats, and on snow machines. Non-military land may be used in some locations provided that landowner permission could be obtained. Some exercises on military lands would use heavier vehicles and may require site preparation by earth moving equipment. A full range of alternative sites, equipment, operations planning, and mitigative measures for non-military land will be considered in the EIS. The alternative will include the no action alternative. The draft EIS is expected to be released to the public in the late summer of 1992. The impact of present and proposed activities on U.S. Army installations in Alaska will be assessed in a separate EIS, which will be available for public review. References will be made to on-going EIS actions by other agencies.

Scoping: Scoping meetings will be held to discuss significant issues related to the conduct of Joint Readiness Exercises in Alaska during any season of the year. Notification of specific meeting sites and times will be made in

VOL

UMI

local and regional newspapers. Scoping meetings will be scheduled in Fairbanks and Anchorage and may be held anywhere else there is significant interest.

Persons with questions or comments may telephone Mr. Guy McConnel at (907) 753–2614 or may call (toll-free in Alaska) 1–800–478–2712 to leave an address or telephone number where they can be reached. Callers should state their interest in military training exercises. Questions and comments may also be submitted by letter to: U.S. Army Engineer District, Alaska, P.O. Box 898, Anchorage, Alaska 99506–0898, attn: EN–PL–ER.

Lewis D. Walker,

Deputy Assistant Secretary of the Army, (Environment, Safety and Occupational Health) OASA (I,L&E).

BILLING CODE 3710–08–M

DEPARTMENT OF EDUCATION

Proposed Information Collection Request

AGENCY: Department of Education.

ACTION: Notice of proposed information collection request.

SUMMARY: The Acting Director, Office of Information Resources Management, invites comments on the proposed information collection request as required by the Paperwork Reduction Act of 1980.

DATES: An emergency review has been requested in accordance with the Act, since allowing for the normal review period would adversely affect the public interest. Approval by the Office of Management and Budget (OMB) has been requested by June 24, 1991.

ADDRESSES: Written comments should be addressed to the Office of Information and Regulatory Affairs, Attention: Dan Chenok, Desk Officer: Department of Education, Office of Management and Budget, 726 Jackson Place, NW., room 3208, New Executive Office Building, Washington, DC 20503. Requests for copies of the proposed information collection request should be addressed to Mary P. Liggett, Department of Education, 400 Maryland Avenue, SW., room 5624, Regional Office Building 3, Washington, DC 20202–4651.

FOR FURTHER INFORMATION CONTACT: Mary P. Liggett (202) 708–5174.

SUPPLEMENTARY INFORMATION: Section 3517 of the Paperwork Reduction Act of 1980 (44 U.S.C. chapter 3517) requires that the Director of OMB provide interested Federal agencies and persons an early opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State of Federal law, or substantially interfere with any agency's ability to perform its statutory obligations. The Acting Director, Office of Information Resources Management, publishes this notice with attached proposed information collection requests prior to submission to OMB. For each proposed information collection request, grouped by office, this notice contains the following information: (1) Type of review requested, e.g., new, revision, extension, existing, or reinstatement; (2) Title; (3) Frequency of collection; (4) The affected public; (5) Reporting and/or Recordkeeping burden; and (6) Abstract. Because an emergency review is requested, the additional information to be requested in this collection is included in the section on "Additional Information" in this notice.

Dated: June 20, 1991.

Mary P. Liggett,

Acting Director for Office of Information Resources Management.

Office of Special Education and Rehabilitative Services

Type of Review: Emergency.

Title: Section 361.68—Payments from Allotments from Vocational Rehabilitation Services.

Abstract: A State must request in writing a waiver or modification, including supporting justification, if it determines that an exceptional or uncontrollable circumstance will prevent it from meeting its required expenditures from non-Federal sources (the Maintenance of Effort level). The Secretary, beginning in FY '91, will use the information to grant waivers from or modifications to the State's Maintenance of Effort level requirement.

Additional Information: An emergency clearance is requested for this collection of information. An emergency approval will allow time for States to request a waiver from or a modification to their Maintenance of Effort level requirement in FY '91.

Frequency: On occasion.

Affected Public: State or local Governments.

Reporting Burden: Responses—1; *Burden Hours*—1.

Recordkeeping Burden: Recordkeepers—0; *Burden Hours*—0.

[FR Doc. 91–15112 Filed 6–25–91; 8:45 am]

BILLING CODE 4000–1–M

National Council on Vocational Education; Meeting

AGENCY: National Council on Vocational Education, Education.

ACTION: Notice of public meeting of the Council.

SUMMARY: This notice sets forth the proposed agenda of a forthcoming meeting of the National Council on Vocational Education. This notice describes the functions of the Council. Notice of this meeting is required under section 10(a)(2) of the Federal Advisory Committee Act. This document is intended to notify the general public of their opportunity to attend.

DATES AND TIME: July 15, 1991. 9 a.m. to 4 p.m.

ADDRESSES: Sheraton City Center Hotel (Georgetown Room) 1143 New Hampshire Ave., NW., Washington, DC 20037, (202) 775–0800.

FOR FURTHER INFORMATION CONTACT: Dr. Joyce Winterton, Executive Director, 330 C Street SW., MES—suite 4060, Washington, DC 20202–7580 (202) 732–1884.

SUPPLEMENTARY INFORMATION: The National Council on Vocational Education is established under section 431 of the Carl D. Perkins Vocational Education Act Public Law 98–524, 5 U.S.C.A appendix 2.

The Council is established to:

(A) Advise the President, the Congress, and the Secretary of Education concerning the administration of, preparation of general regulations for, and operation of, vocational education programs supported with assistance under this title;

(B) Review the administration and operation for vocational education programs under this title, including the effectiveness of such programs in meeting the purposes for which they are established and operated, make recommendations with respect thereto, and make annual reports of its findings and recommendations (including recommendations for changes in the provisions of this title) to the Secretary for transmittal to Congress; and

(c) Conduct independent evaluations of programs carried out under this title and publish and distribute the results thereof.

The meeting of the Council is open to the Public. The proposed agenda includes discussion on the following: Large School District Seminars on Implementing the Carl Perkins Act, Occupational Competencies, Annual Report, Budget, Executive Director's Report, America 2000 Report, SCANS Commission Report. Records are kept of all Council proceedings, and are available for public inspection at the above address from the hours of 9 a.m. to 4 p.m.

Dated: June 19, 1991.

Joyce Winterton,

Executive Director.

[FR Doc. 91–15106 Filed 6–25–91; 8:45 am]

BILLING CODE 4000–01–M

DEPARTMENT OF ENERGY

Floodplain Statement of Findings for the Proposed Remedial Investigation of the 300–FF–5 Operable Unit Hanford Site, Richland, WA

AGENCY: Department of Energy (DOE).

ACTION: Floodplain statement of findings.

STATEMENT: This is a Statement of Findings prepared pursuant to Executive Orders 11988 and 11990, and 10 CFR part 1022, Compliance with Floodplain-Wetlands Environmental Review Requirements. The DOE has determined that some activities associated with the Remedial Investigation/Feasibility Study (RI/FS) of the 300–FF–5 Operable Unit will occur within the 100-year floodplain of the Columbia River. On the basis of the Floodplain/Wetlands Assessment for the proposed remedial investigation, prepared pursuant to 10 CFR 1022.12, the DOE has determined that there will be no adverse effect to the floodplain, that there is no practicable alternative to the proposed action and that the proposed action has been designed to minimize potential harm to or within the floodplain of the Columbia River.

The proposed action is to perform the RI/FS for the 300–FF–5 ground-water operable unit on the Hanford Site, Richland, Washington (Figure 1). The RI/FS is necessary to meet requirements of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) of 1980, as amended, to determine the nature and extent of the threat posed by a release of hazardous substances to the environment and to evaluate proposed remedies for such a release. The RI/FS activities are preliminary steps in developing plans and alternatives for clean-up of the operable unit. The work is described in detail in Remedial Investigation/Feasibility Study Work Plan for the 300–FF–5 Operable Unit, Hanford Site, Richland, Washington. The work is also necessary to comply with the Hanford Federal Facility Agreement and Consent Order, and in particular, supports milestones M–12–00, M–12–04, and M–15–00.

BILLING CODE 6450–1–M

VOL 56 ISS 123 JE 26 1991 UMI

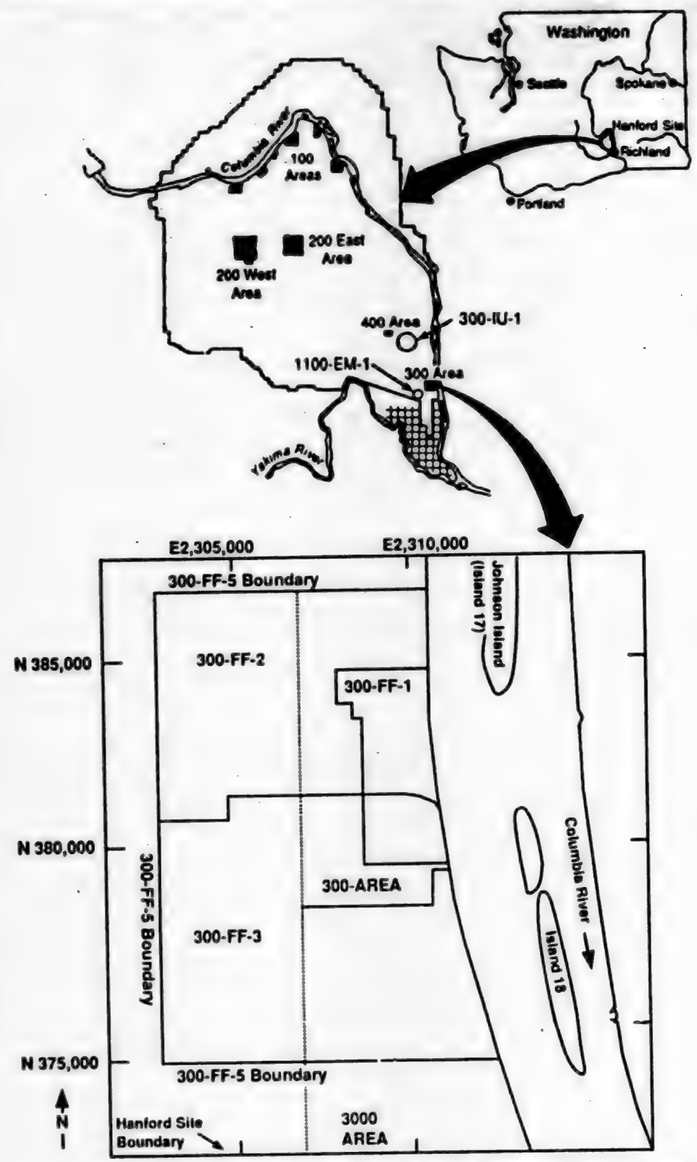

Figure 1. Location of the 300-FF-5 Operable Unit on the Hanford Site.

The specific activities that may occur within the 100-year floodplain include geophysical surveys, hydrostratigraphy studies, surface water and sediment investigations, and biota investigations. The following briefly describes these activities.

• Geophysical Surveys—These studies will be performed to determine the existence and location of a suspected paleochannel along with Columbia River, and will utilize ground-penetrating radar, electromagnetic induction, and acoustic refraction techniques. The survey area will be approximately 2 miles long, and will encompass a 500-foot-wide band along the Columbia River.

• Hydrostratigraphy Studies—These studies will include drilling ground-water characterization wells to determine the continuity of hydrostratigraphic units across the Columbia River from the Hanford Site, and under the Columbia River. Wells will be drilled on islands in the Columbia River, across the river in Franklin County, and possibly in the river bottom. The need for these wells will be carefully considered after preliminary phases of data collection and interpretation have been completed. Drilling and disposal activities will be performed in accordance with all applicable state and federal regulations and guidelines. Specific methodologies for drilling wells in the river bed and on islands are currently being developed.

• Surface-water and Sediment Investigations—These activities will consist of: (1) Collection of water and sediment samples from the active springs or seepage areas along the river; collection of water and sediment samples from the river at nearshore locations adjacent to active seeps and along the contaminated ground-water plume as identified or projected in the ground-water investigation; (2) collection of water samples from Columbia River cross sections; and (3) monitoring of the river stages in the 300–FF–5 area.

• Biotic Investigations—These investigations will include collection of aquatic and riparian zone biota to identify possible biotic contaminant transport pathways, and to determine the existing concentrations of contaminants in biota associated with the 300–FF–5 operable unit.

The goal of each task is to characterize the extent of known areas of contamination and to identify and characterize unknown areas of contamination that may exist. None of the tasks require major construction activities. The hydrostratigraphy studies may require the drilling of wells in the floodplain; however, if preceding studies provide sufficient data, drilling will not be conducted. Disturbances to the floodplain and wetlands adjacent to the Columbia River primarily will be limited to pedestrian traffic necessary to collect samples, monitor water levels, and to carry out surveys with nonintrusive instruments. Following completion of the characterization, remedial action strategies and alternatives will be prepared for the removal and remediation of the contamination from the operable unit. Alternatives to the proposed action are limited because of the need to carefully characterize contaminated areas on the Hanford Site prior to commencement of remediation activities.

• Relocation of the activities to another area cannot be considered as a viable alternative because of the need to collect samples that are representative of the contamination as it exists in the operable unit. Remediation activities and strategies will be based upon data obtained from these samples, which must be indicative of the extent of contamination.

• The no action alternative, where no RI/FS activities are performed in the field or in the floodplain, is not viable, as this alternative would not be in accordance with the requirements of CERCLA, the Hanford Federal facility Agreement and Consent Order, as well as current U.S. Environmental Protection Agency requirements to characterize the operable unit prior to remediation.

• Alternative methods of collecting some samples are being considered through the RI/FS process. Specifically, the need for drilling of ground-water monitoring wells is presently under consideration, and will be further evaluated during the initial phases of the RI/FS. If well construction is necessary, disturbances to vegetation and the shoreline will kept to a minimum by limiting access to the area, and by utilizing stabilization devices such as berms, riprap, etc. to minimize erosion. The well construction will be in accordance with State and Federal guidelines, rules, and regulations.

The proposed action has been designed to conform to applicable Federal and State regulations. Federal, State or local permits are not required under § 300.400(e) of the National Contingency Plan for on-site actions conducted pursuant to CERCLA, however, DOE will ensure that the actions conform with all substantive requirements of any permits.

The proposed actions in the Columbia River floodplain must be taken as soon as possible because of binding agreements between DOE, the U.S. Environmental Protection Agency and the Washington State Department of Ecology. Therefore, further public review is waived prior to implementation of the proposed floodplain action, as provided by 10 CFR 1022.18 (a) and (c).

AVAILABILITY OF THE FLOODPLAIN/WETLANDS ASSESSMENT: Single copies of the Floodplain/Wetlands Assessment are available from Mr. K. Michael Thompson, 300–FF–5 Operable Unit Manager, DOE-Richland Operations Office, Richland, Washington 99352 (509) 376–6421.

FURTHER INFORMATION: For further information contact Ms. Julie Erickson, U.S. Department of Energy, Richland Operations Office, Richland, Washington 99352 (509) 376–3603.

Leo P. Duffy,

Director, Office of Environmental Restoration and Waste Management.

[FR Doc. 91–14975 Filed 6–25–91; 8:45 am]

BILLING CODE 6450–01–M

Future Directions in Advanced Extraction and Process Technology

AGENCY: Bartlesville Project Office, U.S. Department of Energy.

ACTION: Notice of non-competitive financial assistance (grant) award with the National Academy of Sciences.

SUMMARY: The Department of Energy (DOE), Bartlesville Project Office (BPO) announces that pursuant to 10 CFR 600.7(b)(2)(i) Criteria (D), it intends to make a non-competitive Financial Assistance (Grant) award through the Pittsburgh Energy Technology Center to National Academy of Sciences.

SCOPE: The United States Department of Energy (DOE) recognizes the need and opportunity to assist in the development of a comprehensive study on the Advanced Extraction and Process Technology. The objective of this proposed activity is to provide financial assistance to the National Academy of Sciences by means of a research grant, which will allow the National Academy of Sciences to develop and advance new concepts and technology in the Advanced Extraction and Process Technology Program. The purpose of this research grant is to request the assistance of the National Academy of Sciences in conducting a four-phase study of the future directions in advanced extraction and process technology. This study will involve a comprehensive examination of research needs of the Advanced Extraction and Process Technology Program.

VOL 56 ISS 123 JE 26 1991 UMI

The cooperative research program extends a unique opportunity to complete research with well-recognized institute research personnel which can have a major impact on the projects for assessing and identifying future direction in advanced extraction and process technology and has a very high probability of success.

The transaction of this project will benefit the public such that it will facilitate the cooperation between DOE personnel and the Academy for solutions to future directions in advanced extraction and process technology, and it will provide for the fruitful exchange of ideas between various members of the scientific community.

This grant to the National Academy of Sciences is considered suitable for noncompetitive financial assistance based on 10 CFR 600.7(b)(2)(i) Criteria (D).

Consistent with 41 U.S.C. 253, the National Academy of Sciences is a uniquely qualified (external) organization chartered by Congress in 1863 to conduct studies in the sciences and arts when called upon by a department of the Government.

The term of the grant is twelve (12) months at a total estimated value of $150,000,000.

FOR FURTHER INFORMATION CONTACT: U.S. Department of Energy, Pittsburgh Energy Technology Center, Acquisition and Assistance Division, P.O. Box 10940, MS 921–118, Pittsburgh, PA 15236, Attn: Cynthia Y. Mitchell, telephone: AC 412/892–4862.

Dated: June 12, 1991.

Carroll A. Lambton,

Director, Acquisition and Assistance Division, Pittsburgh Energy Technology Center.

[FR Doc. 91–15215 Filed 6–25–91; 8:45 am]

BILLING CODE 6450–01–M

Financial Assistance Award; Intent To Award Grant to Nu-Bore Systems

AGENCY: Department of Energy.

ACTION: Notice of unsolicited application financial assistant award.

SUMMARY: The Department of Energy announces that pursuant to 10 CFR 600.6(a)(2) it is making a discretionary financial assistance award based on acceptance of an unsolicited application meeting the criteria of 10 CFR 600.14(e)(1) to Nu-Bore Systems under Grant Number DE–FG01–91CE15497. The proposed grant will provide funding in the estimated amount of $99,910 for the purpose of completing the development leading to commercialization of an advanced downhole casing repair system for gas and oil wells, which is a highly promising new system that is potentially less expensive, faster, and more reliable than current casing repair methods, and one also with environmental benefits.

The Department of Energy has determined in accordance with 10 CFR 600.14(f) that the application submitted by Nu-Bore Systems is meritorious based on the general evaluation required by 10 CFR 600.14(d) and that the proposed project represents a unique idea that would not be eligible for financial assistance under a recent, current or planned solicitation. The invention is using a technique for which a patent is pending for developing the needed system that would repair well casings at lower cost. This would limit the practice of the rapid shut down of stripper wells, resulting in increased oil production. The proposed project is not eligible for financial assistance under a recent, current or planned solicitation because the funding program, the Energy-Related Inventions Program (ERIP), has been structured since its beginning in 1975 to operate without competitive solicitations because the authorizing legislation directs ERIP to provide support for worthy ideas submitted by the public. The program has never issued and has no plans to issue a competitive solicitation.

The anticipated term of the proposed grant is 18 months from the date of the award.

FOR FURTHER INFORMATION CONTACT: U.S. Department of Energy, Office of Placement and Administration, ATTN: Rose Mason, PR–322.2, 1000 Independence Ave. SW., Washington, DC 20585.

Thomas S. Keefe,

Director, Operations Division "B", Office of Placement and Administration.

[FR Doc. 91–15214 Filed 6–25–91; 8:45 am]

BILLING CODE 6450–01–M

Financial Assistance Award; Intent To Award Grant to Welding Consultants, Inc.

AGENCY: Department of Energy.

ACTION: Notice of non-competitive financial assistance award.

SUMMARY: The Department of Energy announces that pursuant to 10 CFR 600.7(b)(2)(i)(A) it is making a financial assistance award under Grant Number DE–FG01–91CE15078 to the Welding Consultants, Inc., (WCI) for purposes of preparing welding samples and performing scanning electronic microscopic (SEM) analysis of welds made with the Meta-Lax method. This grant is necessary for the completion of the project begun in 1989, entitled The Meta-Lax Method of Stress Reduction in Welds. This phase of the project which will prepare samples and analyze welds which show unexpected high performance, could identify the cause for this superior performance, and this may facilitate the implementation of this technology. The anticipated objective of this supplemental proposal is for WCI to prepare previously welded samples for SEM studies, perform the studies, and have the resulting photomicrographs fractographically analyzed by a recognized expert, who perhaps can find weld characteristics which could account for their superior performance. Once the inventor has these test results, it is entirely possible that increased sales will be obtained for this patented technology which will achieve the anticipated energy savings. Funding in an estimated amount of $14,065.54 is to be provided by the Department of Energy (DOE).

The application was deemed meritorious for the DOE Energy Related Invention Program (ERIP) based on its careful evaluation and the uniqueness of the patented design that promises energy savings estimated at 65 precent of the 220 billion cubic feet of natural gas used annually in the thermal stress relief process. A competitive solicitation would be inappropriate.

In accordance with 10 CFR 600.7(b)(2)(i)(A), it has been determined that the activity to be funded is necessary to the satisfactory completion of an activity presently being funded by DOE and for which competition for support would have a significant adverse effect on completion of the activity. The anticipated term of the proposed grant shall be twelve months from the effective date of the award.

BILLING CODE 6450–01–M

Federal Energy Regulatory Commission

[Docket Nos. ER91–488–000, et al.]

PacifiCorp Electric Operations, et al.; Electric Rate, Small Power Production, and Interlocking Directorate Filings

June 19, 1991.

Take notice that the following filings have been made with the Commission:

1. PacifiCorp Electric Operations

[Docket No. ER91–488–000]

Take notice that PacifiCorp Electric Operations ("PacifiCorp"), on June 13, 1991, tendered for filing in accordance with 18 CFR part 35 of the Commission's Rules and Regulations, Revision Nos. 4 and 5 to exhibit A, Contract No. 14–06–400–3978, Weber Basin Project, for Water Exchange and Transmission Service, between PacifiCorp and Western Area Power Administration (WAPA), PacifiCorp's Rate Schedule FERC No. 286. Exhibit A specifies Points of Delivery of power and energy received by PacifiCorp at Points of Connection with WAPA's Weber Basin Project. PacifiCorp requests, pursuant to 18 CFR 35.11 of the Commission's Rules and Regulations, that a waiver of prior notice be granted and that an effective date of May 25, 1990 be assigned to exhibit A, Revision No. 4 and an effective date of February 15, 1991 be assigned to exhibit A, Reivsion No. 5, these dates being consistent with the effective dates of the respective revisions.

Copies of this filing were supplied to WAPA, the Public Utility Commission of Oregon and the Utah Public Service Commission.

Comment date: July 5, 1991 in accordance with Standard Paragraph E at the end of this notice.

2. United States Department of Energy—Western Area Power Administration

[Docket No. EF91–5091–000]

Take notice that on June 12, 1991, the Deputy Secretary of the Department of Energy tendered for filing, on behalf of the Western Area Power Administration, a rate schedule [BCP–F3) for power from the Boulder Canyon Project. Confirmation and approval of this rate schedule, on a final basis, is sought by filing. The Deputy Secretary had previously given interim approval to the rate schedule by Rate Order No. WAPA–49.

Comment date: July 8, 1991, in accordance with Standard Paragraph E at the end of this notice.

3. Southern California Edison Co.

[Docket No. ER91–491–000]

Take notice that on June 17, 1991, Southern California Edison Company (Edison) tendered for filing, as an initial rate schedule, the following agreement, executed on November 8, 1990, by the respective parties:

Edison-SDG&E, 1995 Power Sale Agreement Between Southern California Edison Co. (Edison) and San Diego Gas & Electric Co. (SDG&E)

The Agreement establishes the terms and conditions whereby Edison shall provide 230 megawatts of capacity and associated energy to SDG&E from June 1, 1995 through May 31, 1996 or May 31, 1997, to be determined by SDG&E.

Copies of this filing were served upon the Public Utilities Commission of the State of California and all interested parties.

Comment date: July 5, 1991, in accordance with Standard Paragraph E at the end of this notice.

4. Florida Power & Light Co.

[Docket No. ER91–365–000]

Take notice that on June 14, 1991, Florida Power & Light Company submitted an amended filing in the above-referenced docket. The amended filing provides additional information requested by the Commission Staff.

Comment date: July 5, 1991, in accordance with Standard Paragraph E at the end of this notice.

5. Washington Water Power Co.

[Docket No. ER91–405–000]

Take notice that on June 3, 1991, Washington, Water Power Company, tendered for filing an Amendment to its original filing of a Capacity and Energy Sales Agreement between The Washington Water Power Company and Public Utility District No. 1 to Pend Oreille County. This Amendment 1 provides additional information requested by Commission staff.

A copy of the filing was served upon Public Utility District No. 1 of Pend Oreille County.

Comment date: July 3, 1991, in accordance with Standard Paragraph E end of this notice.

6. Gulf States Utilities Co.

[Docket No. ER90–583–001]

Take notice that on June 7, 1991, Gulf States Utilities Company (Gulf States) tendered for filing a revised rate sheet for supplemental service under Service Schedule EP in the above referenced docket.

Comment date: July 3, 1991, in accordance with Standard Paragraph E at the end of this notice.

7. Philadelphia Electric Co. The Susquehanna Electric Co.

[Docket No. ER91–478–000]

Take notice that Philadelphia Electric Company and The Susquehanna Electric Company on June 5, 1991, ("the Companies") tendered for filing proposed changes in their FERC Electric Service Tariffs, No. 36 and No. 2 respectively, applicable for service to Conowingo Power Company. The proposed changes would increase revenues from jurisdictional sales and service by $14,845,000 or 38.5% based on the 12 month period ending December 31, 1991. Additionally, the Company is proposing amendments to its fuel adjustment clause to (1) clarify the specific costs that are properly included, (2) include spent nuclear fuel expense recovery, and (3) synchronize realization of revenue and expense.

In the June 5, 1991 filing, page 94 of Philadelphia Electric Company Exhibit No. 2 (ABC/RAC), Statement BK was inadvertently omitted. On June 14, 1991, the filing was amended to include page 94 of Statement BK.

The primary reason for the increase is to enable the Company to earn fair return or its investment. Current rates do not reflect the cost of owning and operating Philadelphia Electric Company's Limerick Generating Station. The changes to the fuel adjustment are for clarity and to better match revenue and expense.

Copies of the filing were served upon the public utility's jurisdictional customers. The Maryland Public Service Commission, the Maryland People's Counsel, and the Pennsylvania Public Utility Commission.

Comment date: July 3, 1991, in accordance with Standard Paragraph E at the end of this notice.

8. Public Service Co. of New Mexico

[Docket No. EC91–16–000]

Take notice that, pursuant to section 203 of the Federal Power Act, on June 14, 1991, Public Service Company of New Mexico (PNM) filed an application seeking an Order or other appropriate determination approving the sale by PNM to the City of Farmington, New Mexico (City) of a 115 kV electric transmission line (the UW Line) running between the Shiprock Substation and the Colorado-New Mexico border.

The UW Line is no longer needed by PNM and will be used by the City to add transfer capability to its transmission system to serve the City's load. Copies

VOL 56 ISS 123 JE 26 1991 UMI

of this filing have been served upon the City and the New Mexico Public Service Commission.

Comment date: July 10, 1991, in accordance with Standard Paragraph E at the end of this notice.

9. Pacific Gas and Electric Co.

[Docket No. ER91-489-000]

Take notice that on June 14, 1991, Pacific Gas and Electric Company (PG&E) tendered for filing changes to a rate schedule covering services rendered by PG&E under the agreements entitled, (1) "Power Plant Operation Agreement Between Pacific Gas and Electric Company and Central California Power Agency No. 1 For the Coldwater Creek Geothermal Power Plant", dated March 2, 1988 (CCPA Agreement) and (2) 115 kV Interconnection and Energy Sale Agreement between PG&E and Pacific Power and Light Company, dated July 31, 1984 (PP&L Agreement). The CCPA Agreement was initially filed under FERC Docket No. ER88-484-000 and was assigned Rate Schedule FERC No. 119. The PP&L Agreement was initially filed under FERC Docket No. ER90-236-000 and was assigned Rate Schedule FPC No. 29.

The filing seeks to revise the mothly Cost of Ownership rates under the CCPA Agreement, which are tied to PG&E's Electric rule 2 as filed with the California Public Utilities Commission (CPUC), to reflect revised rates instituted by the CPUC effective August 24, 1988 and January 21, 1991. In addition, this filing requests automatic rate adjustments to both the CCPA Agreement and the PP&L Agreement when future changes to PG&E's Electric rule 2 occur pursuant to CPUC approval.

Copies of this filing have been served upon CCPA, PP&L and the CPUC.

Comment date: July 5, 1991, in accordance with Standard Paragraph E at the end of this notice.

10. Washington Water Power Co.

[Docket No. ER91-388-000]

Take notice that on June 3, 1991, Washington, Water Power Company, tendered for filing an Amendment to its original filing of a Firm and Non-firm Energy Sales Agreement between the Washington Water Power Company and Los Angeles Department of Water & Power. This Amendment 1 provides additional information requested by Commission staff.

A copy of the filing was served upon Los Angeles Department of Water & Power.

Comment date: July 3, 1991, in accordance with Standard Paragraph E at the end of this notice.

11. Southern California Edison Co.

[Docket No. ER91-490-000]

Take notice that on June 17, 1991, Southern California Edison Company (Edison) tendered for filing, as an initial rate schedule, the following agreement, executed on September 10, 1990, by the respective parties:

Edison-SDG&E, Power Sale Agreement Between Southern California Edison Co. (Edison) and San Diego Gas & Electric Co. (SDG&E)

The Agreement establishes the terms and conditions whereby Edison shall provide 140 megawatts of capacity and associated energy to SDG&E from June 1, 1993, until the earlier of: (1) The date when SDG&E's Clean Air Demonstration Project is completed; or (2) May 31, 1995.

Copies of this filing were served upon the Public Utilities Commission of the State of California and all interested parties.

Comment date: July 5, 1991, in accordance with Standard Paragraph E at the end of this notice.

12. PacifiCorp Electric Operations

[Docket No. ER91-487-000]

Take notice that PacifiCorp Electric Operations ("PacifiCorp"), on June 13, 1991, tendered for filing in accordance with 18 CFR 35 of the Commission's Rules and Regulations, Revised Exhibit 2, dated April 10, 1991, of Amendment of Agreements ("Amendment") between PacifiCorp and Moon Lake Electric Association ("Moon Lake") (PacifiCorp's Rate Schedule FERC No. 302).

Copies of this filing were supplied to Moon Lake Electric Association, the Public Utility Commission of Oregon and the Utah Public Service Commission.

Comment date: July 5, 1991, in accordance with Standard Paragraph E end of this notice.

13. Commonwealth Edison Co.

[Docket No. ER91-485-000]

Take notice that on June 13, 1991, Commonwealth Edison Company ("Edison") tendered for filing proposed changes in its FERC Electric Tariff, Rates 26, 27, and 28. The proposed changes add a supplement to the Electric Service Contracts between Edison and the Cities of Batavia, Illinois ("Batavia"), Naperville, Illinois ("Naperville"), and St. Charles, Illinois ("St. Charles"). These supplements provide a kilowatthour rate for the sixth contract year.

A copy of the filing has been served upon the Cities of Batavia, Naperville, and St. Charles and the Illinois Commerce Commission.

Comment date: July 5, 1991, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraphs

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Project No. 2354-014 Georgia]

Georgia Power Co.; Availability of Environmental Assessment

June 20, 1991.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's regulations, 18 CFR part 380 (Order No. 486, 52 FR 47910), the Office of Hydropower Licensing (OHL) has reviewed the application to amend the license for the North Georgia Project to relocate and restore a historic jail for use as a museum/interpretative center for the public. The project is located on Tallulah Falls Lake, in Rabun County, Georgia. The staff of OHL's Division of Project Compliance and Administration has prepared an Environmental Assessment (EA) for the proposed action. In the EA, staff concludes that approval of the amendment of license would not constitute a major federal action significantly affecting the quality of the human environment.

Copies of the EA are available for review in the Reference and Information Center, room 3308, of the Commission's

Offices at 941 North Capitol Street, NE., Washington, DC 20426.

Lois D. Cashell,

Secretary.

[FR Doc. 91-15129 Filed 6-25-91; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. CP91-2290-000, et al.]

Mississippi River Transmission Corporation, et al.; Natural gas certificate filings

June 19, 1991.

Take notice that the following filings have been made with the Commission

1. Mississippi River Transmission Corp.

[Docket No. CP91-2290-000]

Take notice that on June 17, 1991, Mississippi River Transmission Corporation (MRT), 9900 Clayton Road, St. Louis, Missouri 63124, filed in Docket No. CP91-2290-000 a request pursuant to § 157.205 of the Commission's Regulations for authorization to provide transportation service of behalf of Boyd Rosene and Associates, Inc. (Boyd), under MRT's blanket certificate issued in Docket No. CP89-1121-000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

MRT requests authorization to transport, on an interruptible basis, up to a maximum of 25,000 MMBtu of natural gas per day for Boyd from a receipt point located in Oklahoma to a delivery point located in Oklahoma. MRT anticipates transporting 2,778 MMBtu of natural gas on an average day and an annual volume of 1,013,889 MMBtu.

MRT states that the transportation of natural gas for Boyd commenced April 27, 1991, as reported in Docket No. ST91-6861-000, for a 120-day period pursuant to § 284.223(a) of the Commission's Regulations and the blanket certificate issued to MRT in Docket No. CP89-1121-000.

Comment date: August 5, 1991, in accordance with Standard Paragraph G at the end of this notice.

2. High Island Offshore System

[Docket No. CP91-2279-000]

Take notice that on June 14, 1991, High Island Offshore System (HIOS), 500 Renaissance Center, Detroit, Michigan 48243, filed in Docket No. CP91-2279-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to provide an interruptible transportation service for Diamond Shamrock Offshore Partners Limited Partnership, a producer, under the blanket certificate issued by the Commission's Order No. 509 corresponding to the rates, terms and conditions filed in Docket No. RP89-82-000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

HIOS states that, pursuant to an agreement dated April 1, 1990, under its Rate Schedule IT, it proposes to transport up to 27,100 Mcf per day of natural gas. HIOS indicates that the gas would be transported from Offshore Louisiana, and Offshore Texas, and would be redelivered in Offshore Louisiana, and Offshore Texas. HIOS further indicates that it would transport 27,100 Mcf on an average day and 9,891,500 Mcf annually.

HIOS advises that service under § 284.223(a) commenced April 10, 1991, as reported in Docket No. ST91-8405-000.

Comment date: August 5, 1991, in accordance with Standard Paragraph G at the end of this notice.

3. Mississippi River Transmission Corp.

[Docket No. CP91-2289-000]

Take notice that on June 17, 1991, Mississippi River Transmission Corporation (MRT), 9900 Clayton Road, St. Louis, Missouri 63124, filed in Docket No. CP91-2289-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205), for authorization to add a delivery point to serve Arkansas Louisiana Gas Company (ALG), under its blanket certificate issued in Docket No. CP82-489-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

MRT requests authorization to construct and operate facilities necessary to provide an additional point of delivery for ALG, an existing firm sales customer served under MRT's Rate Schedule CD-1. It is stated that such facilities will include a 2-inch tap and appurtenant facilities, including a meter and regulating station located on MRT's existing right-of-way. It is stated that the proposed facility will be connected with ALG's facilities which will be located on right-of-way already owned, or to be acquired, by ALG.

MRT states that the Rye, Arkansas, delivery point will serve residential and commercial customers in and around the community of Rye, Arkansas. It is stated that the delivery point will supply an estimated 600 Mcf of natural gas on a peak day and an estimated 22,015 Mcf of natural gas on an annual basis. It is further stated that the delivery point will not result in an increase in the total daily or annual quantities MRT is authorized to deliver to ALG.

MRT estimates the cost of the facilities to be $41,922 which will be reimbursed by ALG, as well as the application filing fee.

Comment date: August 5, 1991, in accordance with Standard Paragraph G at the end of this notice.

4. National Fuel Gas Supply Corp.

[Docket Nos. CP91-2229-000, CP91-2230-000, CP91-2231-000, CP91-2232-000, CP91-2233-000]

Take notice that the above referenced company (Applicant) filed in the respective dockets prior notice requests pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to transport natural gas on behalf of various shippers under its blanket certificate issued pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the prior notice requests which are on file with the Commission and open to public inspection.[1]

Information applicable to each transaction including the identity of the shipper, the type of transportation service, the appropriate transportation rate schedule, the peak day, average day, and annual volumes, and the docket numbers and initiation dates of the 120-day transactions under § 284.223 of the Commission's Regulations has been provided by the Applicant and is included in the attached appendix.

The Applicant also states that it would provide the service for each shipper under an executed transportation agreement, and that the Applicant would charge rates and abide by the terms and conditions of the referenced transportation rate schedules.

Comment date: August 5, 1991, in accordance with Standard Paragraph G at the end of this notice.

[1] These prior notice requests are not consolidated.

5. Texas Gas Transmission Corp., Williston Basin Interstate Pipeline Co., Trunkline Gas Co., Trunkline Gas Co., Trunkline Gas Co., Northern Natural Gas Co.

[CP91-2260-000,[3] CP91-2261-000, CP91-2262-000, CP91-2263-000, CP91-2264-000, CP91-2265-000]

Take notice that on June 12, 1991, Applicants filed in the above referenced dockets, prior notice requests pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205 and 284.223) for authorization to transport natural gas on behalf of various shippers under their respective blanket certificates issued pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the prior notice requests which are on file with the Commission and open to public inspection and in the attached appendix.

Information applicable to each transaction including the identity of the shipper; the date of the transportation service agreement between the Applicant and the respective shipper; if applicable, the reference number of the transportation service agreement and the function of the shipper, i.e., shipper, marketer, interstate pipeline, etc.; the type of transportation service; the appropriate transportation rate schedule; the peak day, average day, and annual volumes; and the docket number and initiation dates of the 120-day transactions under § 284.223 of the Commission's Regulations has been provided by the Applicants and is included in the attached appendix.

The Applicants allege that they would provide the proposed service for each shipper under an executed transportation service agreement and would charge rates and abide by the terms and conditions of the referenced transportation rate schedules. The Applicants contend that construction of facilities is not required with each of the Applicants using existing facilities to provide the proposed transportation service.

Comment date: August 5, 1991, in accordance with Standard Paragraph G at the end of this notice.

6. Arkla Energy Resources a division of Arkla, Inc.

[Docket No. CP91-2288-000]

Take notice that on June 17, 1991, Arkla Energy Resources (AER), a division of Arkla, Inc., 525 Milam Street, Shreveport, Louisiana 71151, filed in Docket No. CP91-2288-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205), for authorization to construct and operate certain sales tap facilities in Arkansas, Louisiana and Texas, under its blanket certificate issued in Docket No. CP82-384-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

AER requests authorization to construct and operate one sales tap and related facilities; to operate four existing taps for delivery of gas for resale to consumers other than the right-of-way grantors for whom the taps were originally installed; and to upgrade six existing meter stations for increased deliveries, all for the delivery of gas to Arkansas Louisiana Gas Company for resale to domestic, commercial and industrial consumers in Arkansas, Louisiana and Texas. AER states that the gas will be delivered from its general system supply, which is adequate to provide the service.

Comment date: August 5, 1991, in accordance with Standard Paragraph G at the end of this notice.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefore, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Lois D. Cashell,
Secretary.

[Docket No. RP88-211-014]

CNG Transmission Corp.; Proposed Changes in FERC Gas Tariff

June 19, 1991

Take notice that CNG Transmission Corporation ("CNG"), on June 14, 1991, filed the tariff sheets listed on the attachments to this notice to be effective July 1, 1991. The tariff sheets are tendered to complete implementation of a Stipulation and Agreement ("Stipulation") the Commission approved on May 7, 1991 ("Order").

As noted in the compliance filing made June 6, 1991, CNG reserves the right to withdraw its filings based on a review of any applications for rehearing.

CNG's tendered tariff sheets include a new FERC Gas Tariff, Original Volume No. 1A, which specifies the facilities where the Stipulation's gathering and products extraction charges will apply. CNG also tenders to First Revised Volume No. 1, tariff sheets setting forth the transportation assignment notice for CTAP, a Form of Service Agreement for Rate Schedule UTAP and subsitute sheets to replace those originally filed on June 6, 1991, to reflect the changes made in this filing and to correct typographical errors.

CNG states that copies of the filing was served upon the parties to the proceeding, CNG's customers and interested state commissions.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 214 and 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.214 and 385.211. All such protests should be filed on or

VOL 56 ISS 123 JE 26 1991 UMI

before June 28, 1991. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. MT90-5-002]

Canyon Creek Compression Co.; Changes in FERC Gas Tariff

June 19, 1991.

Take notice that on June 14, 1991, Canyon Creek Compression Company (Canyon) tendered for filing First Revised Sheet No. 18, Original Sheet No. 18A, First Revised Sheet No. 39 and First Revised Sheet No. 40 to be a part of its FERC Gas Tariff, First Revised Volume No. 1A, to be effective July 14, 1991.

Canyon states that the tariff sheets are submitted in compliance with Ordering Paragraph (B)(10) of the Commission's Order issued May 23, 1991 at Docket No. MT90-5-000 (Algonquin, *et al.*, Docket Nos. MT88-1-000, *et al.*). The tariff sheets incorporate the language requirements of Sections 250.16(b)(2) (v) and (xiv) of the Commission's Regulations.

Canyon requested waiver of the Commission's Regulations to the extent necesary to permit the tariff sheets to become effective july 14, 1991.

Canyon states that a copy of the filing is being served to Canyon's jurisdictional customers, interested state regulatory agencies and all parties set out on the official service list at Docket No. MT90-5-000.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedures, 18 CFR 385.214 and 385.211. All such protests should be filed on or before June 28, 1991. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. MT91-3-000]

East Tennessee Natural Gas Co.; Tariff Filing

June 19, 1991.

Take notice that on June 12, 1991, East Tennessee Natural Gas Company (East Tennessee) tendered for filing the following tariff sheet to First Revised Volume No. 1 of its FERC Gas Tariff to be effective July 1, 1991:

Second Revised Sheet No. 122.

Second Revised Sheet No. 122 sets forth East Tennessee's procedures for resolving complaints by adding a requirement that East Tennessee respond initially to a complaint within 48 hours, and in writing within 30 days of receipt. This change is in compliance with 18 CFR 250.16(b)(1)(iii).

East Tennessee states that copies of the filing is have been mailed to all of its customers and affected state regulatory commissions.

Any person desiring to be heard or protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with 18 CFR 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before June 28, 1991. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the public reference room.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RP91-145-001]

Florida Gas Transmission Co.; Compliance Filing

June 20, 1991.

Take notice that on June 14, 1991, Florida Gas Transmission Company (FGT) tendered for filing the following tariff sheets to become part of its FERC Gas Tariff, Second Revised Volume No. 1:

Substitute First Revised Sheet No. 102, Substitute Original Sheet No. 249A.

FGT states that by Commission order issued May 31, 1991 in the above-referenced docket, the Commission accepted, subject to certain conditions tariff sheets reflecting changes in the procedures for both submitting a valid request for firm service and for maintaining an existing position on FGT/s Firm Natural Gas Service Log to be effective June 1, 1991.

FGT states that it is submitting the above-referenced tariff sheets to incorporate the revisions as required by the Commission's May 31 order.

FGT states that a copy of the filing was mailed to all holders of FGT's FERC Gas Tariff, Second Revised Volume No. 1 and interested state commissions.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with rules 214 and 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.214 and 385.211. All such protests should be filed on or before June 27, 1991. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. RP91-164-001]

Granite State Gas Transmission, Inc.; Revised Changes in Rates

June 20, 1991.

Take notice that on June 17, 1991, Granite State Gas Transmission, Inc. (Granite State), 300 Friberg Parkway, Westborough, Massachusetts 01581, filed substitute revised tariff sheets in its FERC Gas Tariff, Second Revised Volume No. 1 and First Revised Volume No. 2, containing changes in rates for effectiveness on July 1, 1991. According to Granite State, its filing in this matter was initially submitted on May 31, 1991. It is stated Granite State has reduced the cost of service claimed in the May 31st filing and corrected the pagination of the revised tariff sheets submitted with the May 31st filing.

According to Granite State, the tariff sheets listed below are substitutes for those submitted with the filing on May 31, 1991.

As designated in the May 31st filing	As corrected
Second Revised Volume No. 1:	
Seventh Revised Sheet No. 21.	Substitute Seventh Revised Sheet No. 21
First Revised Sheet No. 36.	Second Revised Sheet No. 36
First Revised Sheet No. 123.	Second Revised Sheet No. 123
First Revised Volume No. 2:	
First Revised Sheet No. 28.	Second revised Sheet No. 28

It is further stated that the above listed revised tariff sheets reflect the reduced proposed rates for effectiveness on July 1, 1991 based on the revised cost of service accompanying the filing.

Granite State states that copies of its filing were served upon its customers and the regulatory commissions of the states of Maine, New Hampshire and Massachusetts and the Public Advocate of the State of Maine.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 214 and 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.214 and 385.211. All such protests should be filed on or before June 27, 1991. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. TA91-1-46-004]

Kentucky West Virginia Gas Co., Report of Refunds

June 19, 1991.

Take notice that Kentucky West Virginia Gas Company (Kentucky West) on June 14, 1991, tendered for filing with the Federal Energy Regulatory Commission (Commission) its 3rd Substitute 27th Revised Sheet No. 41 in compliance with the Commission's Order issued on May 17, 1991, accepting Kentucky West's Annual Purchased Gas Filing.

Kentucky West states that, by its filing, or any request or statement made therein, it does not waive any rights to collect amounts, nor the right to collect carrying charges applicable thereto, to which it is entitled pursuant to the mandate of the United States Court of Appeals for the Fifth Circuit issued on March 6, 1986, in *Kentucky West Virginia Gas Co.* v. *FERC*, 780 F.2d 1231 (5th Cir. 1986), or to which it becomes entitled pursuant to any other judicial and/or administrative decisions.

Kentucky West states that a copy of its filing has been served upon each of its jurisdictional customers and interested state commissions.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.214 and 385.211. All such protests should be filed on or before June 26, 1991. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. MT88-33-005]

Natural Gas Pipeline Co. of America; Changes in FERC Gas Tariff

June 19, 1991.

Take notice that on June 14, 1991, Natural Gas Pipeline Company of America (Natural) submitted for filing as part of its FERC Gas Tariff, First Revised Volume No. 1A, the below listed tariff sheets to be effective July 14, 1991:

Fourth Revised Sheet No. 35.
Second Revised Sheet No. 35.1.
First Revised Sheet No. 35.2.
Third Revised Sheet No. 54.
First Revised Sheet No. 54A.

Natural states the purpose of this filing is to comply with the Commission's Order on Order Nos. 497 and 497-A Compliance Filings issued May 23, 1991 (see *Algonquin, et al.*, Docket Nos. MT88-1-000 *et al.*). The Order required Natural to file revised tariff sheets to include information in Natural's transportation request forms that is required by the Commission's Regulations.

Natural has requested waiver of the Commission's Order and Regulations to the extent necessary to permit the approval of these required changes in its tariff.

Natural states that a copy of the filing is being served to Natural's jurisdictional customers, interested state regulatory agencies.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with rules 214 and 211 of the Commission's Rules of Practice and Procedures, 18 CFR 385.214 and 385.211. All such protests should be filed on or before June 26, 1991. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this mater. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. RP91-150-001]

Northwest Pipeline Corp.; Compliance

June 20, 1991.

Take notice that on June 14, 1991, Northwest Pipeline Corporation (Northwest), tendered for filing the following tariff sheets to become part of its FERC Gas Tariff, First Revised Volume No. 1-A, with a proposed effective date of June 2, 1991:

Substitute First Revised Sheet No. 415.
Substitute First Revised Sheet No. 416.
Substitute First Revised Sheet No. 417.

Northwest states that the revised tariff sheets are being filed to comply with the Commission's May 31, 1991 letter order directing Northwest to revise and refile First Revised Sheet Nos. 415, 416, and 417 included in Northwest's Volume No. 1-A Tariff.

Northwest states that a copy of the filing is being mailed to each person listed on the Commission's official service list in the above referenced docket.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with rules 214 and 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.214 and 385.211. All such protests should be filed on or before June 27, 1991. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. MT88-16-004]

Superior Offshore Pipeline; Proposed Changes in FERC Gas Tariff

June 19, 1991.

Take notice that on June 7, 1991, Superior Offshore Pipeline Company ("SOPCO") tendered for filing as part of its FERC Gas Tariff, Original Volume No. 1:

1. Fifth Revised Sheet No. 40;
2. Fifth Revised Sheet No. 41;
3. Fourth Revised Sheet No. 42;
4. Fourth Revised Sheet No. 43; and
5. Original Sheet No. 43a;

The above-referenced tariff sheets are filed in compliance with the findings and conditions set forth in the Commission's May 23, 1991 "Order" issued in the above-captioned proceeding,[1] part 161 of the Commission's Regulations concerning Standards of Conduct for Interstate Pipelines With Market Affiliates and Order Nos. 497 and 497-A.

SOPCO requested waiver of the 30-day notice requirement and proposed that the above-referenced tariff sheets be made effective July 1, 1991.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 214 and 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.214 and 385.211. All such protests should be filed on or before June 26, 1991. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. RP91-175-000]

Tennessee Gas Pipeline Co.; Proposed Changes in FERC Gas Tariff

June 20, 1991.

Take notice that on June 17, 1991, Tennessee Gas Pipeline Company (Tennessee) submits for filing the following tariff sheets to Third Revised Volume No. 1 of its FERC Gas Tariff, effective July 16, 1991:

First Revised Sheet No. 27
First Revised Sheet Nos. 28 through 31 (reserved for future use)
First Revised Sheet No. 143
First Revised Sheet No. 144
First Revised Sheet No. 145
First Revised Sheet No. 146
First Revised Sheet No. 147
First Revised Sheet No. 148
First Revised Sheet No. 149
First Revised Sheet No. 150
First Revised Sheet No. 151
First Revised Sheet No. 152
First Revised Sheet No. 153 through 219 (reserved for future use)

Tennessee states that the purpose of the instant filing is to enable Tennessee to implement the provisions of capacity brokering programs authorized on the High Island Offshore System (HIOS) and U-T Offshore System (UTOS).

Tennessee states that a copy of the filing has been served on all of its jurisdictional customers and all interested state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with 18 CFR 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before June 27, 1991. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the public reference room.

1991
UMI

Williston Basin has requested that the Commission substitute the corrected sheets for the sheets filed on May 31, 1991, and accept this filing to become effective July 1, 1991.

Williston Basin has determined that certain mathematical errors were made in the calculations underlying the May 31, 1991 filing. Correction of these errors results in a decrease in the throughput surcharge as compared to the May 31, 1991 filing.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.214 and 385.211. All such protests should be filed on or before June 27, 1991. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Alcohol, Drug Abuse, and Mental Health Administration

Suspension of a Laboratory Which No Longer Meets Minimum Standards to Engage in Urine Drug Testing for Federal Agencies

AGENCY: National Institute on Drug Abuse, HHS.

ACTION: Notice.

SUMMARY: The Department of Health and Human Services routinely publishes in the **Federal Register** a list of laboratories currently certified to meet standards of subpart C of Mandatory Guidelines for Federal Workplace Drug Testing Programs (53 FR 11986) dated April 11, 1988. This notice informs the public that, effective June 21, 1991, the following laboratory's certification is suspended: Environmental Health Research & Testing, Inc., 1075 South 13th Street, Birmingham, AL 35205-6998, 205-934-0985.

FOR FURTHER INFORMATION CONTACT: Drug Testing Section, Division of Applied Research, National Institute on Drug Abuse, room 9-A-53, Telephone: 301-443-6014, 5600 Fishers Lane, Rockville, Maryland 20857.

Charles R. Schuster,

Director, National Institute on Drug Abuse.

BILLING CODE 4160-20-M

Health Care Financing Administration

[OCC-021-N]

Medicare Program; HMO Qualification Determinations and Compliance Actions

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Notice.

SUMMARY: This notice sets forth the names, addresses, dates of qualification, and service areas, or expanded services areas or modified service areas of entities determined to be Federally qualified health maintenance organizations (HMOs) during the period December 1989 through October 1990. Additionally, this notice sets forth compliance actions taken by the Office of Compliance, Office of Prepaid Health Care Operations and Oversight for the period January 1990 through September 1990.

FOR FURTHER INFORMATION CONTACT: For information on qualification determinations: Maxine Palmore, Office of Qualification, Office of Prepaid Health Care Operations and Oversight, Health Care Financing Administration, room 4336 Cohen Building, 330 Independence Avenue, SW., Washington, DC 20201 (202) 619-2174

For information on compliance actions: Tony Mazzarella, Office of Compliance, Office of Prepaid Health Care Operations and Oversight, Health Care Financing Administration, room 4336 Cohen Building, 330 Independence Avenue, SW., Washington, DC 20201 (202) 619-3555.

SUPPLEMENTARY INFORMATION:

A. Office of Qualification Determinations

Regulations at 42 CFR 417.144(e) and 42 CFR 417.163 (c) and (d), promulgated under title XIII of the Public Health Service Act (the Act) (42 U.S.C. 300e), require publication of certain determinations relating to the Federal qualification of health maintenance organizations (HMOs). There are three categories of qualified HMOs: Operational, transitionally qualified, and pre-operational (see 42 CFR 417.161 for definitons of these terms).

The Office of Prepaid Health Care Operations and Oversight, HCFA, has determined that the following entities are operational qualified HMO's under section 1310(d) of the Act (42 U.S.C 300e-9(d)):

1. *Harris Methodist Health Plan (HMHP)* (Direct Contract Model, see section 1310(b)(2)(B) of the Act), 1325 Pennsylvania Avenue, Fort Worth, Texas 76104. HMHP's Federally qualified service area for Fort Worth includes Bosque, Comanche, Denton, Erath, Hamilton, Hill, Hood, Johnson, Limestone, Somervell, Tarrant, and Wise counties, and the following zip codes in Ellis, Montague, Parker, and Western Dallas counties:

Ellis

76084 76065

Montague

76230 76251
76239 76270

Parker

76008 76074 76088
76060 76078 76090
76066 76082

Western Dallas

75006 75137 75220
75019 75141 75224
75038 75146 75225
75039 75172 75229
75050 thru 75052 75201 thru 75203 75230
75060 thru 75063 75208 75232 thru 75237
75080 75209 75240
75104 75211 75241
75115 75212 75244
75116 75216 75247 thru 75249
75134 75219 75261

Date of qualification: April 26, 1990.

2. *Community Health Network of Louisiana, Inc. (CHN)* (Direct Contract Model, see section 1310(b)(2)(B) of the Act), 2431 South Acadian Throughway, Baton Rouge, Louisiana 70808. The Federally qualified service area of CHN in Baton Rouge includes the zip codes in the following counties:

Ascension

70346 70725 70759
70376 70728 70774
70707 70734 70778
70716 70737

Date of qualification: June 27, 1990.

5. *M.D. IPA* (Individual Practice Association Model, see sections 1302(5) and 1310(b)(2)(A) of the Act), 451 Hungerford Drive, Rockville, Maryland 20850. M.D. IPA's previously Federally qualified service area has been expanded into the following Maryland and Virginia counties and cities:

Maryland	*Virginia*
Calvert	Accomack
Caroline	Loudoun
Cecil	Northhampton
Charles	Prince William
Dorchester	Stafford
Harford	City of Fredericksburg
Kent	
Queen Annes	
Somerset	
Talbot	
Washington	
Wicomico	
Worcester	
City of Baltimore	

Date of qualification for the service area expansion: July 10, 1990.

6. *Physicians Association of Clackamas County (PACC)* (Individual Practice Association Model, see sections 1302(5) and 1310(b)(2)(A) of the Act), 12901 SE. 97th Avenue, Clackamas, Oregon 97015. PACC's previously Federally qualified service area has been expanded into the following counties: Benton, Clatsop, Columbia, Hood River, Lane, Lincoln, Linn, Marion, Polk, Tillamook, and Wasco.

Date of qualification for the service area expansion: July 24, 1990.

7. *Travelers Health Network of Austin, Inc. (THNA)* (Direct Contract Model, see section 1310(b)(2)(B) of the Act), 9442 Capital of Texas Highway, Austin, Texas 78759. THNA's previously Federally qualified service area has been expanded into the following counties: Bastrop, Bell, Blanco, Burnett, Caldwell, Comal, Guadalupe, Lee, and Milam.

Date of qualification for the service area expansion: October 26, 1990.

8. *FHP, Inc. (FHP)* (Individual Practice Association Model, see sections 1302(5) and 1310(b)(2)(A) of the Act), 9900 Talbert Avenue, Fountain Valley, California 92708. FHP's previously Federally qualified service area in San Diego has been expanded into the following zip codes:

Inland North

92883 92086
92025 thru 92028 92120 thru 92129
92059 thru 92061 92131
92064 thru 92066 92145
92069 92302
92878 92390
92082 thru 92084 92395

Metro West/Metro East

92001 92071
92016 92077
92019 thru 92021 92078
92031 92101 thru 92111
92035 92113
92037 92115 thru 92120
92040 thru 92042 92122 thru 92125
92045 92133
92048 92135
92052 92140

Date of qualification for the service area expansion: October 29, 1990.

9. *Fallon Community Health Plan, Inc. (FCHP)* (Group Model, see section 1301(b)(1) of the Act), 100 Hartwell Street, Boylston, Massachusetts 01583-2250. FCHP's previous Federally service areas has been expanded into the zip codes of the following counties:

Hampden

01010 01057 01081
01081 01089

Hampshire

01062

Norfolk

02019 02053 thru 02054 02070
02038 02056 02283

Date of qualification for the service area expansion: October 31, 1990.

10. *Group Health, Inc., (GHI)* (Group Model, see section 1310(b)(1) of the Act), 2829 University Avenue, SE, Minneapolis, Minnesota 55414. At the request of the HMO, we eliminated regional component designations for Minneapolis and St. Cloud. The service areas of Group Health, Inc. now includes the entire geographic areas previously approved for both the Minneapolis and St. Cloud regions.

Effective date for the elimination of regional component designations: October 12, 1990.

B. Compliance Actions

Title XIII of the Public Health Service Act (the Act) (42 U.S.C. 300e), section 1312(b)(1) and implementing regulations

VOL
56
ISS
123
JE
26
1991
UMI

at 42 CFR 417.163(c)(1) and 417.163(d)(1) require publication in the **Federal Register** of noncompliance determinations and revocations of qualification of HMOs. The Office of Compliance, Office of Prepaid Health Care Operations and Oversight gives notice of the following actions taken involving Federally qualified HMOs:

1. Letter of non-compliance:

Compercare Health Care Services Inc. (CHCS), Aurora, Co. On August 16, 1990, we issued a letter of non-compliance to CHCS. We initiated non-compliance because of CHCS' continued lack of adequate arrangements to protect its members in the event of insolvency. The Office of Compliance approved the corrective action plan on September 14, 1990. CHCS has initiated this plan, which when completed, should lead to restoration of compliance

2. Notices of revocation:

Organization	Date issued	Reason
Best Care, Inc., Portland, OR.	02/19/90	Voluntary relinquishment.
Health Plus, Seattle, WA.	03/22/90	Voluntary relinquishment.
Samaritan Health Plan, Milwaukee, WI.	07/03/90	Voluntary relinquishment Kenosha and Racine counties (regional component).
Omnicare/the hmo, Vineland, NJ.	09/17/90	HMO liquidated (effective 09/27/90).

These constitute all the reportable actions for the period January 1, 1990 through September 30, 1990.

C. Availability of Additional Information

A cumulative list and additional information about federally qualified HMOs may be obtained by writing to the following address: Office of Prepaid Health Care Operations and Oversight, Health Care Financing Administration, Room 4360 Cohen Building, 330 Independence Avenue, SW., Washington, DC 20201.

The list also may be obtained by visiting that office between the hours of 8:30 a.m. and 4:30 p.m. Monday through Friday, except for Federal holidays. Interested persons should contact John Lowe for an appointment, telephone (202) 619-0845.

Authority: (42 U.S.C. 300e) Title XIII of the Public Health Service Act.

(Catalog of Federal Domestic Assistance Program No. 93.773, Medicare-Hospital Insurance; 93.774, Medicare-Supplementary Medical Insurance)

Dated: April 30, 1991.

BILLING CODE 4120-01-M

Medicare Program; Meetings of the Advisory Committee on Medicare-Physician Relationships

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Notice of meetings.

SUMMARY: In accordance with section 10(a) of the Federal Advisory Committee Act, this notice announces meetings of the Advisory Committee on Medicare-Physician Relationships on July 11 and July 12, 1991.

DATES: The meetings will be open to the public on July 11, 1991 from 9 a.m. until 3 p.m.; on July 12, 1991 from 8 a.m. until 11 a.m.

Portions of the committee meetings will be held in Executive Session (closed to the public) July 11 and July 12 pursuant to section 552b(c)(9)(B) of title 5, U.S. Code, for discussion and preparation of comments the Committee wishes to submit to the Secretary.

ADDRESSES: The meetings will be held in the Main Auditorium, Lobby Level, Hubert H. Humphrey Building, 200 Independence Avenue SW., Washington, DC 20201.

FOR FURTHER INFORMATION CONTACT: Matthew Crow, Executive Director, Advisory Committee on Medicare-Physician Relationships, room 425-Hubert H. Humphrey Building, 200 Independence Avenue SW., Washington, DC 20201, Telephone (202) 245-7874.

SUPPLEMENTARY INFORMATION: In accordance with The Federal Advisory Committee Act, the Secretary of Health and Human Services established the Advisory Committee on Medicare-Physician Relationships. The Committee advises the Secretary on the existing Medicare policies and procedures that directly relate to physicians' provision of services to Medicare's beneficiaries, and on Peer Review Organizaton (PRO) and carrier policies and procedures. The Advisory Committee looks at the methods to improve Medicare carrier services, responsiveness to physicians. This Committee does not consider payment issues.

The Committee consists of the Senior Medical Advisor of the Health Care Financing Administration (HCFA) as chair, and seven members selected by the Secretary who are practicing physicians representing the primary care, internal medicine, and surgical disciplines. Members are invited to serve for the duration of the Committee. The members are: Lanny R. Copeland, M.D., Ulton G. Hodgin, Jr., M.D., Edward A. Rankin, M.D., Barbara Ann P. Rockett, M.D., Mark C. Rogers, M.D., Richard B. Tompkins, M.D., and Susan L. Turney, M.D. The chairperson is Nancy E. Gary, M.D.

The agenda for the July 11 meeting will include discussions of Peer Review Organizations (PRO), requirements for PRO Reviewers, matching Reviewers by specialty and practice setting, paperwork burden, attestation, documentation, length of time for process and the appeals process.

The agenda for the July 12 meeting will include discussion of the following issues: PRO communications and sharing of data, consistency of carrier and PRO directives, Super PRO and HCFA oversight.

Those individuals or organizations who wish to make 10-minute oral presentations on the topics listed above must contact the Executive Director to be scheduled. For the name, address, and telephone number of the Executive Director, see the **"FOR FURTHER INFORMATION CONTACT"** section at the beginning of this notice. A written copy of the oral remarks must be presented to the Executive Director at the time of the presentation. Anyone who is not scheduled to speak may submit written comments to the Executive Director. Written submissions on topics covered at the May 16-17 and June 6-7, 1991 meetings will not be taken by the Executive Director after July 31, 1991.

The Committee is to report to the Secretary through the Administrator, HCFA, not later than December 31, 1991

Authority: Federal Advisory Committee Act (Pub. L. 92-463, (5 U.S.C. app. 2)); 45 CFR 11.

Dated: June 20, 1991.

Nancy E. Gary,

Chairperson, Advisory Committee on Medicare-Physician Relationships.

[FR Doc. 91-15174 Filed 6-25-91; 8:45 am]

BILLING CODE 4120-01-M

Health Resources and Services Administration

"Transition" Program Priority, Special Projects of National Significance; Ryan White Comprehensive AIDS Resources Emergency (C.A.R.E.) Act of 1990

AGENCY: Health Resources and Services Administration, HHS.

ACTION: Notice of availability of funds.

SUMMARY: The Office of the Administrator, Associate Administrator for AIDS, Health Resources and Services Administration (HRSA), announces the availability of up to $1,406,461 from Fiscal Year (FY) 1991 funds for grants to States and Territories under the Ryan White Comprehensive AIDS Resources Emergency (C.A.R.E.) Act of 1990, Public Law 101-381. The purpose of these grants is to enable States and Territories to accomplish a smooth transition from AIDS programs authorized prior to the enactment of, and now replaced by, the C.A.R.E. Act. The grants will be made under the authority of section 2618(a) of the Public Health Service Act, as added by title II of the C.A.R.E. Act, and in accordance with language in the Department's FY 1991 Appropriation Act. These funds are in addition to the funds identified and described in the Notice published in the **Federal Register** on May 31, 1991 (56 FR 24825), entitled "Special Projects of National Significance; Ryan White Comprehensive AIDS Resources Emergency (C.A.R.E.) Act of 1990."

HEALTHY PEOPLE 2000 OBJECTIVES: The Public Health Service (PHS) urges applicants to submit work plans that address a specific objectives of Healthy People 2000. Potential applicants may obtain a copy of Healthy People 2000 (Full Report; Stock No. 017-001-00474-0) or Healthy People 2000 (Summary Report; Stock No. 017-001-00473-1) through the Superintendent of Documents, Government Printing Office, Washington, DC 20402-9325 (Telephone 202-783-3238).

DATES: To receive consideration for funding, grant applications must be received by the Grants Management Officer by July 5, 1991. Applicants shall be considered as meeting the deadline if they are either (1) received on or before the deadline date or (2) postmarked on or before the deadline date, and received in time for orderly processing. A legibly dated receipt from a commercial carrier or U.S. Postal Service will be accepted in lieu of a postmark. Private metered postmarks shall not be accepted as proof of timely mailing. Applications which do not meet the deadline will be considered late applications and will be returned to the applicant.

FOR FURTHER INFORMATION CONTACT: Requests for technical or programmatic information should be directed to Gilda Martoglio, Office of the Associate Administrator for AIDS, Health Resources and Services Administration, 5600 Fishers Lane, room 14A-21, Rockville, MD 20857, (301) 443-9976. Grant applications (Form PHS 5161-1), with revised face sheet HHS Form 424 and Program Narrative approved under OMB No. 0937-0189), accompanying guidance materials, and additional information regarding business management or fiscal issues related to the awarding of grants under this notice may be requested from the Grants Management Officer, Ms. Glenna Wilcom; Bureau of Health Resources Development, Health Resources and Services Administration, 5600 Fishers Lane, Room 13A-38, Rockville, MD 20857, (301) 443-2280.

SUPPLEMENTARY INFORMATION: In the Health Resources and Services Administration provision of the Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriation Act, 1991 (Pub. L. 101-517), Congress appropriated $226,000,000 to carry out title XXVI of the Public Health Service (PHS) Act, which was added by the C.A.R.E. Act. In doing so, Congress added the following proviso:

Provided, That the Secretary shall retain and distribute from the total provided for Title XXVI of the Act such amounts as may be necessary to ensure the continuation of health care services through September 30, 1991, provided by grantees whose project periods extend through that date [.]

104 Stat. 2197.

The legislative history of the quoted language makes clear that its purpose, as articulated by its authors, was to assure that States and Territories which otherwise might suffer a decrease in Federally-derived AIDS health service funds as a result of the enactment of the C.A.R.E. Act and the replacement of several specific AIDS project grant programs by the formula grants to States and Territories authorized under title II of that Act would, to the extent possible, be "held harmless" against such losses. The authors also stated that the funds to accomplish this purpose were to come from funds set aside to carry out the program of Special Projects of National Significance, section 2618(a) of the PHS Act. See 143 Cong. Rec. H10794 (daily ed. Oct. 20, 1990).

The Specific AIDS project grant programs replaced by the title II formula grant are: (1) The HIV/AIDS Services Demonstration Program, (2) the AIDS Drug Reimbursement Program; (3) the Subacute Care Demonstration Program; and (4) the Home and Community-Based Program. HRSA has determined that, through the subsumption of these four programs by Title II formula grants, AIDS services supported under the formula in 20 States and one Territory stand to receive less Federal funds in FY 1991 that they received in FY 1990.

Accordingly, for fiscal year 1991 only, and only in competition for funds up to the amount of the shortfall for each State or Territory, a funding priority will be afforded under section 2618 (a) to agencies that have received formula grants under title II of the C.A.R.E. Act (1) from those States or Territory that would otherwise experience such shortfalls and (2) which propose to use the funds for any of the four purposes described in the preceding paragraph. A total of $1,406,461 has been set aside for this purpose, representing the cumulative shortfalls of the 20 States and one Territory mentioned above, as follows:

Eligible Applicants

Alaska	$15,000
Arizona	55,289
Colorado	395,212
District of Columbia	60,466
Delaware	7,564
Idaho	15,000
Iowa	16,625
Massachusetts	7,826
Maryland	146,882
Maine	9,569
Michigan	303,649
Montana	15,000
North Dakota	15,000
Nebraska	19,453
New Hampshire	17,046
New Jersey	45,613
Vermont	15,000
Washington	216,352
West Virginia	1,156
Wyoming	15,000
Guam	13,523

The amounts listed above have been calculated as one half of the difference between the amount of the awards under the four programs identified above that were received by grantees in each of the listed States or Territory in FY 1990 and the amount of the FY 1991 title II formula grant for that State or Territory. The budget periods for these awards will be from October 1, 1991, through March 31, 1992.

Availability of funds

As noted above, these funds are in addition to the approximately $4.0 million made by the previously published **Federal Register** Notice (56 FR24865; May 31, 1991) for Special Projects of national Significance. To the

VOL 56 ISS 123 JE 26 1991 UMI

extent that the State or Territorial agencies do not apply for these funds, the remaining funds that are the subject of this Notice will be added to that $4 million and will be awarded in accordance with the previous Notice.

Review Criteria

Applications received will be evaluated in accordance with an objective review procedure. The criteria to be used for the review will include the following:

1. Conformance to the SPNS "Transition" priority program guidelines;

2. Clearly defined, attainable, and measurable project goals and objectives that specifically relate to the relevant, previously funded HRSA AIDS grant program(s);

3. A clear, feasible, and appropriate methodology that includes a specific and realistic timeframe for implementing the program; and,

4. A budget justification.

Other Grant Information

Allowable Costs: The basis for determining the allowability and allocability of costs charged to PHS grants is set forth in 45 CFR part 92. This regulation implements OMB circular A-87 which prescribes the cost principles for State and local governments.

Reporting and Other Requirements: A successful applicant under this notice will submit reports in accordance with 45 CFR part 92, subpart C.

Executive Order 12372: This program is not subject to the requirements of Executive Order 12372.

Catalog of Federal Domestic Assistance: The *OMB Catalog of Federal Domestic Assistance* number for the "Transitional" grants for Special Projects of National Significance is 93.928.

Dated: May 28, 1991.

BILLING CODE 4160-15-M

Program Announcement for Cooperative Agreements for Area Health Education Center Programs (Second Cycle)

The Health Resources and Services Administration (HRSA) announces that applications are being accepted for a second cycle for fiscal year 1991 for Cooperative Agreements for the Area Health Education Centers (AHEC) Program under the authority of section 781(a)(1) of the Public Health Service Act, as amended by Public Law 100-607.

Approximately $800,000 will be available in FY 1991 for a second cycle which would include new and supplemental awards. Approximately three new awards averaging $265,000 each will be made.

Section 781(a)(1) authorizes Federal assistance to schools of medicine and osteopathic medicine which have cooperative arrangements with one or more public or nonprofit private area health education centers for the planning, development and operation of area health education center programs. To be eligible to receive support for an Area Health Education Center cooperative agreement, the applicant must be a public or nonprofit private accredited school of medicine or osteopathic medicine or consortium of such schools, or the parent institution on behalf of such school(s). New applications submitted under this authority will be accepted from medicine or osteopathic schools for the purpose of planning, developing and operating new area health education center programs. Applicants may request up to 3 years of support with the expectation that AHECs planned and developed in years 1 and 2 would be operational no later than the 3rd year. The period of Federal support should not exceed 5 years.

The Health Professions Reauthorization Act of 1988 (title VII of Pub. L. 100-607) amended the authority for the Area Health Education Centers program by:

1. Providing for a waiver, under specified circumstances, of the provision now contained in section 781(a)(2)(C) prohibiting an AHEC from being a school of medicine or osteopathic medicine, the parent institution of such a school, or a branch campus or other subunit of a school of medicine or osteopathic medicine or its parent institution, or a consortium of such entities. The waiver of this provision applies to an AHEC having, at the time of initial application for support, an operating program supported by appropriations of a State legislature as well as local resources;

2. Reducing the minimum number of individuals enrolled in first-year positions in a rotating osteopathic internship or a medical residency training program in family medicine, general internal medicine, or general pediatrics from six individuals to four; and

3. Revising the requirement that each AHEC shall "conduct interdisciplinary training and practice involving physicians and other health personnel including, where practicable, physician assistants and nurse practitioners" to add "and nurse midwives."

To receive support, programs must meet the requirements of the regulations as set forth in 42 CFR part 57, subpart MM.

The Bureau of Health Professions, within the Health Resources and Services Administration has substantial programmatic involvement in the planning, development, and administration of the AHEC projects by:

1. Reviewing and approving plans upon which continuation of the cooperative agreement is contingent in order to permit appropriate direction and redirection of activities;

2. Reviewing and approving all contracts and agreements among recipient medical or osteopathic schools, other health professions schools and community-based centers;

3. Participating with project staff in the development of funding projections;

4. Developing, with project staff, individual project data collection systems and procedures; and

5. Participating with project staff in the design of project evaluation protocols and methodologies.

Section 781(a)(2) of the Act requires that not more than 75 percent of total operating funds of a program in any year shall be provided by the Secretary.

National Health Objectives for the Year 2000

The Public Health Service (PHS) is committed to achieving the health promotion and disease prevention objectives of Healthy People 2000, a PHS-led national activity for setting priority areas. The Cooperative Agreements for Area Health Education Centers Program is related to the priority area of Educational and Community-Based Programs. Potential applicants may obtain a copy of Healthy People 2000 (Full Report: Stock No. 017-001-00474-0) or Healthy People 2000 (Summary Report; Stock No. 017-001-00473-1) through the Superintendent of Documents, Government Printing Office, Washington, DC 20402-9325 (Telephone (202) 783-3238).

Education and Service Linkage

As part of its long-range planning, HRSA will be targeting its efforts to strengthening linkages between U.S. Public Health Service supported education and service programs which provide comprehensive primary care services to the underserved.

Review Criteria

The review of applications will take into consideration the following criteria:

1. The degree to which the proposed project adequately provides for the program requirements set forth in 42 CFR 57.3804;

2. The capability of the applicant to carry out the proposed project; and

3. The extent of the need of the area to be served by the AHECs.

In addition, certain preferential actions may apply in the implementation of this grant program. These categories of actions are defined below:

Funding Preferences

Funding of a specific category or group of approved applications ahead of other categories or groups of applications, such as competing continuations ahead of new projects.

Funding Priorities

Favorable adjustment of aggregate review scores when applications meet specified objective criteria.

Special Consideration

Enhancement of priority scores by merit reviewers based on extent to which applicants address special areas of concern.

The following funding preference, funding priorities and special consideration were established in FY 1990 after public comment and are being extended by the Administration in FY 1991.

Funding Preference for Fiscal Year 1991

In making awards for Fiscal Year 1991, a funding preference will be given to competing continuation applications.

Funding Priorities for Fiscal Year 1991

Additionally, funding priorities will be given to the following:

1. Applications proposing centers in which substantial training experience is in a PHA Act, section 332 Health Professional Shortage Area and/or a PHS Act, section 329 Migrant Health Center, PHS Act, section 330 Community Health Center or State designated clinic/center serving an underserved population. Section 332 establishes criteria to designate geographic areas, population groups, medical facilities, and other public facilities in the States as Health Professional Shortage Areas. Section 329 authorizes support for migrant health facilities nationwide and comprises a network of health care services for migrant and seasonal farm workers. Section 30 authorizes support for community health care services to medically underserved populations.

2. Applications proposing to develop, expand or implement curricula concerning ambulatory and inpatient case management of those with HIV infection-related diseases.

3. Applications demonstrating a commitment to geriatrics through development of innovative educational ways to provide improved and more effective care for the elderly.

4. Applications which are innovative in their educational approaches to quality assurance/risk management activities: monitoring and evaluation of health care services and utilization of peer-developed guidelines and standards.

Special Consideration for Fiscal Year 1991

A special consideration will be given to applications proposing centers that will serve Health Professional Shortage Areas with a greater proportion of American Indian/Alaskan Natives, Asian/Pacific Islanders, Blacks, and/or Hispanics than exists in the general population in the United States.

The following priority was established in FY 1991 and published on November 23, 1990 (55 FR 48908) after public comment.

Final Additional Funding Priority for Fiscal Year 1991

A funding priority will be given to applications demonstrating a commitment to reducing infant mortality through the development of innovative educational ways to provide improved and more effective maternal and child health care: for example, the development and implementation of undergraduate, graduate and/or continuing education curricula/courses to enhance the delivery of maternal and child health care to low-income populations; or the provision of clinical training experiences to undergraduate students, graduate students or residents in areas where the infant mortality rate is higher than the State or national average.

Questions regarding programmatic information should be directed to: Ms. Cherry Tsutsumida, Chief, Multidisciplinary Centers and Programs Branch, Division of Medicine, Bureau of Health Professions, Health Resources and Services Administration, 5600 Fishers Lane, room 4C-05, Rockville, Maryland 20857, Telephone: (301) 443-6950.

Requests for application materials and questions regarding grants policy and business management aspects should be directed to: Mrs. Frances Briscoe (U76), Grants Management Specialist, Bureau of Health Professions, Health Resources and Services Administration, 5600 Fishers Lane, room 8C-26, Rockville, Maryland 20857, Telephone: (301) 443-6857.

Completed application materials should be returned to the Grants Management Officer at the above address.

The standard application form PHS 6025-1 HRSA Competing Training Grant Application, General Instructions and supplement for this program have been approved by the Office of Management and Budget under the Paperwork Reduction Act. The OMB clearance number is 0915-0060.

The application deadline date is August 9, 1991. Applications will be considered as meeting the deadline if they are either:

1. *Received on* or before the deadline date, or

2. *Postmarked on* or before the deadline and received in time for submission to the independent review group. A legibly dated receipt from a commercial carrier or the U.S. Postal Service will be accepted in lieu of a postmark. Private metered postmarks shall not be acceptable as proof of timely mailing.

Late applications not accepted for processing will be returned to the applicant.

The Catalog of Federal Domestic Assistance number assigned to this program has been changed from 13.824 to 93.824. Applications submitted in response to this announcement are not subject to the provisions of Executive Order 12372, Intergovernmental Review of Federal Programs (as implemented through 45 CFR part 100).

Dated: June 13, 1991.

Robert G. Harmon,

Administrator.

BILLING CODE 4160-15-M

Program Announcement and Proposed Funding Priorities for Grants for Faculty Development in Family Medicine

The Health Resources and Services Administration (HRSA) announces that applications for fiscal year (FY) 1992 Grants for Faculty Development in Family Medicine are being accepted under the authority of section 786(a), title VII of the Public Health Service (PHS) Act, as amended by the Health Professions Reauthorization Act of 1988, title VI of Public Law 100-607. Comments are invited on the proposed funding priorities. This authority will expire on September 30, 1991. This program announcement is subject to reauthorization of this legislative

VOL
56
ISS
123
JE
26
1991
UMI

authority and to the appropriation of funds.

The Administration's budget request for FY 1992 does not include funding for this program. Applicants are advised that this program announcement is a contingency action being taken to assure that should funds become available for this purpose, they can be awarded in a timely fashion consistent with the needs of the program as well as to provide for even distribution of funds throughout the fiscal year. This notice regarding applications does not reflect any change in this policy.

Section 780(a) of the PHS Act authorizes the award of grants to public or nonprofit private hospitals, schools of medicine or osteopathic medicine, or other public or private nonprofit entities to assist in meeting the cost of planning, developing and operating programs for the training of physicians who plan to teach in family medicine training programs. In addition, section 788(a) authorizes assistance in meeting the cost of supporting physicians who are trainees in such programs and who plan to teach in a family medicine training program.

To receive support, programs must meet the requirements of regulations as set forth in 42 CFR part 57, subpart Q.

The period of Federal support will not exceed 5 years.

National Health Objectives for the Year 2000

The Public Health Service (PHS) urges applicants to submit work plans that address specific objectives of Healthy People 2000. Potential applicants may obtain a copy of Healthy *People* 2000 (Full Report; Stock No. 017–001–00474–0) or Healthy *People* 2000 (Summary Report: Stock No. 017–001–00473–1) through the Superintendent of Documents, Government Printing Office, Washington, DC 20402–9325 (Telephone (202) 783–3238).

Education and Service Linkage

As part of its long-range planning, HRSA will be targeting its efforts to strengthening linkages between U.S. Public Health Service supported education and service programs which provide comprehensive primary care services to the underserved.

Review Criteria

The review of applications will take into consideration the following criteria:

(1) The potential effectiveness of the proposed project in carrying out the training purposes of section 788(a) of the Act;

(2) The degree to which the proposed project provides for the project requirements and guidelines;

(3) The administrative and management ability of the applicant to carry out the proposed project in a cost-effective manner; and

(4) The potential of the project to continue on a self-sustaining basis after the period of grant support.

In addition, the following mechanisms may be applied in determining the funding of approved applications.

(1) Funding priorities—favorable adjustment of aggregate review scores when applications meet specified objective criteria.

(2) Special considerations—enhancement of priority scores by merit reviewers based on the extent to which applicants address special areas of concern.

Proposed Funding Priorities

In determining the order of funding of approved applications, it is proposed that a funding priority be given to:

1. Applicants that currently have or propose to develop projects to provide instruction in teaching clinical pedagogical skills (may also include other critical academic skills) to medical staff of: Community Health Centers supported under PHS Act, section 330; Migrant Health Centers supported under PHS Act, section 329; Homeless Health Centers supported under PHS Act, section 340; facilities that have formal arrangements to provide primary health services to public housing communities; or hospitals and/or health care facilities of the Indian Health Service; and/or health care centers that serve a substantial number of patients from (1) a Health Professional Shortage Area (HPSA), section 332 of the PHS Act, or (2) a Medically Underserved Area (MUA) designated under provisions of PHS Act, section 330(b)(3).

Section 330 authorizes support for community health care services to medically underserved populations.

Section 329 authorizes support for migrant health facilities nationwide and comprises a network of health care services for migrant and seasonal farm workers.

Section 340 authorizes Health Care for the Homeless Program, as used here, means a community-based program of comprehensive primary health care and substance abuse services brought to the homeless population.

Public Housing Communities means the residents of low income public projects that receive Federal assistance, usually through a local public housing agency, under the provisions of the U.S. Housing Act of 1937.

Section 332 establishes criteria to designate geographic areas, population groups, medical facilities, and other public facilities in the States as Health Professional Shortage Areas.

Section 332(b)(3) establishes Medically Underserved Areas which are areas designated by the PHS, based on four criteria:

(1) Infant mortality rate;

(2) Percentage of the population below the poverty level;

(3) Percentage of the population over age 65; and

(4) Number of practicing primary care physicians per 1,000 population.

This priority is consistent with a HRSA strategy to enhance the teaching capabilities in the above areas and to provide training experiences with underserved populations.

2. Applications from existing faculty development programs which:

a. Can demonstrate an enrollment of underrepresented minorities (i.e., Black, Hispanic, and American Indian/Alaskan Native) in the academic year 1991–92 which exceeds 12 percent, or

b. Can document an increase in the number of underrepresented minorities from the academic year 1990–91 to 1991–92, or

c. Can demonstrate that the average over the current year (1991–92) plus the 2 preceding years exceeds 12 percent.

Applicants that propose new faculty development programs can meet this funding priority by providing evidence that the first cohort of trainees will include underrepresented minorities in excess of 12 percent. This funding priority is a refinement of a similar priority applied in FY 1991. It is intended to encourage enrollment of minorities typically underrepresented in medicine by increasing the number of minority faculty role models.

Special Consideration

Special consideration will be given to applications demonstrating a commitment to family medicine.

Interested persons are invited to comment on the proposed funding priorities. Normally, the comment period would be 60 days. However, due to the need to implement any changes for the FY 1992 award cycle, the comment period has been reduced to 30 days. All comments received on or before July 26, 1991 will be considered before the final funding priorities are established. No funds will be allocated or final selections made until a final notice is published indicating whether the proposed funding priorities will be applied.

Written comments should be addressed to: Director, Division of Medicine, Bureau of Health Professions, Health Resources and Services Administration, Parklawn Building, room 4C–25, 5600 Fishers Lane, Rockville, Maryland 20857.

All comments received will be available for public inspection and copying at the Division of Medicine, Bureau of Health Professions, at the above address, weekdays (Federal holidays excepted) between the hours of 8:30 a.m. and 5 p.m.

Public Law 100–607, section 633(a), requires that for grants issued under sections 780, 784, 785 and 786 for FY 1990 or subsequent fiscal years, the Secretary of Health and Human Services shall, not less than twice each fiscal year, issue solicitations for applications for such grants if amounts appropriated for such grants, and remaining unobligated at the end of the first solicitation period, are sufficient with respect to issuing a second solicitation. Should a second cycle be necessary, the application deadline date will be approximately 6 months from the first deadline.

The deadline date for receipt of applications for FY 1992 is August 6, 1991. Applications shall be considered as meeting the deadline if they are either:

(1) *Received on* or before the deadline date, or

(2) *Postmarked on* or before the deadline date and received in time for submission to the independent review group. A legibly dated receipt from a commercial carrier or the U.S. Postal Service will be accepted in lieu of a postmark. Private metered postmarks shall not be acceptable as proof of timely mailing.

Late applications not accepted for processing will be returned to the applicant.

Requests for application materials and questions regarding business management issues and grants policy should be directed to: Mrs. Judy Bowen, Grants Management Specialist, Residency and Advanced Grants Section, Bureau of Health Professions, Health Resources and Services Administration, 5600 Fishers Lane, room 8C–20, Rockville, Maryland 20857, Telephone: (301) 443–6880.

Completed applications should be returned to the Grants Management Officer at the above address.

The standard application form PHS 6025–1, HRSA Competing Training Grant Application, General Instructions and Supplement for this program have been approved by the Office of Management and Budget under the Paperwork Reduction Act. The OMB clearance number is 0915–0060.

Should additional programmatic information be required please contact: Primary Care Medical Education Branch, Division of Medicine, Bureau of Health Professions, Health Resources and Services Administration, 5600 Fishers Lane, room 4C–04, Rockville, Maryland 20857, Telephone: (301) 443–3614.

This program is listed at 93.895 in the Catalog of Federal Domestic Assistance. It is not subject to the provisions of Executive Order 12372, Intergovernmental Review of Federal Programs (as implemented through 45 CFR part 100).

Dated: May 8, 1991.

Robert G. Harmon,

Administrator.

BILLING CODE 4160–15–M

Availability of Funds for Grants for Health Services for Residents of Public Housing

AGENCY: Health Resources and Services Administration, DHHS.

ACTION: Notice of available funds.

SUMMARY: The Health Resources and Services Administration (HRSA) announces the availability of approximately $3.4 million in fiscal year (FY) 1991 for grants to be awarded under section 340A of the Public Health Service (PHS) Act, as amended, 42 U.S.C. 256a. The purpose of the grants will be to provide primary health care services as defined in section 330(b)(1) of the PHS Act, including health screening, and health counseling and education services to residents of public housing. Emphasis will be placed on the provision of perinatal and infant health services in areas of high infant mortality need which are innovative and creative in bringing women at high risk for poor birth outcomes into the health services delivery system. Approximately 3 to 6 grants will be made, ranging from $500,000 to $1 million. All awards are for one year, with projects periods of up to three years. The PHS is committed to achieving the health promotion and disease prevention objectives of Healthy People 2000, a PHS-led national activity for setting priority areas. This program announcement is related to the priority area of improving access to health services in underserved areas. Potential applicants may obtain a copy of Healthy People 2000 (Full Report; Stock No. 017–001–00474–0) or Healthy People 2000 (Summary Report; Stock No. 017–001–00473–1) through the Superintendent of Documents, Government Printing Office, Washington, DC, 20402–9325 (Telephone 202–783–3238).

ADDRESSES: The PHS Regional Grants Management Officers (RGMOs), whose names and addresses are provided in the appendix to this document, are responsible for distributing application kits and guidance (Form PHS 5161–1 with revised face sheets DHHS Form 424, as approved by the OMB under control number 0937–0189), and completed applications must be submitted to them. Application kits contain guidance information which outlines program requirements indicated in the authorizing legislation. Potential applicants should contact the appropriate RGMO. The RGMO can also provide assistance on business management issues. For further program information and technical assistance contact Joan Holloway, Director, Division of Special Populations Program Development, Bureau of Health Care Delivery and Assistance, telephone (301) 443–8134.

DUE DATE: To receive consideration, grant applications must be received by the appropriate Grants Management Officer by July 26, 1991. Applications shall be considered as meeting the deadline if they are either (1) received on or before the deadline date; or (2) postmarked on or before the deadline date and received in time for submission to the review committee. A legibly dated receipt from a commercial carrier or U.S. Postal Service will be accepted as proof of timely mailing. Applications received after the announced closing date will not be considered for funding and will be returned to the applicant.

ELIGIBLE APPLICANTS: To be eligible, an applicant must be a public or non-profit private entity and have the capacity to effectively administer a grant.

SUPPLEMENTARY INFORMATION: Section 340A of the PHS Act authorizes the Secretary to award grants to enable grantees, directly or through contracts, to provide for the delivery of primary health care services, including health screening, and health counseling and education services to residents of public housing. This effort is one of several initiatives designed to improve the health status of disadvantaged minorities, especially at risk pregnant women and infants, as intended in Public Law 101–527, the Disadvantaged Minority Health Improvement Act of 1990.

In an area where a certified resident management corporation is in existence with a public entity providing primary health care services or an entity

VOL
56
ISS
123
JE
26
1991
UMI

receiving funds under section 330 or 340 of the PHS Act, the organizations are encouraged to submit only one application demonstrating collaboration between the organizations.

Grantees or providers acting under an agreement with the grantee must be a participating and qualified provider under the Medicaid plan approved under title XIX of the Social Security Act, and must maximize payment for services available from private insurance, Medicare, other Federal programs, and other third party sources. Grantees entering into contracts for services shall be entitled to a waiver of this requirement, if the organization with which they contract does not impose a charge or accept payment available from any third-party payor, including payment under any insurance policy or under any Federal or State health benefits program (including Medicaid).

The Secretary may not make a grant to an applicant unless the applicant signs an agreement indicating that, whether the services are provided directly or through contract, services under the grant will be provided without regard to ability to pay for the services, and if a charge is imposed it will be, (1) made according to a schedule of charges that is made available to the public, (2) will not be imposed on any resident of public housing with an income less than the official poverty level, and (3) will be adjusted to reflect the income and resources of the resident of the public housing involved.

For applicants which are public entities, e.g. State or local health departments, the Secretary may not award a grant unless the public entity signs an agreement that, with respect to the costs to be incurred by such entity in carrying out the purpose of the grant (providing primary health care services, including health screening, and health counseling and education services to residents of public housing), the entity will make available non-Federal contributions in cash toward such costs in the amount equal to not less than $1.00 for each $1.00 of Federal funds provided in the grant. In-kind contributions, such as space or personnel, will not constitute acceptable contributions and funds provided either directly or indirectly by the Federal Government may not be included in determining the amount of the non-Federal contributions.

Project Requirements

The following services are required by section 340A and must be provided either directly or through contract:

a. Primary health care services, including health screening, and health counseling and education services for all residents of public housing along with specialty medical services for pregnant residents and their infants, on the premises of public housing projects or at other locations immediately accessible to residents of public housing;

b. Referral of residents, as appropriate, to qualified facilities and practitioners for necessary follow-up services;

c. Outreach services to inform residents of the availability of such services, especially at risk women of child-bearing age;

d. Aid to residents in establishing eligibility for entitlement programs (i.e., WIC, AFDC) and in obtaining services under Federal, State and local programs providing related health services, mental health services or social services.

In addition, applicants may also provide the following optional services:

a. Training to residents of public housing to provide health screenings and to provide educational services, and

b. Health services to individuals who are not residents of public housing if those services will be provided to such individuals under the same terms and conditions as such services are provided to residents.

Use of Funds

The following restrictions apply to the use of grant funds awarded for the purpose of providing health services for residents of public housing:

a. The applicant may not expend more than ten percent of the federal grants funds for the purpose of administering the grant;

b. Grant funds may not be used to pay for inpatient services;

c. Grant funds may not be used to make cash payments to intended recipients of primary health services, or health counseling and education services;

d. Grant funds may not be used to purchase or improve real property (other than minor remodeling of existing improvements to real property) or to purchase major medical equipment or motor vehicles.

However, upon request by the applicant demonstrating that the purposes of the project cannot otherwise be carried out, the Secretary may waive the restriction in paragraph (d).

Criteria for Evaluating Applications

An objective review of applications for grant support will consider the extent to which an applicant submits documentation of compliance with the statutory requirements:

1. Consultation with residents of the designated public housing development in preparation for submission of the application and the development of an on-going process for consultation with the residents regarding the planning and administration of the proposed program;

2. Appropriate leadership and management structures to ensure delivery of health services efficiently and effectively;

3. Procedures for fiscal control and fund accounting as may be necessary to ensure proper disbursement and accounting with respect to the grant;

4. An ongoing program of quality assurance with respect to the services provided under the grant;

5. Procedures to ensure the confidentiality of records maintained on residents of public housing that are receiving such services;

6. With respect to providing services to any population of such residents a substantial portion of which has a limited ability to speak the English language, a plan to provide services through individuals who can communicate with the population; and has designated at least one person, fluent in both English and the appropriate language, to carry out the plan, and

7. A process whereby an annual report will be submitted to the Secretary describing the use and costs of services under the grant.

Each application will also be evaluated on the extent to which it addresses or provides the following:

1. A description of the health status and demographic characteristics of the target population and documentation of the need for primary care and perinatal services in public housing facilities, especially for pregnant residents and their infants, in terms of barriers to access (e.g. lack of availability of health care services, limited accessibility, location of providers, inability to pay for services).

2. The appropriateness of proposed services to meet the needs of the community, espcially the unmet need for perinatal and infant services; the degree of increased access to perinatal and infant health services, and the strength of the health services delivery system.

3. Current or proposed clinical staffing pattern which is expected to include an adequate number of full-time, qualified providers so that services are accessible, comprehensive, continuous and coordinated.

4. The level of community commitment to reducing infant mortality, as well as the amount of local/state government and private sector involvement.

5. The ability to effectively administer the grant, as evidenced by appropriateness of governing board (applicable to section 330 applicants), and a budget and budget justification including estimates of expenditures for revenues from the services proposed in the description of purpose; estimates of the average cost of providing services to each recipient and a plan to identify, monitor and control costs (accounting structure) related to the provision of primary care and health education to residents of public housing.

6. Project activities, such as the actual service delivery system, including health screenings, diagnostics, treatment (provided on-site or through contract), entitlement eligibility assistance, and the optional activities of training public housing residents or providing the required health services to nonresidents, as well as proposed linkages with other community-based programs (e.g. social service, education and State sponsored programs) and outreach initiatives to be supported under the grant must be clearly defined. This includes special activities designed to provide outreach to at risk pregnant women and address the prenatal, delivery and postpartum needs of residents and their infants.

7. The degree of coordination and integration with existing public and private health care providers and related social service agencies.

In evaluating applications, preference will be given to: (1) Entities receiving funds under either section 330 (Community Health Centers) that provide comprehensive perinatal services, or section 340 (Health Care for the Homeless Programs) of the PHS Act, (2) qualified applicants that are certified resident management corporations as defined under section 20 of the U.S. Housing Act of 1937, (3) applicants identified above which demonstrate the provision of a comprehensive package of outreach and case-managed prenatal, delivery, post-partum and infant care services, and (4) serve populations which experience high rates of infant mortality and a significant number of infant deaths.

Other Award Information

The program is subject to the provisions of Executive Order 12372 concerning Intergovernmental Review of Federal Programs and 45 CFR part 100. Executive Order 12372 allows States the option of setting up a system for reviewing applications from within their States for assistance under certain Federal programs. The application kit will contain a listing of States which have chosen to set up a review system and will identify a point of contact (SPOC) in each State for the review. Applicants (other than Federally-recognized Indian tribal governments) should contact their SPOCs as early as possible to alert them to the prospective applications and receive any necessary instructions on the State process. For proposed projects serving more than one State, the applicant is advised to contact the SPOC of each affected State. The due date for State process recommendations is 60 days after the application deadline for new and competing awards. The granting agency does not guarantee to "accommodate or explain" for State process recommendations it receives after that date. At the latest, an applicant should provide the application to the State for review at the same time it is submitted to the Regional Grants Management Officer.

Grants will be administered in accordance with Department of Health and Human Services Regulations in 45 CFR part 92 for State and local governments or 45 CFR part 74 for other grantees and are subject to the provisions of the Public Health Services Grants Policy Statement.

The OMB Catalog of Federal Domestic Assistance number for this program is 93.927.

Dated: April 20, 1991.

Robert G. Harmon,

Administrator.

Program Announcement and Proposed Funding Priority for Grants for Preventive Medicine Residency Training Programs

The Health Resources and Services Administration (HRSA) announces that applications for fiscal year (FY) 1992 Grants for Preventive Medicine Residency Training Programs are being accepted under the authority of section 788(c), title VII of the Public Health Service (PHS) Act, as amended by the Health Professions Reauthorization Act of 1988, title VI of Public Law 100-607. Comments are invited on the proposed funding priority described below. This authority will expire on September 30, 1991. This program announcement is subject to reauthorization of this legislative authority and to the appropriation of funds.

The Administration's budget request for FY 1992 does not include funding for this program. Applicants are advised that this program announcement is a contingency action being taken to assure that should funds become available for this purpose, they can be awarded in a timely fashion consistent with the needs of the program as well as to provide for even distribution of funds throughout the fiscal year. This notice regarding applications does not reflect any change in this policy.

Section 788(c) authorizes the award of grants to accredited schools of medicine,

VOL
56
ISS
123

1991
UMI

osteopathic medicine and public health to meet the costs of projects to:

(1) Plan and develop new residency training programs and to maintain or improve existing residency training programs in preventive medicine; and

(2) Provide financial assistance to residency trainees enrolled in such programs.

To receive support, applicants must meet the requirements of 42 CFR part 57, subpart EE.

The period of Federal support should not exceed 3 years.

National Health Objectives for the Year 2000

The Public Health Service (PHS) is committed to achieving the health promotion and disease prevention objectives of Healthy People 2000, a PHS led national activity for setting priority areas. The Preventive Medicine Residency Training Program is related to the priority area of Clinical Preventive Services. Potential applicants may obtain a copy of Healthy People 2000 (Full Report; Stock No. 017–001–00474–0) or Healthy People 2000 (Summary Report; Stock No. 017–001–00473–1) through the Superintendent of Documents, Government Printing Office, Washington, DC 20402–9325 (Telephone (202) 783–3238).

Education and Service Linkage

As part of its long-range planning, HRSA will be targeting its efforts to strengthening linkages between U.S. Public Health Service supported education and service programs which provide comprehensive primary care services to the underserved.

Review Criteria

The review of applications will take into consideration the following criteria:

1. The potential effectiveness of the proposed project in carrying out the training purposes of section 788(c) of the PHS Act;

2. The extent of responsiveness to the project requirements;

3. The administrative and management capability of the applicant to carry out the proposed project in a cost-effective manner;

4. The degree to which the proposed training program emphasizes health promotion and disease prevention;

5. The degree to which the applicant demonstrates institutional commitment to the proposed program; and

6. The history of the program including number of residents who successfully completed the program.

In addition, the following mechanism may be applied in determining the funding of approved applications.

Funding priorities—favorable adjustment of aggregate review scores when applications meet specified objective criteria.

Established Funding Priorities

In order to emphasize the initiative of health promotion/disease prevention and to encourage improvement of the quality of residency training experiences, the following funding priorities are established. In the funding of approved applications, a funding priority will be given to projects which will:

1. Conduct residency training in areas of general preventive medicine or public health.

2. Enroll at least four residents in the academic year and at least four residents in the field year with evidence provided that the projected number can be realized from a current or projected applicant pool.

These funding priorities were established in FY 1989, after public comment and are being extended in FY 1992.

Proposed Funding Priority

In addition, for FY 1992, it is proposed that funding priority be given to:

Applicants that propose to provide educational experiences to demonstrate to residents the provision of primary care/preventive services for underserved populations. These experiences must include substantial training in a local health department, PHS Act section 329 Migrant Health Center, PHS Act section 330 Community Health Center and/or State-designated clinic/center serving an underserved population. Section 329 authorizes support for migrant health facilities nationwide and comprises a network of health care services for migrant and seasonal farm workers. Section 330 authorizes support for community health care services to medically underserved popualtions.

This priority is consistent with a HRSA strategy to train physicians to serve community needs, including underserved areas or populations.

Interested persons are invited to comment on the proposed funding priority. Normally, the comment period would be 60 days. However, due to the need to implement any changes for the FY 1992 award cycle, the comment period has been reduced to 30 days. All comments received on or before July 26, 1991 will be considered before the final funding priority is established. No funds will be allocated or final selections made until a final notice is published stating whether the funding priority will be applied.

Written comments should be addressed to: Director, Division of Medicine, Bureau of Health Professions, Health Resources and Services Administration, Parklawn Building, room 4C–25, 5600 Fishers Lane, Rockville, Maryland 20857.

All comments received will be available for public inspection and copying at the Division of Medicine, Bureau of Health Professions, at the above address, weekdays, (Federal holidays excepted) between the hours of 8:30 a.m. and 5 p.m.

The application deadline date for FY 1992 is July 30, 1991. Applications shall be considered as meeting the deadline if they are either:

1. Received on or before the deadline date, or

2. Postmarked on or before the deadline and received in time for submission to an independent review group. A legibly dated rceipt from a commercial carrier or the U.S. Postal Service will be accepted in lieu of a postmark. Private metered postmarks shall not be acceptable as proof of timely mailing.

Late applications not accepted for processing will be returned to the applicant.

Requests for application materials and questions regarding grants policy and business management aspects should be directed to: Grants Management Officer (D33), Bureau of Health Professions, Health Resources and Services Administration, Parklawn Building, room 8C–26, 5600 Fishers Lane, Rockville, Maryland 20857, telephone: (301) 443–6002.

Completed applications should be submitted to the Grants Management Officer at the above address.

The standard application form PHS 6025–1, HRSA Competing Training Grant Applications, General Instruction and Supplement for this program have been approved by the Office of Management and Budget under the Paperwork Reduction Act. The OMB clearance number 0915–0060.

If additional programmatic information is needed, please contact: Primary Care Medical Education Branch, Division of Medicine, Bureau of Health Professions, Health Resources and Services Administration, Parklawn Building, room 4C–04, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone: (301) 443–6820.

This program is listed at 93.117 in the *Catalog of Federal Domestic Assistance.* It is not subject to the provisions of Executive Order 12372, Intergovernmental Review of Federal Program (as implemented through 45 CFR part 100).

Dated: May 16, 1991.

Robert G. Harmon,

Administrator.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[CA–068–7123–54–6479]

Closure for Public Lands Surrounding the El Mirage Cooperative Management Area, San Bernardino Co., CA

AGENCY: Bureau of Land Management, Interior.

ACTION: Closure notice for public land contained within 49 sections of land in the Barstow Resource Area of San Bernardino County.

SUMMARY: This closure notice, which became effective June 25, 1990, is hereby extended for a period of one year. The reasons for extending this closure for an additional year are outlined in paragraph two of this notice and are consistent with the original reasons for initiating this closure. This closure notice affects public land contained within all part of 49 sections of land surrounding the El Mirage Cooperative Management Area, San Bernardino County, California under the administrative responsibility of the Barstow Resource Area, California Desert District. The following is a description of the public lands affected by this closure order:

T.6N., R.5W., Section 6; T.7N., R.5W., Sections 6, 8, 19, 20, 30 and 31; T.8N., R.5W., Sections 30, 31 and 32; T.7N., R.6W., Sections 6, 7, 8 and those parts of Sections 18 and 20 that are north of the ridgeline in the Shadow Mountains; T.8N., R.6W., Sections 27, 28, 30, 31, 32, 34 and 35; T.6N., R.7W., Sections 6, 8, 13, 18, 19 and 20; T.7N., R.7W., Sections 2, 4, 15, 18, 19, 20, 29 and 31; T.8N., R.7W., Sections 26, 27, 28, 32, 34 and 35; T.6N., R.8W., Section 1; T.7N., R.8W., Sections 11, 12, 14, 24 and 25, San Bernardino Meridian.

The public land contained within the previously described 49 sections of land are closed to all motor vehicles under the authority of 43 CFR 8364.1 in order to protect soil, vegetation, wildlife, wildlife habitat and adjacent private land, property and landowners. This closure does not apply to the operation of vehicles, licensed pursuant to California Vehicle Code section 4000(a), upon "open routes" that are marked with a sign on the ground that reads "open route". A flyer showing the open routes is available upon request.

This closure order shall remain in effect for one year. This action is being taken as an interim measure until the aforementioned problems are resolved and/or the routes of travel on the public land within the 49 sections of land are designated through the Desert District's route designation process.

The closed area is posted with "closed area" signs and the open access routes are posted with "open route" and "street licensed vehicles only" signs.

Specifically authorized persons will be allowed access into the closed area only with written authorization.

Any person who fails to comply with this closure order may be subject to a fine of up to $1000.00 or imprisonment of up to 12 months, or both, under 43 CFR 8360.0–7.

EFFECTIVE DATE: June 26, 1991.

FOR FURTHER INFORMATION CONTACT: Mark H. Davis, El Mirage Project Manager or Steve Martin, BLM Ranger, 150 Coolwater Lane, Barstow, California 92311 or phone (619) 256–2729.

Dated: June 18, 1991.

Karla K.H. Swanson,

Area Manager.

[ES–030–1–4212–18; MIES–041320, MIES–041324, and MIES–041328]

Sale of Public Lands in Michigan

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of intent.

SUMMARY: Pursuant to the Michigan Public Lands Improvement Act of 1988 (102 Stat. 2711, Pub. L. 100–537) (The Act), Bureau of Land Management does hereby give notice of its intent to offer the following described lands for sale to the following persons, to wit:

MIES–041320

To Howard Lambrix, as Trustee acting on behalf of 35 applicants;

T. 6S., R. 10E., Sec. 8, Lot 1; Sec. 9, Lot 9; Michigan Meridian, Monroe County, Michigan, and containing 71.08 acres more or less;

MIES–041324

To Timothy H. Lentner, as Trustee acting on behalf of 38 applicants;

T. 5S., R. 8E., Sec. 32 Lot 5, Michigan Meridian, Monroe County, Michigan, and containing 62.818 acres more or less; and

MIES–041328

To Jerry Alderman, as Trustee acting on behalf of 6 applicants;

T. 7S., R. 6E., Sec. 14, Lot 1, Michigan Meridian, Monroe County, Michigan, and containing 0.43 acres more or less.

The public land will not be offered for sale until at least 30 days after the date of publication of this notice in the **Federal Register.**

DATES: On or before July 26, 1991, persons claiming the land adversely may file their objections to the District Manager, Bureau of Land Management, P.O. Box 631, Milwaukee, Wisconsin 53201–0631. Comments are also invited from any other person having information that should be considered by the United States before making this proposed sale.

FOR FURTHER INFORMATION CONTACT: Duane Marti, Realty Specialist, Bureau of Land Management, P.O. Box 631, Milwaukee, Wisconsin 53201–0631; telephone number (414) 297–4429 or (FTS) 362–4429.

SUPPLEMENTARY INFORMATION: The following public land has been found suitable for direct sale under section 3 of The Act, at fair market value, less equities presented by an applicant for such conveyance and less the value of any improvements that the applicant or the applicant's predecessors in interest have placed on the land. Such equities may include (but are not limited to):

(1) The amount paid for the land by the applicant;

(2) Longevity of applicant's claim;

(3) Taxes paid on the land; and

(4) Other equities as the Secretary of the Interior may determine relevant.

The Act was passed by Congress because it recognized that there were long standing title claims against public land in Michigan that could not be resolved by existing Federal authorities. Therefore, Congress authorized the Secretary of the Interior to resolve these title claims and to recognize the equities of the claimants in such lands.

Gary D. Bauer,

District Manager.

BILLING CODE 4310–GJ–M

[UT–942–01–5700–11; UTU–65023]

Exchange of Public Lands in Carbon Co., UT

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of realty action.

SUMMARY: Notice is given that the following described parcel of public land has been examined, and through the development of local land-use

VOL 56 ISS 123 JE 26 1991 UMI

planning decisions based upon public input, resource considerations, regulations, and Bureau policies, has been found to be suitable for disposal by exchange under section 206 of the Federal Land Policy and Management Act of 1976 (90 Stat. 2756; 43 U.S.C. 1716):

Salt Lake Meridian, Utah

T. 23 S., R. 13 E.,
Section 26, S2SW4NE4, E2NE4SW4, SE4W4, W2SE4.

Encompassing 220.00 acres, more or less.

In exchange for these lands, the United States would acquire private lands from Sunoco Energy Development Company described as follows:

Salt Lake Meridian, Utah

T. 14 S., R. 11 E.,
Section 13, S2SW4, NE4SW4,
Section 24, NE4NW4.

Encompassing 160.00 acres, more or less.

The exchange involves surface estate interests only. The purpose of this exchange is to acquire critical riparian habitat. The public interest would be well served by making the exchange. The value of the lands to be exchanged are approximately equal and the acreage will be adjusted or money will be used to equalize values upon completion of the final appraisal of the lands.

The public lands will be conveyed to the following terms and conditions:

1. All minerals, including oil and gas, shall be reserved to the United States, together with the right to prospect for, mine, and remove the minerals.

2. A right-of-way will be reserved for ditches and canals constructed under authority of the United States (Act of August 30, 1890, 26 Stat. 391; 43 U.S.C. 945).

The patent would be subject to the following rights of record:

3. The conveyance of the lands will be subject to all valid existing rights, reservations, and privileges of record which include, but are not limited to the following:

a. Road right-of-way UTU-62044 to Carbon County;

b. Federal oil and gas lease UTU-66733.

The private lands will be acquired subject to the following terms and conditions:

1. A reservation of all minerals;

2. Subject to all valid existing rights. Publication of this notice in the Federal Register segregates the public lands described above from the operation of the public land laws, and the mining laws, excepting the excepting the mineral leasing laws. The segregative effect will end upon issuance of patent or two years from the date of publication, whichever occurs first.

COMMENTS: For a period of Forty-five (45) days from the date of publication of this notice in the Federal Register, interested parties may submit comments to the Moab District Manager, Bureau of Land Management, P.O. Box 970, Moab, Utah 84532. Objections will be reviewed by the Utah State Director, who may sustain, vacate, or modify this realty action. In the absence of any objections, this realty action will become the final determination of the Department of the Interior.

SUPPLEMENTARY INFORMATION: Additional information concerning this action may be obtained from Mark Mackiewicz, Area Realty Specialist, Price River Resource Area, 900 North 700 East, Price, Utah 84501 (801) 637-4584, or from Brad Groesbeck, District Realty Specialist, Moab District Office, 82 East Dogwood, P.O. Box 970, Moab, Utah 84532 (801) 259-6111.

Dated: June 17, 1991.

Kenneth V. Rhea,

Acting District Manager.

BILLING CODE 4310-DQ-M

Fish and Wildlife Service

Availability of a Draft Recovery Plan for the Arkansas Fatmucket (Lampsilis powelli), for Review and Comment

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability and public comment period.

SUMMARY: The U.S. Fish and Wildlife Service (Service) announces the availability for public review of a draft recovery plan for the Arkansas fatmucket mussel (*Lampsilis powelli*). This species occurs in the Ouachita, South Fork Ouachita, Caddo and Saline Rivers and headwater tributaries of the latter. The Service solicits review and comment from the public on this draft plan.

DATES: Comments on the draft recovery plan must be received on or before August 26, 1991, to receive consideration by the Service.

ADDRESSES: Persons wishing to review the draft recovery plan may obtain a copy of contacting the Jackson Field Office, U.S. Fish and Wildlife Service, 6578 Dogwood View Parkway, Jackson, Mississippi 39213. Written comments and materials regarding the plan should be addressed to the Field Supervisor at the above address. Comments and materials received are available on request for public inspection, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Jim Stewart at the above address (601/965-4900).

SUPPLEMENTARY INFORMATION:

Background

Restoring endangered or threatened animals and plants to the point where they are again secure, self-sustaining members of their ecosystems is a primary goal of the U.S. Fish and Wildlife Service's endangered species program. To help guide the recovery effort, the Service is working to prepare recovery plans for most of the listed species native to the United States. Recovery plans describe actions considered necessary for conservation of the species, criteria for recognizing the recovery levels for downlisting or delisting them, and initial estimates of times and costs to implement the recovery measures needed.

The Endangered Species Act of 1973 (Act), as amended (16 U.S.C. 1531 *et seq.*), requires the development of recovery plans for listed species unless such a plan would not promote the conservation of a particular species. Section 4(f) of the Act as amended in 1988, requires that a public notice and an opportunity for public review and comment be provided during recovery plan development. The Service will consider all information presented during a public comment period prior to approval of each new or revised recovery plan. The Service and other Federal agencies will also take these comments into account in the course of implementing approved recovery plans.

The primary species considered in this draft recovery plan is the Arkansas fatmucket mussel (*Lampsilis powelli*). The area of emphasis for recovery actions is the Ouachita, South Fork Ouachita, and Saline Rivers and headwater streams of the latter. All known populations of this species are in Arkansas. The historic range within this system has been adversely impacted by impoundment, water pollution and channel modification. Habitat restoration and protection, reestablishing populations and management are major objectives of this recovery plan.

Public Comments Solicited

The Service solicits written comments on the recovery plan described. All comments received by the date specified above will be considered prior to approval of the plan.

Authority

The authority for this action is Section 4(f) of the Endangered Species Act, 16 U.S.C. 1533(f).

Dated: June 14, 1991.

Robert Bowker,

Complex Field Supervisor.

BILLING CODE 4310-55-M

INTERNATIONAL TRADE COMMISSION

[Inv. No. 337-TA-311]

Certain Air Impact Wrenches; Commission Decision Not To Review an Initial Determination of No Violation of Section 337 of the Tariff Act of 1930; Termination of Investigation

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has determined not to review an initial determination (ID) issued by the presiding administrative law judge (ALJ) finding no violation of section 337 in the above-captioned investigation, thereby terminating the investigation.

FOR FURTHER INFORMATION CONTACT: Scott Andersen, Esq., Office of the General Counsel, U.S. International Trade Commission, 500 E Street, SW., Washington, DC 20436, telephone 202-252-1099. Hearing-impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202-252-1810.

SUPPLEMENTARY INFORMATION: The authority for the Commission's action is contained in 19 U.S.C. 1337 and 19 CFR 210.53.

On May 7, 1991, the presiding ALJ issued on ID finding that there is no violation of section 337 in the investigation. On May 16, 1991, a petition for review of the ID was filed by complainant Ingersoll-Rand Company. On May 23, 1991, respondents Astro Pneumatic Tool Co. and Kuan-I Gear Co. and the Commission investigative attorney filed oppositions to the petition for review. No government agency comments were received.

On June 18, 1991, the Commission determined not to review the ID. By virtue of the Commission's decision not to review the ID, the ID has become the final Commission determination in this investigation. 19 CFR 210.53(h).

Copies of the ID and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street, SW., Washington, DC 20436, telephone 202-252-1000.

Issued: June 18, 1991.

By order of the Commission.

Kenneth R. Mason,

Secretary.

[FR Doc. 91-15208 Filed 6-25-91; 8:45 am]

BILLING CODE 7020-02-M

[Investigation No. 731-TA-518 (Preliminary)]

Aspherical Ophthalmoscopy Lenses From Japan

Determination

On the basis of the record [1] developed in the subject investigation, the Commission determines, pursuant to section 733(a) of the Tariff Act of 1930 (19 U.S.C. 1673b(a)), that there is a reasonable indication that an industry in the United States is materially injured by reason of imports from Japan of aspherical opthalmoscopy lenses,[2] provided for the subheading 9018.50.00 of the Harmonized Tariff Schedule of the United States (HTS), that alleged to be sold in the United States at less than fair value (LTFV).

Background

On April 30, 1991, a petition was filed with the Commission and the Department of Commerce by Volk Optical, Inc., Mentor, Ohio, alleging that an industry in the United States is materially injured and threatened with material injury by reason of LTFV imports of aspherical opthalmoscopy lenses from Japan. Accordingly, effective April 30, 1991, the Commission instituted preliminary antidumping No. 731-TA-518 (Preliminary).

Notice of the institution of the Commission's investigation and of a public conference to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publising the notice in the Federal Register of May 7, 1991 (56 FR 21173). The conference was held in Washington, DC, on May 21, 1991, and all persons who requested the opportunity were permitted to appear in person or by counsel.

The Commission transmitted its determination in this investigation to the Secretary of Commerce on June 14, 1991. The views of the Commission are contained in USITC publication 2396 (June 1991), entitled Aspherical Ophthalmoscopy Lenses from Japan: Determination of the Commission in Investigation No. 731-TA-518 (Preliminary) Under the Tariff Act of 1930, Together With the Information Obtained in the Investigation.

Issued: June 17, 1991.

By order of the Commission.

Kenneth R. Mason,

Secretary.

[FR Doc. 91-15209 Filed 6-25-91; 8:45 am]

BILLING CODE 7020-02-M

[Investigation No. 731-TA-473 (Final)]

Certain Electric Fans From the People's Republic of China

AGENCY: United States International Trade Commission.

ACTION: Revised schedule for the subject investigation.

EFFECTIVE DATE: June 19, 1991.

FOR FURTHER INFORMATION CONTACT: Woodley Timberlake (202-252-1188), Office of Investigations, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202-252-1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202-252-1000.

SUPPLEMENTARY INFORMATION: On May 31, 1991, the Commission instituted the subject investigation and established a schedule for its conduct (56 FR 18170). Subsequently, the Department of Commerce extended the date for its final determination in the investigation from August 12, 1991, to October 16, 1991. The Commission, therefore, is revising its schedule in the investigation to conform with Commerce's new schedule.

The Commission's new schedule for the investigation is as follows: Requests to appear at the hearing must be filed with the Secretary to the Commission not later than October 18, 1991; the prehearing conference will be held at the U.S. International Trade

[1] The record is defined in section 207.2(f) of the Commission's Rules of Practice and Procedure (19 CFR 207.2(f).

[2] For purposes of this investigation, aspheric ophthalmoscopy lenses are single element non-contact ophthalmoscopic lenses, whether mounted or unmounted, framed or unframed, of which one of both surfaces are aspherical in shape.

VOL 56 ISS 123 JE 26 1991 UMI

Commission Building on October 21, 1991; the prehearing staff report will be placed in the nonpublic record on October 11, 1991; the deadline for filing prehearing briefs is October 22, 1991; the hearing will be held at the U.S. International Trade Commission Building on October 29, 1991; and the deadline for filing posthearing briefs is November 5, 1991.

For further information concerning this investigation see the Commission's notice of investigation cited above and the Commission's Rules of Practice and Procedure, part 201, subparts A through E (19 CFR part 201, as amended by 56 FR 11918, Mar. 21, 1991), and part 207, subparts A and C (19 CFR part 207, as amended by 56 FR 11918, Mar. 21, 1991).

Authority: This investigation is being conducted under authority of the Tariff Act of 1930, title VII. This notice is published pursuant to § 207.20 of the Commission's rules.

Issued: June 20, 1991.

By order of the Commission.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

[Investigation No. 337-TA-303]

Certain Polymer Geogrid Products and Processes Therefor; Decision To Dismiss Investigation for Mootness and Vacate Initial Determination

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has determined to dismiss the above-captioned investigation for mootness and to vacate the presiding administrative law judge's (ALJ) final initial determination.

FOR FURTHER INFORMATION CONTACT: Jean Jackson, Esq., Office of the General Counsel, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436; telephone 202-252-1104. Hearing-impaired individuals are advised that information about this matter can be obtained by contacting the Commission's TDD terminal, 202-252-1810.

SUPPLEMENTARY INFORMATION: On August 10, 1989, Tensar Corporation Filed a complaint under section 337 alleging infringement of two U.S. patents exclusively licensed to Tensar covering polymer geogrid products and a process for making such products. The Commission instituted an investigation of the complaint and issued a notice of investigation which was published in the Federal Register on September 20, 1989 (54 FR 38752). On July 11, 1990, the Commission determined not to review an ID designating the investigation more complicated and extending the statutory deadline for completion of the investigation by six months.

On September 20, 1990, the presiding ALJ issued her final ID finding no violation of section 337 in the investigation. On October 4, 1990, in response to a joint request by complainant and respondents, the Commission suspended its investigation in order to allow the private parties to borrow exhibits from the Commission's record for use in a jury trial in concurrent litigation between the same parties, *Tenax Corp.* versus *The Tensar Corp.*, Civil Action No. H-89-426, in the U.S. District Court for the District of Maryland. 55 FR 41394 (October 11, 1990).

On November 23, 1990, the jury trial concluded with a verdict of patent infringement in favor of Tensar. The parties returned the exhibits to the Commission on December 19, 1990. Since several post-trial motions were pending before the district court, the Commission determined, on December 31, 1990, to continue its suspension until the final judgment of the district court. 56 FR 873-874 (Jan. 9, 1991). On April 16, 1991, the district court issued a final judgment.

On May 6, 1991, the Commission lifted its suspension of the investigation. On May 10, 1991, complainant filed a motion to terminate the investigation as moot because it had received all possible relief from the district court in concurrent litigation. (The district court had ruled that complainant's patent was valid and infringed by the same firms that are the respondents in the Commission investigation. The court awarded damages and issued an injunction against respondents.) In the alternative, complainant moved to withdraw its complaint and to dismiss the investigation without prejudice. Complainant also requested that the ID be vacated.

Copies of the Commission order, its opinion in support of the order, and all other nonconfidential documents filed in connection with this investigation are or will be available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street, SW., Washington, DC 20436; telephone: 202-252-1000.

This action is taken under the authority of section 337 of the Tariff Act of 1930, 19 U.S.C. 1337 and Commission interim rule § 210.51(a), 19 CFR 210.51(a).

Issued: June 14, 1991.

By order of the Commission.

Kenneth R. Mason,

Secretary.

[FR Doc. 91-15211 Filed 6-25-91; 8:45 am]

BILLING CODE 7020-02-M

[Investigation No. 337-TA-336]

Commission Determination not to Review an Initial Determination Granting in Part a Motion for Summary Determination on the Issue of Domestic Industry; Certain Static Random Access Memories & Integrated Circuit Devices, etc.

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

In the matter of Certain Static Random Access Memories and Integrated Circuit Devices Containing Same, Processes for Making Same, Components Thereof, and Products Containing Same.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has determined not to review the presiding administrative law judge's (ALJ) initial determination (ID) granting in part a motion for summary determination on the existence of a domestic industry in the above-captioned investigation.

FOR FURTHER INFORMATION CONTACT: Cynthia P. Johnson, Esq., Office of the General Counsel, U.S. International Trade Commission, telephone 202-252-1098.

SUPPLEMENTARY INFORMATION: On March 29, 1991, complainant filed a motion for summary determination on the issue of the existence of a domestic industry. Respondents and the Commission investigative attorneys opposed the motion. On May 14, 1991, the presiding ALJ issued an ID (Order No. 9) granting the motion in part. The ID found that a domestic industry exists with respect to U.S. Letters Patent 4,125,854. Respondents petitioned for review of the ID. Complainant and the Commission investigative attorneys opposed respondents' petition for review. No agency comments were received.

This action is taken under the authority of section 337 of the Tariff Act of 1930, 19 U.S.C. 1337, and Commission interim rule § 210.53, 19 CFR 210.53.

Copies of the ID and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone 202-252-1000. Hearing-impaired persons are advised that information on the matter can be obtained by contacting the Commission's TDD terminal on 202-252-1810.

Issued: June 17, 1991.

By order of the Commission.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

INTERSTATE COMMERCE COMMISSION

[Finance Docket No. 31660]

Eastern Illinois Railroad Co.—Operation Exemption—Line of Railroad of NRG, Inc., in Edgar, Coles, Cumberland, and Douglas Counties, IL

Eastern Illinois Railroad Company (EIRC), a noncarrier, filed a notice of exemption to operate a 52.95-mile line of railroad in Edgar, Coles, Cumberland, and Douglas Counties, IL.[1] The line, owned by NRG, Inc. (NRG), extends between Metcalf and Neoga, IL, where it connects with Illinois Central Railroad.[2] EIRC will become a class III rail carrier.

Any comments must be filed with the Commission and served on Jon R. Roy, P.O. Box 1132, Charleston, IL 62920.

This notice is filed under 49 CFR 1150.31. If the notice contains false or misleading information, the exemption is void *ab initio*. Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the transaction.

Decided: June 20, 1991.

By the Commission, David M. Konschnik, Director, Office of Proceedings.

Sidney L. Strickland, Jr.,

Secretary.

[FR Doc. 91-15202 Filed 6-25-91; 8:45 am]

BILLING CODE 7035-01-M

[Docket No. AB-350X]

Ferdinand & Huntingburg Railroad Co.—Abandonment Exemption—in Dubois County, IN

AGENCY: Interstate Commerce Commission.

ACTION: Exemption.

SUMMARY: The Commission exempts under 49 U.S.C. 10505 from the prior approval requirements of 49 U.S.C. 10903-10904, the abandonment and discontinuance by Ferdinand & Huntingburg Railroad Company of 6.4 miles of rail line and approximately 1 mile of trackage rights in Dubois County, IN.

DATES: Provided no formal expression of intent to file an offer of financial assistance has been received, this exemption will be effective on July 26, 1991. Formal expressions of intent to file an offer of financial assistance [1] under 49 CFR 1152.27(c)(2) must be filed by July 8, 1991, petitions to stay must be filed by July 11, 1991, and petitions for reconsideration must be filed by July 22, 1991. Requests for a public use condition must be filed by July 8, 1991.

ADDRESSES: Send pleadings referring to Docket No. AB-350X to:

(1) Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

(2) Petitioner's representative: William H. Davis, 102 North Capitol Avenue, Corydon, IN 47112.

FOR FURTHER INFORMATION CONTACT: Joseph H. Dettmar (202) 275-7245. (TDD for hearing impaired: (202) 275-1721.

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to, call, or pick up in person from: Dynamics Concepts, Inc., room 2229, Interstate Commerce Commission Building, Washington, DC 20423. Telephone: (202) 289-4357/4359. (Assistance for the hearing impaired is available through TDD Services (202) 275-1721.)

Decided: June 18, 1991.

By the Commission, Chairman Philbin, Vice Chairman Emmett, Commissioners Simmons, Phillips, and McDonald.

Sidney L. Strickland, Jr.

Secretary.

BILLING CODE 7035-01-M

---

[1] The Railway Labor Executives' Association and the United Transportation Union (collectively Rail Labor) filed letters seeking imposition of labor protective conditions, to which EIRC replied, objecting to the relief sought. The Commission has determined that it would not impose such conditions on this class of transaction unless exceptional circumstances were shown. See Ex. Parte No. 392 (Sub-No. 1), *Class Exemption—Acq. & Oper. of R. Lines Under 49 U.S.C. 10901*, 1 I.C.C.2d 810, 814 (1986), *aff'd sub nom. Illinois Commerce Commission* v. *I.C.C.*, 817 F.2d 145 (D.C. Cir. 1987). Rail Labor does not allege that exceptional circumstances are involved. Accordingly, labor protective conditions will not be imposed.

[2] The line had been abandoned by its previous owner, the Norfolk and Western Railway Company, Docket No. AB-10 (Sub-No. 42), *Norfolk and Western Railway Company—Abandonment and Discontinuance of Service—Between Linden, IN, and Coffeen, IL* (not printed), served June 9, 1987. NRG purchased the line in April 1988.

EIRC indicates that Indiana Hi-Rail Corporation (IHRC) has been operating on the line since 1988, but that IHRC informed NRG in January 1991 that, effective March 31, 1991, it intended to cease operations. It is unclear under what authority IHRC had been operating the line or whether IHRC sought approval for discontinuing its operations.

[1] See Exempt. of Rail Abandonment—Offers of Finan. Assist., 4 I.C.C.2d 164 (1987).

DEPARTMENT OF JUSTICE

Joint Newspaper Operating Agreement

Notice is hereby given that the Attorney General has granted the motion of the Antitrust Division to file an amended report concerning the application by the Manteca News and Manteca Bulletin for approval of a joint newspaper operating agreement pursuant to the Newspaper Preservation Act, 15 U.S.C. 1801-1804.

Any person wishing to do so may submit a written reply to the amended report by mailing or delivering five copies to the Assistant Attorney General for Administration, Justice Management Division, Washington, DC 20530. Replies must be received no later than July 18, 1991.

Dated: June 18, 1991.

Harry H. Flickinger,

Assistant Attorney General for Administration.

[FR Doc. 91-15177 Filed 6-25-91; 8:45 am]

BILLING CODE 4410-01-M

Lodging of Consent Decree; Pursuant to the Comprehensive Environmental Response, Compensation and Liability Act

In accordance with section 122(d)(2)(B) of the Comprehensive Environmental Response, Compensation and Liability Act and with Department of Justice policy, 28 CFR 50.7, notice is hereby given that on June 12, 1991, a proposed Consent Decree in *United States* v. *Beazer East, Inc.*, Civil Action No. CIV-F-91-767 (LKK-JFM) was lodged with the United States District Court for the Eastern District of California. The proposed Consent Decree concerns the clean-up of the Koppers Superfund Site ("Site"), which is located in Butte County, California. The proposed Consent Decree requires the Defendant Beazer East, Inc. ("Beazer") to fully implement the remedy selected by EPA for the Site, as

VOL 56 ISS 123 JE 26 1991 UMI

set forth in the Record of Decision (ROD), and to reimburse the United States for all costs incurred and to be incurred at the Site. The remedy requires Beazer to implement several technologies for the cleanup of soils, including soil washing, bioremediation and an extensive pump and treat system for area groundwater. The Consent Decree further provides for graduated stipulated penalties for Beazer's failure to comply with the terms of the Consent Decree. Termination of the Consent Decree is effected upon EPA's certification that Beazer has satisfactorily completed all remedial activities as set forth in the Consent Decree. However, termination of the Consent Decree shall not affect the Covenant Not to Sue, Retention of Records, Reservation of Rights, Periodic Review to Assure Protection of Human Health and the Environment, and Reimbursement of Costs provisions in the Consent Decree.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the proposed Consent Decree. Comments should be addressed to the Assistant Attorney General of the Environment and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States* v. *Beazer East, Inc.* (Koppers Superfund Site) D.O.J. 90-11-3-421.

The proposed Consent Decree may be examined at the Office of the United States Attorney, Eastern District of California, United States Courthouse, Sacramento, California, and at the Region IX, Office of the Environmental Protection Agency, 75 Hawthorne Street, San Francisco, California. Copies of the Consent Decree may be examined at the Environmental Enforcement Section Document Center, 601 Pennsylvania Avenue Building, NW., Washington, DC 20004. A copy of the proposed Consent Decree may be obtained in person or by mail from the Environmental Enforcement Section Document Center, 601 Pennsylvania Avenue NW., Box 1097, Washington, DC 20004. In requesting a copy, please enclose a check in the amount of $47.50 (25 cents per page reproduction cost) payable to the "Consent Decree Library."

Richard B. Stewart,

Environmental Enforcement Section, Environment and Natural Resources Division.

[FR Doc. 91-15179 Filed 6-25-91; 8:45 am]

BILLING CODE 4410-01-M

Lodging of Consent Decree Pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that a proposed consent decree in *United States* versus *Rasmussen*, Civil Action No. 88CV40010FL, was lodged on June 13, 1991 with the United States District Court for the Eastern District of Michigan. The Consent Decree settles the liability of one defendant, Alfred E. Pearson, regarding certain past and future costs of the United States related to the Rasmussen Dump Site, located in Green Oak Township, Livingston County, Michigan.

The Department of Justice will receive, for a period of thirty (30) days from the date of this publication, comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General for the Environment and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States* versus *Rasmussen*, D.J. reference #90-11-3-281.

The proposed consent decree may be examined at the Office of the United States Attorney for the Eastern District of Michigan, 113 Federal Building, 600 Church Street, Flint, Michigan 48502; the Region V Office of the Environmental Protection Agency, 230 South Dearborn Street, Chicago, Illinois; and at the Environmental Enforcement Section Document Center, 601 Pennsylvania Avenue Building, NW., Washington, DC 20004, 202-347-2072. A copy of the proposed consent decree may be obtained in person or by mail from the Document Center. In requesting a copy, please enclose a check in the amount of $3.75 (25 cents per page reproduction costs), payable to the Consent Decree Library.

Richard B. Stewart,

Assistant Attorney General, Environment and Natural Resources Division.

BILLING CODE 4410-01-M

Lodging of Bankruptcy Settlement Stipulation

In accordance with the policy of the Department of Justice, 28 CFR 50.7, notice is hereby given that on June 13, 1991, a proposed Stipulation and Agreement to Settle in *In re: DeMenno/Kerdoon*, was lodged with the Bankruptcy Court for the Central District of California. The settlement is in connection with claims of the Environmental Protection Agency in DeMenno/Kerdoon's chapter 11 bankruptcy proceedings.

The proposed settlement stipulation resolves civil claims of the United States regarding the liability of DeMenno/Kerdoon for disposal of hazardous substances at the Operating Industries, Inc. landfill, located in Monterey Park, California. The settlement provides that DeMenno/Kerdoon shall pay $200,000 towards EPA costs that were incurred up to June 1, 1988, and shall pay 0.512% of all costs incurred and to be incurred at the Operating Industries site since that date, up to an additional total payment of $600,000.

The Department of Justice will receive comments relating to the proposed settlement stipulation for a period of 30 days from the date of this publication. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, Department of Justice, Washington, DC 20530. All comments should refer to *In re: DeMenno/Kerdoon*, D.J. Ref. 90-11-2-156B.

The proposed settlement stipulation may be examined at the office of United States Attorney, 312 North Spring Street, Los Angeles, California 90012, at the Region IX office of the U.S. Environmental Protection Agency, 75 Hawthorne Street, San Francisco, California 94105. A copy of the proposed settlement stipulation may also be examined at the Environmental Enforcement Section Document Center, 601 Pennsylvania Ave. Building, NW., Washington, DC 20044 (202-347-2072). A copy of the proposed settlement stipulation may be obtained in person or by mail from the Environment Enforcement Section Document Center, 601 Pennsylvania Ave., NW., Box 1097, Washington, DC 20004. In requesting a copy, please enclose a check in the amount of $3.50 (25 cents per page reproduction costs) payable to "Consent Decree Library."

George Van Cleve,

Acting Assistant Attorney General, Environment and Natural Resources Division.

BILLING CODE 4410-01-M

NATIONAL COMMUNICATIONS SYSTEM

Federal Telecommunication Standards

AGENCY: National Communications System, Office of Technology and Standards.

ACTION: Notice for comment on proposed standard.

SUMMARY: The purpose of this notice is to solicit the views of Federal agencies, industry, the public, and State and local governments on proposed Federal Telecommunication Standards 1080, "Telecommunications: Video Coder/Decoder for Audiovisual Services at 56 to 1,920 Kbit/s"; 1081, "Telecommunications: Frame Structure for a 56 to 1920 Kbit/s Channel in Audiovisual Teleservices"; 1082, "Telecommunications: System for Establishing Communication Between Audiovisual Terminals Using Digital Channels up to 2 Mbit/s"; 1083, "Frame-Synchronous Control and Indication Signals for Audiovisual System"; and 1084, "Telecommunications: Narrow-Band Visual Telephone Systems and Terminal Equipment."

DATES: Comments are due on September 24, 1991.

ADDRESSES: Send comments to the National Communications System, Office of Technology and Standards, 701 S. Court House Road, Arlington, VA 22204-2199.

FOR FURTHER INFORMATION CONTACT: National Communications System, Office of Technology and Standards, 701 S. Court House Road, Arlington, VA 22204-2199, Mr. Gary Rekstad, telephone (703) 692-2124.

SUPPLEMENTARY INFORMATION: 1. The General Services Administration (GSA) is responsible under the provisions of the Federal Property and Administrative Services Act of 1949, as amended, for the Federal Standardization Program. On August 14, 1972, the Administrator of General Services designated the National Communications System (NCS) as the responsible agent for the development of Federal telecommunication standards for NCS interoperability and the computer communication interface. GSA's authority to publish Federal Telecommunication Standards is dependent on the definition of automatic data processing equipment as specified in 40 U.S.C. 759.

2. Prior to the adoption of proposed Federal standards, it is important that proper consideration be given to the needs and views of Federal agencies, industry, the public, and State and local governments.

3. Requests for copies of the draft proposed FED-STDS 1080, 1081, 1082, 1083, and 1084 should be directed to the National Communications System, Office of Technology and Standards, 701 S. Court House Road, Arlington, VA 22204-2199.

Dennis Bodson,

Assistant Manager, NCS Office of Technology and Standards.

Special Emphasis Panel for Division of Cellular Biosciences: Committee of Visitors; Meetings

The National Science Foundation announces the following four Committee of Visitors meetings:

Committee of Visitors will review the following programs within the Division of Cellular Biosciences. All meetings will be held at the National Science Foundation in the rooms listed, from 8:30 a.m. to 5 p.m. All meetings are closed.

July 8–10, 1991—Cellular Biochemistry; room 1242.

July 15–17, 1991—Cell Biology; room 1242.

July 23–24, 1991—Physiological Processes; room 1242.

July 29–31, 1991—Developmental Biology; room 1242.

CONTACT PERSON: Dr. Bruce Umminger, Division Director (telephone 202/357–7905).

AGENDA: To carry out Committee of Visitors (COV) review including examination of decisions on proposals, reviewer comments, and other privileged materials.

REASON FOR CLOSING: The meetings are closed to the public because the Committee of Visitors will be reviewing proposal actions that include privileged intellectual property and personal information that could harm individuals if they were disclosed. If discussions were open to the public, these matters that are exempt under 5 U.S.C. 552b(c) (4) and (6) of the Government in the Sunshine Act would improperly be disclosed.

Dated: June 20, 1991.

M. Rebecca Winkler,

Committee Management Officer.

[FR Doc. 91–15145 Filed 6–25–91; 8:45 am]

BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards, Subcommittee on Extreme External Phenomena; Meeting

The ACRS Subcommittee on Extreme External Phenomena will hold a meeting on July 10, 1991, room P–110, 7920 Norfolk Avenue, Bethesda, MD.

Most of the meeting will be open to public attendance. A portion of this meeting may be closed as necessary to discuss Proprietary Information (5 U.S.C. 552b(c)(4)).

The agenda for the subject meeting shall be as follows:

Wednesday, July 10, 1991—8:30 a.m. until the conclusion of business

The Subcommittee will discuss the NUMARC/EPRI Fire Vulnerabilities Evaluation (FIVE) Methodology for the IPEEE.

Oral statements may be presented by members of the public with the

concurrence of the Subcommittee Chairman; written statements will be accepted and made available to the Committee. Recordings will be permitted only during those sessions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and staff. Persons desiring to make oral statements should notify the ACRS staff member named below as far in advance as is practicable so that appropriate arrangements can be made.

During the meeting, the Subcommittee, along with any of their consultants who may be present, may exchange preliminary views regarding matters to be considered during the balance of the meeting.

The Subcommittee will then hear presentations by and hold discussions with representatives of the NRC staff, the nuclear industry, their respective consultants, and other interested persons regarding this review.

Further information regarding topics to be discussed, the scheduling of sessions open to the public, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the Designated Federal Official, Mr. Dean Houston (telephone 301/492–9521) between 7:30 a.m. and 4:15 p.m. Persons planning to attend this meeting are urged to contact the above named individual one or two days before the scheduled meeting to be advised of any changes in schedule, etc., that may have occurred.

Dated: June 18, 1991.

Gary R. Quittschreiber,

Chief, Nuclear Reactors Branch.

[FR Doc. 91–15006 Filed 6–25–91; 8:45 am]

BILLING CODE 7555-01-M

Biweekly Notice Applications and Amendments to Operating Licenses Involving No Significant Hazards Considerations

I. Background

Pursuant to Public Law (P.L.) 97-415, the Nuclear Regulatory Commission (the Commission) is publishing this regular biweekly notice. P.L. 97-415 revised section 189 of the Atomic Energy Act of 1954, as amended (the Act), to require the Commission to publish notice of any amendments issued, or proposed to be issued, under a new provision of section 189 of the Act. This provision grants the Commission the authority to issue and make immediately effective any amendment to an operating license upon a determination by the Commission that such amendment involves no significant hazards consideration, notwithstanding the pendency before the Commission of a request for a hearing from any person.

This biweekly notice includes all notices of amendments issued, or proposed to be issued from June 3, 1991 through June 14, 1991. The last biweekly notice was published on June 12, 1991 (56 FR 27036).

Notice of Consideration of Issuance of Amendment To Facility Operating License and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing

The Commission has made a proposed determination that the following amendment requests involve no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendments would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The basis for this proposed determination for each amendment request is shown below.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Written comments may be submitted by mail to the Regulatory Publications Branch, Division of Freedom of Information and Publications Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, and should cite the publication date and page number of this **Federal Register** notice. Written comments may also be delivered to Room P-223, Phillips Building, 7920 Norfolk Avenue, Bethesda, Maryland from 7:30 a.m. to 4:15 p.m. Copies of written comments received may be examined at the NRC Public Document Room, the Gelman Building, 2120 L Street, NW, Washington, D.C. The filing of requests for hearing and petitions for leave to intervene is discussed below.

By July 26, 1991, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. Interested persons should consult a current copy of 10 CFR 2.714 which is available at the Commission's Public Document Room, the Gelman Building, 2120 L Street, N.W., Washington, D.C. 20555 and at the Local Public Document Room for the particular facility involved. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) the nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases of the contention and a concise

VOL 56 ISS 123 JE 26 1991 UMI

statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion. Petitioner must provide sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the amendments under consideration. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received before action is taken. Should the Commission take this action, it will publish a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Services Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, N.W., Washington, D.C., by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1-(800) 325-6000 (in Missouri 1-(800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to (Project Director): petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this Federal Register notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, and to the attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board, that the petition and/or request should be granted based upon a balancing of factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.714(d).

For further details with respect to this action, see the application for amendment which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, N.W., Washington, D.C., and at the local public document room for the particular facility involved.

Arizona Public Service Company, et al., Docket No. STN 58-528, Palo Verde Nuclear Generating Station, Unit 2, Maricopa County, Arizona

Date of amendment request: May 29, 1991

Description of amendment request: Technical Specification 3/4.7.9 requires that hydraulic snubber functional testing be completed once every 18 months. The proposed amendment seeks to extend the testing frequency for Unit 2 hydraulic snubbers by allowing a one time extension to the current 18 month surveillance requirement plus the additional 25% allowed by Section 4.0.2. This proposed change would allow functional testing for the snubbers, currently due no later than September 25, 1991, to be deferred until the next refueling outage, scheduled for October 17, 1991, but no later than December 17, 1991.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1.Involve a significant increase in the probability or consequences of an accident previously evaluated.

The snubbers for which this amendment request pertains, are located only on the Reactor Coolant Pumps (RCPs) and Steam Generators (SGs).

There are 8 snubbers per unit located on the RCPs and 4 snubbers per unit on the SGs, for a unit total of 12 hydraulic snubbers.

. . .

The surveillance history for Unit 2 hydraulic snubbers has shown that the snubbers tested at the first and second refueling (noted above) have successfully satisfied the functional test acceptance criteria from Surveillance Requirement 4.7.9f as follows:

The snubber functional test verifies that:

1)Activation (restraining action) is achieved within the specified range in both tension and compression;

2)Snubber bleed, or release rate where required, is present in both tension and compression, within the specified range;

3)For mechanical snubbers, the force required to initiate or maintain motion of the snubber is within the specified range in both directions of travel; and

4) For snubbers specifically required not to displace under continuous load, the ability of the snubber to withstand load without displacement.

Units 1 and 3 have also met this criteria in previous functional tests. Therefore, it can be stated that there have been no problems with hydraulic snubbers at Palo Verde.

In addition, the extension of time sought in this amendment request (approximately three months if functional testing is performed at the end of the requested extension) is not considered a sufficient duration of time to incur significant degradation or expose the snubbers to other hazards or conditions for which the snubber could not function or for which the snubbers could be degraded. The snubber function is to maintain structural integrity of systems and thus mitigate the effects of any seismic event or accident described in Chapter 15 of PVNGS UFSAR. The extension of time sought in this amendment request will not degrade this capability.

Therefore, based on the discussion provided above, the proposed amendment request will not involve a significant increase in the probability or consequences of an accident previously evaluated.

2. Create the possibility of a new different kind of accident from any accident previously evaluated.

The snubbers alone have no function pertaining directly to plant operation and thus cannot be an accident initiator. The snubbers ensure that the structural integrity of the reactor coolant system and other safety related systems is maintained during and following a seismic or other event initiating dynamic loads. The proposed amendment will not alter the current design of the facility nor is the extension of time significant enough to create the possibility of a new or different kind of accident from any accident previously evaluated.

3. Involve a significant reduction in a margin of safety.

The proposed amendment does not involve a significant reduction in the margin of safety at PVNGS because the extension of time sought for snubber testing does not involve a change to safety limits, setpoints, or design margins.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Phoenix Public Library, 12 East McDowell Road, Phoenix, Arizona 85004

Attorney for licensees: Arthur C. Gehr, Esq., Snell & Wilmer, 3100 Valley Center, Phoenix, Arizona 85073

NRC Project Director: James E. Dyer

Baltimore Gas and Electric Company, Docket Nos. 50-317 and 50-318, Calvert Cliffs Nuclear Power Plant, Unit Nos. 1 and 2, Calvert County, Maryland

Date of amendments request: May 24, 1991

Description of amendments request: The proposed amendment would revise the Technical Specification (TS) for both Units 1 and 2 to allow the use of the Mass Point method for conducting containment integrated leak rate tests and revise the required schedule for conducting such tests in accordance with 10 CFR Part 50, Appendix J. The schedule change takes into account the current 24-month fuel cycles. The initial schedules specified in the current TS are based on the previous 18-month fuel cycles.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

(1) Would not involve a significant increase in the probability or consequences of an accident previously evaluated.

The proposed change to Surveillance Requirement 4.6.1.2 will only delete reference to ASNI N45.4-1972. Conformance with Appendix J to 10 CFR Part 50 will still be required. Appendix J presently allows Containment Integrated Leakage Rate Test (CILRT) analysis methods in accordance with ANSI N45.4-1972, as well as the Mass Point method described in ANSI/ANS 56.8-1987 (when used with at least a 24-hour duration).

The proposed change allows the use of an improved alternative method of evaluating CILRT data. The Mass Point method is recognized to be a more reliable method of verifying that the leakage from the containment is maintained within acceptable limits. Therefore, the assessment of containment integrity through integrated leak rate testing is enhanced. As such, the consequences of previously evaluated accidents are not impacted. Since the change would only affect the allowed techniques for surveillance testing, there will be no increase in the probability of accidents previously evaluated.

The proposed change to the schedule provides only flexibility in meeting the same requirement for three tests in ten years. The additional flexibility is needed due to the 24-month fuel cycle currently being used. Since the testing type and bases are not changed, the probability and consequences of previously evaluated accidents are not significantly increased.

(2) Would not create the possibility of a new or different type of accident from any accident previously evaluated.

The technique used to calculate leakage rates in itself is not considered to be an initiator of any accidents, transients, incidents or events. The proposed change to the schedule only provides flexibility in meeting the same requirement for three tests in ten years. The testing type and bases are not changed. Therefore, these proposed changes will not create the possibility of a new or different type of accident from any previously evaluated.

(3) Would not involve a significant reduction in a margin of safety.

Should use of the Mass Point method be allowed, an enhanced determination of containment leakage through CILRT is available. As such, the confidence level of containment integrity would also be enhanced. The Technical Specification Bases indicated only that "the surveillance testing for measuring leakage rates are consistent with the requirements of Appendix J to 10 CFR [Part] 50." The proposed change to the schedule only provides flexibility in meeting the same requirement for three tests in ten years. The testing type and bases are not changed. Both changes would continue to provide for testing that is consistent with the requirement of Appendix J. Therefore, this change does not adversely impact the margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendments request involves no significant hazards consideration.

Local Public Document Room location: Calvert County Library, Prince Frederick, Maryland.

Attorney for licensee: Jay E. Silbert, Esquire, Shaw, Pittman, Potts and Trowbridge, 2300 N Street, NW., Washington, DC. 20037.

NRC Project Director: Robert A. Capra

Baltimore Gas and Electric Company, Docket Nos. 50-317 and 50-318, Calvert Cliffs Nuclear Power Plant, Unit Nos. 1 and 2, Calvert County, Maryland

Date of amendments request: May 24, 1991

Description of amendments request: The proposed amendment would revise the Technical Specifications (TS) for both Units 1 and 2 to allow the removal of the schedules for the withdrawal of reactor vessel material specimens. Section II.B.3 of Appendix H to 10 CFR Part 50 requires the submittal to, and approval by, the Nuclear Regulatory Commission (NRC) of a proposed withdrawal schedule for material specimens before implementation. Hence, the placement of these schedules in the Technical Specifications duplicates the control on changes to these schedules that have been established by Appendix H. The NRC recognized this duplication and issued guidance for deleting the withdrawal schedules from TS in Generic Letter (GL) 91-01. The licensee has used the guidance in GL 91-01 in this proposed revision to the Calvert Cliffs Nuclear Power Plant, Units 1 and 2, TS.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

(1) Would not involve a significant increase in the probability or consequences of an accident previously evaluated.

The removal from the Technical Specification of the schedule for the withdrawal of reactor vessel material surveillance specimens will not result in any loss of regulatory control because changes to this schedule are controlled by the requirements of Appendix H to 10 CFR Part 50 which require NRC approval and are maintained in the Updated Final Safety Analysis Report. In addition, the surveillance requirements on pressure and temperature indicate that the specimens must be removed and examined to determine changes in their material properties, and these results must be used to update the pressure and temperature limits. Therefore, no actual change in the required actions would occur and the change would not involve a significant increase in the probability or consequences of an accident previously evaluated.

(2) Would not create the possibility of a new or different type of accident from any accident previously evaluated.

VOL 56 ISS 123 JE 26 1991 UMI

The requested change would not result in any change to the plant design, hardware or procedures for operation. Therefore, the requested change would not create the possibility of a new or different type of accident from any accident previously evaluated.

(3) Would not involve a significant reduction in a margin of safety.

The requested change would neither result in fewer nor less frequent removal and examination of the reactor vessel material irradiation surveillance specimens, nor would it result in any change to the required use of the results of the examinations. Therefore, the pressure and temperature requirements for the reactor coolant system would be maintained in the same manner and the change would not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendments request involves no significant hazards consideration.

Local Public Document Room location: Calvert County Library, Prince Frederick, Maryland.

Attorney for licensee: Jay E. Silbert, Esquire, Shaw, Pittman, Potts and Trowbridge, 2300 N Street, NW., Washington, DC. 20037.

NRC Project Director: Robert A. Capra

Baltimore Gas and Electric Company, Docket Nos. 50-317 and 50-318, Calvert Cliffs Nuclear Power Plant, Unit Nos. 1 and 2, Calvert County, Maryland

Date of amendments request: May 24, 1991

Description of amendments request: The proposed amendment would revise the Technical Specifications for both units to provide required snubber visual inspection intervals based on the number of inoperable snubbers found during the previous inspection in proportion to the size of the various snubber populations and categories. This requested change is based on the approach for determining visual inspection intervals developed in the Nuclear Regulatory Commission's Generic Letter 90-09, "Alternative Requirements for Snubber Visual Inspection Intervals and Corrective Actions," dated December 11, 1990. In addition, the amendment would make various editorial revisions for consistency between Units 1 and 2 and remove unnecessary wording or notes.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

(1) Would not involve a significant increase in the probability or consequences of an accident evaluated.

The proposed method for determining the snubber visual inspection interval is equivalent to the previous method with regard to assuring the capability of the system which it supports. The proposed interval increase does not significantly change the failure rate and provides an equivalent assurance of operability. Therefore, the proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated.

(2) Would not create the possibility of a new or different type of accident from any accident previously evaluated.

This revision will continue to assure the ability of the equipment to provide dynamic load support during a seismic event. Therefore, the proposed method for determining the snubber visual inspection intervals does not create a possibility of a new or different type of accident from any accident previously evaluated.

(3) Would not involve a significant reduction in a margin of safety.

The proposed method for determining the snubber visual inspection interval is equivalent to the previous method with regard to assuring the capability of the system which it supports. The functional testing continues to provide incentive for proper maintenance and assurance of the capability of the snubbers. Therefore, the proposed change does not involve a significant reduction in the margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendments request involves no significant hazards consideration.

Local Public Document Room location: Calvert County Library, Prince Frederick, Maryland.

NRC Project Director: Robert A. Capra

Carolina Power & Light Company, et al., Docket No. 50-400, Shearon Harris Nuclear Power Plant, Unit 1, Wake and Chatham Counties, North Carolina

Date of amendment request: May 15, 1991

Description of amendment request: The amendment request is being made to address commitments made by the licensee in response to NRC Generic Letter 90-06, "Resolution of Generic Issue 70, 'Power Operated Relief Valve and Block Valve Reliability' and Generic Issue 94 'Additional Low-Temperature Overpressure Protection for Light Water Reactors' pursuant to 10 CFR 50.54(f)." The proposed changes to Technical Specifications (TS), Section 3/4.4.4 are as follows:

1. Revise the mode applicability to MODES 1, 2, and 3 to be consistent with the guidance of Generic Letter 90-06.

2. Revise the Limiting Conditions for Operation (LCO) Action Statement wording to more clearly specify that power be maintained to a block valve which is closed due to its associated power operated relief valve (PORV) being inoperable due to excessive seat leakage.

3. Revise the shutdown requirement from COLD SHUTDOWN to HOT SHUTDOWN to be consistent with the mode applicability requirements.

4. Wording changes necessary to reflect the plant design which includes two safety grade PORVs and one non-safety grade PORV.

5. Eliminate the option of continued operation for periods of greater than 72 hours with an inoperable safety grade PORV if the PORV is inoperable for reasons other than excessive seat leakage.

6. Clarify the 18-month Surveillance Requirement for the PORVs to clearly identify the surveillance test requirements including the requirement for testing in MODES 3 or 4 prior to cooldown below 325 degrees Fahrenheit.

7. Revise the Surveillance Requirements for the backup Air/Nitrogen supply which operates the PORVs to clearly indicate that this backup supply is the accumulator.

8. Revise the associated TS Bases to reflect the proposed changes and to better define the basis for operability of the PORVs and block valves.

The proposed change to TS 3/4.4.2.4 is as follows:

1. Add a new Action Statement that reduces the allowed outage time from 7 days to 24 hours for an inoperable PORV in MODES 1 or 2.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below: The change does not involve a significant hazards consideration for the following reasons:

1. The proposed amendment does not involve a significant increase in the probability or consequences of an accident previously evaluated.

The PORVs are used by operators for recovery from postulated accidents such as a Steam Generator Tube Rupture. Automatic actuation of the PORVs is needed for Low Temperature Overpressure Protection (LTOP) of the Reactor Coolant System. The proposed changes to the TS increase the availability and reliability of the PORVs for these functions. Therefore, there would be no increase in the probability or consequences of an accident previously evaluated.

2. The proposed amendment does not create the possibility of a new or different kind of accident from any accident previously evaluated.

The proposed changes to the TS increase the availability and reliability of the PORVs. The requested TS changes do not involve any physical changes to the plant and, in particular, the PORVs and block valves. Therefore, the proposed changes do not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. The proposed amendment does not involve a significant reduction in the margin of safety.

The proposed changes to the TS increase the availability and reliability of the PORVs. The proposed TS changes do not involve any changes to actuation setpoints of the PORVs or LTOP system. There is no impact of the proposed changes on any safety analysis assumptions. Therefore, the proposed changes do not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the 50.92(c) licensee's analysis; and, based on this review, it appears that the three standards are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Cameron Village Regional Library, 1930 Clark Avenue, Raleigh, North Carolina 27605.

Attorney for licensee: R. E. Jones, General Counsel, Carolina Power & Light Company, P. O. Box 1551, Raleigh, North Carolina 27602

NRC Acting Project Director: Anthony J. Mendiola

The Cleveland Electric Illuminating Company, Centerior Service Company, Duquesne Light Company, Ohio Edison Company, Pennsylvania Power Company, Toledo Edison Company, Docket No. 50-440, Perry Nuclear Power Plant,

Unit No. 1, Lake County, Ohio

Date of amendment request: September 13, 1990, as supplemented October 16, 1990.

Description of amendment request: The proposed amendment would revise the Perry Nuclear Power Plant (PNPP) Technical Specifications (TSs) to make several administrative corrections related to previous amendments, to apply certain existing surveillance requirements to all appropriate operational conditions and to make changes to the Administrative Controls Section to reflect recent organizational changes. Other minor editorial corrections to the TSs and the Bases are also proposed.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration which is presented below:

This proposed amendment does not involve a significant increase in the probability or consequences of an accident previously evaluated since this amendment request proposes changes to PNPP Technical Specifications which either (1) constitute an additional limitation, restriction or control not presently included in PNPP Technical Specifications, or (2) constitute purely administrative changes designed to achieve consistency throughout PNPP Technical Specifications, provide clarification, correct existing errors, delete material no longer applicable to PNPP Technical Specifications, or reflect minor changes in CEI organizational structure or title. The technical qualifications necessary to operate PNPP continue to be provided by the CEI nuclear organization, and well-defined lines of authority, responsibility, and communication continue to exist for all activities affecting the safety of the plant. Each of the proposed changes have been reviewed, and determined to result in no change to plant systems or have any affect [sic] on accident conditions or assumptions. They also do not affect possible initiating events for accidents previously evaluated, or any system functional requirements.

The proposed amendment does not create the possibility of a new or different kind of accident. As stated above, the proposed changes are either administrative in nature which do not create the possibility of any new or different kind of accident or constitute additional limitations, restrictions, or control not presently included in PNPP Technical Specifications. The proposed changes do not create the possibility of a new or different kind of accident since they do not affect the reactor coolant pressure boundary, or other plant systems or structures in such a manner that could initiate any new or different kind of accident. In addition, the proposed changes do not adversely affect any system functional requirements nor plant maintenance or operability requirements in such a manner that could initiate any new or different kind of accident.

The proposed amendment does not involve a significant reduction in the margin of safety since it is administrative in nature, and does not affect any USAR design or accident assumptions. And, except for the correction of errors, the proposed changes do not affect any Technical Specification Bases.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

NRC Project Director: John N. Hannon.

Duke Power Company, et al., Docket Nos. 50-413 and 50-414, Catawba Nuclear Station, Units 1 and 2, York County, South Carolina

Date of amendment request: April 8, 1991

Description of amendment request: The amendments would revise the carbon adsorber test method and methyl iodide penetration criteria along with other administrative changes to the Annulus Ventilation and Control Room Area Ventilation Systems, the Containment Purge System, the Fuel Handling Ventilation Exhaust System and the Auxiliary Building Filtered Exhaust System.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

This proposed TS amendment will not increase the probability or consequences of an accident which has been previously evaluated. No physical changes will be made to the plant, therefore, there is no increased probability of an accident. As discussed in the Technical Justification [of the licensee's April 8, 1991 application], the decontamination efficiencies of the filters remain unchanged using the new test method and penetration acceptance criteria. The changes in the bypass leakage for the Annulus Ventilation System, the Auxiliary Building Filtered Exhaust System, and the Fuel Handling Ventilation Exhaust System which apply to Unit 2, will have no effect on the decontamination efficiencies, because a 95% decontamination efficiency was assumed originally, and this assumption accounts for a 1% bypass leakage. Because of this, the offsite dose and Control Room dose calculation results are unaffected. In addition to requiring the carbon adsorber to meet Design Basis decontamination efficiencies at 95% relative humidity, additional margin, for which no credit is taken, will be provided by the heaters. For the reasons stated above, there will be no increase in the consequences of an accident previously evaluated.

This proposed amendment to the TS does not create the possibility of a new or different kind of accident from any accident previously evaluated. This proposed TS change will not cause any physical changes to the plant or changes to operating procedures. Because the plant will continue to operate the same way it does now, this proposed amendment does not create the possibility of any new or different accident from any previously evaluated.

This proposed TS change will not cause a significant reduction in the margin of safety The new test method is more restrictive than the previous test methods, and, based on limited testing, Duke Power expects to have to change out carbon more frequently. The change in the allowed methyl iodide penetration, which was made to support the

VOL 56 ISS 123 JE 26 1991 UMI

change in test method, does not represent a significant decrease in the margin of safety. It represents the requirement of the test standard to pre-saturate the carbon adsorber. This presaturation causes a higher penetration during testing, and is conservative with respect to Design Basis Events. The test method D3803-89 is expected to provide a penetration value during testing which is higher than what would be expected during a Design Basis Event. These conservative results reflect the fact that the new test conditions are more harsh than expected plant conditions during a Design Basis Event. As an added conservatism, no credit is taken for the heaters. However the heaters will be tested and maintained, therefore, the relative humidity of air entering the carbon adsorber is never expected to reach 95%.

The addition of "at a nominal voltage of 600 VAC" to the heater SR [surveillance requirement] is administrative, and clarifies that the purpose of the requirement is to detect heater degradation. This change involves no significant hazards consideration.

Footnotes and statements related to the footnotes in the Fuel Handling Ventilation Exhaust System TS which expire on August 26, 1991 have been removed. This change is administrative, and involves no significant hazards consideration.

The change to SR 4.6.1.8.d.2 for the Annulus Ventilation System corrects an error in the SR. The system actually starts on a safety injection signal. This change does not reflect an actual change to the plant, it reflects a correction to an error in the Specifications. This change involves no significant hazards consideration.

The NRC staff has reviewed the licensee's analysis, and based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

NRC Project Director: David B. Matthews

Duke Power Company, Docket Nos. 50-369 and 50-370, McGuire Nuclear Station, Units 1 and 2, Mecklenburg County, North Carolina

Date of amendment request: June 5, 1991

Description of amendment request: The requested Technical Specification (TS) amendment is a one time change to defer an ice weighing surveillance requirement (TS 4.6.5.1.b.2) for McGuire Unit 2 until the next refueling outage which is presently scheduled for January 16, 1992.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

Duke Power has evaluated the proposed TS change and has determined that it does not represent a significant hazards consideration based upon the criteria established in 10 CFR 50.92(c). Operation of McGuire Nuclear Station in accordance with the proposed amendment will not:

(1) Involve a significant increase in the probability or consequences of an accident previously evaluated.

Duke proposes to modify the McGuire Nuclear Station Unit 2 Technical Specifications to revise Surveillance requirement 4.6.5.1(b)(2) to allow a one time extension of the 9 month ice weighing interval to the following refueling outage. The Ice Condenser System serves as an accident mitigation system and an extension to confirm actual ice weight is not an accident initiator.

The Ice Condenser is provided to absorb the thermal energy release following a LOCA [Loss of Coolant Accident] or steam line break inside Containment and thereby limiting the peak Containment pressure. The current design analysis is based upon a minimum average ice weight of 973... lbs. per basket (total ice bed weight of 1,890,000... lbs.). Calculations using historical Ice Condenser sublimation data with consevatism [sic] of 150%, indicate that the total ice bed weight will remain well above that value assumed in the safety analysis. Therefore, the consequences of an accident previously analyzed is not increased.

(2) Create the possibility of a new or different kind of accident from any previously analyzed.

Duke Power's request for a one time extension of the Unit 2 ice weighing interval will not result in a new or different kind of accident from that previously analyzed in McGuire's Final Safety Analysis Report (FSAR). A one time extension of the surveillance interval for this accident mitigation system is not considered to be an accident initiator. The TS ice weights derived from the safety analysis weight plus additional allowances of 10% for sublimation and 1.1% for weighing errors will ensure that the ice bed will not decrease below the design bases weight over the proposed surveillance interval. Therefore, the peak Containment pressure assumed in the safety analysis is still valid. This amendment involves no equipment changes or how the Ice Condenser system is operated.

(3) Involve a significant reduction in the margin of safety.

The Ice Condenser is designed to limit the Containment pressure below the design pressure for all reactor coolant pipe break sizes up to and including a double-ended severance. With a multiplier of 150% for additional conservatism, the worst case ice weight remains approximately 16% above the ice basket safety margin weight of 963 lbs. Because the minimum required ice weight assumed in the safety analysis is not being altered, the margin of safety as described in the Peak Containment Pressure Transient is not impacted.

The Ice Condenser also serves as a Containment air purification and cleanup system by absorbing molecular iodine from the containment atmosphere following a LOCA. The required boron concentration of the stored ice is not affected by this TS change request. Therefore, the air purification aspects of the Ice Condenser remain unchanged by this submittal and the margin of safety is not adversely impacted.

The Commission's staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the Commission's staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Atkins Library, University of North Carolina, Charlotte (UNCC Station), North Carolina 28223

Attorney for licensee: Mr. Albert Carr, Duke Power Company, 422 South Church Street, Charlotte, North Carolina 28242

NRC Project Director: David B. Matthews

Duke Power Company, Docket Nos. 50-269, 50-270 and 50-287, Oconee Nuclear Station, Units 1, 2 and 3, Oconee County, South Carolina

Date of amendment request: May 7, 1991, as supplemented May 13, 1991

Description of amendment request: The proposed amendments would delete the cycle dependent core operating limits from the Technical Specifications (TSs) to allow 10 CFR 50.59 reviews for future core reloads for all Oconee units. These limits will be relocated in a Core Operating Limits Report (COLR) in accordance with the guidance provided in NRC Generic Letter 88-16. Also, proposed TS 5.3.1.2 would establish new dimensional requirements for active fuel height to accommodate a new fuel design for the Unit 1, Cycle 14 reload and future reloads for all three Oconee units.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

(1) This amendment request removes the cycle specific core operating limits from the Technical Specifications and is consistent with the guidance provided in Generic Letter 88-16 in that the proposed Technical Specifications reference a formal report, COLR, which contains the cycle specific core operating limits. In addition, the associated

reporting requirements are already included in Administrative Controls section, Section 6.9, and finally the COLR is referenced in place of the limits removed from the Technical Specifications.

The removal of cycle dependent variables from the Technical Specifications has no impact upon plant operation or safety, or on the probability of a Design Basis Accident (DBA) occurrence. The Technical Specifications will continue to require operation within the core operational limits for each cycle reload calculated by the approved reload design methodologies. Appropriate actions to be taken if limits are violated will also remain in the Technical Specifications.

Each accident analysis addressed in the Oconee Final Safety Analysis Report (FSAR) has been examined with respect to changes in cycle specific parameters, and the new active fuel height in Technical Specification 5.3.2.1, in accordance with the approved reload methodologies to ensure that the transient evaluation for Unit 1, Cycle 14 reload with the new parameters is bounded by previously accepted analysis... Future reloads will be evaluated per the requirements of 10 CFR 50.59 to assure that these reloads will not involve a significant increase in the probability or consequences of an accident previously evaluated.

(2) As stated earlier, the removal of the cycle specific variables has no influence, impact nor does it contribute in any way to the probability or consequences of an accident. The cycle specific variables are calculated using the NRC approved methods. The Technical Specifications will continue to require operation within the required core operating limits and appropriate actions will be taken if limits are exceeded. The revised Technical Specification 5.3.2.1 includes a new active fuel height which is in support of the new fuel assembly design implemented for the Unit 1, Cycle 14 reload. This new fuel design which will also be utilized in future reloads has been analyzed in accordance with the NRC approved reload methodologies...

The proposed amendment does not in any way create the possibility of a new or different kind of accident from any accident previously evaluated.

(3) The margin of safety is not affected by the removal of cycle specific core operating limits from the Technical Specifications nor by the change in the height of the active fuel in the proposed Technical Specification 5.3.2.1. The margin of safety presently provided by current Technical Specifications remains unchanged. The proposed amendment still requires operation within the core limits as obtained from the NRC approved reload design methodologies and appropriate actions to be taken when or if limits are violated remain unchanged.

The development of the limits for future reloads will continue to conform to those methods described in NRC approved documentation. In addition, each future reload will involve a Part 50.59 safety review to assure that operation of the unit within the cycle specific limits will not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis, and based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

NRC Project Director: David B. Matthews

Entergy Operations, Inc., et al., Docket No. 50-416, Grand Gulf Nuclear Station, Unit 1, Claiborne County, Mississippi

Date of amendment request: June 19, 1989 as revised May 21 and December 7, 1990, and as supplemented February 7, March 4, and April 10, 1991.

Description of amendment request: The amendment would change the Technical Specification (TS) and associated Bases for the standby liquid control system by specifying an acceptable range of sodium pentaborate solution temperature (75 - 120 degrees F), concentration (13.6 - 15.2 weight percent) and (volume 4261 - 5086 gallons) for normal operation in lieu of the presently specified range of solution temperature (75 - 130 degrees F), concentration (13.6 - 28.5 weight percent), minimum volume (4530 gallons) and minimum weight (5900 pounds). An additional action statement would allow the solution concentration to be as high as 28.5 weight percent for 72 hours provided the solution temperature is above the saturation temperature as measured each 4 hours. An additional surveillance requirement would be the daily determination of the operability of heat tracing on pump suction piping by determining that power is available to at least one of the two redundant circuits.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. No significant increase in the probability or consequences of an accident previously evaluated results from this change.

a. The standby liquid control system (SLCS) safety design basis is to deliver sufficient neutron absorber solution to the reactor vessel to assure reactor shutdown in the unlikely event of a failure of the primary reactivity control system or anticipated transient without scram (ATWS). Because SLCS is completely independent of the normal means of shutting down the reactor (control rod drive system), changes to the SLCS will not affect the control rod drive system. Since the control rod drive system will remain unaffected, the probability of failure of the control rod drive system (e.g., ATWS event) will not change. Therefore, the probability of an ATWS remains unchanged by the proposed amendment.

b. The revised sodium pentaborate solution and pump suction piping temperature requirements prevent precipitation of the sodium pentaborate out of solution.

c. The revised sodium pentaborate solution volume and concentration requirements ensure SLCS has adequate neutron absorber solution for reactor shutdown from the most reactive state will allowance for solution leakage and imperfect mixing.

d. The change in surveillance requirements for the SLCS will not significantly affect the reliability of the system. The revised surveillance requirement to verify pump suction piping temperature as well as power availability to the heat tracing circuitry will not result in a decrease in the assurance that the sodium pentaborate solution is maintained above its saturation temperature. The revised surveillance requirements do not decrease the frequency of testing. The inservice inspection and functional testing of the SLCS is not affected by this change. The deletion of the requirement to determine the available weight of sodium pentaborate has no effect because all the points specified in the new Figure 3.1.5-1 in the acceptable region meet the minimum acceptable weight necessary. Therefore, the requirement to determine the weight is redundant since as long as the concentration and volume of the tank are within the acceptable operation region, minimum weight requirements are satisfied.

e. The design and operation of the SLCS remains within the existing design basis for the system. The ability of the system to deliver at least the design minimum weight of sodium pentaborate to the reactor vessel at design flow rates is not affected by this change.

f. Therefore, the probability or consequences of previously analyzed accidents are not increased.

2. This change would not create the possibility of a new or different kind of accident from any previously analyzed.

a. This change does not involve a physical change in any system's configuration.

b. No new mode of operation is introduced by this change. This change maintains SLCS operable at all times when it is possible to make the reactor critical.

c. Therefore, this change does not create the possibility of a new or different kind of accident from any previously evaluated.

3. This change would not involve a significant reduction in the margin of safety.

a. The sodium pentaborate solution volume requirements satisfy the design bases for the system. The solution and pump suction piping temperature limits and the solution concentration levels are more restrictive than currently allowed. The current TS could have resulted in system temperatures below the saturation temperature. The proposed change increases the margin of safety between the saturation temperature and the operating temperature since the operating temperature

VOL 56 ISS 123 JE 26 1991 UMI

has been raised. The margin of safety for the boron concentration remains unchanged since the minimum concentration of 13.6% is unaltered by the proposed change.

b. This change does not affect the ability of the SLCS to assure reactor shutdown independent of control rod insertion. This change is in accordance with the requirements of 10 CFR 50.62.

c. Therefore, this change will not involve a significant reduction in the margin of safety. Therefore, based on the above evaluation, operation in accordance with the proposed amendment involves no significant hazards considerations.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room Location: Judge George W. Armstrong Library, Post Office Box 1406, S. Commerce at Washington, Natchez, Mississippi 39120

NRC Project Director: Theodore R. Quay

Entergy Operations Inc., Docket No. 50-382, Waterford Steam Electric Station, Unit 3, St. Charles Parish, Louisiana

Date of amendment request: May 8, 1991

Description of amendment request: The proposed amendment would revise the Technical Specification (TS) by adding additional provisions to protect against Low Temperature Overpressure Protection (LTOP) of the primary system. This amendment is in response to Generic Letter (GL) 90-06 dated June 25, 1990.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

During startup and shutdown conditions at low temperature without protection, particularly when water-solid, RCS pressure might exceed reactor vessel pressure-temperature limitations established for protection against brittle fracture. A major overpressurization transient at low temperature, if combined with a critical crack in the reactor pressure vessel welds or plate material could result in a brittle fracture of the pressure vessel. Failure of the pressure vessel could hinder the ability to provide adequate coolant to the reactor core resulting in major core damage or a core melt accident. The design based overpressurization case for LTOP is the simultaneous, inadvertent operation of all three charging and HPSI [high pressure safety injections] pumps with the pressurizer backup heater in operation at low temperature. Each LTOP relief valve is sized to provide sufficient overpressurization protection during such an accident.

Changes suggested by GL 90-06 and included in the proposed amendment either simplify and clarify TS 3.4.6.3 (Overpressure Protection Systems) or add additional TS restrictions for periods of degraded LTOP System performance. There is no change to the physical plant, to the operation of the plant, or to the existing safety analyses. The proposed changes improve LTOP System availability and do not change the safety-related function of the system or its operation. As such, the operation of Waterford 3 in accordance with these proposed changes does not increase the consequence of any accident previously evaluated.

The proposed TS changes are made in strict accordance with instructions provided in GL 90-06. As described above, these changes either simplify or clarify TSs (which do not change the intent of the TS) or add restrictions for periods of degraded LTOP performance. This corresponds to improved availability or overpressurization protection at low temperature. Additional information contained in the existing TS but not addressed by the GL is retained in the proposed amendment. This is compatible with the intent of the GL. By retaining this in the amendment, existing protection is not compromised. The net effect is improved availability of LTOP.

This amendment meets the objective of the GL by proposing TS changes to improve availability of the LTOP System during vulnerable periods of operation. Improved availability of the LTOP System corresponds to a decreased probability of an accident involving the loss of LTOP. The probability of all other accidents remains unaffected by the proposed amendment. Therefore, operation of Waterford 3 in accordance with these proposed changes does not increase the probability of any accident previously evaluated.

A new kind of failure path would have to be introduced by these proposed changes to introduce a new or different kind of accident from those already analyzed. As previously identified, most of these changes merely provide clarification, simplification, or more conservative restrictions. Operation of the plant will remain unaltered. There are no plant design modifications necessary to implement these changes. Consequently, a new failure path cannot exist as a result of the proposed amendment. Since the only resulting change is an improvement in LTOP availability, the current plant safety analyses remain complete and accurate in addressing licensing basis events and analyzing plant response. Therefore, the proposed amendment cannot create the possibility of a new and different kind of accident than previously evaluated.

Each LTOP relief valve has been sized for transients due to simultaneous, inadvertent operation of all three HPSI pumps and all three charging pumps with the pressurizer backup heater in operation. Since the safety injection actuation signal starts only two HPSI pumps, a 20% design margin is recognized for each relief valve. The proposed amendment does not affect any of these design related issues or the performance of the system. All technical content of the safety analyses will be preserved. There will be no change to the physical design or operation of the plant. Consequently, operation of Waterford 3 in accordance with these proposed changes does not involve a significant reduction in the margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room Location: University of New Orleans Library, Louisiana Collection, Lakefront, New Orleans, Louisiana 70122

NRC Project Director: Theodore R. Quay

Entergy Operations Inc., Docket No. 50-382, Waterford Steam Electric Station, Unit 3, St. Charles Parish, Louisiana

Date of amendment request: May 8, 1991

Description of amendment request: The proposed amendment would revise the Technical Specifications (TS) to 1) change the required volume of fuel oil in the diesel oil feed tanks and the separate fuel oil storage tanks, 2) change the minimum value for fuel oil specific gravity and the maximum value for API gravity, 3) clarify that the surveillance is to verify fuel transfer from the fuel storage tank in each train to the oil feed tank of the opposite train via the installed cross connection line, and 4) change the test schedule frequency for diesel generators. The proposed change is partially in response to draft Regulatory Guide 1.9.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

Previously analyzed accidents that are potentially affected by this change are those that postulate the loss of offsite power (LOOP) concurrent with the accident (e.g., a loss of coolant accident with a LOOP). To significantly increase the probability or consequence of such an accident, this change would have to negatively impact the reliability or performance of the EDGs.

The first revision changes the minimum volumes for the diesel oil feed tanks and storage tanks. Slightly increasing the minimum feed tank volume affects the length of time the EDGs can run before the fuel oil transfer pumps are required. This slight increase is conservative with respect to the existing capacity and therefore has no impact.

The reduction of the minimum volume required for the storage tank (from 38,760 to 34,000 gallons) reduces the reserve from a seven day supply to five. If the diesel generator is to be run continuously, there are several sources of diesel oil suppliers within the area. Waterford 3 has purchase agreements with several local suppliers that provide delivery approximately twenty-four hours from the time of request.

These suppliers have more than sufficient quantities in inventory for Waterford 3 purposes. It is improbable that additional fuel oil could not be secured and delivered within five days, even under the most severe weather conditions. Primarily, diesel oil is brought in by truck. Under extremely unfavorable environmental conditions, it is possible to deliver the diesel oil by railroad. Also, it is possible to bring the diesel oil in barges and unload them at the barge loading facility next door at Waterford 1 and 2. As such, interruption of EDG operation following any limiting design basis event or accident is highly unlikely. The reliability and performance of the EDGs are unaffected.

The second revision increases the required minimum specific gravity and conversely reduces the required maximum API gravity for a sample taken from the storage tank. As stated, this more conservative requirement for specific gravity (and API gravity) increases the energy content in a given volume of fuel increasing the EDG run-times. It will not adversely affect the reliability or performance of the EDGs.

The third revision clarifies the description of the surveillance of the flow-paths for the EDG fuel supply. This is requested such that surveillances providing redundant information are not required. Since the revised surveillance assures all possible flow-paths are available (either directly, or by implication) between the EDG fuel storage and feed tanks and does not reduce the intended scope of the surveillance, it will not adversely affect the reliability or performance of the EDGs.

The fourth change redefines surveillance frequencies applicable to the EDGs. It is our understanding that this change is consistent with the NRC's resolution of GI B-58 - Diesel Generator Reliability. Although the intent is to establish a defined level of reliability for a problem EDG before returning its test to a standard frequency, the actual test itself does not affect reliability, nor does it improve EDG performance. However, excessive testing may harm the hardware adversely affecting reliability and performance. Since this change represents a potential reduction in the number of challenges to the system, if anything, there will be an increase in reliability of the EDG and potential improvement in performance.

Based on the above information, these revisions to the TSs will not adversely affect the reliability or performance of the EDGs. Consequently, operation of Waterford 3 in accordance with the proposed changes does not involve a significant increase in the probability or consequence of any accident previously evaluated.

To create a new or different kind of accident, these changes will have to introduce a new failure path. In this regard, these revisions are benign since they do not alter the system or its operation. Redefining the minimum tank volumes does not impact the fuel supply since the reduction is either conservative (in the case of the feed tank) or does not undermine the capability to obtain additional feed supplies in a timely manner. Increasing the restriction on the specific gravity of the fuel oil improves EDG performance without introducing any changes to the system or its operation. The text change to the flow-path surveillance does not diminish the intended scope of the existing surveillance and therefore, does not reduce its effectiveness. The revision to Table 4.8-1, Diesel Generator Test Schedule, to the best or our knowledge is consistent with the next revision of RG 1.9. Again, the scope of this surveillance remains unchanged by the revision to the table; hence, its effectiveness is preserved.

Based on the above information, these changes do not introduce a new failure path and therefore, will not create a new, unevaluated sequence of events. The current plant safety analyses are bounding and this revision will not create the possibility of a new or different kind of accident from any accident previously evaluated.

An adjustment increasing the value for the minimum feed tank volume is insignificant and will not affect operability of the EDGs. However, the changes to the minimum storage tank volume and the restriction on specific gravity (and API gravity) may affect the length of time an EDG can operate without replacement fuel. The gravity requirement is altered to be more conservative, and therefore, will not negatively impact the run time. Decreasing the minimum required volume for the storage tank represents a reduction in fuel oil supply from a seven day reserve to five. This does not impact the availability of the EDGs following any limiting design basis event or accident since this reserve provides adequate time for local suppliers to replenish fuel without interrupting operation of the diesels. As indicated, the text changes to the flow-path surveillance and Table 4.8-1 do not diminish the intended scope of the existing surveillances and therefore, do not impact the intended capability of each EDG to be fueled from the alternate storage tank. The change to the flow-path surveillance provides clarification without altering the intent. In the proposed text it will assure operability of the fuel transfer system by requiring verification of specific paths. The reduction in test frequencies will still provide sufficient determination of reliability with fewer potentially harsh challenges made to the system.

The proposed amendment does not affect any design related issues or the performance of the system. All technical content of the safety analyses are retained and no analysis-based safety margins are affected. There are no changes to the physical design of the plant. Based on this information, operation of Waterford 3 in accordance with the proposed changes does not involve a significant reduction in the margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room Location: University of New Orleans Library, Louisiana Collection, Lakefront, New Orleans, Louisiana 70122

NRC Project Director: Theodore R. Quay

Georgia Power Company, Oglethorpe Power Corporation, Municipal Electric Authority of Georgia, City of Dalton, Georgia, Docket Nos. 50-321 and 50-366, Edwin I. Hatch Nuclear Plant, Units 1 and 2, Appling County, Georgia

Date of amendment request: April 12, 1991

Description of amendment request: The proposed amendments would revise the Hatch Nuclear Plant, Units 1 and 2, Technical Specifications (TSs) as follows. Proposed Change 1 to Unit 2 would revise TS 3/4.4.3, "Reactor Coolant System Leakage," to incorporate the requirements of an NRC Confirmatory Order dated July 8, 1983, and an NRC Safety Evaluation Report (SER) dated February 16, 1990. Proposed Change 2 to Unit 1 would revise TS 3.6.G, "Reactor Coolant Leakage," to reflect NRC's recommendations stated in the February 16, 1990 SER. Proposed Change 3 would revise Unit 1 TS 4.6.K, "Structural Integrity," and Unit 2 TS 4.0.5 to include a paragraph stating the Inservice Inspection (ISI) Program for piping, covered by the scope of Generic Letter (GL) 88-01, is in conformance with the NRC staff position related to schedule, methods and personnel, and sample expansion, except where specific written relief has been granted by the NRC. Also, obsolete material in Unit 2 TS 4.0.5 referencing ASME Section XI requirements prior to the start of commercial operation has been removed.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards

VOL 56 ISS 123 JE 26 1991 UMI

consideration, which is presented below:

Proposed Change 1

1. The proposed change does not significantly increase the probability or consequences of an accident previously evaluated. This change, which was made at the NRC's request, does not involve any physical modifications to the plant and does not affect the operation, maintenance, or testing of the plant. Revising the RCS leakage monitoring interval or reducing the averaging period for checking conformance to limits will not fundamentally change the method, or the fact that RCS leakage is checked on a frequent basis. For these reasons, this change does not significantly increase the probability or consequences of an accident previously evaluated.

2. The proposed change does not create the possibility of a new or different type of accident from any accident previously evaluated. Plant Hatch is analyzed for large, unisolatable leaks in the RCS; leakage is carefully monitored to reduce the probability of this occurring. Since no change is being made to the design, operation, maintenance, or testing of the plant, a new mode of failure is not created. Therefore, a new or different kind of accident will not occur as the result of this change.

3. The proposed change does not significantly reduce a margin of safety. Safety analysis assumptions and equipment performance are not changed, as reflected in the NRC SER dated February 16, 1990. RCS leakage will continue to be carefully monitored.

Proposed Change 2

1. The proposed change does not significantly increase the probability or consequences of an accident previously evaluated. This change, which was made at the NRC's request, does not involve any physical modifications to the plant and does not affect the operation, maintenance, or testing of the plant. Revising the RCS leakage monitoring interval or reducing the averaging period for checking conformance to limits will not fundamentally change the method, or the fact that RCS leakage is checked on a frequent basis. For these reasons, this change does not significantly increase the probability or consequences of an accident previously evaluated.

2. The proposed change does not create the possibility of a new or different type of accident from any accident previously evaluated. Plant Hatch is analyzed for large, unisolatable leaks in the RCS; leakage is carefully monitored to reduce the probability of this occurring. Since no change is being made to the design, operation, maintenance, or testing of the plant, a new mode of failure is not created. Therefore, a new or different kind of accident will not occur as the result of this change.

3. The proposed change does not significantly reduce a margin of safety. Safety analysis assumptions and equipment performance are not changed, as reflected in the NRC SER dated February 16, 1990.

RCS leakage will continue to be carefully monitored.

Proposed Change 3

1. The proposed change will not significantly increase the probability or consequences of an accident previously evaluated. This change, which was made at the NRC's request, simply restates the wording of GL 88-01 relative to ISI. No changes to Plant Hatch ISI practices or methods are being made. This change does not involve any physical modifications to the plant and does not affect the operation, maintenance, and testing of the plant. Deleting the portion of existing Unit 2 TS 4.0.5, which reflected inservice inspection and testing requirements prior to commercial operation, will have no impact, since both units have been operating for several years and follow the applicable 10 CFR 50.55e(g) requirements. For these reasons, the response of the plant to previously evaluated accidents will remain unchanged.

2. The proposed change does not create the possibility of a new or different type of accident from any accident previously evaluated. Since no change is being made to the design, operation, maintenance, or testing of the plant, a new mode of failure is not created. Therefore, a new or different kind of accident will not occur as the result of this change.

3. The proposed change does not significantly reduce a margin of safety. Safety analysis assumptions and equipment performance are not changed, as reflected in the NRC SER dated February 16, 1990.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Appling County Public Library, 301 City Hall Drive, Baxley, Georgia 31513

Attorney for licensee: Bruce W. Churchill, Esquire, Shaw, Pittman, Potts and Trowbridge, 2300 N Street, NW., Washington, DC 20037.

NRC Project Director: David B. Matthews

Georgia Power Company, Oglethorpe Power Corporation, Municipal Electric Authority of Georgia, City of Dalton, Georgia, Docket Nos. 50-321 and 50-366, Edwin I. Hatch Nuclear Plant, Units 1 and 2, Appling County, Georgia

Date of amendment request: June 13, 1991

Description of amendment request: The proposed amendments would revise Hatch Units 1 and 2 Technical Specifications (TSs) as follows. Proposed Change 1 would revise (a) Unit 1 TS 3.10.D, Unit 2 TS 3/4.9.10 and their associated bases to require at least 21 feet of water above irradiated fuel assemblies seated in the spent fuel pool (SFP) fuel storage racks; and (b) Unit 1 TS 4.10.D to require surveillance of the SFP water level every 7 days consistent with Unit 2 TSs and the BWR-4 Standard TSs. Proposed Change 2 would revise Unit 1 TS Tables 3.2-11 and 4.2-11 to require that the post-LOCA radiation monitors be calibrated at least once every 18 months. Proposed Change 3 would correct administrative errors in Unit 2 TS Tables 3.3.2-1 and 3.8.2.6-1.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration. The NRC staff has reviewed the licensee's analysis against the standards of 10 CFR 50.92(c). The NRC staff review is presented below.

Proposed Change 1

1. The proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated. The licensee's calculation of exposures at the exclusion area and low population zone boundaries determined that the thyroid doses would be .358 and .370 rem, respectively, when 21 feet of water covers the top of the upper tie plates of irradiated fuel seated in the SFP storage racks. This compares to .256 and .264 rem, respectively, when the water depth is 23 feet. Thus, there is only a slight increase in the calculated radiological consequences of the fuel handling accident. However, these exposures are still far below the NRC acceptance criteria for thyroid dose of 75 rems.

Changing the Unit 1 surveillance requirement for determining the SFP water level from daily to weekly will not significantly reduce the margin of safety because the radiological consequences of a fuel handling accident in the SFP will not exceed the acceptance limit for that event even when the pool level is as low as its low level alarm.

2. The proposed change does not create the possibility of a new or different kind of accident from any accident previously evaluated.

The TS revision does not change the physical configuration of the plant or alter the mode of operation or setpoints of any equipment in the plant nor will it result in any changes to the plant procedures except the Unit 1 surveillance interval (for determining the SFP water level) from once per day to once per week.

3. The proposed change does not involve a significant reduction in a margin of safety. Based on the discussion in items 1 and 2 above, the decrease in the margin of safety is very slight.

Proposed Change 2

1. The proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated. The proposed revision to Unit 1 TSs to require that the radiation monitor be calibrated at least once every 18 months would maintain consistency with Unit 2 TSs and the NRC BWR-4 STS. The licensee has reviewed field data of these monitors over two successive 18-month calibrations and found that they did not drift outside their acceptance range.

2. The proposed change does not create the possibility of a new or different kind of accident from any accident previously evaluated.

The post-LOCA radiation monitors are considered a passive portion of radiation control because they do not actively handle or control radiation hazards but only provide alarm capability.

3. The proposed change does not involve a significant reduction in a margin of safety.

Based on the discussion in items 1 and 2 above, the decrease in the margin of safety is very slight.

Proposed Change 3

The proposed change would correct administrative errors in Unit 2 TS Tables 3.3.2-1 and 3.8.2.6-1. This correction does not affect the Final Safety Analysis Report analyses or plant operation. Therefore, the proposed change does not significantly increase the probability or consequences of an accident previously evaluated, does not create the possibility of a new or different kind of accident from any accident previously evaluated, and does not significantly reduce a margin of safety.

Based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Appling County Public Library, 301 City Hall Drive, Baxley, Georgia 31513

Attorney for licensee: Bruce W. Churchill, Esquire, Shaw, Pittman, Potts and Trowbridge, 2300 N Street, NW., Washington, DC 20037.

NRC Project Director: David B. Matthews

Georgia Power Company, Oglethorpe Power Corporation, Municipal Electric Authority of Georgia, City of Dalton, Georgia, Docket Nos. 50-424 and 50-425, Vogtle Electric Generating Plant, Units 1 and 2, Burke County, Georgia

Date of amendment request: May 3, 1991

Description of amendment request: The proposed amendments would add a footnote to Technical Specification (TS) 3.6.3, "Containment Isolation Valves," stating that isolation valves associated with the containment hydrogen monitors may be opened on an intermittent basis under administrative control.

Basis for proposed no significant hazards consideration determination: Technical Specification 3.6.3 does not permit containment isolation valves to be opened while the plant is in Modes 1, 2, 3, or 4. The effect of the proposed change would be to permit containment isolation valves in the suction and discharge lines of the containment hydrogen monitors to be opened on an intermittent basis under administrative control. This would facilitate periodic operability tests of the hydrogen monitors required by TS 4.6.4.1. Opening the valves to perform these tests allows verification of the flowpath as well as the flowrate delivered by the hydrogen monitor pump. The proposed TS change would also permit testing of the post-accident sampling system (PASS) regarding sampling of the containment atmosphere.

The Westinghouse Standard TSs contain a footnote permitting certain valves to be opened periodically under administrative control. The licensee notes that this provision was inadvertantly omitted during preparation of the Vogtle TSs.

As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

Opening of the containment isolation valves associated with the containment hydrogen monitors on an intermittent basis under administrative control does not significantly increase the probability or consequences of accidents previously evaluated. The hydrogen monitoring system is designed as a Class 1E, Seismic Category 1 system, and is designed to retain its integrity under all conditions following a DBA [Design Basis Accident]. In addition, the essential portions of the PASS are designed to Seismic Category 1 requirements and the PASS is designed to function under post-accident conditions. Opening of the subject valves will be administratively controlled, consistent with the intent of the Westinghouse Standard Technical Specifications. The post-accident processing system, which includes the containment hydrogen monitoring system and the PASS, is subject to regular leakage assessment in accordance with Technical Specifications 6.7.4.a.5 to reduce leakage from those portions of systems outside containment that could contain highly radioactive fluids during serious transients or accidents. Accordingly, the radiological consequences for any accident previously reviewed and approved associated with the plant licensing basis are not significantly increased by the proposed change. Therefore, this change will not significantly increase the probability or consequences of accidents previously evaluated.

The opening of the containment isolation valves associated with the containment hydrogen monitors, as well as the PASS, on an intermittent basis under administrative control will not create the possibility of a new or different kind of accident from any previously evaluated. New failure modes have not been defined for any system or component important to safety nor has any new limiting single failure been identified as a result of the proposed change. Therefore, the proposed change does not create the possibility of a new or different kind of accident [from those] previously evaluated in the FSAR [Final Safety Analysis Report].

The margin of safety provided in the bases to any Technical Specification is not significantly reduced because the post-accident processing system, which includes the containment hydrogen monitors and the PASS, has been demonstrated to be capable of withstanding the post-accident environment inside containment. Therefore, containment integrity will not be adversely impacted. Opening of the containment isolation valves associated with the containment hydrogen monitors on an intermittent basis under administrative control is consistent with the intent of the Westinghouse Standard Technical Specifications. Therefore, the current level of safety associated with containment integrity and with the containment hydrogen monitors will not be diminished by the proposed Technical Specification revision.

The Commission's staff has reviewed the licensee's analysis, and based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the Commission's staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Burke County Public Library, 412 Fourth Street, Waynesboro, Georgia 30830.

Attorney for licensee: Mr. Arthur H. Domby, Troutman, Sanders, Lockerman and Ashmore, Candler Building, Suite 1400, 127 Peachtree Street, NE., Atlanta, Georgia 30043.

NRC Project Director: David B. Matthews

Georgia Power Company, Oglethorpe Power Corporation, Municipal Electric Authority of Georgia, City of Dalton, Georgia, Docket Nos. 50-424 and 50-425, Vogtle Electric Generating Plant, Units 1 and 2, Burke County, Georgia

Date of amendment request: June 3, 1991

Description of amendment request: The proposed amendments would modify Technical Specification (TS) 5.3.1 which specifies that "The core shall contain 193 fuel assemblies with each

VOL
56
ISS
123
JE
26
1991
UMI

fuel assembly containing 204 fuel rods clad with Zircaloy-4". This sentence would be supplemented by adding, "except for two fuel assemblies which may each contain up to twelve (12) fuel rods clad with ZIRLO™."

Basis for proposed no significant hazards consideration determination:

The proposed change would allow the use of two fuel assemblies, each containing up to 12 fuel rods clad with ZIRLO™ rather than Zircaloy-4, to test the cladding's improved corrosion-resistant performance under Vogtle-specific reactor conditions. As part of its long-term fuel management strategy, the licensee plans to load the two fuel assemblies containing selected fuel rods clad with ZIRLO™ during the refueling outage for Vogtle Unit 1's fuel cycle 4, which is scheduled during the fourth quarter of 1991. The two fuel assemblies will be of the VANTAGE-5 variety manufactured by Westinghouse. The licensee's proposed changes and plans to use VANTAGE-5 fuel were discussed in a previous Federal Register notice (56 FR 20037, dated May 1, 1991) and are outside the scope of this notice.

ZIRLO™ is the trademark for an advanced zirconium alloy cladding material. It is chemically similar to Zircaloy-4 but contains slightly reduced amounts of tin, iron, chromium, and zirconium and includes the addition of one percent niobium to improve waterside corrosion and hydriding properties. Test assemblies of fuel rods clad with ZIRLO™ have shown improved corrosion and hydriding, and lower clad irradiation growth and creepdown compared to Zircaloy-4 cladding. Two demonstration fuel assemblies with ZIRLO™ fuel clad rods began irradiation in the North Anna Unit 1 reactor in June 1987. As reflected in Westinghouse Report WCAP-12610 dated June 1990, evaluations have been performed with an NRC approved fuel rod performance code (WCAP-10851-P-A, August 1988) to verify that the fuel rod design bases and design criteria are met for assemblies containing ZIRLO™ cladding.

As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

The probability or consequences of an accident previously evaluated are not significantly increased. The two VANTAGE-5 fuel assemblies containing selected ZIRLO™ clad fuel rods meet the same fuel assembly and fuel rod design bases ... as other VANTAGE-5 fuel assemblies in the same fuel region. In addition, the 10 CFR 50.46 criteria will be applied to the ZIRLO™ clad fuel rods. The use of these two fuel assemblies will not result in a change in the proposed Vogtle VANTAGE-5 reload design and safety analysis limits ... Since the original design criteria is being met, the ZIRLO™ clad fuel rods will not be an initiator for any new accident. The ZIRLO™ clad material is similar in chemical composition and has similar physical and mechanical properties as that of Zircaloy-4. Thus, the cladding integrity is maintained and the structural integrity of the fuel assembly is not effected. The ZIRLO™ clad fuel rod improves corrosion performance and dimensional stability. No concerns have been identified with respect to the use of an assembly containing a combination of both Zircaloy-4 and selected ZIRLO™ clad fuel rods. Since the dose predictions in the Vogtle safety analyses are not sensitive to the fuel rod cladding material used, the radiological consequences of accidents previously evaluated in the Vogtle safety analyses remain valid. Therefore, the probability or consequences of an accident previously evaluated are not significantly increased.

The possibility of a new or different kind of accident from any accident previously evaluated is not created since the two VANTAGE-5 fuel assemblies containing selected ZIRLO™ clad fuel rods will satisfy the same design bases ... as that used for other VANTAGE-5 fuel assemblies in the same fuel region. All design and performance criteria will continue to be met and no new single failure mechanisms have been defined. In addition, the use of the two fuel assemblies does not involve any alterations to plant equipment or procedures which would introduce any new or unique operational modes or accident precursors. Therefore, the possibility for a new or different kind of accident from any accident previously evaluated is not created.

The margin of safety is not significantly reduced, since the two VANTAGE-5 fuel assemblies containing selected ZIRLO™ clad fuel rods do not change the proposed Vogtle VANTAGE-5 reload design and safety analysis limits ... The use of the two fuel assemblies will take into consideration the normal core operating conditions allowed for in the Technical Specifications. For each cycle reload core, the two fuel assemblies will be specifically evaluated using standard reload design methods ... and approved fuel rod design models and methods ... This will include consideration of the core physics analysis peaking factors and core average linear heat rate effects. Therefore, the margin of safety as defined in the bases to the Vogtle Technical Specifications and VANTAGE-5 Licensing Amendment Request [i.e., the licensee's letter of November 29, 1990] ... is not significantly reduced.

The Commission's staff has reviewed the licensee's analysis, and based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the Commission's staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Burke County Public Library, 412 Fourth Street, Waynesboro, Georgia 30830.

Attorney for licensee: Mr. Arthur H. Domby, Troutman, Sanders, Lockerman and Ashmore, Candler Building, Suite 1400, 127 Peachtree Street, NE., Atlanta, Georgia 30043.

NRC Project Director: David B. Matthews

Northeast Nuclear Energy Company, et al., Docket No. 50-423, Millstone Nuclear Power Station, Unit No. 3, New London County, Connecticut

Date of amendment request: June 6, 1991

Description of amendment request: The proposed amendment would change Millstone Unit 3 Technical Specification (TS) 3/4.6.4.2, "Electric Hydrogen Recombiners" to replace TS Figure 3.6.2, "Hydrogen Recombiner Acceptance Criteria Flow vs. Containment Pressure" with a series of equations to be incorporated in plant procedures. In addition, the hydrogen recombiner temperature and flow requirements, currently addressed in TS 4.6.4.2.b.4, would be addressed in proposed TS 4.6.4.2.b.4 and 4.6.4.2.b.5, respectively.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below: The proposed changes do not involve a significant hazards consideration because the changes would not:

1. Involve a significant increase in the probability or consequences of an accident previously analyzed.

The new proposed Section 4.6.4.2.b.5 will continue to verify the capability of the hydrogen recombiner to meet design basis analysis assumptions. The appropriate plant procedures are in place to ensure that the hydrogen recombiners are placed in service within 24 hours of a LOCA. Therefore, it is concluded that the LOCA and its consequences as analyzed remain valid. Since no physical modifications are proposed, the probability of a LOCA is not affected. The surveillance requirement related to verification of the gas temperature (Section 4.6.4.2.b.4) has been separated from the flow rate verification and this change does not reduce the effectiveness of the technical specifications. The change to the Technical Specification Index has no impact on the consequences or the probability of an accident previously analyzed.

2. Create the possibility of a new or different kind of accident from any previously analyzed.

The proposed changes to Sections 4.6.4.2.b.4 and 4.6.4.2.b.5 and the Technical Specification Index do not impact the plant response to a LOCA.

Since there are no changes in the way the plant is operated, the potential for an unanalyzed accident is not created, and no new failure modes are introduced.

3. Involve a significant reduction in the margin of safety.

The proposed changes do not increase the consequences of any accidents as the hydrogen concentration is maintained below 4 percent. Also, none of the protective boundaries are affected. The performance level of the hydrogen recombiners assured by the proposed surveillance requirements along with the appropriate plant procedures maintain the margin of safety as defined in the existing and proposed technical specifications.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Learning Resources Center, Thames Valley State Technical College, 574 New London Turnpike, Norwich, Connecticut 06360.

Attorney for licensee: Gerald Garfield, Esquire, Day, Berry & Howard, City Place, Hartford, Connecticut 06103-3499.

NRC Project Director: John F. Stolz

Portland General Electric Company, et al., Docket No. 50-344, Trojan Nuclear Plant, Columbia County, Oregon

Date of amendment request: June 7, 1991

Description of amendment request: This license change application proposes new surveillance values for emergency core cooling system pumps flow rates. The proposed changes are consistent with accident analysis and pump performance requirements, and allow margin for measurement uncertainty. Also, new surveillance requirements are added to ensure that the accident analyses assumptions are met.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensees have provided their analysis of the issue of no significant hazards consideration, which is presented below:

1.Does the proposed license change involve a significant increase in the probability or consequences of an accident previously evaluated?

The change to ECCS flow rate does not affect parameters related to the initiation of an accident, hence the probability of an accident is not increased. The consequences of an accident previously evaluated are not increased because the input to dose calculations are not adversely affected by the proposed changes to the ECCS surveillance test ranges as demonstrated by the accident analysis results. The effect of the proposed change on the FSAR accident analysis results has been evaluated and it is shown that the effect of the change is bounded by previously reported results.

The 9GTR transient does not adversely affect the possibility of steam generator overfill. The open miniflow configuration will decrease the injected flow and decrease reactor coolant flow out of the ruptured tube.

The proposed lower limit of the ECCS surveillance flow testing has been demonstrated by analysis to provide adequate ECCS flow to cool the core.

The Containment response evaluation shows that the Containment pressure does not exceed its design limit and Containment integrity is not challenged.

Therefore, the probability of occurrence and the consequences of any previously evaluated accidents that credit the ECCS are not increased.

2. Does the proposed license change create the possibility of a new or different kind of accident from any accident previously analyzed?

The proposed changes in ECCS surveillance test flow requirements do not introduce new features into the Plant such that a new or different type of accident or malfunction is created. The results of the previously analyzed FSAR Chapter 6 and 15 accidents and transients envelope the conditions and loads which could arise due to operation of CCP or SIP systems consistent with the proposed Technical Specification changes. No new failure mode or limiting single failure is created as a result of these changes. Therefore, this change does not create the possibility of a new or different kind of accident from any previously analyzed.

3. Does the proposed license change involve a significant reduction in a margin of safety?

The changes do not adversely affect the margin of safety as defined in the Bases of the TTS. The change to the maximum SIP flowrate is not a reduction to the margin of safety since the maximum flow is within vendor recommended limits. In summary, the margin of safety with respect to Plant safety as potentially affected by the proposed increase in the Technical Specification ECCS surveillance test range is provided, in part, by the safety factors included in the design of the pumps and by the conservatism inherent in the accident analysis acceptance criteria (peak clad temperature, minimum DNBR, etc.).

With respect to FSAR Section 6.2, the Containment integrity analyses considered in the licensing basis, the conclusion derived from the evaluation is that the acceptance criteria continue to be met with the revised ECCS performance characteristics.

Therefore, the margin of safety as defined in the basis of any Technical Specification is not significantly reduced.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Branford Price Millar Library, Portland State University, 934 S.W. Harrison Street, P.O. Box 1151, Portland, Oregon 97207

NRR Project Director: James E. Dyer

Power Authority of the State of New York, Docket No. 50-333, James A. FitzPatrick Nuclear Power Plant, Oswego, New York

Date of amendment request: May 30, 1990 and supplemented on April 18, 1991.

Description of amendment request: The proposed amendment would update two tables to reflect the installation of new post-accident monitoring instrumentation. Instruments installed to satisfy the requirements of Regulatory Guide 1.97 would be added to Table 3.2-8, "Accident Monitoring Instrumentation," and to Table 4.2-8, "Minimum Test and Calibration Frequency for Accident Monitoring Instrumentation." In addition, Table 3.2-6, "Surveillance Instrumentation," Table 4.2-6, "Minimum Test and Calibration Frequency for Surveillance Instrumentation," and Table 4.7-1, "Minimum Test and Calibration Frequency for Containment Monitoring Systems," would be deleted, since the function and requirements of the old instrumentation are effectively superseded by the new, more qualified instrumentation included in the revised Tables 3.2-8 and 4.2-8. Deletion of these tables would also result in deletion of Specifications 3.2.F and 4.2.F which refer to Tables 3.2-6 and 4.2-6, respectively. Three Table 3.2-6 plant parameters will continue to be monitored in the revised Table 3.2-8. These parameters are narrow range torus water level, drywell-torus differential pressure, and safety/relief valve (SRV) position indication. Narrow range torus water level instrumentation is used to meet the water level requirements of Specifications 3.7.A.1.a and b and the surveillance requirement of Specification 4.7.A.1. Since this instrumentation does not monitor a Regulatory Guide (RG) 1.97 Category A variable, a reference is made to the new note "C." This instrument, although not a "post-accident monitoring" instrument, is being retained because it is part of the "Mark I Containment Short Term Improvement" instrumentation. Drywell-Torus differential pressure (dp) instrumentation is used to meet the dp requirement of Specification 3.7.A.7 and

VOL
56
ISS
123
JE
26
1991
UMI

the surveillance requirement of Specification 4.7.A.7. Since this instrumentation does not monitor a RG 1.97 Category A variable, a reference is made to the new note "G." This instrument is also being retained because it is part of the "Mark I Containment Short Term Improvement" instrumentation. The SRV position indication instrumentation was added to Tables 3.2-6 and 4.2-6 in Amendment No. 57 to the Technical Specifications (TSs) to incorporate certain of the TMI-2 "Lessons Learned Category 'A'" requirements of NUREG-0578. Therefore, this item and its associated notes and surveillance requirements will be retained and relocated to the revised Tables 3.2-6 and 4.2-6.

Three Table 3.2-6 plant parameters will not be monitored in the revised Table 3.2-6. These parameters, narrow range reactor water level, control rod position indication, and neutron monitoring have alternate requirements which will assure that the instrumentation remains operable. Narrow range reactor water level instrumentation is used during plant operations for proper operation of the feedwater control system. Reactor water level indication is also provided by the overlapping range of the RG 1.97 wide range reactor water level instrumentation as required by Table 3.2-6. Control rod position indication is required by TS 3.3.A.2.d as a condition for control rod operability. This instrument check is being retained in a new TS 4.3.A.2.f. The frequency of this surveillance is being changed to once/day to be consistent with the Standard Technical Specifications. Neutron monitoring instrumentation operability requirements are specified in Table 3.1-1, Table 3.2-3, and TS 3.3.B.4.

One of the existing Table 3.2-6 plant parameters will be removed from the revised table. This parameter, drywell water level, is not a RG 1.97 Category A variable and, therefore, should not be included in Table 3.2-6.

The applicable instrument ranges are no longer included in TS Table 3.2-6. Commitments made by the licensee with regard to implementation of RG 1.97 and Generic Letter 83-36 assure that the Table 3.2-6 plant parameters will continue to be measured and indicated in the control room to the full range as reviewed and approved by the NRC. This change is consistent with the Standard Technical Specifications.

The proposed change would also modify Action A of Table 3.2-6 to no longer permit the use of alternate monitoring methods when the number of operable instrument channels are less than the required minimum. Other proposed changes are administrative in nature.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

Operation of the FitzPatrick plant in accordance with the proposed Amendment would not involve a significant hazards consideration as defined in 10 CFR 50.92, since it would not:

1. Involve a significant increase in the probability or consequences of an accident previously evaluated.

The proposed changes reflect the installation of new control room instrumentation. This new instrumentation has no automatic control functions and cannot initiate any type of plant transient or accident. This instrumentation provides a highly reliable and environmentally qualified source of vital plant information in the control room. The changes ensure that instrumentation that would be necessary to mitigate accident conditions will be available in the control room. Requirements for instrument operability and surveillance cannot increase in the probability or consequences of a previously evaluated accident.

2. create the possibility of a new or different kind of accident from any accident previously evaluated.

As stated above, the proposed changes reflect the installation of new control room instrumentation which have no automatic control functions. This modification to the plant cannot initiate or contribute to any new or different kind of accident from any accident previously evaluated.

3. involve a significant reduction in a margin of safety.

The proposed change provides operability and surveillance requirements for instrumentation qualified for post-accident seismic and environmental conditions. This provides a greater assurance that control room operators will have access to vital plant information under accident conditions. This represents an increase in the level of protection provided by the FitzPatrick plant. The operability and surveillance requirements for the new instrumentation are consistent with those previously approved for post-accident instrumentation at the FitzPatrick plant. Instrumentation deleted as part of these changes have other Technical Specification requirements which assure their operability or do not fulfill a safety-related function. The proposed changes do not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: State University of New York, Penfield Library, Reference and Documents Department, Oswego, New York 13126.

Attorney for licensee: Mr. Charles M. Pratt, 1633 Broadway, New York, New York 10019.

NRC Project Director: Robert A. Capra

South Carolina Electric & Gas Company, South Carolina Public Service Authority, Docket No. 50-395, Virgil C. Summer Nuclear Station, Unit No. 1, Fairfield County, South Carolina

Date of amendment request: June 3, 1991

Description of amendment request: The proposed change would relocate the procedural details of the Radiological Effluent Technical Specifications (RETS) to the Offsite Dose Calculation Manual (ODCM) and relocate the procedural details for solid radioactive wastes to the Process Control Program (PCP). This request is in accordance with Generic Letter 89-01.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below.

The licensee has determined that the proposed amendment will not:

1. Involve a significant increase in the probability or consequences of any accident previously evaluated because no plant equipment has been changed. The proposed [Technical Specification] TS change does not reduce the level of radiological effluent control. It will provide programmatic controls for RETS consistent with regulatory requirements and allow relocation of the procedural details of the current RETS to the ODCM and PCP. These procedural details are not required to be in the TS by 10CFR50.36a. Future changes to these procedural details will be controlled by the ODCM and PCP Administrative Controls sections of the TS.

Records of reviews performed for changes made to the ODCM and PCP will be documented and retained for the duration of the operating license. Therefore, it is concluded that operation of the facility in accordance with this proposed change will not involve a significant increase in the probability or consequences of an accident previously evaluated.

2. Create the possibility of a new or different kind of accident from any previously evaluated. This proposed amendment does not modify the configuration of the facility or its mode of operation. Therefore, the proposed change will not create the possibility of a new or different kind of accident from any previously identified.

3. Involve a significant reduction in a margin of safety. The proposed change does not affect the operation of the facility nor modify any method of radiological effluent monitoring or analysis. Therefore, it is concluded that operation of the facility in accordance with this proposed change will not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis; and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Fairfield County Library, Garden and Washington Streets, Winnsboro, South Carolina 29180

Attorney for licensee: Randolph R. Mahan, South Carolina Electric & Gas Company, P.O. Box 764, Columbia, South Carolina 29218

NRC Acting Project Director: Anthony J. Mendiola

Tennessee Valley Authority, Docket No. 50-327, Sequoyah Nuclear Plant, Unit 1, Hamilton County, Tennessee

Date of amendment request: May 24, 1991 (TS 91-04)

Description of amendment request: The proposed amendment would lower the steam generator low-low water level trip setpoints associated with the Reactor Trip System and the Engineered Safety Features Actuation System specified in the Technical Specifications (TS) for the Sequoyah Nuclear Plant, Unit 1. The proposed setpoint changes reflect the improved instrument accuracy resulting from replacement of the present unmodified Barton level transmitters with modified level transmitters. This improved accuracy results from modifications made to them by the manufacturer which eliminates errors associated with environmental heatup and subsequent cooling of the reference legs. This change will occur during the 1991 refueling outage.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration which is presented below:

TVA has evaluated the proposed technical specification (TS) change and has determined that it does not represent a significant hazards consideration based on criteria established in 10 CFR 50.92(c).

Operation of Sequoyah Nuclear Plant in accordance with the proposed amendment will not:

1. Involve a significant increase in the probability or consequences of an accident previously evaluated.

The modified transmitters are the same model as the existing transmitters but have been modified to provide increased accuracy under thermal heatup and cooldown evolutions to improve repeatability. They perform the same function in the same manner with only the accuracy being improved to ensure identification of an accident condition with the revised setpoints. This will provide accident mitigation initiations at the appropriate time to limit the consequences of the event as assumed in the safety analysis. These transmitters are not a device that could create an accident, but instead identify conditions associated with an accident to initiate logic for accident migitation. Therefore, the installation of the modified steam generator level transmitters and revision of the steam generator lo-lo level trip setpoints will not increase the probability or consequences of an accident.

2. Create the possibility of a new or different kind of accident from any previously analyzed.

The steam generator level transmitters and associated trip setpoints are not a source for any accident. They provide actuation of mitigation logic for specific accident parameters. Therefore, this change cannot create any new or different kind of accident.

3. Involve a significant reduction in a margin of safety.

The reduction in the steam generator lo-lo level trip setpoints is the result of the improved accuracy of the modified steam generator level transmitters. This improved accuracy allows the use of a lower setpoint and still maintains the same level of confidence of accident condition identification without reducing the existing margin of safety. This is accomplished by only reducing the instrument inaccuracy values and not the margin of safety limits to allow the lower setpoints. Therefore, there is no reduction in the margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Chattanooga-Hamilton County Library, 1101 Broad Street, Chattanooga, Tennessee 37402

Attorney for licensee: General Counsel, Tennessee Valley Authority, 400 West Summit Hill Drive, E11 B33, Knoxville, Tennessee 37902.

NRC Project Director: Frederick J. Hebdon

Tennessee Valley Authority, Docket Nos. 50-327 and 50-328, Sequoyah Nuclear Plant, Units 1 and 2, Hamilton County, Tennessee

Date of amendment request: May 24, 1991 (TS 91-06)

Description of amendment request: The proposed amendment would revise the visual snubber inspection schedule described in the Technical Specifications (TS) for Sequoyah Nuclear Plant, Units 1 and 2, in accordance with Generic Letter 90-09, "Alternative Requirements for Snubber Visual Inspection Intervals and Corrective Actions," issued December 11, 1990; delete the 50 percent drag force limits from the acceptance criteria for snubber functional tests in Specification 4.7.9.e.3; delete the requirement in the Bases Section relating to Plant Operations Review Committee approval of changes to the snubber accessibility list; and incorporate certain other related terminology changes related to this issue.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration which is presented below:

TVA has evaluated the proposed technical specification (TS) changes and has determined that they do not represent a significant hazards consideration based on criteria established in 10 CFR 50.92(c). Operation of Sequoyah Nuclear Plant (SQN) in accordance with the proposed amendment will not:

1. Involve a significant increase in the probability or consequences of an accident previously evaluated.

The proposed wording changes to [Surveillance Requirement] SR 4.7.9.e resulted from a need for clearer definition of the snubber visual and functional testing program. The proposed change to SR 4.7.9.e.3 does not involve a significant increase in the probability or consequences of an accident previously evaluated. This SR addresses the operability of a snubber. During the functional test, the mechanical snubber may display an increase of 50 percent or more in drag force and still remain within its design limits. This increase in drag force for mechanical snubbers displays a trend. This trending is addressed in SR 4.7.9.i where the approach to "end of service life" is required to be tabulated and reviewed.

The proposed schedule for visual inspection of snubbers was developed by NRC and published in Generic Letter (GL) 90-09, "Alternative Requirements For Snubber Visual Inspection Intervals and Corrective Actions." The operability of snubbers is predominately determined by functional testing for which SQN has an approved program. Based upon the Brookhaven National Laboratory report reviewed by NRC, very few snubbers were found inoperable because of the visual inspection; and accordingly, NRC justified a revised schedule for visual inspections. Since the testing program and inspection still provide the appropriate confidence level of operability, there is no significant increase in the probability or consequences of an accident previously analyzed.

2. Create the possibility of a new or different kind of accident from any previously analyzed.

Based upon GL 90-09, NRC has addressed these proposed changes to the visual inspection program, and the confidence level for operability remains the same.

VOL 56 ISS 123 JE 26 1991 UMI

Additionally, the other changes in the SRs do not affect operability. These changes do not alter any plant operations, maintenance requirement, or system design or functions. Therefore, no new or different accidents are created from the proposed change.

3. Involve a significant reduction in a margin of safety.

The proposed change in the visual inspection program for snubbers does not make modifications to the plant or revise its mode of operation or the present safety analysis. As previously described with the proposed changes to the SRs, the confidence level for snubber operability remains the same; therefore, there is no significant reduction in any safety margin.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Chattanooga-Hamilton County Library, 1101 Broad Street, Chattanooga, Tennessee 37402

Attorney for licensee: General Counsel, Tennessee Valley Authority, 400 West Summit Hill Drive, E11 B33, Knoxville, Tennessee 37902.

NRC Project Director: Frederick J. Hebdon

Toledo Edison Company, Centerior Service Company, and The Cleveland Electric Illuminating Company, Docket No. 50-346, Davis-Besse Nuclear Power Station, Unit No. 1, Ottawa County, Ohio

Date of amendment request: May 31, 1991

Description of amendment request: The amendment would revise Technical Specification 5.3.1, "Fuel Assemblies," to allow the removal of defective fuel rods or the replacement of defective fuel rods with stainless steel or zircaloy filler rods.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration. The NRC staff has reviewed the licensee's analysis against the standards of 10 CFR 50.92(c). The staff's review is presented below:

1. The proposed change will not involve a significant increase in the probability or consequences of an accident previously evaluated because approved methodologies will be used to determine core performance and accident response. Core performance and accident response will be bounded by the cycle-specific reload analysis which will assure that there is no significant increase in the radiological consequences of previously evaluated accidents.

2.The proposed change will not create the possibility of a new or different kind of accident from any previously evaluated accident because fuel performance parameters are not being changed, and because Technical Specifications concerning the nuclear heat flux hot channel factor, the nuclear enthalpy rise hot channel factor, the quadrant power tilt, and the departure from nucleate boiling parameters are not being changed.

3.The proposed change will not involve a significant reduction in a margin of safety because the removal or replacement of defective fuel rods will be bounded by cycle specific reload analysis using approved methodologies. Therefore, conformance to existing design criteria and safety analysis limits will be confirmed for modified fuel assemblies.

Based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: University of Toledo Library, Documents Department, 2801 Bancroft Avenue, Toledo, Ohio 43606.

Attorney for licensee: Gerald Charnoff, Esquire, Shaw, Pittman, Potts and Trowbridge, 2300 N Street, N.W., Washington, DC 20037.

NRC Project Director: John N. Hannon

Toledo Edison Company, Centerior Service Company, and The Cleveland Electric Illuminating Company, Docket No. 50-346, Davis-Besse Nuclear Power Station, Unit No. 1, Ottawa County, Ohio

Date of amendment request: June 4, 1991

Description of amendment request: The amendment would remove from Technical Specifications operability requirements for decay heat isolation valve interlock channels and pressurizer heater interlock channels in Modes 4 (hot shutdown) and 5 (cold shutdown).

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration which is presented below:

Toledo Edison had reviewed the proposed change and determined that a significant hazards consideration does not exist because operation of the Davis-Besse Nuclear Power Station, Unit 1, in accordance with these changes would:

1a. Not involve a significant increase in the probability of an accident previously evaluated because the same level of protection is being provided as before.

1b. Not involve a significant increase in the consequences of an accident previously evaluated because the plant response to an overpressure condition will be unchanged.

2a. Not create the possibility of a new kind of accident from an accident previously evaluated because no new failure modes are introduced, and therefore, no new accident scenarios can be postulated.

2b. Not create the possibility of a different kind of accident from any accident previously evaluated because there are no different accidents postulated from those previously evaluated.

3. Not involve a significant reduction in a margin of safety since the overpressure protection of the DHR system and the RCS will be preserved.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: University of Toledo Library, Documents Department, 2801 Bancroft Avenue, Toledo, Ohio 43606.

Attorney for licensee: Gerald Charnoff, Esquire, Shaw, Pittman, Potts and Trowbridge, 2300 N Street, N.W., Washington, DC 20037.

NRC Project Director: John N. Hannon

Wisconsin Electric Power Company, Docket Nos. 50-266 and 50-301, Point Beach Nuclear Plant, Unit Nos. 1 and 2, Town of Two Creeks, Manitowoc County, Wisconsin

Date of amendments request: July 31, 1990

Description of amendments request: The licensee proposed amending Technical Specification 15.4.1, OPERATIONAL SAFETY REVIEW, by revising Table 15.4.1-1, Minimum Frequencies for Checks, Calibrations, and Test of Instrument Channels. Specifically the requirements for Channel Number 11, Steam Generator Level, would be changed by adding a remark that the requirement includes a monthly test of logic for high steam generator level.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration. The NRC staff has reviewed the licensee's analysis against the standards of 10 CFR 50.92(c). The staff's review is presented below:

The proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated because the change is limited to adding a testing requirement to an instrument channel. The testing of the instrument channels does not enter into the postulation of accident scenarios.

The proposed change does not create the possibility of a new or different kind of accident from any previously evaluated because, again, the change is limited to adding a testing requirement and the testing requirements do not enter into the postulation of accident scenarios.

The proposed change does not involve a significant reduction in a margin of safety because the addition of the test to the Technical Specifications increases the reliability of the instrumentation channel. The licensee has stated that its existing testing program includes the logic test. However it acknowledges that including the requirement in the Technical Specifications adds assurance that the testing will be done.

Based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Joseph P. Mann Library, 1516 Sixteenth Street, Two Rivers, Wisconsin.

Attorney for licensee: Gerald Charnoff, Esq., Shaw, Pittman, Potts and Trowbridge, 2300 N Street, N.W., Washington, D.C. 20037.

NRC Project Director: John N. Hannon.

Wisconsin Electric Power Company, Docket Nos. 50-266 and 50-301, Point Beach Nuclear Plant, Unit Nos. 1 and 2, Town of Two Creeks, Manitowoc County, Wisconsin

Date of amendments request: September 7, 1990, as supplemented May 10, 1991.

Description of amendments request: The licensee proposes amending Technical Specification Section 15.3.7, AUXILIARY ELECTRICAL SYSTEMS, to incorporate reference to a fifth station battery which is being added. The amendments would require that under normal conditions four of the five safety-related station batteries be operable in lieu of the existing requirement that all four batteries be operable before a reactor is made critical. The amendments would also require that all four of the main DC distribution systems be operable in lieu of the more general existing requirement that the DC systems associated with the four batteries be operable. The licensee would make similar revisions to the requirements for making one reactor critical under abnormal conditions.

The amendments would add specific reference to the four DC main distribution buses D01, D02, D03, and D04. They would eliminate reference to black plant startup as a specific example of an abnormal condition since the inclusion of an example is superfluous and the example is not well defined.

The proposed amendments would allow one of the four connected safety-related batteries to be inoperable for 24 hours under specified conditions in lieu of existing provisions for having one battery inoperable.

The licensee would also amend Technical Specification 15.4.6, EMERGENCY POWER SYSTEM PERIODIC TESTS, by changing the testing requirements for safety-related station batteries. Extensive testing requirements would be added. The testing provisions would only apply to safety-related station batteries.

The corresponding bases sections of the Technical Specifications would be revised to incorporate the revised configuration of the station batteries.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration. The NRC staff has reviewed the licensee's analysis against the standards of 10 CFR 50.92(c). The staff's review is presented below:

The proposed changes do not involve a significant increase in the probability or consequences of an accident previously evaluated because four safety-related batteries were already part of the plant design. The changes are the result of the decision to add one more safety-related battery. The number of batteries required to be operable will not change. Furthermore, the licensee has indicated its intention to add a nonsafety-related battery which would carry the nonsafety-related loads currently being carried by the safety-related batteries. The nonsafety loads do not enter into the postulation of accident scenarios. The nonsafety-related battery would not be subject to the same operability and testing requirements as the safety-related battery.

The revisions to the testing program do not affect accidents previously evaluated because testing procedures do not enter into the postulation of accident scenarios.

Similarly, the changes to the basis and the deletion of the reference to black plant startup do not have any bearing on accidents or on margins of safety.

The proposed changes do not create the possibility of a new or different kind of accident from any previously evaluated because the underlying design basis of the auxiliary electrical system has not effectively changed. Four safety-related batteries are still required. The proposed amendments provide some flexibility in implementing the design basis.

The proposed changes do not involve a significant reduction in a margin of safety but instead "... the addition of the new fifth battery will actually increase margins of safety by providing additional stored electrical energy for operation of plant DC electrical loads in the event of loss of normal and emergency AC electrical service."

The more stringent testing requirements being added should also contribute to an increase in the margin of safety because the testing should increase the reliability of the battery system.

Based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Joseph P. Mann Library, 1516 Sixteenth Street, Two Rivers, Wisconsin.

Attorney for licensee: Gerald Charnoff, Esq., Shaw, Pittman, Potts and Trowbridge, 2300 N Street, N.W., Washington, D.C. 20037.

NRC Project Director: John N. Hannon.

Previously Published Notices of Consideration of Issuance of Amendments To Operating Licenses and Proposed No Sifnificant Hazards Consideration Determination and Opportunity for Hearing

The following notices were previously published as separate individual notices. The notice content was the same as above. They were published as individual notices either because time did not allow the Commission to wait for this biweekly notice or because the action involved exigent circumstances. They are repeated here because the biweekly notice lists all amendments issued or proposed to be issued involving no significant hazards consideration.

For details, see the individual notice in the **Federal Register** on the day and

VOL 56 ISS 123 JE 26 1991 UMI

page cited. This notice does not extend the notice period of the original notice.

Georgia Power Company, Oglethorpe Power Corporation, Municipal Electric Authority of Georgia, City of Dalton, Georgia, Docket Nos. 50-424 and 50-425, Vogtle Electric Generating Plant, Units 1 and 2, Burke County, Georgia

Date of amendment request: November 26, 1990; as supplemented January 29 and March 6, 1991; and as revised March 29, 1991

Description of amendment request: The proposed amendments would change the Technical Specifications (TSs) to reflect a planned modification to the method of measuring reactor coolant system (RCS) delta temperature (DT). The current method uses resistance temperature detectors (RTDs) located in a bypass manifold to provide signals for the Overtemperature DT and Overpower DT reactor trip instrumentation. The modification would eliminate the bypass manifold and locate fast-response RTDs in thermowells directly in the hot and cold legs of the RCS loops to provide these signals.

Specifically, the definition of DT in Notes 1 (Overtemperature DT) and 3 (Overpower DT) of TS Table 2.2-1 would be revised to delete the phrase "by RTD Manifold Instrumentation." Additionally, footnote 12 of TS Table 4.3-1, which states that channel calibration of Overtemperature DT instrumentation shall include the RTD bypass loops flow rate, would be deleted. Because Vogtle Units 1 and 2 share a common TS document and the planned modifications are to occur at different times, the TS changes would be expressed both before and after the modification and annotated as needed for each Vogtle unit based upon modification status.

Other changes in the licensee's amendment requests have been previously noticed and are outside the scope of this notice. Date of publication of individual notice in **Federal Register:** May 28, 1991 (56 FR 24101)

Expiration date of individual notice: June 27, 1991

Local Public Document Room location: Burke County Public Library, 412 Fourth Street, Waynesboro, Georgia 30830.

Iowa Electric Light and Power Company, et al., Docket No. 50-331, Duane Arnold Energy Center, Linn County, Iowa

Date of application for amendment: December 14, 1990

Brief description of amendment request: The amendment would revise the Technical Specifications (TSs) to eliminate conditional surveillances for the Emergency Core Cooling (ECCS), Reactor Core Isolation Cooling, (RCIC), Standby Liquid Control, (SLCS) and Standby Gas Treatment Systems (SGTS). Alternate methods of verifying operability of redundant trains of these systems would be included in revised surveillance requirements, consistent with Standard Technical Specifications. The proposed changes would also add new surveillance requirements for some plant instrumentation and would clarify the operability requirements for containment spray. Date of individual notice in **Federal Register:** June 13, 1991 (56 FR 27275)

Expiration date of individual notice: July 15, 1991

Local Public Document Room location: Cedar Rapids Public Library, 500 First Street, S.E., Cedar Rapids, Iowa 52401.

Notice of Issuance of Amendment To Facility Operating License

During the period since publication of the last biweekly notice, the Commission has issued the following amendments. The Commission has determined for each of these amendments that the application complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Notice of Consideration of Issuance of Amendment to Facility Operating License and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing in connection with these actions was published in the **Federal Register** as indicated. No request for a hearing or petition for leave to intervene was filed following this notice.

Unless otherwise indicated, the Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments. If the Commission has prepared an environmental assessment under the special circumstances provision in 10 CFR 51.12(b) and has made a determination based on that assessment, it is so indicated.

For further details with respect to the action see (1) the applications for amendments, (2) the amendments, and (3) the Commission's related letters, Safety Evaluations and/or Environmental Assessments as indicated. All of these items are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, N.W., Washington, D.C., and at the local public document rooms for the particular facilities involved. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Reactor Projects.

Baltimore Gas and Electric Company, Docket Nos. 50-317 and 50-318, Calvert Cliffs Nuclear Power Plant, Unit Nos. 1 and 2, Calvert County, Maryland

Date of application for amendments: June 10, 1988, as supplemented on December 4, 1988.

Brief description of amendments: The amendments provide two changes to the Technical Specifications (TSs). TSs 4.6.2.1.a.2, which requires verificaton that the valves in the Containment Spray System flow path are positioned to take suction from the refueling water tank upon receipt of a containment pressure high test signal, is changed. The change excludes those valves in the flow path which are locked, sealed, or otherwise secured in position from the verification requirement. The second change is TSs 4.7.11.1.2.c which provides surveillance requirements to demonstrate the operability of the fire pump diesel engine. The change removes the requirement to perform the surveillance when the reactors are shut down, thus allowing the surveillance to be performed in the specified time interval regardless of the operating status of the reactor units.

Date of issuance: June 10, 1991

Effective date: June 10, 1991

Amendment Nos.: 154 and 134

Facility Operating License Nos. DPR-53 and DPR-69. Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** January 24, 1990 (55 FR 2431) The Commission's related evaluation of these amendments is contained in a Safety Evaluation dated June 10, 1991.

No significant hazards consideration comments received: No

Local Public Document Room location: Calvert County Library, Prince Frederick, Maryland.

Carolina Power & Light Company, et al., Docket Nos. 50-325 and 50-324, Brunswick Steam Electric Plant, Units 1 and 2, Brunswick County, North Carolina

Date of application for amendments: February 11, 1991 as supplemented on May 10, 1991.

Brief Description of amendments: The amendments change the Technical Specifications (TS) to (1) consolidate the Shift Operating Supervisor (SOS) and the Shift Supervisor positions as a single Senior Reactor Operator (SRO) entry in the TS table 6.2.2-1 and replaces TS references to SOS with references to the Shift Supervisor; increase the number of SROs in TS table 6.2.2-1 from one to two to reflect the consolidation of the SOS and Shift Supervisor positions; add references for the new positions of the Operations Manager - Unit 1 and Operations Manager - Unit 2, and (2) add the requirement that the Manager-Operations hold, or have held, an SRO license for either the Brunswick Plant or a similar unit, and (3) add a one-time, 18 month exception to the requirement for the Manager-Operations to hold, or have held, an SRO license for either the Brunswick Plant or a similar unit.

Date of issuance: June 13, 1991.

Effective date: June 13, 1991.

Amendment Nos.: 153 and 183

Facility Operating License Nos. DPR-71 and DPR-62. Amendments revise the Technical Specifications.

Date of initial notice in **Federal Register:** April 3, 1991 (56 FR 13659). The May 10, 1991, letter renamed the Shift Foreman to the new title Shift Supervisor with functional responsibilities and reporting relationships remaining unchanged, provided clarifying information and a typographical correction that did not change the initial proposed no significant hazards consideration determination. The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated June 13, 1991.

No significant hazards consideration comments received: No.

Local Public Document Room location: University of North Carolina at Wilmington, William Madison Randall Library, 601 S. College Road, Wilmington, North Carolina 28403-3297.

Connecticut Yankee Atomic Power Company, Docket No. 50-213, Haddam Neck Plant, Middlesex County, Connecticut

Date of application for amendment: October 1, 1990, as supplemented January 31, 1991.

Brief description of amendment: The amendment adds an action statement to Technical Specification Section 3.1.3.1, "Movable Control Assemblies, Bank Height" to address the situation where there is a failure in the rod control system causing more than one control rod to be inoperable, but all the control rods remain trippable.

Date of Issuance: June 12, 1991

Effective date: June 12, 1991

Amendment No.: 137

Facility Operating License No. DPR-61. Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** February 20, 1991 (56 FR 6870) The Commission's related evaluation of this amendment is contained in a Safety Evaluation dated June 12, 1991.

No significant hazards consideration comments received: No.

Local Public Document Room location: Russell Library, 123 Broad Street, Middletown, Connecticut 06457.

Duke Power Company, et al., Docket Nos. 50-413 and 50-414, Catawba Nuclear Station, Units 1 and 2, York County, South Carolina

Date of application for amendments: January 9, 1991

Brief description of amendments: The amendments revise the Technical Specifications to reflect fuel reloading for Catawba Unit 1's Cycle 6 operation with fuel manufactured by the B&W Fuel Company and to continue to reflect the previously existing Technical Specifications for Unit 2 fuel.

Date of issuance: May 31, 1991

Effective date: May 31, 1991

Amendment Nos.: 86, 80

Facility Operating License Nos. NPF-35 and NPF-52: Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** May 1, 1991 (56 FR 20031) The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated May 31, 1991.

No significant hazards consideration comments received: No.

Local Public Document Room location: York County Library, 138 East Black Street, Rock Hill, South Carolina 29730

Duke Power Company, et al., Docket Nos. 50-413 and 50-414, Catawba Nuclear Station, Units 1 and 2, York County, South Carolina

Date of application for amendments: February 5, 1991

Brief description of amendments: The amendments modify the operating licenses to allow an extension of time for resolution of the accumulator tank instrumentation issue.

Date of issuance: June 4, 1991

Effective date: June 4, 1991

Amendment Nos.: 87, 81

Facility Operating License Nos. NPF-35 and NPF-52: Amendments revised conditions to the facility operating licenses.

Date of initial notice in **Federal Register:** May 1, 1991 (56 FR 20033) The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated June 4, 1991.

No significant hazards consideration comments received: No.

Local Public Document Room location: York County Library, 138 East Black Street, Rock Hill, South Carolina 29730

Duke Power Company, Docket Nos. 50-369 and 50-370, McGuire Nuclear Station, Units 1 and 2, Mecklenburg County, North Carolina

Date of application for amendments: February 7, 1990, as supplemented May 7, 1990.

Brief description of amendments: The amendments respond to NRC Generic Letter 89-01 by relocating the Radiological Effluent Technical Specifications to therespective sections of Chapter 16 of the Final Safety Analysis Report, "Selected Licensee Commitment (SLC) Manual."

Date of issuance: May 22, 1991

Effective date: May 22, 1991

Amendment Nos.: 119, 101

Facility Operating License Nos. NPF-9 and NPF-17: Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** August 22, 1990 (55 FR 34367) The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated May 22, 1991

No significant hazards consideration comments received: No.

Local Public Document Room location: Atkins Library, University of North Carolina, Charlotte (UNCC Station), North Carolina 28223

Gulf States Utilities Company, Docket No. 50-458, River Bend Station, Unit 1 West Feliciana Parish, Louisiana

Date of amendment request: June 4, 1990 and supplemented by letters dated February 13, 1991, April 11, 1991, and May 2, 1991.

Brief description of amendment: The amendment revised Technical Specifications 4.0.5, 3.4.3.1, and 3.4.3.2 regarding inservice inspection, leak detection, and actions to be taken when leakage limits are exceeded. The changes are based on guidance provided in Generic Letter 88-01, "NRC Position on IGSCC in BWR Austenitic Stainless

VOL 56 ISS 123 JE 26 1991 UMI

Steel Piping." Additionally, two editorial changes were made which deleted references to the first refueling outage which has already been completed.

Date of issuance: May 31, 1991

Effective date: May 31, 1991, to be implemented within 60 days of issuance.

Amendment No: 57

Facility Operating License No. NPF-47. The amendment revised the Technical Specifications.

Date of initial notice in Federal Register: April 3, 1991 (56 FR 13664). The April 11, 1991, and May 2, 1991, submittals provided additional clarifying information and did not change the initial no significant hazards consideration determination. The Commission's related evalnation of the amendment is contained in a Safety Evaluation dated May 31, 1991

No significant hazards consideration comments received: No.

Local Public Document Room location: Government Documents Department, Louisiana State University, Baton Rouge, Louisiana 70803

Gulf States Utilities Company, Docket No. 50-458, River Bend Station, Unit 1 West Feliciana Parish, Louisiana

Date of amendment request: March 12, 1991

Brief description of amendment: The amendment adds an action to Technical Specification 3.6.2.3 which permits plant personnel to enter the drywell for maintenance work with the plant in Operational Condition 3 rather than cold shutdown when one of the drywell air lock door seals is inoperable. Entry into the drywell requires that the operable air lock door be open for approximately three minutes as personnel enter and exit, allowing the leakage through the inoperable seals to bypass the drywell. The amendment also stipulates that the operable door be locked closed after each entry and exit and that a designated person ensure that both doors in the air lock are not open simultaneously.

Date of issuance: June 3, 1991

Effective date: June 3, 1991

Amendment No.:

Amendment No. 58

Facility Operating License No. NPF-47. The amendment revised the Technical Specifications.

Date of initial notice in Federal Register: May 1, 1991 (56 FR 20040) The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated June 3, 1991

No significant hazards consideration comments received: No.

Local Public Document Room location: Government Documents Department, Louisiana State University, Baton Rouge, Louisiana 70803

Niagara Mohawk Power Corporation, Docket Nos. 50-220, and 50-410, Nine Mile Point Nuclear Station, Unit Nos. 1 and 2, Oswego County, New York

Dates of applications for amendments: March 13, 1991

Brief description of amendments: The amendments revise Technical Specification Section 6.0, Administrative Controls, to reflect changes which replace the current Manager Health Physics by a Manager Radiation Protection for each unit. These changes are consistent with the management changes approved in License Amendments Nos. 120 and 25 issued on December 31, 1990, which approved unitized management organizations for each of the Nine Mile Point units.

Date of issuance: June 6, 1991

Effective date: June 6, 1991

Amendment Nos.: 124 and 32

Facility Operating License Nos. DPR-63 and NPF-69: Amendments revise the Technical Specifications.

Date of initial notice in Federal Register: May 1, 1991 (56 FR 20041) The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated June 6, 1991

No significant hazards consideration comments received: No

Local Public Document Room location: Reference and Documents Department, Penfield Library, State University of New York, Oswego, New York 13126.

Niagara Mohawk Power Corporation, Docket No. 50-220, Nine Mile Point Nuclear Station, Unit No. 1, Oswego County, New York

Date of application for amendment: May 26, 1989, as amended January 5, 1990.

Brief description of amendment: The amendment revises Technical Specification Figure 3.4.1 to correct errors of omission in the labeling of the graph on the figure. The revisions to Figure 3.4.1 clarify that Reactor building pressures specified thereon are actually differential pressures.

Date of issuance: June 10, 1991

Effective date: June 10, 1991

Amendment No.: 125

Facility Operating License No. DPR-63: Amendment revises the Technical Specifications.

Date of initial notice in Federal Register: May 1, 1991 (56 FR 20041) The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated June 10, 1991

No significant hazards consideration comments received: No

Local Public Document Room location: Reference and Documents Department, Penfield Library, State University of New York, Oswego, New York 13126.

Northeast Nuclear Energy Company, Docket No. 50-245, Millstone Nuclear Power Station, Unit 1, New London County, Connecticut

Date of application for amendment: November 19, 1990 and January 24, 1991, as supplemented March 1, 1991.

Brief description of amendment: The amendment changes the Millstone Unit 1 Technical Specifications (TS) as follows:

- A change to the Minimum Critical Power Ratio (MCPR) Safety Limit from 1.04 to 1.07.
- Addition of a definition for LIMITING CONTROL ROD PATTERN.
- Redefinition of the applicability of Thermal Limits and associated action.
- Revision of Section 3/4.11, "Power Distribution Limits".
- Inclusion of the limiting value of linear heat generation rate (LHGR) in the TS.
- Revision to K_f curves in TS Figure 3.11.1.

Date of issuance: June 11, 1991

Effective date: June 11, 1991

Amendment No.: 54

Facility Operating License No. DPR-21. Amendment revised the Technical Specifications.

Date of initial notice in Federal Register: February 20, 1991 (56 FR 6878) The March 1, 1991 submittal provided additional clarifying information and did not change the initial proposed no significant hazards consideration determination. The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated June 11, 1991.

No significant hazards consideration comments received: No.

Local Public Document Room location: Learning Resources Center, Thames Valley State Technical College, 574 New London Turnpike, Norwich, Connecticut 06360.

Pacific Gas and Electric Company, Docket Nos. 50-275 and 50-323, Diablo Canyon Nuclear Power Plant, Unit Nos. 1 and 2, San Luis Obispo County, California

Date of application amendments: July 17, 1990

Brief description of amendments: These amendments revise the combined Technical Specifications for the Diablo Canyon Power Plant Unit Nos. 1 and 2 to increase the surveillance test intervals, allowed outage times, and channel bypass times for certain of the

instrumentation in the Reactor Trip System and Engineered Safety Features Actuation System. The changes are based on generic analyses performed as part of a Westinghouse Owners Group program.

Date of issuance: May 23, 1991

Effective date: May 23, 1991

Amendment Nos.: 61 and 60

Facility Operating License Nos. DPR-80 and DPR-82: The amendments revised the Technical Specifications.

Date of initial notice in Federal Register: November 14, 1990 (55 FR 47573) The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated May 23, 1991.

No significant hazards consideration comments received: No.

Local Public Document Room location: California Polytechnic State University, Robert E. Kennedy Library, Government Documents and Maps Department, San Luis Obispo, California 93407

Pennsylvania Power and Light Company, Docket Nos. 50-387 and 50-388 Susquehanna Steam Electric Station, Units 1 and 2, Luzerne County, Pennsylvania

Date of application for amendments: January 18, 1991

Brief description of amendments: The amendments revised technical specification 4.1.4.1 such that while in Operational Condition 1 when reducing Thermal Power the selection error for an out-of-sequence control rod is demonstrated within one hour after reaching the low power setpoint (LPSP). Other changes included in the amendments are editorial in nature to provide a clear format and to clarify that "RWM automatic initiation" is defined to be that point in time when the LPSP [low power setpoint] is reached.

Date of issuance: June 6, 1991

Effective date: 30 days after date of issuance

Amendment Nos.: 109 and 78

Facility Operating License Nos. NPF-14 and NPF-22. These amendments revised the Technical Specifications.

Date of initial notice in Federal Register: April 3, 1991 (56 FR 13668) The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated June 6, 1991.

Southern California Edison Company, et al., Docket Nos. 50-361 and 50-362, San Onofre Nuclear Generating Station, Unit Nos. 2 and 3, San Diego County, California

Date of application for amendments: April 8, 1991

Brief description of amendments: These amendments provide NRC staff approval to revise the Updated Final Safety Analysis Report to allow the shutdown cooling (SDC) system to be used as a primary means of cooling the spent fuel pool. This changes the use of the SDC system as a credited backup system when available, to an alternate means of spent fuel pool cooling. This change is needed to allow systems that normally provide cooling for the spent fuel pool to be removed from service for maintenance activities. The shutdown cooling system will not be used as the primary means of spent fuel pool cooling when Technical Specifications require the shutdown cooling system to be operable for cooling the reactor core.

Date of issuance: June 3, 1991

Effective date: June 3, 1991

Amendment Nos.: Unit 2: 94; Unit 3: 84

Facility Operating License Nos. NPF-10 and NPF-15: Amendments provides NRC staff approval of a proposed revision of the Updated Final Safety Analysis Report description to allow the shutdown cooling system to be used as an alternate means of cooling the spent fuel pool. The amendment does not involve a change to the Technical Specifications or License Conditions.

Date of initial notice in Federal Register: May 1, 1991 (56 FR 20045) The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated June 3, 1991.

Notice of Issuance of Amendment to Facility Operating License and Final Determination of No Significant Hazards Consideration and Opportunity For Hearing (Exigent or Emergency Circumstances)

During the period since publication of the last biweekly notice, the Commission has issued the following amendments. The Commission has determined for each of these amendments that the application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Because of exigent or emergency circumstances associated with the date the amendment was needed, there was not time for the Commission to publish, for public comment before issuance, its usual 30-day Notice of Consideration of Issuance of Amendment and Proposed No Significant Hazards Consideration Determination and Opportunity for a Hearing. For exigent circumstances, the Commission has either issued a Federal Register notice providing opportunity for public comment or has used local media to provide notice to the public in the area surrounding a licensee's facility of the licensee's application and of the Commission's proposed determination of no significant hazards consideration. The Commission has provided a reasonable opportunity for the public to comment, using its best efforts to make available to the public means of communication for the public to respond quickly, and in the case of telephone comments, the comments have been recorded or transcribed as appropriate and the licensee has been informed of the public comments.

In circumstances where failure to act in a timely way would have resulted, for example, in derating or shutdown of a nuclear power plant or in prevention of either resumption of operation or of increase in power output up to the plant's licensed power level, the Commission may not have had an opportunity to provide for public comment on its no significant hazards determination. In such case, the license amendment has been issued without opportunity for comment. If there has been some time for public comment but less than 30 days, the Commission may provide an opportunity for public comment. If comments have been requested, it is so stated. In either event, the State has been consulted by telephone whenever possible.

Under its regulations, the Commission may issue and make an amendment immediately effective, notwithstanding the pendency before it of a request for a hearing from any person, in advance of the holding and completion of any required hearing, where it has determined that no significant hazards consideration is involved.

The Commission has applied the standards of 10 CFR 50.92 and has made a final determination that the amendment involves no significant hazards consideration. The basis for this determination is contained in the documents related to this action. Accordingly, the amendments have been issued and made effective as indicated.

Unless otherwise indicated, the Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments. If the Commission has prepared an environmental assessment under the special circumstances provision in 10 CFR 51.12(b) and has made a determination based on that assessment, it is so indicated.

For further details with respect to the action see (1) the application for amendment, (2) the amendment to Facility Operating License, and (3) the Commission's related letter, Safety Evaluation and/or Environmental Assessment, as indicated. All of these items are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, N.W., Washington, D.C., and at the local public document room for the particular facility involved.

A copy of items (2) and (3) may be obtained upon request addressed to the U. S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Reactor Projects.

The Commission is also offering an opportunity for a hearing with respect to the issuance of the amendments. By July 26, 1991, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene.

Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) the nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to

VOL 56 ISS 123 JE 26 1991 UMI

which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Interested persons should consult a current copy of 10 CFR 2.714 which is available at the Commission's Public Document Room, the Gelman Building, 2120 L Street, N.W., Washington, D.C. 20555 and at the Local Public Document Room for the particular facility involved.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases of the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion. Petitioner must provide sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the amendments under consideration. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

Since the Commission has made a final determination that the amendment involves no significant hazards consideration, if a hearing is requested, it will not stay the effectiveness of the amendment. Any hearing held would take place while the amendment is in effect.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Services Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, N.W., Washington, D.C., by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1-(800) 325-6000 (in Missouri 1-(800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to **(Project Director)**: petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, and to the attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board, that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.714(d).

Alabama Power Company, Docket No. 50-348, Joseph M. Farley Nuclear Plant, Unit 1, Houston County, Alabama.

Date of application for amendment: May 17, 1991.

Brief description of amendment: The amendment revises Technical Specification Table 3.3-5, "Engineered Safety Features Response Times." The change increases the engineered safety features response time for steam line isolation on high steam flow in two steam lines coincident with T-average low-low from the current value of less than or equal to 9 seconds to less than or equal to 11 seconds.

Date of issuance: June 4, 1991

Effective date: June 4, 1991

Amendment No. 89

Facility Operating License No. NPF-2: Amendment revises the Technical Specifications. Public comments requested as to proposed no significant hazard consideration: No. The Commission's related evaluation of the amendment finding of emergency circumstances, and final determination of no significant hazards consideration are contained in a Safety Evaluation dated June 4, 1991.

Attorney for licensee: Mr. James H. Miller, III, Esq., Balch and Bingham, P.O. Box 306, 1710 Sixth Avenue North, Birmingham, Alabama 35201.

BILLING CODE 7590-01-D

[Docket No. 50-324]

Carolina Power & Light Co.; Withdrawal of Application for Amendment to Facility Operating License

The United States Nuclear Regulatory Commission (the Commission) has granted the request of Carolina Power & Light Company (the licensee) to withdraw its March 26, 1991, application for proposed amendment to Facility Operating License No. DPR-62 for the Brunswick Steam Electric Plant, Unit 2, located in Brunswick County, North Carolina.

The amendment would have revised the Technical Specifications (TS) to allow a one-time only extension of the 18-month interval for certain surveillance requirements associated with the emergency core cooling system actuation instrumentation and service water system.

For further details with respect to this action, see the application for amendment dated March 26, 1991, and the licensee's letter dated April 8, 1991, which withdrew the application for license amendment. The above documents are available for public inspection at the Commission's Public Document Room, 2120 L Street, NW., Washington, DC, and University of North Carolina at Wilmington, William Madison Randall Library, 601 S. College Road, Wilmington, North Carolina 28403-3297.

Dated at Rockville, Maryland this 17th day of June, 1991.

For the Nuclear Regulatory Commission.

Ngoc B. Le,

Project Manager, Project Directorate II-1, Division of Reactor Projects I/II, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-M

[Docket No. 50-324]

Carolina Power & Light Co.; Withdrawal of Application for Amendment to Facility Operating License

The United States Nuclear Regulatory Commission (the Commission) has granted the request of Carolina Power & Light Company (the licensee) to withdraw its February 19, 1991, applications for proposed amendment to Facility Operating License No DPR-62 for the Brunswick Steam Electric Plant, Unit 2, located in Brunswick County, North Carolina.

The amendment would have revised the Technical Specifications (TS) pertaining to the surveillance intervals for the 125 volt batteries and chargers to allow a one-time only extension of the surveillances associated with TS 4.8.2.3.2.c and 4.8.2.3.2.d to the end of the Reload 9 outage.

The Commission had previoously issued a Notice of Consideration of Issuance of Amendment published in the **Federal Register** on March 20, 1991, (56 FR 11773). However, by letter dated April 8, 1991, the licensee withdrew the proposed change.

For further details with respect to this action, see the application for amendment dated February 19, 1991, and the licensee's letter dated April 8, 1991, which withdrew the application for license amendment. The above documents are available for public inspection at the Commission's Public Document Room, 2120 L Street, NW., Washington, DC, and University of North Carolina at Wilmington, William Madison Randall Library, 601 S. College Road, Wilmington, North Carolina 28403-3297.

Dated at Rockville, Maryland this 17th day of June 1991.

[Docket No. 50-324]

Carolina Power & Light Co.; Withdrawal of Application for Amendment to Facility Operating License

The United States Nuclear Regulatory Commission (the Commission) has granted the request of Carolina Power & Light Company (the licensee) to withdraw its March 18, 1991, application for proposed amendment to Facility Operating License No. DPR-62 for the Brunswick Steam Electric Plant, Unit 2, located in Brunswick County, North Carolina.

The proposed amendment would have revised the Technical Specifications (TS) to allow a one-time only extension of the surveillance interval associated with TS 4.8.1.1.2.d until October 31, 1991. Subsequently, by letter dated May 31, 1991, the amendment request was withdrawn.

For further details with respect to this action, see the application for amendment dated March 18, 1991, and the licensee's letter dated May 31, 1991, which withdrew the application for license amendment. The above documents are available for public inspection at the Commission's Public Document Room, 2120 L Street NW., Washington, DC, and University of North Carolina at Wilmington, William Madison Randall Library, 601 S. College Road, Wilmington, North Carolina 28403-3297.

BILLING CODE 7590-01-M

[Docket Nos. 50-440-A, 50-346-A, (Suspension of Antitrust Conditions); ASLBP No. 91-644-01-A]

Ohio Edison Co., et al; Memorandum and Order (Prehearing Conference)

June 19, 1991.

In the matter of Ohio Edison Company, (Perry Nuclear Power Plant, Unit 1 Facility Operating License No. NPF-58), The Cleveland Electric Illuminating Company, and the Toledo Edison Company, (Perry Nuclear Power Plant, Unit 1, Facility Operating License No. NPF-58) (Davis-Besse Nuclear Power Station, Unit 1, Facility Operating License No. NPF-3).

This proceeding involves applications to amend the operating licenses of the Perry Nuclear Power Plant, Unit 1, and the Davis-Besse Nuclear Power Station, Unit 1, to suspend the antitrust conditions in those licenses. Pending before this Licensing Board are various requests for a hearing and petitions for leave to intervene.

As we previously notified all parties and petitioners by telephone, a prehearing conference is hereby scheduled for Thursday, July 25, 1991, beginning at 10 a.m., in the NRC Hearing Room, 5th floor, 4350 East West Highway, Bethesda, Maryland. To the extent necessary, the conference will continue on Friday, July 26, 1991, beginning at 9:30 a.m., at the same location.

At the conference, the Board will consider the various requests for a hearing and petitions for leave to intervene (including the standing of the petitioners for intervention), schedules, discovery (in the event a hearing is authorized) and other matters boering on the proceeding.

The Licensing Board hereby acknowledges receipt of copies of Ohio Edison's application to amend the Perry Operating License. The Board hereby requests that it be provided by the Applicants, at their earliest convenience, with copies of the Cleveland Electric Illuminating Co./Toledo Edison application to amend the Perry and Davis-Besse facility licenses. In addition, the Board requests the NRC Staff to provide it copies of the following letters referenced in the Notice of Opportunity for Hearing:

1. The Department of Justice letter to the NRC, dated June 13, 1990.

2. The Commission's letter to the Licensees, dated April 24, 1991.

It is so ordered.

Bethesda, Maryland
June 19, 1991.

For the Atomic Safety and Licensing Board.

Charles Bechhoefer,

Administrative Judge.

BILLING CODE 7590-01-M

POSTAL RATE COMMISSION

[Order No. 886; Docket No. A91-7]

Weston, Michigan 49289 (Irene M. Robinson, et al., Petitioners); Notice and Order Accepting Appeal and Establishing Procedural Schedule Under 39 U.S.C. 404(b)(5)

Issued June 20, 1991.

Name of Affected Post Office: Weston, Michigan 49289.

Name(s) of Petitioner(s): Irene M. Robinson, et al.

Type of Determination: Closing.

Date of Filing of Appeal Papers: June 17, 1991.

Categories of Issues Apparently Raised:

1. Effect on the community [39 U.S.C. 404(b)(2)(A)];

2. Effect on postal services [39 U.S.C. 404(b)(2)(C)];

3. Economic savings [39 U.S.C. 404(b)(2)(D)].

Other legal issues may be disclosed by the record when it is filed; or, conversely, the determination made by the Postal Service may be found to dispose of one or more of these issues.

In the interest of expedition, in light of the 120-day decision schedule [39 U.S.C. 404(b)(5)], the Commission reserves the right to request of the Postal Service memoranda of law on any appropriate issue. If requested, such memoranda will be due 20 days from the issuance of the request; a copy shall be served on the petitioner. In a brief or motion to dismiss or affirm, the Postal Service may incorporate by reference any such memoranda previously filed.

The Commission Orders:

(A) The record in this appeal shall be filed on or before July 2, 1991.

(B) The Secretary shall publish this Notice and Order and Procedural Schedule in the **Federal Register**.

By the Commission.

Charles L. Clapp,

Secretary.

Appendix

June 17, 1991	Filing of Petition.
June 20, 1991	Notice and Order of Filing of Appeal.
July 12, 1991	Last day for filing of petitions to intervene (see 39 CFR 3001.111(b)).

RESOLUTION TRUST CORPORATION

Disclosure of Asset-Related Information

AGENCY: Resolution Trust Corporation.

ACTION: Extension of comment period.

SUMMARY: On May 22, 1991 56 FR 23602, the Resolution Trust Corporation ("RTC"), published a notice that the RTC was seeking comments from the public on certain issues regarding the disclosure of information related to the sale of assets owned or controlled by the RTC. The purpose of the comments is to assist the RTC in the development of a policy statement regarding disclosure of such information. The comment period ended on June 21, 1991. The RTC is now extending this comment period for an additional thirty days.

DATES: Comments must be received by July 22, 1991.

ADDRESSES: Comments should be sent to John M. Buckley, Jr., Executive Secretary, Resolution Trust Corporation, 801 17th Street NW., Washington, DC 20434. Comments may be hand delivered to room 314 at the same address between the hours of 9 a.m. and 5 p.m. on business days. Comments will be available for inspection and photocopying in the Public Reading Room, 801 17th Street NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: John C. Binkley, Special Assistant to the Executive Secretary, at (202) 416-7450.

Dated at Washington, DC, this 21st day of June, 1991.

John M. Buckley, Jr.,

Executive Secretary, Resolution Trust Corporation.

BILLING CODE 6714-01-M

SECURITIES AND EXCHANGE COMMISSION

[Rel. No. 34-29341; File No. SR-CBOE-91-16]

Self-Regulatory Organizations; Filing and Order Granting Accelerated Approval of Proposed Rule Change by Chicago Board Options Exchange, Inc., Relating to Extension of a Fee for Delayed Trade Match Submissions

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on May 13, 1991, the Chicago Board Options Exchange, Inc. ("CBOE" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which items have been prepared by the CBOE. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The CBOE proposes to extend the effectiveness of its fee for delayed trade match submissions for a period of six months until January 22, 1992. In general, under the proposal, market makers and their clearing firms will be charged an additional fee when they submit trade information two hours or more after the time of execution for a specified percentage of their transactions. The fee applies only to market maker trades executed in person.[1]

The trade matching process at the Exchange traditionally has been performed by making computer runs in the evening hours after trading for the day has ceased. In April 1990, however, the Exchange instituted an intraday trade matching service on an Exchange-wide basis. As a result, the Exchange is now making data comparison computer runs during each trading day instead of starting that process after the close of trading. The purpose of the fee for delayed trade match submissions is to encourage timely submission of trade information data, thus leading to greater realization of the benefits offered by intraday trade matching (*i.e.*, more timely and accurate trade matching).

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the CBOE included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The CBOE has prepared summaries, set forth in section (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

(1) Purpose

On January 22, 1991, the Commission approved a CBOE proposal establishing a fee for delayed trade match submissions for a period of six months until July 22, 1991.[2] The purpose of the fee for delayed trade match submissions is to encourage market-makers and market-maker clearing firms to submit trading data to the CBOE in a timely manner and to help offset the additional burden created by delayed submissions in conjunction with the Exchange's implementation of its intraday trade match system. When approving the fee structure, however, the Commission determined that the proposal could not be permanently approved until the CBOE submitted and received approval for its intraday trade match system. Accordingly, in order to give the CBOE time to prepare and file the intraday trade match system and the Commission time to review the proposal, while simultaneously allowing the CBOE to begin charging fees to improve the effectiveness of that system, the Commission approved the fee proposal for an initial six-month period.

Concurrent with this proposal, but as a separate filing (SR-CBOE-91-16), the Exchange is submitting with the Commission a description of the intraday trade match system. Nevertheless, due to the uncertainty of that proposal's approval before July 22, 1991, the CBOE proposes to extend the Commission's approval of the fee for delayed trade match submissions for an additional six months until January 22, 1992. This would avoid the imposition of an undue hardship and burden on the Exchange, which plans to begin the fee program on July 1 that would be caused by the interruption or discontinuation of the fee program three weeks after it was first implemented.

(2) Basis

The Exchange believes that an extension of the fee for delayed trade match submissions prior to permanent approval of the CBOE's intraday trade match system is consistent with the requirements of the Act and the rules and regulations thereunder in general, and, in particular, section 6(B)(4) because it provides for the equitable allocation of reasonable fees among its members and section 6(b)(5) because it is designed to foster cooperation and coordination with persons engaged in clearing transactions in securities.

B. Self-Regulatory Organization's Statement on Burden on Competition

The CBOE does not believe that the proposed rule change will impose any inappropriate burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

No written comments were solicited or received with respect to the proposed rule change.

[1] For a more detailed description of the fee charged for delayed trade match submissions, see Securities Exchange Act Release No. 28807 (January 22, 1991), 56 FR 3127.

[2] *Id.*

VOL 56 ISS 123 JE 26 1991 UMI

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange requests that the proposed rule change be given accelerated approval pursuant to section 19(b)(2) of the Act. The Commission finds that the proposed rule change to extend the effectiveness of the fee for delayed trade match submissions for six months until January 22, 1992 is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of sections 6(b) (4) and (5) thereunder. In particular, the Commission believes that the proposal will continue to encourage market makers and their clearing members to make timely submissions of trade information, which will foster more efficient clearing of options transactions.

The Commission finds good cause for approving the proposed rule change prior to the thirtieth day after the date of publication of notice thereof in the Federal Register because of the importance of allowing the fee program to be implemented and remain in effect without interruption. The Commission believes, therefore, that granting accelerated approval of the proposed rule change is appropriate and consistent with section 6 of the Act.[2]

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the CBOE. All submissions should refer to File No. SR-CBOE-91-16 and should be submitted by July 17, 1991.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the proposed rule change be, and hereby is, approved for a period of six months ending January 22, 1992.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: June 19, 1991.

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 91-15115 Filed 6-25-91; 8:45 am]

BILLING CODE 8010-01-M

[2] The Commission incorporates in this order the analysis contained in its order of January 22, 1991, approving the delayed trade match submissions fee for a period of six months. See, Securities Exchange Act Release No. 28807 (January 22, 1991), 56 FR 3127.

[Release No. 34-29322; File No. SR-CBOE-91-16]

Self-Regulatory Organization; Filing of Proposed Rule Change by the Chicago Board Options Exchange, Inc. Relating to the Exchange's Intraday Trade Match System

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on May 13, 1991, the Chicago Board Options Exchange, Inc. ("CBOE" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in items I, II, and III below, which Items have been prepared by the CBOE. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The CBOE proposes to establish procedures for its intraday trade match system. The text of the proposed rule change is attached as exhibit A.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the CBOE included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in item IV below. The CBOE has prepared summaries, set forth in sections (A), (B) and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

(1) Purpose

On January 22, 1991, the Commission approved a CBOE proposal establishing a fee for delayed trade match submissions for a period of six months from January 22, 1991.[1] The purpose of the fee is to encourage market-makers and market-maker clearing firms to submit trading data to the CBOE in a timely manner and to help offset the additional burden created by delayed submissions in conjunction with the Exchange's implementation of its intraday trade match system. When approving the fee structure, however, the Commission determined that the proposal could not be permanently approved until the CBOE submitted and received approval for its intraday trade match system. Accordingly, in order to give the CBOE time to prepare and file the intraday trade match system and the Commission time to review the proposal, while simultaneously allowing the CBOE to begin charging fees to improve the effectiveness of its intraday trade match system, the Commission approved the fee proposal for an initial six-month period.

Pursuant to the Commission's request when approving the fee for delayed trade match submissions, the present proposal contains a description of the intraday trade match system. In addition, concurrent with this proposal, the Exchange is submitting to the Commission a proposal to extend the effectiveness of the fee for delayed trade match submissions for a period of six months until January 22, 1992. The extension would enable the Exchange to assess the fee program without interruption while the Commission considers the present proposal.

(b) Basis

The proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder in general, and, in particular, the proposal is consistent with and furthers the objectives of section 6(b)(5) in that it is designed to foster cooperation and coordination with persons engaged in clearing transactions in securities.

[1] See Securities Exchange Act Release No. 28807 (January 22, 1991), 56 FR 3127.

B. Self-Regulatory Organization's Statement on Burden on Competition

The CBOE does not believe that the proposed rule change will impose any inappropriate burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of the notice in the Federal Register or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents the Commission will:

(a) By order approve such proposed rule change or

(b) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the CBOE. All submissions should refer to File No. SR-CBOE-91-16 and should be submitted by July 17, 1991.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: June 17, 1991.

Margaret H. McFarland,

Deputy Secretary.

Exhibit A—Chicago Board Options Exchange, Incorporated Trade Match System

This circular describes the procedures of the Chicago Board Options Exchange, Incorporated ("Exchange" or "CBOE") with respect to its trade match process and, in particular its intraday trade match ("ITM") system, including applicable timetables.

General Background

Prior to October 30, 1989, when ITM was first introduced in one trading station involving four classes of option contracts, the Exchange's trade match process began after the close of trading. Specifically, there were three timeframes during which trade input comparison occurred: The first trade input comparison, "First Pass", occurred no earlier than 6 p.m. The second trade input comparison, "Second Pass", occurred at approximately 10 p.m. The third trade input comparison, "Third Pass", occurred at 12 p.m. the next trading day to deal with unmatched trades "as-of" the prior trading day.

In order to resolve unmatched trades sooner, thereby reducing the market risk of overnight outtrades as well as reducing the costs inherent in a more protracted trade match process, the Exchange began trade match comparison during the trading day in October 1989. Substantial improvements in the trade match process led to ITM's expansion to include all equity options by February 23, 1990. In February 1990, ITM also expanded to expiration Saturday processing by providing two matching passes. This enabled clearing members to eliminate outtrades in expiring series thereby greatly reducing time and costs associated with expiration processing. The Exchange completed its floor-wide implementation of ITM by expanding to the OEX trading crowd on April 24, 1990. As a result of ITM, the evening trade match workloads decreased. Consequently, on July 1, 1990, the evening's first pass time was moved up one half hour while the time allotted for night trade checking was compressed. Further reductions in outtrades led to the elimination of the "as-of" matching pass, Third Pass, on November 19, 1990 and all "as-of" activity was processed by ITM. Further, in order to encourage timely submission of trade input and thereby lead to greater realization of the benefits offered by ITM, the Exchange filed with the Securities and Exchange Commission ("Commission") proposed trade match delayed submission fees rules. On January 22, 1991, the Commission approved the proposal for a six-month period. (See SR-CBOE-90-05)

Trade Submission

Presently, the trade match process begins by the submission of trade information to the CBOE trade match system. Trade input to CBOE's trade match system commences as soon as trading begins. Trade match input is received via three methods: (1) Real-Time sources such as the CBOE Order Routing System ("ORS"), CBOE's RAES system and member firm order match systems, (2) Batch transmissions from member firm bookkeeping systems, and (3) Terminal entries via the Terminal Network.

Currently, the Exchange's trade match process consists of three intraday trade match passes and two evening trade match passes as described below.

First Intraday Trade Match Pass

At 11 a.m. the Exchange performs the first intraday trade match pass ("First ITM Pass"). First ITM Pass means the computer processing run prepared by the Exchange in which trade match records (trade information required by Rule 6.51) submitted by all clearing members are combined in order to provide feedback as to unmatched trades. From this run the Exchange produces matched and unmatched trade reports. The matched trade report consists of all trades that match on firms, brokers, contract, price and quantity. The Exchange distributes the matched and unmatched trade reports to the clearing members by 11:30 a.m. at the Exchange's Trade Processing Window. Member firm representatives pick up the reports and compare the information thereon with the firm's internal reports and other relevant records. Where appropriate, corrections are made and submitted to the Exchange via one of the three methods described in the trade submission section above prior to the second intraday trade match pass. By the First ITM Pass, 25% of the day's trades have been submitted for trade matching. Upon completion of the First ITM Pass, 15% of the day's trades have been matched.

Second Intraday Trade Match Pass

At 1 p.m., the Exchange performs the second intraday trade match pass ("Second ITM Pass"). Second ITM Pass means the second time during the trading day that a computer processing run is prepared by the Exchange in which trade match records submitted by all clearing members are combined in order to provide feedback as to unmatched trades. The Second Pass produces matched and unmatched trade reports by 1:40 p.m. which are distributed via the Exchange's Trade Processing Window. Member firm representatives review these reports in preparation for a face to face trade checking session that takes place on the second floor Trade Checking Area of the Exchange at 2 p.m. At this session, member firm representatives discuss the unmatched trades and attempt to resolve them. If necessary or appropriate, market-makers and floor brokers are contacted in order to resolve unmatched trades. Trade correction input is submitted via one of the aforementioned three methods prior to the last intraday trade match pass. By the Second ITM Pass, 50% of the day's trades have been submitted for trade matching. Upon completion of the Second ITM Pass, 30% of the day's trades have been matched.

Third Intraday Trade Match Pass

At 3 p.m., the Exchange performs the last intraday trade match pass ("Third ITM Pass"). Third ITM Pass means the third time during the trading day the Exchange prepares a computer run in which trade match records

VOL 56 ISS 123 JE 26 1991 UMI

submitted by all clearing members are combined in order to provide feedback as to unmatched trades. From this run the Exchange produces matched and unmatched trade reports which are distributed to the clearing firms via the Trade Processing Windows at 3:40 p.m. Member firm representatives review the unmatched trades for errors. Corrections are submitted continuously via one of the aforementioned three methods until the first evening trade match pass begins. The matched and unmatched reports that are produced during the Third ITM Pass provide member firms with a preview of the evening workload, allowing the firms to allocate their personnel more effectively. By the Third ITM Pass, 70% of the day's trades have been submitted. Upon completion, 50% of the day's trade have been matched.

Evening Trade Match Process

While the Exchange has always had an evening trade match process, the entire evening process has been shortened due to the reduced number of unmatched trades being dealt with during the evening trade match process. Previously, the evening trade match process accounted for the bulk of the trade comparison work. With the advent and success of the intraday trade match process, the evening workload has eased significantly, allowing member firms to reduce their evening staff or move evening staff to the trading day thereby decreasing overall costs.

First Evening Trade Match Pass

As early as 5:30 p.m., the first evening pass is performed. A computer processing run is prepared by the Exchange in which trade match records submitted by all clearing members are combined in order to provide feedback as to the remaining unmatched trades. From this run the Exchange produces matched an unmatched trade reports. These reports are distributed electronically, directly to the clearing member's back office, or on hard copy by way of the Exchange's Trade Processing Window. Member firm representatives review the unmatched reports in an effort to match all remaining outtrades. Upon completion of the first evening trade match pass, 91% of all trades effected during the trading day are matched.

Second (And Final) Evening Trade Match Pass

Once all corrections to the first evening pass are received by the Exchange, the final trade matching pass of the day is performed. Generally, the final trade match pass occurs at 8:45 p.m. This pass produces a final electronic file of all compared, matched trades for submission to the Options Clearing Corporation. This file contains approximately 97.5% of the trading day's activity. Only slightly more than 2.5% of the trades remain unmatched. These remaining outtrades are reconciled the next morning prior to the opening of trading.

BILLING CODE 8010-01-M

[Release No. 34-29307; File No. SR-DGOC-91-02]

June 14, 1991.

Self-Regulatory Organizations; Delta Government Options Corporation; Notice of Proposed Rule Change Relating to the Definition of Options Expiration Date

Pursuant to section 19(b) of the Securities Exchange Act of 1934,[1] notice is hereby given that on May 24, 1991, Delta Government Options Corporation ("DGOC") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in items I, II, and III below, which Items have been prepared by the self-regulatory organization ("SRO"). The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. SRO's Statement of the Terms of Substance of the Proposed Rule Change

DGOC's proposed rule change will modify its definition of "expiration date" in article I of its Rules. Specifically, the proposal will: (1) Provide that the expiration date may have duration of not longer than two years from the writing of the option; and (2) permit any Friday of the expiration month to serve as an expiration date, rather than only the first or last Friday of the month as provided under existing rules.

II. SRO's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the SRO included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in item IV below. The SRO has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

(A) SRO's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The purpose of the proposed rule change is to respond to requests by DGOC participants to afford to them the opportunity to select expiration dates which match more precisely the tenor of other financial contracts developed in the over-the-counter market and other trading environments. By affording participants a larger spectrum of expiration dates, DGOC will be able to permit its participants to gravitate naturally toward those expiration dates that each participant deems the most suited to its trading needs. The proposed rule change is consistent with the requirements of the Act, particularly section 17A of the Act, and the rules and regulations thereunder applicable to Delta because the proposed rule change will permit more utilization of the Over-the-Counter Options Trading System by those participants who prefer to trade in options for hedging purposes or speculation.

In particular, the tailoring of the options expiration on the basis proposed by DGOC will afford participants additional flexibility to adjust option duration in relation to their overall treasury security portfolios. The proposal, moreover, will enable participants to submit, for processing at DGOC, over-the-counter Treasury option trades that, prior to this proposal, could not be submitted because their stated expiration date was other than previously available through DGOC. DGOC's proposal, therefore, will allow for the automated clearance and settlement of securities transactions that, otherwise, would be cleared via a decentralized, inefficient and labor-intensive process.

(B) SRO's Statement on Burden on Competition

Delta does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

(C) SRO's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

Delta neither requested nor received any comments on the proposal.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the data of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the SRO consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

[1] 15 U.S.C. 78s(b).

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room, 450 Fifth Street, NW., Washington, DC. Copies of such filing also will be available for inspection and copying at the principal office of the above-mentioned SRO. All submissions should refer to File No. SR-DGOC-91-02 and should be submitted July 17, 1991.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.[2]

Jonathan G. Katz,
Secretary.

Margaret H. McFarland,
Deputy Secretary.

BILLING CODE 8010-01-M

[Release No. 34-29281 File No. SR-NASD-91-12]

Self-Regulatory Organizations; National Association of Securities Dealers, Inc.; Order Approving Proposed Rule Change Relating to OTC Bulletin Board Service

On February 28, 1991, the National Association of Securities Dealers, Inc. ("NASD") submitted to the Securities and Exchange Commission ("Commission" or "SEC") a proposed rule change (File No. SR-NASD-91-12), pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] to amend the OTC Bulletin Board Service ("Service") to require that quotations for non-foreign issues entered into the system be firm. The proposed rule change was noticed in the Federal Register for public comment.[2] No comments were received in response to the solicitation. This order approves the proposed rule change.

On May 1, 1990, the Commission issued an order approving the operation of the NASD's OTC Bulletin Board Service for a pilot term of one year.[3] The Service provides an electronic quotation medium for NASD members to enter and display quotations in non-NASDAQ OTC securities in which they are registered as market makers. Individual market makers are permitted to update their displayed quotations in foreign securities and ADRs twice daily, once between 8:30 and 9:30 a.m. e.s.t. and once between noon and 12:30 p.m. e.s.t. Domestic securities quoted in the Service are not subject to this update restriction.

The purpose of the proposed rule change is to require that all priced bids and offers on domestic securities entered by registered market makers be firm for one unit of trading. This requirement will apply exclusively to priced quotations for domestic, non-NASDAQ securities quoted in the Service because foreign securities are subject to the twice-daily update limitation. Market makers in these securities will retain the options of entering: (1) Bid wanted/offer wanted indications; (2) quotations consisting solely of the firm's name and telephone number; and (3) indications of unsolicited customer interest.

Currently, market makers in these securities can elect to enter firm or non-firm priced bids/offers. Since the Service's inception, the NASD stated that it has found that firm prices—in the form of one and two-sided quotations—have been predominant among Service market makers in domestic issues.[4] Because these issues are not subject to any update limitation, many market makers actively compete for order flow by entering and updating firm quotations in domestic securities during the Service's business hours.

In addition, the NASD noted that some market makers have attempted to attract business by entering non-firm bids slightly better than the highest firm bid. When contacted about trading at the apparently "superior" price, the market maker expressed a willingness to transact at the highest firm bid rather than the indicative price. Because the superior price was not firm, the market maker could not be held to the bid he had entered. This practice may result in some diversion of order flow away from other market makers entering competitive, firm prices in the same security. More importantly, it detracts from the overall reliability of priced quotations being displayed in the Service for domestic issues. The NASD, therefore, decided to eliminate a market maker's option of displaying non-firm priced bids/offers in the Service for any domestic, non-NASDAQ security.

On October 15, 1990, the Securities Enforcement Remedies and Penny Stock Reform Act of 1990 ("Reform Act") was singed into law.[5] Among other things, the Reform Act amended the Securities Exchange Act of 1934 by adding new Section 17B, which requires the Commission to facilitate the development of one or more automated quotation systems for the collection and dissemination of information for all penny stocks. The findings in Section 17B note the lack of reliable and accurate quotation and last sale information for investors in "penny stocks."[6] That section also states that it is in the public interest and appropriate for the protection of investors and the maintenance of fair and orderly markets to improve significantly the information available with respect to quotations for and transactions in penny stocks. Finally, Congress found that a fully implemented automated quotation system would meet the information needs of investors and market participants and would add visibility to the penny stock market, as well as provide regulatory and surveillance data.

Section 17B, therefore, directs the Commission to "facilitate the widespread dissemination of reliable and accurate last sale and quotation information * * * with a view toward establishing, at the earliest feasible time, one or more automated quotation systems that will collect and

[2] See Securities Exchange Act Release No. 28940 (March 6, 1991), 56 FR 10602.

[3] Securities Exchange Act Release No. 27975 (May 1, 1990), 55 FR 19134. On May 3, 1991, the NASD submitted a proposed rule change to obtain authorization for an interim extension of the Service through November 30, 1991. See File No. SR-NASD-91-21.

[4] For example, the months of December 1990, and January 1991, revealed that firm prices (consisting of one and two-sided entries) were associated with 71.4% and 77% of total market maker positions, respectively.

[5] Securities Enforcement Remedies and Penny Stock Reform Act of 1990, signed October 15, 1990, Public Law 101-429, 15 U.S.C. 78q-2 (1990).

[6] "Penny stock" is defined in the legislation, subject to rules to be written by the Commission, as generally encompassing any stock other than: (a) Securities listed on an exchange that meet Commission criteria; (b) securities quoted on NASDAQ that meet Commission criteria; (c) registered investment companies; and (d) securities excluded by the Commission on the basis of a minimum price, net tangible assets or other criteria. The Commission proposed rules to implement the legislation on April 17, 1991. See Securities Exchange Act Release No. 29093.

VOL 56 ISS 123 JE 26 1991 UMI

disseminate information regarding all penny stocks." [7] Paragraph (b)(2)(C) of Section 17B provides that such a system collect and disseminate quotation and transaction information and provide firm bid and ask quotations of participating brokers and dealers. Paragraph (b)(2)(D) of this Section further states that an automated quotation system should also provide for the reporting of the volume of penny stock transactions, including last sale reporting when the volume reaches a certain level as specified by the Commission.

Congress also recognized that the NASD already had taken steps to increase the availability of trade and quotation data for surveillance purposes and to improve the quality of the market for these securities. Most notably, Congress acknowledged the development of the NASD's OTC Bulletin Board.[8]

The Commission has determined that it is appropriate to approve the NASD's proposed rule change because the Commission believes it is consistent with sections 15A(b) (6) and (11) of the Act.[9] Section 15A(b)(6) requires, among other things, that the NASD's rules be designed to promote just and equitable principles of trade, to facilitate transactions in securities, and to protect investors and the public interest. Section 15A(b)(11) authorizes the NASD to adopt rules governing the form and content of quotations for securities traded over-the-counter. Such rules should produce fair and informative quotations, prevent misleading quotations, and promote orderly procedures for collecting and disseminating quotations.

By requiring that all quotations for domestic issues entered into the system be firm, the NASD is furthering the execution of customer orders at the best available price and fair dealing among the Service market makers. This capability should enhance the efficiency of pricing and will assist market makers in negotiating the execution of customer orders at the best available price. The Commission also notes that the requirement that participants enter firm bid and ask prices makes the Bulletin Board closer to the automated quotation system envisioned by Section 17B of the Act.[10]

In light of these factors, the Commission believes that it is appropriate to approve the proposed rule change.

It is therefore ordered, pursuant to section 19(b)(2), of the Act that the proposed rule change be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[11]

Dated: May 31, 1991.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

[Release No. 34-29344; File No. SR-NASD-91-20]

Self-Regulatory Organization; Proposed Rule Change by National Association of Securities Dealers, Inc. Relating to Forwarding of Material on the Issuer's Behalf to Beneficial Owner of NASDAQ Securities

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on April 29, 1991, the National Association of Securities Dealers, Inc. ("NASD" or "Association") filed with the Securities and Exchange Commission ("Commission" or "SEC") a proposed rule change. The NASD subsequently filed an amendment thereto on June 11, 1991.[1] The proposed rule change is described in items I, II, and III below, which Items have been prepared by the NASD. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Proposed rule change amends the Interpretation of the Board of Governors—Forwarding of Proxy and Other Materials, Article III, section 1 of the NASD Rules of Fair Practice to create a uniform standard of duty among NASD members to forward material to beneficial owners furnished by the NASDAQ company that is the issuer of the securities.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the NASD included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The NASD has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

(a) The NASD has become aware that a disparity exists among different NASD members regarding their duty to forward beneficial owners the proxy and other material furnished by the NASDAQ company that is the issuer of the securities. The current Interpretation of the NASD Board of Governors—Forwarding of Proxy and Other Materials to Article III, section 1 of the Rules of Fair Practice ("Interpretation") limits the duty of a member to forward material furnished to it by the issuer of the securities to "all proxy material, annual reports, information statements and other material required by law to be sent to stockholders periodically." Currently, NASD members who are members of the New York Stock Exchange ("NYSE") are held to a broader standard under NYSE Rule 465 that requires a member organization to forward "copies of interim reports of earnings and other material being sent to stockholders." NYSE Rule 465 does not reference underlying requirements of law as a prerequisite of the NYSE member's duty to forward material. Under section 10 to the Supplementary Material to NYSE Rule 465, the duty of the NYSE member applies to forwarding material for both listed and unlisted companies.[2]

A NASDAQ company requesting that material be forwarded to its beneficial owners may receive different levels of service from certain NASD members resulting from the application of NYSE Rule 465 to NASD members that are NYSE-affiliated and the NASD standard of duty imposed on NASD members that are not affiliated with the NYSE. To eliminate the potential disparity of service to NASDAQ companies, the NASD is proposing to amend the Introduction to the Interpretation to reflect the same standard as the NYSE.

Currently, NASD members are reimbursed for expenses incurred in forwarding other material pursuant to section 4 of the Interpretation. The NASD proposes to amend section 4 and the appendix to the Interpretation to clarify the application of the reimbursement rate to the additional material required to be forwarded under this proposed amendment.

Finally, the NASD is proposing two minor changes to the language of the Introduction to the Interpretation that would add a comma and delete the word "therefore."

(b) The proposed rule change is consistent with the provisions of section 15A(b)(6) of the Act, which requires, among other things, that the rules of the Association be designed to "foster cooperation and coordination with persons engaged in regulating clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and in general, to protect investors and the public interest."

B. Self-Regulatory Organization's Statement on Burden on Competition

The NASD does not believe that the proposed rule change imposes any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

A. By order approve such proposed rule change, or

B. Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comment

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of the filing will also be available for inspection and copying at the principal office of the NASD. All submissions should refer to the file number in the caption above and should be submitted by July 17, 1991.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority, 17 CFR 200.30-3(a)(12).

Dated: June 19, 1991.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

[Release No. 34-29339; File No. SR-NASD-91-26]

Self-Regulatory Organizations; Proposed Rule Change by National Association of Securities Dealers, Inc. Relating to Preferencing Orders in the Small Order Execution System

Pursuant to section 19(b)(1) of the Securities and Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on May 31, 1991, the National Association of Securities Dealers, Inc. ("NASD" or Association") filed with the Securities and Exchange Commission ("Commission" or "SEC") the proposed rule change as described in items I, II, and III below, which Items have been prepared by the NASD. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The NASD is proposing to amend the Rules of Practice and Procedure of the Small Order Execution System ("SOES") to allow market makers to decline preferencing by order entry firms.[1]

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the NASD included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in item IV below. The NASD has prepared summaries, set forth in sections (A), (B) and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The Association is proposing to amend the Rules of Practice and Procedure for the Small Order Execution System to permit preferencing of orders to market makers only when those market makers agree to be preferenced. SOES is designed to improve the efficiency of executing small-sized customer orders in NASDAQ securities by offering an alternative to traditional telephone negotiation with market makers.[2] SOES provides automated execution of small customer orders with NASDAQ market makers at the best available market price in one of two ways—a preferenced order may be routed to a particular market maker in the stock and will be executed at the best posted bid or offer in the system (the inside quote), or an unpreferenced order will be executed against any market maker at the price in the security.

---

[1] 15 U.S.C. 78-2 (1990).

[8] H.R. 5325, 101st Cong., 2nd Sess. (1990), ("House Report").

[9] 15 U.S.C. 78o-3 (1982).

[10] Because, the Reform Act directs the Commission to facilitate the dissemination of quotation and last sale information through one or more automated quotation systems, the Commission staff has requested that the NASD ascertain what other steps it will take to conform the Bulletin Board to the requirements for penny stock quotation systems in Section 17B. Specifically, the Commission staff has recommended that the NASD consider making available certain transaction information reported pursuant to Schedule H of the NASD By-Laws.

[11] 17 CFR 200.30-3(a)(12).

[1] See letter from Frank J. Wilson, Executive Vice President and General Counsel, NASD, to Katherine A. England, Branch Chief, SEC, dated June 11, 1991.

[2] See also NYSE Rule 451 which contains a broader standard for forwarding proxy information than that required by the NASD's Rules of Fair Practice. The NASD has agreed to take this issue to the appropriate NASD committees for discussion.

[1] On April 18, 1991, the NASD filed a proposed rule change in File No. SR-NASD-91-18 which would, among other things, clarify that if a market maker declines preferencing, and order preferenced to that market maker shall be executed on an unpreferenced basis (*i.e.*, in rotation against other market makers, if any). See Securities Exchange Act Release No. 29182 (May 9, 1991), 56 FR 22498 (May 15, 1991). The instant proposed rule change, if approved, would amend the proposed rule in File No. SR-NASD-91-18 by clarifying that an order received by a market maker from an order entry firm from which it has not agreed to accept preferencing will be executed at the inside market on an unpreferenced basis.

[2] The NASD has recently filed three proposed rule changes that attempt to remedy alleged abuses of SOES. See, NASD-90-88, Securities Exchange Act Release No. 28709 (December 19, 1990), 55 FR 53224 (December 27, 1990); NASD-91-17, Securities Exchange Act Release No. 29181 (May 9, 1991), 56 FR 22495 (May 15, 1991); and NASD-91-18, Securities Exchange Act Release No. 29182 (May 9, 1991), 56 FR 22498 (May 15, 1991).

VOL
56
ISS
123
JE
26
1991
UMI

Preferencing orders to specific market makers was originally permitted in SOES to accommodate the established order routing practices in the market, so that order entry firms and market makers could continue their order routing arrangements using SOES. Because any order entered into SOES is assured the "best" market price for execution, preferenced orders are executed at the inside bid and or offer regardless of the price being quoted by the market maker receiving the order. This assurance of "price protection" to all orders entered into SOES was and is a key element in the operation of the system.

Currently, market makers may decide to accept preferencing on a stock-by-stock basis, but if a market maker elects to accept preferencing in a stock, it is required to accept all orders preferenced to it from all order entry firms and must execute any such preferenced order at the inside quotation. Abuses occur in SOES when one market maker is slow in updating a quotation and preferenced market makers are forced to execute trades at the quotation of the market maker that is not monitoring the market. This occurs in fast moving markets, where the market maker's quote that has not been updated establishes an inside quotation not truly reflective of the changing market or of the other market makers' updated quotations. An order sent to a preferenced market maker must be executed at this inside quotation, notwithstanding the fact that the market maker may have changed its quotes in a timely manner.

The NASD has received reports that some order entry firms may preference market makers purposefully and opportunistically to cause executions at the untimely inside quotation, thus abusing the original intent of the preferencing allowances. To remedy this situation the NASD is recommending that market makers be provided the same flexibility to accept preferenced executions on a firm-by-firm basis as is now provided with the stock-by-stock criteria currently in place. With this enhanced flexibility, market makers would execute preferenced orders at the inside quotation from order entry firms that they have agreed to acknowledge, and the system would treat all other preferenced orders on an unpreferenced basis.

This modification to the system would have no impact on the orders being executed within SOES—orders entered would receive the same quality execution as they do in the system today. To summarize:

- Execution of orders preferenced to market makers by order entry firms is required only when mutually agreed upon by both parties to the transaction; and
- Preferenced orders to market makers that have not agreed to accept preferencing from the particular order entry firm will be executed in SOES as if unpreferenced, that is, on a rotational basis against market makers at the best posted bid or offer in the system.

The NASD believes the proposed rule change is consistent with section 15A(b)(6) of the Act. Section 15A(b)(6) requires that the rules of a national securities association be designed to "foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market." SOES operates to facilitate automated executions of customer orders and the NASD believes the proposed amendment will curb misuse of the system.

B. Self-Regulatory Organization's Statement on Burden on Competition

The NASD believes that the proposed rule change will not result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

Comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the Federal Register or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the NASD consents, the Commission will:

A. By order approve such proposed rule change, or

B. Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of such filing will also be available for inspection and copying at the principal office of the NASD. All submissions should refer to the file number in the caption above and should be submitted by July 17, 1991.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority, 17 CFR 200.30-3(a)(12).

Dated: June 19, 1991.

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 91-15117 Filed 6-25-91; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 34-28326; File No. SR-PSE-91-20]

Self-Regulatory Organizations; Pacific Stock Exchange, Inc.; Filing and order Granting accelerated Approval to Proposed Rule Change Extending Effectiveness of Ten-Up Pilot Program

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b-4 thereunder,[2] the Pacific Stock Exchange, Inc. ("PSE" or "Exchange") on June 4, 1991, filed with the Securities and Exchange Commission ("Commission") a proposed rule change as described in items I, II and III below, which items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The PSE proposes to extend the Exchange's Trading Crowd Firm Disseminated Market Quote ("ten-up Rule) pilot program through November 15, 1991.[3]

[1] 15 U.S.C. 78s(b)(1) (1982).

[2] 17 CFR 240.19b-4 (1989).

[3] The Exchange's ten-up Rule requires PSE trading crowds to provide a depth of ten contracts for all

Continued

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In May 1990, the Commission approved the exchange's ten-up Rule on a one-year basis.[4] The PSE is now requesting a six-month extension of the current program through November 15, 1991, in order to fully assess the effectiveness of the program. Upon completion of its evaluation, the PSE will submit a proposal requesting permanent approval of the rule.

The PSE reports that, since its inception, the ten-up Rule has enhanced the Exchange's marketplace in several ways. First, the implementation and enforcement of the rule has resulted in the protection of public investors through better guaranteed executions for their orders. Second, the program, by promoting public interest, has aided the Exchange in maintaining its competitiveness as a marketplace.

The PSE believes the proposed rule change is consistent with section 6(b)(5) of the Act, in that it promotes just and equitable principles of trade and protects the investing public.

(B) Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change imposes a burden on competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

Written comments on the proposed rule change were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange requests that the proposed rule change be given accelerated approval pursuant to section 19(b)(2) of the Act. The Commission finds that the proposed rule change is consistent with the requirements of the act and the rules and regulation thereunder, and, in particular, the requirements of section 6, 11(b), and 11A thereunder, in that it will result in improved quality of PSE options markets and better market maker performances. The ten-up Rule provides public customers with the assurance of order execution to a minimum depth of ten contracts at the best disseminated bid or offer. This results in better executions of small customer orders by ensuring greater depth to the PSE options markets.[5]

Before seeking permanent approval of the ten-up Rule, the Commission expects that the Exchange will study the operation of the ten-up Rule and its effect, if any, on the PSE's options market. Specifically, the Exchange should study the effect of the ten-up Rule on the speed of execution of trades, its impact on average bid ask spreads and any increase or decrease in market depth. The Commission also expects that the Exchange will provide a report to the Commission of its findings on these matters, along with any violations of the ten-up Rule and any complaints about its operations, prior to filing a proposal for the permanent approval of the ten-up Rule.

The Commission finds good cause for approving the proposed rule change prior to the thirtieth day after the date of publication of notice thereof in the Federal Register because of the importance that the Ten-Up pilot program continue uninterrupted. A six-month extension of the pilot also will provide the PSE with additional time to study the effectiveness of the ten-up Rule in improving the quality of PSE options markets and market maker performance. The PSE's study would be a significant factor in the commission's analysis of any PSE filing proposing permanent approval of the ten-up Rule. The Commission believes, therefore, that granting accelerated approval of the proposed rule change is appropriate and consistent with Section 6 of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the PSE. All submissions should refer to File No. SR-PSE-91-20 and should be submitted by July 17, 1991.

It is therefore ordered, Pursuant to section 19(b)(2) of the Act,[6] that the proposed rule change (File No. SR-PSE-91-20) is approved until November 15, 1991, on an accelerated basis.

For the Commission by the Division of Market Regulations, pursuant to delegated authority.

Dated: June 17, 1991.

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 91-15118 Filed 6-25-91; 8:45 am]

BILLING CODE 8010-01-M

[Docket No. 34-29343; File No. SR-PHLX-91-09]

Self-Regulatory Organizations; Filing and Order Granting Accelerated Approval of Proposed Rule Change by Philadelphia Stock Exchange, Inc. Relating to Fines for Violations of Order and Decorum Rules

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on May 9, 1991, the Philadelphia Stock Exchange, Inc. ("PHLX") filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The PHLX proposes to amend Regulation 4—Order, an order and decorum regulation enacted under PHLX Rule 60, to impose a $50 fine for the first occurrence of disorderly conduct, a $1,000.00 fine for abuse of the Exchange's paging system, a $250.00 fine for inciting physical abuse, a $500.00 fine for minor acts of physical abuse (*e.g.*, pushing) and a $1,000.00 fine majors act of physical abuse (*e.g.*, pushing).

non-broker/dealer customer orders, at the disseminated market quote at the time such orders are announced or displayed at a trading post. See Securities Exchange Act Release No 28021 (May 18, 1990), 55 FR 21131 (Ten-Up Approval Order).

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

PHLX Regulation 4—Order, an order and decorum regulation enacted under PHLX Rule 60,[1] currently imposes a $1,000.00 fine for carrying firearms on the trading floor and a $1,000.00 fine for each occurance of fighting or other physical abuse. PHLX Rule 60 also establishes a schedule of fines imposed for acting in a disorderly manner. The PHLX proposes to amend Regulation 4 to impose a $50.00 fine for the first occurrence of disorderly conduct, a $1,000.00 fine for abuse of the Exchange's paging system, a $250.00 fine for inciting an incident of physical abuse, a $500.00 fine for minor acts of physical abuse (*e.g.*, pushing) and a $1,000.00 fine for major acts of physical abuse (*e.g.*, pushing). Specifically, with respect to actual fighting, each abusive incident will be classified as constituting either a minor or major incident of physical abuse. Pushing, for example, is a minor act of physical abuse, and will carry a fine of $500; punching is a major act of physical abuse, and will carry a fine of $1,000.00. Under the proposal, a Floor Official will determine whether an incident constitutes a major or minor act of physical abuse. The PHLX will endorse Regulation 4 by issuing a fine for a single fight, not for each blow dealt in the fight.[2] Where an act of physical abuse is deemed particularly egregious, or where an individual has established a pattern of Order violations, two Floor Officials may refer the matter to the Business Conduct Committee, which may impose additional fines and sanctions. The PHLX seeks to expand the application of Regulation 4 to better maintain order on the Exchange's trading floor, including the safety, health and security of all persons present on the trading floor.

In addition, the proposal provides several additions to expand the scope of Regulation 4, including a $1,000.00 fine for abuse of the paging system on the trading floor. The paging system is accessible from most floor post locations by telephone, connecting the speaker to a public address system audible throughout the equity options trading floor and contiguous areas. The PHLX believes that abusing the system prevents its intended use as a means of communicating with Exchange participants for Exchange related purposes and also disrupts ordinary floor operations by distracting and disturbing those present on the floor.

In order to deter fighting, the PHLX also proposes a fine of $250.00 for inciting physical abuse. The PHLX believes that thwarting fights by punishing the participants afterward is insufficient; the deterrence also should begin at the provocation stage. For example, if X provokes B into fighting with A, X has violated the proposed rule and shall incur a fine of $250, whether or not A and B actually fight.

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act, in general, and futhers the objectives of Section 6(b)(5), in particular, in that it is designated to promote just and equitable principles of trade and to maintain a fair and orderly market.

(B) Self-Regulatory Organization's Statement on Burden on Competition

The PHLX does not believe that the proposed rule change will impose any burden on competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has requested that the proposed rule change be given accelerated effectiveness pursuant to section 19(b)(2) of the Act.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of Sections 6(b)(5) and (6) thereunder because the proposal provides appropriate sanctions for members who violate the rules of the Exchange and because the proposal is designed to perfect the mechanism of a free and open market and to protect investors and the public interest. The Commission believes that the addition of fines for abuse of the Exchange's paging system, for inciting physical violence, and for the first occurrence of disorderly conduct provides a reasonable means by which the Exchange may prevent disruptive conduct and maintain order and safety on its trading floor. By preventing disruptive conduct, the proposal should enhance the ability of PHLX members to engage in transactions in securities, thereby contributing to fair and orderly markets and the efficient execution of transactions. In addition, the classification of physical violence into major and minor incidents of abuse, which carry fines of $1,000.00 and $500.00 per occurrence, respectively, will provide appropriate sanctions for different levels of misconduct. Because the proposal defines the scope of prohibited conduct, provides notice to members, and is tailored to serve a legitimate Exchange regulatory interest, the proposal provides fair and reasonable procedures for the regulation of trading floor conduct.

The Commission finds good cause for approving the proposal prior to the thirtieth day after the date of publication of notice thereof in the Federal Register because of the importance of maintaining order on the Exchange's trading floor. The Exchange must provide an orderly trading floor in order to maintain the quality of its markets. The proposed rule change is designed to prevent disruptive conduct on the trading floor, and is vital to ensuring the orderly operation of the Exchange. Accordingly, the Commission believes that good cause exists to approve the rule filing on an accelerated basis.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submission should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by July 17, 1991.

It is therefore ordered, Pursuant to section 19(b)(2) of the Act,[3] that the proposed rule change (SR-PHLX-91-09) is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: June 19, 1991.

Margaret H. McFarland,

Deputy Secretary.

[Release No. 34-29324; File No. SR-PHLX-91-16]

Self-Regulatory Organizations; Filing of Proposed Rule Change by Philadelphia Stock Exchange, Inc., Relating to Options Floor Procedure Advice A-13—Auto Execution Engagement/Disengagement Responsibility

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on May 24, 1991, the Philadelphia Stock Exchange, Inc. ("PHLX") or "Exchange") filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The PHLX proposes to adopt new Options Floor Procedure Advice ("OFPA") A-13, entitled "Auto Execution Engagement/Disengagement Responsibility," which will require options specialists to activate the Automatic Execution ("Auto-X") feature of the Exchange's Automated Options Market ("AUTOM") system [1] within three minutes of concluding an opening or reopening rotation of an options class and provide that options specialists may only disengage Auto-X under extraordinary circumstances with the prior approval of two Floor Officials. The text of the proposed rule change is available at the Office of the Secretary, PHLX and at the Commission.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The PHLX proposes to adopt new OFPA A-13 to govern the engagement and disengagement of Auto-X. Currently, floor operations personnel activate Auto-X, and each specialist must contact this staff in order to activate or deactivate Auto-X. In the future, the PHLX intends to implement a mechanism which will allow each specialist to activate Auto-X from each trading post on the floor. Under proposed OFPA A-13, each option specialist will be required to engage Auto-X for an assigned option within three minutes of completing the opening or reopening rotatation of that option. This three-minute time frame corresponds to the period when the duty to provide ten-up markets begins.

In addition, the proposal provides that a specialist may be exempted from receiving orders through Auto-X under extraordinary circumstances, and may disengage the system upon approval by two Floor officials.

Proposed OFPA A-13 provides the following schedule of fines and sanctions for failure to engage Auto-X: (1) A warning for the first occurrence; (2) fines in the amount of $100.00, $250.00, and $500.00, respectively, for the second, third and fourth occurrences; and (3) a sanction discretionary with the Business Conduct Committee for the fifth occurrence and subsequent violations. The proposal also imposes a $500.00 fine for the first failure to disengage Auto-X without prior approval, and a sanction discretionary with the Business Conduct Committee for subsequent violations.

The PHLX states that the purpose of the proposed rule change is to maximize floor-wide use of the Auto-X feature of AUTOM so that the system's benefits may be extended to more PHLX member firms and customers. The PHLX represents the AUTOM and Auto-X increase the speed and efficiency of routing and executing orders on the PHLX. Thus, the PHLX maintains that the proposed rule change is consistent with the Act, and, in particular, with section 6(b)(5), because it is designed to foster coordination among those facilitating transactions in and processing information regarding securities and because it is designed to prevent fraudulent and manipulative acts and practices by providing a uniform standard for options specialists to activate and deactivate Auto-X.

(B) Self-Regulatory Organization's Statement on Burden on Competition

The PHLX does not believe that the proposed rule change will impose any inappropriate burden on competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the Federal Register or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reason for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(a) By order approve such proposed rule change, or

[1] AUTOM is an electronic system that allows delivery of small options orders from member firms directly to the PHLX trading floor and also provides automatic execution for certain options orders.

SMALL BUSINESS ADMINISTRATION

[Declaration of Disaster Loan Areas #2511 and #2512]

Kentucky (With Contiguous Counties in Tennessee); Declaration of Disaster Loan Area

Logan County and the contiguous counties of Butler, Muhlenberg, Simpson, Todd, and Warren in the State of Kentucky and Robertson County in the State of Tennessee constitute a disaster area as a result of damages caused by tornadoes, severe storms, torrential rains, and flooding which occurred between March 22 and April 1991. Applications for loans for physical damage as a result of this disaster may be filed until the close of business on August 12, 1991 and for economic injury until the close of business on March 12, 1992 at the address listed below: Disaster Area 2 Office, Small Business Administration, One Baltimore Place, suite 300, Atlanta, GA 30308, or other locally announced locations.

The interest rates are:

	Percent
For Physical Damage:	
Homeowners with credit available elsewhere	8.000
Homeowners without credit available elsewhere	4.000
Businesses with credit available elsewhere	8.000
Business and non-profit organizations without credit available elsewhere	4.000
Others (including non-profit organizations) with credit available elsewhere	9.125
For Economic Injury:	
Businesses and small Agricultural cooperatives without credit available elsewhere	4.000

The numbers assigned to this disaster for physical damage are 251112 for Kentucky and 251212 for Tennessee. For economic injury the numbers are 733000 for Kentucky and 733100 for Tennessee.

(Catolog of Federal Domestic Assistance Program Nos. 59002 and 59008)

Dated June 12, 1991.

June M. Nichols,

Acting Administrator.

Interest Rates

The interest rate on section 7(a) Small Business Administration direct loans (as amended by Pub. L. 97-35) and the SBA share of immediate participation loans is 9⅛ percent for the fiscal quarter beginning July 1, 1991.

On a quarterly basis, the Small Business Administration also publishes an interest rate called the optional "peg" rate (13 CFR 122.8-1(d)). This rate is a weighted average cost of money to the government for maturities similar to the average SBA loan. This rate may be used as a base rate for guaranteed fluctuating interest rate SBA loans. For the July-September quarter of FY 91, this rate will be 8⅛ percent.

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[BS-AP-NO. 3041]

Consolidated Rail Corp.; Public Hearing

The Consolidated Rail Corporation has petitioned the Federal Railroad Administration (FRA) seeking approval of the following: The proposed discontinuance and removal of the traffic control system on the single main track from Hornell, New York, Case Street Interlocking, milepost 331.0, to Salamanca, New York, "WC" Interlocking, milepost 414.0, on the Meadville Line of the Albany Division; classify the main track as a secondary track; and operate under manual block signal system rules with block limit stations at Wells, milepost 358.5, Cuba, milepost 383.8, and Sal, milepost 410.7. This proceeding is identified as FRA Block Signal Application Number 3041.

The FRA has issued a public notice seeking comments of interested parties and conducted a field investigation in this matter. After examining the carrier's proposal and the available facts, the FRA has determined that a public hearing is necessary before a final decision is made on this proposal.

Accordingly, a public hearing is hereby set for 10 a.m. on Thursday, August 22, 1991, in room 165 of the New York State Office Building located at 107 Broadway Street in Hornell, New York. Interested parties are invited to present oral statements at the hearing.

The hearing will be an informal one and will be conducted in accordance with rule 25 of the FRA Rules of Practice (49 CFR 211.25), by a representative designated by the FRA.

The hearing will be a nonadversary proceeding and, therefore, there will be no cross-examination of persons presenting statements. The FRA representative will make an opening statement outlining the scope of the hearing. After all initial statements have been completed, those persons wishing to make brief rebuttal statements will be given the opportunity to do so in the same order in which they made their initial statements. Additional procedures, if necessary for the conduct of the hearing, will be announced at the hearing.

Issued in Washington, DC on June 18, 1991.

Grady C. Cothen, Jr.,

Associate Administrator for Safety.

BILLING CODE 4910-06-M

[BS-AP-NO. 3068, 3071, and 3072]

Wheeling and Lake Erie Railway Co. Public Hearing

The Wheeling & Lake Erie (W&LE) Railway Company has petitioned the Federal Railroad Administration (FRA) seeking approval of the following: the proposed discontinuance and removal of the traffic control system on the railroad formerly known as the Pittsburgh and West Virginia, from Pittsburgh Junction, Ohio, milepost C-111.20 to Cesnellsville, Pennsylvania, milepost C-0.00, including the Mifflin Branch (3.5 miles) and the Clairton branch (5.8 miles); the proposed discontinuance and removal of the traffic control system from Richville, Ohio, milepost CZ 65.9, to Run Junction, Ohio, milepost CZ 72.1, on the Canton District of the W&LE Railway Company; and the proposed discontinuance and removal of the traffic control system from Adena, Ohio, milepost T-182.9 to Rexford, Ohio, milepost T-184.1 on the Valley Branch, Pittsburgh Division. These proceedings are identified as FRA Block Signal Application Numbers 3068, 3071, and 3072 respectively.

The FRA has issued a public notice seeking comments of interested parties and conducted a field investigation in this matter. After examining the carrier's proposal and the available facts, the FRA has determined that a public hearing is necessary before a final decision is made on this proposal.

Accordingly, a public hearing is hereby set for 10 a.m. on Tuesday, August 20, 1991, in room 2212 of the William S. Moorhead Federal Building located at 1000 Liberty Avenue in Pittsburgh, Pennsylvania. Interested parties are invited to present oral statements at the hearing.

The hearing will be an informal one, and will be conducted in accordance with rule 25 of the FRA Rules of Practice (49 CFR 211.25), by a representative designated by the FRA.

The hearing will be a nonadversary proceeding and, therefore, there will be no cross-examination of persons presenting statements. The FRA representative will make an opening statement outlining the scope of the hearing. After all initial statements have been completed, those persons wishing to make brief rebuttal statements will be given the opportunity to do so in the same order in which they made their initial statements. Additional procedures, if necessary for the conduct of the hearing, will be announced at the hearing.

Issued in Washington, DC on June 18, 1991.

Grady C. Cothen, Jr.,

Associate Administrator for Safety.

BILLING CODE 4910-06-M

Maritime Administration

Change of Name and Removal From Roster of Approved Trustees

Notice is hereby given pursuant to 46 CFR part 221 that on October 1, 1990, First Pennsylvania Bank, N.A., SE. Corner, 15th and Chestnut Streets, Philadelphia, Pennsylvania, merged with and into the entity previously named the Philadelphia National Bank, Broad and Chestnut Streets, Philadelphia, Pennsylvania. As the survivor of said merger, the Philadelphia National Bank changed its name to CoreStates Bank, N.A., and continues on the Roster of Approved Trustees under its new name. Therefore, the old entity named First Pennsylvania Bank, N.A., is removed from the Roster of Approved Trusteers, pursuant to Public Law 100-710 and 46 CFR 221.55 (successor to Public Law 89-346 and 46 CFR 221.221.30).

Dated: June 20, 1991.

By Order of the Maritime Administrator.

James E. Saari,

Secretary.

BILLING CODE 4910-81-M

National Highway Traffic Safety Administration

Denial of Motor Vehicle Defect Petition

This notice sets forth the reasons for the denial of a petition submitted to the National Highway Traffic Safety Administration (NHTSA) under section 124 of the National Traffic and Motor Vehicle Safety Act of 1966 (the Act), as amended (15 U.S.C. 1381 *et seq.*)

VOL 56 ISS 123 JE 26 1991 UMI

The Center for Auto Safety (CAS) submitted a petition dated February 19, 1991, requesting NHTSA to investigate the automatic shoulder belts of 1988 Sterling 825 SL vehicles. As the basis for the petition, CAS submitted two similar reports of chronic automatic shoulder belt failures on these vehicles.

On May 14, 1991, NHTSA received a safety defect information report from Sterling Motor Cars (Sterling) stating that Sterling would conduct a safety-related defect remedy campaign covering all Sterling 825 SL vehicles, model years 1987 and 1988, equipped with automatic shoulder belts (NHTSA Recall No. 91V-077). Through an upgrade campaign (referred to as Action Code F750 by Sterling) which started in December 29, 1988, Sterling replaced the belts on 65 percent and 72 percent of model year 1987 and 1988 vehicles, respectively, with the belts used in 1989 and later model year vehicles. Therefore, Sterling will notify only the remaining owners of these vehicles to replace the belts with the belts useds in 1989 and later model year vehicles. Because the manufacturer has taken action to remedy all model year 1987 and 1988 vehicles, including a recall action under the requirements of the Act, CAS's petition was denied.

Authority: Sec. 124, Pub. L. 93-492; 88 Stat. 1470 (15 U.S.C. 1410a); delegations of authority at 49 CFR 1.50 and 501.8

Issued on: June 13, 1991.

William A. Boehly,

Associate Administrator for Enforcement.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

[Delegation Order No. 238]

Delegation of Authority in the Actuarial Resolutions Program

AGENCY: Internal Revenue Service, Treasury.

ACTION: Delegation of authority.

SUMMARY: Delegation Order No. 238 permits authority to be delegated to EP/EO Division Chiefs to enter into Closing Agreements relating to Internal Revenue Liability in cases under the Actuarial Resolutions Program. The authority delegated extends to the penalties and excise taxes arising out of or relating to the pension deductions at issue. The agreements may address to total tax liability of the person for the years at issue. The Chief, EP/EO Division is authorized to redelegate his authority to EP/EO Management Officials not below grade GM-13. The text of the delegation order appears below.

EFFECTIVE DATE: July 1, 1991.

FOR FURTHER INFORMATION CONTACT: Monty Wolf, E:O:E, room 2238, 1111 Constitution Avenue, NW., Washington, DC 20224, (202) 566-6361 (not a toll free call).

[Order No. 238]

Effective Date: July 1, 1991.

Delegation of Authority in the Actuarial Resolutions Program

The authority vested in the Commissioner of the Internal Revenue by 26 CFR 301.6020-1, 26 CFR 301.7121-1(a), 26 CFR 301.7701-9, and Treasury Order No. 150-7, Treasury Order No. 150-9, and Treasury Order No. 150-10, as revised, authorizes the execution of closing agreements with taxpayers on EP actuarial cases with respect to the tax liability resulting from adjustments to the pension deduction (Actuarial Resolutions Program), and is hereby delegated as follows:

1. The Assistant Commissioner (EP/EO), the Assistant Regional Commissioners (Examination), and District Directors are hereby authorized in cases under their jurisdiction to enter into and approve a written agreement with any person or persons relating to the Internal Revenue liability of such person or persons (or of the person or persons or estate for whom he/she acts) to close cases under the Actuarial Resolutions Program. The authority delegated herein extends to the penalties and excise taxes arising out of or relating to the pension deductions at issue. The agreements may address the total tax liability of the person for the years at issue. The agreements will be Agreements as to Specific Matters and as to Final Determinations of Tax Liability.

2. The Assistant Regional Commissioners (Examination) and the District Directors may redelegate their authority over these cases (including TEFRA Partnership Key cases and the related Investor cases) to the Chief, EP/EO Division, in the Key District Office in their region/district. The Chief, EP/EO Division, is authorized to further redelegate his/her authority to EP/EO Management Officials not below grade GM-13.

3. This delegation order will remain in effect until such time as the Actuarial Resolutions Program is withdrawn by the Internal Revenue Service.

Dated: June 14, 1991.

David G. Blattner,

Chief Operations Officer.

Sunshine Act Meetings

Federal Register
Vol. 56, No. 123
Wednesday, June 26, 1991

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

SECURITIES AND EXCHANGE COMMISSION

Agency Meetings

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94-409, that the Securities and Exchange Commission will hold the following meetings during the week of June 24, 1991.

A closed meeting will be held on Tuesday, June 25, 1991, at 2:30 p.m. An open meeting will be held on Thursday, June 27, 1991, at 10:00 a.m.

Commissioners, Counsel to the Commissioners, the Secretary to the Commission, and recording secretaries will attend the closed meeting. Certain staff members who have an interest in the matters may also be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, one or more of the exemptions set forth in 5 U.S.C. 552b(c) (4), (8), (9)(A) and (10) and 17 CFR 200.402(a) (4), (8), (9)(i) and (10), permit consideration of the scheduled matters at a closed meeting.

Commissioner Fleischman, as duty officer, voted to consider the items listed for the closed meeting in a closed session.

The subject matter of the closed meeting scheduled for Tuesday, June 25, 1991, at 2:30 p.m., will be:

Institution of administrative proceedings of an enforcement nature.
Settlement of administrative proceedings of an enforcement nature.
Institution of injunctive actions.
Settlement of injunctive actions.
Formal order of investigation.
Withdrawal of injunctive action.

The subject matter of the open meeting scheduled for Thursday, June 27, 1991, at 10:00 a.m., will be:

The Commission will hear oral argument on appeals from the decision of an administrative law judge by Donald T. Sheldon, president of both Donald Sheldon & Co., Inc., a registered broker-dealer, and Donald Sheldon Government Securities, Inc., a dealer in U.S. Government-backed securities; Bruce W. Reid, branch manager of the firms' Houston office; and the Commission's Division of Enforcement. For further information, please contact Kermit B. Kennedy at (202) 272-7400.

At times, changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Jonathan Gottlieb at (202) 272-2200.

Jonathan G. Katz,

Secretary.

Dated: June 14, 1991.

Margaret H. McFarland,

Deputy Secretary.

1991-1992 Seasons and Bag Limits for Subsistence Management Regulations for Public Lands in Alaska, Final Temporary Rule

AGENCY: Forest Service, USDA. Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: This rule amends the Temporary Subsistence Management Regulations for Public Lands in Alaska implementing the subsistence priority for rural residents of Alaska under title VIII of the Alaska National Interest Lands Conservation Act (ANILCA) of 1980 by making limited changes to subpart D to provide for the seasons and bag limits for the 1991-92 regulatory year, and by simplifying previous language. The changes are necessary because the Temporary Regulations were specific to conditions and biological knowledge that existed previously, the situation with regard to this program is changing rapidly, and opportunities exist to reduce public confusion relative to the program. This action clarifies the regulations and makes them more attuned to the subsistence user relative to the present status of wildlife populations, while still providing adequate protection for the fish and wildlife populations on public lands. Subpart D must be used in conjunction with subparts A, B and C.

EFFECTIVE DATE: July 1, 1991.

FOR FURTHER INFORMATION CONTACT: Richard S. Pospahala, Office of Subsistence Management, U.S. Fish and Wildlife Service, 1011 E. Tudor Road, Anchorage, Alaska 99503; telephone (907) 786-3447. For questions specific to National Forest System lands, contact Norman Howse, Assistant Director, Subsistence, USDA—Forest Service, Alaska Region, P.O. Box 21628, Juneau, Alaska 99802; telephone (907) 586-8890.

SUPPLEMENTARY INFORMATION:

Background

Title VIII of the Alaska National Interest Lands Conservation Act (ANILCA) (16 U.S.C. 3111-3128) requires the Secretary of the Interior and the Secretary of Agriculture (Secretaries) to implement a joint program to grant a preference in favor of subsistence uses of fish and wildlife resources on public lands unless the State of Alaska enacts and implements laws of general applicability consistent with ANILCA's requirements for the definition, preference and participation specified in sections 803, 804 and 805. The State implemented such a program which the Department of the Interior previously found to be consistent with ANILCA. In December 1989, however, the Alaska Supreme Court ruled in *McDowell v. State of Alaska* that the rural preference in the State subsistence statute, which is required by ANILCA, violated the Alaska Constitution. The Court stayed the effect of the decision until July 1, 1990.

As a result of that decision, the Department of the Interior and the Department of Agriculture (Departments) were required to take over the implementation of title VIII of ANILCA on Federal public lands on July 1, 1990. On June 29, 1990 the Temporary Subsistence Management Regulations for Public Lands in Alaska were published in the Federal Register (55 FR 27114). This program is administered by a Federal Subsistence Board (Board) made up of representatives of the U.S. Fish and Wildlife Service, National Park Service, Bureau of Land Management, Bureau of Indian Affairs and USDA-Forest Service. These five agencies within the Federal Government are responsible for management of lands covered by title VIII of ANILCA. All agencies cooperatively developed these regulations. All Board members have reviewed this rule and concur in its implementation. Because these regulations relate to lands managed by agencies in both the Departments of Agriculture and the Interior, identical text is hereby incorporated into 36 CFR part 242 and 50 CFR part 100.

These season and bag limit changes will impact the subsistence uses of fish and wildlife resources on Federal public lands in Alaska managed by the Fish and Wildlife Service, National Park Service, Bureau of Land Management, USDA-Forest Service, Bureau of Indian Affairs, Air Force, Army and various other Federal land managing agencies.

The Board has realized that changes were needed in the seasons and bag limits in subpart D, to protect various wildlife populations, recognize changes in population status, better meet the needs of the subsistence users, and to simplify the earlier regulations. Because of these problems, the Board issued on December 15, 1990, a notice calling for proposed changes to the seasons and bag limits for the regulatory period beginning July 1, 1991. The closing date for these proposals was January 15, 1991. The Board received 162 proposals which were then examined by an interagency Staff Committee. A number of those proposals were beyond the scope of regulation changes for the 1991-92 season. These included proposals to change the structure of Federal subsistence management, proposals dealing with the advisory council system, proposals addressing navigable waters, and proposals which address customary and traditional determination issues. There were 104 such proposals, which the Board referred to the environmental impact statement team and other members of the subsistence staff preparing final regulations and reviewing public comment on these specific subjects.

The remainder of the proposals were closely examined by the Board during a public meeting conducted March 4-7, 1991. At that time, comments were solicited on each proposal and the Board took formal action to propose regulations. The Proposed Regulations were published in the Federal Register (56 FR 15402) on April 16, 1991, and a public hearing to receive comments was conducted in Anchorage on April 24, 1991. Because of the short time available, the opportunity for public review and comment after publishing in the Federal Register was limited.

An extension of the effective date of the Temporary Federal Subsistence Management Regulations would provide adequate time for a detailed public review period during the development of permanent regulations and preparation of an environmental impact statement, and to align the regulations with the traditional regulatory year within the State of Alaska. A separate rulemaking to extend the Temporary Regulations will be pursued soon. Consequently the seasons and bag limits herein reflect a complete regulatory year although they presently will expire on December 1, 1991. During the public comment period for the Temporary Regulations, numerous entities were concerned about the short review period and requested more review time during the development of the final regulations. Historically, the regulatory year for hunting and fishing regulations begins on July 1 of each year. A six month extension will align the regulations to what has been customary and provide for ample public review of the final regulations and impact statement during their development.

Although the changes herein are quite lengthy, much of the material is merely a reformatting of prior regulations to make the rules more readable and understandable by the user. The new format organizes the regulations geographically by Game Management Unit and then by species within each unit. This new format will allow a user to easily determine the regulation that affects him or her by reading under the Game Management Unit in which he or she may be hunting.

Subpart D continues to adopt extensively existing State regulations dealing with methods and means of take. The State regulations are codified in title 5 of the Alaska Administrative Code. In many cases the language is verbatim from the State regulations. In other cases minor modifications have been made to make the regulation specific to this Federal program or Federal public lands. Subpart D must be used in conjunction with subparts A-C which remain valid. These temporary regulations attempt throughout to limit change from the State regulations to that necessary to fulfill the Secretaries' responsibilities pursuant to title VIII.

Summary of Comments

There were 8 persons who offered oral comments at the meeting, and the Board received an additional 21 written comments from the public.

Analysis of Comments

(a) Alaska National Interest Lands Conservation Act

Several people commented that they felt the ANILCA subsistence preference for rural residents of Alaska was unconstitutional and objected to the establishment of these regulations which allow for rural subsistence priority. Several comments called for an amendment to ANILCA.

ANILCA mandates a priority for subsistence uses by rural residents on public lands. The Departments of the Interior and Agriculture have no authority to make any other interpretation since the rural priority is a provision of Federal law. Until such time as the law is changed, the Federal government must provide a subsistence priority to rural Alaskan residents for use of fish and wildlife resources on public lands.

(b) Definition of Public Lands

There were comments on the exclusion of navigable waters from the definition of public lands. There was a great deal of concern that the exclusion of navigable waters eliminated the majority of subsistence fishing, critical to the well being of rural communities. Some concerns here expressed also that the sport take of migratory species on State lands affects their numbers for subsistence purposes on public lands.

The United States generally does not hold title to navigable waters and thus navigable waters generally are not included within the definition of public lands. Navigable waters are those waters used or susceptible of being used in their ordinary condition as highways for commerce over which trade and travel are or may be conducted in the customary modes of trade and travel on water.

The scope of these regulations is limited by the definition of public lands in section 102 of ANILCA. Lands validly selected by the State or Native corporations are therefore excluded from this public lands definition.

(c) Adoption of State Regulations

There were comments on both sides of the issue of adopting State regulations for Federal subsistence management. A number of commenters said the Federal government should not automatically adopt the State regulations, while others advocated working closely with the State and adopting existing regulations.

In view of the uncertainty over the resumption of State management of subsistence, a major objective of the Federal program has been to minimize disruption to Alaskans and the State's continuing fish and game management, yet still fulfill the requirements of title VIII. These regulations use existing State of Alaska regulations relevant to subsistence management as much as possible. The majority of seasons and bag limits and methods and means of harvest regulations in subpart D are very similar or identical to the current State regulations. State regulations promulgated prior to the effective date of the McDowell decision are presumed to fulfill the title VIII requirements since the State's program was considered to meet the general applicability requirements of section 805(d) of ANILCA. The relatively few changes made were to adapt the State regulations to address public lands or to conform to legal requirements, such as direction received from recent court rulings. Some changes were made in subsistence bag limits or seasons after a review revealed that existing State regulations may not provide adequate opportunity for subsistence use on public lands by rural residents.

(d) Public Involvement

One comment was received that the comment period was much too short. Certainly more public involvement would have been desirable and valuable, and under normal circumstances would have occurred; but the time frame to develop the 1991-92 seasons and bag limits was very limited. During the development of these regulations, initial proposals were solicited from December 15, 1990, through January 15, 1991. After that, a summary of the proposals was sent out for review and the Board held a public meeting March 4-7, 1991, during which public testimony was accepted. Based on that testimony, the Board published a formal proposal (56 FR 15402) with a final comment period. These periods totaled in excess of 75 days in which the public could provide comments.

(e) Community Season and Bag Limits

There were a number of comments advocating that the Federal government should establish community bag limits for subsistence take rather than adopt the State's program of having only individual bag limits.

The issue of community season and bag limits is an important issue. To address this issue requires more time, public involvement and information than was available during the development of these regulations. Community season and bag limits and ceremonial uses, e.g., funeral potlatches, will be addressed during development of programmatic regulations and subsequent annual adjustments to subsistence use regulations. In addition, the Federal Government does not believe that the McDowell decision eliminated the State's ability to provide fish and wildlife for funeral potlatches.

(f) Customary and Traditional Issue

Comments were received that the proposed regulations should follow customary and traditional harvest seasons and patterns with those being designed to match as closely as possible the customary and traditional lifestyles of rural Alaskans, including accommodation of any religious use of fish and wildlife. Some commented more specifically that certain communities or areas should be determined to have customary and traditional uses of specific fish and wildlife populations on public lands.

As noted previously, the intent of these temporary regulations is to provide for the subsistence priority for rural Alaskans as required by AN-ILCA. Given the short time frame to prepare and implement these regulations existing State determinations of customary and traditional use were adopted. The State's customary and traditional determinations will be reviewed, as necessary, by the Board. This review could include consideration of prior cultural patterns wherein

VOL
56
ISS
123
JE
26
1991
UMI

traditional harvest seasons and patterns would be evaluated for possible changes to recent State seasons or bag limits. Also, any issues concerning customary and traditional religious use of fish and wildlife would be relevant for formal consideration, as would a wide range of other potential issues. Overall, the intent of the Federal program is to be sensitive to the customary and traditional patterns for subsistence use of fish and wildlife by rural Alaskans, meaning that Federal decisions related to this matter would try to reasonably accommodate any such use patterns.

(g) Closures

Some comments were received expressing concern that the temporary regulations do not allow for emergency closures to protect wildlife populations.

These regulations do allow for such closures. Section _____.17(b) states, "In an emergency situation, the Board may direct immediate closure of public lands to any or all hunting or fishing, including subsistence take." The word "any" in this section allows the Board to close an area to sport and/or commercial harvest while allowing subsistence harvest to continue.

(h) Permits/Licenses

A number of commenters opposed the requirement for any kind of permit system, especially requiring individuals to obtain permits to use fish and wildlife resources. Commenters also objected to the requirement for State permits and licenses for subsistence take on public lands.

The intent of these regulations is to minimize Federal permit requirements. Where State and Federal season and bag limit regulations vary, Federal permits may be required to ensure that adequate subsistence opportunity is provided to rural residents while ensuring healthy fish and wildlife populations.

(i) Navigable Waters

Ever since publication of the Temporary regulations, there has been confusion over the statement about "navigable waters generally are not included * * *."

These regulations still generally do not apply to navigable waters. However, clarification is being made for the benefit of the public, in those cases where withdrawals of Federal lands and waters were made prior to statehood and the Federal government continues to exercise control. It is not the intent of the Board to establish any season, bag limit or method of take different from that imposed by State regulations on navigable waters.

The introductory language to the specific regulations for each of the thirteen Fishery Management Areas describes the intended extent of Federal regulatory jurisdiction over subsistence fishing. This introductory language describes any exceptions to the general rule that Federal regulatory authority does not extend to navigable or marine waters. The introductory description of regulatory authority for each Fishery Management Area will control over any other specific provisions in the regulations for that Area.

(j) Other Comments

Several general comments were expressed on a limited basis by a few people. These comments included such topics as wording clarifications, editorial corrections, the need for maps of Federal lands, addresses and locations of all management offices; the need for more conservation, education, and so forth.

The Federal Government appreciates these comments, will make the corrections where appropriate, and will consider them in the development of a public information document describing these regulations.

(k) Unit or Species Specific Comments

(1) Numerous comments sought to restrict either seasons or bag limits of various species either without adequate justification or based on the assumption that the population might be particularly vulnerable during one part of the year.

The Board's primary functions are to protect both the wildlife resources and the subsistence opportunity. In order to do so, the Board will only make decisions based on substantial evidence.

(2) In three cases a commenter requested that a season be opened to coincide with a new State season.

The Board amended the proposed regulations to provide for similar subsistence seasons to allow adequate opportunity for subsistence harvest.

(3) In a few cases commenters requested more flexibility in the establishment of season to take into account vagaries in the weather that might restrict subsistence opportunities.

The Board amended the proposed regulations in those places to provide for a season to be opened through announcement.

Programmatic Regulations

The Temporary Regulations expire on December 31, 1991. The Federal government is now beginning development of programmatic regulations in the event that the State of Alaska is unable to resume subsistence management on Federal public lands. Some 56 public meetings have already been held in the affected areas to solicit comments on a long-term program. The Federal government is preparing an Environmental Impact Statement on this program and will then publish proposed programmatic regulations. In response to public comments and agency and legislative mandates, those will be revised and published as final regulations within the effective period of the Temporary Regulations. Once implemented, these programmatic regulations will remain in effect permanently or until the State of Alaska brings its subsistence program back into compliance with ANILCA.

Conformance with Statutory and Regulatory Authorities

The impact of these regulations on subsistence uses has been evaluated under section 810 of ANILCA, even though it is not clear that this is an action subject to section 810. Subsistence use and access is expected to differ little from that previously allowed under State management. If change occurs it is expected to be beneficial to subsistence users. The regulations are consistent with the purposes and intent of section 810 and present no significant possibility of a significant restriction on subsistence activities.

Properly regulated and managed subsistence use is consistent with the purposes for which the various public lands in Alaska were established.

National Environmental Policy Act Compliance

The Federal assumption of subsistence management will generally maintain the status quo from the user's perspective. Changes in environmental effects will be negligible. Therefore, the implementation of reformatted regulations and minor season and bag limit changes in the Temporary Subsistence Management Regulations for Public Lands in Alaska is determined to be a categorical exclusion as detailed in the USDI Departmental Manual (516 DM 6, appendix 1), USDA regulations at 7 CFR 16.3, USDA Forest Service Manual 1960, I.D. 2 and 17, and USDA Forest Service Handbook 1909.15, I.D. 2 and 17.

Paperwork Reduction Act

These rules contain information collection requirements subject to Office of Management and Budget (OMB) approval under 44 U.S.C. 3501 *et seq.* They apply to subsistence users of Federal public lands in Alaska.

The information collection requirements described above are approved by the OMB under 44 U.S.C. 3501 and have been assigned clearance number 1018-0075.

Public reporting burden for this form is estimated to average .1382 hours per response, including time for reviewing instructions, gathering and maintaining data, and completing and reviewing the form. Direct comments on the burden estimate or any other aspect of this form to: Information Collection Officer, U.S. Fish and Wildlife Service, 1849 C Street, NW., MS 224 ARLSQ, Washington, DC 20240; and the Office of Management and Budget, Paperwork Reduction Project (1018-0075), Washington, DC 20503. Additionally, information collection requirements may be imposed if the councils and committees subject to the Federal Advisory Committee Act are established under subpart B. Such requirements will be submitted to OMB for approval prior to their implementation.

Economic Effects

Executive Order 12291, Federal Regulation, of February 19, 1981, requires the preparation of regulatory impact analysis for major rules. A major rule is one likely to result in an annual effect on the economy of $100 million or more; a major increase in costs or prices for consumers, individual industries, government agencies or geographic regions; or significant adverse effects on the ability of United States-based enterprises to compete with foreign-based enterprises. The Regulatory Flexibility Act of 1980 (5 U.S.C. 601 *et seq.*) requires preparation of flexibility analyses for rules that will have a significant effect on a substantial number of small entities, which include small businesses, organizations or governmental jurisdictions.

The Departments of the Interior and Agriculture have determined that this rulemaking is not a "major rule" within the meaning of Executive Order 12291, and certify that it will not have a significant economic effect on a substantial number of small entities within the meaning of the Regulatory Flexibility Act.

This rulemaking will impose no significant costs on small entities; the exact number of businesses and the amount of trade that will result from this Federal land-related activity is unknown. The aggregate effect is an insignificant positive economic effect on a number of small entities. The number of small entities affected is unknown, but the fact that the positive effects will be seasonal in nature and will, in most cases, merely continue pre-existing uses of Federal public lands indicates that they will not be significant.

These regulations do not meet the threshold criteria of "Federalism Effects" as set forth in Executive Order 12612. Title VIII of ANILCA requires the Secretaries to administer a subsistence preference on public lands. The scope of this program is limited by definition to certain Federal lands. Likewise, these regulations have no significant takings implication relating to any property rights as outlined by Executive Order 12630.

William Knauer, Subsistence Office, Alaska Regional Office, U.S. Fish and Wildlife Service, Anchorage, Alaska, is the primary author of this rulemaking document, working under the direction of Richard S. Pospahala and the Federal Subsistence Board, Curtis V. McVee, Chairman.

List of Subjects

36 CFR Part 242

Administrative practice and procedure, Alaska, Fish, National Forests, Public Lands, Reporting and recordkeeping requirements, Wildlife.

50 CFR Part 100

Administrative practice and procedure, Alaska, Fish, National forests, Public lands, Reporting and recordkeeping requirements, Wildlife.

For the reasons set out in the preamble, chapter I, subchapter H of title 50 and chapter II of title 36 of the Code of Federal Regulations are amended in an identical fashion in 36 CFR part 242 and 50 CFR part 100 as follows:

1. The authority citation for 50 CFR part 100 and 36 CFR part 242 continues to read as follows:

Authority: 16 U.S.C. 472, 551, 668dd *et seq.*, 3101 *et seq.*; 16 U.S.C. 7, 3559, 3571; 43 U.S.C. 1733.

PART _____—SUBSISTENCE MANAGEMENT REGULATIONS FOR PUBLIC LANDS IN ALASKA

§ ____.14 [Amended]

2. Section _____.14(a) is revised to read as follows:

§ ____.14 Relationship to State procedures and regulations.

(a) State of Alaska fish and wildlife regulations apply to Federal public lands unless the Board finds it necessary to promulgate regulations which augment or supercede State regulations in order to ensure the priority for subsistence use of fish or wildlife on Federal public lands.

* * * * *

3. Subpart D—Subsistence Hunting, Trapping, and Fishing is revised to read as follows:

Subpart D—Subsistence Hunting, Trapping, and Fishing [1]

Sec.

_____.23 Subsistence hunting and trapping.
_____.24 Subsistence fishing.
_____.25 Shellfish.

Subpart D—Subsistence Hunting, Trapping, and Fishing

§ _____.23 Subsistence hunting and trapping.

(a) Definitions—The following definitions shall apply to all regulations contained in this subpart:

ADF&G means the Alaska Department of Fish and Game.

Aircraft means a fixed-wing machine or device that is used or intended to be used to carry persons or objects through the air, including airplanes and gliders.

Airport means an airport listed in the Federal Aviation Administration, Alaska Airman's Guide and chart supplement.

Animal means those species with a vertebral column (backbone).

Bag limit means the number of any one species permitted to be taken by any one person in the unit or portion of a unit in which the taking occurs; however, additional numbers of a species may be taken in another designated open unit or portion of a unit where a greater limit on that species is prescribed. In no case may the total or cumulative bag for one person or designated group exceed the limit set for the unit or portion of a unit in which the additional animals are taken. A subsistence bag limit and a general bag limit for the same species are not cumulative.

Big game means black bear, brown and grizzly bear, bison, caribou, deer, elk, mountain goat, moose, musk oxen, Dall sheep, wolf and wolverine.

Bow means long bow, recurve bow, or compound bow, but not crossbow.

Broadhead means an arrowhead with two or more steel cutting edges having minimum cutting diameter of not less than seven-eighths inch.

Brow tine means a tine on the front portion of a moose antler, typically projecting forward from the base of the antler toward the nose.

[1] Subpart D closely follows existing State Fish and Game regulations which are codified in title 5 of the Alaska Administrative Code. In many cases the language is identical to state regulation or modified so it applies only to this Federal program on public lands. The regulations note particular State of Alaska provisions from which they were derived.

VOL 56 ISS 123 JE 26 1991 UMI

Bull moose means any male moose.

Closed season means the time when wildlife may not be taken.

Cub bear means a brown or grizzly bear in its first or second year of life, or a black bear (including cinnamon and blue phases) in its first year of life.

Dire emergency means a situation in which a person:

(i) Is in a remote area;

(ii) is involuntarily experiencing an absence of food required for sustenance;

(iii) will be unable to perform the functions necessary for survival, leading to a high risk of death or serious and permanent health problems if wild game food is not immediately taken and consumed; and

(iv) cannot expect to obtain alternative food sources in time to avoid the consequences described in paragraph (iii) of this definition.

Full curl horn means the horn of a male Dall sheep, the tip of at least one of which has grown through 360 degrees of a circle described by the outer surface of the horn, as viewed from the side, or that both horns are broken or that the sheep is at least eight (8) years of age as determined by horn growth annuli.

Fur animal means coyote, arctic fox, red fox, lynx, or red squirrel, except domestically raised fur animals; "fur animals" is a classification of animals subject to taking with a hunting license.

Furbearer means beaver, coyote, arctic fox, red fox, lynx, marten, mink, weasel, muskrat, river (land) otter, red squirrel, flying squirrel, marmot, wolf or wolverine; "fur bearers" is a classification of animals subject to taking with a trapping license.

Highway means the drivable surface of any constructed road.

Household means that group of people domiciled in the same residence.

Hunting area for a species means that portion of a game management unit where a subsistence season and a bag limit for that species are set.

Motorized vehicle means a motor-driven land, air, or water conveyance.

Open season means the time when wildlife may be taken; each period prescribed as an open season includes the first and last days of the period prescribed.

Permit hunt means a hunt for which State or Federal permits are issued by drawing, registration or other means.

Poison means any substance which is toxic or poisonous upon contact or ingestion.

Registration permit means a hunting permit issued to a person who agrees to the conditions specified for each hunt; permits are issued in the order applications are received, and are issued:

(i) Beginning on a date announced and continuing throughout the open season, or until the season is closed by emergency order when a harvested quota is reached; or

(ii) Beginning on a date announced and continuing until a predetermined number of permits has been issued.

Sealing means placing a mark or tag on a portion of an animal by an authorized representative of the ADF&G; "sealing" includes collecting and recording information concerning the conditions under which the animal was harvested and measurements of the specimen submitted for sealing or surrendering a specific portion of the animal for biological information.

Seven-eighths curl horn means the horn of a Dall sheep, the tip of which has grown through seven-eighths of a circle (315 degrees), described by the outer surface of the horn, as viewed from the side, or with both horns broken.

Skin, hide and pelt are all the same thing, and mean any tanned or untanned external covering of an animal's body; skin, hide, or pelt of a bear shall mean the entire external covering with claws attached.

Small game means all species of grouse, hares, rabbits, ptarmigan, waterfowl, cranes and Wilson or jacksnipe.

Tine or antler point refers to any point on an antler whose length is at least one inch, and is greater in length than in width, measured one inch or more from the tip.

Transport means shipping, carrying, importing, exporting, or receiving or delivering for shipment, carriage or export.

Unclassified game means all species of game not otherwise classified in the definitions.

Unit means one of the 26 geographical areas listed under game management units in the ADF&G's codified hunting regulations and the Game Management Unit Map of Alaska.

Year means calendar year unless another year is specified.

(b) Small game and unclassified game, fur animals, furbearers, and big game may be taken for subsistence by any method, unless prohibited below or by other Federal statute.

(1) The following methods of taking game are prohibited:

(i) By shooting from, on, or across a highway;

(ii) With the use of any poison;

(iii) Knowingly, or with reason to know, with the use of a helicopter in any manner, including transportation to or from the field of any unprocessed game or parts of game, any hunter or hunting gear, or any equipment used in the pursuit or retrieval of game; this paragraph does not apply to transportation of a hunter, hunting gear, or game during an emergency rescue operation in a life-threatening situation;

(iv) Unless otherwise provided in this chapter, from a mechanical vehicle, or from a motor-driven boat unless the motor has been completely shut off and the boat's progress from the motor's power has ceased, except that a motor-driven boat or snowmachine may be used to take caribou in Game Management Unit 23;

(v) With the use of an aircraft, snowmachine, motor-driven boat, or other motorized vehicle for the purpose of driving, herding, or molesting game;

(vi) With the use or aid of a machine gun, set gun, or a shotgun larger than 10 gauge;

(vii) With the aid of a pit, fire, artificial light (except that coyotes may be taken in Units 6(B) and 6(C) with the aid of artificial lights), radio communication, artificial salt lick, explosive, barbed arrow, bomb, smoke, chemical, or a conventional steel trap with a jaw spread over nine inches; however, the "conibear" style trap with a jaw spread of less than 11 inches may be used;

(viii) With a snare, except for taking unclassified game, furbearer, grouse, hare, or ptarmigan;

(ix) By intentionally feeding a bear, wolf, fox, or wolverine, or intentionally leaving human food or garbage in a manner that attracts these animals. This does not apply to bait used for trapping furbearers or hunting black bears.

(2) The following methods and means of taking big game for subsistence are prohibited in addition to the prohibitions in paragraph (b)(1) of this section:

(i) With the use of a firearm other than a shotgun, muzzle-loaded rifle without scope, or rifle or pistol using a center-firing cartridge, except that:

(A) In Unit 23, swimming caribou may be taken with a firearm using rimfire cartridges; (B) The use of a muzzleloading rifle is prohibited for brown bear, black bear, moose, musk ox and mountain goat unless such a firearm is .54 caliber or larger, or at least .45 caliber and a 250 grain or larger elongated slug is used;

(ii) With a crossbow in any area restricted to hunting by bow and arrow only;

(iii) With a longbow, recurve bow, or compound bow unless the bow is capable of casting a broadhead-tipped arrow at least 175 yards horizontally, the arrow is tipped with a broadhead of at least 7/8" width, and arrow and broadhead together weigh at least one ounce (437.5 grains), and the broadhead is not barbed;

(iv) With the use of bait; except that black bears may be taken with the use of bait in Units 14 (A) (B) between April 15 and May 31; in Units 1 (A) (B) (D), 2, 3, 5, 6, 7 (except Resurrection Creek and its tributaries), 11, 13 and 16 (except Denali State Park) 15 and 17 between April 15 and June 15; and in Units 12, 19–21, 24, and 25 between April 15 and June 30. Baiting of black bears is subject to the following restrictions:

(A) Only biodegradable materials may be used for bait; only the head, bones, viscera, or skin of legally harvested fish and game may be used for bait;

(B) No person may use bait within one-quarter mile of a publicly maintained road or trail;

(C) No person may use bait within one mile of a house or other permanent dwelling, or within one mile of a developed campground or developed recreational facility;

(D) A hunter using bait shall clearly mark the site with a sign reading "black bear bait station" that also displays the person's hunting license number and ADF&G assigned number;

(E) A person using bait shall remove litter and equipment from the bait station site when hunting is completed;

(F) No person may give or receive remuneration for the use of a bait station, including barter or exchange of goods;

(G) No person may have more than two bait stations established (bait present) at any one time;

(H) No person may establish a black bear bait station unless he or she first registers the site with ADF&G;

(v) With the aid or use of a dog, except that a dog may be used to hunt black bear by permit issued at the discretion of the ADF&G;

(vi) With the use of a trap or snare;

(vii) While a big game animal is swimming, except that a swimming caribou may be taken in Unit 23;

(viii) No person who has been airborne, except in regularly scheduled commercial jet aircraft flights, may take for subsistence uses a big game animal in a National Preserve until 3:00 a.m. following the day in which the flying occurred.

(ix) No person who has been airborne, except in regularly scheduled commercial jet aircraft flights, may take or assist in taking for subsistence purposes a big game animal until after 3:00 a.m. following the day in which the flying occurred; however, this paragraph does not apply to subsistence taking of deer, or to subsistence taking of wolves during August 10–March 31 in the portions of Units 9, 11, 12, 13 except 13 (E) west of the Parks Highway, 17, 19, 20, 21, 24, 25(B), 25(C), and 25(D) that are not in a national preserve (National Parks, Monuments, and Preserves are closed to same-day-airborne Wolf Hunting); additionally with respect to wolves:

(A) No person may take a wolf without first obtaining from ADF&G, a numbered registration permit and numbered, nontransferable locking tags;

(B) Shotguns may not be used to take wolves;

(C) A person taking a wolf shall immediately affix one of the tags to the skin of the wolf until the skin is sealed according to ADF&G procedures;

(x) From a boat in Units 1–5, except by the physically disabled.

(3) The following methods and means of taking fur animals for subsistence under a hunting license are prohibited, in addition to the prohibitions in paragraph (b)(1) of this section:

(i) By using a dog, trap, snare, net, or fish trap;

(ii) By disturbing or destroying a den;

(iii) By having been airborne and using a firearm to take or assist in taking an arctic or red fox until after 3 a.m. on the day following the day in which the flying occurred.

(4) The following methods and means of taking furbearers for subsistence under a trapping license are prohibited, in addition to the prohibitions in paragraph (b)(1) of this section:

(i) By disturbing or destroying a den, except that any muskrat pushup or feeding house may be disturbed in the course of trapping;

(ii) By disturbing or destroying any beaver house;

(iii) Taking beaver by any means other than a steel trap or snare, except that a firearm may be used to take beaver in Unit 18 from April 1 through June 10, and in Units 8, 22, and 23 throughout the seasons established herein;

(iv) Taking land otter with a steel trap having a jaw spread of less than five and seven-eights inches during any closed mink and marten season in the same game management unit;

(v) Using a dog, net, or fish trap (except a blackfish or fyke trap);

(vi) Taking beaver in the Minto Flats Management Area with the use of an aircraft for ground transportation or by landing within one mile of a beaver trap or set used by the person transported;

(vii) Taking a wolf in Units 12 and 20 (E) during March, April or October with a steel trap, or with a snare smaller than 3X;

(viii) Having been airborne and using a firearm to take or assist in taking an arctic fox, red fox, wolf, or wolverine until after 3 a.m. on the day following the day in which the flying occurred; this paragraph does not apply to a trapper using a firearm to dispatch a fox, wolf, or wolverine caught in a trap or snare;

(ix) Taking a red fox in Unit 15 by any means other than a steel trap or snare.

(c) Possession and Transportation of Wildlife. (1) Unless otherwise provided, no person may take a species of game in any unit or portion of a unit if that person's total statewide take of that species already equals or exceeds the bag limit for that species in that unit or portion of a unit except as specified in paragraph (c)(3) of this Section.

(2) The bag limit specified herein for a subsistence season for a species and the State bag limit set for a State season for the same species are not separate and distinct. This means that a person or designated group who has taken the bag limit for a particular species under a subsistence season specified herein may not after that, take any additional animals of that species under any other bag limit specified for a State season.

(3) The bag limit specified for a trapping season for a species and the bag limit set for a hunting season for the same species are separate and distinct. This means that a person who has taken a bag limit for a particular species under a trapping season may take additional animals under the bag limit specified for a hunting season or vice versa.

(4) A bear taken in any unit having a one bear per regulatory year limit does not count against the one bear every four regulatory years bag limit in other units; however, no more than one bear may be taken in any regulatory year.

(5) A bag limit applies to a regulatory year unless another time period is specified in the bag limit.

(6) Any person who gives or receives wildlife shall furnish upon request of a Federal agent a signed statement describing the following: names and addresses of persons who gave and received wildlife, when and where the wildlife was taken, and what wildlife was transferred.

(7) No person may possess, transport, or give, receive or barter wildlife that the person knows or should know were taken in violation of Federal or State statutes or a regulation promulgated thereunder.

(8) Evidence of sex and identity. (i) No person may possess or transport a Dall sheep unless both horns accompany the animal if the subsistence take is restricted to a single sex.

(ii) If the subsistence taking of a big game animal, except sheep, is restricted to one sex, no person may possess or

VOL
56
ISS
123
JE
26
1991
UMI

transport the carcass of an animal unless sufficient portions of the external sex organs remain attached to indicate conclusively the sex of the animal; however, this section does not apply to the carcass of a big game animal that has been cut and placed in storage or otherwise prepared for consumption upon arrival at the location where it is to be consumed.

(iii) If a moose bag limit includes an antler size or configuration restriction, no person may possess or transport the moose carcass or its parts unless both antlers accompany the carcass or its parts. A person possessing a set of antlers with less than the required number of brow tines on one antler shall leave the antlers naturally attached to the unbroken, uncut skull plate; however, this subsection does not apply to a moose carcass or its parts that have been cut and placed in storage or otherwise prepared for consumption after arrival at the place where it is to be stored or consumed.

(iv) Until the hide has been sealed by a representative of the ADF&G, no person may possess or transport the hide of a brown bear taken in Unit 4 which does not have the penis sheath or vaginal orifice naturally attached to indicate conclusively the sex of the bear.

(d) A person who takes an animal that has been marked or tagged for scientific studies must, within a reasonable time, notify the ADF&G or other agency, if identified on the collar or marker, when and where the animal was killed. Any ear tag, collar, radio, tattoo, or other identification must be retained with the hide until it is sealed, if sealing is required, and in all cases any identification equipment must be returned to the ADF&G or to an agency identified on such equipment.

(e) Sealing of bear skins and skulls. (1) As used in this section:

Bear means brown bears in all units, and black bears of all color phases taken in Units 1–7, 11–16, and 20;

Sealing certificate means a form used by the ADF&G for recording information when sealing a bear.

Temporary sealing form means a form available at ADF&G offices for providing information regarding date and location of a bear kill, species of bear, name and address of the hunter, name of the guide, and other information requested by the ADF&G on the form;

(2) No person may possess, transport, or export from Alaska, the untanned skin or skull of a bear unless the skin and skull have been sealed by an authorized representative of the ADF&G within 30 days after the taking, or a lesser time if requested by the ADF&G. The seal must remain on the skin until the tanning process has commenced. A brown bear taken in Unit 8 may not be transported from that unit until it has been sealed. A brown bear taken in Unit 20(E) may not be transported from that unit, except to Tok, until it has been sealed.

(3) Except as provided in paragraph (c) of this Section, a person who kills a bear must personally present the skin and the skull to an authorized representative of the ADF&G for sealing within 30 days after the taking, or a shorter time if requested by the ADF&G, and must sign the sealing certificate at the time of sealing.

(4) A person who takes a bear but is unable to present the skin and skull in person must complete and sign a temporary sealing form and ensure that the completed temporary sealing form, along with the bear skin and skull, are presented to an authorized representative of the ADF&G for sealing within 30 days after the taking.

(5) A person who possesses a bear shall keep the skin and skull together until a representative of the ADF&G has removed a rudimentary premolar tooth from the skull and sealed both the skull and the skin. The ADF&G may require that the skull of the bear be skinned and that the skin and skull not be frozen at the time of sealing.

(6) No person may falsify any information required on the sealing certificate or temporary sealing form provided by the ADF&G.

(f) Sealing of Marten, Lynx, Beaver, Otter, Wolf, and Wolverine. (1) No person may possess, transport, or export from the state the untanned skin of a marten taken in Units 1–5, 7, and 15, or the untanned skin of a lynx, beaver, land otter, wolf, or wolverine, whether taken inside or outside the state, unless the ADF&G has sealed the skin. The seal must remain on the skin until the tanning process has commenced or the skin has been transported from the state; however, the seal may be removed from the skin of a marten taken in Units 1–5 when the skin has been prepared for shipment from the state.

(2) The sealing of marten, lynx, beaver, land otter, wolf, or wolverine must be accomplished as follows:

(i) Wolf (in Unit 15(A)) taken by hunting or trapping must be sealed on or before the 5th day after the date of taking;

(ii) Wolf (except in Unit 15(A)), wolverine, and lynx taken by hunting must be sealed on or before the 30th day after the date of taking;

(iii) Marten (Units 1–5, 7, and 15 only), wolf (except in Unit 15(A)), wolverine, lynx, beaver, and otter taken by trapping must be sealed on or before the 30th day after the close of the season in the unit where taken.

(3) The sealing periods described in paragraph (f)(2) of this Section may be temporarily reduced by an authorized employee of the ADF&G.

(4) A person who takes a species listed in paragraph (f) of this section must bring the skin for sealing to an authorized representative of the ADF&G and must complete a report on a form provided by the ADF&G.

(g) Utilization of Game. (1) The following definitions shall apply to this paragraph:

Edible meat means, in the case of big game animals, the meat of the ribs, neck, brisket, front quarters as far as the juncture of the humerus and radius-ulna (knee), hindquarters as far as the distal joint of the tibia-fibula (hock) and that portion of the animal between the front and hindquarters; in the case of wild fowl, the Meat of the breast; however, *edible meat* of big game or wild fowl does not include: meat of the head; meat that has been damaged and made inedible by the method of taking bones, sinew and incidental meat reasonably lost as a result of boning or a close trimming of the bones; or viscera.

Wild fowl means species of wild bird for which seasons or bag limits have been established by State or Federal law.

(2) No person may use game as food for a dog or furbearer, or as bait, except for the following:

(i) The hide, skin, viscera, head, or bones of game;

(ii) The skinned carcass of a furbearer or fur animal;

(iii) Red squirrels and small game; however, the breast meat of small game birds may not be used as animal food or bait;

(iv) Legally taken unclassified game.

(3) A person taking game for subsistence shall salvage the following parts for human use:

(i) The hide of a wolf, wolverine, coyote, fox, lynx, marten, mink, weasel and land otter, and the hide or meat of a beaver or muskrat;

(ii) The hide, skull and edible meat of a brown bear;

(iii) The hide, skull and edible meat of a black bear.

(4) A person who takes a big game animal or a species of wild fowl may not intentionally, knowingly, recklessly, or with criminal negligence fail to salvage for human consumption the edible meat of the animal or fowl.

(5) Failure to salvage or possess the edible meat may not be a violation if due to circumstances beyond the control of a person, including theft of the animal or fowl, unanticipated weather conditions or other acts of God, or unavoidable loss in the field to another wild animal.

(6) If a person is convicted of violating this section and in the course of that violation failed to salvage from a big game animal at least the hindquarters as far as the distal joint of the tibia-fibula (hock), the court shall impose a sentence of imprisonment of not less than seven consecutive days and a fine of not less that $2,500.

(7) It is unlawful for a person to possess the horns or antlers of a big game animal that was killed after the opening of the current or most recent lawful season for the animal unless the person also possesses the edible meat of the animal. However, this does not apply to the acquisition of the horns or antlers as a gift after the edible meat of the big game animal was salvaged, or the edible meat is no longer present due to personal consumption or lawful transfer.

(h) Taking wildlife in defense of life & property. (1) Nothing in this subpart prohibits a person from taking wildlife in defense of life or property if:

(i) The necessity for the taking is not brought about by harassment or provocation of the animal or an unreasonable invasion of the animal's habitat;

(ii) The necessity for the taking is not brought about by the improper disposal of garbage or a similar attractive nuisance; and

(iii) All other practicable means to protect life and property are exhausted before the animal is taken.

(2) Wildlife taken in defense of life or property is the property of the State and is not a subsistence taking. A person taking such wildlife is required to salvage immediately the meat, or, in the case of a black bear, wolf, wolverine, or coyote, the hide and surrender it to the State immediately. All bear hides surrendered (brown or black) must include claws. In the case of brown or grizzly bear, the hide and skull must be salvaged and surrendered to the State immediately. The person taking the wildlife must notify the ADF&G of the taking immediately and must submit a written report of the circumstances of the taking of wildlife in defense of life or property to the ADF&G within 15 days of the taking.

(3) As used in this section, "property" is limited to:

(i) A dwelling, permanent or temporary.

(ii) An aircraft, boat, automobile, or other means of conveyance;

(iii) A domesticated animal.

(iv) Other property of substantial value necessary for the livelihood or survival of the owner. Game taken by hunters is not "property" in the sense of this regulation.

(i) Subsistence harvest of migratory birds, including waterfowl, will conform to provisions of the Migratory Bird Treaty Act, as amended, and its implementing regulations.

(j) Subsistence harvest of Endangered or Threatened species will conform to provisions of the Endangered Species Act, as amended, and its implementing regulations.

(k) Subsistence harvest of Marine Mammals will conform to the provisions of the Marine Mammal Protection Act, as amended, and its implementing regulations.

(l) There may be additional requirements for eligibility to hunt in National Parks. Contact your local National Park Service office for details.

(m) Ineligible rural or non-rural residents or sport hunters not specifically prohibited from hunting on Federal lands in an area may hunt there in accordance with the appropriate State regulations.

(n) Game Management Units and Specific Regulations. (1) GMU 1 Game Management Unit 1 consists of all mainland drainages from Dixon Entrance to Cape Fairweather, and those islands east of the center line of Clarence Strait from Dixon Entrance to Camano Point and all islands in Stephens Passage and Lynn Canal north of Taku Inlet;

(i) Unit 1(A) consists of all drainages south of the latitude of Lemesurier Point including all drainages into Behm Canal and excluding all drainages of Ernest Sound;

(ii) Unit 1(B) consists of all drainages between the latitude of Lemesurier Point and the latitude of Cape Fanshaw, including all drainages of Ernest Sound and Farragut Bay, and including the islands east of the center lines of Frederick Sound, Dry Strait (between Sergief and Kadin Islands), Eastern Passage, Blake Channel (excluding Blake Island), Ernest Sound and Seward Passage;

(iii) Unit 1(C) consists of that portion of Unit 1 draining into Stephens Passage and Lynn Canal north of Cape Fanshaw and south of the latitude of Eldred Rock, including Berner's Bay, Sullivan Island, and all mainland portions north of Chichagof Island and south of the latitude of Eldred Rock, and excluding drainages into Farragut Bay;

(iv) Unit 1(D) consists of that portion of Unit 1 north of the latitude of Eldred Rock, excluding Sullivan Island and the drainages of Berners Bay;

(v) Public lands within the following areas are closed to subsistence take or subsistence take is restricted as specified:

(A) Public lands within Glacier Bay National Park are closed to all subsistence take.

(B) Unit 1(A). (*1*) In the Ketchikan area, a strip one-fourth mile wide on each side of the Tongass Highway system, including the Ward, Connel, and Harriet Hunt Lake Roads, is closed to the taking of big game;

(*2*) in the Hyder area, the Salmon River drainage downstream from the Riverside Mine, excluding the Thumb Creek drainage, is closed to the taking of bears;

(C) Unit 1(B)—the Anan Creek drainage is closed to the taking of black bears;

(D) Unit 1(C). (*1*) in the Juneau area, that area between the coast and a line one-fourth mile inland of the following road systems is closed to the taking of big game: Glacier Highway from Mile 0 to Mile 24 at Peterson Creek, Douglas Highway from the Douglas city limits to Milepost 7 on the North Douglas Highway, Mendenhall Loop Road, and Thane Road;

(*2*) the area within one-fourth mile of Mendenhall Lake, the U.S. Forest Service Mendenhall Glacier Visitor's Center, and the Center's parking area, is closed to hunting;

(*3*) the area of Mt. Bullard bounded by the Mendenhall Glacier, Nugget Creek from its mouth to its confluence with Goat Creek, and a line from the mouth of Goat Creek north to the Mendenhall Glacier, is closed to the taking of mountain goat;

(*4*) Mt. Juneau drainage, bounded by the Glacier Highway, Salmon Creek and its reservoir, a line from the head of the Salmon Creek drainage to the head of Granite Creek, and down Granite Creek and Gold Creek to the Glacier Highway, is closed to the taking of mountain goat;

(E) Unit 1(D)—a strip one-fourth mile wide on each side of the Lutak Road between Mile 7 and Chilkoot Lake, and from the Chilkoot River bridge to the end of the Lutak Road spur at the head of Lutak Inlet, is closed to the taking of big game;

(vi) The following areas are closed to the trapping of furbearers for subsistence as indicated:

(A) Glacier Bay National Park;

(B) Unit 1(C) (Juneau area):

(*1*) A strip within one-quarter mile of the mainland coast between the end of Thane Road and the end of Glacier Highway at Echo Cove;

(*2*) Auke Lake and the area within one-quarter mile of Auke Lake;

VOL 56 ISS 123 JE 26 1991 UMI

(*j*) That area of the Mendenhall Valley bounded on the south by the Glacier Highway, on the west by the Mendenhall Loop Road and Montana Creek Road and Spur Road to Mendenhall Lake, on the north by Mendenhall Lake, and on the east by the Mendenhall Loop Road and Forest Service Glacier Spur Road to the Forest Service Visitor Center;

(*k*) A strip within one-quarter mile of the Douglas Island coast along the entire length of the Douglas Highway and a strip within one-quarter mile of the Eaglecrest Road;

(*l*) That area within the U.S. Forest Service Mendenhall Glacier Recreation Area; (6) A strip within one-quarter mile of the following trails as designated on U.S. Geological Survey maps: Herbert Glacier Trail, Windfall Lake Trail, Peterson Lake Trail, Spaulding Meadows Trail (including the loop trail), Nugget Creek Trail, Outer Point Trail, Dan Moller Trail, Perseverance Trail, Granite Creek Trail, Mt. Roberts Trail and the Nelson Water Supply Trail, Sheep Creek Trail, and Point Bishop Trail;

Note: There are private land areas within many Federal land units. These regulations apply only to Federal lands unless otherwise indicated. It is the responsibility of the subsistence user to be aware of private inholdings.

—Those residents listed under eligibility are the qualified subsistence users.
—"No open season" means no Federal subsistence season.
—"No determination" indicates open to Alaska rural residents.

(vii)

Eligibility determination	Bag limits	Open season
Black Bear:		
GMU 1—Unit 1(C)— Rural residents of Unit 1(C), and Haines, Gustavus, Klukwan, and Hoonah.	Unit 1—2 bears, not more than one of which may be a blue or glacier bear.	Sept. 1–June 30.
GMU 1—Unit 1 (A), (B), (D)—No determination		
Brown Bear:		
GMU 1—No subsistence for residents of Wrangell, Klukwan, Haines and Skagway. All others—No determination.	Unit 1—1 bear every four regulatory years by State registration permit only.	Sept. 15–Dec. 31 and Mar. 15–May 31.
Deer:		
GMU 1—Unit 1(A)—Rural residents of Units 1(A) and 2	Unit 1(A)—4 antlered deer	Aug. 1–Dec. 31.
GMU 1—Unit 1(B)—Rural residents of Unit 1(A), residents of 1(B), 2 and 3.	Unit 1(B)—2 antlered deer	Aug. 1–Dec. 31.
GMU 1—Unit 1(C)—Rural residents of Units 1(C), 1(D) and residents of Hoonah and Gustavus.	Unit 1(C)—4 deer; however, antlerless deer may be taken only from Sept. 15–Dec. 31.	Aug. 1–Dec. 31.
GMU 1—Unit 1(C)—No subsistence	Unit 1(D)	No open season.
Goat:		
GMU 1—Unit 1(A)—No determination	Unit 1(A)—Revillagigedo	No open season.
GMU 1—Unit 1(B)—No determination, except no subsistence for residents of Petersburg, Kupreanof, and outlying areas.	Unit 1(B)—that portion between Muddy River and LeConte Bay including the drainages into the North side of LeConte Bay—1 goat by State registration permit only; however, the taking of kids or nannies accompanied by kids is prohibited.	Aug. 1–Dec. 31.
	Remainder of Unit 1(A) and Unit 1(B)—2 goats by State registration permit only.	Aug. 1–Dec. 31.
GMU 1—Unit 1(C)—Residents of Haines, Klukwan, and Hoonah.	Unit 1(C)—that portion draining into Lynn Canal and Stephens Passage between Antler River and Eagle Glacier.	Oct. 1–Nov. 30.
	Unit 1(C)—that portion draining into Lynn Canal and Stephens Passage between Antler River and Eagle Glacier and River—1 goat by State registration permit only.	Oct. 1–Nov. 30.
	Unit 1(C)—that portion draining into Stephens Passage and Taku Inlet between Eagle Glacier and River and Taku Glacier, and all drainages of the Chilkat Range south of the Endicott River.	No open season.
	Remainder of Unit 1(C)—1 goat by State registration permit only	Aug. 1–Nov. 30.
GMU 1—Unit 1(D)—No determination	Unit 1(D)—that portion lying between Taiya Inlet and River and the White Pass and Yukon Railroad.	No open season.
	Unit 1(D)—that portion lying north of the Katzehin River and northeast of the Haines Highway—1 goat by State registration permit only.	Sept. 15–Nov. 30.
	Remainder of Unit 1(D)—1 goat by State registration permit only	Aug. 1–Dec. 31.
Moose:		
GMU 1— Unit 1(A)—No determination	Unit 1(A) and 1(B) south of LeConte Glacier—1 bull	Sept. 15–Oct. 15.
GMU 1—Unit 1(B)—The Stikine River drainage only, residents of Wrangell.		
GMU 1—Unit 1(B)—North of the LeConte Glacier and 1(C) Berners Bay—No subsistence.	Remainder of Unit 1(C)—1 bull by State registration permit only	Sept. 15–Oct. 15.
GMU 1—Remainder of Unit 1(C)—No determination		
GMU 1—Unit 1(D)—Residents of Unit 1(D)	Unit 1(D)	No open season.
Bat, Shrew, Rat, Mouse and Porcupine: GMU 1—No determination	No limit	July 1–June 30.
Beaver: GMU 1—No determination	Trapping—Unit 1 (A), (B), (C)—No limit	Dec. 1–May 15.
	Unit 1(D)	No open season.
Coyote: GMU 1—No determination	Hunting—2 Coyotes	Sept. 1–Apr. 30.
	Trapping—No limit	Dec. 1–Feb. 15.
Fox, Red (including Cross, Black, and Silver Phases): GMU 1—No determination.	Hunting—2 Foxes	Nov. 1–Feb. 15.
	Trapping—No limit	Dec. 1–Feb. 15.
Hares (Snowshoe and Arctic): GMU 1—No determination	Hunting—5 per day	Sept. 1–Apr. 30.
Lynx: GMU 1—No determination	Hunting—2 Lynx	Dec. 1–Feb. 15.
	Trapping—No limit	Dec. 1–Feb. 15.
Marten: GMU 1—No determination	Trapping—No limit	Dec. 1–Feb. 15.
Mink and Weasel: GMU—No determination	Trapping—No limit	Dec. 1–Feb. 15.
Muskrat: GMU 1—No determination	Trapping—No limit	Dec. 1–Feb. 15.
Otter (land only): GMU 1—No determination	Trapping—No limit	Dec. 1–Feb. 15.
Squirrel (Red, Ground and Flying): GMU 1—No determination	Hunting—No limit	July 1–June 30.
	Trapping—No limit	July 1–June 30.
Wolf: GMU 1—No determination	Hunting—No limit	July 1–June 30.
	Trapping—No limit	Nov. 10–Apr. 30.
Wolverine: GMU 1—No determination	Hunting—1 Wolverine	Nov. 10–Feb. 15.
	Trapping—No limit	Nov. 10–Apr. 30.
Crow: GMU 1—No determination	Hunting—40 per day	Sept. 1–Nov. 17.
		Mar. 1–Apr. 15.
Grouse (Spruce, Blue, Ruffed and Sharp-tailed): GMU 1—No determination.	Hunting—5 per day, 10 in possession	Aug. 1–May 15.
Ptarmigan (Rock, Willow and White-tailed): GMU 1—No determination.	Hunting—20 per day, 40 in possession	Aug. 1–May 15.

(2) GMU 2. (i) Game Management Unit 2 consists of Prince of Wales Island and all islands west of the center lines of Clarence Strait and Kashevarof Passage, south and east of the center lines of Sumner Strait, and east of the longitude of the westernmost point on Warren Island;

Note: There are private land areas within many Federal land units. These regulations apply only to Federal lands unless otherwise indicated. It is the responsibility of the subsistence user to be aware of private inholdings.

—Those residents listed under eligibility are the qualified subsistence users.
—"No open season" means no Federal subsistence season.
—"No determination" indicates open to Alaska rural residents.

(ii)

Eligibility determination	Bag limits	Open season
Black Bear: GMU 2—No determination	Unit 2—2 bears, not more than one of which may be a blue or glacier bear.	Sept. 1–June 30.
Deer: GMU 2—Rural residents of Unit 1(A), and residents of Units 2 and 3.	Unit 2—4 antlered deer	Aug. 1–Dec. 31.
Bat, Shrew, Rat, Mouse and Porcupine: GMU 2—No determination	No limit	July 1–June 30.
Beaver: GMU 2—No determination	Trapping—No limit	Dec. 1–May 15.
Coyote: GMU 2—No determination	Hunting—2 Coyotes	Sept. 1–Apr. 30.
	Trapping—No limit	Dec. 1–Feb. 15.
Fox, Red, (including Cross, Black and Silver Phases): GMU 2—No determination.	Hunting—2 Foxes	Nov. 1–Feb. 15.
	Trapping—No limit	Dec. 1–Feb. 15.
Hares (Snowshoe and Arctic): GMU 2—No determination	Hunting—5 per day	Sept. 1–Apr. 30.
Lynx: GMU 2—No determination	Hunting—2 Lynx	Dec. 1–Feb. 15.
	Trapping—No limit	Dec. 1–Feb. 15.
Marten: GMU 2—No determination	Trapping—No limit	Dec. 1–Feb. 15.
Mink and Weasel: GMU 2—No determination	Trapping—No limit	Dec. 1–Feb. 15.
Muskrat: GMU 2—No determination	Trapping—No limit	Dec. 1–Feb. 15.
Otter (land only): GMU 2—No determination	Trapping—No limit	Dec. 1–Feb. 15.
Squirrel (Red, Ground and Flying): GMU 2—No determination	Hunting—No limit	July 1–June 30.
	Trapping—No limit	July 1–June 30.
Wolf: GMU 2—No determination	Hunting—No limit	July 1–June 30.
	Trapping—No limit	Nov. 10–Apr. 30.
Wolverine: GMU 2—No determination	Hunting—1 Wolverine	Nov. 10–Feb. 15.
	Trapping—No limit	Nov. 10–Apr. 30.
Crow: GMU 2—No determination	Hunting—40 per day	Sept. 1–Nov. 17 and March 1–Apr. 15.
Grouse, (Spruce, Blue, Ruffed and Sharp-tailed): GMU 2—No determination	Hunting—5 per day, 10 in possession	Aug. 1–May 15.
Ptarmigan (Rock, Willow and White-tailed): GMU 2—No determination	Hunting—20 per day, 40 in possession	Aug. 1–May 15.

(3) GMU 3. (i) Game Management Unit 3 consists of all islands west of Unit 1(B), north of Unit 2, south of the center line of Frederick Sound, and east of the center line of Chatham Strait, including Coronation, Kuiu, Kupreanof, Mitkof, Zarembo, Kashevarof, Woronkofski, Etolin, Wrangell, and Deer Islands; (ii) Public lands within the following areas are closed to subsistence take or subsistence take is restricted as specified:

(A) A strip one-fourth mile wide on each side of the Stikine (Zimovia) Highway from the Wrangell city limits to Milepost 9 is closed to the taking of big game;

(B) In the Petersburg vicinity, a strip one-fourth mile wide on each side of the Mitkof Highway from Milepost 0 to the Crystal Lake campground is closed to the taking of big game, except wolves;

(C) The Petersburg Creek drainage on Kupreanof Island is closed to the taking of black bears;

(D) Blind Slough, draining into Wrangell Narrows, and a strip one-fourth mile wide on each side of Blind Slough, from the hunting closure markers at the southernmost portion of Blind Island to the hunting closure markers one mile south of the Blind Slough bridge, are closed to all hunting;

Note: There are private land areas within many Federal land units. These regulations apply only to Federal lands unless otherwise indicated. It is the responsibility of the subsistence user to be aware of private inholdings.

—Those residents listed under eligibility are the qualified subsistence users.
—"No open season" means no Federal subsistence season.
—"No determination" indicates open to Alaska rural residents.

(iii)

VOL 56 ISS 123 JE 26 1991 UMI

Eligibility determination	Bag limits	Open season
Black Bear: GMU 3—No determination	Unit 3—2 bears, not more than one of which may be a blue or glacier bear.	Sept. 1–June 30.
Deer: GMU 3—Residents of Unit 1(B) and 3, and residents of Port Alexander, Port Protection, Pt. Baker, and Meyer's Chuck.	Unit 3—that portion south of Sumner Strait and Decision Passage, including the Vank Island group, but not including Level, Conclusion, and Channel Islands—2 antlered deer.	Aug. 1—Nov. 30.
	Unit 3—that portion of Mitkof Island, south of city limits of Petersburg only; Woewodski and Butterworth Islands—one antlered deer by State registration permit only.	Oct. 15–Oct. 31.
Moose: GMU 3—No determination	Remainder of Unit 3	No open season.
	Unit 3—Mitkof and Wrangell Islands—1 bull with spikefork or 50-inch antler.	Oct. 1–Oct. 15.
	Unit 3—Remainder	No open season.
Bat, Shrew, Rat, Mouse, and Porcupine: GMU 3—No determination	No limit	July 1–June 30.
Beaver: GMU 3—No determination	Trapping—Unit 3—Mitkof Island—No limit	Dec. 1–Apr. 15.
	Trapping—Unit 3 (except Mitkof Island)—No limit	Dec. 1–May 15.
Coyote: GMU 3—No determination	Hunting—2 Coyotes	Sept. 1–Apr. 30.
	Trapping—No limit	Dec. 1–Feb. 15.
Fox, Red (including Cross, Black and Silver Phases): GMU 3—No determination.	Hunting—2 Foxes	Nov. 1–Feb. 15.
	Trapping—No limit	Dec. 1–Feb. 15.
Hares (Snowshoe and Arctic): GMU 3—No determination	Hunting—5 per day	Sept. 1–Apr. 30.
Lynx: GMU 3—No determination	Hunting—2 Lynx	Dec. 1–Feb. 15.
	Trapping—No limit	Dec. 1–Feb. 15.
Marten: GMU 3—No determination	Trapping—No limit	Dec. 1–Feb. 15.
Mink and Weasel: GMU 3—No determination	Trapping—No limit	Dec. 1–Feb. 15.
Muskrat: GMU 3—No determination	Trapping—No limit	Dec. 1–Feb. 15.
Otter (land only): GMU 3—No determination	Trapping—No limit	Dec. 1–Feb. 15.
Squirrel (Red, Ground and Flying): GMU 3—No determination	Hunting—No limit	July 1–June 30.
	Trapping—No limit	July 1–June 30.
Wolf: GMU 3—No determination	Hunting—No limit	July 1–June 30.
	Trapping—No limit	Nov. 10–Apr. 30.
Wolverine: GMU 3—No determination	Hunting—1 Wolverine	Nov. 10–Feb. 15.
	Trapping—No limit	Nov. 10–Apr. 30.
Crow: GMU 3—No determination	Hunting—40 per day	Sept. 1–Nov. 17 and Mar. 1–Apr. 15.
Grouse (Spruce, Blue, Ruffed and Sharp-tailed): GMU 3—No determination.	Hunting—5 per day, 10 in possession	Aug. 1–May 15.
Ptarmigan (Rock, Willow and White-tailed): GMU 3—No determination.	Hunting—20 per day, 40 in possession	Aug. 1–May 15.

(4) GMU 4. (i) Game Management Unit 4 consists of all islands south and west of Unit 1(C) and north of Unit 3, including Admiralty, Baranof, Chichagof, Yakobi, Inian, Lemesurier, and Pleasant Islands; (ii) Public lands within the following areas are closed to subsistence take or subsistence take is restricted as specified:

(A) In the Sitka area, a strip one-fourth mile wide on each side of all State highways is closed to the taking of big game;

(B) the Seymour Canal Closed Area (Admiralty Island), including all drainages into northwestern Seymour Canal between Staunch Point and the southernmost tip of the unnamed peninsula separating Swan Cove and King Salmon Bay, and including Swan and Windfall Islands, is closed to the taking of bears;

(C) the Salt Lake Bay Closed Area (Admiralty Island), including all lands within one-fourth mile of Salt Lake above Klutchman Rock at the head of Mitchell Bay, is closed to the taking of bears;

(D) Port Althorp (Chichagof Island), that area within the Port Althorp watershed south of a line from Point Lucan to Salt Chuck Point (Trap Rock), is closed to the taking of brown bears;

(E) Northeast Chichagof Controlled Use Area, consisting of that portion of Unit 4 on Chichagof Island north of Tenakee Inlet and east of Port Frederick, is closed to the use of any motorized land vehicle for brown bear hunting or for the taking of marten, mink, or weasel;

Note: There are private land areas within many Federal land units. These regulations apply only to Federal lands unless otherwise indicated. It is the responsibility of the subsistence user to be aware of private inholdings.

—Those residents listed under eligibility are the qualified subsistence users.

—"No open season" means no Federal subsistence season.

—"No determination" indicates open to Alaska rural residents.

(iii)

Eligibility determination	Bag limits	Open season
Brown Bear: GMU 4—Residents of Unit 4 and Kake	Unit 4—Chicagof Island south and west of a line that follows the crest of the island from Rock Point (58° N. lat., 136° 21' W. long.), to Rodgers Point (57°35' N. lat., 135°33' W. long.) including Yakobi and other adjacent islands; Baranof Island south and west of a line which follows the crest of the island from Nitement Point (57°34' N. lat., 135°25' W. long.), to the entrance of Gut Bay (56°44' N. lat. 134°38' W. long.) including the drainages into Gut Bay and including Kruzof and other adjacent islands—1 bear every four regulatory years by State registration permit only.	Sept. 15–Dec. 31, Mar. 15–May 31.
	Unit 4—that portion in the Northeast Chicagof Controlled Use Area—1 bear every four regulatory years by State registration permit only.	Mar. 15–May 20.
	Remainder of Unit 4—1 bear every four regulatory years by State registration permit only.	Sept. 15–Dec. 31, Mar. 15–May 20.

Eligibility determination	Bag limits	Open season
Deer: GMU 4—Residents of Kake, Gustavus, Haines, Petersburg, Pt. Baker, Klukwan, Port Protection, and Wrangell.	Unit 4—6 deer; however, antlerless deer may be taken only from Sept. 15—Jan. 31.	Aug. 1–Jan.31.
Goat: GMU 4—No determination	1 goat by State registration permit only	Aug. 1–Dec. 31.
Bat, Shrew, Rat, Mouse, and Porcupine: GMU 4—No determination	No limit	July 1–June 30.
Beaver: GMU 4—No determination	Trapping—Unit 4 (that portion east of Chatham Strait)—No limit	Dec. 1–May 15.
	Unit 4 (that portion west of Chatham Strait)	No open season.
Coyote: GMU 4—No determination	Hunting—2 Coyotes	Sept. 1–Apr. 30.
	Trapping—No limit	Dec. 1–Feb. 15.
Fox, Red (including Cross, Black and Silver Phases): GMU 4—No determination	Hunting—2 Foxes	Nov. 1–Feb. 15.
	Trapping—No limit	Dec. 1–Feb. 15.
Hares (Snowshoe and Arctic): GMU 4—No determination	Hunting—5 per day	Sept. 1–Apr. 30.
Lynx: GMU 4—No determination	Hunting—2 Lynx	Dec. 1–Feb. 15.
	Trapping—No limit	Dec. 1–Feb. 15.
Marten: GMU 4—No determination	Trapping—No limit	Dec. 1–Feb. 15.
Mink and Weasel: GMU 4—No determination	Trapping—No limit	Dec. 1–Feb. 15.
Muskrat: GMU 4—No determination	Trapping—No limit	Dec. 1–Feb. 15.
Otter (land only): GMU 4—No determination	Trapping—No limit	Dec. 1–Feb. 15.
Squirrel (Red, Ground and Flying): GMU 4—No determination	Hunting—No limit	July 1–June 30.
	Trapping—No limit	July 1–June 30.
Wolf: GMU 4—No determination	Hunting—No limit	July 1–June 30.
	Trapping—No limit	Nov. 10–Apr. 30.
Wolverine: GMU 4—No determination	Hunting—1 Wolverine	Nov. 10–Feb. 15.
	Trapping—No limit	Nov. 10–Apr. 30.
Crow: GMU 4—No determination	Hunting—40 per day	Sept. 1–Nov. 17 and Mar. 1–Apr. 15.
Grouse (Spruce, Blue, Ruffed and Sharp-tailed): GMU 4—No determination.	Hunting—5 per day, 10 in possession	Aug. 1–May 15.
Ptarmigan (Rock, Willow and White-tailed): GMU 4—No determination.	Hunting—20 per day, 40 in possession	Aug. 1–May 15.

(5) GMU 5. (i) Game Management Unit 5 consists of all Gulf of Alaska drainages and islands between Cape Fairweather and the center line of Icy Bay, including the Guyot Hills;

(A) Unit 5(A) consists of all drainages east of Yakutat Bay, Disenchantment Bay, and the eastern edge of Hubbard Glacier, and includes the islands of Yakutat and Disenchantment Bays;

(B) Unit 5(B) consists of the remainder of Unit 5; (ii) Public lands within Glacier Bay National Park are closed to subsistence hunting and trapping.

Note: There are private land areas within many Federal land units. These regulations apply only to Federal lands unless otherwise indicated. It is the responsibility of the subsistence user to be aware of private inholdings.

—"No open season" means no Federal subsistence season.

—Those residents listed under eligibility are the qualified subsistence users. "No determination" indicates open to Alaska rural residents. However, National Parks, Monuments, and Preserves are open only to Park Service qualified subsistence users. Subsistence users must be local rural residents of National Park Service areas. For more information, contact the National Park Service in Anchorage, Alaska (telephone 907/257–2572).

(iii)

Eligibility determination	Bag limits	Open season
Black Bear: GMU 5—No determination	Unit 5—2 bears, not more than 1 of which may be a blue or glacier bear.	Sept. 1–June 30.
Brown Bear: GMU 5—Residents of Yakutat	1 bear every four regulatory years	Sept. 1–May 31.
Deer: GMU 5—Residents of Yakutat	Unit 5(A)—1 buck	Nov. 1–Nov. 30.
	Unit 5—Remainder	No open season.
Goat: GMU 5—No determination	1 goat by State registration permit only	Aug. 1–Dec. 31.
Moose: GMU 5—Residents of Yakutat	Unit 5(A), except Nunatak Bench—1 bull by State registration permit only. The season will be closed when 60 bulls have been taken from the unit. The season will be closed in that portion west of the Dangerous River when 30 bulls have been taken in that area. From Oct. 15–21 Federal public lands will be closed to moose hunting, except for residents of Yakutat.	Oct. 15–Nov. 15.
	Unit 5(A)—Nunatak Bench	No open season.
	Unit 5(B)—1 bull by State registration permit only	Sept. 1–Nov. 15.
Bat, Shrew, Rat, Mouse, and Porcupine: GMU 5—No determination.	No limit	July 1–June 30.
Beaver: GMU 5—No determination	Trapping—No limit	Nov. 10–May 15.
Coyote: GMU 5—No determination	Hunting—2 Coyotes	Sept. 1–Apr. 30.
	Trapping—No limit	Dec. 1–Feb. 15.
Fox, Red (including Cross, Black and Silver Phases): GMU 5—No determination.	Hunting—2 Foxes	Nov. 1–Feb. 15.
	Trapping—No limit	Dec. 1–Feb. 15.
Hares (Snowshoe and Arctic): GMU 5—No determination	Hunting—5 per day	Sept. 1–Apr. 30.

Grouse (Spruce, Blue, Ruffed and Sharp-tailed): GMU 5—No determination.	Hunting—5 per day, 10 in possession	Aug. 1–May 15.
Ptarmigan (Rock, Willow and White-tailed): GMU 5—No determination.	Hunting—20 per day, 40 in possession	Aug. 1–May 15.

(6) GMU 6. Game Management Unit 6 consists of all Gulf of Alaska and Prince William Sound drainages from the center line of Icy Bay (excluding the Guyot Hills) to Cape Fairfield, including Kayak, Hinchinbrook, Montague, and adjacent islands, and Middleton Island, but excluding the Copper River drainage upstream from Miles Glacier, and excluding the Nellie Juan and Kings River drainages;

(i) Unit 6(A) consists of Gulf of Alaska drainages east of Palm Point near Katalla, including Kanak, Wingham, and Kayak Islands;

(ii) Unit 6(B) consists of Gulf of Alaska and Copper River Basin drainages west of Palm Point near Katalla, east of the west bank of the Copper River, and east of a line from Flag Point to Cottonwood Point;

(iii) Unit 6(C) consists of drainages west of the west bank of the Copper River, and west of a line from Flag Point to Cottonwood Point, and drainages east of the east bank of Rude River and drainages into the eastern shore of Nelson Bay and Orca Inlet;

(iv) Unit 6(D) consists of the remainder of Unit 6;

(v) Public lands within the following areas are closed to subsistence take or subsistence take is restricted as specified: (A) The Goat Mountain goat observation area, which consists of that portion of Unit 6 bounded on the north by Miles Lake and Miles Glacier, on the south and east by Pleasant Valley River and Pleasant Glacier, and on the west by the Copper River, is closed to the taking of mountain goat;

(B) The Heney Range goat observation area, which consists of that portion of Unit 6(C) south of the Copper River Highway and west of the Eyak River, is closed to the taking of mountain goat;

Note—There are private land areas within many Federal land units. These regulations apply only to Federal lands unless otherwise indicated. It is the responsibility of the subsistence user to be aware of private inholdings.

—"No open season" means no Federal subsistence season.

Those residents listed under eligibility are the qualified subsistence users. "No determination" indicates open to Alaska rural residents. However, National Parks, Monuments, and Preserves are open only to Park Service qualified subsistence users. Subsistence users must be local rural residents of National Park Service areas. For more information, contact the National Park Service in Anchorage, Alaska (telephone 907/257–2572).

Eligibility determination	Bag limits	Open season
Black Bear: GMU 11—No determination	Unit 11—3 bears	July 1–June 30.
Caribou: GMU 11—Mentasta Herd—Residents of Units 11, 12 (along Nabesna Road), and 13 (A)–(D).	Unit 11—1 bull by Federal registration permit only. Up to 30 bulls may be taken in Unit 11 (Source of permits—Wrangell-St. Elias National Park, mile 106.5 Old Richardson Highway, Copper Center; or the Slana District Station, Slana).	Aug. 10–Sept. 30.
Sheep: GMU 11—Residents of Chisana, Chistochina, Chitina, Copper Center, Gakona, Glennallen, Gulkana, Kenny Lake, McCarthy Road, Mentasta Lake, Mentasta Pass (milepost 79–110), Nabesna Road, Slana, McCarthy/South Wrangell/South Park, Tanana, and Tonsina, however, No subsistence for Cantwell, and Glenn Highway (milepost 110–180), and to milepost 14 on the Lake Louise Road, Homestead North, Homestead South, Lake Louise, Paxson, Sourdough, Tanacross, Tok, and west Glenn Highway (milepost 79–110).	Unit 11—1 sheep	Aug. 10–Sept. 30.
Moose: GMU 11—Residents of Unit 11, Residents of Unit 12 (along Nabesna Road), and GMU 13 (A)–(D).	Unit 11—1 bull	Sept. 1–Sept. 20
Bat, Shrew, Rat, Mouse, and Porcupine: GMU 11—No determination.	No limit	July 1–June 30.
Beaver: GMU 11—No determination	Trapping—30 Beaver per season	Nov. 10–Apr. 30.
Coyote: GMU 11—No determination	Hunting—2 Coyotes	Sept. 1–Apr. 30.
	Trapping—No limit	Nov. 10–Mar. 31.
Fox, Red (including Cross, Black and Silver Phase): GMU 11—No determination.	Hunting—2 Foxes	Nov. 1–Feb. 15.
	Trapping—No limit	Nov. 10–Feb. 28.
Hares (Snowshoe and Arctic) GMU 11—No determination	Hunting—No limit	July 1–June 30.
Lynx: GMU 11—No determination	Hunting—2 Lynx	Dec. 15–Jan. 15.
	Trapping—No limit	Dec. 15–Jan. 15.
Marten: GMU 11—No determination	Trapping—No limit	Nov. 10–Jan. 31.
Mink and Weasel: GMU 11—No determination	Trapping—No limit	Nov. 10–Jan. 31.
Muskrat: GMU 11—No determination	Trapping—No limit	Nov. 10–June 10.
Otter (land only): GMU 11—No determination	Trapping—No limit	Nov. 10–Mar. 31.
Squirrel (Red, Ground, Flying): GMU 11—No determination	Hunting—No limit	July 1–June 30.
	Trapping—No limit	July 1–June 30.
Wolf: GMU 11—Residents of Units 6, 9, 10 (Unimak Island only), 11–13, and 16–26.	Hunting—10 wolves	Aug. 10–Apr. 30.
	Trapping—No limit	Nov. 10–Mar. 31.
Wolverine: GMU 11—No determination	Hunting—1 Wolverine	Sept. 1–Mar. 31.
	Trapping—No limit	Nov. 10–Feb. 28.

Eligibility determination	Bag limits	Open season
Grouse (Spruce, Blue, Ruffed and Sharp-tailed): GMU 11—Residents of Units 11, 13, 15, 16, 20(D), 22, and 23. Ptarmigan (Rock, Willow and White-tailed): GMU 11—Residents of Units 11, 13, 15, 16, 20(D), 22, and 23.	15 per day, 30 in possession	Aug. 10–Mar. 31.
	20 per day, 40 in possession	Aug. 10–Mar. 31.

(12) GMU 12. (i) Game Management Unit 12 consists of the Tanana River drainage upstream from the Robertson River, including all drainages into the east bank of the Robertson River, and the White River drainage in Alaska, but excluding the Ladue River drainage;

Note: There are private land areas within many Federal land units. These regulations apply only to Federal lands unless otherwise indicated. It is the responsibility of the subsistence user to be aware of private inholdings.

—"No open season" means no Federal subsistence season.

—Those residents listed under eligibility are the qualified subsistence users. "No determination" indicates open to Alaska rural residents. Eligibility determination	Bag limits	Open season
Black Bear: GMU 12—No determination	Unit 12—2 bears	July 1–June 30.
Caribou:		
GMU 12—Mentasta Herd—No Determination	Unit 12—that portion west of the Nabesna River within the drainages of Jack Creek, Platinum Creek and Totschunda Creek—1 bull by Federal registration permit only; Up to 30 bulls total may be taken in Units 11 and 12 fall and winter hunts combined (Source of permits-Wrangell-St. Elias National Park, mile 105.5 Old Richardson Highway, Copper Center; or the Slana District Station, Slana).	Aug. 10–Sept. 20.
GMU 12—Chisana Herd—No Determination	Remainder of Unit 12—1 bull	Sept. 1–Sept. 20.
GMU 12—40 mile Herd—Residents of GMU 12 north of Wrangell Park Preserve and rural residents of GMU 20 (D) and (E).	1 caribou of either sex may be taken by a Federal registration permit during a winter season to be announced for the residents of Tetlin and Northway only.	To be announced.
GMU 12—Nelchina Herd—Residents of Northway and Tetlin		
Moose:		
GMU 12—Unit 12 south of a line from Hayes Mountain, southeast of the confluence of Totschunda Creek to Nabesna River—Residents of Unit 11 north of 62nd parallel and excluding BLM parcels of north and south Slana; and residents of Units 12, 13 (A)–(D) and residents of Dot Lake.	Unit 12—that portion drained by the Tanana, Nabesna and Chisana Rivers east of the Tetlin Reservation boundary and north of the winter trail from Pickerel Lake to the Canadian border—1 bull.	Sept. 1–Sept. 15 and Nov. 20–Nov. 30.
GMU 12—Unit 12 west of the Nabesna River, south of the winter trail from Pickerel Lake to the Canadian Border—Residents of Unit 12.	Unit 12—that portion lying east of the Nabesna River and south of the Winter Trail running southeast from Pickerel Lake to the Canadian border—1 bull.	Sept. 1–Sept. 30.
GMU 12—Remainder of Unit 12—Residents of Unit 12 and residents of Dot Lake and Mentasta Lake.	Unit 12—Remainder—1 bull	Sept. 1–Sept. 15.
Bat, Shrew, Rat, Mouse and Porcupine: GMU 12—No determination.	No limit	July 1–June 30.
Beaver: GMU 12—No determination	Trapping—15 Beaver per season	Nov. 1–Apr. 15.
Coyote: GMU 12—No determination	Hunting—2 Coyotes	Sept. 1–Apr. 30.
	Trapping—No limit	Nov. 1–Feb. 28.
Fox, Red (including Cross, Black and Silver Phase): GMU 12—No determination.	Hunting—2 Foxes	Nov. 1–Feb. 15.
	Trapping—No limit	Nov. 1–Feb. 28.
Hares (Snowshoe and Arctic): GMU 12—No determination	No limit	July 1–June 30.
Lynx: GMU 12—No determination	Hunting—2 Lynx	Nov. 1–Jan. 31.
	Trapping—No limit	Nov. 1–Jan. 31.
Marten: GMU 12—No determination	Trapping—No limit	Nov. 1–Feb. 28.
Mink and Weasel: GMU 12—No determination	Trapping—No limit	Nov. 1–Feb. 28.
Muskrat: GMU 12—No determination	Trapping—No limit	Sept. 20–June 10.
Otter (Land only): GMU 12—No determination	Trapping—No limit	Nov. 1–Apr. 15.
Squirrel (Red, Ground and Flying): GMU 12—No determination	Hunting—No limit	July 1–June 30.
	Trapping—No limit	July 1–June 30.
Wolf: GMU 12—Residents of Units 6, 9, 10 (Unimak Island only), 11–13, and 16–26.	Hunting—10 Wolves	Aug. 10–Apr. 30.
	Trapping—No limit	Oct. 1–Apr. 30.
Wolverine: GMU 12—No determination	Hunting—1 Wolverine	Sept. 1–Mar. 31.
	Trapping—No limit	Nov. 1–Feb. 28.
Grouse (Spruce, Blue, Ruffed and Sharp-tailed): GMU 12—No determination.	15 per day, 30 in possession	Aug. 10–Mar. 31.
Ptarmigan (Rock, Willow and White-tailed): GMU 12—No determination.	20 per day, 40 in possession	Aug. 10–Apr. 30.

(13) GMU 13. (i) Game Management Unit 13 consists of that area westerly of the east bank of the Copper River and drained by all tributaries into the west bank of the Copper River from Miles Glacier and including the Slana River drainages north of Suslota Creek; the drainages into the Delta River upstream from Falls Creek and Black Rapids Glacier; the drainages into the Nenana River upstream from the southeast corner of Denali National Park at Windy; the drainage into the Susitna River upstream from its junction with the Chulitna River; the drainage into the

VOL 56 ISS 123 JE 26 1991 UMI

east bank of the Chulitna River upstream to its confluence with Tokositna River; the drainages of the Chulitna River (south of Denali National Park) upstream from its confluence with the Tokositna River; the drainages into the north bank of the Tokositna River upstream to the base of the Tokositna Glacier; the drainages into the Tokositna Glacier; the drainages into the east bank of the Susitna River between its confluences with the Talkeetna and Chulitna Rivers; the drainages into the north bank of the Talkeetna River; the drainages into the east bank of the Chickaloon River; the drainages of the Matanuska River above its confluence with the Chickaloon River;

(A) Unit 13(A) consists of that portion of Unit 13 bounded by a line beginning at the Chickaloon River bridge at Mile 77.7 on the Glenn Highway, then along the Glenn Highway to its junction with the Richardson Highway, then south along the Richardson Highway to the foot of Simpson Hill at Mile 111.5, then east to the east bank of the Copper River, then northerly along the east bank of the Copper River to its junction with the Gulkana River, then northerly along the west bank of the Gulkana River to its junction with the West Fork of the Gulkana River, then westerly along the west bank of the West Fork of the Gulkana River to its source, an unnamed lake, then across the divide into the Tyone River drainage, down an unnamed stream into the Tyone River, then down the Tyone River to the Susitna River, then down the southern bank of the Susitna River to the mouth of Kosina Creek, then up Kosina Creek to its headwaters, then across the divide and down Aspen Creek to the Talkeetna River, then southerly along the boundary of Unit 13 to the Chickaloon River bridge, the point of beginning;

(B) Unit 13(B) consists of that portion of Unit 13 bounded by a line beginning at the confluence of the Copper River and the Gulkana River, then up the east bank of the Copper River to the Gakona River, then up the Gakona River and Gakona Glacier to the boundary of Unit 13, then westerly along the boundary of Unit 13 to the Susitna Glacier, then southerly along the west bank of the Susitna Glacier and the Susitna River to the Tyone River, then up the Tyone River and across the divide to the headwaters of the West Fork of the Gulkana River, then down the West Fork of the Gulkana River to the confluence of the Gulkana River and the Copper River, the point of beginning;

(C) Unit 13(C) consists of that portion of Unit 13 east of the Gakona River and Gakona Glacier;

(D) Unit 13(D) consists of that portion of Unit 13 south of Unit 13(A);

(E) Unit 13(E) consists of the remainder of Unit 13;

(ii) Public lands within the following areas are closed to subsistence take or subsistence take is restricted as specified.

(A) Lands within Mount McKinley National Park as it existed prior to December 2, 1980 are closed to subsistence. Denali National Preserve and lands added to Denali National Park on December 2, 1980 are open to subsistence.

(B) Delta Controlled Use Area:

(*1*) The area consists of the drainages of the Tanana River south of the Alaska Highway, from the west bank of the Johnson River to and including drainages of the Delta River north of the north bank of Miller Creek and Canwell Glacier in Units 13(B), 20(A), and 20(D);

(*2*) The area is closed to the use of any motorized vehicle or pack animal for hunting, from August 5 through August 25; however, this does not prohibit motorized access to the area for hunting, or transportation of game on the Richardson Highway;

(C) The Paxson Closed Area in Unit 13(B), which consists of the eastern drainage of the Gulkana River lying west of the Richardson Highway and the western drainage of the Gulkana River between the Denali Highway and the north end of Paxson Lake where the Gulkana River enters Paxson Lake, is closed to the taking of big game;

(D) The Sheep Mountain Closed Area which lies along the Glenn Highway in Unit 13(A) and is bounded by a line from Caribou Creek, Milepost 107 Glenn Highway, then easterly along the Glenn Highway to Milepost 123, then north to Squaw Creek, then downstream to Caribou Creek, then down Caribou Creek to the point of beginning, is closed to the taking of mountain goat and Dall sheep;

(E) The Sourdough Controlled Use Area:

(*1*) The area consists of that portion of Unit 13(B) bounded by a line beginning at the confluence of Sourdough Creek and the Gulkana River, then northerly along Sourdough Creek to the Richardson Highway at approximately Mile 148, then northerly along the Richardson Highway to the Meiers Creek Trail at approximately Mile 170, then westerly along the trail to the Gulkana River, then southerly along the east bank of the Gulkana River to its confluence with Sourdough Creek, the point of beginning;

(*2*) The area is closed to the use of any motorized vehicle for hunting; however, this does not prohibit motorized access or transportation of game on the Richardson Highway, Sourdough and Haggard Creeks, Meiers Lake trails, or other trails designated by the Alaska Department of Fish and Game;

(F) The Clearwater Creek Controlled Use Area:

(*1*) The area consists of that portion of Unit 13(B) north of the Denali Highway, west of and including the MacLaren River drainage, east of and including the eastern bank drainages of the Middle Fork of the Susitna River downstream from and including the Susitna Glacier, and the eastern bank drainages of the Susitna River downstream from its confluence with the Middle Fork;

(*2*) The area is closed to the use of any motorized vehicle for hunting; however, this does not prohibit motorized access, or transportation of game, on the Denali Highway;

(G) The Tonsina Controlled Use Area:

(*1*) The area consists of that portion of Unit 13(D) bounded on the west by the Richardson Highway from the Tiekel River to the Tonsina River at Tonsina, on the north along the south bank of the Tonsina River to where the Edgerton Highway crosses the Tonsina River, then along the Edgerton Highway to Chitina, on the east by the Copper River from Chitina to the Tiekel River, and on the south by the north bank of the Tiekel River;

(*2*) The area is closed to the use of any motorized vehicle or pack animal for hunting, from August 5 to September 30;

Note: There are private land areas within many Federal land units. These regulations apply only to Federal lands unless otherwise indicated. It is the responsibility of the subsistence user to be aware of private inholdings.

—"No open season" means no Federal subsistence season.

—Those residents listed under eligibility are the qualified subsistence users. "No determination" indicates open to Alaska rural residents. However, National Parks, Monuments, and Preserves are open only to Park Service qualified subsistence users. Subsistence users must be local rural residents of National Park Service areas. For more information, contact the National Park Service in Anchorage, Alaska (telephone 907/257-2572).

(iii)

Eligibility determination	Bag limits	Open season
Black Bear: GMU 13—No determination	Unit 13—3 bears	July 1–June 30.
Caribou: GMU 13—Nelchina Herd—Residents of Units 11, 13, and 12 (along the Nabesna Road).	Unit 13—2 caribou by Federal registration permit only. Hunting within the Trans Alaska Oil Pipeline right-of-way is prohibited. The right-of-way is identified as the area occupied by the pipeline (buried or above ground) and the cleared area 25 feet on either side of the pipeline.	Aug. 10–Sept. 20 and Jan. 5–Mar. 31.
Sheep:		
GMU 13—Tok Management Area—No subsistence	Unit 13—excluding Unit 13(D) and the Tok and Delta Management Areas—1 Ram with 7/8 curl horn.	Aug. 10–Sept. 20.
GMU 13—Delta management Area—No subsistence		
GMU 13—Unit 13(D)—No subsistence		
GMU 13—Remainder of Unit 13—No determination		
Goats: GMU 13—Unit 13(D)—No subsistence		No open season.
Moose: GMU 13—Residents of Unit 13	Unit 13—1 bull moose by Federal registration permit only; only 1 permit will be issued per household. Source of permits—Bureau of Land Management, Glennallen District Office, Glennallen AK.	Aug. 25–Sept. 20.
Bat, Shrew, Rat, Mouse and Porcupine: GMU 13—No determination.	No limit	July 1–June 30.
Beaver: GMU 13—No determination	Trapping—30 Beaver per season	Nov. 10–Apr. 30.
Coyote: GMU 13—No determination	Hunting—2 Coyotes	Sept. 1–Apr. 30.
	Trapping—No limit	Nov. 10–Mar. 31.
Fox, Red (including Cross, Black and Silver Phases): GMU 13—No determination.	Hunting—2 Foxes	Nov. 1–Feb. 15.
	Trapping—No limit	Nov. 10–Feb. 28.
Hares (Snowshoe and Arctic): GMU 13—No determination	No limit	July 1–June 30.
Lynx: GMU 13—No determination	Hunting—2 Lynx	Dec. 15–Jan. 15.
	Trapping—No limit	Dec. 15–Jan. 15.
Marten: GMU 13—No determination	Trapping—No limit	Nov. 10–Jan. 31.
Mink and Weasel: GMU 13—No determination	Trapping—No limit	Nov. 10–Jan. 31.
Muskrat: GMU 13—No determination	Trapping—No limit	Nov. 10–June 10.
Otter (land only): GMU 13—No determination	Trapping—No limit	Nov. 10–Mar. 31.
Squirrel (Red, Ground and Flying): GMU 13—No determination	Hunting—No limit	July 1–June 30.
	Trapping—No limit	July 1–June 30.
Wolf: GMU 13—Residents of Units 6, 9, 10 (Unimak Island only), 11–13, and 16–26.	Hunting—10 Wolves	Aug. 10–Apr. 30.
Wolverine: GMU 13—No determination	Trapping—No limit	Nov. 10–Mar. 31.
	Hunting—1 Wolverine	Sept. 1–Mar. 31.
Grouse (Spruce, Blue, Ruffed and Sharp-tailed): GMU 13—Residents of Units 11, 13, 15, 16, 20(D), 22 and 23.	Trapping—No limit	Nov. 10–Feb. 28.
Ptarmigan (Rock, Willow and White-tailed): GMU 13—Residents of Units 11, 13, 15, 16, 20(D), 22 and 23.	15 per day, 30 in possession	Aug. 10–Mar. 31.
	30 per day, 60 in possession	Aug. 10–Mar. 31.

(14) GMU 14. (i) Game Management Unit 14 consists of drainages into the north side of Turnagain Arm west of and excluding the Portage Creek drainage, drainages into Knik Arm excluding drainages of the Chickaloon and Matanuska Rivers in Unit 13, drainages into the north side of Cook Inlet east of the Susitna River, drainages into the east bank of the Susitna River downstream from the Talkeetna River, and drainages into the south bank of the Talkeetna River;

(A) Unit 14(A) consists of drainages in Unit 14 bounded on the west by the Susitna River, on the north by Willow Creek, Peters Creek, and by a line from the head of Peters Creek to the head of the Chickaloon River, on the east by the eastern boundary of Unit 14, and on the south by Cook Inlet, Knik Arm, the south bank of the Knik River from its mouth to its junction with Knik Glacier, across the face of Knik Glacier and along the north side of Knik Glacier to the Unit 6 boundary;

(B) Unit 14(B) consists of that portion of Unit 14 north of Unit 14(A);

(C) Unit 14(C) consists of that portion of Unit 14 south of Unit 14(A);

(ii) Public lands within the following areas are closed to subsistence take or subsistence take is restricted as specified:

(A) The Fort Richardson Management Area, consisting of the Fort Richardson Military Reservation, is open to the taking of big game by permit only;

(B) The Eagle River Management Area, consisting of the Eagle River drainage upstream from the Glenn Highway in Unit 14(C) is closed to hunting, except sheep hunting by permit;

(C) The Anchorage Management Area:

(*1*) The area consists of all Cook Inlet drainages south of the Elmendorf and Fort Richardson military reservations and north of and including Rainbow Creek, but excluding the Anchorage Coastal Wildlife Refuge;

(*2*) The Anchorage Management Area is closed to hunting, except that moose hunting is allowed by State of Alaska permit only; and small game and waterfowl may be taken by falconry, except that waterfowl may not be taken in the Ship Creek drainage west of Post Road;

(D) The Eklutna Lake Management Area:

(*1*) The area consists of the drainages of Eklutna River and Eklutna Lake in Unit 14(C) upstream from the Glenn Highway, excluding those drainages flowing into the East Fork of Eklutna River upstream from the bridge above the Lake and Thunderbird Creek;

(*2*) The area is closed to hunting, except that:

(*i*) Small game may be taken by bow and arrow only, from the day after Labor Day through April 30;

(*ii*) Moose hunting is allowed by permit with bow and arrow only;

(*iii*) Black bear may be taken by bow and arrow only, from the day after Labor Day to May 20, for one bear only;

(*iv*) Sheep may be taken by permit, and by bow and arrow only, from the day after Labor Day through September 30;

(E) The Peters Creek Management Area:

(*1*) The area consists of all lands bounded on the south and west by Eagle River and the Fort Richardson Military Reservation, on the east by the old Glen Highway, and on the north by Peters Creek;

VOL 56 ISS 123 JE 26 1991 UMI

(2) The area is closed to hunting except that:

(i) Small game may be taken by shotgun or bow and arrow only, north and west of the Alaska Railroad;

(ii) Moose hunting is allowed by drawing permit, by bow and arrow only.

(ii) The following areas in Unit 14(C) (Anchorage Area) are closed to the trapping of furbearers for subsistence as indicated:

(A) The drainages into Eklutna River and Eklutna Lake, excluding those drainages flowing into the East Fork of the Eklutna River, upstream from the bridge above the lake, within the Chugach State Park except Thunderbird Creek;

(B) Eagle River and all drainages into Eagle River;

(C) That portion of Chugach State Park outside of the Eagle River, Anchorage, and Eklutna Management areas is open to trapping under Unit 14(C) seasons and bag limits, except no trapping of wolf, wolverine, land otter, or beaver is allowed;

(D) All land and water within the Anchorage Management Area as described in the preceding subsection;

(E) In the Anchorage Coastal Wildlife Refuge in Unit 14(C), described in Alaska Statute 16.20.031: all land and water south and west of and adjacent to the toe of the bluff that extends from Point Woronzof southeasterly to Potter Creek.

Note: There are private land areas within many Federal land units. These regulations apply only to Federal lands unless otherwise indicated. It is the responsibility of the subsistence user to be aware of private inholdings.

—Those residents listed under eligibility are the qualified subsistence users.

—"No open season" means no Federal subsistence season.

—"No determination" indicates open to Alaska rural residents.

Eligibility department	Bag limits	Open season
Black Bear: GMU 14—Units 14 (A) and (C)—No determination	Unit 14 (A), (C)—1 bear	July 1–June 30.
Brown Bear: GMU 14—Unit 14(A)—No determination	Unit 14(A)—1 bear every four regulatory years	Sept. 1–Oct. 10.
Bat, Shrew, Rat, Mouse and Porcupine: GMU 14—No determination.	No limit	July 1–June 30.
Beaver: GMU 14—No determination	Trapping—Unit 14(A)—30 Beaver per season	Nov. 10–Apr. 30.
	Trapping—Unit 14(C)—That portion within the drainages of Glacier Creek, Kern Creek, Peterson Creek, and the Twentymile River—20 per season.	Feb. 1–Mar. 31.
	Unit 14(C)—Remainder	No Open Season.
Coyote: GMU 14—No determination	Hunting—Unit 14 (A) and (C)—2 Coyotes	Sept. 1–Apr. 30.
	Trapping—Unit 14(A)—No limit	Nov. 10–Mar. 31.
	Trapping—Unit 14(C)—No limit	Nov. 10–Feb. 28.
Fox, Red (including Cross, Black and Silver Phases): GMU 14—No determination.	Hunting—Unit 14—2 Foxes	Nov. 1–Feb. 15.
	Trapping—Unit 14(A)—No limit	Nov. 10—Feb. 28.
	Trapping—Unit 14(C)—1 Fox	Nov. 10—Feb. 28.
Hares (Snowshoe and Arctic): GMU 14—No determination	Hunting—Unit 14(A)—5 Hares per day	July 1–June 30.
	Hunting—Unit 14(C)—5 Hares per day	Day after Labor Day–Apr. 30.
Lynx: GMU 14—No determination	Hunting—2 Lynx	Dec. 15–Jan. 15.
	Trapping—No limit	Dec. 15–Jan. 15.
Marten: GMU 14—No determination	Trapping—No limit	Nov. 10–Jan. 31.

Otter (land only): GMU 14—No determination	Trapping—Unit 14(a)—No limit	Nov. 10–Mar. 31.
	Trapping—Unit 14(C)—No limit	Nov. 10–Feb. 28.
Squirrel (Red, Ground and Flying): GMU 14—No determination	Hunting—No limit	July 1–June 30.
	Trapping—No limit	July 1–June 30.
Wolf: GMU 14—No determination	Hunting—Unit 14(A)—4 Wolves	Aug. 10–Apr. 30.
	Trapping—No Limit	Nov. 10–Mar. 31.
	Hunting—Unit 14(C)—1 Wolf	Aug. 10–Apr. 30.
	Trapping—No Limit	Nov. 10–Feb. 28.
Wolverine: GMU 14—No determination	Hunting—1 Wolverine	Sept. 1–Mar. 31.
	Trapping—No limit	Nov. 10–Feb. 28.
Grouse (Spruce, Blue, Ruffed and Sharp-tailed): GMU 14—No determination.	Unit 14(A)—15 per day, 30 in possession	Aug. 10–Mar. 31.
	Unit 14(C)—5 per day, 10 in possession	Day after Labor Day–Mar. 31.
Ptarmigan (Rock, Willow and White-tailed): GMU 14—No determination.	Unit 14(A)—10 per day, 20 in possession	Aug. 10–Mar. 31.
	Unit 14(C)—10 per day, 20 in possession	Day after Labor Day–Mar 31.

(15) GMU 15. (i) Game Management Unit 15 consists of that portion of the Kenai Peninsula and adjacent islands draining into the Gulf of Alaska, Cook Inlet and Turnagain Arm from Gore Point to the point where longitude line 150° 00' W. crosses the coast line of Chickaloon Bay in Turnagain Arm, including that area lying west of longitude line 150° 00' W. to the mouth of the Russian River, then southerly along the Chugach National Forest boundary to the upper end of Upper Russian Lake; and including the drainages into Upper Russian Lake west of the Chugach National Forest boundary;

(A) Unit 15(A) consists of that portion of Unit 15 north of the Kenai River and Skilak Lake;

(B) Unit 15(B) consists of that portion of Unit 15 south of the Kenai River and Skilak Lake, and north of the Kasilof River, Tustumena Lake, Glacier Creek, and Tustumena Glacier;

(C) Unit 15(C) consists of the remainder of Unit 15;

(ii) Public lands within the following areas are closed to subsistence take or subsistence take is restricted as specified.

(A) The Kenai Controlled Use Area, consisting of that portion of Unit 15(A) north of the Sterling Highway, is closed during moose-hunting season to the use of aircraft for hunting moose, including transportation of a moose hunter or moose part; however, this does not apply after 12:01 a.m., September 11, and does not apply to transportation of a moose hunter or moose part by aircraft between publicly owned airports in the Controlled Use Area or from a publicly owned airport within the area to points outside of the area;

(B) The Lower Kenai Controlled Use Area, consisting of Unit 15(C), is closed to the use of any motorized vehicle except an aircraft or boat for hunting moose from September 11 through September 20, including transportation of a moose hunter or moose part; however this does not apply to a motorized vehicle on a State- or Borough-maintained highway;

(C) the Skilak Loop Management Area; consisting of that portion of Unit 15(A) bounded by a line beginning at the easternmost junction of the Sterling Highway and the Skilak Loop (milepost 76.3), then due south to the south bank of the Kenai River, then southerly along the south bank of the Kenai River to its confluence with Skilak Lake, then westerly along the north shore of Skilak Lake to Lower Skilak Lake Campground, then northerly along the Lower Skilak Lake Campground Road and the Skilak Loop Road to its westernmost junction with the Sterling Highway, then easterly along the Sterling Highway to the point of beginning; is closed to hunting and trapping except that small game may be taken only from October 1 through March 1 by bow and arrow only, and antlerless moose may be taken by permit only.

(iii) The following areas are closed to the trapping of furbearers for subsistence as indicated:

(A) Within the city limits of Homer (Unit 15) as those limits existed in November 1987;

(B) The Skilak Loop Wildlife Management Area;

(C) That portion of Unit 15(B) east of the Kenai River, Skilak Lake, Skilak River, and Skilak Glacier is closed to the trapping of marten;

Note: There are private land areas within many Federal land units. These regulations apply only to Federal lands unless otherwise indicated. It is the responsibility of the subsistence user to be aware of private inholdings.

—Those residents listed under eligibility are the qualified subsistence users.

—"No open season" means no Federal subsistence season.

—"No determination" indicates open to Alaska rural residents.

Eligibility determination	Bag limits	Open season
Black Bear: GMU 15—No determination	Unit 15—3 bears	July 1–June 30.
Bat, Shrew, Rat, Mouse and Porcupine: GMU 15—No determination.	No limit	July 1–June 30.
Beaver: GMU 15—No determination	Trapping—20 Beaver per season	Feb. 1–Mar. 31.
Coyote: GMU 15—No determination	Hunting—No limit	Sept. 1–Apr. 30.
	Trapping—No limit	Nov. 10–Feb. 28.
Fox, Red (including Cross, Black and Silver Phase): GMU 15—No determination.	Trapping—1 Fox	Nov. 10–Feb. 28.
	Hunting—No limit	July 1–June 30.
Hares (Snowshoe and Arctic): GMU 15—No determination	Trapping—Unit 15(B)—that portion east of the Kenai River, Skilak Lake, Skilak River and Skilak Glacier.	No open season.
Marten: GMU 15—No determination	Unit 15—Remander—No limit	Nov. 10–Jan. 31.
Mink and Weasel: GMU 15—No determination	Trapping—No limit	Nov. 10–Jan. 31.
Muskrat: GMU 15—No determination	Trapping—No limit	Nov. 10–May 15.
Otter (land only): GMU 15—No determination	Trapping—Unit 15(A), (B)—No limit	Nov. 10–Jan. 31.
	Trapping—Unit 15(C)—No limit	Nov. 10–Feb. 28.
Squirrel (Red, Ground and Flying): GMU 15—No determination	Hunting—No limit	July 1–June 30.
	Trapping—No limit	July 1–June 30.
Wolf: GMU 15—No determination	Hunting—1 Wolf	Aug. 10–Apr. 30.
	Trapping—No limit	Nov. 10–Feb. 28.
Wolverine: GMU 15—No determination	Hunting—Unit 15—1 Wolverine	Sept. 1–Mar. 31.
	Trapping—Unit 15(A)	No open season.
	Trapping—Unit 15(B), (C)—No limit	Nov. 10–Feb. 28.
Crow: GMU 15—No determination	40 per day	Sept. 1–Nov. 17 and Mar. 1–Apr. 15.
Grouse (Spruce, Blue, Ruffed and Sharp-tailed): GMU 15—Residents of Units 11, 13, 15, 16, 20(D), 22 and 23.	15 per day, 30 in possession	Aug. 10–Mar. 31.
Ptarmigan (Rock, Willow and White-tailed): GMU 15—Residents of Units 11, 13, 15, 16, 20(D), 22 and 23.	Unit 15(A), (B)—20 per day, 40 in possession	Aug. 10–Mar 31.
	Unit 15(C)—20 per day, 40 in possession	Aug. 10–Dec. 31.
	5 per day, 10 in possession	Jan. 1–Mar. 31.

(16) GMU 16. (i) Game Management Unit 16 consists of the drainages into Cook Inlet between Redoubt Creek and the Susitna River, including Redoubt Creek drainage, Kalgin Island, and the drainages on the west side of the Susitna River (including the Susitna River) upstream to its junction with the Chulitna River; the drainages into the west side of the Chulitna River (including the Chulitna River) upstream to the Tokositna River, and drainages into the south side of the Tokositna River upstream to the base of the Tokositna Glacier, including the drainage of the Kanitula Glacier;

(A) Unit 16(A) consists of that portion of Unit 16 east of the east bank of the Yentna River from its mouth upstream to the Kahiltna River, east of the east bank of the Kahiltna River, and east of the Kahiltna Glacier;

(B) Unit 16(B) consists of the remainder of Unit 16;

(ii) Public Lands within the following areas are closed to subsistence take or subsistence take is restricted as specified. (A) Lands within Mount McKinley National Park as it existed prior to December 2, 1980 are closed to subsistence. Denali National Preserve and lands added to Denali National Park on December 2, 1980 are open to subsistence.

(B) [Reserved]

Note: There are private land areas within many Federal land units. These regulations apply only to Federal lands unless otherwise indicated. It is the responsibility of the subsistence user to be aware of private inholdings.

—"No open season" means no Federal subsistence season.

—Those residents listed under eligibility are the qualified subsistence users. "No determination" indicates open to Alaska rural residents. However, National Parks, Monuments, and Preserves are open only to Park Service qualified subsistence users.

VOL 56 ISS 123 JE 26 1991 UMI

Subsistence users must be local rural residents of National Park Service areas. For more information, contact the National Park Service in Anchorage, Alaska (telephone 907/257-2573).

Wolf: GMU 18—Residents of Units 6, 9, 10 (Unimak Island only), 11–13, and 16–26.	Hunting—4 Wolves	Aug. 10–Apr. 30.
	Trapping—No limit	Nov. 10–Mar. 31.
Wolverine: GMU 18—No determination	Hunting—1 Wolverine	Sept. 1–Mar. 31.
	Trapping—No limit	Nov. 10–Mar. 31.
Cormorant: GMU 18—No determination	No limit	July 1–June 30.
Grouse (Spruce, Blue, Ruffed and Sharp-tailed): GMU 18—No determination.	15 per day, 30 in possession	Aug. 10–Apr. 30.
Ptarmigan (Rock, Willow and White-tailed): GMU 18—No determination.	20 per day, 40 in possession	Aug. 10–Apr. 30.
Snowy Owl: GMU 18—No determination	No limit	July 1–June 30.

(19) GMU 19. (i) Game Management Unit 19 consists of the Kuskokwim River drainage upstream from Lower Kalskag;

(A) Unit 19(A) consists of the Kuskokwim River drainage downstream from and including the Moose Creek drainage on the north bank and downstream from and including the Stony River drainage on the south bank, excluding Unit 19(B);

(B) Unit 19(B) consists of the Aniak River drainage upstream from and including the Salmon River drainage, the Holitna River drainage upstream from and including the Bakbuk Creek drainage, that area south of a line from the mouth of Bakbuk Creek to the radar dome at Sparrevohn Air Force Base, including the Hoholitna River drainage upstream from that line, and the Stony River drainage upstream from and including the Can Creek drainage;

(C) Unit 19(C) consists of that portion of Unit 19 south and east of a line from Benchmark M#1.26 (approximately 1.26 miles south of the northwest corner of the original Mt. McKinley National Park boundary) to the peak of Lone Mountain, then due west to Big River, including the Big River drainage upstream from that line, and including the Swift River drainage upstream from and including the North Fork drainage;

(D) Unit 19(D) consists of the remainder of Unit 19;

(ii) Public lands within the following areas are closed to subsistence take or subsistence take is restricted as specified:

(A) Lands within Mount McKinley National Park as it existed prior to December 2, 1980 are closed to subsistence. Denali National Preserve and lands added to Denali National Park on December 2, 1980 are open to subsistence.

(B) The Upper Kuskokwim Controlled Use Area consisting of that portion of Unit 19(D) upstream from the mouth of Big River including the drainages of the Big River, Middle Fork, South Fork, East Fork, and Tonzona River, and bounded by a line following the west bank of the Swift Fork (McKinley Fork) of the Kuskokwim River to 152° 50′ W. long., then north to the boundary of Denali National Preserve, then following the western boundary of Denali National Preserve north to its intersection with the Minchumina-Telida winter trail, then west to the crest of Telida Mountain, then north along the crest of Munsatli Ridge to elevation 1,010, then northwest to Dyckman Mountain and following the crest of the divide between the Kuskokwim River and the Nowitna drainage, and the divide between the Kuskokwim River and the Nixon Fork River to Loaf bench mark on Halfway Mountain, then south to the west side of Big River drainage, the point of beginning, is closed during moose hunting seasons to the use of aircraft for hunting moose, including transportation of any moose hunter or moose part; however, this does not apply to transportation of a moose hunter or moose part by aircraft between publicly owned airports in the Controlled Use Area or from a publicly owned airport within the area to points outside the area;

(C) The Lime Village Management Area consists of that portion of Unit 19(A) drained by the Stony River from the mouth of the Stink River, including the Stink River drainage, upstream to

but not including the Can Creek drainage.

Note: There are private land areas within many Federal land units. These regulations apply only to Federal lands unless otherwise indicated. It is the responsibility of the subsistence user to be aware of private inholdings.

—"No open season" means no Federal subsistence season.

—Those residents listed under eligibility are the qualified subsistence users. "No determination" indicates open to Alaska rural residents. However, National Parks, Monuments, and Preserves are open only to Park Service qualified subsistence users. Subsistence users must be local rural residents of National Park Service areas. For more information, contact the National Park Service in Anchorage, Alaska (telephone 907/257–2572).

GMU 19—Unit 19(A)—Residents of Unit 19(A), (D), Tuluksak, Lower Kalskag and Kwethluk.	Unit 19(A), (D)—1 bear every four regulatory years	Sept. 1–May 31.
GMU 19—Unit 19(B)—Residents of Kwethluk	Unit 19(B)—1 bear every four regulatory years	Sept. 10–May 25.
GMU 19—Unit 19(D)—Residents of Unit 19(A), (D), Tuluksak and Lower Kalskag.		
GMU 19—Unit 19(C)—No subsistence	Unit 19(C)	No open season.
Caribou:		
GMU 19—Unit 19(A), (B)—(fall season) Residents of Unit 19(A), (B) and Kwethluk; (winter season) Residents of Unit 18 in Kuskokwim Drainage and Bay, residents of 19(A), (B) and Kwethluk.	Unit 19(A) north of Kuskokwim River—1 caribou	Aug. 10–Sept. 30 and Nov. 1–Feb. 28
	Unit 19(A) south of the Kuskokwim River, and Unit 19(B) (excluding residents of Lime Village)—4 caribou.	Aug. 10–Mar. 31.
GMU 19—Unit 19(C)—Residents of Unit 19(C), Lime Village, McGrath, Nikolai, and Telida.	Unit 19(C)—1 caribou	Aug. 10–Oct. 10.
GMU 19—Unit 19(D)—Residents of Unit 19(D), Lime Village, Stebbins, and Stony River.	Unit 19(D) south and east of the Kuskokwim River and North Fork of the Kuskokwim River—1 caribou.	Aug. 10–Sept. 30 and Nov. 1–Jan. 31.
	Unit 19(D)—Remainder—1 caribou	Aug. 10–Sept. 30.
	Unit 19—Lime Village Management Area—Residents domiciled in Lime Village only; no individual bag limit but a village harvest quota of 100 caribou; cows and calves may not be taken from Apr. 1–Aug. 9.	July 1–June 30.
Sheep: GMU 19—No determination	Unit 19—1 ram with ¾ curl	Aug. 10–Sept. 20.
Moose:		
GMU 19—Unit 19(A), (B)—Residents of Unit 19 within Kuskokwim River drainage upstream from and including the Johnson River and Unit 19.	Unit 19—Lime Village Management Area—Residents of Lime Village only—No individual bag limit but a village harvest quota of 30 moose; either sex.	July 1–June 30.
	Unit 19(A)—1 moose; however, antlerless moose may be taken only from Nov. 20–Nov. 30 and Feb. 1–Feb. 10.	Sept. 1–Sept. 20; Nov. 20–Nov. 30; Feb. 1–Feb. 10.
GMU 19—Unit 19(C)—Residents of Unit 19	Unit 19(B)—1 bull	Sept. 1–Sept. 30.
GMU 19—Unit 19(D)—Residents of Unit 19 and residents of Lake Minchumina.	Unit 19(C)—1 bull	Sept. 1–Oct. 10.
	Unit 19(D)—that portion of the Upper Kuskokwim Controlled Use Area within the North Fork drainage upstream from the confluence of the South Fork to the mouth of the Swift Fork—1 bull.	Sept. 1–Sept. 30.
	Unit 19(D)—remainder of the Upper Kuskokwim Controlled Use Area—1 bull.	Sept. 1–Sept. 30 and Dec. 1–Feb. 28.
	Unit 19(D)—Remainder—1 bull	Sept. 1–Sept. 30 and Dec. 1–Dec. 15.
Bat, Shrew, Rat, Mouse and Porcupine: GMU 19—No determination	No limit	July 1–June 30.
Beaver: GMU 19—No determination	Trapping—50 Beaver per season	Nov. 1–Apr. 15.
Coyote: GMU 19—No determination	Hunting—2 Coyotes	Sept. 1–Apr. 30.
	Trapping—No limit	Nov. 1–Mar. 31.
Fox, Red (including Cross, Black and Silver Phases): GMU 19—No determination.	Hunting—2 Foxes	Nov. 1–Feb. 15.
	Trapping—No limit	Nov. 1–Mar. 31.
Hares (Snowshoe and Arctic): GMU 19—No determination	No limit	July 1–June 30.
Lynx: GMU 19—No determination	Hunting—2 Lynx	Nov. 1–Feb. 28.
	Trapping—No limit	Nov. 1–Feb. 28.
Marten: GMU 19—No determination	Trapping—No limit	Nov. 1–Feb. 28.
Mink and Weasel: GMU 19—No determination	Trapping—No limit	Nov. 1–Feb. 28.
Muskrat: GMU 19—No determination	Trapping—No limit	Nov. 1–June 10.
Otter (land only): GMU 19—No determination	Trapping—No limit	Nov. 1–Apr. 15.
Raccoon: GMU 19—No determination	No limit	July 1–June 30.
Squirrel (Red, Ground and Flying): GMU 19—No determination	Hunting—No limit	July 1–June 30.
	Trapping—No limit	July 1–June 30.
Wolf: GMU 19—Residents of Units 6, 9, 10 (Unimak Island only), 11–13, and 16–26.	Hunting—10 Wolves	Aug. 10–Apr. 30.
	Trapping—No limit	Nov. 1–Mar. 31.
Wolverine: GMU 19—No determination	Hunting—1 Wolverine	Sept. 1–Mar. 31.
	Trapping—No limit	Nov. 1–Mar. 31.
Grouse (Spruce, Blue, Ruffed and Sharp-tailed): GMU 19—No determination.	15 per day, 30 in possession	Aug. 10–Apr. 30.
Ptarmigan (Rock, Willow and White-tailed): GMU 19—No determination.	20 per day, 40 in possession	Aug. 10–Apr. 30.

VOL 56 ISS 123 JE 26 1991 UMI

(20) GMU 20. (i) Unit 20 consists of the Yukon River drainage upstream from and including the Tozitna River drainage to and including the Hamlin Creek drainage, drainages into the south bank of the Yukon River upstream from and including the Charley River drainage, the Ladue River and Fortymile River drainages and the Tanana River drainage north of Unit 13 and downstream from the east bank of the Robertson River;

(A) Unit 20(A) consists of that portion of Unit 20 bounded on the south by the Unit 13 boundary, bounded on the east by the west bank of the Delta River, bounded on the north by the north bank of the Tanana River from its confluence with the Delta River downstream to its confluence with the Nenana River, and bounded on the west by the east bank of the Nenana River;

(B) Unit 20(B) consists of drainages into the north bank of the Tanana River from and including Hot Springs Slough upstream to and including the Banner Creek drainage;

(C) Unit 20(C) consists of that portion of Unit 20 bounded on the east by the east bank of the Nenana River and on the north by the north bank of the Tanana River downstream from the Nenana River;

(D) Unit 20(D) consists of that portion of Unit 20 bounded on the east by the east bank of the Robertson River and on the west by the west bank of the Delta River, and drainages into the north bank of the Tanana River from its confluence with the Robertson River downstream to, but excluding, the Banner Creek drainage;

(E) Unit 20(E) consists of drainages into the south bank of the Yukon River upstream from and including the Charley River drainage, and the Ladue River drainage;

(F) Unit 20(F) consists of the remainder of Unit 20.

(ii) Public lands within the following areas are closed to subsistence take or subsistence take is restricted as specified:

(A) Lands within Mount McKinley National Park as it existed prior to December 2, 1980 are closed to subsistence. Denali National Preserve and lands added to Denali National Park on December 2, 1980 are open to subsistence.

(B) Delta Controlled Use Area consisting of the drainages of the Tanana River south of the Alaska Highway, from the west bank of the Johnson River to and including drainages of the Delta River north of the north bank of Miller Creek and Canwell Glacier in Units 13(B), 20(A), and 20(D) is closed to the use of any motorized vehicle or pack animal for hunting from August 5 through August 25; however, this does not prohibit motorized access to the area for hunting, or transportation of game on the Richardson Highway;

(C) The Dalton Highway Corridor Management Area, consisting of those portions of Units 20, 24, 25, and 26 extending five miles from each side of the Dalton Highway from the Yukon River to the Prudhoe Bay Closed Area, is closed to hunting; however, big game and small game may be taken in the area by bow and arrow only; no motorized vehicle, except aircraft, boats, and licensed highway vehicles, may be used to transport game or hunters within the Dalton Highway Corridor Management Area;

(D) Birch Lake and the area within one-half mile of Birch Lake (Mile 56 Richardson Highway) is closed to the taking of big game;

(E) Harding Lake and the area within one-half mile of Harding Lake (Mile 44 Richardson Highway) is closed to the taking of big game;

(F) Lost Lake and the area within one-half mile of Lost Lake (Mile 56 Richardson Highway) is closed to the taking of big game with firearms and crossbows;

(G) The Delta Junction Closed Area (Unit 20(D) near Delta Junction), which consists of that portion of Unit 20(D) bounded by a line beginning at the confluence of Donnelly Creek and the Delta River, then up Donnelly Creek to the Richardson Highway (Mile 238), then north along the east side of the highway to the "12 mile crossing trail" (Mile 252.4), then east along the south side of the "12 mile crossing trail" and across Jarvis Creek to the 33-Mile Loop Road then northeast along the 33-Mile Loop Road to the intersection with the Alaska Highway (Mile 1414), then southeast along the north side of the Alaska Highway to the bridge at Sawmill Creek (Mile 1403.9), then down the west bank of Sawmill Creek to its confluence with Clearwater Creek and down the south bank of Clearwater Creek to its confluence with the Tanana River, then down the Tanana River to its confluence with the Delta River, and upstream along the east bank of the Delta River to the point of beginning at Donnelly Creek, is closed to the taking of moose;

(H) The Glacier Mountain Controlled Use Area consisting of that portion of Unit 20(E) bounded by a line beginning at Mile 140 of the Taylor Highway, then north along the highway to Eagle, then west along the cat trail from Eagle to Crooked Creek, then from Crooked Creek southwest along the west bank of Mogul Creek to its headwaters on North Peak, then west across North Peak to the headwaters of Independence Creek, then southwest along the west bank of Independence Creek to its confluence with the North Fork of the Fortymile River, then easterly along the south bank of the North Fork of the Fortymile River to its confluence with Champion Creek, then across the North Fork of the Fortymile River to the south bank of Champion Creek and easterly along the south bank of Champion Creek to its confluence with Little Champion Creek, then northeast along the east bank of Little Champion Creek to its headwaters, then northeasterly in a direct line to Mile 140 on the Taylor Highway is closed to the use of any motorized vehicle for hunting, from August 5 to September 20; however, this does not prohibit motorized access via, or transportation of game on, the Taylor Highway or any airport;

(I) The Wood River Controlled Use Area consisting of that portion of Unit 20(A) bounded on the north by the south side of the Rex Trail beginning at its intersection with the Totatlanika River then easterly along the Rex Trail to Gold King airstrip, then from Gold King airstrip along the trail's extension along the north side of Japan Hills to the Wood River; on the east by the Wood River, including the Wood River drainage upstream from and including the Snow Mountain Gulch Creek drainage; on the south by the divide separating the Yanert River drainage from the drainages of Healy Creek, Moody Creek, Montana Creek and the Wood River; and on the west by the east bank of the Nenana River from the divide separating the drainage of the Yanert River and Montana Creek north to Healy Creek, then easterly along the south bank of Healy Creek to the north fork of Healy Creek, then along the north fork of Healy Creek to its headwaters, then along a straight line to the headwaters of Dexter Creek, then along Dexter Creek to the Totatlanika River, and then down the east bank of the Totatlanika River to the Rex Trail is closed to the use of any motorized vehicle except aircraft for big game hunting and transportation of any big game part from August 1 through September 30;

(J) The Macomb Plateau Controlled Use Area, consisting of that portion of Unit 20(D) south of the Alaska Highway, draining into the south side of the Tanana River between the east bank of the Johnson River upstream to Prospect Creek, and the east bank of Bear Creek (Mile 1357.3), is closed to the use of any motorized vehicle, except a floatplane on Fish Lake, for hunting or transportation of any game part, from August 10 through September 30;

(K) The Yanert Controlled Use Area, consisting of that portion of Unit 20(A) drained by the Nenana River upstream from and including the Yanert Fork drainage, is closed to the use of any motorized vehicle, except aircraft, for big game hunting and transportation of any big game part; however, this does not prohibit motorized access via, and transportation of game on, the Parks Highway;

(L) The Minto Flats Management Area consisting of that portion of Unit 20 bounded by the Elliot Highway beginning at Mile 118, then northeasterly to Mile 98, then east to the Tolovana Hotsprings Dome, then east to the Winter Cat Trail, then along the Cat Trail south to the Old Telegraph Trail at Dunbar, then westerly along the trail to a point where it joins the Tanana River three miles above Old Minto, then along the north bank of the Tanana River (including all channels and sloughs except Swan Neck Slough), to the confluence of the Tanana and Tolovana Rivers and then northerly to the point of beginning, is open to moose hunting by permit only;

(M) The Fairbanks Management Area consists of the Goldstream subdivision (SE¼SE¼ section 28 and section 33, Township 2 North, Range 1 West, and Fairbanks Meridian) and that portion of Unit 20(B) bounded by a line from the confluence of Rosie Creek and the Tanana River, northerly along Rosie Creek to the divide between Rosie Creek and Cripple Creek, then down Cripple Creek to its confluence with Ester Creek, then up Ester Creek to its confluence with Ready Bullion Creek, then up Ready Bullion Creek to the summit of Ester Dome, then down Sheep Creek to its confluence with Goldstream Creek, then easterly along Goldstream Creek to its confluence with First Chance Creek, then up First Chance Creek to Tungsten Hill, then southerly along Steele Creek to its intersection with the Trans-Alaska Pipeline, then southerly along the pipeline right-of-way to the Chena River, then along the north bank of the Chena River to the Moose Creek dike, then southerly along Moose Creek dike to its intersection with the Tanana River, and then westerly along the north bank of the Tanana River to the point of beginning is open to moose hunting by bow and arrow only;

(N) The Ferry Trail Management Area consisting of that portion of Unit 20(A) bounded on the north by the Rex Trail; on the west by the east bank of the Nenana River from its intersection with the Rex Trail south to the divide forming the north boundary of the Lignite Creek drainage; on the south by that divide easterly and southerly to the headwaters of Sanderson Creek at Usibelli Peak, then along a southwesterly line to the confluence of Healy Creek and Coal Creek, then upstream easterly along the south bank of Healy Creek to the north fork of Healy Creek, then along the north fork of Healy Creek to its headwaters; on the east by a straight line from the headwaters of Healy Creek to the headwaters of Dexter Creek, then along Dexter Creek to the Totatlanika River, then down the east bank of the Totatlanika River to the Rex Trail is open to caribou hunting by permit only;

(o) The Healy-Lignite Management Area consisting of that portion of Unit 20 (A) that includes the entire Lignite Creek drainage, and that portion of the Nenana River drainage south of the Lignite Creek drainage and north of a boundary beginning at the confluence of the Nenana River and Healy Creek, then easterly along the south bank of Healy Creek to its confluence with Coal Creek then northeasterly to the headwaters of Sanderson Creek at Usibelli Peak is open to hunting by bow and arrow only.

Note: There are private land areas within many Federal land units. These regulations apply only to Federal lands unless otherwise indicated. It is the responsibility of the subsistence user to be aware of private inholdings.

—"No open season" means no Federal subsistence season.

—Those residents listed under eligibility are the qualified subsistence users. "No determination" indicates open to Alaska rural residents. However, National Parks, Monuments, and Preserves are open only to Park Service qualified subsistence users. Subsistence users must be local rural residents of National Park Service areas. For more information, contact the National Park Service in Anchorage, Alaska (telephone 907/257–2572).

Eligibility determination	Bag limits	Open season
Black bear: GMU 20—No determination	Unit 20—3 bears	July 1–June 30.
Brown bear: GMU 20—Unit 20 (A), (B), (C), (D), and (F)—No determination.	Unit 20.—except Unit 20(E)—1 bear every four regulatory years	Sept. 1–May 31.
GMU 20—Unit 20(E)—No subsistence	Unit 20 (E)	No open season.
Caribou: GMU 20—Unit 20(A), (C) (Delta, Yanert, and 20(C) herds), (D)—No determination except no subsistence for residents of McKinley Village, the area along the Parks Highway between milepost 216 and 239 and households of the Denali National Parks Headquarters.	Units 20(A), (B), (C) and (D)	No open season.
GMU 20—Unit 20(D) and (E) 40-Mile Herd—Residents of Unit 12 north of Wrangell Park-Preserve, rural residents of 20(D) and residents of 20(E).	Unit 20(E)—that portion drained by the Yukon River downstream from and including the Seventy-mile and Charley Rivers, the North Fork Fortymile River upstream from and including Independence Creek, the Middle Fork Fortymile River upstream from Fish Creek, and the Mosquito Fork Fortymile River upstream from and including Ketchumstuck Creek—1 caribou.	Aug. 10–Sept. 30 and Dec. 1–Feb. 28.
GMU 20—Unit 20(B) and (F)—No determination	Unit 20(E)—Remainder of Unit 20(E) accessible by the Taylor Highway and associated trails, as described in the permit—1 caribou by State registration permit only; however, only bulls may be taken prior to Dec. 1.	Aug. 10–Sept. 30 and Dec. 1–Feb. 28.
	Unit 20(F)—South of the Yukon River and west of the Dalton Highway—1 bull.	Aug. 10–Sept. 20.
	Unit 20(F)—Tozitna River drainage—1 caribou; however, only bull caribou may be taken Aug. 10–Sept. 30.	Aug. 10–Sept. 30, Nov. 26–Dec. 10 and Mar. 1–Mar. 15.
	Unit 20(F)—Remainder—1 bull	Aug. 10–Sept. 30.
Moose: GMU 20—Unit 20(A)—Residents of Cantwell, Minto, and Nenana.	Unit 20(A)—the Ferry Trail Management Area and the Yanert Controlled Use Area—1 bull with a spike-fork or 50-inch antlers.	Sept. 1–Sept. 20.
GMU 20—Unit 20(A) and (C)—No subsistence for residents of McKinley Village, the area along the Parks Highway between milepost 216 and 239 and households of the Denali National Park Headquarters.	Unit 20(A)—Remainder 1 bull	Sept. 1–Sept. 30.

VOL 56 ISS 123 JE 26 1991 UMI

Eligibility determination	Bag limits	Open season
GMU 20—Unit 20(B) Minto Flats Management Area—Residents of Minto and Nenana.	Unit 20(B)—that portion within the Minto Flats Management Area—1 bull by Federal registration permit only (Source of permits—Yukon Flats National Wildlife Refuge, Fairbanks AK).	Sept. 1–Sept. 20 and Jan. 10–Feb. 28.
GMU 20—Remainder of Unit 20(B)—Rural residents of GMU 20(B) Nenana and Tanana.	Unit 20(B)—the drainage of the Middle Fork of the Chena River and that portion of the Salcha River Drainage upstream from and including Goose Creek—1 bull.	Sept. 1–Sept. 20.
	Unit 20(B)—Remainder—(except the Fairbanks Management Area; no subsistence)—1 bull.	Sept. 1–Sept. 20.
GMU 20—Unit 20(C)—Rural residents of Unit 20(C) (except that portion within Denali National Park and Preserve and that portion east of the Teklanika River), and residents of Cantwell, Manley, Minto, Nenana, the Parks Highway from milepost 300–309, Nikolai, Tanana, and Tetlin.	Unit 20(C)—1 bull; however, white-phased or partial albino (more than 50 percent white) moose may not be taken.	
GMU 20—Unit 20(E)—No determination	Unit 20(E)—that portion drained by the Ladue, Sixty-mile, and Forty-mile Rivers (all forks) from Mile 9½ to Mile 146 Taylor Highway, including the Boundary Cutoff Road—1 bull.	Sept. 1–Sept. 10.
	Unit 20(E)—Remainder—that portion draining into the Yukon River upstream from and including the Charley River drainage to and including the Boundary Creek drainages and the Taylor Highway from mile 145 to Eagle—1 bull.	Sept. 5–Sept. 25.
GMU 20—Unit 20(F)—Residents of Unit 20(F), Manley, Minto, and Stevens Village.	Unit 20(F)—1 bull	Sept. 1–Sept. 25.
Bat, Shrew, Rat, Mouse and Porcupine: GMU 20—No determination.	No limit	July 1–June 30.
Beaver: GMU 20—No determination	Trapping—Unit 20(A)—25 Beaver per season	Feb. 1–Apr. 15.
	Trapping—Unit 20(B)—that portion of the Chena River downstream from its confluence with the Little Chena River, and Badger (Pleadriver) Slough downstream from Plack Road.	No open season.
	Trapping—Unit 20(B)—Remainder of Unit 20(B) and Unit 20(C), (E), and that portion of 20(D) draining into the north bank of the Tanana River, including the islands in the Tanana River—25 Beaver per season.	Nov. 1–Apr. 15.
	Trapping—Unit 20(D)—Remainder—15 Beaver per season	Feb. 1–Apr. 15.
	Trapping—Unit 20(F)—50 Beaver per season	Nov. 1–Apr. 15.
Coyote: GMU 20—No determination	Hunting—Unit 20—2 Coyotes	Sept. 1–Apr. 30.
	Trapping—Unit 20(E)—No limit	Nov. 1–Feb. 28.
	Trapping—Unit 20—Remainder (except 20(D))—No limit	Nov. 1–Mar. 31.
Fox, red (including Cross, Black and Silver Phases): GMU 20—No determination.	Unit 20(D)	No open season.
	Hunting—2 Foxes	Nov. 1–Feb. 15.
	Trapping—No limit	Nov. 1–Feb. 28.
Hares (Snowshoe and Arctic): GMU 20—No determination	No limit	July 1–June 30.
Lynx: GMU 20—No determination	Hunting—Unit 20(E)—2 Lynx	Nov. 1–Jan. 31.
	Trapping—Unit 20(E)—No limit	Nov. 1–Jan. 31.
	Hunting—Unit 20—Remainder (except (D))—2 Lynx	Dec. 1–Jan. 31.
	Trapping—Unit 20—Remainder (except (D))—No limit	Dec. 1–Jan. 31.
Marten: GMU 20—No determination	Unit 20(D)	No open season.
Mink and weasel: GMU 20—No determination	Trapping—No limit	Nov. 1–Feb. 28.
Muskrat: GMU 20—No determination	Trapping—No limit	Nov. 1–Feb. 28.
	Trapping—Unit 20(E)—No limit	Sept. 20–June 10.
Otter (land only): GMU 20—No determination	Trapping—Unit 20—Remainder (except (D))—No limit	Nov. 1–June 10.
Squirrel (Red, Ground and Flying): GMU 20—No determination	Unit 20(D)	No open season.
	Trapping—No limit	Nov. 1–Apr. 15.
Wolf: GMU 20—Residents of Units 6, 9, 10 (Unimak Island only), 11–13, and 16–26.	Hunting—No limit	July 1–June 30.
	Trapping—No limit	July 1–June 30.
	Hunting—Unit 20—10 Wolves per season	Aug. 10–Apr. 30.
Wolverine: GMU 20—No determination	Trapping—Unit 20(E)—No limit	Oct. 1–Apr. 30.
	Trapping—Unit 20—Remainder (except (D))—No limit	Nov. 1–Mar. 31.
Grouse (Spruce, Blue, Ruffed and Sharp-tailed): GMU 20(D)—Residents of Units 11, 13, 15, 16, 20(D), 22, and 23.	Unit 20(D)	No open season.
	Hunting—1 Wolverine	Sept. 1–Mar. 31.
	Trapping—No limit	Nov. 1–Feb. 28.
GMU 20—Remainder—No determination	Unit 20(D)—that portion south of the Tanana River and west of the Johnson River—15 per day, 30 in possession, provided that not more than 5 per day and 10 per day are sharp-tailed grouse.	Aug. 25–Mar. 31.
Ptarmigan (Rock, Willow and White-tailed): GMU 20(D)—Residents of Units 11, 13, 15, 16, 20(D), 22, and 23.	Unit 20—Remainder—15 per day, 30 in possession	Aug. 10–Mar. 31.
	Unit 20(D)—those portions within five miles of Alaska Route 5 (Taylor Highway, both to Eagle and the Alaska-Canada boundary) and that portion of Alaska Route 4 (Richardson Highway) south of Delta Junction—20 per day, 40 in possession.	Aug. 10–Mar. 31.
GMU 20—Remainder—No determination	Unit 20—Remainder—20 per day, 40 in possession	Aug. 10–Apr 30.

(21) GMU 21. (i) Game Management Unit 21 consists of drainages into the Yukon River upstream from Paimiut to but not including the Tozitna River drainage on the north bank and to, but not including the Tanana River drainage on the south bank; and excluding the Koyukuk River upstream to and including the Dulbi River drainage;

(A) Unit 21(A) consists of the Innoko River drainage upstream from and including the Iditarod River drainage, and the Nowitna River drainage upstream from the Little Mud River;

(B) Unit 21(B) consists of the Yukon River drainage upstream from Ruby and east of the Ruby-Poorman Road, downstream from and excluding the

Tozinta River and Tanana River drainages, and excluding the Nowitna River drainage upstream from the Little Mud River, and excluding the Melozitna River drainage upstream from Grayling Creek;

(C) Unit 21(C) consists of the Melozitna River drainage upstream from Grayling Creek, and the Dulbi River drainage upstream from and including the Cottonwood Creek drainage;

(D) Unit 21(D) consists of the Yukon River drainage from and including the Blackburn Creek drainage upstream to Ruby, including the area west of the Ruby-Poorman Road, excluding the Koyukuk River drainage upstream from the Dulbi River drainage, and excluding the Dulbi River drainage upstream from Cottonwood Creek;

(E) Unit 21(E) consists of the Yukon River drainage from Paimiut upstream to but not including the Blackburn Creek drainage, and the Innoko River drainage downstream from the Iditarod River drainage;

(ii) Public Lands within the following areas are closed to subsistence take or subsistence take is restricted as specified:

(A) The Koyukuk Controlled Use Area consisting of those portions of Units 21 and 24 bounded by a line from the north bank of the Yukon River at Koyukuk, then northerly to the confluences of the Honhosa and Kateel Rivers, then northeasterly to the confluences of Billy Hawk Creek and the Huslia River (65° 57′ N. lat., 156° 41′ W. long), then easterly to the south end of Solsmunket Lake, then east to Hughes, then south to Little Indian River, then southwesterly to the crest of Hochandochtla Mountain, then southwest to the mouth of Cottonwood Creek then southwest to Bishop Rock, then westerly along the north bank of the Yukon River (including Koyukuk Island) to the point of beginning is closed during moose-hunting seasons to the use of aircraft for hunting moose, including transportation of any moose hunter or moose part; however, this does not apply to transportation of a moose hunter or moose part by aircraft between publicly owned airports in the controlled use area or from a publicly owned airport within the area to points outside the area; all hunters on the Koyukuk River passing the Department of Fish and Game operated check station at Ella's Cabin (15 miles upstream from the Yukon on the Koyukuk River) are required to stop and report to department personnel at the check station;

(B) Paradise Controlled Use Area consisting of that portion of Unit 21 bounded by a line beginning at the old village of Paimiut, then north along the west bank of the Yukon River to Paradise, then northwest to the mouth of Stanstrom Creek on the Bonasila River, then northeast to the mouth of the Anvik River, then along the west bank of the Yukon River to the lower end of Eagle Island (approximately 45 miles north of Grayling), then to the mouth of the Iditarod River, then down the east bank of the Innoko River to its confluence with Paimiut Slough, then south along the east bank of Paimiut Slough to its mouth, and then to the old village of Paimiut, is closed during moose hunting seasons to the use of aircraft for hunting moose, including transportation of any moose hunter or part of moose by aircraft between publicly owned airports in the Controlled Use Area or from a publicly owned airport within the area to points outside the area;

Note: There are private land areas within many Federal land units. These regulations apply only to Federal lands unless otherwise indicated. It is the responsibility of the subsistence user to be aware of private inholdings.

—Those residents listed under eligibility are the qualified subsistence users.
—"No open season" means no Federal subsistence season.
—"No determinatin" indicates open to Alaska rural residents.

Eligibility determination	Bag limits	Open season
Black Bear: GMU 21—No determination	Unit 21—3 bears	July 1–June 30.
Brown Bear: GMU 21—Rural residents of Unit 21 and 23	Unit 21—1 bear every four regulatory years	Sept. 1–May 31.
Caribou: GMU 21—Unit 21(A) and (E)—Residents of Unit 21(A) and Aniak, Chuathbaluk, Crooked Creek, Grayling, Holy Cross, McGrath, Shageluk, and Takotna.	Unit 21(A), (B), (C), (E)—1 caribou	Aug. 10–Sept. 30.
GMU 21—Unit 21 (Western Arctic Caribou Herd only)—Residents of Unit 21(D) west of the Koyukuk and Yukon Rivers, 22(A), (B), 23, and 26(A).	Unit 21(D) North of the Yukon River and east of the Koyukuk River—1 caribou; however, 2 additional caribou may be taken during a winter season to be announced.	Aug. 10–Sept. 30, Winter season to be announced.
GMU 21—Units 21 (C) and (D)—(Galena Mountains Herd)—No Determination.	Unit 21(D)—Remainder (Western Arctic Caribou herd)—5 caribou per day, however, cow caribou may not be taken May 16–June 30.	July 1–June 30.
Moose: GMU 21—Unit 21(A)—Residents of Unit 21(A), (E), Takotna, McGrath, Aniak, and Crooked Creek.	Unit 21(A)—1 bull	Sept. 5–Sept. 30 and Nov. 1–Nov. 30.
GMU 21—Unit 21(B) and (C)—Residents of Unit 21(B), (C), Tanana and Galena.	Unit 21(B) and (C)—1 bull	Sept. 5–Sept. 25.
GMU 21—Unit 21(D)—Residents of 21(D), Huslia and Ruby	Unit 21(D)—1 moose; antlerless moose may be taken only from Sept. 21–Sept. 25 and Feb. 1–Feb. 5; moose may not be taken within one-half mile of the Yukon River during the February season.	Sept. 5–Sept. 25 and Feb 1–Feb. 5.
GMU 21—Unit 21(E)—Residents of Unit 21(E) and Russian Mission.	Unit 21(E)—1 moose; however, only bulls may be taken from Sept. 5–Sept. 25.	Sept. 5–Sept. 25 and Feb. 1–Feb. 10.
Bat, Shrew, Rat, Mouse and Porcupine: GMU 21—No determination.	No limit	July 1–June 30.
Beaver: GMU 21—No determination	Trapping—50 Beaver per season	Nov. 1–Apr. 15.
Coyote: GMU 21—No determination	Hunting—2 Coyotes	Sept. 1–Apr. 30.
	Trapping—No limit	Nov. 1–Mar. 31.
Fox, Red (including Cross, Black and Silver Phases): GMU 21—No determination.	Hunting—2 Foxes	Nov. 1–Feb. 15.
Hares (Snowshoe and Arctic) GMU 21—No determination	Trapping—No Limit	Nov. 1–Feb. 28.
Lynx: GMU 21—No determination	No limit	July 1–June 30.
	Hunting—2 Lynx	Nov. 1–Feb. 28.
Marten: GMU 21—No determination	Trapping—No limit	Nov. 1–Feb. 28.
Mink and Weasel: GMU 21—No determination	Trapping—No limit	Nov. 1–Feb. 28.
Muskrat: GMU 21—No determination	Trapping—No limit	Nov. 1–Feb. 28.
Otter (land only): GMU 21—No determination	Trapping—No limit	Nov. 1–June 10.
Squirrel (Red, Ground and Flying): GMU 21—No determination	Trapping—No limit	Nov. 1–Apr. 15.
	Hunting—No limit	July 1–June 30.
	Trapping—No limit	July 1–June 30.

VOL 56 ISS 123 JE 26 1991 UMI

Eligibility determination	Bag limits	Open season
Wolf: GMU 21—Residents of Units 6, 9, 10 (Unimak Island only), 11–13, and 16–26.	Hunting—10 Wolves	Aug. 10–Apr. 30.
	Trapping—No limit	Nov. 1–Mar. 31.
Wolverine: GMU 21—No determination	Hunting—1 Wolverine	Sept. 1–Mar. 31.
	Trapping—No limit	Nov. 1–Mar. 31.
Grouse (Spruce, Blue, Ruffed and Sharp-tailed): GMU 21—No determination.	15 per day, 30 in possession	Aug. 10–Apr. 30.
Ptarmigan (Rock, Willow and White-tailed): GMU 21—No determination	20 per day, 40 in possession	Aug. 10–Apr. 30.

(22) GMU 22. (i) Game Management Unit 22 consists of Bering Sea, Norton Sound, Bering Strait, Chukchi Sea, and Kotzebue Sound drainages from, but excluding, the Pastolik River drainage in southern Norton Sound to, but not including the Goodhope River drainage in Southern Kotzebue Sound, and all adjacent islands in the Bering Sea between the mouths of the Goodhope and Pastolik Rivers;

(A) Unit 22(A) consists of Norton Sound drainages from, but excluding, the Pastolik River drainage to, and including, the Ungalik River drainage, and Stuart and Besboro Islands;

(B) Unit 22(B) consists of Norton Sound drainages from, but excluding, the Ugalik River drainage to, and including, the Topkok Creek drainage;

(C) Unit 22(C) consists of Norton Sound and Bering Sea drainages from, but excluding, the Topkok Creek drainage to, and including, the Tisuk River drainage, and King and Sledge Islands;

(D) Unit 22(D) consists of that portion of Unit 22 draining into the Bering Sea north of but not including the Tisuk River to and including Cape York, and St. Lawrence Island;

(E) Unit 22(E) consists of Bering Sea, Bering Strait, Chukchi Sea, and Kotzebue Sound drainages from Cape York to, but excluding, the Goodhope River drainage, and including Little Diomede Island and Fairway Rock;

Note: There are private land areas within many Federal land units. These regulations apply only to Federal lands unless otherwise indicated. It is the responsibility of the subsistence user to be aware of private inholdings.

—"No open season" means no Federal subsistence season.

—Those residents listed under eligibility are the qualified subsistence users. "No determination" indicates open to Alaska rural residents. However, National Parks, Monuments, and Preserves are open only to Park Service qualified subsistence users. Subsistence users must be local rural residents of National Park Service areas. For more information, contact the National Park Service in Anchorage, Alaska (telephone 907/257–2572).

Eligibility determination	Bag limits	Open season
Black Bear: GMU 22—No determination	Unit 22—3 bears	July 1–June 30.
Brown Bear: GMU 22—Residents of Unit 22	Unit 22(A)—1 bear every four regulatory years	Sept. 1–Oct. 31 and Apr. 15–May 25.
	Unit 22(C)—1 bear every four regulatory years	Sept. 1–Oct. 31 and May 10–May 25.
	Unit 22—Remainder—1 bear every four regulatory years	Sept. 1–Oct. 31 and Apr. 15–May 25.
Caribou: GMU 22—Unit 22 (Western Arctic Caribou Herd)—Residents of Unit 21(D) west of the Koyukuk and Yukon Rivers, and residents of Units 22 (A), (B), 23, and 26(A).	Unit 22(A) and (B)—5 caribou per day; however, cow caribou may not be taken May 16–June 30.	July 1–June 30.
	Unit 22 (C), (D) and (E)	No open season.
Moose: GMU 22—Residents of Unit 22	Unit 22(A)—1 bull	Aug. 1–Sept. 30 and Dec. 1–Dec. 31.
	Unit 22(B)—1 moose; however, antlerless moose may be taken only from Dec. 1–Dec. 31—no person may take a cow accompanied by a calf.	Aug. 1–Jan. 31.
	Unit 22(C)—1 bull	Sept. 1–Sept. 14.
	Unit 22(D)—1 moose; however, antlerless moose may be taken only from Aug. 1–Dec. 31—no person may take a cow accompanied by a calf.	Aug. 1–Jan. 31.
	Unit 22(E)—1 moose; No person may take a cow accompanied by a calf.	Aug. 1–Mar. 31.
Bat, Shrew, Rat, Mouse and Porcupine: GMU 22—No determination	No limit	July 1–June 30.
Beaver: GMU 22—No determination	Trapping—Unit 22 (A) and (B)—50 Beaver per season	Nov. 1–June 10.
	Trapping—Unit 22 (C), (D) and (E)—50 Beaver per season	Nov. 1–Apr. 15.
Coyote: GMU 22—No determination	Hunting—2 Coyotes	Sept. 1–Apr. 30.
	Trapping—No limit	Nov. 1–Apr. 15.
Fox, Arctic (Blue and White Phases): GMU 22—No determination	Hunting—2 Foxes	Sept. 1–Apr. 30.
	Trapping—No limit	Nov. 1–Apr. 15.
Fox, Red (including Cross, Black and Silver Phases): GMU 22—No determination.	Hunting—2 Foxes	Nov. 1–Feb. 15.
	Trapping—No limit	Nov. 1–Apr. 15.
Hares (Snowshoe and Arctic): GMU 22—No determination	No limit	July 1–June 30.
Lynx: GMU 22—No determination	Hunting—2 Lynx	Nov. 1–Apr. 15.
	Trapping—No limit	Nov. 1–Apr. 15.
Marten: GMU 22—No determination	Trapping—No limit	Nov. 1–Apr. 15.
Mink and Weasel: GMU 22—No determination	Trapping—No limit	Nov. 1–Jan. 31.
Muskrat: GMU 22—No determination	Trapping—No limit	Nov. 1–June 10.
Otter (land only): GMU 22—No determination	Trapping—No limit	Nov. 1–Apr. 15.
Squirrel (Red, Ground and Flying): GMU 22—No determination	Hunting—No limit	July 1–June 30.
	Trapping—No limit	July 1–June 30.
Wolf: GMU 22—Residents Units 6, 9, 10 (Unimak Island only), 11–13, 16–26.	Hunting—No limit	Aug. 10–Apr. 30.
	Trapping—No limit	Nov. 1–Apr. 15.

Eligibility determination	Bag limits	Open season
Wolverine: GMU 22—No determination	Hunting—1 Wolverine	Sept. 1–Mar. 31.
	Trapping—No limit	Nov. 1–Apr. 15.
Cormorant: GMU 22—No determination	No limit	July 1–June 30.
Grouse (Spruce, Blue Ruffed and Sharp-tailed): GMU 22—Residents of Units 11, 13, 15, 16, 20(D), 22, and 23.	15 per day, 30 in possession	Aug. 10–Apr. 30.
Ptarmigan (Rock, Willow and White-tailed): GMU 22—Residents of Units 11, 13, 15, 16, 20(D), 22, and 23.	20 per day, 40 in possession	Aug. 10–Apr. 30.
Snowy Owl: GMU 22—No determination	No limit	July 1–June 30.

(23) GMU 23. (i) Game Management Unit 23 consists of Kotzebue Sound, Chukchi Sea, and Arctic Ocean drainages from and including the Goodhope River drainage to Cape Lisburne;

(ii) Public lands within the following area are closed to subsistence take or subsistence take is restricted as specified: The Noatak Controlled Use Area, consisting of that portion of Unit 23 in a corridor extending five miles on either side of the Noatak River beginning at the mouth of the Kugururok River, and extending easterly along the Noatak River to the mouth of Sapun Creek, is closed for the period August 20–September 20 to the use of aircraft in any manner for big game hunting, including transportation of big game hunters or game.

Note: There are private land areas within many Federal land units. These regulations apply only to Federal lands unless otherwise indicated. It is the responsibility of the subsistence user to be aware of private inholdings.

—"No open season" means no Federal subsistence season.

—Those residents listed under eligibility are the qualified subsistence users. "No determination" indicates open to Alaska rural residents. However, National Parks, Monuments, and Preserves are open only to Park Service qualified subsistence users. Subsistence users must be local rural residents of National Park Service areas. (iii)

Eligibility determination	Bag limits	Open season
Black Bear: GMU 23—No determination	Unit 23—3 bears	July 1–June 30.
Brown Bear: GMU 23—Rural residents of Units 21 and 23	Unit 23—1 bear every four regulatory years	Sept. 1–Oct. 10 and Apr. 15–May 25.
Caribou: GMU 23—Unit 23 (Western Arctic Caribou Herd)—Residents of Unit 21(D) west of the Koyukuk and Yukon Rivers, and residents of Units 22 (A), (B), 23, and 26(A).	Unit 23—5 caribou per day; however, cow caribou may not be taken May 16–June 30.	July 1–June 30.
Sheep: GMU 23—Residents of Unit 23 north of the Arctic Circle	Unit 23—1 ram with ½ curl horn or larger. In that portion of Unit 23 south and east of the Noatak River (excluding Gates of the Arctic National Park), a State registration permit is required. A harvest quota will be announced before the permit hunt.	Aug. 10–Sept. 20.
	Unit 23—1 sheep. In that portion of Unit 23 south and east of the Noatak River (excluding Gates of the Arctic National Park), the hunt will be closed when 30 sheep have been taken. From Oct. 1–Apr. 30, Federal public lands will be closed to sheep hunting, except by residents of Unit 23 living north of the Arctic Circle.	Oct. 1–Apr. 30.
Moose: GMU 23—Residents of Unit 23	Unit 23—that portion north and west of and including the Kivalina River drainage—1 moose; however, antlerless moose may be taken only from Sept. 1–Mar. 31; no person may take a cow accompanied by a calf.	July 1–Mar. 31.
	Unit 23—Remainder—1 moose; however, antlerless moose may be taken only from Sept. 1–Mar. 31; no person may take a cow accompanied by a calf.	Aug. 1–Mar. 31.
Bat, Shrew, Rat, Mouse and Porcupine: GMU 23—No determination	No limit	July 1–June 30.
Beaver: GMU 23—No determination	Trapping—Unit 23—the Kobuk and Selawik River drainages—50 Beaver per season.	Nov. 1–June 10.
	Trapping—Unit 23—Remainder—30 Beaver per season	Nov. 1–June 10.
Coyote: GMU 23—No determination	Hunting—2 Coyotes	Sept. 1–Apr. 30.
	Trapping—No limit	Nov. 1–Apr. 15.
Fox, Arctic (Blue and White Phases): GMU 23—No determination	Hunting—2 Foxes	Sept. 1–Apr. 30.
	Trapping—No limit	Nov. 1–Apr. 15.
Fox, Red (including Cross, Black and Silver Phases): GMU 23—No determination.	Hunting—2 Foxes	Nov. 1–Feb. 15.
	Trapping—No limit	Nov. 1–Apr. 15.
Hares (Snowshoe and Arctic): GMU 23—No determination	Hunting—No limit	July 1–June 30.
Lynx: GMU 23—No determination	Hunting—2 Lynx	Dec. 1–Jan. 15.
	Trapping—3 Lynx	Dec. 1–Jan. 15.
Marten: GMU 23—No determination	Trapping—No limit	Nov. 1–Apr. 15.
Mink and Weasel: GMU 23—No determination	Trapping—No limit	Nov. 1–Jan. 31.
Muskrat: GMU 23—No determination	Trapping—No limit	Nov. 1–June 10.
Otter (land only): GMU 23—No determination	Trapping—No limit	Nov. 1–Apr. 15.
Squirrel (Red, Ground and Flying): GMU 23—No determination	Hunting—No limit	July 1–June 30.
	Trapping—No limit	July 1–June 30.
Wolf: GMU 23—Residents of Units 6, 9, 10 (Unimak Island only), 11–13, and 16–26.	Hunting—10 Wolves	Aug. 10–Apr. 30.
	Trapping—No limit	Nov. 1–Apr. 15.
Wolverine: GMU 23—No determination	Hunting—1 Wolverine	Sept. 1–Mar. 31.
	Trapping—No limit	Nov. 1–Apr. 15.
Cormorant: GMU 23—No determination	No limit	July 1–June 30.
Grouse (Spruce, Blue, Ruffed and Sharp-tailed): GMU 23—Residents of Units 11, 13, 15, 16, 20(D), 22 and 23.	15 per day, 30 in possession	Aug. 10–Apr. 30.

Eligibility determination	Bag limits	Open season
Ptarmigan (Rock, Willow and White-tailed): GMU 29—Residents of Units 11, 13, 15, 16, 20(D), 22 and 23.	20 per day, 40 in possession	Aug. 10–Apr. 30.
Snowy Owl: GMU 23—No determination	No limit	July 1–June 30.

(24) GMU 24. (i) Game Management Unit 24 consists of the Koyukuk River drainage upstream from but not including the Dulbi River drainage;

(ii) Public lands within the following areas are closed to subsistence take or subsistence take is restricted as specified. (A) The Dalton Highway Corridor Management Area, consisting of those portions of Units 20, 24, 25, and 26 extending five miles from each side of the Dalton Highway from the Yukon River to the Prudhoe Bay Closed Area, is closed to hunting; however, big game and small game may be taken in the area by bow and arrow only; no motorized vehicle, except aircraft, boats, and licensed highway vehicles, may be used to transport game or hunters within the Dalton Highway Corridor Management Area;

(B) The Kanuti Controlled Use Area, consisting of that portion of Unit 24 bounded by a line from the Bettles Field VOR to the east side of Fish Creek Lake, to Old Dummy Lake, to the south end of Lake Todatonten (including all waters of these lakes), to the northernmost headwaters of Siruk Creek, to the highest peak of Double Point Mountain, then back to the Bettles Field VOR, is closed during moose-hunting seasons to the use of aircraft for hunting moose, including transportation of any moose hunter or moose part; however, this does not apply to transportation of a moose hunter or moose part by aircraft between publicly owned airports in the controlled use area or from a publicly owned airport within the area to points outside the area;

(C) The Koyukuk Controlled Use Area consists of those portions of Units 21 and 24 bounded by a line from the north bank of the Yukon River at Koyukuk, then northerly to the confluences of the Honhosa and Kateel Rivers, then northeasterly to the confluences of Billy Hawk Creek and the Huslia River (65°57' N. Lat., 156°41' W. long.), then easterly to the south end of Solsmunket Lake, then east to Hughes, then south to Little Indian River, then southwesterly to the crest of Hochandochtla Mountain, then southwest to the mouth of Cottonwood Creek then southwest to Bishop Rock, then westerly along the north bank of the Yukon River (including Koyukuk Island) to the point of beginning. The area is closed during moose-hunting seasons to the use of aircraft for hunting moose, including transportation of any moose hunter or moose part; however, this does not apply to transportation of a moose hunter or moose part by aircraft between publicly owned airports in the controlled use area or form a publicly owned airport within the area to points outside the area; all hunters on the Koyukuk River passing the Department of Fish and Game operated check station at Ella's Cabin (15 miles upstream from the Yukon on the Koyukuk River) are required to stop and report to department personnel at the check station.

Note: There are private land areas within many Federal land units. These regulations apply only to Federal lands unless otherwise indicated. It is the responsibility of the subsistence user to be aware of private inholdings.

—"No open season" means no Federal subsistence season.

—Those residents listed under eligibility are the qualified subsistence users. "No determination" indicates open to Alaska rural residents. However, National Parks, Monuments, and Preserves are open only to Park Service qualified subsistence users. Subsistence users must be local rural residents of National Park Service areas. For more information, contact the National Park Service in Anchorage, Alaska (telephone 907/257–2572.

(iii)

Eligibility determination	Bag limits	Open season
Black Bear: GMU 24—No determination	Unit 24–3 Bears	July 1–June 30.
Brown Bear: GMU 24—Residents of Unit 24 and Wiseman, but not including any other residents of the Dalton Corridor.	Unit 24—that portion of the Koyukuk River drainage upstream from, and including the Alatna River drainage.: (Residents of Anaktuvuk Pass 1 bear every regulatory year) All other subsistence hunters—1 bear every four regulatory years.	Sept. 1–May 31.
	Unit 24—Remainder—1 bear every four regulatory years	Sept. 1–May 31.
Caribou: GMU 24—No determination	Unit 24—the Kanuti River drainage upstream from Kanuti, Chalatna Creek, the Fish Creek drainage (including Bonanza Creek)—1 bull.	Aug. 10–Sept. 30.
	Unit 24—Remainder—5 caribou per day; however, cow caribou may not be taken May 16—June 30.	July 1–June 30.
Sheep: GMU 24—Residents of Unit 24 residing north of the Arctic Circle and residents of Allakaket, Alatna, and Anaktuvuk Pass.	Unit 24—that portion within the Gates of the Arctic National Park—3 sheep.	Aug. 1–Apr. 30.
	Unit 24—Remainder—1 ram with ½ curl horn or larger	Aug. 10–Sept. 20.
Moose: GMU 24—Residents of Unit 24, Anaktuvuk Pass, Koyukuk and Galena.	Unit 24—that portion within the Koyukuk Controlled Use Area—1 moose; however, antlerless moose may be taken only from Sept. 21–Sept. 25, Dec. 1–Dec. 10, and Mar. 1–Mar. 10.	Sept. 5–Sept. 25, Dec. 1–Dec. 10 and Mar. 1–Mar. 10.
	Unit 24—that portion that includes the John River drainage upstream from but excluding the Hunt Fork drainage—1 moose.	Aug. 1–Dec. 31.
	Unit 24—the Alatna River drainage upstream from and including Helpmejack Creek drainage, the John River drainage upstream from and including the Malemute Fork drainage and downstream from and including the Hunt Fork drainage, the Wild River drainage upstream from and including the Michigan Creek drainage, and the North Fork Koyukuk River drainage north of the Bettles/Coldfoot winter trail—1 moose; however, antlerless moose may be taken only from Sept. 21–Sept. 25 and Mar. 1–Mar. 10.	Aug. 25–Sept. 25 and Mar. 1–Mar. 10.
	Unit 24—Remainder—1 bull	Aug. 25–Sept. 25.
Bat, Shrew, Rat, Mouse and Porcupine: GMU 24—No determination	No limit	July 1–June 30.
Beaver: GMU 24—No determination	Trapping—80 Beaver per season	Nov. 1–Apr. 15.
Coyote: GMU 24—No determination	Hunting—2 Coyotes	Sept. 1–Apr. 30.
	Trapping—No limit	Nov. 1–Mar. 31.

Eligibility determination	Bag limits	Open season
Fox, Red (including Cross, Black and Silver Phases): GMU 24—No determination.	Hunting—2 Foxes	Nov. 1–Feb. 15.
	Trapping—No limit	Nov. 1–Feb. 28.
Hares (Snowshoe and Arctic): GMU 24—No determination	Hunting—No Limit	July 1–June 30.
Lynx: GMU 24—No determination	Hunting—2 Lynx	Nov. 1–Feb. 28.
	Trapping—No limit	Nov. 1–Feb. 28.
Marten: GMU 24—No determination	Trapping—No limit	Nov. 1–Feb. 28.

Muskrat: GMU 24—No determination	Trapping—No limit	Nov. 1–June 10.
Otter (land only): GMU 24—No determination	Trapping—No limit	Nov. 1–Apr. 15.
Squirrel (Red, Ground, Flying): GMU 24—No determination	Hunting—No limit	July 1–June 30.
	Trapping—No limit	July 1–June 30.
Wolf: GMU 24—Residents of Units 6, 9, 10 (Unimak Island only), 11–13, and 16–26.	Hunting—10 Wolves	Aug. 10–Apr. 30.
	Trapping—No limit	Nov. 1–Mar. 31.
Wolverine: GMU 24—No determination	Hunting—1 wolverine	Sept. 1–Mar. 31.
	Trapping—No limit	Nov. 1–Mar. 31.
Grouse (Spruce, Blue, Ruffed and Sharp-tailed): GMU 24—No determination.	15 per day, 30 in possession	Aug. 10–Apr. 30.
Ptarmigan (Rock, Willow and White-tailed): GMU 24—No determination.	20 per day, 40 in possession	Aug. 10–Apr. 30.

(25) GMU 25. (i) Game Management Unit 25 consists of the Yukon River drainage upstream from but not including the Hamlin Creek drainage, and excluding drainages into the south bank of the Yukon River upstream from the Charley River;

(A) Unit 25(A) consists of the Hodzana River drainage upstream from the Narrows, the Chandalar River drainage upstream from and including the East Fork drainage, the Christian River drainage upstream from Christian, the Sheenjek River drainage upstream from and including the Thluichohnjek Creek, the Coleen River drainage, and the Old Crow River drainage;

(B) Unit 25(B) consists of the Little Black River drainage upstream from but not including the Big Creek drainage, the Black River drainage upstream from and including the Salmon Fork drainage, the Porcupine River drainage upstream from the confluence of the Coleen and Porcupine Rivers, and drainages into the north bank of the Yukon River upstream from Circle, including the islands in the Yukon River;

(C) Unit 25(C) consists of drainages into the south bank of the Yukon River upstream from Circle to the Subunit 20(E) boundary, the Birch Creek drainage upstream from the Steese Highway bridge (milepost 147), the Preacher Creek drainage upstream from and including the Rock Creek drainage, and the Beaver Creek drainage upstream from and including the Moose Creek drainage;

(D) Unit 25(D) consists of the remainder of Unit 25;

(ii) Public lands within the following areas are closed to subsistence take or subsistence take is restricted as specified: (A) The Dalton Highway Corridor Management Area, consisting of those portions of Units 20, 24, 25 and 26 extending five miles from each side of the Dalton Highway from the Yukon River to the Prudhoe Bay Closed Area, is closed to hunting; however, big game and small game may be taken in the area by bow and arrow only; no motorized vehicle, except aircraft, boats, and licensed highway vehicles, may be used to transport game or hunters within the Dalton Highway Corridor Management Area;

(B) The Arctic Village Sheep Management Area encompasses approximately 567,680 acres north and west of Arctic Village. The area consists of that portion of State Game Management Unit 25(A) which is bounded on the east by the East Fork Chandalar River beginning at the confluence of Cane Creek and proceeding southwesterly downstream past Arctic Village to the confluence with Crow Nest Creek, continuing up Crow Nest Creek, through Portage Lake, to its confluence with the Junjik River; then down the Junjik River past Timber Lake and a larger tributary, to a major, unnamed tributary located directly south of Little Njoo Mountain. The boundary leaves the river and continues upstream along this unnamed tributary, northwesterly, for approximately 6 miles where the stream forks into two roughly equal drainages. The boundary follows the eastern most fork, proceeding almost due north to the headwaters and intersects the Continental Divide. The boundary then follows the Continental Divide easterly, through Carter Pass, then easterly and northeasterly approximately 20 miles along the most southerly major fork of the headwaters of Cane Creek. From this peak the boundary continues due south 1.5 miles to the high point of a saddle, then down the headwaters tributary to Cane Creek and down the creek to the confluence of Cane Creek and the East Fork Chandalar. Sheep hunting in this area is restricted to residents of Arctic Village, Venetie, Fort Yukon, Kaktovik and Chalkytsik. A map showing the Arctic Village Sheep Management Area may be obtained by contacting the U.S. Fish and Wildlife Service, Office of Subsistence Management, 1011 East Tudor Road, Anchorage, Alaska 99503.

Note: There are private land areas within many Federal land units. These regulations apply only to Federal lands unless otherwise indicated. It is the responsibility of the subsistence user to be aware of private inholdings.

—"No open season" means no Federal subsistence season.

—Those residents listed under eligibility are the qualified subsistence users. "No determination" indicates open to Alaska rural residents. However, National Parks, Monuments, and Preserves are open only to Park Service qualified subsistence users. Subsistence users must be local rural residents of National Park Service areas. For more information, contact the National Park Service in Anchorage, Alaska (telephone 907/257–2572).

VOL 56 ISS 123 JE 26 1991 UMI

VOL 56 ISS 123 JE 26 1991 UMI

Eligibility determination	Bag limits	Open season
Black Bear: GMU 25—No determination	Unit 25—3 Bears	July 1–June 30.
Caribou: GMU 25—No determination	Unit 25(A), (B), and the remainder of Unit 25(D)—10 caribou; however, no more than 5 caribou may be transported from these units per regulatory year.	July 1–Apr. 30.
	Unit 25(D)—that portion of Unit 25(D) drained by the west fork of the Dall River west of 150° W. long.—1 bull.	Aug. 10–Sept. 30.
Sheep:		
GMU 25—Unit 25(A)—Residents of Arctic Village, Chalkytsik, Fort Yukon, Kaktovik, and Venetie.	Units 25(A)—Arctic Village Sheep Management Area—2 rams by Federal registration permit only. Federal public lands are closed to sheep hunting except by residents of Arctic Village, Venetie, Fort Yukon, Kaktovik and Chalkytsik.	Aug. 10–Apr. 30.
GMU 25—Units 25(B) and (C)—No subsistence	Unit 25(A)—Remainder—3 sheep per year; the Aug. 10–Sept. 20 season is restricted to 1 ram with ⅛ curl horn or larger. A State registration permit is required for the Oct. 1–Apr. 30 season.	Oct. 1–Apr. 30 and Aug. 10–Sept. 20.
Moose:		
GMU 25—Unit 25(A)—Residents of Unit 25(A) and residents of Venetie only.	Unit 25(A)—1 bull	Aug. 25–Sept. 25 and Dec. 1–Dec. 10.
GMU 25—Unit 25(B) and (C)—No determination	Unit 25(B)—that portion within the Porcupine River drainage upstream from but excluding the Colsen River drainage—1 bull.	Aug. 25–Sept. 25 and Dec. 1–Dec. 10.
	Unit 25(B)—that portion within the Yukon River drainage upstream from and including the Kandik River drainage—1 bull.	Sept. 5–Sept. 25 and Dec. 1–Dec. 10.
	Unit 25(B)—Remainder—1 bull	Aug. 25–Sept. 25 and Dec. 1–Dec. 10.
	Unit 25(C)—1 bull	Sept. 1–Sept. 15.
GMU 25—Unit 25(D) (West)—Residents of Beaver, Birch Creek, and Stevens Village.	Unit 25(D) (West)—that portion of Unit 25(D) lying west of a line extending from the Unit 25(D) boundary on Preacher Creek, then downstream along Preacher Creek, Birch Creek and Lower Mouth Birch Creek to the Yukon River, then downstream along the north bank of the Yukon River (including islands) to the confluence of the Hadweenzik River, then upstream along the west bank of the Hadweenzik River to the confluence of Forty and One-Half Mile Creek, then upstream along Forty and One-Half Mile Creek to Nelson Mountain on the Unit 25(D) boundary—1 bull by permit only.	Aug. 25–Sept. 25, Dec. 1–Dec. 10 and Feb. 18–Feb. 28.
GMU 25—Unit 25(D)—Remainder—Residents of "Remainder of Unit 25".	Unit 25(D)—Remainder—1 bull	Aug. 25–Sept. 25 and Dec. 1–Dec. 20.
Bat, Shrew, Rat, Mouse and Porcupine: GMU 25—No determination	No limit	July 1–June 30.
Beaver: GMU 25—No determination	Trapping—Unit 25—Remainder—50 Beaver per season	Nov. 1–Apr. 15.
	Trapping—Unit 25(C)—25 Beaver per season	Nov. 1–Apr. 15.
Coyote: GMU 25—No determination	Hunting—2 Coyotes	Sept. 1–Apr. 30.
	Trapping—No limit	Nov. 1–Mar. 31.
Fox, Red (including Cross, Black and Silver Phases: GMU 25—No determination.	Hunting—2 Foxes	Nov. 1–Feb. 15.
	Trapping—No limit	Nov. 1–Feb. 28.
Hares (Snowshoe and Arctic): GMU 25—No determination	Hunting—No limit	July 1–June 30.
Lynx: GMU 25—No determination	Hunting—Unit 25(C)—2 Lynx	Dec. 1–Jan. 31.
	Trapping—Unit 25(C)—No limit	Dec. 1–Jan. 31.
	Hunting—Unit 25—Remainder—2 Lynx	Nov. 1–Feb. 28.
	Trapping—Unit 25—Remainder—No limit	Nov. 1–Feb. 28.
Marten: GMU 25—No determination	Trapping—No limit	Nov. 1–Feb. 28.
Mink and Weasel: GMU 25—No determination	Trapping—No limit	Nov. 1–Feb. 28.
Muskrat: GMU 25—No determination	Trapping—No limit	Nov. 1–June 10.
Otter (land only): GMU 25—No determination	Trapping—No limit	Nov. 1–Apr. 15.
Squirrel (Red, Ground and Flying): GMU 25—No determination	Hunting—No limit	July 1–June 30.
	Trapping—No limit	July 1–June 30.
Wolf: GMU 25—Residents Units 6, 9, 10 (Unimak Island only), 11–13, and 16–26.	Hunting—Unit 25(A)—No limit	Aug. 10–Apr. 30.
	Trapping—No limit	Nov. 1–Mar. 31.
	Hunting—Unit 25—Remainder—10 Wolves	Aug. 10–Apr.30.
	Trapping—No limit	Nov. 1–Mar. 31.
Wolverine: GMU 25—Unit 25(C)—No determination	Hunting—1 Wolverine	Sept. 1–Mar. 31.
	Trapping—Unit 25(C)—No limit	Nov. 1–Feb. 28.
	Hunting—1 Wolverine	Sept. 1–Mar. 31.
	Trapping—Unit 25—Remainder—No limit	Nov. 1–Mar. 31.
Grouse (Spruce, Blue, Ruffed and Sharp-tailed): GMU 25—No determination.	Unit 25(C)—15 per day, 30 in possession	Aug. 10–Mar. 31.
Ptarmigan (Rock, Willow and White-tailed): GMU 25—No determination.	Unit 25(C)—Remainder—15 per day, 30 in possession	Aug. 10–Apr. 30
	Unit 25(C)—those portions within 5 miles of Alaska Route 6 (Steese Highway) and Route 5 (Taylor Highway, both to Eagle and the Alaska-Canada boundary), and that portion of Route 4 (Richardson Highway) south of Delta Junction—20 per day, 40 in possession.	Aug. 10–Mar. 31.
	Unit 25—Remainder—20 per day, 40 in possession	Aug. 10–Apr. 30.

(28) GMU 28. (i) Game Management Unit 28 consists of Arctic Ocean drainages between Cape Lisburne and the Alaska-Canada border, including the Firth River drainage within Alaska.

(A) Unit 28(A) consists of that portion of Unit 28 lying west of the Itkillik River drainage, and west of the east bank of the Colville River between the mouth of the Itkillik River and the Arctic Ocean;

(B) Unit 28(B) consists of that portion of Unit 28 east of Unit 28(A), west of the west bank of the Canning River and west of the west bank of the Marsh Fork of the Canning River;

(C) Unit 28(C) consists of the remainder of Unit 28.

(ii) Public lands within the following areas are closed to subsistence take or subsistence take is restricted as specified. (A) The GMU 28(A) Controlled Use Area, consisting of Unit 28(A), from August 1 through August 31 is closed to the use of aircraft in any manner for moose hunting, including transportation of moose hunters or parts of moose. No hunter may take or transport a moose, or part of a moose in GMU 28(A) after having been transported by aircraft into the unit. However, this does not apply to transportation of moose hunters or moose parts by regularly scheduled flights to and between villages by carriers that normally provide scheduled service to this area, nor does it apply to transportation by aircraft to or between publicly owned airports.

(B) The Prudhoe Bay Closed Area is closed to the taking of big game; this closed area consists of the area bounded by a line beginning at 70° 22' N. lat., 148° W. long., then running south approximately 14 miles to a point at 70° 10' N. lat., 148° W. long., then west approximately 15 miles to a point at 70° 10' N. lat., 149° 40' W. long., then north approximately two miles to a point at 70° 12' N. lat., 146° 40' W. long., then west approximately eight miles to a point at 70° 12' N. lat., 148° 50' W. long., then north approximately two miles to a point at 70° 15' N. lat., 148° 56' W. long., then west approximately 12 miles to a point at 70° 15' N. lat., 149° 28' W. long., then north approximately 12 miles to a point at 70° 26' N. lat., 149° 28' W. long., then east approximately 14 miles to a point at 70° 26' N. lat., 148° 52' W. long., then south approximately 2 miles to a point at 70° 24' N. lat., 148° 52' W. long., then east approximately 16 miles to a point at 70° 24' N. lat., 148° 11' W. long., then south approximately 2 miles to a point at 70° 24' N. lat., 148° 11' W. long., then east approximately 6 miles to the point of beginning.

(C) The Dalton Highway Corridor Management Area, consisting of those portions of Units 20, 24, 25, and 26 extending five miles from each side of the Dalton Highway from the Yukon River to the Prudhoe Bay Closed Area, is closed to hunting; however, big game and small game may be taken in the area by bow and arrow only; no motorized vehicle, except aircraft, boats, and licensed highway vehicles, may be used to transport game or hunters within the Dalton Highway Corridor Management Area;

Note: There are private land areas within many Federal land units. These regulations apply only to Federal lands unless otherwise indicated. It is the responsibility of the subsistence user to be aware of private inholdings.

—"No open season" means no Federal subsistence season.

—Those residents listed under eligibility are the qualified subsistence users. "No determination" indicates open to Alaska rural residents. However, National Parks, Monuments, and Preserves are open only to Park Service qualified subsistence users. Subsistence users must be local rural residents of National Park Service areas. For more information, contact the National Park Service in Anchorage, Alaska (telephone 907/257–2572).

(iii)

Eligibility Determination	Bag Limits	Open Season
Black Bear: GMU 26—No determination	Unit 26—3 Bears	July 1–June 30.
Brown Bear: GMU 26—Residents of Unit 26 (except the Prudhoe Bay-Deadhorse Industrial Complex) and residents of Anaktuvuk Pass and Point Hope.	Unit 26(A)—east of 150° W. long. (residents of Anaktuvuk Pass)—1 bear every regulatory year.	Sept. 1–May 31.
	Unit 26(A)—Other subsistence hunters—1 bear every four regulatory years.	Sept. 1–May 31.
	Unit 26—Remainder—1 bear every four regulatory years	Sept. 1–May 31.
Caribou:		
GMU 26—(Western Arctic Caribou Herd only)—Residents of Unit 21(D) west of the Koyukuk and Yukon Rivers, and residents of Units 22(A), (B), 23, and 26(A).	Unit 26(A)—5 caribou per day; however, cow caribou may not be taken May 16—June 30.	July 1–June 30.
GMU 26—Unit 26(B) (Central Arctic Herd)—Residents of Anaktuvuk Pass, Kaktovik, Nuiqsut, and Wiseman.	Unit 26(B)—5 caribou; however, cow caribou may be taken only from Oct. 1—Apr. 30.	July 1–Apr. 30.
GMU 26—Unit 26(C) (Porcupine Herd)—No Determination	Unit 26(C)—10 caribou; however, not more than 5 caribou may be transported from Unit 26 per regulatory year.	July 1–Apr. 30.
Sheep:		
GMU 26—Unit 26(A) and (B)—Residents of Anaktuvuk Pass, Kaktovik, Nuiqsut, and Wiseman.	Unit 26(A)—those portions within the Gates of the Arctic National Park—3 sheep.	Aug. 1–Apr. 30.
	Unit 26(A) and (B)—including the Gates of the Arctic National Preserve—1 ram with ½ curl horn or larger.	Aug. 10–Sept. 30.
GMU 26—Unit 26(C)—Residents of Arctic Village, Chalkytsik, Fort Yukon, Kaktovik, and Venetie.	Unit 26(C)—3 sheep per year; the Aug. 10–Sept. 20 season is restricted to 1 ram with ½ curl horn or larger. A State registration permit is required for the Oct. 1–Apr. 30 season.	Oct. 1–Apr. 30, Aug. 10–Sept. 20.
Moose: GMU 26—Residents of Unit 26, (except the Prudhoe Bay-Deadhorse Industrial Complex), and residents of Point Hope and Anaktuvuk Pass.	Unit 26(A)—1 moose; however, no person may take a cow accompanied by a calf.	Aug. 1–Dec. 31.
	Unit 26(B)—that portion within two miles of the Dalton Highway—	No open season.
	Unit 26(B) Remainder and (C)—1 moose	Aug. 1–Dec. 31.
Musk Oxen: GMU 26—Unit 26(B) and (C)—Residents of Kaktovik	Unit 26(B) and (C)—1 bull by Federal registration permit only	Oct. 1–Oct. 31, Mar. 1–Mar. 31.
Bat, Shrew, Rat, Mouse and Porcupine: GMU 26—No determination	No limit	July 1–June 30.
Coyote: GMU 26—No determination	Hunting—2 Coyotes	Sept. 1–Apr. 30.
	Trapping—No limit	Nov. 1–Apr. 15.
Fox, Arctic (Blue and White Phase): GMU 26—No determination	Hunting—2 Foxes	Sept. 1–Apr. 30.
	Trapping—No limit	Nov. 1–Apr. 15.
Fox, Red (including Cross, Black and Silver Phases): GMU 26—No determination.	Hunting—2 Foxes	Nov. 1–Feb. 15.
	Trapping—No limit	Nov. 1–Apr. 15.
Hares (Snowshoe and Arctic): GMU 26—No determination	No limit	July 1–June 30.
Lynx: GMU 26—No determination	Hunting—2 Lynx	Sept. 1–Apr. 30.
	Trapping—No limit	Nov. 1–Apr. 15.
Marten: GMU 26—No determination	Trapping—No limit	Nov. 1–Apr. 15.
Mink and Weasel: GMU 26—No determination	Trapping—No limit	Nov. 1–Apr. 15.
Muskrat: GMU 26—No determination	Trapping—No limit	Nov. 1–Jan. 31.
Otter (land only): GMU 26—No determination	Trapping—No limit	Nov. 1–June 15.
Squirrel (Red, Ground and Flying): GMU 26—No determination	Trapping—No limit	Nov. 1–Apr. 15.
	Hunting—No limit	July 1–June 30.
Wolf: GMU 26—Residents of Units 6, 9, 10 (Unimak Island only), 11-13, and 16-26.	Trapping—No limit	July 1–June 30.
	Hunting—No limit	Aug. 10–Apr. 30.
Wolverine: GMU 26—No determination	Trapping—1 Wolverine	Nov. 1–Apr. 15.
	Trapping—No limit	Sept. 1–Mar. 31.
		Nov. 1–Apr. 15.

VOL 56 ISS 123 JE 26 1991 UMI

Eligibility Determination	Bag Limits	Open Season
Grouse (Spruce, Blue, Ruffed and Sharp-tailed): GMU 26—No determination.	15 per day, 30 in possession	Aug. 10–Apr. 30.
Ptarmigan (Rock, Willow and White-tailed): GMU 26—No determination.	20 per day, 40 in possession	Aug. 10–Apr. 30.
Snowy Owl: No determination	No limit	July 1–June 30.

§ ____.24 Subsistence fishing

(a) Regulations in this section apply to subsistence fishing for salmon, herring, pike, bottomfish, smelt, and other types of finfish or their parts except halibut, and aquatic plants only on public lands in Alaska. At this time Federal Subsistence Fishing Regulations only apply to non-navigable waters on Federal lands unless a specific exception is noted for a specific area. All subsistence harvest of fish in navigable waters is under the regulations of the State of Alaska unless specifically excepted.

(b) Aquatic plants and finfish other than salmon may be taken for subsistence purposes at any time on any public lands in the State of Alaska by any method unless restricted by the subsistence fishing regulations in this section. Salmon may be taken for subsistence purposes only as provided in this section.

(c) The following definitions shall apply to all regulations contained in this document.

Abalone Iron –is a flat device used for taking abalone and which is more than one inch (24mm) in width and less than 24 inches (61 cm) in length and with all prying edges rounded and smooth.

Anchor is a device used to hold a salmon fishing vessel or net in a fixed position relative to the beach; this includes using part of the seine or lead, a ship's anchor or being secured to another vessel or net that is anchored.

Bag Limit means the maximum legal take per person or designated group, per specified time period, even if part or all of the fish are preserved.

Beach seine is a floating net designed to surround fish which is set from and hauled to the beach.

Crab means the following species: *Paralithodes camshatica* (red king crab); *Paralithodes platypus* (blue king crab); *Lithodes couesi; Lithodes aequispina* (brown king crab); all species of the genus Chionoecetes (tanner or snow crab); *Cancer magister* (Dungeness crab).

Dip net is a bag-shaped net supported on all sides by a rigid frame; the maximum straight-line distance between any two points on the net frame, as measured through the net opening, may not exceed five feet; the depth of the bag must be at least one-half of the greatest straight-line distance, as measured through the net opening; no portion of the bag may be constructed of webbing that exceeds a stretched measurement of 4.5 inches; the frame must be attached to a single rigid handle and be operated by hand.

Diving Gear is any type of hard hat or skin diving equipment, including SCUBA equipment.

Drainage means all of the waters comprising a watershed including tributary rivers, streams, sloughs, ponds and lakes which contribute to the supply of the watershed.

Drift gill net is a drifting gill net that has not been intentionally staked, anchored or otherwise fixed.

Fishwheel is a fixed, rotating device for catching fish which is driven by river current or other means of power.

Freshwater of streams and rivers means the line at which freshwater is separated from saltwater at the mouth of streams and rivers by a line drawn between the seaward extremities of the exposed tideland banks at the present stage of the tide.

Fyke net is a fixed, funneling (fyke) device used to entrap fish.

Gear means any type of fishing apparatus.

Gill net is a net primarily designed to catch fish by entanglement in the mesh and consisting of a single sheet of webbing hung between cork line and lead line, and fished from the surface of the water.

Grappling hook is a hooked device with flukes or claws and attached to a line and operated by hand.

Groundfish—Bottomfish means any marine finfish except halibut, osmerids, herring and salmonids.

Hand purse seine is a floating net designed to surround fish and which can be closed at the bottom by pursing the lead line; pursing may only be done by hand power, and a free-running line through one or more rings attached to the lead line is not allowed.

Hand troll gear consists of a line or lines with lures or baited hooks which are drawn through the water from a vessel by hand trolling, strip fishing or other types of trolling, and which are retrieved by hand power or hand-powered crank and not by any type of electrical, hydraulic, mechanical or other assisting device or attachment.

Herring pound is an enclosure used primarily to retain herring alive over extended periods of time.

Hung measure means the maximum length of the cork line when measured wet or dry with traction applied at one end only.

Inclusive season dates means whenever the doing of an act between certain dates or from one date to another is allowed or prohibited, the period of time thereby indicated includes both dates specified; the first date specified designates the first day of the period, and the second date specified designates the last day of the period.

Lead is a length of net employed for guiding fish into a seine or set gill net.

Legal limit of fishing gear means the maximum aggregate of a single type of fishing gear permitted to be used by one individual or boat, or combination of boats in any particular regulatory area, district or section.

Long line is a stationary buoyed or anchored line or a floating, free drifting line with lures or baited hooks attached.

Net gear site means the in-water location of stationary net gear.

Possession limit means the maximum number of fish a person or designated group may have in possession if the fish have not been canned, salted, frozen, smoked, dried or otherwise preserved so as to be fit for human consumption after a 15-day period.

Pot is a portable structure designed and constructed to capture and retain fish and shellfish alive in the water.

Purse seine is a floating net designed to surround fish and which can be closed at the bottom by means of a free-running line through one or more rings attached to the lead line.

Ring net is a bag-shaped net suspended between no more than two frames; the bottom frame may not be larger in perimeter than the top frame; the gear must be non-rigid and collapsible so that when fishing it does not prohibit free movement of fish or shellfish across the top of the net.

Rockfish means all species of the genus *Sebastes*.

Salmon stream means any stream used by salmon for spawning or for travelling to a spawning area.

Salmon stream terminus means a line drawn between the seaward extremities of the exposed tideland banks of any salmon stream at mean lower low water.

Set gill net is a gill net that has been intentionally set, staked, anchored, or otherwise fixed.

Shovel is a hand-operated implement for digging clams or cockles.

Stretched measure means the average length of any series of 10 consecutive meshes measured from inside the first knot and including the last knot when wet after use, the 10 meshes, when being measured, shall be an integral part of the net, as hung, and measured perpendicular to the selvages; measurements shall be made by the means of a metal tape measure while the 10 meshes being measured are suspended vertically from a single peg or nail, under the five-pound weight, except as otherwise provided.

To operate fishing gear means the deployment of gear in the waters of Alaska, the removal of gear from the waters of Alaska, the removal of fish or shellfish from the gear during an open season or period, or possession of a gill net containing fish during an open fishing period, except that a gill net which is completely clear of the water is not considered to be operating for the purposes of minimum distance requirement.

Trawl is a bag-shaped net towed through the water to capture fish or shellfish.

(d) Methods, Means, and General Restrictions. (1) The bag limit specified herein for a subsistence season for a species and the State bag limit set for a State general season for the same species are not cumulative. This means that a person or designated group who has taken the bag limit for a particular species under a subsistence season specified herein may not after that, take any additional fish of that species under any other bag limit specified for a State general season.

(2) Unless otherwise provided in this chapter, the following are legal types of gear for subsistence fishing:

(i) gear specified in definitions in subsection c.

(ii) jigging gear which consists of a line or lines with lures or baited hooks which are operated during periods of ice cover from holes cut in the ice and are drawn through the water by hand;

(iii) a spear which is a shaft with a sharp point or fork-like implement attached to one end, used to thrust through the water to impale or retrieve fish and is operated by hand;

(iv) a lead which is a length of net employed for guiding fish into a seine or a length of net or fencing employed for guiding fish into a fishwheel, fyke net or dip net.

(3) Gill nets used for subsistence fishing for salmon may not exceed 50 fathoms in length, unless otherwise specified by the regulations in particular areas set forth in this section.

(4) It is prohibited to buy or sell subsistence-taken fish, their parts, or their eggs, unless otherwise specified in this section or unless, prior to the sale, the prospective buyer or seller obtains a determination from the Board that the sale constitutes customary trade.

(5) Fishing for, taking or molesting any fish by any means, or for any purpose, is prohibited within 300 feet of any dam, fish ladder, weir, culvert or other artificial obstruction.

(6) The use of explosives and chemicals is prohibited.

(7) Subsistence fishing by the use of a line attached to a rod or pole is prohibited except when fishing through the ice in the Kotzebue-Northern, Norton Sound-Port Clarence, Yukon, Kuskokwim and Bristol Bay areas.

(8) Each person subsistence fishing shall plainly and legibly inscribe his/her first initial, last name, and address on his/her fishwheel, or on a keg or buoy attached to gill nets and other unattended subsistence fishing gear.

(9) All pots used to take fish must contain an opening in the webbing of a side wall of the pot which has been laced, sewn or secured together by untreated cotton twine or other natural fiber no larger than 120 thread, which upon deterioration or parting of the twine produces an opening in the web with a perimeter equal to or exceeding one half of the tunnel eye opening perimeter.

(10) Persons licensed by the State of Alaska under Alaska Statutes to engage in a fisheries business may not receive for commercial purposes or barter or solicit to barter for subsistence taken salmon or their parts. Further restrictions on the bartering of subsistence taken salmon or their parts may be implemented by the Federal Subsistence Board if necessary.

(11) Gill net web must contain at least 30 filaments and all filaments must be of equal diameter, or the web must contain at least six filaments, each of which must be at least 0.20 millimeter in diameter.

(12) Except as provided elsewhere in this regulation, the taking of rainbow trout and steelhead is prohibited.

(13) Fish taken for subsistence use or under subsistence fishing regulations may not be subsequently used as bait for commercial and sport fishing purposes.

(14) The use of live non-indigenous fish as bait is prohibited.

(e) Unlawful Possession of Subsistence Finfish—No person may possess, transport, give, receive or barter subsistence-taken fish or their parts that the person knows or should know were taken in violation of Federal or State statute or a regulation promulgated thereunder.

(f) For detailed descriptions of Fishery Management Areas and Pertinent Restrictions-for defined descriptions of Fishery Management Areas, see Alaska Fishing Regulations. (1) Kotzebue-Northern Area—At this time, the Federal Government is exerting its control only on subsistence fishing in non-navigable fresh waters on Federal lands in the Kotzebue-Northern Area. (i) Allowed gear and specifications:

(A) Salmon may be taken only by gill nets or beach seines.

(B) Fish other than salmon may be taken by set gill net, drift gill net, beach seine, fishwheel, pot, long line, fyke net, dip net, jigging gear, spear, and lead.

(C) A gill net may obstruct not more than one-half the width of any fish stream. A stationary fishing device may obstruct not more than one-half the width of any salmon stream.

(D) Each fishwheel must have the first initial, last name, and address of the operator plainly and legibly inscribed on the side of the fishwheel facing midstream of the river.

(E) For all gill nets and unattended gear that are fished under the ice, the first initial, last name, and address of the operator must be plainly and legibly inscribed on a stake inserted in the ice and attached to the gear.

(F) Fish may be taken for subsistence purposes without a subsistence fishing permit.

(G) Fish may be taken at any time except that during the weekly fishing closures of the commercial salmon fishing season in the Kotzebue District commercial fishermen may not fish for subsistence purposes.

(ii) Northern District. Only those residents domiciled in the Northern District, except for those domiciled in State of Alaska Game Management Unit 26–B, may take fish in that district.

(iii) Kotzebue District. (A) In the Kotzebue District, kegs or buoys attached to subsistence gill nets may be any color except red.

(B) In the Kotzebue District, gill nets used to take sheefish may not be more than 50 fathoms in aggregate length nor 12 meshes in depth, nor have a mesh size larger than seven inches.

(C) Only those residents domiciled in the Kotzebue District may take

VOL

UMI

subsistence salmon, shellfish, and other in the district.

(2) Norton Sound-Port Clarence Area. At this time, the Federal Government is exerting its control only on subsistence fishing in non-navigable fresh waters on the Federal lands in the Norton Sound-Port Clarence Area. (i) General Area Regulations. (A) Salmon may only be taken by gill net, beach seine, or fishwheel.

(B) Fish other than salmon may be taken by set gill net, drift net, beach seine, fishwheel, pot, long line, lure set, jigging gear, spear, and lead.

(C) A gill net may not obstruct more than one-half the width of any fish stream. A stationary fishing device may obstruct not more than one-half the width of any salmon stream.

(D) Each fishwheel must have the first initial, last name, and address of the operator plainly and legibly inscribed on the side of the fishwheel facing midstream of the river.

(E) For all gill nets and unattended gear that are fished under the ice, the first initial, last name, and address of the operator must be plainly and legibly inscribed on a stake inserted in the ice and attached to the gear.

(F) Except as provided in this subsection, fish may be taken for subsistence purposes without a subsistence fishing permit. A subsistence fishing permit is required as follows:

(1) In the Port Clarence District: Pilgrim River drainage including Salmon Lake;

(2) In the Norton Sound District: for net fishing in all waters from Cape Douglas to Rocky Point.

(G) Only one subsistence fishing permit will be issued to each household per year.

(H) Only those residents domiciled in the Norton Sound-Port Clarence Area may take salmon in that area.

(I) Only those residents domiciled within 20 miles of the coast between Point Romanof and Cape Prince of Wales and on the St. Lawrence Island may take herring and herring roe in those locations.

(ii) The Norton Sound District. (A) In the Norton Sound District, fish may be taken at any time except as follows:

(B) In Subdistrict 1 from June 15 through August 31, salmon may be taken only from 6 p.m. Monday until 6 p.m. Wednesday and from 6 p.m. Thursday until 6 p.m. Saturday.

(C) In Subdistricts 2 through 6, commercial fishermen may net fish for subsistence purposes during the weekly closures of the commercial salmon fishing season, [except that from July 15 through August 7, commercial fishermen may take salmon for subsistence purposes seven days per week in the Unalakleet and Shaktoolik River drainages with gill nets which have a mesh size that does not exceed 6½ inches, and with beach seines.]

(D) In the Unalakleet River from June 1 through July 15, salmon may be taken from 6 a.m. Monday until 6 p.m. Saturday.

(E) In the Norton Sound District, buoys or buoys attached to subsistence gill nets may be any color except red.

(F) In the Unalakleet River from June 1 through July 15, no person may operate more than 25 fathoms of gill net in the aggregate.

(G) Gill nets with a mesh size of less than four and one-half inches and beach seines may not be used in the Sinuk River upstream of Alaska Department of Fish and Game regulatory markers placed two miles above the mouth, in the Nome River, and in the Solomon River upstream from Alaska Department of Fish and Game regulatory markers places near the village of Solomon.

(H) In the Nome River, no person may operate more than 50 feet of gill net in the aggregate.

(I) The Nome River, from its terminus upstream for a distance of 300 yards and upstream from an Alaska Department of Fish and Game regulatory marker located near Osborn, is closed to the taking of fish.

(iii) The Port Clarence District. (A) In the Port Clarence District, fish may be taken at any time except that during the period July 1 through August 15, salmon may only be taken from 6 p.m. Thursday until 6 p.m. Tuesday.

(B) In the Port Clarence District, Salmon Lake, its tributaries, and within 300 feet of the Alaska Department of Fish and Game regulatory markers placed at the outlet of Salmon Lake, are closed to subsistence fishing from July 15 through August 31.

(3) Yukon Area. Federal subsistence regulations for the subsistence harvest of fish are in effect for all waters (navigable and non-navigable) in the area north of 61° north latitude, south of 51°21'north latitude, west of 163°48' longitude and east of the Bering Sea shoreline including Hooper Bay. In the remainder of the Yukon Area Federal subsistence fishing regulations only apply to non-navigable waters on Federal lands.

(i) Unless otherwise restricted, salmon may be taken in the Yukon Area at any time.

(ii) Salmon may only be taken by gill net, beach seine, or fishwheel subject to the restrictions set forth in this section.

(iii) Unless otherwise specified in this section, fish other than salmon may be taken only by set gill net, drift gill net, beach seine, fishwheel, long line, lure set, dip net, jigging gear, spear, or hand, subject to the following restrictions, which also apply to subsistence salmon fishing:

(A) During the open weekly fishing periods of the commercial salmon fishing season, a commercial fisherman may not operate more than one type of gear at a time, for commercial and subsistence purposes, except that in Subdistrict 6–A, upstream from the mouth of Sinuk Creek, a commercial fisherman may, at any time, assist subsistence fishermen in the operation of subsistence fishing gear;

(B) The aggregate length of set gill net in use by an individual may not exceed 150 fathoms and each drift gill net inuse by an individual may not exceed 50 fathoms in length;

(C) In Subdistricts 4, 5 and 6, it is unlawful to set subsistence fishing gear within 200 feet of other operating commercial or subsistence fishing gear;

(D) A gill net may obstruct not more than one-half the width of any fish stream; a stationary fishing device may obstruct not more than one-half width of any salmon stream.

(iv) Salmon may be taken only by set gill net or fishwheel. No person may operate a gill net having a mesh size larger than six inches after a date specified by emergency order issued between July 5 through July 25.

(v) Each fishwheel must have the first initial, last name, and address of the operator plainly and legibly inscribed on the side of the fishwheel facing midstream of the river.

(vi) For all gill nets and unattended gear that are fished under the ice, the first initial, last name, and address of the operator must be plainly and legibly inscribed on a stake inserted in the ice and attached to the gear.

(vii) In Districts 1, 2, and 3, commercial fishermen may not take salmon for subsistence purposes by gill nets larger than six-inch mesh during periods established by emergency order.

(viii) In Districts 4, 5 and 6, salmon may not be taken for subsistence purposes by drift gill nets, except as follows:

(A) In Subdistrict 4–A, upstream from the mouth of Sinuk Creek king salmon may be taken by drift gill nets from June 21 through July 14, and chum salmon may be taken by drift gill nets after August 2;

(B) No person may operate a drift gill net that is more than 150 feet in length during the seasons described in this section.

(ix) Except as provided in this section, fish may be taken for subsistence purposes without a subsistence fishing permit.

(x) A subsistence fishing permit is required as follows:

(A) For the Yukon River drainage from the mouth of Hess Creek to the mouth of the Dall River;

(B) For the Yukon River drainage from Alaska Department of Fish and Game regulatory markers placed near the upstream mouth of 22 Mile Slough upstream to the U.S.—Canada border;

(C) For the Tanana River drainage above the mouth of the Wood River;

(D) For whitefish and suckers in the waters listed;

(E) For the taking of pike in waters of the Tolovana River drainage upstream of its confluence with the Tanana River;

(F) For the taking of salmon in Subdistricts 6–A and 6–B.

(xi) Except as otherwise provided, and except as may be provided by the terms of a subsistence fishing permit, there is no closed season on fish other than salmon.

(xii) In addition to the subsistence fishing permit conditions, permits issued for fish other than salmon may also designate restrictive measures for the conservation of salmon.

(xiii) Only one subsistence fishing permit will be issued to each household per year.

(xiv) Only those residents domiciled within 20 miles of the coast between the terminus of the Black River and the westernmost point of the Naskonat Peninsula may take herring and herring roe in that location.

(xv) Only those residents domiciled in rural locations in the Yukon Area, as determined by the Federal Subsistence Board, including the community of Stebbins, may take salmon in the Yukon Area.

(xvi) Only those residents domiciled in rural locations in the Yukon River drainage, as determined by the Federal Subsistence Board including the communities of Stebbins, Scammon Bay, Hooper Bay, and Chevak may take Yukon River Fall chum salmon for subsistence purposes.

(xvii) Only those residents domiciled in rural locations in the Yukon Area, as determined by the Federal Subsistence Board, may take freshwater fish species, including sheefish, whitefish, lamprey, burbot, sucker, grayling, pike, char, and blackfish, in the Yukon Area.

(xviii) The following locations in the upper Yukon River drainage are closed to subsistence fishing, except that whitefish and suckers may be taken under the authority of a subsistence fishing permit designating measures for the protection of other fish: the following streams and within 500 feet of their mouths: Birth Creek; Dall River, June 10 through September 10;

(xix) The following drainages located north of the main Yukon River are closed to subsistence fishing:

(A) Kanuti River, upstream from a point five miles downstream of the State highway crossing;

(B) Fish Creek, upstream from the mouth of Bonanza Creek;

(C) Bonanza Creek;

(D) Jim River, including Prospect Creek and Douglas Creek;

(E) South Fork of the Koyukuk River system upstream from the mouth of Jim River;

(F) Middle Fork of the Koyukuk River system upstream from the mouth of the North Fork;

(G) North Fork of the Chandalar River system upstream from the mouth of Quartz Creek.

(xx) The main Tanana River and its adjoining sloughs are closed to subsistence fishing between the mouth of the Salcha River and the mouth of the Gerstle River, except that salmon may be taken in the area upstream of the Richardson Highway bridge to the mouth of Clearwater Creek after November 20.

(xxi) Waters of the Tanana River drainage are closed to the subsistence taking of pike between the mouth of the Kantishna River and Delta River at Black Rapids on the Richardson Highway and Cathedral Rapids on the Alaska Highway, except that pike may be taken for subsistence purposes in the Tolovana River drainage upstream from its confluence with the Tanana River.

(xxii) The Delta River is closed to subsistence fishing, except that salmon may be taken after November 20.

(xxiii) The following locations are closed to subsistence fishing:

(A) The following rivers and creeks and within 500 feet of their mouths: Delta Clearwater River (Clearwater Creek at 64° 08' N.lat., 145° 34' W. long), Richardson Clearwater Creek (Clear Creek at 64° 14' N. lat., 146° 16' W. long), Goodpaster River, Chena River, Little Chena River, Little Salcha River, Blue Creek, Big Salt River, Shaw Creek, Bear Creek, McDonald Creek, Moose Creek, Hess Creek, and Beaver Creek;

(B) Ray River and Salcha River upstream of a line between Alaska Department of Fish and Game regulatory markers located at the mouth of the rivers;

(C) Deadman, Jan, Boleo, Birch, Lost, Harding, Craig, Fielding, Two-Mile, Quartz, and Little Harding lakes;

(D) Piledriver and Badger (Chena) sloughs.

(xxiv) The following waters are closed to the taking of chum salmon from August 15 through December 31:

(A) Toklat River.

(B) Kantishna River from the mouth of the Toklat River to its confluence with the Tanana River.

(xxv) Salmon may be taken only by set gill nets in those locations described in below after July 19:

(A) Waters of the Black River including waters within one nautical mile of its terminus;

(B) Waters of Kwikluak Pass downstream of Agmulegut and the waters of Kwemeluk Pass;

(C) Waters of Alakanuk Pass downstream from the mouth of Kuiukpak Slough;

(D) Waters of Kwiguk Pass downstream to the mouth of Kawokhawik Slough;

(E) Waters of Kawanak Pass downstream from Sea Gull Point;

(F) Waters of Apoon Pass downstream from the mouth of the Kotlik River and waters of Okwega Pass downstream from its confluence with Apoon Pass;

(G) Waters within one nautical mile seaward from any grassland bank in District 1.

(xxvi) In the following locations, salmon may be taken only during the open weekly fishing periods of the commercial salmon fishing season and may not be taken for 24 hours before the opening and 24 hours after the closure of the commercial salmon fishing season except:

(A) Through July 19 in Districts 1 and 2 subsistence fishing periods will be established by emergency order every other weekend during commercial salmon fishing closures;

(B) After July 19 in District 1, except for the set net only locations, and in District 2, a 24 hour subsistence fishing period will be established by emergency order each weekend during commercial salmon fishing closures;

(C) In Subdistrict 4–A from June 15 through August 1, salmon may be taken from 6 p.m. Sunday until 6 p.m. Tuesday and from 6 p.m. Wednesday until 6 p.m. Friday;

(D) In Subdistricts 4–B and 4–C from June 15 through September 30, salmon may be taken from 6 p.m. Sunday until 6 p.m. Tuesday and from 6 p.m. Wednesday until 6 p.m. Friday;

(E) District 5, excluding the Toxitna River drainage and Subdistrict 5–D;

(F) District 6, excluding (1) The Kantishna River drainage and that portion of the Tanana River drainage upstream of the mouth of the Salcha River;

VOL 56 ISS 123 JE 26 1991 UMI

(2) Subdistrict 6–B: from the downstream end of Crescent Island to three miles upstream of the mouth of the Totchaket Slough, where salmon may be taken from 6 p.m. Friday until 6 p.m. Wednesday.

(xxvii) During any commercial salmon fishing season closure of greater than five days in duration, salmon may not be taken during the following periods in the following districts:

(A) In District 4, excluding the Koyukuk and Innoko River drainages, salmon may not be taken from 6 p.m. Friday until 6 p.m. Sunday;

(B) In District 5, excluding the Tozitna River drainage and Subdistrict 5–B, salmon may not be taken from 6 pm. Sunday until 6 pm. Tuesday;

(C) In Subdistrict 6–A and 6–B, excluding the Kantishna River drainage and that portion of the Tanana River drainage upstream of the mouth of the Salcha River, salmon may not be taken from 6 p.m. Wednesday until 6 p.m. Friday.

(xxviii) In Subdistrict 6–C and that portion of the Tanana River drainage upstream to the mouth of the Salcha River, salmon may not be taken following the closure of the commercial salmon fishing season from 6 p.m. Monday until 6 pm. Friday.

(xxix) Adjustments may have to be made to the subsistence salmon fishing seasons and fishing periods to protect healthy populations.

(xxx) Pike may not be taken with gill nets in the waters of the Tolovana River drainage from October 15 through April 14.

(xxxi) An Alaska Commercial Fisheries Entry Commission salmon permit holder registered for the set net only locations may not use drift gill nets for the subsistence taking of salmon in Districts 1, 2, and 3.

(xxxii) Commercial salmon fishermen who is registered for Districts 1, 2, or 3 may not take salmon for subsistence purposes in any other district located downstream from Old Paradise Village.

(xxxiii) During any commercial salmon fishing season closure of greater than five days in duration, salmon may not be taken during the following periods in the following districts:

(A) In District 4, excluding the Koyukuk and Innoko River drainages, salmon may not be taken from 6 p.m. Friday until 6 p.m. Sunday;

(xxxiv) In District 4, commercial fishermen may not take salmon for subsistence purposes during the commercial salmon fishing season by gill nets larger than six inch mesh after a date specified by emergency order issued between July 10 and July 31.

(xxxv) In Districts 4, 5 and 6, salmon may not be taken for subsistence purposes by drift gill nets, except as follows:

(A) In Subdistrict 6–A, upstream from the mouth of Shish Creek king salmon may be taken by drift gill nets from June 21 through July 14, and chum salmon may be taken by drift gill nets after August 2;

(B) No person may operate a drift gill net that is more than 150 feet in length during the seasons described in this section.

(xxxvi) In Subdistricts 5–A, 5–B, 5–C, and that portion of Subdistrict 5–D downstream from Long Point, no person may possess salmon taken for subsistence purposes during a commercial fishing period unless the dorsal fin has been immediately removed from the salmon. A person may not sell or purchase salmon from which the dorsal fin has been removed.

(xxxvii) In addition to the subsistence fishing permit conditions, permits issued for the taking of salmon in Subdistricts 6–A and 6–B must also contain the following requirements:

(A) Salmon may be taken only by set gill net or fishwheel. No household may operate more than one fishwheel.

(B) Each person subsistence fishing shall keep accurate daily records of his/her catch, the number of fish taken by species, location and date of the catch, and other information that the Alaska Department of Fish and Game may require for management or conservation purposes.

(C) In that portion of Subdistrict 6–B three miles or more upstream of the mouth of Totchaket Slough, each permittee shall report the number of salmon taken to the Alaska Department of Fish and Game once each week, or as specified on the permit. In the remainder of Subdistrict 6–B and in Subdistrict 6–A, each permittee shall report the total number of salmon taken to the Alaska Department of Fish and Game no later than October 31.

(xxxviii) Subsistence fishermen taking salmon in Subdistrict 6–C shall report their salmon catches at designated Alaska Department of Fish and Game check stations by the end of each weekly fishing period. Immediately after salmon have been taken, catches must be recorded on a harvest form provided by the department.

(xxxix) The annual possession limit for the holder of a Subdistrict 6–C subsistence salmon fishing permit is 10 king salmon and 75 chum salmon for periods through August 15 and 75 chum and coho salmon for periods after August 15.

(xl) Subsistence salmon harvest limits in Subdistrict 6–C are 750 king salmon and 5,000 chum salmon taken through August 15 and 5,200 chum and coho salmon combined taken after August 15. When either the king or chum salmon harvest limit for periods before August 15 has been taken, the subsistence salmon fishing season in Subdistrict 6–C will close. A later season will open after August 15 to allow the taking of the harvest limit for periods after August 15. If the chum salmon harvest limit has not been obtained through August 15, the remaining harvest will not be added to the chum salmon harvest level for periods after August 15.

(xli) Subsistence salmon fishing seasons and weekly fishing periods for Subdistrict 6–C are as follows:

(A) Salmon may be taken at any time except salmon may not be taken for 24 hours before the opening and after the closing of the commercial salmon fishing seasons and during closed weekly commercial salmon fishing periods;

(B) Weekly subsistence salmon fishing periods that follow closures of the commercial salmon fishing seasons will be established by emergency order;

(C) The annual harvest limit for the holder of a Subdistrict 6–A or 6–B subsistence salmon fishing permit is 60 chinook salmon and 500 chum salmon for the period through August 15 of a year, and 2,000 chum and coho salmon combined for the period after August 15. Upon request, permits for additional salmon may be issued by the department.

(D) Unless otherwise provided, from June 20 through September 30, open subsistence salmon fishing periods are concurrent with open commercial salmon fishing periods. During closures of the commercial salmon fishery, open subsistence salmon fishing periods are as specified in 5 Alaska Administrative Code 05.367.

(E) In the Kantishna River drainage, the open subsistence salmon fishing periods are seven days per week.

(F) In Subdistrict 6–B from the downstream end of Crescent Island to a line three miles upstream from the mouth of the Totchaket Slough, the open subsistence salmon fishing periods are from 6 p.m. Friday through 6 p.m. Wednesday.

(4) Kuskokwim Area. Federal subsistence regulations for the subsistence harvest of fish are in effect for all waters on Nunivak Island and within one mile of its shoreline and all waters within the Old Kuskokwim Wildlife Refuge as defined by boundaries established prior to 1980. In the remainder of the Kuskokwim area Federal subsistence fishing regulations only apply to non-navigable waters on Federal lands.

(i) Unless otherwise restricted, salmon may be taken in the Kuskokwim area at any time.

(ii) Except as otherwise provided, there is no closed season on fish other than salmon.

(iii) Salmon may only be taken by gill net, beach seine, or fishwheel subject to the restrictions set forth in this chapter, except that salmon may also be taken by spear in the Holitna River drainage.

(iv) The aggregate length of set gill nets or drift gill nets in use by any individual for taking salmon may not exceed 50 fathoms.

(v) Fish other than salmon may only be taken by set gill net, drift gill net, beach seine, fishwheel, pot, long line, fyke net, dip net, jigging gear, spear, or lead.

(vi) Each subsistence gill net operated in tributaries of the Kuskokwim River must be attached to the bank, fished substantially perpendicular to the bank and in a substantially straight line.

(vii) Fish may be taken for subsistence purposes without a subsistence fishing permit.

(viii) Only those residents domiciled in the Kuskokwim Area, except those persons residing on the United States military installation located on Cape Newenham, Sparevohn USAFB, and Tatalina USAFB, may take salmon for subsistence purposes in the Kuskokwim Area.

(ix) Only those residents domiciled in the communities of Chevak, Newtok, Tununak, Toksook Bay, Nightmute, Chefornak, Kipnuk, Mekoryuk, Kwigillingok, Kongiganak, Eek, and Tuntutuliak may take for subsistence purposes Pacific cod in the Kuskokwim area.

(x) Only those residents domiciled within 20 miles of the coast between the westernmost tip of the Naskonant Peninsula and the terminus of the Ishowik River and on Nunivak Island may take for subsistence purposes herring and herring roe in those locations.

(xi) A gill net may obstruct not more than one-half the width of any fish stream. A stationary fishing device may obstruct not more than one-half the width of any salmon stream.

(xii) Kegs or buoys attached to subsistence gill nets may be any color except red during any open weekly commercial salmon fishing period.

(xiii) The maximum depth of gill nets is as follows:

(A) Gill nets with six-inch or smaller mesh may not be more than 45 meshes in depth;

(B) Gill nets with greater than six-inch mesh may not be more than 35 meshes in depth;

(xiv) In addition to the previously stated requirements,

(A) Each fishwheel must have the first initial, last name, and address of the operator plainly and legibly inscribed on the side of the fishwheel facing midstream of the river;

(B) For all gill nets and unattended gear that are fished under the ice, the first initial, last name, and address of the operator must be plainly and legibly inscribed on a stake inserted in the ice and attached to the gear.

(xv) In that portion of the Kuskokwim River drainage from the north end of Eek Island upstream to the mouth of the Kolmakof River, no part of a set gill net located within a tributary to the Kuskokwim River may be set or operated within 150 feet of any part of another set gill net.

(xvi) The Goodnews River is closed to the subsistence taking of fish by nets east of a line between Alaska Department of Fish and Game regulatory markers placed near the mouth of the Ufigag River and Alaska Department of Fish and Game regulatory marker placed near the mouth of the Tunulik River 24 hours before, during, and six hours after each open commercial salmon fishing period.

(xvii) The Kanektok River is closed to the subsistence taking of fish by nets upstream of Alaska Department of Fish and Game regulatory markers placed near the mouth 24 hours before, during and six hours after each open commercial salmon fishing period.

(xviii) The Arolik River is closed to the subsistence taking of fish by nets upstream of Alaska Department of Fish and Game regulatory markers placed near the mouth 24 hours before, during, and six hours after each open commercial salmon fishing period.

(xix) In District 1 and in those waters of the Kuskokwim River between Districts 1 and 2, excluding the Kuskokuak Slough, salmon may be taken at any time except salmon may not be taken for 16 hours before, during and for six hours after, each open commercial salmon fishing period for District 1.

(xx) In District 1, Kuskokuak Slough only, salmon may be taken at any time except:

(A) From June 1 through July 31, salmon may not be taken for 24 hours before and during each open commercial salmon fishing period in the district.

(B) From August 1 through August 31, salmon may not be taken for 15 hours before and during each open commercial salmon fishing period in the district.

(xxi) In District 2, and anywhere in tributaries that flow into the Kuskokwim River within that district, salmon may be taken at any time, except that from June 1 through September 8 salmon may not be taken for 24 hours before, during, and six hours after each open commercial salmon fishing period in the district.

(xxii) In Districts 4 and 5, salmon may be taken at any time except from June 1 through September 8, salmon may not be taken for 24 hours before, during, and 6 hours after each open commercial salmon fishing period in each district.

(5) Bristol Bay Area. At this time the Federal Government is only exerting its control on subsistence fishing in non-navigable fresh waters on Federal lands.

(i) Unless restricted in this section or unless restricted under the terms of a subsistence fishing permit, fish may be taken at any time in the Bristol Bay Area.

(ii) Within the waters of a district open during the commercial salmon fishing season, salmon may be taken only during open commercial salmon fishing periods.

(iii) The total annual possession limit for a subsistence salmon fishing permit issued under this section is 200 sockeye salmon.

(iv) Salmon, trout and char may only be taken under authority of a subsistence fishing permit.

(v) Only one subsistence fishing permit may be issued to each household per year.

(vi) No set gill net may obstruct more than one-half the width of a stream.

(vii) Each set gill net must be staked and buoyed.

(viii) No person may operate or assist in operating subsistence salmon net gear while simultaneously operating or assisting in operating commercial salmon net gear.

(ix) Fish, other than salmon, herring and capelin may be taken by gear previously listed unless restricted under the terms of a subsistence fishing permit.

(x) Within any district, salmon, herring, and capelin may only be taken by drift and set gill nets.

(xi) Outside the boundaries of any district, salmon may only be taken by set gill net, except that salmon may also be taken by spear in the Togiak River excluding its tributaries.

(xii) The maximum lengths for set gill nets used to take salmon are as follows:

(A) In the Naknek, Egegik and Ugashik Rivers, in the Nushegak District, and in Naknek Lake, set gill nets may not exceed 10 fathoms in length;

VOL
56
ISS
123
JE
26
1991
UMI

(B) In the remaining waters of the area, set gill nets may not exceed 25 fathoms in length.

(xiii) In the Naknek, Egegik, and Ugashik Rivers from 9 a.m. June 23 through 9 a.m. July 17, salmon may be taken only from 9 a.m. Tuesday to 9 a.m. Wednesday and 9 a.m. Saturday to 9 a.m. Sunday.

(xiv) Except for the western shore of the Newhalen River, waters used by salmon are closed to the subsistence taking of fish within 300 feet of a stream mouth.

(xv) Nushagak District. (A) In the open waters of the Nushagak District, provision shall be made for subsistence salmon fishing by emergency order whenever there are commercial salmon fishing closures of five or more days. During these emergency order openings, (*1*) set gill nets may not be more than 10 fathoms in length;

(*2*) No set gill net may be set or operated within 450 feet of another set gill net, and

(*3*) Catches during the emergency order openings must be reported to the Dillingham Alaska Department of Fish and Game office within 24 hours after the closure.

(B) In the Nushagak District from an Alaska Department of Fish and Game regulatory marker located two statute miles south of Bradford Point to an Alaska Department of Fish and Game regulatory marker located at Red Bluff on the west shore of the Wood River, from 9 a.m. June 16 through 9 a.m. July 17, salmon may be taken only from 9 a.m. Monday to 9 a.m. Tuesday, 9 a.m. Wednesday to 9 a.m. Thursday, and 9 a.m. Friday to 9 a.m. Saturday.

(C) Only those residents domiciled in the Nushagak District and freshwater drainage flowing into the district may take salmon in the district and those drainage.

(xvi) Naknek-Kvichak District. (A) From October 1 through December 31, sockeye salmon may be taken along a 100 yard length of the west shore of Naknek Lake near the outlet to the Naknek River as marked by Alaska Department of Fish and Game regulatory markers.

(B) Subsistence salmon fishing permits for the Naknek River drainage will be issued only through the Alaska Department of Fish and Game King Salmon office.

(C) Only those residents domiciled in the Naknek and Kvichak River drainage may take salmon in the Naknek River drainage.

(D) Only those residents domiciled in the Iliamna-Lake Clark drainage may take salmon in the Iliamna-Lake Clark drainage.

(E) Subsistence fishing with nets is prohibited in the following waters and within one-fourth mile of the terminus of those waters during the period from September 1 through June 14: Lower Talarik Creek, Roadhouse Creek, Nick G. Creek, Middle Talarik Creek, Alexi Creek, Copper River, Upper Talarik Creek, Tazimina River, Kakhonak River, Pete Andrew Creek, Young's Creek, Gibralter River, Zacker Creek, Chekok Creek, Dennis Creek, Newhalen River, Tomokok Creek, Belinda Creek

(xvii) Togiak District. (A) After August 20, no person may possess coho salmon for subsistence purposes in the Togiak River Section and the Togiak River drainage unless the head has been immediately removed from the salmon. It is unlawful to purchase or sell coho salmon from which the head has been removed.

(B) Only those residents domiciled in the Togiak District, freshwater drainage flowing into the district, and the community of Manokotak may take salmon and freshwater fish species in the district and those drainages.

(C) Gill nets are prohibited in that portion of the Naknek River upstream from Sovonaski;

(6) Aleutian Islands Area. Federal subsistence regulations for the subsistence harvest of fish are in effect for all fresh waters on Federal lands west of the easternmost tip of Ugamak Island to the terminus of the Aleutian Islands, except the area between Akutan Pass and Samalga Island. In the remainder of the Aleutian Island area Federal subsistence fishing regulations only apply to non-navigible waters on Federal lands. (i) Salmon may be taken by seine and gill net, or with gear specified on a subsistence fishing permit.

(ii) Fish other than salmon may be taken by gear previously, unless restricted under the terms of a subsistence fishing permit.

(iii) The waters of Unalaska Lake (at Unalaska Village), its drainage and the outlet stream, and within 500 yards of its terminus are closed to subsistence fishing.

(iv) The Adak District is closed to the taking of salmon.

(v) Salmon, trout and char may be taken only under the terms of a subsistence fishing permit, except that a permit is not required in the Akutan, Umnak and Adak Districts. Not more than 250 salmon may be taken for subsistence purposes unless otherwise specified on the subsistence fishing permit. A record of subsistence caught fish must be kept on the reverse side of the permit. The record must be completed immediately upon taking subsistence caught fish and must be returned to the local representative of the Alaska Department of Fish and Game no later than October 31.

(7) Alaska Peninsula Area. Federal Subsistence regulations for the subsistence harvest of fish are in effect for all waters on and within one mile of Simeonof Island. In the remainder of the Alaska Peninsula Area Federal subsistence fishing regulations only apply to non-navigable waters on Federal lands. (i) Salmon may be taken at any time except within 24 hours before and within 12 hours following each open weekly commercial salmon fishing period within a 50 mile radius of the area open to commercial salmon fishing, or as may be specified on a subsistence fishing permit.

(ii) Fish other than salmon may be taken at any time unless restricted under the terms of a subsistence fishing permit.

(iii) Salmon may be taken by seine and gill net, or with gear specified on a subsistence fishing permit.

(iv) Fish other than salmon may be taken by gear previously listed, unless restricted under the terms of a subsistence fishing permit.

(v) No set gill net may exceed 100 fathoms in length.

(vi) The following waters are closed to subsistence fishing for salmon:

(A) Russell Creek and Nurse Lagoon and within 500 yards outside the mouth of Nurse Lagoon;

(B) Trout Creek and within 500 yards outside its mouth;

(C) Inshore of a line from the Pacific Pearl dock to Black Point, including the inlet and Humboldt Creek.

(vii) Salmon, trout and char may be taken only under the authority of a subsistence fishing permit. A record of subsistence caught fish must be kept on the reverse side of the permit. The record must be completed immediately upon taking subsistence caught fish and must be returned to the local representative of the Alaska Department of Fish and Game no later than October 31.

(8) Chignik Area. Federal subsistence regulations for the subsistence harvest of fish are in effect for all waters on and within one mile of each of the Semidi Islands. In the remainder of the Chignik Area Federal regulations only apply to non-navigable waters on Federal lands. (i) Salmon may be taken by seines and gill nets, or with gear specified on a subsistence fishing permit, except that in Chignik Lake, salmon may not be taken with purse seines.

(ii) Fish other than salmon may be taken by gear previously listed, unless

restricted under the terms of a subsistence fishing permit.

(iii) Salmon may not be taken in the Chignik River, upstream from the Alaska Department of Fish and Game weir site or counting tower, in Black Lake, or any tributary to Black and Chignik Lakes.

(iv) Salmon, trout and char may only be taken under the authority of a subsistence fishing permit. A record of subsistence caught fish must be kept on the reverse side of the permit. The record must be completed immediately upon taking subsistence caught fish and must be returned to the local representative of the Alaska Department of Fish and Game no later than October 31.

(v) From June 10 through September 30, commercial fishing license holders may not substitute fish for salmon.

(9) Kodiak Area. (i) At this time, the Federal Government is only exerting its control over subsistence fishing in the following waters:

(A) All fresh waters within the boundary of the Kodiak National Wildlife Refuge and all non-navigable waters on Federal lands on Kodiak and surrounding islands.

(B) All saltwater enclosed by the boundaries of Womans Bay, Gibson Cove, and an area defined by a line one-half mile on either side of the mouth of Karluk River, and extending seaward 3000 feet. The mouth of the river is closed to fishing.

(C) All saltwater enclosed by the boundaries of the shoreline of Afognak Island and a line 1500 feet seaward of the shoreline.

(D) All navigable and non-navigable fresh waters on Afognak Island enclosed by the National Wildlife Refuge Boundaries.

(ii) Salmon may be taken for subsistence purposes from 6 a.m. until 9 p.m. from January 1 through December 31, with the following exceptions:

(A) From June 1 through September 15, salmon seine vessels may not be used to take subsistence salmon for 24 hours before, during, and for 24 hours after any open commercial salmon fishing period;

(B) From June 1 through September 15, purse seine vessels may be used to take salmon only with gill nets and no other type of salmon gear may be on board the vessel.

(iii) Fish other than salmon may be taken at any time unless restricted by the terms of a subsistence fishing permit.

(iv) Unless restricted by this section or under the terms of a subsistence fishing permit, fish may be taken by gear previously listed.

(v) Salmon may be taken only by gill net and seine.

(vi) Subsistence fishermen must be physically present at the net at all times the net is being fished.

(vii) The following locations are closed to the subsistence taking of salmon:

(A) All waters of Mill Bay and all those waters bounded by a line from Spruce Cape to the northernmost point of Woody Island, then to the northernmost point of Holiday Island, then to a point on Near Island opposite the Kodiak small boat harbor entrance and then to the small boat harbor entrance;

(B) All freshwater systems of Little Afognak River and Portage Creek drainage in Discoverer Bay;

(C) All water closed to commercial salmon fishing in the Barbara Cove, Chiniak Bay, Saltery Cove, Pasagshak Bay, Monashka Bay and Anton Larsen Bay, and all waters closed to commercial salmon fishing within 100 yards of the terminus of Selief Bay Creek and north and west of a line from the tip of Las Point to the tip of River Mouth Point of Afognak Bay;

(D) All waters 300 yards seaward of the terminus of Monks Creek;

(E) From August 15 through September 30, all waters 500 yards seaward of the terminus of Little Kitoi Creek;

(F) All freshwater systems of Afognak Island;

(G) All waters of Ouzinkie Harbor north of a line from 57°55'10" N. lat., 152°36'W. long. to 57°55'09" N. lat., 152°29'20" W. long.

(viii) A subsistence fishing permit is required for taking salmon, trout and char for subsistence purposes. A subsistence fishing permit is required for taking herring and bottomfish for subsistence purposes during the commercial herring sac roe season from May 1 through June 30. All subsistence fishermen shall keep a record of the number of subsistence fish taken each year. The number of subsistence fish shall be recorded on the reverse side of the permit. The record must be completed immediately upon landing subsistence caught fish and must be returned to the local representative of the Alaska Department of Fish and Game by February 1 of the year following the year the permit was issued.

(ix) Only those residents domiciled in the Kodiak Island Borough, except those residing on the Kodiak Coast Guard Base, may take salmon in the Kodiak Area. This restriction does not apply to the Mainland District, all waters along the southside of the Alaska Peninsula bounded by the latitude of Cape Douglas [58°52' North latitude] mid-stream Shelikof Strait, and west of the longitude of the southern entrance of Kmuya Bay near Kilokak Rocks (57°11'22" North latitude, 156°20'30" West longitude.)

(10) Cook Inlet Area. (i) At this time, the Federal Government is only exerting its control over subsistence fishing in the following waters:

(A) All waters within the boundaries of the Kenai National Wildlife Refuge.

(B) All non-navigable waters on Federal lands within the Cook Inlet Area.

(ii) Unless restricted in this section or unless restricted under the terms of a subsistence fishing permit, fish may be taken at any time in the Cook Inlet area.

(iii) Unless otherwise restricted or under the terms of a subsistence fishing permit, fish may be taken by listed gear.

(iv) All salt water is closed to the taking of finfish except:

(A) The Tyonek and Port Graham Subdistricts;

(B) Salmon may be taken in the Koyuktolik Subdistrict.

(v) Salmon may not be taken in any area closed to commercial salmon fishing unless otherwise permitted.

(vi) Bottomfish may be taken by legal gear for commercial bottomfish in the area.

(vii) Smelt and herring may be taken only with gill nets and dip nets. Gill nets used to take smelt may not exceed 50 feet in length and two inches in mesh size.

(viii) Whitefish may be taken only in the Tyonek River drainage and only under the authority of a permit issued by the department.

(ix) Gill nets may not be used in fresh water, except for the taking of whitefish in the Tyonek River drainage.

(x) Trout, grayling, char, and burbot may not be taken in fresh water, except that dolly varden may be taken in fresh water in the Port Graham Subdistrict.

(xi) Dolly varden may be taken in fresh water only under the authority of a subsistence fishing permit issued by the department; only one permit may be issued to a household each year. A subsistence fishing permit holder shall record daily dolly varden catches on forms provided by the department.

(xii) Dolly varden may be taking in fresh water for subsistence purposes in the Port Graham Subdistrict only from April 1 through May 31.

(xiii) Only those residents domiciled in Port Graham and English Bay may take salmon in the Port Graham and Koyuktolik Subdistricts and dolly varden in fresh water in the Port Graham Subdistrict.

VOL

UMI

(xiv) Dolly varden may be taken in fresh water only by beach seines not exceeding 10 fathoms in length.

(xv) Salmon may be taken only under the authority of a subsistence fishing permit issued by the Alaska Department of Fish and Game; only one permit may be issued to a household each year. A subsistence fishing permit holder shall record daily salmon catches on forms provided by the department.

(xvi) No person may operate or assist in the operation of subsistence salmon net gear on the same day that person operates or assists in the operation of commercial salmon gear.

(xvii) Only those residents domiciled in the village of Tyonek may take salmon in the Tyonek Subdistrict.

(xviii) Salmon may be taken only as follows:

(A) In the Tyonek subdistrict by set gill nets not exceeding 10 fathoms in length, six inches in mesh size and 45 meshes in depth;

(B) In the Port Graham and Koyuktolik Subdistricts by set gill nets not exceeding 35 fathoms in length, six inches in mesh size and 45 meshes in depth;

(C) No part of a set gill net may be set or operated within 600 feet of any part of another set gill net.

(xix) Salmon may be taken for subsistence purposes only as follows:

(A) In the Tyonek subdistrict;

(*1*) From May 15 through June 15 from 4 a.m. to 8 p.m. on Tuesdays, Thursdays and Fridays (this season shall close by emergency order when 4,200 king salmon are taken);

(*2*) From June 16 through October 15 from 6 a.m. to 6 p.m. on Saturdays (shall not open until July 1 if 4,200 king salmon are taken before June 16.)

(B) In the Port Graham and Koyuktolik Subdistricts from April 1 through September 30 from 6 a.m. Monday until 6 a.m. Wednesday and from 6:00 a.m. Thursday until 6 a.m. Saturday.

(xx) No person may possess salmon taken under the authority of a subsistence fishing permit unless both lobes of the caudal fin (tail) have been immediately removed from the salmon.

(xxi) It is unlawful to purchase or sell salmon from which both lobes of the caudal fin (tail) have been removed.

(xxii) The total annual possession limit for each subsistence salmon permit is as follows:

(A) There is no total annual possession limit for holders of Port Graham and Koyuktolik Subdistrict subsistence salmon fishing permits;

(B) 25 salmon for the head of household and 10 salmon for each dependent of the permit holder.

(C) In addition to the limits in (b) of this subsection; the holder of a Tyonek subdistrict subsistence salmon fishing permit may take 70 king salmon; no more than 4,200 king salmon may be taken in the Tyonek subdistrict during the period May 15 through June 30.

(11) Prince William Sound Area. At this time Federal subsistence fishing regulations only apply to non-navigable waters on Federal lands in the Prince William Sound area. (i) Unless restricted in this section or unless restricted under the terms of a subsistence fishing permit, fish may be taken at any time in the Prince William Sound Area.

(ii) Fish may be taken by gear previously listed unless restricted in this section or under the term of a subsistence fishing permit.

(iii) Salmon may be taken only by the following types of gear:

(A) In the Glennallen Subdistrict by fishwheels or dip nets;

(B) The Chitina Subdistrict is closed to subsistence salmon fishing;

(iv) Fishwheels used for subsistence fishing may not be rented, leased, or otherwise used for personal gain. Subsistence fishwheels must be removed from the water at the end of the permit period. Each permittee may operate only one fishwheel at any one time. No person may set or operate a fishwheel within 75 feet of another fishwheel. No fishwheel may have more than two baskets.

(v) The permit holder must personally operate the fishwheel or dip net. A subsistence fishwheel or dip net permit may not be loaned or transferred except as permitted by Alaska regulations.

(vi) A wood or metal plate at least 12 inches high by 12 inches wide, bearing the permit holder's name and address in letters and numerals at least one inch high, must be attached to each fishwheel so that the name and address are plainly visible.

(vii) Except as provided in this section, fish other than salmon and freshwater fish species may be taken for subsistence purposes with a subsistence fishing permit.

(viii) Salmon and freshwater fish species may be taken only under the authority of a subsistence fishing permit.

(ix) Only one subsistence fishing permit will be issued to each household per year.

(x) Salmon may not be taken in any area closed to commercial salmon fishing unless otherwise permitted.

(xi) In locations open to commercial salmon fishing and in conformance with commercial salmon fishing regulations, the annual subsistence salmon limit is as follows:

(A) 15 salmon for a household of one person;

(B) 30 salmon for a household of two persons;

(C) 10 salmon for each additional person in a household over two;

(D) no more than five king salmon may be taken per permit.

(xii) All tributaries of the Copper River and waters of the Copper River not in the Upper Copper River District are closed to the taking of salmon.

(xiii) A subsistence salmon fishing permit for the Upper Copper River District will be issued only to residents of the State of Alaska. The following apply to Upper Copper River District subsistence salmon fishing permits:

(A) Only one type of gear may be specified on a permit;

(B) Only one permit per year may be issued to a household;

(C) Permits must be returned to the Alaska Department of Fish and Game no later than October 31, or a permit for the following year may be denied.

(D) During closed fishing periods, the Alaska Department of Fish and Game's Chitina permit issuing station may be closed or operated at reduced hours to reduce costs.

(E) A household may not be issued both a Copper River Subsistence Salmon Fishing Permit and a Chitna Subdistrict Personal Use Salmon Fishing Permit.

(xiv) The total annual possession limit for an Upper Copper River District subsistence salmon fishing permit is as follows:

(A) 30 salmon for a household with one person;

(B) 60 salmon for a household with two persons;

(C) 10 salmon for each additional person in a household over two;

(D) Upon request, permits for additional salmon will be issued with the following limits:

(*1*) No more than a total of 200 salmon for a permit issued to a household with one person.

(*2*) No more than a total of 500 salmon for a permit issued to a household with two or more persons.

(xv) Salmon may be taken in the Upper Copper River District only as follows:

(A) In the Glennallen Subdistrict, from June 1 through September 30;

(B) The Chitina subdistrict is closed to subsistence salmon fishing;

(C) When the Copper River subsistence fishery is closed or restricted because of an inadequate escapement of sockeye or chinook salmon, the fishery may be reopened September 1 for the taking of coho salmon, which constitute the majority of the salmon at that time.

(D) No person may possess salmon taken under the authority of an Upper Copper River District subsistence fishing permit unless the dorsal fin has been immediately removed from the salmon.

(xvi) Salmon may not be taken in the Chitina Subdistrict, or in any portion of the subdistrict, when those waters are closed to subsistence salmon fishing.

(xvii) Crosswind Lake is closed to all subsistence fishing.

(xviii) Subsistence salmon fishing permits for the Southwestern District and Green Island may be issued only to those residents domiciled in the Southwestern District which is mainland waters from the outer point on the north shore of Granite Bay to Cape Fairfield and all waters surrounding Knight Island, Chenega Island, Bainbridge Island, Evans Island, Elrington Island, Latouche Island and adjacent islands. Salmon may be taken for subsistence purposes in those waters only as follows:

(A) Salmon may be taken only in the Southwestern District, as described in above, and along the northwestern shore of Green Island from the westernmost tip of the island to the northernmost tip;

(B) Salmon may be taken only by gill nets up to 150 fathoms in length, except that pink salmon may be taken in fresh water by dipnets only;

(C) Salmon may be taken only from May 15 through September 30;

(D) Fishing periods are from May 15 until two days before the commercial opening of the Southwestern District, seven day per week; during the commercial salmon fishing season, only during open commercial salmon fishing periods; and from two days following the closure of the commercial salmon season until September 30, seven days per week;

(E) No fishing is allowed within the closed waters areas for commercial salmon fisheries; only pink salmon may be taken in fresh water;

(F) There are no bag and possession limits for this fishery;

(G) Permits may be issued only at Chenega Bay village.

(xix) Salmon, other than chinook salmon, may be taken in the vicinity of the former native village of Batzulnetas under the following conditions:

(A) Salmon may be taken only under the authority of a Batzulnetas subsistence salmon fishing permit issued by ADF&G;

(B) Salmon may be taken only in those waters of the Copper River between Alaska Department of Fish and Game regulatory markers located near the mouth of Tanada Creek and approximately one-half mile downstream from that mouth and in Tanada Creek between Alaska Department of Fish and Game regulatory markers identifying the open waters of the creek;

(C) Fishwheels and dipnets only may be used on the Copper River; dipnets and spears only may be used in Tanada Creek;

(D) Salmon may be taken only from June 1 through September 1 or until the season is closed by emergency order; fishing periods are to be established by emergency order and are two days per week during the month of June and 3.5 days per week for the remainder of the season;

(E) Chinook salmon taken must be released to the water unharmed; fish wheels must be equipped with a live box or be monitored at all times;

(F) The permit must be returned to the Alaska Department of Fish and Game's Glennallen office no later than September 30 of each year.

(xx) Subsistence salmon fishing permits for those waters north of a line from Porcupine Point to Granite Point, and south of a line from Point Lowe to Tongue Point, may be issued only to those residents domiciled in the villages of Tatitlek and Ellamar. Salmon may be taken for subsistence purposes in those waters only as follows:

(A) Salmon may be taken only in those waters north of a line from Porcupine Point to Granite Point, and south of a line from Point Lowe to Tongue Point;

(B) Salmon may be taken only by gill nets up to 150 fathoms in length, with a maximum mesh size of 6.25 inches, except that pink salmon may be taken in fresh water by dipnets only;

(C) Salmon may be taken only from May 15 through September 30;

(D) Fishing periods are from May 15 until two days before the commercial opening of the Southwestern District, seven days per week; during the commercial salmon fishing season, only during open commercial salmon fishing periods; and from two days following the closure of the commercial salmon season until September 30, seven days per week;

(E) No fishing is allowed within the closed waters areas for commercial salmon fisheries; only pink salmon may be taken in fresh water;

(F) There are no bag and possession limits for this fishery;

(G) Permits may be issued only at Tatitlek village.

(12) Yakutat Area. (i) At this time, Federal government is only exerting its control over subsistence fishing in the following waters:

(A) All waters within the boundaries of Glacier Bay National Preserve.

(B) All non-navigable waters on Federal lands in the Yakutat area, with the exception of such waters within Glacier Bay National Park, which is closed to subsistence uses.

(ii) Unless restricted in this section or unless restricted under the terms of a subsistence fishing permit, fish may be taken at any time in the Yakutat area.

(iii) Salmon may not be taken during the period commencing 48 hours before an opening until 48 hours after the closure of an open commercial salmon net fishing season. This applies to each river or bay fishery individually.

(iv) When the length of the weekly commercial salmon net fishing period exceeds two days in any Yakutat Area salmon net fishery, the subsistence fishing period is from 6:00 am. to 6:00 p.m. on Saturday in that location.

(v) Only those residents domiciled east of Yakutat Bay, including the islands within Yakutat Bay, west of the Situk River drainage, and south of and including Knight Island may take

(A) Salmon in freshwater upstream from the terminus of streams and rivers of the Yakutat area from the Doame River to the Tsiu River, in waters of Yakutat Bay and Russell Fiord inside a line from the westernmost point of Point Manby to the southernmost point of Ocean Cape, and in waters of Icy Bay inside a line from the westernmost tip of Point Riou to Icy Cape Light;

(B) Dolly varden char, steelhead trout, and smelt in freshwater upstream from the terminus of streams and rivers of the Yakutat area from the Doame River to Point Manby, and in waters of Yakutat Bay and Russell Fiord inside a line from the westernmost point of Point Manby to the southernmost point of Ocean Cape.

(vi) Fish may be taken by gear previously listed, unless restricted in this section or under the terms of a subsistence fishing permit.

(vii) Salmon, trout and char may be taken only under authority of a subsistence fishing permit.

(viii) Salmon, trout, or char taken incidentally by gear operated under the terms of a subsistence permit for salmon are legally taken and possessed for subsistence purposes. The holder of a subsistence salmon permit must report any salmon, trout, or char taken in this manner on his or her permit calendar.

(ix) Subsistence fishermen must remove the dorsal fin from subsistence caught salmon when taken.

VOL 56 ISS 123 JE 26 1991 UMI

(18) Southeastern Alaska Area. At this time Federal subsistence fishing regulations only apply to non-navigable waters on Federal lands in the Southeastern Alaska Area, with the exception of Glacier Bay National Park which is closed to the subsistence uses.

(i) Unless restricted in this section or under the terms of a subsistence fishing permit, fish may be taken in the Southeastern Alaska Area at any time.

(ii) Salmon, trout, char and herring spawn on kelp may be taken only under authority of a subsistence fishing permit.

(iii) No person may possess subsistence-taken and sport-taken salmon on the same day.

(iv) The Alaska Department of Fish and Game shall not issue a permit for the taking of steelhead trout, but steelhead trout taken incidentally by gear operated under the terms of a subsistence permit for salmon are legally taken and possessed for subsistence purposes. The holder of a subsistence salmon permit must report any steelhead trout taken in this manner on his or her permit calendar.

(v) Salmon, trout, or char taken incidentally by gear operated under the terms of a subsistence permit for salmon are legally taken and possessed for subsistence purposes. The holder of a subsistence salmon permit must report any salmon, trout, or char taken in this manner on his or her permit calendar.

(vi) Subsistence fishermen shall immediately remove the dorsal fin of all salmon when taken.

(vii) Coho salmon may be taken from Salt Lake and Mitchell Bay from August 1 through October 31.

(viii) Fish may be taken by gear previously listed except as may be restricted under the terms of a subsistence fishing permit and except as follows:

(A) In District 13, Redoubt Bay, gillnet or seine gear may not be used to take salmon in any waters of the bay closed to commercial salmon fishing;

(B) Set gill nets may not be used to take salmon except in the mainstream and side channels, but not the tributaries, of the Chilkat River from the terminus to one mile upstream of Wells Bridge;

(C) Beach seines and gaffs only may be used to take coho salmon during the season and including coho salmon which may be taken from Salt Lake and Mitchell Bay from August 1 through October 31.

(ix) The following waters are closed to subsistence salmon fishing: in District 15, saltwaters of Lynn Canal including Chilkat, Chilkoot and Lutak Inlets, during the closed period of the commercial salmon net fishery in the district, except that salmon may be taken in saltwaters of Lutak Inlet on the Saturday before any period that the commercial salmon net fishery is open in the inlet to the terminus of the Chilkoot River.

(x) Permits will not be issued for taking chinook or coho salmon, except for coho salmon as provided in Salt Lake and Mitchell Bay from August 1 through October 31, but chinook or coho salmon taken incidentally by gear operated under terms of a subsistence permit for other salmon are legally taken and possessed for subsistence purposes. The holder of a subsistence salmon fishing permit must report any chinook or coho salmon taken in this manner on his or her permit calendar.

(xi) From July 7 through July 31, sockeye salmon may be taken in the waters of Klawock Inlet enclosed by a line from Klawock Light to the Klawock Oil Dock, the Klawock River, and Klawock Lake only from 6 a.m. Monday until 5 p.m. Friday.

(xii) In the Chilkat River, the subsistence fishing permit holder shall be physically present at the net while it is fishing.

(xiii) Before July 4, subsistence salmon fishing permits may be operated in Sitkoh Bay only by residents of Angoon. On and after July 4, subsistence salmon fishing permits may be operated in Sitkoh Bay by residents of both Angoon and Sitka.

(xiv) Subsistence salmon fishing permits for the fishery provided for Salt Lake and Mitchell Bay will be issued only to those persons domiciled in Angoon and only one permit will be issued for a household. The number of coho salmon that may be taken on a permit will be specified by the Alaska Department of Fish and Game after it has assessed the level of effort that will be involved in that fishery.

(xv) In the waters of the Klawock Inlet enclosed by a line from Klawock Light to the Klawock Oil Dock, no person may subsistence salmon fish from a vessel that is powered by a motor of greater than 35 horsepower.

(xvi) Finfish may be taken for subsistence purposes only as provided in this section:

(A) Klukwan. Only those residents domiciled west of the Haines highway between Mile 20 and Mile 24 and east of the Chilkat River may take herring, herring spawn, and bottomfish in waters of Section 15–A; and salmon and smelt in all waters of the Chilkat River and Chilkat Inlet north of the latitude of Glacier Point, and in the Chilkoot River, Lutak Inlet, and Chilkoot Inlet north of the latitude of Battery Point, excluding waters of Taiya Inlet south of the latitude of the tip of Taiya Point.

(B) Haines. Only those residents domiciled in the City and Borough of Haines, excluding residents domiciled in the village of Klukwan and in the drainage of Lutak Inlet, may take herring, herring spawn, and bottomfish in waters of Section 15–A; and salmon and smelt in all waters of the Chilkat River and Chilkat Inlet north of the latitude of Glacier Point, and in the Chilkoot River, Lutak Inlet, and Chilkoot Inlet north of the latitude of Battery Point, excluding waters of Taiya Inlet north of the latitude of the tip of Taiya Point.

(C) Hoonah. Only those residents domiciled in the City of Hoonah and in Chichagof Island drainage on the eastern shore of Port Frederick from Gartina Creek to Point Sophia may take herring, herring spawn, and bottomfish in waters of District 14 east of the longitude of Point Dundas; and salmon, smelt, and dolly varden char in waters of section 14–B and 14–C, in District 12 in waters along the western shore of Yakobi Island east of a line from Cape Spencer Light to Surge Bay Light, and in District 12 in waters of Basket Bay inside a line from 57°30'30" N. lat., 134°53'12" W. long. to 57°36'17" N. lat., 134°53'53" W. long.

(D) Angoon. Only those residents domiciled in the City of Angoon and along the western shore of Admiralty Island north of the latitude of Sand Island, south of the latitude of Thayer Creek, and west of 134°30' W. long., including Killisnoo Island, may take herring, herring spawn, and bottomfish in waters of District 12 between the latitude of Parker Point and the latitude of Point Caution, and in Section 13–C east of the longitude of Point Elizabeth; and salmon and dolly varden char in waters of District 12 south of a line from Fishery Point to South Passage Point and north of the latitude of Point Caution and in waters of Section 13–C east of the longitude of Point Elizabeth.

(E) Sitka. Only those residents of the City and Borough of Sitka domiciled in drainage which empty into Section 13–B north of the latitude of Dorothy Narrows, except those domiciled in the U.S. Coast Guard base on Japonski Island, may take herring and herring spawn in waters of Section 13–B north of the latitude of Aspid Cape; and sockeye salmon in waters of Section 13–A south of the latitude of Cape Edward, in waters of Section 13–B north of the latitude of Redfish Cape, and in waters of Section 13–C.

(F) Kake. Only those residents domiciled in the City of Kake and in Kupreanof Island drainage into Keku Strait south of Point White and north of the Portage Bay boat harbor may take herring, herring spawn, and bottomfish in waters of Section 9–B north of the latitude of Point Ellis, in waters of District 10 west of a line from Pinta Point to Point Pybus, and in waters of District 5 north of 56°40" N. lat.; and salmon and dolly varden char in Section 9–A and 9–B in waters north of the latitude of Swain Point, in waters of District 10 west of a line from Pinta Point to False Point Pybus, and in waters of District 5 north of a line from Point Barrie to Boulder Point.

(G) Saxman. Only those residents domiciled in the City of Saxman may take herring and herring spawn in waters of Section 1–F between Point Sykes and Foggy Point to a distance of 2 nautical miles from shore; bottomfish in waters of Section 1–F north of the latitude of the northernmost tip of Mary Island, except waters of Boca de Quadra, and in waters of Section 1–E south of the latitude of Grant Island light; and salmon and dolly varden char in waters of Section 1–C in Checats Cove east of the longitude of Edith Point, in waters of Section 1–D in Yes Bay north of a line from Syble Point to Bluff Point, in Section 1–E in waters of Helm Bay north of the latitude of Helm Point and in waters of the Naha River and Roosevelt Lagoon, and in Section 1–F in waters of George Inlet north of 55°26' N. lat. and in Boca de Quadra in waters of Sockeye Creek and Hugh Smith Lake within 500 yards of the terminus of Sockeye Creek.

(H) Kasaan. Only those residents domiciled in the City of Kasaan and in the drainage of the southeastern shore of the Kasaan Peninsula west of 132°20' W. long. and east of 132°25' W. long. may take herring and herring spawn in waters of District 2 north of the latitude of the northernmost tip of Chasina Point and west of a line from the northernmost tip of Chasina Point to the easternmost tip of Grindall Island to the easternmost tip of the Kasaan Peninsula, and in waters of Section 3–B in San Alberta Bay north of the latitude of the southernmost tip of Cape Suspiro and east of 133°20' W. long.; and salmon, dolly varden char, and bottomfish in waters of District 2 north of the latitude of the northernmost tip of Chasina Point and west of a line from the northernmost tip of Chasina Point to the easternmost tip of Grindall Island to the easternmost tip of the Kasaan Peninsula.

(I) Klawock. Only those residents domiciled in the City of Klawock and on Prince of Wales Island within the boundaries of the Klawock Heenya Corporation land holdings as they exist in January 1989 may take herring and herring spawn in waters of Section 3–B in San Alberta Bay north of the latitude of the southernmost tip of Cape Suspiro and east of 133°20' W. long., and in waters of Section 3–A in Tlevak Strait north of the latitude of High Point and south of the latitude of Eolus Point; bottomfish in waters of Section 3–B; and salmon, dolly varden char, and steelhead trout in Section 3–B in waters east of a line from Point Ildefonso to Tranquil Point and in waters of Warm Chuck Inlet north of a line from a point on Hecata Island at 55°44' N. lat., 133°25' W. long. to Bay Point, and in Section 3–C in waters of Karheen Passage north of 55°48' N. lat. and east of 133°20' W. long. and in waters of Sarkar Cove and Sarkar Lakes.

(J) Craig. Only those residents domiciled in the City of Craig and on Prince of Wales Island within the boundaries of the Shan Seet Corporation land holdings as they exist in January 1989 may take herring and herring spawn in waters of Section 3–B in San Alberta Bay north of the latitude of the southernmost tip of Cape Suspiro and east of 133°20' W. long., and in waters of Section 3–A in Tlevak Strait north of the latitude of High Point and south of the latitude of Eolus Point; bottomfish in waters of Section 3–B; and salmon, dolly varden char, and steelhead trout in Section 3–B in waters east of a line from Point Ildefonso to Tranquil Point and in waters of Warm Chuck Inlet north of a line from a point on Hecata Island at 55°44' N. lat., 133°25' W. long. to Bay Point, and in Section 3–C in waters of Karheen Passage north of 55°48' N. lat. and east of 133°20' W. long. and in waters of Sarkar Cove and Sarkar Lakes.

(K) Hydaburg. Only those residents domiciled in the townsite of Hydaburg may take herring and herring spawn in waters of Section 3–A in Tlevak Strait north of the latitude of High Point and south of the latitude of Eolus Point, and in waters of Section 3–B in San Alberta Bay north of the latitude of the southernmost tip of Cape Suspiro and east of 133°20' W. long.; bottomfish in waters of Section 3–A, and in waters of Section 3–B south of the latitude of Bocas Point, excluding Port Refugio; and salmon and dolly varden char in waters of Section 3–A and in waters of District 2 in Nichols Bay north of 54°42'07" N. lat.

§ ____.25 Shellfish.

(a) Regulations in this section apply to subsistence fishing on Federal public lands for dungeness crab, king crab, tanner crab, shrimp, clams, abalone and other types of shellfish or their parts.

(b) Shellfish may be taken for subsistence uses at any time in any area of the public lands by any method unless restricted by the subsistence fishing regulations of this section or the preceding subsistence fishing section.

(c) Methods, Means, and General Restrictions. (1) The bag limit specified herein for a subsistence season for a species and the State bag limit set for a State general season for the same species are not cumulative. This means that a person or designated group who has taken the bag limit for a particular species under a subsistence season specified herein may not after that, take any additional shellfish of that species under any other bag limit specified for a State general season.

(2) Unless otherwise provided in this section, the following are legal types of gear for subsistence fishing:

(i) Gear specified under subsistence fishing regulations.

(ii) Jigging gear which consists of a line or lines with lures or baited hooks which are operated during periods of ice cover from holes cut in the ice and which are drawn through the water by hand;

(iii) A spear which is a shaft with a sharp point or fork-like implement attached to one end, used to thrust through the water to impale or retrieve fish and which is operated by hand;

(iv) A lead which is a length of net employed for guiding fish into a seine or a length of net or fending employed for guiding fish into a fishwheel, fyke net, or dip net;

(3) It is prohibited to buy or sell subsistence-taken shellfish, their parts, or their eggs, unless otherwise specified in this section.

(4) The use of explosives and chemicals is prohibited, except that chemical baits or lures may be used to attract shellfish.

(5) Subsistence fishing by the use of a line attached to a rod or pole is prohibited except when fishing through the ice in the Bering Sea area.

(6) Each subsistence fisherman shall plainly and legibly inscribe their first initial, last name and address on a keg or buoy attached to unattended subsistence fishing gear. Subsistence fishing gear may not display a permanent Alaska Department of Fish and Game vessel license number.

(7) A side wall of all subsistence shellfish pots must contain an opening with a perimeter equal to or exceeding one-half of the tunnel eye opening perimeter. The opening must be laced, sewn, or secured together by untreated cotton twine or other natural fiber no larger than 120 thread. Dungeness crab

1991
UMI

and shrimp pots may have the pot lid tiedown straps secured to the pot at one end by untreated cotton twine no larger than 120 thread, as a substitute for the above requirement.

(8) No person may mutilate or otherwise disfigure a crab in any manner which would prevent determination of the minimum size restrictions until the crab has been processed or prepared for consumption.

(9) In addition to the marking requirements in paragraph (c)(6) of this section, kags or buoys attached to subsistence crab pots must also be inscribed with the name or U.S. Coast Guard number of the vessel used to operate the pots.

(10) No more than five pots per person and 10 pots per vessel may be used to take crab, except as specified in paragraph (f) of this section.

(11) In the subsistence taking of shrimp in the Southeastern Alaska-Yakutat and Prince William Sound Areas, no person may use more than 10 pots, and no more than 20 pots may be operated from a vessel. In the subsistence taking of shellfish other than shrimp in the Southeastern Alaska-Yakutat Area, no person may operate more than five pots of any type, and no more than 10 pots of any type may be operated from a vessel.

(d) Subsistence Take by Commercial Vessels. No fishing vessel which is commercially licensed and registered for shrimp pot, shrimp trawl, king crab, tanner crab, or dungeness crab fishing may be used for subsistence take during the period starting 14 days before an opening until 14 days after the closure of a respective open season in the area or areas for which the vessel is registered.

(e) Unlawful Possession of Subsistence Shellfish. No person may possess, transport, give, receive or barter subsistence taken shellfish or their parts that the person knows or should know were taken in violation of a Federal or State statute or a regulation promulgated thereunder.

(f) Subsistence Shellfish Areas and Pertinent Restrictions. (1) Southeastern Alaska-Yakutat Area. At this time the Federal Government is only exerting its control over the waters of Glacier Bay National Park in the Southeastern Alaska-Yakutat Area. Glacier Bay National Park is closed to subsistence uses.

(2) Prince William Sound Area. At this time there are no locations within this area on which the Federal Government is regulating the subsistence harvest of shellfish. All shellfish harvest in this area is therefore under the regulation of the State of Alaska.

(3) Cook Inlet Area. At this time the Federal Government is only exerting its control over the subsistence harvest of shellfish in the following waters in the Cook Inlet Area: all waters within the boundaries of the Kenai National Wildlife Refuge. This area is closed to the taking of shellfish for subsistence purposes.

(4) Kodiak Area. (i) At this time, the Federal Government is only exerting its control over the subsistence harvest of shellfish in the following waters in the Kodiak area:

(A) All saltwater enclosed by the boundaries of Womens Bay, Gibson Cove, and an area defined by a line one-half mile on either side of the mouth of Karluk River, and extending seaward 3000 feet. The mouth of the river is closed to fishing.

(B) All saltwater enclosed by the boundaries of the shoreline of Afognak Island and a line 1500 feet seaward of the shoreline.

(C) All navigable and non-navigable fresh waters on Afognak Island enclosed by the National Wildlife Refuge Boundaries.

(ii) Shellfish may be taken for subsistence purposes only under the authority of a subsistence shellfish fishing permit.

(iii) The operator of a commercially licensed and registered shrimp fishing vessel must obtain a subsistence fishing permit from the Alaska Department of Fish and Game before subsistence shrimp fishing during a closed commercial shrimp fishing season or within a closed commercial shrimp fishing district, section or subsection. The permit shall specify the area and the date the vessel operator intends to fish. No more than 500 pounds (227 kg) of shrimp may be in possession aboard the vessel.

(iv) The daily bag and possession limit is 12 dungeness crab per person. Only male dungeness crab may be taken.

(v) In the subsistence taking of king crab:

(A) The daily bag and possession limit is six crab per person and only male crab may be taken;

(B) All crab pots used for subsistence fishing and left in saltwater unattended longer than a two-week period shall have all bait and bait containers removed and all doors secured fully open;

(C) No more than five crab pots may be used to take king crab;

(D) King crab may be taken only from June 1 through January 31, except that the subsistence taking of king crab is prohibited in waters 25 fathoms or greater in depth during the period 14 days before and 14 days after open commercial fishing seasons for red king crab, blue king crab, or tanner crab in the location;

(E) Only those residents domiciled in the Kodiak Island Borough, may take king crab in the Kodiak Area. This restriction does not apply to the Semidi Island, the North Mainland, and the South Mainland Sections.

(vi) In the subsistence taking of tanner crab:

(A) No more than five crab pots may be used to take tanner crab;

(B) From July 25 through February 10, the subsistence taking of tanner crab is prohibited in waters 25 fathoms or greater in depth, unless the commercial tanner crab fishing season is open in the location;

(C) The daily bag and possession limit is 12 crab per person and only male crab may be taken.

(5) Alaska Peninsula-Aleutian Islands Area. (i) At this time the Federal Government is only exerting its control over the subsistence harvest of shellfish found in all waters within one mile of Simeonof Island and the waters west of the easternmost tip of Ugamak Island to the terminus of the Aleutian Islands, except the area between Akutan Pass and Samalga Island.

(ii) Shellfish may be taken for subsistence purposes only under the authority of a subsistence shellfish fishing permit.

(iii) The operator of a commercially licensed and registered shrimp fishing vessel must obtain a subsistence fishing permit from the Alaska Department of Fish and Game prior to subsistence shrimp fishing during a closed commercial shrimp fishing season or within a closed commercial shrimp fishing district, section, or subsection. The permit shall specify the area and the date the vessel operator intends to fish. No more than 500 pounds (227 kg) of shrimp may be in possession aboard the vessel.

(iv) The daily bag and possession limit is 12 dungeness crab per person. Only male dungeness crab may be taken.

(v) In the subsistence taking of king crab:

(A) The daily bag and possession limit is six crab per person and only male crab may be taken;

(B) All crab pots used for subsistence fishing and left in saltwater unattended longer than a two-week period shall have all bait and bait containers removed and all doors secured fully open;

(C) Crab may be taken only from June 1 through January 31.

(vi) The daily bag and possession limit is 12 tanner crab per person. Only male crab may be taken.

(6) Bering Sea Area. (i) At this time the Federal Government is only exerting its control over the subsistence harvest of shellfish waters within Nunivak Islands shoreline to a distance one mile offshore, and waters within the Old Kuskokwim Wildlife Refuge as defined by boundaries established prior to 1959.

(ii) In waters South of 60° North latitude, shellfish may be taken for subsistence purposes only under the authority of a subsistence shellfish fishing permit.

(iii) In that portion of the area north of the latitude of Cape Newenham, shellfish may only be taken by shovel, jigging gear, pots and ring net.

(iv) The operator of a commercially licensed and registered shrimp fishing vessel must obtain a subsistence fishing permit from the Alaska Department of Fish and Game prior to subsistence shrimp fishing during a closed commercial shrimp fishing season or within a closed commercial shrimp fishing district, section or subsection. The permit shall specify the area and the date the vessel operator intends to fish. No more than 500 pounds (227 kg) of shrimp may be in possession aboard the vessel.

(v) In waters south of 600° North latitude, the daily bag and possession limit is 12 dungeness crab per person. Only male dungeness crab may be taken.

(vi) In the subsistence taking of king crab:

(A) In waters south of 60° North latitude, the daily bag and possession limit is six crab per person, and only male crab may be taken;

(B) All crab pots used for subsistence fishing and left in saltwater unattended longer than a two-week period shall have all bait and bait containers removed and all doors secured fully open;

(C) In the Norton Sound Section of the Northern District, a subsistence fishing permit is required and may be obtained from a local representative of the Alaska Department of Fish and Game;

(D) In waters south of 60° North latitude, crab may be taken only from June 1 through January 31.

(vii) In waters south of 60° North latitude, the daily bag and possession limit is 12 tanner crab, and only males may be taken.

Richard N. Smith,

Acting Director, U.S. Fish and Wildlife Service.

Michael A. Barton,

Regional Forester, USDA-Forest Service.

ENVIRONMENTAL PROTECTION AGENCY

[OPP-38506; FRL-3946-4]

Existing Stocks of Pesticide Products; Statement of Policy

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice; statement of policy.

SUMMARY: This Statement summarizes the policies that will generally guide EPA in making individual decisions concerning whether, and under what conditions, the Agency will permit the continued sale, distribution, and use of existing stocks of pesticide products whose registrations under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) are amended, cancelled, or suspended. Although most of the policies reflected in this Statement have already been applied by the Agency on a case-by-case basis, EPA now intends to formalize these policies and is soliciting comments from interested persons. If, after reviewing any comments, EPA determines that changes to this Statement are warranted, the Agency will issue a revised Statement of Policy in the Federal Register.

DATES: The policies announced in this Statement are currently in effect. The Agency will review any comments on these policies received by the Agency on or before August 26, 1991. After reviewing such comments, the Agency may issue a revised Statement of Policy.

ADDRESSES: By mail, submit comments to: Public Docket and Freedom of Information Section, Field Operations Division (H7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington DC 20460. In person, deliver comments to: Rm. 246, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA 22202.

FOR FURTHER INFORMATION CONTACT: By mail: Martha Lamont, Special Review and Reregistration Division (H7508W), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington DC 20460. Office location and telephone number: Special Review Branch, rm. 31L3, Crystal Station 1, 2800 Crystal Drive, Arlington, VA 22202, (703)-308-8033.

SUPPLEMENTARY INFORMATION: The general statement of policy on existing stocks of pesticide products whose registrations under FIFRA are amended, cancelled, or suspended follows.

GENERAL STATEMENT OF POLICY

Table of Contents

I. Application
II. Applicable Statutory Provisions
III. General Policies Applicable to All Existing Stocks
A. Cancelled Pesticides
1. Cancellations where the Agency has identified particular risk concerns.
2. Cancellations where a registrant has failed to comply with an obligation of registration.
a. Failure to pay maintenance fees.
b. Failure to pay reregistration fees.
c. Failure to file information during reregistration.
d. Failure to comply with the terms of a conditional registration.
3. Cancellation of products while subject to data call-in notices under section 3(c)(2)(B).
4. Cancellation of registrations subject to reregistration requirements and label improvement programs.
5. Other voluntary cancellations.
B. Suspended Pesticides
C. Amendments of Registration

I. Application

This Statement of Policy applies to determinations the Agency will make concerning existing stocks of pesticide products whose registrations have been amended, cancelled, or suspended pursuant to sections 3, 4, or 6 of the Federal Insecticide, Fungicide and Rodenticide Act as amended (FIFRA). This Statement also applies to existing stocks of products sold or distributed under a supplemental distributor agreement. It is the responsibility of the registrant to notify such distributors of any applicable existing stock provisions.

For purposes of this Statement, existing stocks are defined as those stocks of a registered pesticide product which are currently in the United States and which have been packaged, labeled, and released for shipment prior to the effective date of the action.

This Statement establishes general principles which the Agency generally will apply in determining whether and under what conditions to allow the sale and use of existing stocks. In general, if there are significant risk concerns associated with a cancelled pesticide, the Agency will make a case-by-case determination as to whether to allow the continued sale or use of existing stocks of the pesticide. The Agency will not allow continued sale, distribution, or use of such a pesticide unless the benefits associated with such sale, distribution, or use exceed the risks.

Where there are no significant risk concerns associated with the cancellation of a pesticide, the Agency will generally allow unlimited use of existing stocks, and unlimited sale by persons other than the registrant. A registrant will generally be allowed to continue to sell existing stocks for 1 year after the date cancellation is requested, or 1 year after the date the registrant has ceased to comply with the responsibilities that are placed upon registrants, whichever date is sooner.

This policy will be implemented on the date of publication of this notice. Because registrants were unaware of the policies contained in this notice, the Agency has decided to provide a 6-month "grace period" before certain aspects of this Policy become fully effective. Specifically, in cases where the Agency has not identified any significant risk concerns, the Agency will allow registrants of products cancelled on or before December 26, 1991 to continue to sell or distribute existing stocks at least until December 26, 1991, notwithstanding the fact that application of the policies set forth in this statement might result in a shorter existing stocks period or an outright prohibition against the sale or distribution by the registrant of any existing stocks.

II. Applicable Statutory Provisions

Under FIFRA section 3, a pesticide product must be registered with EPA before it may be sold or distributed in commerce. EPA may not register a pesticide unless, among other things, it first determines that the product and its use will not cause unreasonable adverse effects on the environment. Once a pesticide product is registered, FIFRA provides a number of different mechanisms for changing the status of a registration. These mechanisms can be grouped into three categories: Changes requested by a registrant; changes imposed by EPA for failure to comply with various obligations imposed upon registrants; and changes imposed by EPA because of a determination by the Agency that use of the pesticide product results in unreasonable adverse effects to man or the environment.

A registrant may request at any time, for any reason, to voluntarily cancel a registration (FIFRA section 6(f)) or to amend the terms and conditions of the registration, most frequently by amending the pesticide product label (FIFRA sections 3(f) and 6(f)). Voluntary amendments to registration can include, among other things, adding or deleting uses, increasing or decreasing application rates, changing the formulation of a pesticide, or changing the label language (such as changing directions for use, warning statements, etc.).

Other changes in registration status are the result of Agency action because of the failure of a registrant to fulfill certain responsibilities adequately. Each registrant has a continuing obligation to ensure that its registered products comply with the standards for registration. Note that the the term "registration" includes reregistration (see FIFRA section 2(z)). As part of this obligation, a registrant may be required to submit to EPA additional information which the Agency considers necessary to support continued registration. See FIFRA section 3(c)(2)(B). Failure to submit information required by the Agency pursuant to section 3(c)(2)(B) may result in the suspension of a registration until the information is provided.

In addition, registrants of pesticide products containing active ingredients first registered before November 1, 1984, must demonstrate, under FIFRA section 4, that their products meet the current standards for registration and should be reregistered. Failure to comply with certain provisions of section 4 can result in the cancellation or suspension of pesticide registrations. For example, registrations may be cancelled if a registrant fails to pay fees mandated by section 4(i) or fails to provide EPA with certain information during the early stages of the reregistration process (see FIFRA sections 4(d)(5), 4(e)(3) and 4(i)(7)(C)). Failure by registrants to supply other information required during reregistration may result in the suspension of registrations until the required information is provided to EPA (see, e.g., FIFRA sections 4(d)(6) and 4(f)(3)).

If a registration is a conditional registration, the Agency may also take action to cancel the registration pursuant to FIFRA section 6(e) if the registrant fails to meet any of the conditions imposed upon the product at the time of registration.

Finally, changes in the status of a registration may be mandated by EPA to assure that the product or its use does not result in unreasonable adverse effects on the environment. The Agency may reevaluate a pesticide at any time. If EPA determines that a pesticide product (without change in its terms of registration) no longer meets the standard for registration, the Agency may propose cancellation of the product under FIFRA section 6(b) or propose to classify the product for restricted use. Such Agency proposals may at times allow changes in the terms of registration (such as the deletion of particular uses or addition of specified protective measures) as alternatives to cancellation or change in classification. If the Agency determines that use may result not only in unreasonable adverse effects but in an "imminent hazard," EPA may initiate action to suspend the pesticide registration during the pendency of cancellation proceedings (FIFRA section 6(c)).

It is a violation of FIFRA section 12(a)(1)(A) to sell or distribute any pesticide that has been cancelled or suspended, except to the extent that sale or distribution is authorized by EPA. It is also a violation of FIFRA section 12(a)(2)(J) and (K) to violate the terms of a suspension or cancellation order. Thus, unless expressly permitted by the Agency, distribution or sale of existing stocks of cancelled or suspended pesticides is unlawful. Use of such existing stocks, on the other hand, is not unlawful unless specifically prohibited by the Agency in a cancellation or suspension order.

If a pesticide is cancelled under section 6(b) or section 6(e), FIFRA provides in section 6(a)(1) and (e) that the Administrator may permit the continued sale and use of existing stocks of the cancelled pesticide "to such extent, under such conditions, and for such uses as he may specify if he determines that such sale or use is not inconsistent with the purposes of (FIFRA) and will not have unreasonable adverse effects on the environment." FIFRA section 2(bb) defines "unreasonable adverse effects" as "any unreasonable risk to man or the environment, taking into account the economic, social, and environmental costs and benefits of the use of any pesticide." Thus, in determining whether to permit distribution, sale, or use of existing stocks of pesticides cancelled under sections 6(b) or 6(e), EPA must apply the same risk/benefit considerations that are applicable to other Agency actions under FIFRA (except that such considerations would be limited to the context of allowing distribution, sale, or use of existing stocks).

FIFRA does not specify a standard for the Agency to apply in determining whether to allow the distribution, sale, and use of existing stocks of pesticide products cancelled voluntarily pursuant to FIFRA section 6(f) or for failure of the registrant to comply with the requirements of section 4. The Agency has decided to make existing stocks determinations with respect to products cancelled under sections 4 and 6(f) based upon whether distribution, sale, or use of existing stocks would be consistent with the purposes of FIFRA. In determining whether such distribution, sale, or use would be consistent with the purposes of FIFRA, the Agency will first determine whether there are any significant risk concerns associated with the cancelled product. If there are such risk concerns, the Agency will generally require a risk/benefit analysis before allowing the sale, distribution, or use of existing stocks. If there are no significant risk concerns, the Agency will generally not require a risk/benefit analysis before making an existing stocks determination.

In the case of suspension of pesticide registrations for failure to submit data, FIFRA has explicitly provided the Agency with broad discretion in the area of existing stocks. Section 3(c)(2)(B) provides that the Administrator may make such provisions for the sale and use of existing stocks of a pesticide whose registration is suspended for failure to submit data as EPA "deems appropriate."

As to existing stocks of pesticides that have had their registrations amended, the Agency generally considers sale or distribution of a pesticide bearing a label or containing a formula other than the label or formula currently approved by the Agency to be a violation of FIFRA section 12(a)(1)(B), (C), or (E). The Agency has, however, established regulations (at 40 CFR 152.130) which provide for the continued sale of a product bearing previously approved labeling for certain periods of time depending upon the nature of the amendment. These regulations do not apply to changes in composition. The Agency will treat sale and distribution of products containing a previously accepted formula that is different from the currently accepted formula in the manner described in unit III.C (Amendments of Registration) of this Policy Statement.

III. General Policies Applicable to All Existing Stocks

This Policy Statement contains the general policies that the Agency intends to apply in making determinations concerning the sale or use of existing stocks of pesticides, as defined in unit I (Application) of this statement. In any individual case, the Agency will consider additional factors if appropriate. To the extent that a particular action or cancellation can fit into more than one category discussed below, EPA will generally select the most restrictive existing stocks provision that may apply. Whenever an existing stocks provision is issued, the Agency reserves the right to amend that provision on its own initiative or at the request of any interested person (either by allowing additional time to sell or use stocks or by placing additional restrictions on the sale or use of existing

VOL
56
ISS
123
JE
26
1991
UMI

stocks) if later circumstances warrant. Finally, unless an existing stocks provision stipulates otherwise, any sale or use of existing stocks must be in accordance with the previously approved label and labeling on, or accompanying, the product.

A. Cancelled Pesticides

In determining what existing stocks provision is appropriate with respect to a pesticide whose registration has been cancelled, the Agency generally will base its determination on the total circumstances affecting the cancelled registration. The actual mechanism triggering cancellation will not always be the controlling factor. Instead, the Agency generally will focus on three factors: (1) Whether there are significant potential risks which raise a question as to whether the use of the cancelled pesticide results in unreasonable adverse effects on man or the environment (this category consists primarily of cancellations where the registration is the subject of a notice of intent to cancel issued pursuant to section 6(b) or a special review initiated pursuant to 40 CFR part 154); (2) whether the registrant of the cancelled pesticide has failed to meet an obligation of registration (such as payment of fees under section 4, or submission of data required under section 3(c)(2)(B), 3(c)(7), or (4); and (3) whether the Agency has taken some regulatory position with respect to the cancelled registration (such as issuance of a Registration Standard, Label Improvement Program, or a document describing the reregistration status of a pesticide or active ingredient). Consideration of these factors in a particular case may suggest differing provisions for the sale, distribution, or use of existing stocks. In such situations, the Agency generally will apply the most restrictive existing stocks provision to the cancelled product.

1. *Cancellations where the Agency has identified particular risk concerns.* Whenever a pesticide registration is cancelled, the Agency will determine whether there are significant potential risk concerns associated with the use of the pesticide. If there are such concerns, the Agency generally will make a case-by-case determination as to whether to allow continued distribution, sale, or use of existing stocks of the cancelled pesticide. This likely will be the case whether a product is cancelled by Agency mandate after issuance of a risk-based notice of intent to cancel, whether the product is cancelled because of the registrant's failure to comply with the reregistration requirements of section 4, or whether the cancellation was requested voluntarily by the registrant.

In most cases, the Agency will not permit continued distribution, sale, or use of existing stocks of a cancelled pesticide raising risk concerns unless it can be demonstrated that the social, economic, and environmental benefits associated with such distribution, sale, or use exceed the social, economic, and environmental risks. A risk/benefit analysis for existing stocks purposes is somewhat different from the analysis that is performed by the Agency in determining whether or not to cancel a registration. In making existing stocks determinations, the Agency may consider any or all of the following criteria, to the extent that information is provided or available:

a. The quantity of existing stocks at each level of the market (i.e., in possession of registrants, distributors, retailers, end-users, etc.)

b. The risks resulting from the use of such stocks. The examination of risk may take into account the limited nature of use of existing stocks where relevant (such as where limited use might result in a level of exposure that may not result in much risk). In many cases, however, it may turn out that the risks posed by use of existing stocks will be similar or identical to the risks posed by continued registration (such as, for example, where the risk is primarily an acute risk from single exposure). In assessing the risks posed by use of existing stocks, the Agency will, to the extent possible, also consider the risks posed by likely alternatives (if any).

c. The benefits resulting from the use of such stocks. In considering the benefits of existing stocks, the Agency may consider the short-term problems (if any) in switching to alternatives, including the length of time before which such alternatives could be available to retailers and users and any hardships that might be presented to users before alternatives are available. The consideration of benefits may also include (insofar as it affects existing stocks) the type of analysis of benefits that the Agency performs in its other risk/benefit analyses (i.e., whether alternatives are available, how any such alternatives compare in terms of cost and efficacy, and what the economic effects to the user will be if the cancelled product is unavailable).

d. The dollar amount users and others have already spent on existing stocks (which would be lost if distribution, sale, or use were not permitted).

e. The risks and costs of disposal or alternative disposition of the pesticide if distribution, sale, or use are not permitted. The Agency may assess whether existing stocks could be used for other purposes. If disposal appears likely, the Agency may consider relevant aspects of disposal, including the nature, feasibility, and cost of proper disposal of the cancelled product.

f. The practicality of implementing restrictions on distribution, sale, or use of existing stocks. For instance, it may be that in some circumstances the Agency would allow continued use of a product because the product could not, as a practical matter, be retrieved.

In addition to the factors listed above, the Agency may consider any other information relevant to either the risks posed by, or the benefits resulting from, the sale and use of existing stocks.

In performing a risk/benefit analysis the Agency will consider all information and/or comments from registrants and interested persons regarding existing stocks that are received in response to public documents that the Agency issues in the course of its regulatory process. For example, where an active ingredient is in special review, the Agency will often issue a Preliminary Determination (position document (PD) 2/3) and request public comment on all proposed regulatory actions. Where a registrant's request for voluntary cancellation is received prior to initiation of special review, but while one is under consideration, the Agency will publish a notice in the Federal Register acknowledging receipt of the request and may solicit public comments regarding existing stocks provisions.

If registrants or others indicate that there is an interest in the continued sale or use of existing stocks of cancelled pesticides raising risk concerns, and if information is provided to the Agency to support such distribution, sale, or use, the Agency will generally conduct an analysis of the risks and benefits of the distribution, sale, and use of existing stocks. If information is not provided to the Agency or no interest in continued sale, distribution, or use is expressed to the Agency, the Agency will generally not conduct a risk/benefit analysis and will not permit any sale, distribution, or use of existing stocks.

While a risk/benefit analysis will be an important factor in the Agency's determination of whether or not to allow distribution, sale, and use of existing stocks of cancelled pesticides raising risk concerns, the Agency must also determine that further distribution, sale, or use would be consistent with the purposes of FIFRA. There may be unusual circumstances where the Agency will place restrictions on the distribution, sale, and use of existing stocks beyond those limits otherwise identified in a risk/benefit analysis (e.g., to prevent stockpiling by distributors and users).

In addition, in determining whether distribution, sale, or use of existing stocks would be consistent with the purposes of the Act, the Agency will generally look at the circumstances surrounding the cancellation. If a cancellation is the result of a final Agency action after a special review and a hearing pursuant to section 6(b), the Agency is unlikely to allow continued sale or distribution (and quite possibly, use) of the cancelled pesticide. In such circumstances, registrants, other distributors, and users of the pesticide have had ample notice of the Agency's intentions and sufficient time to take appropriate steps accordingly (such as to procure alternatives, not stockpile large quantities of the pesticide involved, use up stocks already on hand, etc.). On the other hand, where a voluntary cancellation occurs well before the Agency could take final action (i.e., prior to the completion of a special review or in lieu of a hearing under section 6(b)), the Agency may take into consideration the shorter period of notice sellers and users may have had before cancellation, the degree to which the registrant's actions accelerated the removal of the pesticide from the market, and whether the cancellation would have occurred at all without an existing stocks provision.

In a special review situation, the Agency will publish its final determination on whether to allow any sale, distribution, or use of existing stocks of cancelled pesticides, and if so, what conditions to place on such sale, distribution, or use, as part of the Final Determination (PD 4) and any other documents the Agency may issue either with or subsequent to the issuance of the PD 4 (such as notices of intent to cancel, cancellation orders, etc.). If a chemical raising a risk concern is cancelled without issuance of a Notice of Final Determination at the conclusion of a special review, the Agency will include a final existing stocks determination in a cancellation order. Existing stocks determinations contained in cancellation orders will be enforced under section 12(a)(2)(K) or 12(a)(1)(A) of FIFRA.

The Agency may allow the continued sale, distribution, and use of existing stocks of a voluntarily cancelled product raising risk concerns without performing a risk/benefit analysis if similar products with substantial share of the market remain on the market. For example, if a registration raising risk concerns is cancelled voluntarily, the Agency may examine whether the cancelled registration comprises a significant share of the market for the particular active ingredient and use pattern, and the circumstances surrounding the cancellation. If the cancelled registration does not comprise a significant share of the market, a prohibition on existing stocks would not be likely to significantly reduce environmental risks, because similar products would continue to be sold and used. Further, the Agency believes that it makes sense to encourage the early, voluntary cancellation of registrations when risk concerns arise.

If such an early cancellation is truly voluntary (i.e., the registration is not facing imminent cancellation or suspension), the Agency may allow the registrant to sell and distribute existing stocks for 1 year without performing a detailed risk/benefit analysis, and may allow other persons to distribute, sell, and use existing stocks until the stocks are exhausted. The Agency does not believe it should penalize registrants, distributors, or users in cases where a registrant voluntarily cancels a registration before other registrants are compelled to do so. Moreover, it is unlikely that a detailed risk/benefit analysis would yield a different result; so long as similar registrations comprising a predominant share of the market remain, it is unlikely that distribution, sale, or use of existing stocks of a relatively small volume of cancelled product would significantly (if at all) increase the risk of any unreasonable adverse effect on the environment.

On the other hand, if registrations constituting a dominant share of the market are cancelled, and the Agency does not believe that the remaining registrants can fill the previous demand for the product, the Agency will generally not allow continued sale, distribution, or use of existing stocks unless a risk/benefit analysis supporting such sale, distribution, or use is performed.

In cases where the Agency allows continued sale and use of existing stocks of cancelled products raising risk concerns because of the continuing nature of other registrations, it should be understood that the existing stocks allowance may be amended if the conditions concerning the registrations of the remaining products change. (The Agency in all cases reserves the right to amend existing stocks provisions where appropriate.) If other registrations are cancelled or amended during an existing stocks period for a voluntarily cancelled product, and the Agency establishes restrictions on existing stocks of these other registrations or requires relabeling of product made prior to the amendment, the Agency will likely impose similar restrictions on the existing stocks of the earlier voluntarily cancelled registration.

2. *Cancellations where a registrant has failed to comply with an obligation of registration.* This category consists of cancellations where the Agency does not have significant risk concerns with respect to the cancelled pesticide, but where the registrant has failed to respond appropriately to an obligation of registration. In these situations, the Agency has no particular reason to believe that continued distribution, sale, or use of the cancelled product would result in unreasonable adverse effects on the environment.

If a cancellation is not triggered by section 6(b) or 6(e) of FIFRA, the Agency is not required to perform a risk/benefit analysis before determining whether to allow continued sale, distribution, or use of existing stocks. Unless there are significant risk concerns associated with the cancelled pesticide, the Agency generally does not intend to perform such an analysis. Even where a cancellation is triggered by section 6(b) or 6(e), the Agency generally intends to make existing stocks decisions for cancelled products without performing a detailed risk/benefit analysis if there are no significant risk concerns associated with the cancelled pesticide. EPA believes it would be a poor use of resources to perform such an analysis when the Agency is not aware of any risk/benefit considerations that would serve as a basis for cancelling a registration. The Agency believes it highly unlikely that any analysis of risks and benefits of products not raising significant risk concerns would result in prohibition of distribution, sale, or use of existing stocks.

EPA does, however, believe that where registrants of cancelled products have failed to comply with requirements of registration, the nature of noncompliance with the particular obligation involved should be taken into account in determining whether distribution, sale, or use of existing stocks would be consistent with the purposes of FIFRA. Since such noncompliance does not itself raise concerns of unreasonable adverse effects on the environment, EPA will generally allow persons other than the registrant to continue to distribute, sell, or use stocks of cancelled products in this category until such stocks are exhausted (although the Agency may

VOL 56 ISS 123 JE 26 1991 UMI

place some restrictions on sale or use if inventories are not exhausted in a reasonable period of time). In the case of the noncompliant registrant, however, EPA will generally apply the policies set forth below in determining whether to allow continued sale and distribution. Those policies would generally prohibit a registrant from selling or distributing existing stocks more than 1 year from the date the registrant first failed to comply with an obligation of registration.

In any given case, multiple existing stocks dates might apply if a registrant has failed to comply with more than one obligation of registration. In such circumstances, the most restrictive date will generally apply, regardless of the triggering mechanism for cancellation. For example, if a registrant of a cancelled product failed to pay a maintenance fee due on March 1, 1990, and a reregistration fee due on June 1, 1990, the registrant would likely not be allowed to sell or distribute any existing stocks of the product after March 1, 1991 (regardless of whether the product was actually cancelled for failure to pay maintenance fees or reregistration fees).

a. *Failure to pay maintenance fees.* FIFRA section 4(i)(5) requires all registrants to pay annually by March 1st certain maintenance fees for registrations. Failure to pay such fees may result in the cancellation of a registration by order without a hearing (although the cancellation itself does not become effective until the Agency issues the cancellation order). If a maintenance fee is not paid for any given year, the Agency will generally not allow a registrant to continue to sell or distribute existing stock of a cancelled product for more than 1 year after the date when payment to support the cancelled registration was due, regardless of when the actual cancellation occurs. For example, if a registrant fails to pay a maintenance fee due March 1, 1991, to support a particular registration, and the registration is later cancelled, the Agency will generally not allow that registrant to sell or distribute existing stocks of the pesticide after March 1, 1992.

b. *Failure to pay reregistration fees.* FIFRA section 4(i) also requires some registrants to pay a reregistration fee (either in one or two deposits). This fee is to be apportioned among the applicable registrants on the basis of market share information that registrants are required to submit to the Agency. Failure to submit market share information or to pay an appropriate fee can lead to cancellation of a registration by order without a hearing (FIFRA section 4(i)(7)(C)). If a registrant fails to pay the appropriate reregistration fee or submit the required market share information, and an applicable product is later cancelled, a registrant will generally not be allowed to sell or distribute existing stocks of the cancelled product more than 1 year after the date the market share data or fee were due.

c. *Failure to file information during reregistration.* FIFRA section 4 establishes a five-phased process for reregistration activities. If a registrant elects to pursue reregistration, a registrant may have to commit to supply, and then supply, information to the Agency during Phases 2, 3, 4, and 5 (sections 4(d), (e), (f), and (g)). Failure to provide appropriate commitments or information can result in suspension or cancellation of a registration. If a registrant fails to comply fully with any particular phase of reregistration, and an affected product is later cancelled, the Agency will generally not allow a registrant to sell or distribute existing stocks of the cancelled product more than 1 year after the date that a registrant commitment for that particular product was due. For example, if an initial Phase 3 response is due from a registrant on July 24, 1991, the registrant fails to submit an adequate response, and the product is later cancelled, the Agency will generally not allow the registrant to sell existing stocks of the product after July 24, 1992.

Registrants will not be penalized for voluntarily cancelling a product at the beginning of any particular phase of reregistration (i.e., a registrant who cancels as of the commitment date will have a full year from the commitment date to sell or distribute existing stocks). Noncompliance in any phase, however, will generally be treated as if the registrant had requested voluntary cancellation at the beginning of the phase.

Agency policy with respect to existing stocks of suspended products that failed to comply with the requirements of reregistration are discussed later in this document.

d. *Failure to comply with the terms of a conditional registration.* FIFRA section 3(c)(7) allows the Agency to issue registrations before all applicable supporting data are provided. Such registrations, however, are conditional upon submission of the missing data in a timely manner (and upon compliance with any other conditions contained in the registration at the time of issuance). Failure to comply with the terms of a conditional registration can lead to issuance of a notice of intent to cancel under section 6(e).

Where a conditional registration is cancelled (and the Agency has not identified significant risk concerns), the Agency will base its existing stocks decision on the nature of any conditions that have not been met by the registrant. For purposes of this analysis, conditions of registration can be categorized as "general" conditions or "specific" conditions. A general condition, frequently applied to conditional registrations issued pursuant to FIFRA section 3(c)(7)(A) (i.e., registrations issued to products that are identical or substantially similar in chemical composition and use to one or more existing registered products), requires a registrant to submit required data when all other registrants of the similar product are required to do so. Such a general condition neither establishes specific data requirements nor specific dates; the condition is generally triggered by issuance of a data call-in notice. On the other hand, some conditional registrations, particularly those issued pursuant to FIFRA section 3(c)(7)(B) and (C) (i.e., conditional registrations of products containing new chemicals or bearing significant new uses), contain conditions requiring the submission of specified studies or information by specified dates. Where data requirements and submission dates are specifically identified in the conditional registration, such requirements are considered "specific" conditions.

The Agency will treat the failure to comply with a general condition of a conditional registration in the same manner as a failure by a registrant to comply with the terms of any other data call-in. If a registrant of a conditional registration with a general condition to submit data upon request does not thereafter submit data after issuance of a data call-in, and the registration is cancelled for any reason, the registrant would generally be allowed to continue to sell or distribute existing stocks for 1 year after either the day the 90-day response to the data call-in was due or the date at which the registrant ceased to remain in compliance with the terms of the data call-in, whichever date is later. (See unit III.A.3 below).

On the other hand, if a registrant of a conditional registration fails to comply with a specific condition identified at the time the registration was issued, the Agency does not believe it is generally appropriate to allow any sale and use of existing stocks if the registration is cancelled. Accordingly, the Agency does not anticipate allowing a registrant to sell or distribute existing stocks of cancelled products that were conditionally registered if the registrant fails to demonstrate compliance with any specific requirements set forth in the conditional registration.

3. *Cancellation of products while subject to data call-in notices under section 3(c)(2)(B).* Section 3(c)(2)(B) allows the Agency to require data from registrants. Registrants are required to make an initial response to data call-in notices in 90 days, and thereafter to submit the required data in accordance with the schedule established by the Agency. Failure to respond appropriately can result in the suspension of any registration subject to the data call-in.

Similar to reregistration, data call-in notices require a commitment from a registrant to supply data, and the timely submission of data, to maintain an active registration. Accordingly, the Agency will generally not allow registrants to sell existing stocks of cancelled products more than 1 year after the date a 90-day response to a data call-in notice is due unless the registrant remains in compliance with the terms of the notice. For example, if a registrant commits to submit a 3-year study and the product registration is thereafter cancelled upon request by the registrant pursuant to section 6(f) 9 months after the 90-day response date, sale and distribution of existing stocks by the registrant will be permitted for no more than 3 months (1 year from the 90-day response date). However, if a product subject to a data call-in is cancelled and the registrant can demonstrate full compliance with the requirements of the data call-in up to a certain date, the Agency will likely allow the registrant to continue to sell and distribute existing stocks for 1 year from the date that compliance ended. For example, if the registrant had contracted with a lab to perform a 3-year study, the lab had commenced work, and the registrant instructed the lab to cease work 6 months later, the registrant would generally be allowed to sell and distribute existing stocks of cancelled products for 1 year from the date the lab was asked to cease work on the required study. The Agency will generally allow persons other than the registrant to continue to distribute, sell, or use stocks of cancelled products in this category until such stocks are exhausted (although the Agency may place restrictions if such stocks are not exhausted in a reasonable time).

The preceding discussion assumes that data generated under the data call-in have not disclosed significant potential risks associated with the product. Registrants should be advised that voluntary cancellation of a product during a data call-in response period does not excuse the registrant from compliance with the requirements of FIFRA section 6(a)(2) to report to the Administrator any information regarding unreasonable adverse effects on the environment.

4. *Cancellation of registrations subject to reregistration requirements and label improvement programs.* In the case of a registration subject to a Label Improvement Program (LIP) or determination resulting from decisions made during reregistration, the Agency has determined that the registration of the product may continue, provided that certain changes are made to the terms of registration (generally involving the product label). If a product subject to an LIP or reregistration requirement is cancelled, whether voluntarily or upon action by the Agency (e.g., for failure to pay fees), the Agency will generally not allow a registrant or any other person to sell or distribute existing stocks unless such sale or distribution is consistent with the terms of the LIP or reregistration determination.

For example, if an LIP states that registrants may not sell or distribute a product after January 1, 1992, without a certain label change and states that other persons may not sell or distribute product without the new label after January 1, 1994, and a product subject to the LIP is voluntarily cancelled on July 1, 1991, the registrant of the cancelled product will not be allowed to sell or distribute existing stocks of the cancelled product after January 1, 1992, unless the existing stocks are relabeled to be in compliance with the LIP. Similarly, no other persons would likely be allowed to sell or distribute existing stocks of the cancelled product after January 1, 1994, unless the stocks were in compliance with the terms of the LIP.

5. *Other voluntary cancellations.* If a registrant requests to voluntarily cancel a registration where the Agency has identified no particular risk concerns, the registrant has complied with all applicable conditions of reregistration, conditional registration, and data call-ins, and the registration is not subject to a Registration Standard, Label Improvement Program, or reregistration decision, the Agency will generally permit a registrant to sell or distribute existing stocks for 1 year after the cancellation request was received. Persons other than registrants will generally be allowed to sell, distribute, or use existing stocks until such stocks are exhausted.

B. Suspended Pesticides

FIFRA provides for two different types of suspension. Under section 6(c), EPA may suspend a pesticide registration if use of the pesticide results in an imminent hazard. Under section 3(c)(2)(B), EPA may suspend a registration if a registrant fails to submit required data to the Agency in a timely fashion. Section 4(d)(6) and 4(f)(3) provide for suspensions pursuant to section 3(c)(2)(B) if registrants fail to make timely progress of data development to meet commitments for data submission, tests are not initiated within 1 year after issuance of a Phase 4 data call-in notice, or data are not submitted by the due date.

Where a pesticide is suspended because of an imminent hazard, EPA will apply the policies applicable to cancellations where the Agency has identified significant risk concerns. The Agency is highly unlikely to allow significant sale, distribution, or use of pesticides suspended because of imminent hazard concerns.

Where a pesticide is suspended because of failure to comply with the provisions of a data call-in or reregistration requirement, the Agency will generally not allow the registrant to sell or distribute any existing stocks during the pendency of the suspension. Registrants who sell or distribute a pesticide which has been suspended under FIFRA section 3(c)(2)(B) will be in violation of FIFRA section 12(a)(2)(J). Unlike imminent hazard suspensions, the Agency does not anticipate generally placing restrictions on the sale, distribution, or use of existing stocks by persons other than the registrant where a pesticide is suspended because of failure to comply with the provisions of a data call-in or reregistration requirement unless risk concerns were identified.

C. Amendments of Registrations

The Agency has promulgated regulations (at 40 CFR 152.130) dealing with the sale or distribution of products bearing labeling other than the labeling currently approved by the Agency. Section 152.130(c) of the CFR states that the Agency will "normally" allow registrants to sell products bearing old labeling for 18 months after Agency approval of a revised label and allow others to sell products bearing the old label until all such products are sold, if the product labeling is amended "on the initiative of the registrant." Section 152.130(d) goes on to say that if a

VOL
56
ISS
123
JE
26
1991
UMI

revision is the result of a Registration Standard, Label Improvement Program, or notice concluding a Special Review, the Agency may establish alternate dates after which product sold by a registrant, or sold by others, must bear currently approved labeling.

The regulations do not address the issue of time periods for sale of products bearing a different composition or packaging from that currently approved by the Agency. The Agency believes that if the composition or packaging is required to be changed by the Agency, the policies expressed below concerning label changes should apply. However, if the composition or packaging of a product is changed by a registrant voluntarily, the Agency will generally allow registrants to sell or distribute product for 18 months after the Agency approves the change; other persons will generally be allowed to sell product using the old composition or packaging until all such product is sold.

Changes in labeling made at the behest of the Agency are covered by paragraph (d) rather than paragraph (c) of 40 CFR 152.130. Thus, if label changes are imposed in a document issued during Phase 5 of reregistration (under FIFRA section 4(g)(2)(A)) or if label revisions (or other changes) are in part attributable to concerns that the product may pose unreasonable adverse effects without the change, the Agency may impose appropriate restrictions on the sale or distribution of products not only by the registrant but by others in the distribution chain as well ("channels of trade" dates).

The Agency believes that, although such channels of trade dates may be relatively lengthy, they are necessary to effective enforcement, serving as a form of "closure" on old labeling. In the Agency's enforcement experience, products bearing old labels can be found in channels of trade far longer than foreseen. Besides enforcement difficulties, lack of an absolute cutoff point for needed label changes prolongs inconsistency among similar products, leading to confusion among users as to what label instructions are correct. More importantly, the lack of a channels of trade date creates uncertainty that product labels actually represent current and protective standards. Under FIFRA, the assurance of risk reduction depends heavily on expectations that labeling instructions will be followed. Uncertainty that such compliance is occurring and inconsistency among labels can frustrate efforts by both the Agency and registrants to effect real and consistent risk reduction. Accordingly, in each label change either imposed by the Agency, or attributed in part to risk concerns under review by the Agency, EPA intends to impose both a date for introduction of new labeling into channels of trade (a registrant sale and distribution date), and a date for removing old labeling from channels of trade. Except in the case of labeling changes imposed through Special Review, EPA is unlikely to impose restrictions upon use of product bearing old labeling.

The exact restrictions that the Agency may impose will, of course, depend upon the particular circumstances involved. Nonetheless, the Agency can identify certain principles it generally will apply to label changes directed by the Agency. Label changes directed by the Agency are currently imposed under three specific activities:

1. *The Special Review Process.* Special reviews often culminate in an Agency determination that use of the pesticide without labeling changes would cause unreasonable adverse effects. Also, registrants of pesticides in special review may propose label changes prior to the conclusion of a special review to reduce the risks that are the focus of the review. When label changes are approved in such situations, existing stocks provisions will be determined on a case-by-case basis. In determining what provisions are appropriate, the Agency may consider any or all of the following factors:

a. The nature of the risk posed by the pesticide.

b. The nature of the labeling change required.

c. Whether an amendment to effect the labeling change was submitted in a timely manner.

d. The potential adverse effects associated with continued sale of product not bearing the revised labeling.

e. The volume and location of affected products in the distribution chain.

f. The feasibility, expense, and effectiveness of either requiring relabeling of existing stocks, or of restricting sale and distribution of product not bearing the revised labeling.

2. *Reregistration of current products.* Under FIFRA section 4(g), Phase 5 of the reregistration scheme requires that products containing active ingredients first registered before November 1, 1984, be reregistered. The Agency anticipates that labeling changes (amendments) will likely be required upon issuance of a document stating the Agency's determination of the reregistrability of an active ingredient under FIFRA section 4(g)(2)(A). This Reregistration Eligibility Document (RED) will ask for label changes to be submitted within one of two timeframes—normal or expedited.

In the first instance, the reregistration process envisioned in Phase 5 will normally encompass changes in labeling, composition, or packaging. These changes will be of a more routine nature, or will depend upon the development of product-specific data, such as acute toxicity or efficacy data. Dates for submission of labeling, timeframes for Agency review of labeling changes, and existing stocks provisions will be specified in the RED. Generally, submission of labeling changes will be required 8 months from the date of submission of the RED, and Agency review will be completed 6 months following submission. Registrants will generally be permitted to sell or distribute products bearing old labeling (or composition or packaging) for 1 year after the timeframe established in the RED for Agency approval, and persons other than registrants will generally be permitted to sell or distribute those products for an additional 24 months. Thus, existing stocks dates for sale and distribution of products bearing old labeling will generally be 26 months from the date of issuance of the RED for registrants and 50 months from the date of issuance of the RED for persons other than registrants.

In the second instance, the Agency may require expedited labeling changes if it has significant concerns about the risks of the active ingredient that do not warrant placing it into the Special Review process, but that labeling changes could mitigate. Although EPA believes this situation will be rare, nonetheless the significance of Agency concerns will dictate early submission and review of labeling, and relatively short existing stocks provisions. Existing stocks timeframes will be established case-by-case, depending on the number of products involved, the number of label changes needed, and other factors.

3. *The Label Improvement Program (LIP).* An LIP provides a framework for upgrading labeling that is unconnected with reregistration, and can be initiated at any time that circumstances warrant. The LIP was established to provide a mechanism for the Agency to target a particular labeling problem or a group of products having a common label element and to implement a labeling solution uniformly for all affected products. In that respect it should be viewed as neither active ingredient-specific nor product-specific, but rather "problem-specific." Fundamental to this approach is that the program does not depend upon the development or interpretation of data, such as is required for reregistration. With such a cross-cutting but focussed approach, the LIP generally endeavors to impose labeling requirements that can be specified exactly or with a minimum of variability. Although labeling may be required to be submitted and reviewed in a LIP, EPA's preferred approach is to obtain agreement via certification that registrants will make the changes. Thus, registrants can rapidly begin implementing the changes in products they distribute and sell. EPA anticipates that any submission of labeling or certification would be required in a comparatively short time after issuance of the LIP. Unless the LIP is a singularly complex one or involves large numbers of products or registrants, submissions of labeling or certifications will normally be required within 3 months. Registrants will generally be allowed to sell or distribute products bearing old labeling for 1 year after issuance of the LIP and persons other than registrants for 3 years after issuance of the LIP.

The Agency acknowledges the impact multiple and frequent required label changes have in escalating registrant costs, potentially disrupting the distribution chain, and creating user confusion. EPA will make every effort to consolidate labeling efforts resulting from reregistration with those that may be under way from LIPs or from parallel regulatory activities.

Interested persons are invited to sumbit written comments on this notice of statement of policy on or before December 26, 1991. Comments must bear a notation indicating the document control number, [OPP-38509]. Written comments should be addressed to the Public Docket and Freedom of Information Section, Field Operations Division, at the address given above.

Dated: June 17, 1991.

FEDERAL ELECTION COMMISSION

[Notice 1991-10]

11 CFR Parts 9034, 9036, and 9037

Matching Fund Submission and Certification Procedures for Presidential Primary Candidates

AGENCY: Federal Election Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Commission requests comments on proposed revisions to its regulations setting forth procedures for matching fund submissions by Presidential primary candidates. 11 CFR 9034.1, 9034.5, 9036.2, 9036.4, 9036.5, 9036.6, 9037.1 and 9037.2. The proposed changes are necessitated by the Department of the Treasury's recent promulgation of new rules regarding payments to candidates, which were adopted to address the possible shortage in the Presidential Election Campaign Fund. See 26 CFR parts 701 and 702, 56 FR 21598 (May 10, 1991). No final decisions have been made by the Commission on the proposed revisions set forth in this Notice, except that the Commission has previously adopted a new policy of rejecting submissions with high rates of nonmatchable contributions. Further information is provided in the supplementary information which follows.

DATES: Comments must be received on or before July 10, 1991.

ADDRESSES: Comments must be made in writing and addressed to: Ms. Susan E. Propper, Assistant General Counsel, Federal Election Commission, 999 E Street, NW., Washington, DC 20463.

FOR FURTHER INFORMATION CONTACT: Ms. Susan E. Propper, Assistant General Counsel (202) 376-5690 or (800) 424-9530.

SUPPLEMENTARY INFORMATION: In response to a projected shortfall in the amount of federal funds in the Presidential Election Campaign Fund for the 1992 Presidential election cycle, the Department of the Treasury has recently issued new rules regarding payments from the Fund. See 26 CFR Parts 701 and 702, 56 FR 21598 (May 10, 1991). The priorities established by the public financing statutes indicate that any shortfall will affect the availability of matching funds for primary candidates before it affects the financing of general election candidates or nominating conventions. See 26 U.S.C. 9008(c), 9008(a) and 9037. Accordingly, the new Treasury Department rules set aside funds for the nominating conventions and general election candidates prior to depositing funds in the Presidential Primary Matching Payment Account. 26 CFR 701.9008-1 and 701.9037-1. If a shortage of primary funds occurs in a particular month, the Treasury Department regulations set forth a formula for determining the amount each candidate will receive as partial payment and the amount that will be treated as certified for the next month. 26 CFR 702.9037-2. In addition, the new Treasury Department rules change the dates on which Federal payments will be made to primary election candidates. For 1992 Presidential primaries, candidates will receive federal payments on a once-a-month basis. 26 CFR 702.9037-2. All candidates will be paid on the same day each month. In previous election cycles, payments were made several times each month.

The changes in the timing of matching fund payments have led the Commission to propose changing its certification procedures so that all certifications are made on the same date each month after the beginning of the matching payment period. Given the need for adequate time to review matching fund submissions prior to certification, the Commission anticipates setting monthly deadlines for receipt of matching fund submissions near the beginning of each month. In addition, the Commission recently decided to reject matching fund submissions where the initial sampling indicates a projected dollar value of nonmatchable contributions of more than 15% of the amount requested. Accordingly, the Commission is now proposing the changes discussed below to its rules setting forth matching fund submission and certification procedures.

In the event that the projected shortfall does not occur, the Commission is seeking clarification of whether the Treasury Department will return to its previous practice of making payments throughout the month as matching fund certifications are received. If the Treasury Department does switch back to the previous payment system either before or during the matching payment period, comments are requested as to whether the Commission should, in turn, use its previous matching fund submission and certification procedures, and on the feasibility for campaigns to make this switch.

1. Submission Procedures

In previous election cycles, the Commission scheduled candidates to make matching fund submissions on the second and fourth Monday of each month after the beginning of the matching payment period. Resubmissions were scheduled for the first and third Monday. The Commission is not proposing to change the submission schedule so that all candidates would make once-a-month submissions and resubmissions on the same date. For the last two submission dates in the year before the election year and for each submission date after the beginning of the matching payment period, the candidate would be limited to making one submission, and either one resubmission under § 9036.5 or one corrected submission under § 9036.2(c) or (d)(2). The Commission would publish the list of the monthly submission dates and notify the candidates. Please note that the new monthly submission dates would not affect threshold submissions, which candidates could still make at any time. The monthly submission dates also would not apply to resubmissions made within the five day period for correcting a submission that either failed to meet the good order requirements or that had a high rate of nonmatchable contributions. See proposed 11 CFR 9036.4(a), as discussed below.

One consequence of establishing a single submission date each month is that all nonthreshold submissions would need to be full submissions. Thus, 11 CFR 9036.2(b)(2) would be revised to delete the current letter request procedures. In the event of a shortage, this would help to ensure that candidates are paid only the amount to which they are entitled. In addition, 11 CFR 9036.6 would be revised to indicate that the last date for first-time submissions for all candidates would be the first Monday in March of the year following the election year. In the past, a candidate's last submission date was either the last Monday in February or the second Monday in March, depending on the candidate's submission schedule.

2. Certification Procedures and Holdback Procedures

The proposed rules which follow would also change the timing of the Commission's certification of additional payments. Currently, 11 CFR 9036.2(c)(1) indicates that during the Presidential election year, the Commission will certify an amount within 5 business days using a holdback procedure. Any additional amount would then be certified in either 20 or 25 business days, depending upon the projected dollar value of nonmatchable contributions. These provisions would be revised by eliminating the 5, 20, and 25 day periods, and also by eliminating the use of holdback procedures to determine the amount to be certified to the Secretary of the Treasury. See Federal Election Commission's Guideline for Presentation In Good Order. If a shortfall occurs, the elimination of the holdback procedures would help to ensure that the amount certified does not exceed the candidate's entitlement, as determined under the Commission's review procedures.

Under the proposed rules which follow, certifications based on additional submissions after the beginning of the matching payment period would be made at least once a month on the same day for all candidates. The once-a-month certification dates would also apply to submissions after the candidate's date of ineligibility under the proposed revisions to 11 CFR 9036.2(c)(2). Certifications of all resubmitted contributions will also be made on the same monthly certification dates under the draft amendments to § 9036.5(d). Currently, the Commission certifies resubmitted contributions within 15 business days. However, these changes would not affect the timing of certifications of additional submissions that were filed in the year before the Presidential election year under 11 CFR 9036.2(d).

3. Commission Review of Submissions

The proposed rules at 11 CFR 9036.4 contemplate the continuation of the Commission's previous procedures for reviewing matching fund submissions, with the following modifications. First, committees would be granted five business days, instead of three, to correct submissions that have been rejected from review because they failed to meet the Commission's good order requirements. Section 9036.4(a) would also be revised to indicate that if the matching fund submission is corrected in the five day time period, it would be processed before the next regularly scheduled submission date, and the Commission's certification would be made on the certification date for the original submission. However, if a corrected submission is made after the five day period, it would be reviewed after the next regularly scheduled submission date, and the certification would not take place until the next regularly scheduled certification date.

4. High Error Rates

Recently, the Commission decided to institute a new procedure of rejecting matching fund submissions from review in cases where the projected dollar value of the nonmatchable contributions exceeded 15% of the amount requested. Please note, however, that the new rejection policy does not apply to submissions made on the last submission date in the year preceding the Presidential election year, or to submissions made during the Presidential election year before the candidate's date of ineligibility. See Audit Division Comments on Draft Explanation and Justification of Public Financing of Presidential Primary and General Election Candidates, Agenda Doc. #91-38A, May 2, 1991. At other times when the new policy is in operation, the entire submission will be returned to the committee for corrective action before any amount is certified for payment. If the committee is able to correct the submission and resubmit it within five business days, it will be reviewed before the next regularly scheduled submission date and an amount will be certified on the certification date for the original submission. However, if the resubmission is made after the five day period, it will be reviewed after the next regularly scheduled submission date, and an amount will be certified on the next regularly scheduled certification date. Corrected submissions may not contain new or additional contributions that were not previously submitted for matching. Similarly, under 11 CFR 9036.5(c)(5), resubmissions may not contain new or additional contributions that were not previously submitted. Submissions would not be considered to be corrected until the projected dollar value of nonmatchable contributions has been reduced to 15% of the amount requested or less. The new policy is reflected in proposed 11 CFR 9036.2 (c) and (d), and 9036.4(a) which follow. Please note that the order of paragraphs (c) and (d) in § 9036.2 would also be reversed to follow a more logical chronological format.

5. Treasury Department Regulations

The proposed rules which follow would also add to §§ 9034.1(a), 9037.1 and 9037.2 cross-references to the new Treasury Department regulations to alert the reader to the possibility that a matching fund certification may not result in full payment by the Treasury Department in the event of a shortage of funds in the Presidential Primary Matching Payment Account. The Treasury Department has established a formula to determine the amount each candidate will receive as a partial payment and the amount that will be treated as certified for payment in the following month.

6. Revised Certifications

The potential shortfall in the matching payment account presents another new issue. In the event of a shortfall, one consequence of the new Treasury Department regulations could be over a month's delay between certification and payment of all certified matching funds. After a candidate's date of ineligibility, the current regulations require the candidate to have net outstanding campaign obligations as of the date of payment. 11 CFR 9034.1(b). The 1963 Explanation and Justification of this provision indicates that if "the candidate's financial position changed between the date of his or her submission for matching funds and the date of payment, reducing the candidate's net outstanding campaign obligations, that candidate's entitlement would be reduced accordingly." Explanation and Justification of Presidential Primary Matching Fund Rules, 48 FR 5227 (Feb. 4, 1983). In a shortfall situation where there is a longer time period between submission date and payment date, the financial status of a candidate's committee may change significantly. For example, the candidate may wish to raise additional private contributions to pay the debts listed on the NOCO statement more promptly, thereby reducing or possibly eliminating the amount of qualified debt remaining. Consequently, the Commission is seeking comments on proposed language at 11 CFR 9034.5(f) that would require all candidates who have not been paid the full amount certified after their dates of ineligibility to submit updated NOCO statements shortly before the next payment date so that the Commission may revise the previous certifications, when necessary. The candidates and the Secretary of the Treasury would be promptly notified of any revised certifications under proposed 11 CFR 9036.4(c)(2).

The Commission welcomes comments on the foregoing proposed amendments to the rules governing matching fund submissions and certifications and the issues raised in this Notice. No final decision has been made by the Commission concerning the proposals contained in the Notice, except for the new policy regarding submissions with high error rates.

List of Subjects

11 CFR Part 9034

Campaign funds, Elections, Political candidates.

11 CFR Part 9036

Administrative practice and procedure, Campaign funds, Political candidates.

11 CFR Part 9037

Campaign funds, Political candidates.

VOL 56 ISS 123 JE 26 1991 UMI

Certification of No Effect Pursuant to 5 U.S.C. 605(b) (Regulatory Flexibility Act)

These proposed rules will not, if promulgated, have a significant economic impact on a substantial number of small entities. The basis for this certification is that few, if any, small entities are affected by these rules.

For the reasons set out in the preamble, it is proposed to amend subchapter F, chapter I of title 11 of the Code of Federal Regulations as follows:

PART 9034—ENTITLEMENTS

1. The authority citation for part 9034 would continue to read as follows:

Authority: 26 U.S.C. 9034 and 9039(b).

2. 11 CFR part 9034 would be amended by revising paragraph (a) of § 9034.1 to read as follows:

§ 9034.1 Candidate entitlements.

(a) A candidate who has been notified by the Commission under 11 CFR 9036.1 that he or she has successfully satisfied eligibility and certification requirements is entitled to receive payments under 26 U.S.C. 9037 and 11 CFR part 9037 in an amount equal to the amount of each matchable campaign contribution received by the candidate, except that a candidate who has become ineligible under 11 CFR 9033.5 may not receive further matching payments regardless of the date of deposit of the underlying contributions if he or she has no net outstanding campaign obligations as defined in 11 CFR 9034.5. See also 26 CFR parts 701 and 702 regarding payments by the Department of the Treasury.

* * * * *

3. 11 CFR part 9034 would be amended by revising paragraph (f) of § 9034.5 to read as follows:

§ 9034.5 Net outstanding campaign obligations.

* * * * *

(f)(1) The candidate shall submit a revised statement of net outstanding campaign obligations with each submission for matching fund payments filed after the candidate's date of ineligibility. The revised statement shall reflect the financial status of the campaign as of the close of business on the last business day preceding the date of submission for matching funds. The revised statement shall also contain a brief explanation of each change in the committee's assets and obligations from the previous statement.

(2) After the candidate's date of ineligibility, if the candidate does not receive the entire amount of matching funds on a regularly scheduled payment date due to a shortfall in the matching payment account, the candidate shall also submit a revised statement of net outstanding campaign obligations. The revised statement shall be filed on a date to be determined and published by the Commission which will be before the next regularly scheduled payment date.

PART 9036—REVIEW OF SUBMISSION AND CERTIFICATION OF PAYMENTS BY COMMISSION

4. The authority citation for part 9036 would continue to read as follows:

Authority: 26 U.S.C. 9036 and 9039(b).

5. 11 CFR part 9036 would be amended by revising § 9036.2 to read as follows:

§ 9036.2 Additional submissions for matching fund payments.

(a) *Time for submission of additional submissions.* The candidate may submit additional submissions for payments to the Commission on dates to be determined and published by the Commission. On the last two submission dates in the year prior to the election year and on each submission date after the beginning of the matching payment period, the candidate may not make more than one additional submission, and either one resubmission under 11 CFR 9036.5 or one corrected submission under 11 CFR 9036.2(c) or (d)(2), as appropriate.

(b) *Format for additional submissions.* The candidate may obtain additional matching fund payments subsequent to the Commission's threshold certification and payment of primary matching funds to the candidate by filing an additional submission for payment. Add additional submissions for payments filed by the candidate shall be made in accordance with the Federal Election Commission's Guideline for Presentation in Good Order.
